

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

INTERSTATE COMMERCE REPORTS

VOL. IV. ²³²⁹
10-2

DECISIONS AND PROCEEDINGS

The Official Set of the Interstate Commerce Commission
Decisions is as follows:

Volumes 1 to 5 published by L. K. Strouse & Company.
Volumes 6 to 11 published by Lawyers Cooperative
Publishing Company.
Volumes 12 to date published by Government Printing
Office.

Volumes 1 to 5 of the Lawyers Cooperative Publishing
Company edition are unofficial and are sometimes called
I. C. Reports, while the official set is known as
I. C. C. Reports or simply I. C. C.

The Lawyers Cooperative Publishing Company also pub-
lished unofficially volumes 12 and 13 after the set
had been taken over by the Government Printing Office.
Volumes 12 and 13 are included in the set but are un-
official.

EDUARDE BARTON

v.

THE CHICAGO, ROCK ISLAND & PACIFIC R. CO.

(Nos. 300, 301, 302, 303, 306.)

The continued reduction of relative rates when brought about by the removal of artificial and unnatural differences is not undesirable, but where the difference results from dissimilar circumstances and conditions, and the true difficulty appears to be a real and natural advantage which the one region has and enjoys over the other, such continuing disturbances of rates ought not to be inaug-

urated, especially when the charges are commodity rates not shown to be unreasonable in themselves.

2. Salt requires and gets a commodity rate lower than class rates, and the roads should only be limited as to such lower rating by the rule that a commodity shall not be carried at such unremunerative rates as will impose burdens upon other articles trans-

ported to recoup loss incurred in carrying that commodity.

8. On complaints of relatively unreasonable and discriminating rates on salt from Kansas fields to various points as compared with rates to the same points from the salt fields of Michigan, *Held*, That any advantages which inure to Michigan salt manufacturers from rates to points in Iowa, Illinois, Missouri and Nebraska are advantages arising from natural situation, and that the low rate to Missouri river points is influenced by conditions which are beyond the defendant's

control and existed before Kansas salt was discovered. *Held, further*, That rates on salt to points south and southwest of Hutchinson, Kansas, and St. Louis, Missouri, do constitute undue preference in favor of Michigan as against Kansas salt, and that they should be readjusted by the Santa Fé company so that, while observing the law as to the long and short haul, the advantages of distance belonging to Kansas salt fields shall be given to them in any territory supplied by its lines which lies as near or nearer to Hutchinson than St. Louis.

Complaints filed May 29, 1891.—Answers filed June 16 to November 5, 1891.—Heard June 18, 1891.—Briefs filed November 27, 1891, to March 12, 1892.—Decided April 23, 1892.

RELATIVE rates on salt from Kansas and Michigan fields.
See Complaint, 8 Inters. Com. Rep. 679.

Messrs. Swigart, Martin & Crawford, Traber, Vandever & McNeil and James Humphreys for complainants.

Messrs. Britton & Gray for Atchison, Topeka & Santa Fé, Chicago, Santa Fé & California, Gulf, Colorado & Santa Fé, and St. Louis & San Francisco Railway Companies.

John S. Blair for Missouri Pacific Railway Company.

Messrs. T. S. Wright and M. A. Low for Chicago, Rock Island & Pacific Railway Company.

John M. Thurston for Union Pacific Railway Company.

Joy, Morton & Co. Intervenor's protesting against the claim of the plaintiffs.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner:

The general complaint made by all these plaintiffs is that the several defendants give an undue advantage in rates to the manufacturers of salt in and about Saginaw, Michigan, over that enjoyed by the manufacturers of salt at Hutchinson and other salt producing points in Kansas. Some mention is also made of New York salt as being granted similar and undue advantages over Kansas salt.

Instances are given in the complaint as follows:

Rate on Bay City, Michigan, salt to St. Louis, Missouri, 611 miles per hundred pounds,.....	10 cts.
New York salt pays to St. Louis, Missouri, 806 miles per hundred	18
While Anthony, Kansas, salt pays to St. Louis, Missouri, 575 miles,...	23½
Rate on Michigan salt from St. Louis, Mo., to Fairbury, Nebraska, per hundred pounds, distance 504 miles,.....	15½
Hutchinson, Kansas, to Fairbury, Nebraska, 247 miles,.....	19
Hutchinson, Kansas, to Ft. Madison, Iowa,.....	23½
Chicago to Kansas City, Michigan, salt,.....	15
Michigan salt to Ft. Worth, Texas, 1887 miles, per hundred,.....	48½

4 INTER 8.

Kansas salt to Ft. Worth, Texas, 427 miles, per hundred,.....	35½
Michigan salt from Ft. Madison, Iowa, to Ft. Worth, Texas, 826 miles,...	35½
Hutchinson, Kansas, salt to Clio, Iowa, 372 miles, per hundred,....	23
Chicago to Clio, 378 miles, per hundred,.....	15

The distances are set forth as given in the complaint; while not in all cases exactly found from the records in this office, yet the differences do not materially affect the matter of complaint.

It is claimed that the defendants by charging the rates above set forth, and by making similar differences at other points, are violating the Act to Regulate Commerce, and a restraining order is sought. The defendants say substantially, while generally admitting the statements of the plaintiffs as to rates, that those lines which make the rates complained of are other and different than those named as defendant that defendants have no voice or part in making the rates from Chicago to the Mississippi and Missouri river points, nor from Bay City and the Michigan salt field to Chicago and St. Louis. That these rates were brought about by water competition, and other forces uncontrollable by any of the carrier lines and adjusted and agreed upon long before the Kansas

salt fields were discovered and developed, and that to make the charges sought by complainant would disturb the whole system of rates, and result in a compulsory rearrangement of all rates from Chicago and East St. Louis westward; that many independent lines extend from Chicago and St. Louis westward and southward, which do not reach the Kansas salt points, that the requirement of the law as to long and short haul, greater volume of business on the eastern portion of the lines and greater number of empty cars going westward and numerous other causes, beyond the control of the carriers, have operated to fix rates. Those rates that are complained of from Kansas to southeastern Nebraska and other points are said by defendants to be reasonable, the service being in a sparsely settled country and necessarily made by circuitous routes, and over branch lines and also controlled by circumstances and conditions which are altogether dissimilar to those controlling the fixing of the Michigan salt rates. That the rate on salt is everywhere very low, it being a commodity which will not bear any but very low rates. The defendants ask that the complaints be dismissed, or at least, that before any order is made, numerous carriers who will be affected by the order be made parties, and given an opportunity to be heard in reference to the nature and effect of the order prayed for.

By agreement of the several parties, these cases were heard together at Kansas City, Missouri, June 17, 18 and 19, 1891.

Upon the pleadings or written statements filed in these cases, the evidence introduced at the hearing, and the statistical and other information of record in this office, the following are found to be the facts:—

FINDING OF FACTS.

Salt is manufactured in great quantities in the northeastern part of the southern peninsula of Michigan. The principal points of that field are Bay City and Saginaw. Salt is also manufactured in large quantities in the southern and central parts of Kansas. Hutchinson, Texas, is an important point in the Kansas field, but Anthony, Kingman, Sterling, Nickerson and Wellington are also prominent points.

The productive capacity of each field is practically unmeasured, and probably equal to any demand that is likely to exist for the product in regions within reach of either.

The cost of producing the salt and putting it in the barrel ready for shipment, including the cost of the barrel, is estimated in the Kansas field at from 60 to 70 cents. The cost is probably about five cents per barrel less in the Michigan field. A salt barrel weighs about 20 pounds and contains about 280 pounds of salt.

The coeprage materials from which salt is

barrels are made for use in Kansas come from Michigan and from the vicinity of the Saginaw salt region, being brought by rail to Kansas. The fuel used at the Kansas salt fields is slack coal brought by rail from various points in southeastern Kansas and northwestern Arkansas. The Michigan salt manufacturers get their coeprage material from near the salt plants. In some instances they use as fuel the slabs and refuse from saw-mills. When they use coal, they get it principally from Cleveland and other lake points. This coal costs more than the slack used at the Kansas plants. The Kansas brine is much stronger than the Michigan, and the Kansas wells are not so deep. All things considered, it would seem, there is but little difference in the cost of getting salt ready for market at the two points, the advantage, if any, being with the Michigan salt.

The production and output of salt in Michigan, began in 1861; the amount that year was 125,000 barrels
In 1875 1,000,000 "
In 1890 4,000,000 "

—and Michigan now produces a very large portion of the salt supply in the United States.

Kansas salt production began in 1888, and for the year ending March 31, 1891, it reached 1,000,000 barrels. The area of territory embraced in the Kansas salt fields is large, being from east to west about 75 miles, and from north to south about 150 miles. The quality of it is good. Great quantities of salt are produced in other parts of the United States, namely, in New York, in the valley of the Ohio, in Louisiana, in Texas, and in Utah.

The United States annually consumes about 12,000,000 barrels of salt.

Salt from Michigan and New York reaches St. Louis and Chicago at very low rates. The St. Louis rate on Michigan salt exceeds the Chicago rate in the amount of 8½ cents per hundred, or 10 cents per barrel. On New York salt the rate varies during the year, the St. Louis rate being at all times from 3 to 4 cents per hundred more than to Chicago, according to the season of the year.

Great quantities of Michigan and New York salt are stored at all times at Chicago and St. Louis for distribution south to Texas points, and west to the country lying between the Mississippi river and the Rocky Mountains.

The average rate per ton per mile on salt from Michigan to points in Indiana, Ohio, and Illinois, and to East St. Louis, is .50 of a cent, and the rate to the same points from New York is .7½ of a cent.

A number of lines reach Texas points, and the western country east and west of the Missouri river, which do not reach the Kansas salt fields.

The Chicago, Rock Island & Pacific line

extends from Chicago in a southwesterly direction to the Kansas salt fields, crossing the Mississippi river at Rock Island and the Missouri river at St. Joseph and Kansas City. It also has a line from the Kansas salt region through southeastern Nebraska to Omaha, thence easterly through Des Moines, Iowa, to Chicago.

The Atchison, Topeka & Santa Fé road, runs from Chicago to the Kansas salt fields, and also reaches points in Texas, and on the Pacific coast and intermediate points, through its leased and operated lines.

The Missouri Pacific road extends westward from St. Louis to the Kansas salt fields, and by some of its lines reaches Omaha and Lincoln, Nebraska.

The St. Louis & San Francisco extends westward from St. Louis to the Kansas salt fields and also southward into Texas.

The Union Pacific does not reach the salt region, but by the Missouri Pacific receives Kansas salt at McPherson and Kanopolis, and carries to Omaha and other points west of the Missouri river.

In November, 1889, the question of rates on salt from Chicago and St. Louis, and from the Kansas region, was submitted to and settled by the award of an arbitrator as follows:

"On salt in carloads from Chicago to all Missouri river points, Kansas City to Sioux City, inclusive, per hundred pounds, 15 cents.

From St. Louis and other Mississippi river points to Missouri river points, (the rate from Mississippi river points to Sioux City applying only to points north of Clinton,) per one hundred pounds 11½ cts.

From Hutchinson and other salt producing points in Kansas to Kansas City, Leavenworth, Atchinson, and St. Joseph..... 11½ cts.
Nebraska City 16 cts.
Omaha 16½ cts.
Sioux City 18 cts.

Omaha and Sioux City not to have the rates, by routes, west of the Nebraska Division of the Missouri Pacific.

From Chicago and Mississippi river points to points in Kansas, and Kansas salt producing points to points in Missouri, through rates are to be made by adding to the above rates to Southwestern Missouri river points respectively the local rates from such points to destination.

To all points in Nebraska, west of the Missouri river, rates to be established from Chicago by the lines running from Chicago, and the same rates to be made from Hutchinson, subject to the condition that rates shall not be used which shall operate to reduce the Chicago rate."

The Missouri Pacific, and the St. Louis and San Francisco roads, connecting St. Louis with the Kansas salt fields, charge a rate in excess of the Missouri river rate to points as 4 INTER 8.

far as Sedalia and Lebanon respectively less than the sum of the locals, and to points further east the rates are made of the sum of the locals.

On account of conditions which have heretofore influenced the rates to the Mississippi and Missouri river points and points between, Kansas salt is excluded from all points in Missouri and Iowa between the Mississippi and Missouri rivers, except Kansas City and St. Joseph. The same is true as to other points, as to Michigan salt, which by the adjustment of rates, is practically excluded from St. Joseph and Kansas City.

The tonnage east bound on the defendant lines greatly exceeds the tonnage west bound.

The amount of freight passing over the Rock Island bridge for the year ending March 31, 1891, east bound was 28,000,000 pounds; west bound 1,300,000 pounds.

The tariff sheets of the St. Louis and San Francisco road reveal the use of the following rates:

Hutchinson east to Carl Junction, distance 225 miles, 11½ cents.

Oronogo, distance 231 miles, 18 cents.

Pierce City, distance 266 miles, 18 cents.

From St. Louis west to Hancock, distance 140 miles, the rate is 11½ cents.

Lebanon, 182 miles, the rate is 18½ cents.

Springfield, 237 miles, the rate is 15½ cents.

Pierce City, 287 miles, the rate is 15½ cents.

Oronogo, 322 miles, the rate is 15½ cents.

On the Atchison, Topeka & Santa Fé line rates are made to Texas points as follows:

Per ton per mile.

Hutchinson to Ft. Worth, a distance of 427 miles, rate 35½ 1.662

Ft. Madison to Ft. Worth, 826 miles, rate 35½859

Chicago to Ft. Worth, 1065 miles, rate 41½779

Bay City to Ft. Worth, 1388 miles, rate 48½625

At Austin, distance from Hutchinson 669 miles, the rate is 35½ cents, or 1.061 cents per ton per mile, while Michigan salt is given a rate from Ft. Madison to Austin 1069 miles of 35½ cents or .664 of a cent per ton per mile.

Relative differences of a kindred character are found in the charges for transporting the product manufactured at the two points, to Houston, Galveston, Laredo, San Antonio, Nacogdoches and San Angelo, the advantage in the rate per ton per mile being at all times in favor of the Michigan salt.

The question raised is one of relative rates and resulting discrimination which is claimed to be unjust, because it is said to bring about an undue preference of the Michigan region over the Kansas region both engaged in manufacturing salt, and to result in prejudice to the

Kansas locality. The giving of undue or unreasonable preference or advantage of any particular locality over another or subjecting any particular locality to any undue or unreasonable prejudice or disadvantage as to any other locality is declared in section three of the "Act to Regulate Commerce," to be unlawful. The facts are scarcely in dispute. It is practically conceded, that salt transported from Michigan, south and west, has more favorable rates than salt transported from Hutchinson and other points in Kansas, north, south and east, but defendants say that they are not responsible for the rates on Michigan salt. Its transportation, they allege, is forced to a very low mark by causes outside of any territory occupied by their lines, and where such forces are at work as to make a dominating necessity for the maintenance of present low rates, which have been established (for a long time acquiesced in), and regarded as absolute necessities for the work of transportation, in such manner as to secure the greatest good to the greatest number. That therefore, the rates complained of are, even if in violation of the law, not the acts of these defendants. They however insist, that the rates given the Michigan salt are reasonable, proper, and necessary; that the conditions and circumstances of controlling force and effect are dissimilar in reference to the two localities brought into question, namely, the Michigan and the Kansas salt fields, and finally, if there should be found a necessity for readjustment of rates, that it can only be done by making parties to the proceedings all lines interested by location and actual traffic operations in the business of either locality, with reference to the salt shipped therefrom, and carried to market over such carriers' lines.

A comparison of rates is invoked by these complaints, between rates on salt manufactured in Michigan and moving south and west, and rates on salt manufactured in Kansas and moving north and east. The commodities shipped, though similar in quality, are moving in a different, not the same direction.

From the fact that in the one case the product moves south and west to market, and in the other north and east, it follows that the lines serving in part the two localities run through differently situated countries, the one sparsely settled and not furnishing a very large local trade, the other more thickly settled, furnishing a larger local trade, and a greater volume of business. The lines leading from the Michigan salt region, besides the advantages just mentioned, have been forced, it is claimed, to make lower rates, than would probably have been acquiesced in, under other conditions, on account of water competition. And these rates were established before the Kansas salt fields were discovered, so that it is evident, that at

the time of their establishment there could have been no intention to unduly prefer the Michigan salt region, as compared with the Kansas salt region.

Not only is it claimed that water competition has lowered rates for the Michigan salt but that certain other established conditions have had the same tendency. These as set forth are, the great volume of business moving west and south from Chicago over the lines carrying Michigan salt, the heavy preponderance of east bound freight over west bound, principally caused by the large number of stock, or cattle and grain cars, used in transporting live stock and grain from western states and territories to Chicago and eastern points, thus throwing upon the lines terminating at Chicago large numbers of empty grain and cattle cars, which must return as empties to the west unless some product can be loaded into these cars, and transported west at a rate slightly remunerative. It is evident that these conditions have powerfully aided the Michigan salt in obtaining a low rate on its western and southern haul. These dissimilar circumstances and conditions are mentioned in section two of the Act to Regulate Commerce as matters to be considered. The proposition of the law seems to be that, where the circumstances and conditions of two localities are substantially similar, there shall be no advantage or preference given to one which is not also freely offered to the other. To give an advantage or preference, under such circumstances, to one place would be undue, or, in other words, would be giving to the favored locality an advantage, which did not of right belong to it, and producing an undue prejudice against the other locality.

It was urged with earnestness by the complainants, that the proof was that a great number of empty cars from Colorado and westward of Hutchinson and Kansas salt points were to be found in the region of these points, which could be conveniently and profitably loaded with salt and sent eastward, but, in our judgment, the force of this reasoning is broken by the fact that Hutchinson and the salt points of Kansas are within the grain belt, and the demand for grain cars, during a considerable part of the year, is greater than the supply; that loaded with grain these empties would yield a profit on the eastward haul which would be in excess of the profit on salt. To require carriers to take an unremunerative commodity, which demands a rate lower than the classes, in preference to another article which also takes a commodity rate, but will yield a greater profit to the carrier than the carriage of the former commodity, might be an unjustifiable requirement as revenues should not be arbitrarily reduced.

So far as the rate on Michigan salt from Bay

City to Chicago is concerned, it appears it was originally charged 83 cents per barrel, but this rate was reduced to 20 cents per barrel prior to the discovery and development of the Kansas salt, and has for a long time been the fixed rate.

The difference in charge for transportation of freight to St. Louis over the charge to Chicago is and seems to have been for a long time prior to the discovery of the Kansas salt fixed, as claimed by the railways, upon the following rule; that St. Louis should have a rate from the east as much greater than the Chicago rate as its rates westward, along distributing lines, were less than the Chicago rates, on its distributing lines, thus placing the two cities upon an equality as distributing centers. The Michigan salt reaches the Mississippi river at a rate apparently compulsory in its character on the entire line from the field of production either direct from Bay City or *via* Chicago. Forces beyond the control of the defendants have fixed this rate, and they must carry at this rate from Chicago to the Mississippi river or go out of the business. Other great advantages here concur in favor of the Michigan salt moving from Chicago. These are, great numbers of west bound empty cars, facilities for speedy loading of cars, and a minimum time of idleness for the unloaded cattle cars coming in from the west. Coal is cheaper in the region of supply for the eastern portions of the Rock Island and Atchison lines than the western portions.

It cannot be urged that the defendants are responsible for, or that they have arbitrarily fixed the rate on Michigan salt to either Chicago or St. Louis.

Nor can any comparison of rates from Hutchinson, Kansas, eastward to St. Louis with rates from Bay City to Chicago or St. Louis be of any advantage, for the conditions and circumstances are not substantially similar.

For these reasons, a comparison as to relative rates if of any value, should be as between St. Louis and Kansas City on the one hand, and Kansas City and Hutchinson, Kansas, and the several Kansas salt points on the other hand. The distance from St. Louis to Kansas City is 283 miles. The rate on salt 11½ cents.

The distance from Hutchinson and the salt points to Kansas City is 235 miles. The rate on salt is 11½ cents. The shortest rail line distances from St. Louis to Kansas City is *via* the Wabash Road being 277 miles. This road does not reach the Kansas salt regions nor is it a party defendant in this case.

The roads leading from Chicago to Kansas City cannot, as rates are now arranged, charge more than the rate from St. Louis to Kansas City plus the difference between Chicago and St. Louis, 11½ cents plus 8½ cents, or 15 cents

the rate charged. If these roads charged more than 15 cents, all the Michigan salt would go *via* St. Louis and they would carry none and would lose the profit of carrying salt.

It is claimed by the plaintiffs in this case, that the rate from Kansas salt points to St. Louis should be 15 cents, and that discrimination against Kansas salt consists in a rate of 28½ cents to that point, which was the rate at the time the complaint was made, it now being 18 cents.

It must be noted, however, that lines from Chicago reach Kansas City that do not reach the Kansas salt fields. For instance, the Chicago, Burlington & Quincy railroad reaches Kansas City, the distance being 499 miles, and by a route substantially the same it reaches St. Joseph, Mo., the distance being 471 miles, and carries salt to this point and others at a 15 cent rate, if it carries at all, that being the maximum rate it is able to charge.

The claim of the plaintiffs to be allowed a 15 cent rate to St. Louis, would, we think, disarrange and disturb relations of rates to places considered alone as to distance. If salt were carried from Kansas salt points to St. Louis for 15 cents, a distance of 512 miles, while Michigan salt pays 11½ cents for going from St. Louis to Kansas City, a distance of 283 miles, it seems apparent that the shorter distance over the same line would pay a greater rate relatively than the longer distance. From St. Louis to Kansas City being 283 miles, if it be conceded that 11½ cents is a proper rate for that distance, distance alone now being considered, then the additional 235 miles from Hutchinson to Kansas City should (distance alone now being considered), pay for the additional haul 11½ more, or a rate of 23½ cents, and this was the precise rate charged at the time of complaint, now being 18 cents. If the rate asked by plaintiffs were established and the rate on Michigan salt were continued as at present, namely, 11½ cents for the 283 miles from St. Louis to Kansas City, a continuance of which latter rate is contemplated by defendants, then at a 15 cent rate for Kansas salt from Hutchinson to St. Louis there would only be left to pay for the distance hauled to Kansas City, which is 235 miles, 3½ cents per hundred, or the rate would be less for hauling practically the same distance west of the Missouri river than charged for the same distance east of the Missouri river, and this low rate would be established, being low and unequal, on freight passing eastward on a line running through a sparsely settled country, which often suffers for want of a sufficient number of cars to carry its grain and other products eastward, and on a line which had a great number of empty cars moving westward. The effect of such a rate upon the lines which extend into the country west of the Missouri river from

Chicago, but which do not reach the Kansas salt field, could not be otherwise than disastrous and disturbing.

Being forced, either to abandon salt transportation, or to meet the lowered salt rate from Kansas, such lines would, if any appreciable margin of remuneration were left at the lower rate, undoubtedly choose the latter alternative. This would again destroy the equilibrium of rates, and Kansas salt would be in a position to demand another reduction which, if granted, would call for another lowering of rates from Chicago westward and so on indefinitely. Now while this would not be undesirable, when brought about by the removal of artificial and unnatural differences, yet when the difference is, as in this case, one resulting from dissimilar circumstances and conditions, and when made to operate on commodity rates, concerning which no one has in this case shown that they are unreasonable or high rates, it does not appear to be right to inaugurate such continuing disturbances, when the real difficulty seems to be a real and natural advantage which the one region has and enjoys over the other.

Again, it is urged that great discriminations are shown in the rates and they are so arranged as to exclude western or Kansas salt from a field which otherwise could be reached from Kansas; and instances are given, as follows: Hutchinson to Trenton, Mo., 335 miles, rate 20½; Chicago to Trenton, Mo., 416 miles, 15 cents; Chicago to Clio, Iowa, 375 miles, 15 cents; Hutchinson to Clio, Iowa, 378 miles, 23½ cents; and many other instances might be given, but the defendants reply that such apparent anomalies are forced by the requirements of the Act to Regulate Commerce as to the long and short haul.

The maximum rate to the Missouri river, as we have shown, is fixed by forces beyond the control of the defendants at 15 cents. Whenever a point is reached on the lines leading from Chicago westward where the rate made up of locals, or in any manner based on distance, equals the fixed rate of 15 cents, the additional miles hauled cannot be counted for the purpose of increasing the rate, for the law prohibits the greater rate for the shorter haul over the same line in the same direction. It is then apparent, that if any wrong is done by the differences complained of, it must be found in the rate from Hutchinson east. As we have already seen the rate in this direction, being uncontrolled by any such forces as act upon the westward movement from Chicago to the Missouri river, may be considered as the basis of an inquiry, whether the rate charged is reasonable and just under all the circumstances.

The following table shows the rate per ton
3 INTER 8.

per mile from Hutchinson to the several points named:—

To Trenton, Mo.....	.01233
To Marysville, Mo.....	.01853
To Clio, Iowa.....	.01234

Michigan salt reaches these points under circumstances, as we have before shown, advantageous to it, and compulsory upon the carriers.

We therefore feel compelled to conclude, that any advantages which would seem to inure to Michigan salt over Kansas salt, are advantages arising from situation, and not advantages unduly given by the defendant.

Complaint is made against the Union Pacific and Missouri Pacific with regard to rates on Kansas salt into Nebraska, as compared with Michigan salt rates. To understand this situation, it must be remembered that the difference in favor of St. Louis operates, in this field also, in favor of Michigan salt.

Those lines carrying directly west from Chicago, which do not reach the Kansas salt fields, are compelled either to carry salt at a very low rate to Nebraska, or go out of the business.

The Missouri Pacific reaches Omaha by a circuitous route through Beatrice and Lincoln, and the Omaha rate on Kansas salt is, as shown by the evidence, 15 cents.

But the Union Pacific and the Missouri Pacific carry to Fairbury, Neb., as follows:

By the Missouri Pacific.....	55 miles to Kanopolis.
By the Union Pacific.....	99 miles to Manhattan.
Branch of Union Pacific.....	56 miles to Marysville.
Branch of Union Pacific.....	40 miles to Fairbury, Neb.

Total distance.....250 miles.

The rate, by this route, on Kansas salt is 19 cents per hundred pounds. This is a special rate and groups both points of shipment and destination and is not made up of the sum of the locals. The rate to several points in Nebraska, with distance from Kansas salt field is given.

Rate on salt in barrels from Hutchinson, Kingman, and Anthony, Kansas.

To	Distance from Hutchinson		Rate per 100 pounds
	via Kanopolis	via McPherson	
Fairbury, Neb.	250	226	19
McCool Junction, Neb.	301	277	19
Hastings, Neb.	324	300	22
Grand Island, Neb.	349	325	22

Tobias, Fairmount, Osceola, David City, also have a 19 cent rate.

The mileage rate on the above combination route of

Missouri Pacific and Union Pacific would be Hutchinson to Kanopolis.....	11½
Kanopolis to Fairbury, Neb.....	24

35½

The rate given to Fairbury is 16½ cents below the sum of the locals, and is an evident concession to Kansas salt; and, in every specific instance called to our attention, the rate made

is the equal of the Chicago rate to the same point. But in every such case St. Louis has a rate $8\frac{1}{2}$ cents per hundred better. Complainants wish to have a rate to Nebraska points 5 cents less than Chicago and $1\frac{1}{2}$ cents less than St. Louis. If this were done, or a rate less than the Chicago rate given, those roads extending from Chicago into Missouri and Nebraska, but not reaching the Kansas salt fields, would be compelled either to go out of the business of carrying salt, or to lower the rate from Chicago, which would involve a complete readjustment of rates on salt, both east and west bound, after every such reduction.

But even such results might afford no reason why an unreasonably high rate should not be reduced. Yet upon consideration, we are not able to declare that the rates on Kansas salt to Nebraska points are unreasonably high. The evidence shows that the cost of the haul from Hutchinson to St. Louis is about 5.2 mills per ton, and that 15 cents to St. Louis would be the cost without any appreciable margin of profit, and that if east bound cars during the season of grain shipments were diverted from grain to salt transportation, it would bring about serious financial loss to the grain carrying roads. Salt is an article which requires and gets a commodity rate lower than class rates, and the general rule applicable thereto would seem properly to be that, if it has been placed at commodity or lower than class rates, the only limitation upon the roads should be that the commodity should not be carried at entirely unremunerative rates, so as to impose burdens upon other articles of transportation to recoup loss incurred in carrying the commodity.

When we come to a consideration of the evidence as to the rates on salt from Michigan to Texas, as compared with Kansas salt shipped to the same points, we find rates that we cannot approve. The Atchison, Topeka & Santa Fé road has a line running from Hutchinson in the Kansas salt fields to points in Texas. This line extends from Hutchinson in a general southerly direction.

The salt fields of Kansas lie nearer to some points in Texas than does St. Louis, the distributing point in question for Michigan salt going south. The limitations and conditions which are brought forward as tending to control the rates on salt moving westerly from Chicago, do not control the movement of Hutchinson salt southerly along the line to Texas points.

The Gulf, Colorado & Santa Fé Railroad Company is controlled by the Atchison road, through the ownership of a majority of capital stock. (See Statistics of Railways, 1889, page 55.)

The Chicago, Santa Fé & California Railway Company is operated with the Atchison

road as one property. (Statistics of Railways, 1889, page 53.)

The St. Louis & San Francisco Railway extends to the same southern and southwestern points, and is leased and operated by the Atchison road.

The Atchison has a direct line south from Hutchinson to Fort Worth, San Antonio, and other Texas points. It has another direct line to the same points from St. Louis *via* the St. Louis & San Francisco road. The latter road has a line from Hutchinson southeast toward Springfield, Mo., and at Monett Junction it intersects the line coming southwesterly from St. Louis. The exact situation may be more clearly understood by the accompanying diagram on opposite page.

By a reference to the diagram, it seems that the consumers of salt are hedged away from the Kansas salt, on the line of the St. Louis & San Francisco Railroad, at Oronogo, and Pierce City not far from 250 miles distant from the field of its production, the distance from Hutchinson to Monett Junction being about 271 miles, while the Michigan salt from St. Louis has a clear way from St. Louis to Ft. Worth *via* the Atchison line, and in turn the Kansas salt gets no relief from the direct line from Hutchinson to Ft. Worth, for the reason that the rate on salt from St. Louis to Ft. Worth is fixed at $85\frac{1}{4}$ cents while the rate from Hutchinson to Ft. Worth is $85\frac{1}{4}$ cents. Yet the distance from Hutchinson to Ft. Worth is 427 miles, while the distance from Bay City, Michigan, to Ft. Worth is 1898.

The rate from Bay City to Ft. Worth, 1388 miles, is $48\frac{1}{4}$ cents per hundred on salt, while from Hutchinson, Kansas, to Ft. Worth, 427 miles, the rate is $85\frac{1}{4}$. The excess in haul from Bay City only pays 8 cents per hundred, and the excess is twice as great as the total distance from Hutchinson to Ft. Worth.

As St. Louis is the distributing point for Michigan salt moving south and west, it would seem right to make the comparison between St. Louis and Hutchinson. St. Louis for the purpose of this inquiry may be treated as the point of origin of Michigan salt, the cost of getting it to the distributing point being perhaps an element of the original cost of the article in preparation for market. St. Louis is 748 miles from Ft. Worth, Texas; Hutchinson is 427 miles from the same point. If the common rate $85\frac{1}{4}$ cents per hundred is the proper rate for the 427 miles haul from Hutchinson to Ft. Worth, then the excess of haul from St. Louis to Ft. Worth which is 316 miles, without any reason shown in the record, is a carriage without charge. While many other considerations than distance may be considered in determining what shall constitute a proper rate, yet in this case nothing is shown to justify the apparent discrepancy of charge, and

it is believed to work an undue preference to Michigan salt over Kansas salt going to Texas and southerly points.

It can hardly be disputed that there is here a disadvantage brought about to the Kansas, and a preference given to the Michigan, salt, both undue and unreasonable. It seems that this arrangement is wholly under the control

We think that, in all this territory, where the Texas points are as near to Hutchinson as to St. Louis, the Kansas salt should by a rearrangement of rates be carried for an equal charge, and where Hutchinson is nearer than St. Louis, the Kansas salt should have the reasonable advantage of its proximity to the market, at all times, however, observing the re-

of the Atchison Railroad, and the lines leased and operated by it, and we see nothing in the situation, as proven, which can be given as a valid reason for not putting the Kansas salt fields in possession of all these natural advantages in the territory traversed by these lines.

4 INTER S.

quirements of the law as to the long and short hauls.

We find and conclude, with reference to all the other defendants, except the Atchison, Topeka & Santa Fé, and its leased and operated lines, and with reference to that portion of its

line leading directly from Chicago west, that the advantages given to Michigan salt, by which it reaches Chicago and East St. Louis, are advantages it enjoys by reason of its natural situation. That the advantage, by which it reaches the Missouri river on a very low rate, is fixed by conditions beyond the control of the defendant roads, and that such conditions existed by reason of the situation before the Kansas salt was discovered.

With reference to the Atchison, Topeka & Santa Fé Railroad, and its lines, operated and leased, running from St. Louis and Hutchinson south and southwest, and connecting with such lines, the present adjustment of rates we think *does* operate so as to bring about an undue advantage to and undue preference of Michigan salt over Kansas salt, and said defendant, the Atchison, Topeka & Santa Fé Railroad, is now advised that said rates as now adjusted are in violation of the provisions of section three of the Act to Regulate Commerce, and it is hereby ordered to desist from the enforcement of the present rates, and at once to re-adjust rates on its last named lines, at all times observing the requirements of the law as to the long and short haul, so as to give the advantages of distance belonging to Kansas salt, in all the territories supplied by its lines, that lies as near or nearer to Hutchinson than to St. Louis, and the complaints against the Missouri Pacific Railroad Company, the Union Pacific Railroad Company and the Chicago, Rock Island & Pacific Railroad Company are dismissed without prejudice.

It is found upon examination that the rate of 23½ cents per hundred pounds on salt, from Hutchinson to St. Louis, a distance of five hundred and twelve miles, is equivalent to .91 of a cent per ton per mile.

The rate of 35½ cents per hundred pounds from Hutchinson to Galveston, a distance of seven hundred and seventy-two miles is equivalent to .92 of a cent per ton per mile.

We have found that recently the rate on salt from Hutchinson to St. Louis has been reduced from 23½ to 18 cents per hundred pounds or to .708 of a cent per ton per mile. On the same basis, the rate from Hutchinson to Galveston should be 27 cents per hundred pounds. Other Texas common points should receive the same rate. This would give the carriers from Hutchinson to Ft. Worth 1.26 of a cent per ton per mile to Galveston .703 of a cent per ton per mile.

Our belief that this rate is about the fair and reasonable rate is fortified by a consideration of the rates formerly and now in force upon salt from New Iberia, Louisiana, to common

Texas points. These rates are shown in the accompanying table:

Distance.	From Iberia, La. To	In cents per 100 lbs. in sacks or barrels.			Per ton per mile.
		In effect Dec. 15, 1890.	In effect Nov. 18, 1891.	In effect Jan. 7, 1892.	
	Austin, Tex.	30.50	23.9	23.9	
	Corriscanna, Tex.	30.50	24.7	23	
501	Dallas, Tex.	30.50	25	23	1.02
523	Ft. Worth, Tex.	30.50	24.5	23	.99
565	Sherman, Tex.	30.50	27.1	27.1	.97
	Terrel, Tex.	30.50	27.5	27.5	
422	Waco, Tex.	30.50	24.3	26	1.23

It is found that the rate from New Iberia, La., to Ft. Worth, Texas, was in December, 1890, 30.50 cents per hundred pounds and is now reduced to 26 cents per hundred pounds, and that the rate to Waco, distant from New Iberia 422 miles, is now 26 cents per 100 pounds, and the rate per ton per mile 1.23 of a cent. It would seem the rate named by us has reached the common basis of similar rates. We therefore order and direct that the maximum rate on salt from Hutchinson, Kansas to Galveston and common Texas points be fixed at 27 cents per hundred pounds so long as the rate on salt from St. Louis to Texas points is fixed at 35½ cents per hundred pounds, and that the relation and proportion be hereafter maintained between rates on salt from St. Louis and Hutchinson to Texas common points as hereby established.

Upon a distance basis alone the difference is still greater but undoubtedly there is greater volume of business from St. Louis and a more abundant supply of empty cars which would justify a somewhat lower rate from St. Louis than from Hutchinson which conditions although not measurable with mathematical exactness have been considered in fixing the above rate.

The cases seem to have been prepared with reference to the manufactured and barreled salt, and the necessary facts and conditions with regard to rock salt are not found in the record to enable an intelligent determination with reference to rates upon that product. Statements are made in a brief filed September 2, 1891, by the Lyons Rock Salt Company that the competition of the rock salt is not with the Michigan but with the New York salt, and it is asserted that the production of rock salt in Kansas might be greatly increased if rates were properly adjusted. It is also claimed that the rates from New York salt points to St. Louis and Chicago are relatively much less than the rates from Kansas rock salt points to Chicago and St. Louis. The

want of evidence upon the points claimed, the absence of any parties representing the New York salt interests, the fact that for aught that appears no railway line making the New York salt rates to Chicago and St. Louis is a party defendant, compel the conclusion that it would be unsafe for the Commission to attempt upon this record to consider the question raised by the brief. It may here also be noticed that the Lyons Rock Salt Company filing the brief is not a party plaintiff in any one of the cases under consideration.

It is therefore deemed right to say that nothing in this report and opinion is intended in any manner to apply to rates upon rock salt, or to any question of relative rates, upon comparison of rates of New York rock salt with rates on Kansas rock salt; the several parties interested in such products being left entirely free to whatever action they may deem wise, without being embarrassed by any action taken in these cases which have sole reference to questions of comparison between rates on manufactured salt made either in Michigan or Kansas and not to rock salt.

Some reference has been made in the briefs filed to a circular number 48 of the Western Traffic Association, dated Chicago, November 3, 1891, which shows an authorization by the Chairman of that Association to the lines embraced therein to make a through rate from Kansas salt points to Mississippi river points, Ft. Madison to St. Louis inclusive at some date to be fixed by the Chairman of the Association. It is contended that the circular is not properly in evidence, and, if it were, that it should have no weight in determining the merits of the controversy. It has not in fact been considered, but it is not the wish or purpose of the Commission in any manner to throw any obstacle in the way of any attempt on the part of the lines connected with the association to amicably adjust salt rates upon a better basis than the one now in use. In fact we find the present rate on salt from Anthony, Kansas, to St. Louis is 18 cents and we do not wish in the least to interfere with or disturb this rate. This rate now in force, was established December 16, 1891, and applies to St. Louis and other Mississippi river points and to intermediate points as far as Brant 145 miles west of St. Louis.

In conclusion, it is perhaps due to the complainants, that notice should be taken of their complaint that the Kansas salt rate to interior points in Iowa and Missouri is made by adding the local rate from the Missouri river points to destination to the rate from the salt points to the Missouri river points, while the rate from Chicago to central points in Iowa and Missouri is a single through rate.

We cannot regard the difference as of any

great importance, the question being directly as to the relative rates, and not the manner in which they are made.

If, as has been heretofore shown, a reduction of the salt rate from Kansas points to points between the Missouri and Mississippi rivers would be inexpedient, and unproductive of any relief to complainants, and no appreciable benefit to consumers, then it is immaterial how the rate is made, whether a single amount or by a combination of amounts. The conclusion reached after a comparison of two rates could hardly be changed, whether the rates under consideration were made as a single aggregate sum for the service or by combining certain sums, whether locals or arbitrary amounts. The real inquiry is whether the rates are in themselves high and unreasonable or wanting in proportion and relation to other rates, and whether any actual benefit would inure to complainants by reason of reducing them. We are convinced as already shown, that every reduction would bring about a corresponding reduction in the opposing rate, constant disturbance and fluctuation in rates, no benefit to complainants, probable reduction of revenue to carriers and no advantage to consumers.

Much has been said about grain rates and comparisons made therewith. The rates on grain are as shown by the records of this office as follows:

Hutchinson to St. Louis,	{ Wheat, 25 cts. per hund.
	{ Corn, 20 cts. per hund.
Hutchinson to Chicago,	{ Wheat, 30 cts. per hund.
	{ Corn, 25 cts. per hund.

There is no sufficient similarity between salt and grain to make a comparison in any degree instructive. Salt moves in quantities sufficient to supply the entire demand, from widely separated points of production to common intermediate points of consumption. Grain moves, as a rule, in one direction only to the general markets of the world and the demand is practically unlimited. The markets for grain will usually absorb the entire supply and the lowering of rates on grain inures largely to the producer of grain. A reduction in salt rates to the interior of Iowa and Missouri could not have such an effect. The market is necessarily limited. Disturbing rates would, as we have shown, lead to corresponding reductions as to the other competing field, so that a reduction will not give any profit, or any greater market in the end to the Kansas producers. Natural causes and forces ought to have full sway. The public mind has condemned what it has believed to be the attempt of railway managers to interfere with them. Commissions and other bodies in regulating transportation should, as far as possible, avoid the same error.

THE MINNEAPOLIS, MINNESOTA, CHAMBER OF COMMERCE,
v.

THE GREAT NORTHERN RAILWAY COMPANY;
The Chicago, Milwaukee & St. Paul R. Co.;
The Northern Pacific R. Co.; The Chicago
& Northwestern R. Co.; The Chicago, St.
Paul, Minneapolis & Omaha R. Co.; The
Minneapolis, St. Paul & Sault Ste. Marie R.
Co.; The St. Paul & Duluth R. Co.; The
Eastern Railway Company of Minnesota.

(No. 329.)

Complaint filed February 3, 1892.

THE complaint alleges that defendant's rates on wheat from points of origin to Minneapolis, Minnesota, are unreasonable and unjust and create an undue prejudice to Minneapolis in favor of Duluth and other Lake Superior points, taking the same rates as Minneapolis and that their rate on flour from Minneapolis to Lake Superior points is unjust and discriminating. That the rate on wheat to Minneapolis should not exceed 75 per cent of the rate to Lake Superior points, nor should said rate on wheat to Minneapolis, added to the flour rate to Lake Superior points, exceed the rate on wheat from the same point of origin to said Lake Superior points.

THE TECUMSEH CELERY COMPANY,
v.

THE CINCINNATI, JACKSON & MACKINAW RAILROAD COMPANY, and The Wabash R. Co.,

(No. 328.)

Complaint filed February 1, 1892.

THE complaint alleges that defendants are common carriers subject to the Act and that they charge an unreasonable and prejudicial rate on celery in carloads from Tecumseh, Michigan to Kansas City, Missouri, which is greater than carload rates on cauliflower and other similar vegetables, and also, that they refuse to transport mixed carloads of celery and other vegetables similar in bulk and value at a reasonable carload rate.

ALLEN RUTHERFORD,
v.

BALTIMORE & OHIO RAILROAD COMPANY, and Lehigh Valley R. Co.

(No. 327.)

Complaint filed January 29, 1892.

THE complaint alleges that defendants are common carriers subject to the Act to Regulate Commerce and under a common control, management or arrangement for the continuous carriage or shipment, are engaged in the transportation of passengers and property between points in the state of Pennsylvania

and points in the state of Maryland. That defendants charged to complainant an unreasonable rate of \$3.60 per hundred pounds on a carload of 36,800 pounds of coal shipped for Mauch Chunk, Pennsylvania to Gaithersburgh, Maryland, which was more, as complainant verily believes, than is or has been charged to other persons. Order commanding defendants to cease and desist from making such unlawful charges and to make reparation is prayed for.

PHELPS & COMPANY,
v.

TEXAS & PACIFIC RAILWAY COMPANY.

(No. 330.)

Complaint filed March 2, 1892.

COMPLAINT alleges that defendant demands payment of freight charges on cotton which are based on a constructive weight of 535 pounds per bale, and requires the filing of claim for overcharge if any is made. That on complainants refusal to accede to their demand defendant required complainant and cotton press companies interested with them to pay freight charges before delivery of cotton.

JOHN LYFORD
v.

MOBILE & OHIO RAILROAD COMPANY, and The Cleveland, Cincinnati, Chicago & St. Louis R. Co.

(No. 332.)

Complaint filed March 17, 1892.

COMPLAINT alleges that defendants under a common control, management or arrangement charge 25 cents per 100 pounds on lumber in carloads from Mobile, Alabama to Fernbank, Ohio, while at the same time they charge only 24 cents per 100 pounds on lumber in carloads for the longer distance over the same line to Cincinnati. Order correcting rates and awarding reparation prayed for.

Notice of correction of rates and settlement of complainant's claim filed.

SALT LAKE CHAMBER OF COMMERCE
v.

THE UNION PACIFIC RAILWAY Co.; The Denver & Rio Grande R. Co.; The Rio Grande Western R. Co.; The Southern Pacific Co.; The Burlington & Missouri River R. Co.; The Atchison, Topeka & Santa Fé R. Co.; and The Chicago, Rock Island & Pacific R. Co.

(No. 333.)

Complaint filed March 21, 1892.

COMPLAINT alleges unreasonable and prejudicial rates on freight articles from Missouri river points to Salt Lake City, and greater

charges for the shorter distance to that city than for the longer distance over the same line in the same direction to San Francisco, in violation of the Act to Regulate Commerce.

F. FEARNLEY

v.

THE CENTRAL RAILROAD COMPANY OF NEW JERSEY; and Delaware, Lackawanna & Western R. Co.

(No. 335.)

Complaint filed March 24, 1892.

COMPLAINT alleges defendants charged an unreasonable and unpublished rate on six carloads of peaches from Lebanon, New Jersey, to Buffalo, New York, which was higher than their published rate for less than carload lots. Order forbidding such violations and awarding reparation prayed for.

J. K. FARRELL et al.

v.

THE LOUISVILLE & NASHVILLE RAILROAD COMPANY.

(No. 331.)

Complaint filed March 9, 1892.

COMPLAINT alleges that defendants charge unreasonable and discriminating rates,

which are also in violation of the long and short haul provision of the Act to Regulate Commerce, on freight articles to and from Columbia, Tennessee, caused by the fact that rates to and from Columbia, Tennessee, caused by the fact that rates to and from Columbia are generally higher than Nashville rates to the extent of the prevailing local rate between Nashville and Columbia.

JAMES & ABBOTT

v.

THE CANADIAN PACIFIC RAILWAY COMPANY; The Maine Central R. Co.; and The Boston & Maine R. Co.

(No. 334.)

Complaint filed March 21, 1892.

COMPLAINT alleges that defendants charge unreasonable and discriminating rates on shingles in carloads of 31½ cents per hundred pounds from Fort Fairfield, Steven's Siding and Hurd's Siding in the state of Maine to Boston, Massachusetts, a distance of 484 miles, while from Fredericton, Tracey and Russiagornish, all in the province of New Brunswick, to Boston, a distance of about 438 miles, they charge on shingles only 16½ cents per hundred pounds. Order correcting rates and awarding reparation prayed for.

UNITED STATES SUPREME COURT.

J. TALMAN BUDD, *Piff. in Err.*,

v.

THE PEOPLE OF THE STATE OF NEW YORK.

THE PEOPLE OF THE STATE OF NEW YORK, *ex rel. EDWARD ANNAN, Piff. in Err.*,

v.

ANDREW WALSH, Police Justice of the City of Brooklyn, and CLARK D. RHINEHART, Sheriff of the County of Kings.

THE PEOPLE OF THE STATE OF NEW YORK, *ex rel. FRANCIS E. PINTO, Piff. in Err.*,

v.

ANDREW WALSH, Police Justice of the City of Brooklyn, and CLARK D. RHINEHART, Sheriff of the County of Kings.

(See S. C. 142 U. S. 517-552, 36 L. ed. 247-250.)

1. The New York law of 1888, regulating the fees for elevating and discharging grain by elevators is not contrary to the 14th Amendment to the Constitution of the United States, and does not deprive the citizen of his property without due process of law; and is not unconstitutional in fixing the maximum charges which it specifies, nor in limiting the charge for shoveling to the

actual cost thereof, and it is a proper exercise of the police power of the state.

2. The business of elevating grain is a business charged with a public interest, and those who carry it on occupy a relation to the community analogous to that of common carriers, and may be controlled by public legislation for the common good.

3. The New York Act of 1888, as to elevators, is constitutional, as an exercise of the police power of the state; it is not a regulation of interstate commerce, and does not deprive the elevator owners of the equal protection of the laws.

4. The Legislature can fix a maximum beyond which any charge would be unreasonable, for the use of property in which the public has an interest, but cannot compel the doing of services without reward.

[Nos. 719, 644, 645.]

Argued and Submitted Nov. 17, 18, 1891. Decided Feb. 29, 1892.

THE first of the above named cases, *Budd v. The People of the State of New York*, is in error to the Superior Court of Buffalo, state of New York, to review a judgment of that court, adjudging that said Budd pay a fine and in default thereof be committed to jail for a violation of the New York law of 1888, regulating the fees and charges for elevating, etc., grain by means of a stationary elevator which judgment had been affirmed by the General Term of that court and by the Court of Appeals of New York.

The second and third of the above named cases, *People v. Walsh*, are in error to the Supreme Court of the state of New York, to review judgments of that court, in General Term, dismissing writs of habeas corpus and certiorari issued in order to discharge said Edward Annan and Francis E. Pinto, who were arrested and in custody for the violation of said New York law by exacting excessive charges for elevating, etc. grain and for trimming the cargo, which judgments had been affirmed by the New York Court of Appeals. *Judgments affirmed.*

See same cases 148 U. S. 517, 86 L. ed. 247, below, 5 L. R. A. 559, 117 N. Y. 1, 621, 50 Hun, 418.

The facts are stated in the opinion.

Mr. Spencer Clinton, for plaintiff in error, in *Budd v. State of New York*:

The police power of the states only extends to property or business which is by its owner devoted to the public by granting to the public the right to demand its use.

People v. Walsh, 117 N. Y. 621; *Rhode Island v. Massachusetts*, 37 U. S. 12 Pet. 657, 728 (9: 1288, 1260); *Ogden v. Saunders*, 25 U. S. 12 Wheat. 854 (6:654); *Cohens v. Virginia*, 19 U. S. 6 Wheat. 416 (5:294); *Craig v. Missouri*, 29 U. S. 4 Pet. 481, 482 (7:910, 911).

Messrs. Benjamin F. Tracy and William N. Dykman, for plaintiff in error, in *People, ex rel. Annan, v. Walsh* and in *People, ex rel. Pinto, v. Walsh*.

Floating elevators in the port of New York are private. They are not affected with any public interest, and they are not subject to regulation of rates.

Alexander v. Greene, 3 Hill, 9; *Caton v. Rumney*, 13 Wend. 387; *Wells v. Steam Nav. Co.* 2 N. Y. 204; *Wetmore v. Brooklyn Gas Light Co.* 42 N. Y. 384; *Woodruff v. Havemeyer*, 7 Cent. Rep. 776, 106 N. Y. 129.

The canal does not impress with a public character those who are engaged in carrying merchandise through it.

Fish v. Clark, 49 N. Y. 122; *Wells v. Steam Nav. Co.* 2 N. Y. 204; *Alexander v. Greene*, 3 Hill, 9.

This law is unconstitutional.

Chicago, M. & St. P. R. Co. v. Minnesota, 4 INTER S.

184 U. S. 466 (83:984); *Cooley, Const. Lim.* 222; 15 Vin. Abr. 398; *Cooley, Const. Lim.* (5th ed.) 786; *Hiz v. Gardiner*, 2 Hurlst. 195; *Re Eureka Basin W. H. & Mfg. Co.* 96 N. Y. 42; *New York v. Starin*, 8 Cent. Rep. 48, 106 N. Y. 1; *Mills v. St. Clair County Comrs.* 4 Ill. 53; *Trustees of Schools v. Tatman*, 13 Ill. 27.

In New York the Brooklyn wharves are private.

Wetmore v. Brooklyn Gas Light Co. 42 N. Y. 384; *Woodruff v. Havemeyer*, 7 Cent. Rep. 776, 106 N. Y. 129; *Allen v. Sackrider*, 87 N. Y. 341; *Fish v. Clark*, 49 N. Y. 122; *Re New York L. & W. R. Co.* 99 N. Y. 12.

A floating elevator in the port of New York is wholly private.

Munn v. People, 69 Ill. 80; *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557 (30:244).

This law is unconstitutional and void because it decides that Mr. Annan's elevator is not private, and therefore free from legislative control without due process of law.

People v. Marz, 99 N. Y. 377; *Morgan v. King*, 85 N. Y. 454; *Newland v. Marsh*, 19 Ill. 376; *Brown's App.* 16 Pa. 266; *Hurtado v. California*, 110 U. S. 516 (28:232).

Every principle which should govern legislation is violated by this law.

People v. Gillson, 12 Cent. Rep. 616, 109 N. Y. 399.

Mr. George T. Quinby, for defendant in error in *Budd v. State of New York*:

The courts of New York have been most conservative in their construction of acts of the Legislature affecting the rights of the citizen.

Re Jacobs, 98 N. Y. 96; *People v. Marz*, 99 N. Y. 377; *People v. Gillson*, 12 Cent. Rep. 616, 109 N. Y. 399; *Powell v. Pennsylvania*, 127 U. S. 678 (32:253).

The same subject has been repeatedly under the consideration of this court, and the police power of the legislatures of the different states sustained.

Mugler v. Kansas, 123 U. S. 623 (31:205); *Slaughter-House Cases*, 83 U. S. 16 Wall. 86 (21:394); *Munn v. Illinois*, 94 U. S. 113 (24:77).

When one devotes his property to a use in which the public have an interest, he in effect grants to the public an interest in that use, and must submit to be controlled by public legislation for the common good, to the extent of the interest he has thus created.

The presumption is strongly in favor of the statute.

Sinking Fund Cases, 99 U. S. 718 (25:501); *People v. Comstock*, 78 N. Y. 356; *Re Gilbert Elec. R. Co. v. Handerson*, 70 N. Y. 387.

The business of elevating grain is of such a nature as fairly to be classed as a business charged with a public interest.

New Jersey Steam Nav. Co. v. Merchants

Bank of Boston, 47 U. S. 6 How. 844 (12:465); *Sandford v. Catawissa, W. & E. R. Co.* 24 Pa. 381; *Chicago & N. W. R. Co. v. People*, 56 Ill. 877; *Munn v. Illinois*, 94 U. S. 180 (24:85); *Chesapeake & P. Teleph. Co. v. Baltimore & O. Teleg. Co.* 66 Md. 899, 59 Am. Rep. 167.

Whenever a person pursues a public calling of such a nature that the people must of necessity deal with him, and are therefore under a moral duress to submit to his terms if unrestrained by law, then, in order to prevent extortion and an abuse of his position, the price he may charge for his services may be regulated by law.

Com. v. Duane, 98 Mass. 1; *State v. Perry*, 50 N. C. 252; *Murray v. Hoboken Land & Imp. Co.* 59 U. S. 18 How. 272 (15:872); *Mills v. St. Clair County Comrs.* 4 Ill. 58; *Trustees of Schools v. Tatman*, 13 Ill. 87.

The highest courts of several states have followed the principles deemed to be settled in the *Munn* case.

Bertholf v. O'Reilly, 74 N. Y. 528; *Davis v. State*, 68 Ala. 58, 44 Am. Rep. 182; *Millet v. People*, 5 West. Rep. 155, 117 Ill. 294, 57 Am. Rep. 873; *Western U. Teleg. Co. v. Pendleton*, 95 Ind. 12; *Nash v. Page*, 80 Ky. 539; *Chesapeake & P. Teleph. Co. v. Baltimore & O. Teleg. Co.* 66 Md. 899; *Sawyer v. Davis*, 186 Mass. 289; *Stone v. Yazoo & M. V. R. Co.* 62 Miss. 607; *State v. Nebraska Teleph. Co.* 17 Neb. 126; *Thorpe v. Rutland & B. R. Co.* 27 Vt. 140.

If it is a question of fact as to whether the business of elevating grain is a public or private business, then such question of fact is wholly within the province of the Legislature to determine.

Powell v. Pennsylvania, 127 U. S. 685 (32:256); *People v. Draper*, 15 N. Y. 545; *State v. Addington*, 77 Mo. 110; *Doyle v. Continental L. Ins. Co.* 94 U. S. 535, 541 (24: 148, 151); *People v. Orange County Suprs.* 17 N. Y. 285; *People v. Albertson*, 55 N. Y. 50.

The fact that the Act in question may impair the value of property does not render it unconstitutional.

Phelps v. Racey, 60 N. Y. 14; *Hill v. Thompson*, 16 Jones & S. 481; *Thorpe v. Rutland & B. R. Co.* 27 Vt. 140; *Slaughter-House Cases*, 83 U. S. 16 Wall. 86 (21:394).

Messrs. J. A. Hyland and Charles F. Tabor, for defendants in error, in *People, ex rel Annan, v. Walsh*, and in *People, ex rel Pinto, v. Walsh*.

The power of the Legislature to control and regulate charges for elevating grain, as embraced in the Act, rests upon the nature and extent of the business, which affects the business with a public interest.

Munn v. Illinois, 94 U. S. 124 (24: 88); *Coolley*, Const. Lim. (5th ed.) 739.

The Act is constitutional as an exercise of the police power of the state.

Broom, Leg. Max. (7th Am. ed) 1 *et seq.*, and 364 *et seq.*; *Entick v. Carrington*, 19 How. St. Tr. 1066; *Mobile v. Yulille*, 8 Ala. 139, 140, 36 Am. Dec. 441; *Bertholf v. O'Reilly*, 74 N. Y. 509; *Phelps v. Racey*, 60 N. Y. 10; *Hill v. Thompson*, 16 Jones & S. 481; *Davis v. State*, 68 Ala. 58, 44 Am. Rep. 128; *Barbier v. Connolly*, 118 U. S. 27 (28: 928); *Soon Hing v. Crowley*, 118 U. S. 703 (28: 1145); *State v. Burgoyne*, 7 Lea, 178, 40 Am. Rep. 60.

4 INTER S.

The leading decisions of this court which touch the questions involved in the cases at bar sustain the constitutionality of this Act.

Munn v. Illinois, 94 U. S. 113 (24: 77); *Peik v. Chicago & N. W. R. Co.* 94 U. S. 176 (24: 98); *Dow v. Beidelman*, 125 U. S. 688 (31: 843); *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 455 (33: 979).

The law in question is valid as an Act regulating commerce on the waters of the state.

Munn v. Illinois, 94 U. S. 185 (24: 87); *Coolley v. Board of Wardens*, 58 U. S. 12 How. 299 (18: 996); *Ex parte McNeil*, 80 U. S. 18 Wall. 286 (20: 624); *Wilson v. McNamee*, 103 U. S. 573 (26: 234); *Fitch v. Livingston*, 4 Sandf. 492.

A statute to be held unconstitutional must be plainly at war with the fundamental law.

People v. Terry, 10 Cent. Rep. 460, 108 N. Y. 1. Every presumption is in favor of the validity of an enactment of the state Legislature.

People v. Comstock, 78 N. Y. 356; *Re Gilbert Elev. R. Co. v. Handerson*, 70 N. Y. 861, 867; *People v. Briggs*, 50 N. Y. 585; *Butchers U. Co. v. Crescent City Co.* 111 U. S. 746 (28: 585).

Mr. Justice Blatchford delivered the opinion of the court:

On the 9th of June, 1888, the governor of the state of New York approved an Act, chapter 581 of the laws of New York of 1888, which had been passed by the two houses of the Legislature, three fifths being present, entitled "An Act to Regulate the Fees and Charges for Elevating, Trimming, Receiving, Weighing and Discharging Grain by Means of Floating and Stationary Elevators and Warehouses in this State." The Act was in these words: "Section 1. The maximum charge for elevating, receiving, weighing and discharging grain by means of floating and stationary elevators and warehouses in this state shall not exceed the following rates, namely: For elevating, receiving, weighing and discharging grain, five eighths of one cent a bushel. In the process of handling grain by means of floating and stationary elevators, the lake vessels or propellers, the ocean vessels or steamships, and canal boats, shall only be required to pay the actual cost of trimming or shoveling to the leg of the elevator when unloading, and trimming cargo when loading. § 2. Any person or persons violating the provisions of this Act shall, upon conviction thereof, be adjudged guilty of a misdemeanor, and be punished by a fine of not less than two hundred and fifty dollars and costs thereof. § 3. Any person injured by the violation of the provisions of this Act may sue for and recover any damages he may sustain against any person or persons violating said provisions. § 4. This Act shall not apply to any village, town or city having less than one hundred and thirty thousand population. § 5. This Act shall take effect immediately."

On the 26th of November, 1888, an indictment, which had been found by the grand jury of Erie county, New York, in the court of sessions of that county, against J. Talman Budd, for charging and receiving fees for elevating, receiving, weighing, and discharging grain into and from a stationary elevator and warehouse, contrary to the provisions of said

statute, came on for trial before a criminal term of the superior court of Buffalo, Erie county.

The charge in the indictment was, that Budd, at Buffalo, on the 19th of September, 1888, being manager of the Wells elevator, which was an elevator and warehouse for receiving and discharging grain in the city of Buffalo, that city being a municipal corporation duly organized in pursuance of the laws of the state of New York and having a population of upwards of 180,000 people, did receive, elevate and weigh from the propeller called the Oceanica, the property of the Lehigh Valley Transportation Company, a body corporate, 51,000 bushels of grain and corn, the property of said company, into the said Wells elevator, and unlawfully exacted from said company, for elevating, receiving, weighing and discharging said grain and corn, the sum of one cent a bushel, and also exacted from said company, for shoveling to the leg of the elevator, in the unloading of said 51,000 bushels of grain and corn, \$1.75 for every 1,000 bushels thereof, over and above the actual cost of such shoveling.

The facts set forth in the indictment were proved, and the defendant's counsel requested the court to instruct the jury to render a verdict of acquittal, on the ground that the prosecution was founded on a statute which was in conflict both with the Constitution of the United States and with that of the state of New York; that the services rendered by Budd, for which the statute assumed to fix a price, were not public in their nature; that neither the persons rendering them, nor the elevator in question had received any privilege from the Legislature; and that such elevator was not a public warehouse and received no license. The court declined to direct a verdict of acquittal, and the defendant excepted.

The court charged the jury that it was claimed by the prosecution that the defendant had violated the statute in charging more than five eighths of one cent a bushel for elevating, receiving, weighing and discharging the grain and in charging more than the actual cost of trimming or shoveling to the leg of the elevator, in unloading the propeller; that the statute was constitutional; and that the jury should find the defendant guilty as charged in the indictment, if they believed the facts which had been adduced. The defendant excepted to that part of the charge which instructed the jury that they might find the defendant guilty of exacting an excessive rate for shoveling to the leg of the elevator, and also to that part which instructed the jury that they might convict the defendant for having exacted an excessive rate for elevating, receiving, weighing and discharging the grain and corn.

The jury brought in a verdict of guilty as charged in the indictment, and the court sentenced the defendant to pay a fine of \$250, and, in default thereof, to stand committed to the common jail of Erie county for a period not exceeding one day for each dollar of said fine. The defendant appealed from that judgment to the general term of the superior court of Buffalo, which affirmed the judgment. He then appealed to the Court of Appeals of New York, which affirmed the judgment of the su-

perior court of Buffalo; and the latter court afterwards entered a judgment making the judgment of the Court of Appeals its judgment. The defendant then sued out from this court a writ of error directed to the superior court of Buffalo.

The opinion of the Court of Appeals is reported in 117 N. Y. 1, 5 L. R. A. 559. It was delivered by Judge Andrews, with whom Chief Judge Ruger and Judges Earl, Danforth, and Finch concurred. Judges Peckham and Gray dissented, Judge Gray giving a dissenting opinion, and Judge Peckham adhering to the dissenting opinion which he gave in the case of *People v. Walsh*, 117 N. Y. 84.

On the 22d of June, 1888, a complaint on oath was made before Andrew Walsh, a police justice of the city of Brooklyn, New York, that on the preceding day one Edward Annan, a resident of that city, had violated the provisions of chapter 581 of the laws of New York of 1888, by exacting from the complainant more than five eighths of one cent per bushel for elevating, weighing, receiving, and discharging a boat load of grain from a canal boat to an ocean steamer, and by exacting from the canal boat and its owner more than the actual cost of trimming or shoveling to the leg of the elevator, and by charging against the ocean steamer more than the actual cost of trimming the cargo, the services being rendered by a floating elevator of which Annan was part owner and one of the agents. On this complaint, Annan was arrested and brought before the police justice, who took testimony in the case and committed Annan to the custody of the sheriff of the county of Kings, to answer the charge before a court of special sessions in the city of Brooklyn. Thereupon, writs of habeas corpus and *certiorari* were granted by the Supreme Court of the state of New York, on the application of Annan, returnable before the general term of that court in the first instance; but on a hearing thereon, the writs were dismissed and Annan was remanded to the custody of the sheriff. The opinion of the general term is reported in 50 Hun, 413. Annan appealed to the Court of Appeals, which affirmed the order of the general term (117 N. Y. 621), for the reasons set forth in the opinion in the case of Budd (117 N. Y. 1, 5 L. R. A. 559) and the judgment of the Court of Appeals was afterwards made the judgment of the Supreme Court. Annan sued out a writ of error from this court, directed to the Supreme Court of the state of New York.

Like proceedings to the foregoing were had in the case of one Francis E. Pinto, the charge against him being that he had exacted from the complainant more than five eighths of one cent per bushel for receiving and weighing a cargo of grain from a boat into the Pinto stores, of which he was lessee and manager, the same being a stationary grain elevator on land in the city of Brooklyn, New York, and had exacted more than the actual cost of trimming or shoveling to the leg of the elevator. Pinto sued out from this court a writ of error to the Supreme Court of the state of New York.

The main question involved in these cases is whether this court will adhere to its decision in *Munn v. Illinois*, 94 U. S. 113 [24: 77].

The Court of Appeals of New York, in *Peo- ple v. Budd*, 117 N. Y. 1, 5 L. R. A. 559, held that chapter 581 of the laws of 1888 did not violate the constitutional guarantee protecting private property, but was a legitimate exercise of the police power of the state over a business affected with a public interest. In regard to the indictment against Budd, it held that the charge of exacting more than the statute rate for elevating was proved, and that as to the alleged overcharge for shoveling, it appeared that the carrier was compelled to pay \$4 for each 1,000 bushels of grain, which was the charge of the shovelers' union, by which the work was performed, and that the union paid the elevator, for the use of the latter's steam shovel, \$1.75 for each 1,000 bushels. The court held that there was no error in submitting to the jury the question as to the overcharge for shoveling; that the intention of the statute was to confine the charge to the "actual cost" of the outside labor required; and that a violation of the Act in that particular was proved; but that, as the verdict and sentence were justified by proof of the overcharge for elevating, even if the alleged overcharge for shoveling was not made out, the ruling of the superior court of Buffalo could not have prejudiced Budd. Of course, this court, in these cases, can consider only the Federal questions involved.

It is claimed, on behalf of Budd, that the statute of the state of New York is unconstitutional, because contrary to the provisions of section 1 of the 14th Amendment to the Constitution of the United States, in depriving the citizen of his property without due process of law; that it is unconstitutional in fixing the maximum charge for elevating, receiving, weighing and discharging grain by means of floating and stationary elevators and warehouses at five eighths of one cent a bushel, and in forbidding the citizen to make any profit upon the use of his property or labor; and that the police power of the state extends only to property or business which is devoted by its owner to the public, by a grant to the public of the right to demand its use. It is claimed on behalf of Annan and Pinto that floating and stationary elevators in the port of New York are private property, not affected with any public interest, and not subject to the regulation of rates.

"Trimming" in the canal boat, spoken of in the statute, is shoveling the grain from one place to another, and is done by longshoremen with scoops or shovels; and "trimming" the ship's cargo when loading is stowing it and securing it for the voyage. Floating elevators are primarily boats. Some are scows, and have to be towed from place to place by steam tugs; but the majority are propellers. When the floating elevator arrives at the ship and makes fast alongside of her, the canal boat carrying the grain is made fast on the other side of the elevator. A long wooden tube, called "the leg of the elevator," and spoken of in the statute, is lowered from the tower of the elevator so that its lower end enters the hold of the canal boat in the midst of the grain. The "spout" of the elevator is lowered into the ship's hold. The machinery of the elevator is then set in motion, the grain is elevated out of

the canal boat, received and weighed in the elevator, and discharged into the ship. The grain is lifted in "buckets" fastened to an endless belt which moves up and down in the leg of the elevator. The lower end of the leg is buried in the grain so that the buckets are submerged in it. As the belt moves, each bucket goes up full of grain, and at the upper end of the leg, in the elevator tower, empties its contents into the hopper which receives the grain. The operation would cease unless the grain was trimmed or shoveled to the leg as fast as it is carried up by the buckets. There is a gang of longshoremen who shovel the grain from all parts of the hold of the canal boat to "the leg of the elevator," so that the buckets may be always covered with grain at the lower end of the leg. This "trimming or shoveling to the leg of the elevator," when the canal-boat is unloading is that part of the work which the elevator owner is required to do at the "actual cost."

In the Budd and Pinto cases, the elevator was a stationary one on land; and in the Annan case, it was a floating elevator. In the Budd case, the Court of Appeals held that the words "actual cost," used in the statute, were intended to exclude any charge by the elevator beyond the sum specified, for the use of its machinery in shoveling, and the ordinary expenses of operating it, and to confine the charge to the actual cost of the outside labor required for trimming and bringing the grain to the leg of the elevator; and that the purpose of the statute could be easily evaded and defeated if the elevator owner were permitted to separate the services and charge for the use of the steam shovel any sum which might be agreed upon between him and the shovelers' union, and thereby, under color of charging for the use of his steam shovel, exact from the carrier a sum for elevating beyond the rate fixed therefor by the statute.

The Court of Appeals, in its opinion in the Budd case, considered fully the question as to whether the Legislature had power, under the constitution of the state of New York, to prescribe a maximum charge for elevating grain by stationary elevators, owned by individuals or corporations who had appropriated their property to that use and were engaged in that business; and it answered the inquiry in the affirmative. It also reviewed the case of *Munn v. Illinois*, 94 U. S. 118 [24: 77], and arrived at the conclusion that this court there held that the legislation in question in that case was a lawful exercise of legislative power, and did not infringe that clause of the 14th Amendment to the Constitution of the United States which provides that no state shall "deprive any person of life, liberty, or property without due process of law;" and that the legislation in question in that case was similar to, and not distinguishable in principle from, the Act of the state of New York.

In regard to *Munn v. Illinois*, the Court of Appeals said that the question in that case was raised by an individual owning an elevator and warehouse in Chicago, erected for, and in connection with which he had carried on, the business of elevating and storing grain, many years prior to the passage of the Act in question, and prior also to the adoption of the amendment to

the constitution of Illinois, in 1870, declaring all elevators and warehouses where grain or other property is stored for a compensation, to be public warehouses. The Court of Appeals then cited the cases of *People v. Boston & A. R. Co.* 70 N. Y. 569; *Bertholf v. O'Reilly*, 74 N. Y. 509; *Buffalo E. S. R. Co. v. Buffalo St. R. Co.* 111 N. Y. 132, 2 L. R. A. 384; and *People v. King*, 110 N. Y. 418, 1 L. R. A. 293, as cases in which *Munn v. Illinois* had been referred to by it, and said that it could not overrule and disregard *Munn v. Illinois* without subverting the principle of its own decision in *People v. King*, and certainly not without disregarding many of its deliberate expressions in approval of the principle of *Munn v. Illinois*.

The Court of Appeals further examined the question whether the power of the Legislature to regulate the charge for elevating grain, where the business was carried on by individuals upon their own premises, fell within the scope of the police power, and whether the statute in question was necessary for the public welfare. It affirmed that, while no general power resided in the Legislature to regulate private business, prescribe the conditions under which it should be conducted, fix the price of commodities or services, or interfere with freedom of contract, and while the merchant, manufacturer, artisan, and laborer, under our system of government, are left to pursue and provide for their own interests in their own way, untrammelled by burdensome and restrictive regulations, which, however common in rude and irregular times, are inconsistent with constitutional liberty, yet there might be special conditions and circumstances which brought the business of elevating grain within principles which, by the common law and the practice of free governments, justified legislative control and regulation in the particular case, so that the statute would be constitutional; that the control which, by common law and by statute, was exercised over common carriers, was conclusive upon the point that the right of the Legislature to regulate the charges for services in connection with the use of property did not depend in every case upon the question whether there was a legal monopoly, or whether special governmental privileges or protection had been bestowed; that there were elements of public interest in the business of elevating grain which peculiarly affected it with a public interest; that those elements were found in the nature and extent of the business, its relation to the commerce of the state and country, and the practical monopoly enjoyed by those engaged in it; that about 120,000,000 bushels of grain come annually to Buffalo from the west; that the business of elevating grain at Buffalo is connected mainly with lake and canal transportation; that the grain received at New York in 1887 by way of the Erie canal and Hudson river, during the season of canal navigation, exceeded 46,000,000 bushels, an amount very largely in excess of the grain received during the same period by rail and by river and coastwise vessels; that the elevation of that grain from lake vessels to canal boats takes place at Buffalo, where there are thirty or forty elevators, stationary and floating; that a large proportion of the surplus cereals of the country passes through the ele-

vators at Buffalo and finds its way through the Erie canal and Hudson river to the seaboard at New York, whence it is distributed to the markets of the world; that the business of elevating grain is an incident to the business of transportation, the elevators being indispensable instrumentalities in the business of the common carrier, and in a broad sense performing the work of carriers, being located upon or adjacent to the waters of the state, and transferring the cargoes of grain from the lake vessels to the canal boats, or from the canal boats to the ocean vessels, and thereby performing an essential service in transportation; that by their means the transportation of grain by water from the upper lakes to the seaboard is rendered possible; that the business of elevating grain thus has a vital relation to commerce in one of its most important aspects; that every excessive charge made in the course of the transportation of grain is a tax upon commerce; that the public has a deep interest that no exorbitant charges shall be exacted at any point, upon the business of transportation; and that whatever impaired the usefulness of the Erie canal as a highway of commerce involved the public interest.

The Court of Appeals said that, in view of the foregoing exceptional circumstances, the business of elevating grain was affected with a public interest, within the language of *Lord Chief Justice Hale*, in his treatise *De Portibus Maris* (Harg. Law Tracts, 78); that the case fell within the principle which permitted the Legislature to regulate the business of common carriers, ferrymen and hackmen, and interest on the use of money; that the underlying principle was, that business of certain kinds holds such a peculiar relation to the public interest that there is superinduced upon it the right of public regulation; and that the court rested the power of the Legislature to control and regulate elevator charges upon the nature and extent of the business, the existence of a virtual monopoly, the benefit derived from the Erie canal's creating the business and making it possible, the interest to trade and commerce, the relation of the business to the property and welfare of the state, and the practice of legislation in analogous cases, collectively creating an exceptional case and justifying legislative regulation.

The opinion further said that the criticism to which the case of *Munn v. Illinois* had been subjected proceeded mainly upon a limited and strict construction and definition of the police power; that there was little reason, under our system of government, for placing a close and narrow interpretation on the police power, or restricting its scope so as to hamper the legislative power in dealing with the varying necessities of society and the new circumstances as they arise calling for legislative intervention in the public interest; and that no serious invasion of constitutional guarantees by the Legislature could withstand for a long time the searching influence of public opinion, which was sure to come sooner or later to the side of law, order, and justice, however it might have been swayed for a time by passion or prejudice, or whatever aberrations might have marked its course.

We regard these views, which we have re-

ferred to as announced by the Court of Appeals of New York, so far as they support the validity of the statute in question, as sound and just.

In *Munn v. Illinois*, the Constitution of Illinois, adopted in 1870, provided in article 13, section 1, as follows: "All elevators or storehouses, where grain or other property is stored for a compensation, whether the property stored be kept separated or not, are declared to be public warehouses;" and the Act of the Legislature of Illinois approved April 25, 1871, (Public Laws of Illinois, of 1871-72, p. 762,) divided public warehouses into three classes, prescribed the taking of a license and the giving of a bond, and fixed a maximum charge, for warehouses belonging to class A, for storing and handling grain, including the cost of receiving and delivering, and imposed a fine on conviction for not taking the license or not giving the bond. Munn and Scott were indicted, convicted, and fined for not taking out the license and not giving the bond, and for charging rates for storing and handling grain higher than those established by the Act. Section 6 of the Act provided that it should be the duty of every warehouseman of class A to receive for storage any grain that might be tendered to him. Munn and Scott were the managers and lessees of a public warehouse, such as was named in the statute. The Supreme Court of Illinois having affirmed the judgment of conviction against them, on the ground that the statute of Illinois was a valid and constitutional enactment (*Munn v. People*, 69 Ill. 80,) they sued out a writ of error from this court, and contended that the provisions of the sections of the statute of Illinois which they were charged with having violated were repugnant to the third clause of § 8 of article 1, and the sixth clause of § 9 of article 1, of the Constitution of the United States, and to the 5th and 14th Amendments of that Constitution.

This court, in *Munn v. Illinois*, the opinion being delivered by Chief Justice Waite, and there being a published dissent by only two justices, considered carefully the question of the repugnancy of the Illinois statute to the 14th Amendment. It said, that under the powers of government inherent in every sovereignty, "the government regulates the conduct of its citizens one towards another, and the manner in which each shall use his own property, when such regulation becomes necessary for the public good;" and that, "in their exercise it has been customary in England from time immemorial, and in this country from its first colonization, to regulate ferries, common carriers, hackmen, bakers, millers, wharfingers, inn-keepers, etc., and in so doing to fix a maximum of charge to be made for services rendered, accommodations furnished, and articles sold." It was added: "To this day, statutes are to be found in many of the states upon some or all these subjects; and we think it has never yet been successfully contended that such legislation came within any of the constitutional prohibitions against interference with private property." It announced as its conclusions that, down to the time of the adoption of the 14th Amendment, it was not supposed that statutes regulating the use, or

even the price of the use, of private property necessarily deprived an owner of his property without due process of law; that, when private property was devoted to a public use, it was subject to public regulation; that Munn and Scott, in conducting the business of their warehouse, pursued a public employment and exercised a sort of public office, in the same sense as did a common carrier, miller, ferryman, inn-keeper, wharfinger, baker, cartman, or hackney coachman; that they stood in the very gateway of commerce and took toll from all who passed; that their business tended "to a common charge," and had become a thing of public interest and use; that the toll on the grain was a common charge; and that, according to Lord Chief Justice Hale, every such warehouseman, "ought to be under a public regulation, viz:" that he "take but reasonable toll."

This court further held, in *Munn v. Illinois*, that the business in question was one in which the whole public had a direct and positive interest; that the statute of Illinois simply extended the law so as to meet a new development of commercial progress; that there was no attempt to compel the owners of the warehouses to grant the public an interest in their property, but to declare their obligations if they used it in that particular manner; that it mattered not that Munn and Scott had built their warehouses and established their business before the regulations complained of were adopted; that the property being clothed with a public interest, what was a reasonable compensation for its use was not a judicial, but a legislative question; that, in countries where the common law prevailed, it had been customary from time immemorial for the Legislature to declare what should be a reasonable compensation under such circumstances, or to fix a maximum beyond which any charge made would be unreasonable; that the warehouses of Munn and Scott were situated in Illinois and their business was carried on exclusively in that state; that the warehouses were no more necessarily a part of commerce itself than the dray or the cart by which, but for them, grain would be transferred from one railroad station to another; that their regulation was a thing of domestic concern; that, until Congress acted in reference to their interstate relations, the state might exercise all the powers of government over them, even though in so doing it might operate indirectly upon commerce outside its immediate jurisdiction; and that the provision of § 9 of article 1 of the Constitution of the United States operated only as a limitation of the powers of Congress, and did not affect the state in the regulation of their domestic affairs. The final conclusion of the court was, that the Act of Illinois was not repugnant to the Constitution of the United States; and the judgment was affirmed.

In *Sinking Fund Cases*, 99 U. S. 700, 747 [25: 496, 511], Mr. Justice Bradley, who was one of the justices who concurred in the opinion of the court in *Munn v. Illinois*, speaking of that case, said: "The inquiry there was as to the extent of the police power in cases where the public interest is affected; and we held that when an employment or business becomes a matter of such public interest and importance

as to create a common charge or burden upon the citizen; in other words, when it becomes a practical monopoly, to which the citizen is compelled to resort, and by means of which a tribute can be exacted from the community,—it is subject to regulation by the legislative power." Although this was said in a dissenting opinion in *Sinking Fund Cases*, it shows what *Mr. Justice Bradley* regarded as the principle of the decision in *Munn v. Illinois*.

In *Spring Valley Water Works v. Schottler*, 110 U. S. 347, 354 [28: 173, 176], this court said: "That it is within the power of the government to regulate the prices at which water shall be sold by one who enjoys a virtual monopoly of the sale, we do not doubt. That question is settled by what was decided on full consideration in *Munn v. Illinois*, 94 U. S. 113 [24: 77]. As we said in that case, such regulations do not deprive a person of his property without due process of law."

In *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 569 [30: 244, 248], *Mr. Justice Miller*, who had concurred in the judgment in *Munn v. Illinois*, referred, in delivering the opinion of the court, to that case, and said: "That case presented the question of a private citizen, or unincorporated partnership, engaged in the warehousing business in Chicago, free from any claim of right or contract under an Act of incorporation of any state whatever, and free from the question of continuous transportation through several states. And in that case the court was presented with the question, which it decided, whether anyone engaged in a public business, in which all the public had a right to require his service, could be regulated by acts of the Legislature in the exercise of this public function and public duty, so far as to limit the amount of charges that should be made for such services."

In *Dow v. Beidelman*, 125 U. S. 680, 686 [31: 841, 842], it was said by *Mr. Justice Gray*, in delivering the opinion of the court, that in *Munn v. Illinois* the court, after affirming the doctrine that by the common law carriers or other persons exercising a public employment could not charge more than a reasonable compensation for their services, and that it is within the power of the Legislature "to declare what shall be a reasonable compensation for such services, or, perhaps more properly speaking, to fix a maximum beyond which any charge made would be unreasonable," said that to limit the rate of charges for services rendered in the public employment, or for the use of property in which the public has an interest, was only changing a regulation which existed before, and established no new principle in the law, but only gave a new effect to an old one.

In *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 418, 461 [33: 970, 983], it was said by *Mr. Justice Bradley*, in his dissenting opinion, in which *Mr. Justice Gray* and *Mr. Justice Lamar* concurred, that the decision of the court in that case practically overruled *Munn v. Illinois*; but the opinion of the court did not say so, nor did it refer to *Munn v. Illinois*; and we are of opinion that the decision in the case in 134 U. S. is, as will be hereafter shown, quite distinguishable from the present cases.

4 INTER S.

It is thus apparent that this court has adhered to the decision in *Munn v. Illinois* and to the doctrines announced in the opinion of the court in that case; and those doctrines have since been repeatedly enforced in the decisions of the courts of the states.

In *Lake Shore & M. S. R. Co. v. Cincinnati, S. & C. R. Co.*, 30 Ohio St. 604, 616, in 1877, it was said, citing *Munn v. Illinois*: "When the owner of property devotes it to a public use, he, in effect, grants to the public an interest in such use, and must, to the extent of the use, submit to be controlled by the public, for the common good, as long as he maintains the use." That was a decision by the Supreme Court Commission of Ohio.

In *State v. Columbus Gas-Light & C. Co.*, 34 Ohio St. 572, 582, in 1878, *Munn v. Illinois* was cited with approval, as holding that where the owner of property devotes it to a use in which the public have an interest, he in effect grants to the public an interest in such use, and must, to the extent of that interest, submit to be controlled by the public, for the common good, so long as he maintains the use; and the court added that in *Munn v. Illinois* the principle was applied to warehousemen engaged in received and storing grain; that it was held that their rates of charges were subject to legislative regulation; and that the principle applied with greater force to corporations when they were invested with franchises to be exercised to subserve the public interest.

The Supreme Court of Illinois, in *Ruggles v. People*, 91 Ill. 256, 262, in 1878, cited *Munn v. People*, 69 Ill. 80, which was affirmed in *Munn v. Illinois*, as holding that it was competent for the general assembly to fix the maximum charges by individuals keeping public warehouses for storing, handling, and shipping grain, and that, too, when such persons had derived no special privileges from the state, but were, as citizens of the state, exercising the business of storing and handling grain for individuals.

The Supreme Court of Alabama, in *Davis v. State*, 68 Ala. 58, in 1880, held that a statute declaring it unlawful, within certain counties, to transport or move, after sunset and before sunrise of the succeeding day, any cotton in the seed, but permitting the owner or purchaser to remove it from the field to a place of storage, was not unconstitutional. Against the argument that the statute was such a despotic interference with the rights of private property as to be tantamount, in its practical effect, to a deprivation of ownership "without due process of law," the court said that the statute sought only to regulate and control the transportation of cotton in one particular condition of it, and was a mere police regulation, to which there was no constitutional objection, citing *Munn v. Illinois*. It added, that the object of the statute was to regulate traffic in the staple agricultural product of the state, so as to prevent a prevalent evil, which, in the opinion of the law making power, might do much to demoralize agricultural labor and to destroy the legitimate profits of agricultural pursuits, to the public detriment, at least within the specified territory.

In *Baker v. State*, 54 Wis. 868, 873, in 1892, *Munn v. Illinois* was cited with approval by

the Supreme Court of Wisconsin, as holding that the Legislature of Illinois had power to regulate public warehouses, and the warehousing and inspection of grain within that state, and to enforce its regulations by penalties, and that such legislation was not in conflict with any provision of the Federal Constitution.

The Court of Appeals of Kentucky, in 1882, in *Nash v. Page*, 80 Ky. 539, 545, cited *Munn v. Illinois*, as applicable to the case of the proprietors of tobacco warehouses in the city of Louisville, and held that the character of the business of the tobacco warehousemen was that of a public employment, such as made them subject, in their charges and their mode of conducting business, to legislative regulation and control, as having a practical monopoly of the sales of tobacco at auction.

In 1884, the Supreme Court of Pennsylvania, in *Girard Pt. Storage Co. v. Southwark Foundry Co.* 105 Pa. 248, 252, cited *Munn v. Illinois* as involving the rights of a private person, and said that the principle involved in the ruling of this court was, that where the owner of such property as a warehouse devoted it to a use in which the public had an interest, he in effect granted to the public an interest in such use, and must, therefore, to the extent thereof, submit to be controlled by the public for the common good, as long as he maintained that use.

In *Sawyer v. Davis*, 136 Mass. 239, in 1884, the Supreme Judicial Court of Massachusetts said that nothing is better established than the power of the Legislature to make what are called police regulations, declaring in what manner property shall be used and enjoyed and business carried on, with a view to the good order and benefit of the community, even though they may interfere to some extent with the full enjoyment of private property, and although no compensation is given to a person so inconvenienced; and *Munn v. Illinois* was cited as holding that the rules of the common law which had from time to time been established, declaring or limiting the right to use or enjoy property, might themselves be changed as occasion might require.

The Supreme Court of Indiana, in 1885, in *Brechbill v. Randall*, 103 Ind. 528, 2 West. Rep. 781, held that a statute was valid which required persons selling patent rights to file with the clerk of the county a copy of the patent, with an affidavit of genuineness and authority to sell, on the ground that the State had power to make police regulations for the protection of its citizens against fraud and imposition; and the court cited *Munn v. Illinois* as authority.

The Supreme Court of Nebraska, in 1885, in *Webster Telephone Case*, 17 Neb. 126, held that when a corporation or person assumed and undertook to supply a public demand, made necessary by the requirements of the commerce of the country, such as a public telephone, such demand must be supplied to all alike, without discrimination; and *Munn v. Illinois* was cited by the prevailing party and by the court. The defendant was a corporation, and had assumed to act in a capacity which was to a great extent public, and had undertaken to satisfy a public want or necessity, although it did not possess any special privileges by statute

or any monopoly of business in a given territory; yet it was held that, from the very nature and character of its business, it had a monopoly of the business which it transacted. The court said that no statute had been deemed necessary to aid the courts in holding that where a person or company undertook to supply a public demand, which was "affected with a public interest," it must supply all alike who occupied a like situation, and not discriminate in favor of or against any.

In *Stone v. Yazoo & M. V. R. Co.*, 62 Miss. 607, 639, the Supreme Court of Mississippi, in 1885, cited *Munn v. Illinois* as deciding that the regulation of warehouses for the storage of grain, owned by private individuals, and situated in Illinois, was a thing of domestic concern and pertained to the state, and as affirming the right of the state to regulate the business of one engaged in a public employment therein, although that business consisted in storing and transferring immense quantities of grain in its transit from the fields of production to the markets of the world.

In *Hockett v. State*, 105 Ind. 250, 258, 2 West. Rep. 764, in 1885, the Supreme Court of Indiana held that a statute of the state which prescribed the maximum price which a telephone company should charge for the use of its telephones was constitutional, and that in legal contemplation all the instruments and appliances used by a telephone company in the transaction of its business were devoted to a public use, and the property thus devoted became a legitimate subject of legislative regulation. It cited *Munn v. Illinois* as a leading case in support of that proposition, and said that although that case had been the subject of comment and criticism, its authority as a precedent remained unshaken. This doctrine was confirmed in *Central U. Teleph. Co. v. State*, 106 Ind. 1, 2 West. Rep. 778, in the same year, and in *Central U. Teleph. Co. v. State*, 118 Ind. 194, 207, in 1888, in which latter case *Munn v. Illinois* was cited by the court.

In *Chesapeake & P. Teleph. Co. v. Baltimore & O. Teleg. Co.*, 66 Md. 399, 414, in 1886, it was held that the telegraph and the telephone were public vehicles of intelligence, and those who owned or controlled them could no more refuse to perform impartially the functions which they had assumed to discharge than a railway company, as a common carrier, could rightfully refuse to perform its duty to the public; and that the Legislature of the state had full power to regulate the services of telephone companies, as to the parties to whom facilities should be furnished. The court cited *Munn v. Illinois*, and said that it could no longer be controverted that the Legislature of a state had full power to regulate and control, at least within reasonable limits, public employments and property used in connection therewith; that the operation of the telegraph and the telephone in doing a general business was a public employment, and the instruments and appliances used were property devoted to a public use and in which the public had an interest; and that, such being the case, the owner of the property thus devoted to public use must submit to have that use and employment regulated by public authority for the common good.

In the Court of Chancery of New Jersey, in 1889, in *Delaware L. & W. R. R. Co. v. Central Stockyard & T. Co.*, 45 N. J. Eq. 50, 60, it was held that the Legislature had power to declare what services warehousemen should render to the public, and to fix the compensation that might be demanded for such services; and the court cited *Munn v. Illinois* as properly holding that warehouses for the storage of grain must be regarded as so far public in their nature as to be subject to legislative control, and that when a citizen devoted his property to a use in which the public had an interest, he in effect granted to the public an interest in that use, and rendered himself subject to control, in that use, by the body politic.

In *Zanesville v. Zanesville Gas Light Co.*, 47 Ohio St. 1, in 1889, it was said by the Supreme Court of Ohio that the principle was well established, that where the owner of property devotes it to a use in which the public have an interest, he in effect grants to the public an interest in such use, and must to the extent of that interest submit to be controlled by the public for the common good, as long as he maintains the use; and that such was the point of the decision in *Munn v. Illinois*.

We must regard the principle maintained in *Munn v. Illinois* as firmly established; and we think it covers the present cases, in respect to the charge for elevating, receiving, weighing and discharging the grain, as well as in respect to the charge for trimming and shoveling to the leg of the elevator when loading, and trimming the cargo when loaded. If the shovelers or scoopers chose, they might do the shoveling by hand, or might use a steam-shovel. A steam shovel is owned by the elevator owner, and the power for operating it is furnished by the engine of the elevator; and if the scooper uses the steam shovel, he pays the elevator owner for the use of it.

The answer to the suggestion that by the statute the elevator owner is forbidden to make any profit from the business of shoveling to the leg of the elevator is that made by the Court of Appeals of New York in the case of *Budd*, that the words "actual cost," used in the statute, were intended to exclude any charge by the elevator owner, beyond the sum specified for the use of his machinery in shoveling and the ordinary expenses of operating it, and to confine the charge to the actual cost of the outside labor required for trimming and bringing the grain to the leg of the elevator; and that the purpose of the statute could be easily evaded and defeated if the elevator owner was permitted to separate the services, and to charge for the use of his steam shovel any sum which might be agreed upon between himself and the shovelers' union, and thereby, under color of charging for the use of his steam shovel, to exact of the carrier a sum for elevating beyond the rate fixed by the statute.

We are of opinion that the Act of the Legislature of New York is not contrary to the 14th Amendment to the Constitution of the United States, and does not deprive the citizen of his property without due process of law; that the Act, in fixing the maximum charges which it specifies, is not unconstitutional, nor is it so in limiting the charge for shoveling to the actual

cost thereof; and that it is a proper exercise of the police power of the state.

On the testimony in the cases before us the business of elevating grain is a business charged with a public interest, and those who carry it on occupy a relation to the community analogous to that of common carriers. The elevator owner, in fact, retains the grain in his custody for an appreciable period of time, because he receives it into his custody, weighs it, and then discharges it, and his employment is thus analogous to that of a warehouseman. In the actual state of the business the passage of the grain to the city of New York and other places on the seaboard would, without the use of elevators, be practically impossible. The elevator at Buffalo is a link in the chain of transportation to the seaboard, and the elevator in the harbor of New York is a like link in the transportation abroad by sea. The charges made by the elevator influence the price of grain at the point of destination on the seaboard, and that influence extends to the prices of grain at the places abroad to which it goes. The elevator is devoted by its owner, who engages in the business, to a use in which the public has an interest, and he must submit to be controlled by public legislation for the common good.

It is contended in the briefs for the plaintiffs in error in the *Annan* and *Pinto* cases, that the business of the relators in handling grain was wholly private, and not subject to regulation by law; and that they had received from the state no charter, no privileges and no immunity, and stood before the law on a footing with the laborers they employed to shovel grain, and were no more subject to regulation than any other individual in the community. But these same facts existed in *Munn v. Illinois*. In that case, the parties offending were private individuals, doing a private business, without any privilege or monopoly granted to them by the state. Not only is the business of elevating grain affected with a public interest, but the records show that it is an actual monopoly, besides being incident to the business of transportation and to that of a common carrier, and thus of a quasi public character. The Act is also constitutional as an exercise of the police power of the state.

So far as the statute in question is a regulation of commerce, it is a regulation of commerce only on the waters of the state of New York. It operates only within the limits of that state, and is no more obnoxious as a regulation of interstate commerce than was the statute of Illinois in respect to warehouses, in *Munn v. Illinois*. It is of the same character with navigation laws in respect to navigation within the state, and laws regulating wharfage rates within the state and other kindred laws.

It is further contended that, under the decision of this court in *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 418 [33: 970], the fixing of elevator charges is a judicial question, as to whether they are reasonable or not; that the statute must permit and provide for a judicial settlement of the charges; and that, by the statute under consideration, an arbitrary rate is fixed and all inquiry is precluded as to whether that rate is reasonable or not.

But this is a misapprehension of the decision of this court in the case referred to. In that case, the Legislature of Minnesota had passed an Act which established a railroad and warehouse commission, and the Supreme Court of that State had interpreted the Act as providing that the rates of charges for the transportation of property by railroads, recommended and published by the commission, should be final and conclusive as to what were equal and reasonable charges, and that there could be no judicial inquiry as to the reasonableness of such rates. A railroad company, in answer to an application for a mandamus, contended that such rates in regard to it were unreasonable, and, as it was not allowed by the state court to put in testimony in support of its answer, on the question of the reasonableness of such rates, this court held that the statute was in conflict with the Constitution of the United States, as depriving the company of its property without due process of law, and depriving it of the equal protection of the laws. That was a very different case from one under the statute of New York in question here, for in this instance the rate of charges is fixed directly by the Legislature. See *Spencer v. Merchant*, 125 U. S. 845, 856 [81: 763, 767]. What was said in the opinion of the court in 134 U. S. had reference only to the case then before the court, and to charges fixed by a commission appointed under an Act of the Legislature, under a Constitution of the state which provided that all corporations, being common carriers, should be bound to carry "on equal and reasonable terms," and under a statute which provided that all charges made by a common carrier for the transportation of passengers or property should be "equal and reasonable."

What was said in the opinion in 134 U. S., as to the question of the reasonableness of the rate of charge being one for judicial investigation, had no reference to a case where the rates are prescribed directly by the Legislature. Not only was that the case in the statute of Illinois in *Munn v. Illinois*, but the doctrine was laid down by this court in *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 568 [30: 244, 248], that it was the right of a state to establish limitations upon the power of railroad companies to fix the price at which they would carry passengers and freight, and that the question was of the same character as that involved in fixing the charges to be made by persons engaged in the warehousing business. So, too, in *Dow v. Beidelman*, 125 U. S. 680, 686 [31: 841, 842], it was said that it was within the power of the Legislature to declare what should be a reasonable compensation for the services of persons exercising a public employment, or to fix a maximum beyond which any charge made would be unreasonable.

But in *Dow v. Beidelman*, after citing *Munn v. Illinois*, 94 U. S. 113 [24: 77]; *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155, 161, 162 [24: 94, 95]; *Peik v. Chicago & N. W. R. Co.* 94 U. S. 164, 178 [24: 97, 99]; *Chicago M. & St. P. R. Co. v. Ackley*, 94 U. S. 179 [24: 99]; *Winona & St. P. R. Co. v. Blake*, 94 U. S. 180 [24: 99]; *Stone v. Wisconsin*, 94 U. S. 181 [24: 102]; *Ruggles v. Illinois*, 108 U. S. 526 [27: 812]; *Illinois Cent. R. Co. v. Illinois*, 4 INTER S.

108 U. S. 541 [27: 818]; *Stone v. Farmers L. & T. Co.* 116 U. S. 307 [29: 636]; *Stone v. Illinois Cent. R. Co.* 116 U. S. 847 [29: 650], and *Stone v. New Orleans & N. E. R. Co.* 116 U. S. 852 [29: 651], as recognizing the doctrine that the Legislature may itself fix a maximum beyond which any charge would be unreasonable, in respect to services rendered in a public employment, or for the use of property in which the public has an interest, subject to the proviso that such power of limitation or regulation is not without limit, and is not a power to destroy, or a power to compel the doing of the services without reward, or to take private property for public use without just compensation or without due process of law, the court said that it had no means, "if it would under any circumstances have the power," of determining that the rate fixed by the Legislature in that case was unreasonable, and that it did not appear that there had been any such confiscation of property as amounted to a taking of it without due process of law, or that there had been any denial of the equal protection of the laws.

In the cases before us, the records do not show that the charges fixed by the statute are unreasonable, or that property has been taken without due process of law, or that there has been any denial of the equal protection of the laws; even if under any circumstances we could determine that the maximum rate fixed by the Legislature was unreasonable.

In *Georgia R. & Bkg. Co. v. Smith*, 128 U. S. 174, 179 [32: 877, 880], in the opinion of the court, delivered by Mr. Justice Field, it was said that this court had adjudged in numerous instances that the Legislature of a state had the power to prescribe the charges of a railroad company for the carriage of persons and merchandise within its limits, in the absence of any contract to the contrary, subject to the limitation that the carriage is not required without reward, or upon conditions amounting to the taking of property for public use without just compensation, and that what is done does not amount to a regulation of foreign or interstate commerce.

It is further contended for the plaintiffs in error that the statute in question violates the 14th Amendment, because it takes from the elevator owners the equal protection of the laws, in that it applies only to places which have 180,000 population or more, and does not apply to places which have less than 180,000 population, and thus operates against elevator owners in the larger cities of the state. The law operates equally on all elevator owners in places having 180,000 population or more; and we do not perceive how they are deprived of the equal protection of the laws, within the meaning of the 14th Amendment.

Judgments affirmed.

Mr. Justice Brewer dissenting:

I dissent from the opinion and judgment in these cases. The main proposition upon which they rest is, in my judgment, radically unsound. It is the doctrine of *Munn v. Illinois*, 94 U. S. 113 [24: 77], reaffirmed. That is, as declared in the syllabus and stated in the opinion in that case: "When, therefore, one devotes his property to a use in which the public

has an interest, he, in effect, grants to the public an interest in that use, and must submit to be controlled by the public for the common good, to the extent of the interest he has thus created." The elaborate discussions of the question in the dissenting opinions in that case, and the present cases when under consideration in the Court of Appeals of the state of New York, seem to forbid anything more than a general declaration of dissent. The vice of the doctrine is, that it places a public interest in the use of property upon the same basis as a public use of property. Property is devoted to a public use when, and only when, the use is one which the public in its organized capacity, to wit, the state, has a right to create and maintain, and, therefore, one which all the public have a right to demand and share in. The use is public, because the public may create it, and the individual creating it is doing thereby and *pro tanto* the work of the state. The creation of all highways is a public duty. Railroads are highways. The state may build them. If an individual does that work, he is *pro tanto* doing the work of the state. He devotes his property to a public use. The state doing the work fixes the price for the use. It does not lose the right to fix the price, because an individual voluntarily undertakes to do the work. But this public use is very different from a public interest in the use. There is scarcely any property in whose use the public has no interest. No man liveth unto himself alone, and no man's property is beyond the touch of another's welfare. Everything, the manner and extent of whose use affects the well-being of others, is property in whose use the public has an interest. Take, for instance, the only store in a little village. All the public of that village are interested in it; interested in the quantity and quality of the goods on its shelves, and their prices, in the time at which it opens and closes, and, generally, in the way in which it is managed; in short, interested in the use. Does it follow that that village public has a right to control these matters? That which is true of the single small store in the village, is also true of the largest mercantile establishment in the great city. The magnitude of the business does not change the principle. There may be more individuals interested, a larger public, but still the public. The country merchant who has a small warehouse in which the neighboring farmers are wont to store their potatoes and grain preparatory to shipment occupies the same position as the proprietor of the largest elevator in New York. The public has in each case an interest in the use, and the same interest, no more and no less. I cannot bring myself to believe that when the owner of property has by his industry, skill, and money made a certain piece of his property of large value to many he has thereby deprived himself of the full dominion over it which he had when it was of comparatively little value, nor can I believe that the control of the public over one's property or business is at all dependent upon the extent to which the public is benefited by it.

Surely the matters in which the public has the most interest, are the supplies of food and clothing; yet can it be that by reason of this

interest the state may fix the price at which the butcher must sell his meat, or the vendor of boots and shoes his goods? Men are endowed by their Creator with certain unalienable rights, "life, liberty, and the pursuit of happiness;" and to "secure," not grant or create, these rights governments are instituted. That property which a man has honestly acquired he retains full control of, subject to these limitations: First, that he shall not use it to his neighbor's injury, and that does not mean that he must use it for his neighbor's benefit; second, that if he devotes it to a public use, he gives to the public a right to control that use; and, third, that whenever the public needs require, the public may take it upon payment of due compensation.

It is suggested that there is a monopoly, and that that justifies legislative interference. There are two kinds of monopoly; one of law, the other of fact. The one exists when exclusive privileges are granted. Such a monopoly, the law which creates alone can break; and being the creation of law, justifies legislative control. A monopoly of fact any one can break, and there is no necessity for legislative interference. It exists where anyone by his money and labor furnishes facilities for business which no one else has. A man puts up in a city the only building suitable for offices. He has therefore a monopoly of that business; but it is a monopoly of fact, which anyone can break who, with like business courage puts his means into a similar building. Because of the monopoly feature, subject thus easily to be broken, may the Legislature regulate the price at which he will lease his offices? So, here, there are no exclusive privileges given to these elevators. They are not upon public ground. If the business is profitable, anyone can build another; the field is open for all the elevators, and all the competition that may be desired. If there be a monopoly, it is one of fact and not of law, and one which any individual can break.

The paternal theory of government is to me odious. The utmost possible liberty to the individual, and the fullest possible protection to him and his property, is both the limitation and duty of government. If it may regulate the price of one service, which is not a public service, or the compensation for the use of one kind of property which is not devoted to a public use, why may it not with equal reason regulate the price of all service, and the compensation to be paid for the use of all property? And if so, "Looking Backward" is nearer than a dream.

I dissent especially in these cases, because the statute in effect compels service without any compensation. It provides that the parties seeking the service of the elevator "shall only be required to pay the actual cost of trimming or shoveling to the leg of the elevator when unloading, and trimming cargo when loading." This work of trimming or shoveling is fully explained in the briefs of counsel. It is work performed by longshoremen with hand scoops or shovels, on the vessel unloading or receiving the grain. They are not in the regular employ of the elevator; but engaged in an independent service, and yet one whose careful and skillful performance is es-

sential to the successful transfer of grain into and through the elevator. The full service required of the elevator compels its proprietor to employ and superintend the work of these longshoremen. For this work of employment, and superintendence, and for the responsibility for the proper performance of their work, the Act says that the proprietor of the elevator shall receive no compensation; he can charge only that which he pays out, the actual cost. I had supposed that no man could be required to render any service to another individual without some compensation.

Again, in the Pinto case, it appears that Mr. Pinto is the owner of a stationary elevator, built on private grounds. It is not on grounds devoted to a public use, like the right of way of a railroad company. There is nothing to indicate on his part a purpose to dedicate his property to public uses. So far as it is possible to make the business of an elevator a purely private business, he has done so. It will not do to say, that the transferring of grain through an elevator is one step in the process of transportation; and that, therefore, they are quasi common carriers, discharging a public duty, and subject to public control. They are not

carriers in any proper sense of the term. They may facilitate carriage; so does the boxing and packing of goods for transportation. The engineers, firemen, brakemen, and all the thousands of employes of a railroad company are helping the business of transportation; but are they all common carriers simply because their work tends to facilitate the business of transportation, and may the Legislature regulate their wages?

But, as I said, I do not care to enter into any extended discussion of the matter. I believe the time is not distant when the evils resulting from this assumption of a power on the part of government to determine the compensation a man may receive for the use of his property, or the performance of his personal services, will become so apparent that the courts will hasten to declare that government can prescribe compensation only when it grants a special privilege, as in the creation of a corporation, or when the service which is rendered is a public service, or the property is in fact devoted to a public use.

Mr. Justice Field and *Mr. Justice Brown* concur with me in this dissent.

THE HORN SILVER MINING COMPANY, *Plff. in Err.*,

The People of the STATE OF NEW YORK.

(See S. C. 143 U. S. 305-318, 86 L. ed. 164.)

- A corporation being the mere creature of the Legislature, its rights, privileges, and powers are dependent solely upon the terms of its charter.
2. According to the law of most states a franchise or privilege of being a corporation is personal property and is subject to taxation.
3. The granting of the rights and privileges which constitute the franchises of a corporation, may be accompanied with any such conditions as the Legislature may deem most suitable to the public interests and policy.
4. The Legislature may adopt any mode to arrive at the sum which it will exact as a condition of the creation of the corporation or of its continued existence.
5. A foreign corporation cannot claim a right to do business in another state, except subject to the conditions imposed by its laws.
6. Having the absolute power of excluding the foreign corporation, the state may impose such conditions upon permitting the corporation to do business within its limits as it may judge expedient, such as the payment of a specific license tax, or a sum proportioned to the amount of its capital.
7. The statute of New York does not require that the whole business of a foreign corporation shall be done within the state in order to subject it to the taxing power of the state.
8. The extent of a tax upon a foreign corporation is a matter purely of state regulation, and any interference with it is beyond the jurisdiction of this court.
9. A tax levied only upon the franchise or business of a foreign corporation is not a tax on interstate commerce.

[No. 48.]

Argued and Submitted Dec. 11, 1891. Decided Feb. 29, 1892.

IN ERROR to the Supreme Court of the state of New York, to review a judgment of that court against the Horn Silver Mining Company, a corporation created under the laws of the territory of Utah, in favor of the people of the state of New York, for cer-

NOTE.—As to power of states to tax, see note to *Dobbins v. Erie County*, 10:1022.

That taxation of stock or shares in corporation does not impair obligation of contracts; taxation of shares of national banks and other corporations, see note to *Provident Bank v. Billings*, 7:989.

As to exemption from taxation; whether a contract

or not; not implied, see note to *Tucker v. Ferguson*, 22:806.

As to when an injunction to restrain the collection of a tax will be granted, see note to *Dows v. Chicago*, 20:65.

As to when taxes illegally assessed can be recovered back, see note to *Eskine v. Van Arsdale*, 21:63.

tain taxes on the corporate franchise or business of said corporation, and the penalty prescribed for delay in payment. *Affirmed.*

See same case below, 7 Cent. Rep. 220, 105 N. Y. 76.

The facts are stated in the opinion.

Messrs. Julien T. Davies and Edward Lyman Short, for plaintiff in error:

The taxes in question are not license taxes imposed upon a foreign corporation as a prerequisite of doing business in the state of New York.

The New York statutes impose a tax for revenue. They are not license laws, enacted under the police power of the state. They are to be judged therefore as tax laws.

People v. Davenport, 91 N. Y. 585; *People v. Home Ins. Co.* 92 N. Y. 389; *People v. Spring Valley H. G. Co.* 92 N. Y. 386; *People v. Gold & S. Teleg. Co.* 98 N. Y. 67.

A license fee is imposed as a condition of privilege granted. Such license fee must be accompanied by some grant of privilege, upon condition of its payment.

Cooley, Tax. 407; *Burroughs*, Tax. § 48; *Savannah v. Charlton*, 36 Ga. 462; *Philadelphia F. Assn. v. New York*, 119 U. S. 110 (30: 342); *Phoenix Ins. Co. v. Welsh*, 29 Kan. 672, 12 Ins. L. J. 502; *Com. v. Conglomerate Mtn. Co.* 13 W. N. C. 522.

There is a clear distinction between a license, granted or acquired as a condition precedent before a certain thing can be done, and a tax upon the business which that license may authorize one to engage in.

Home Ins. Co. v. Augusta, 50 Ga. 537; *Erie R. Co. v. State*, 31 N. J. L. 543.

The criterion of the amount imposed upon the corporations shows the law to be an exercise of the taxing power.

Van Hook v. Semla, 70 Ala. 361; *Railroad Tax Cases*, 13 Fed. Rep. 775, 777; *Santa Clara County v. Southern Pac. R. Co.* 18 Fed. Rep. 438; *San Francisco v. Liverpool & L. G. Ins. Co.* 74 Cal. 113.

This law, therefore, can obtain no support from any assumed principle or rule of law that any burden may be imposed upon a foreign corporation as a condition of doing business in any state.

Erie R. Co. v. State, 31 N. J. L. 543; *Cowell v. Colorado Springs Co.* 100 U. S. 55 (25: 547); *Christian Union v. Yount*, 101 U. S. 352 (25: 888); *Home Ins. Co. v. Morse*, 87 U. S. 20 Wall. 445 (22: 365); *Story*, Conf. L. § 38; *Merrick v. Van Santvoord*, 84 N. Y. 208; *State v. Western U. Teleg. Co.* 78 Me. 518; *New York v. Second Ave. R. Co.* 32 N. Y. 261.

The Legislature could not, because of its power to impose a burden upon foreign corporations as a condition of doing business, take money or property from a foreign corporation, already lawfully doing business here, by an absolute and unconditional demand.

Ducat v. Chicago, 77 U. S. 10 Wall. 410 (19: 972); *New York, L. E. & W. R. Co. v. Com.* 129 Pa. 463; *Doyle v. Continental Ins. Co.* 94 U. S. 535 (24: 148); *Home Ins. Co. v. Morse*, 87 U. S. 20 Wall. 445 (22: 366).

A corporation created by one state may do business in another by virtue of interstate comity unless prohibited by the law or established policy of the latter.

4 INTER S.

Cowell v. Colorado Springs Co. 100 U. S. 55 (25: 557); *Christian Union v. Yount*, 101 U. S. 352 (25: 888); *Merrick v. Van Santvoord*, 84 N. Y. 208; *People v. Fire Assn. of Philadelphia*, 92 N. Y. 325.

The taxes in dispute have not become binding by any assent upon the part of the plaintiff in error.

San Francisco v. Liverpool & L. & G. Ins. Co. 74 Cal. 113.

The business of bringing bars of silver from Chicago to New York and there selling them is interstate commerce.

Brown v. Maryland, 25 U. S. 12 Wheat. 419 (6: 678); *Paul v. Virginia*, 75 U. S. 8 Wall. 168 (19: 357); *The Daniel Ball v. United States*, 77 U. S. 10 Wall. 557 (19: 999); *Mobile County v. Kimball*, 102 U. S. 691 (26: 238); *Leisy v. Hardin*, 135 U. S. 100 (34: 128).

A foreign corporation is entitled to the same freedom in carrying on interstate commerce as citizens of the several states.

Cooper Mfg. Co. v. Ferguson, 113 U. S. 727 (28: 1187); *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196 (29: 158); *Philadelphia & S. S. Co. v. Pennsylvania*, 122 U. S. 336 (30: 1200).

The statutes in question regulate interstate commerce in so far as they tax plaintiff in error for its business done in the state of New York during the years 1881 and 1882, and therefore are invalid to sustain the taxes for which judgment has been recovered.

Re Rahrer, 140 U. S. 545 (35: 572); *Hall v. DeCuir*, 95 U. S. 485 (24: 547); *Pembina Con. S. Mtn. & Mill. Co. v. Pennsylvania*, 125 U. S. 181 (31: 650); *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114 (34: 394); *Cooper Mfg. Co. v. Ferguson*, 113 U. S. 727 (28: 1187).

Under the statutes at bar a tax is imposed upon the plaintiff in error under such circumstances and with such effect as to constitute a regulation of interstate commerce, and it is therefore void.

Western U. Teleg. Co. v. Texas, 105 U. S. 460 (26: 1087); *Moran v. New Orleans*, 112 U. S. 69 (28: 653); *Brown v. Maryland*, 25 U. S. 12 Wheat. 419 (6: 678); *Welton v. Missouri*, 9 U. S. 275 (23: 347); *Robbins v. Shelby Count. Tax. Dist.* 120 U. S. 489 (30: 694); *Corson v. Maryland*, 120 U. S. 502 (30: 699); *Fargo v. Michigan*, 121 U. S. 230 (30: 888); *Lyng v. Michigan*, 135 U. S. 161 (34: 150); *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114 (34: 394); *McCall v. California*, 136 U. S. 104 (34: 392); *Brown v. Houston*, 114 U. S. 622 (28: 257).

If the taxes in question are not laid upon the business of plaintiff in error in New York they are laid upon all its business or upon all its capital, and therefore either regulate commerce among the states or effect territorial taxation and are invalid *pro tanto*.

Bank of Commerce v. New York, 67 U. S. Black. 620 (17: 451); *Bank Tax Case*, 71 U. S. 2 Wall. 200 (17: 793); *People v. Commissione of Taxes*, 23 N. Y. 192; *People v. Badlam*, Cal. 594; *Chadwick v. Crapsey*, 35 N. Y. 19 202; *Burrall v. Bushwick R. Co.* 75 N. Y. 21 216; *People v. Coleman*, 12 L. R. A. 762, 1 N. Y. 483; *Pleasant Twp. v. Etina L. Ins. Co.* 138 U. S. 75 (34: 367); *Western U. Teleg. Co. v. Massachusetts*, 125 U. S. 530 (31: 790); *Fullme*

Palace Car Co. v. Pennsylvania, 141 U. S. 18 (35:613), 3 Inters. Com. Rep. 595; *Massachusetts v. Western U. Teleg. Co.* 141 U. S. 40 (35:628); *State Tax on Foreign-held Bonds*, 82 U. S. 15 Wall. 800 (21:179).

The statutes in question should be confined in their effect to the property of plaintiff within the jurisdiction of the state of New York.

Western U. Teleg. Co. v. Texas, 105 U. S. 460 (26:1067); *Western U. Teleg. Co. v. Massachusetts*, 125 U. S. 580 (31:790); *Ratterman v. Western U. Teleg. Co.* 127 U. S. 411 (32:229); *Massachusetts v. Western U. Teleg. Co.* 141 U. S. 40 (35:628).

The affirmance of the judgment against plaintiff in error, would be a deprivation by the state of New York of the property of the plaintiff in error, without due process of law and a denial of the equal protection of the laws, contrary to the 14th Amendment of the Constitution of the United States.

Bell's Gap. R. Co. v. Pennsylvania, 134 U. S. 232 (33:592); *Missouri Pac. R. Co. v. Mackey*, 127 U. S. 209 (32:107); *Standard U. G. Cable Co. v. Atty-Gen.* 46 N. J. Eq. 278; *Soon Hing v. Crowley*, 118 U. S. 708 (28:1145); *Davidson v. New Orleans*, 96 U. S. 107 (24:620); *Caldwell v. Texas*, 137 U. S. 692 (34:816); *Leeper v. Texas*, 139 U. S. 462 (35:225); *Lent v. Tillson*, 140 U. S. 327 (35:425); *Atty-Gen. of Mass. v. Western Union Tel. Co.* 141 U. S. 49 (35:628).

The courts of New York concede the principles contended for, but deny their application to the tax in question.

Gordon v. Cornes, 47 N. Y. 608; *Stuart v. Palmer*, 74 N. Y. 183; *People v. Salem Twp. Board*, 20 Mich. 452; *People v. Commissioners of Taxes*, 76 N. Y. 71; *Cooley*, Const. Lim. (5th ed.) 603; *Cooley*, Taxn. (4th ed.) 60; *Burroughs*, Taxn. § 26; *Citizens Sav. & L. Assn. v. Tynka*, 87 U. S. 20 Wall. 655 (22:455).

Under the guise of taxation, New York has attempted to make an exaction purely arbitrary, founded upon no rule of equity, or justice, or economic principle, of an unusual character unknown to the practice of our government, and in effect an arbitrary spoliation of property.

Laughlin*, 139 Pa. 620; *Rothermel v. Meyerle*, 91 L. R. A. 366, 3 Inters. Com. Rep. 315, 186 Pa. 265; *Com. v. Provident Sav. Inst.* 12 Allen. 312; *Howe Mach. Co. v. Gage*, 100 U. S. 679 (25:755); *Hinson v. Lott*, 75 U. S. 8 Wall. 143 (19:387); *Gibson County v. Pullman S. O. Co.* 42 Fed. Rep. 572; *Mobile County v. Kimball*, 102 U. S. 691 (26:238); *Tappan v. Merchants Nat. Bank*, 86 U. S. 19 Wall. 490 (22:159); *Re Converse*, 137 U. S. 624 (34:796); *Guy v. Baltimore*, 100 U. S. 434 (25:748); *State Freight Tax*, 82 U. S. 15 Wall. 232 (21:146); *Sweten v. Wood*, 57 Mo. 880; *Skrainka v. Alva*, 76 Mo. 84; *Com. v. Hartnett*, 3 Gray, 451; *Missouri Pac. R. Co. v. Mackey*, 127 U. S. 209 (32:169); *Pembina Con. S. Min. & Mill. Co. v. Pennsylvania*, 125 U. S. 181 (31:650).

Mr. Charles F. Tabor, for defendant in error:

The right of a people of a state to prescribe

generally by its constitution and laws the terms upon which a foreign corporation shall be allowed to carry on its business in the state has been settled by this court.

Bank of Augusta v. Earle, 38 U. S. 18 Pet. 519 (10:274); *Paul v. Virginia*, 75 U. S. 8 Wall. 168 (19:357); *Ducat v. Chicago*, 77 U. S. 10 Wall. 410 (19:972); *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 732 (28:1138); *Sherlock v. Atling*, 98 U. S. 108 (23:820).

The state having the power to exclude entirely a foreign corporation has the power to change the conditions of admission at any time for the future, and to impose, as a condition, the payment of a new tax or a further tax, as a license fee.

Philadelphia Asso. v. New York, 119 U. S. 119 (30:346).

The only limitation upon this power of the state to exclude a foreign corporation from doing business within its limits, arises where the corporation is in the employ of the Federal government, or where its business is strictly commerce, interstate or foreign.

Pensacola Teleg. Co. v. Western U. Teleg. Co. 96 U. S. 12 (24:711); *Pembina Con. S. Min. & Mill. Co. v. Pennsylvania*, 125 U. S. 181, 190 (31:650); *McCall v. California*, 136 U. S. 104 (34:392); *Leisy v. Hardin*, 135 U. S. 100 (35:128); *Re Rahrer*, 140 U. S. 545 (35:575).

Mr. Justice Field delivered the opinion of the court:

The defendant below, the plaintiff in error here, the Horn Silver Mining Company, is a corporation created under the laws of the territory of Utah. The present action is brought by the people of the state of New York, upon the allegation that it was doing business within the state in 1881 and 1882, to recover certain taxes alleged to be chargeable on its "corporate franchise or business" for those years and the penalty prescribed for their non-payment in each year.

By the Act of the Legislature of New York, approved May 26, 1881, amending a previous Act providing for levying taxes for the use of the state upon certain corporations, joint-stock companies, and associations, it was declared that every corporation, joint-stock company, or association then or thereafter incorporated or organized under any law of the state, or of any other state or country, and doing business in the state, with certain specified exceptions not important in this case, should be subject to a tax "upon its corporate franchise or business," to be computed in a mode specified, which was by a certain percentage upon its capital stock measured by the dividend on the par value of that stock, or, where there were no dividends, or its dividends were less than a certain percentage upon the par value of the capital stock, then according to a certain percentage upon the actual value of the capital stock during the year.

The complaint in the action alleges the facts necessary to charge the corporation under this Act for both years; that the amount of tax due pursuant to its provisions for the year ending on the first day of November, 1881, was \$7,500, and the additional sum of \$1,500 as a penalty for the delay of the company in paying

the tax for two years after it became due, and that the amount of taxes due for the year ending on the first day of November, 1882, was \$30,000, with the further sum of \$3,000 as a penalty of ten per centum for the delay of the defendant in paying the same.

The defendant answered the various allegations of the complaint, denying them so far as they charge liability to the people of New York, and setting up that it had been at all times a manufacturing corporation organized and existing under the laws of Utah; that it had never exercised any franchises or powers under the laws of New York; that its capital stock of ten millions of dollars was issued in payment for real estate in Utah and Illinois, which consists entirely of mining property and improvements thereon, and a refinery; that during the years ending November 1st, 1881 and 1882, it carried on in the state of New York the business of manufacturing bars of silver from Utah and Illinois into standard bars; that said business constituted but a small portion of its entire business, and was the only business carried on in the State of New York, except its financial business and correspondence; that its capital stock was only partially employed in New York; and that it paid taxes both in Utah and in Illinois. It insisted that the statute, upon which the action was brought, was invalid and inoperative as to it because of the facts set forth, and because it established an unjust and unequal system of taxation, and fixed the amount of tax wholly without regard to the extent of the corporate franchises exercised by it in the state, and without regard to the amount of business done within the state, or the amount of capital employed or the amount of its capital stock held in the state, and the extent of the protection and benefits derived from its laws and agencies, and because it sought to tax property and persons not within the jurisdiction of the state or in any way subject to its authority, and violated the principles of equality and uniformity. It also insisted that the taxation attempted was, in effect, the taking of private property without just compensation, the denial to defendant of the equal protection of the laws, and a regulation of commerce among the several states, and taxing property and business without the jurisdiction of the state of New York. By consent of parties the case was referred to a referee to hear and determine all the issues of law and fact therein. The referee found that the defendant was a corporation created and organized under the laws of the territory of Utah, and was at all times mentioned in the complaint doing business in the state of New York, and liable to be taxed on its corporate business under the provisions of section 8 of the Act of New York above cited. He also found, in substance, that the stock and capital of the defendant were properly appraised and the amount of the tax was assessed in conformity with the provisions of that Act, and that, accordingly, the sums above mentioned, amounting to \$41,250, were due; and he directed a judgment to be entered therefor in favor of the plaintiff.

The referee also found that the defendant paid taxes, both in the territory of Utah and in the state of Illinois in the years 1881 and 4 INER8.

1882, and that the greater part of its business was out of the state of New York as well as the greater part of the capital used in its business.

Upon the findings of the referee judgment was entered in the supreme court of the state for the amount reported, and the case, being taken to the Court of Appeals was there affirmed. Being then remitted to the supreme court and entered there, the case was brought, on a writ of error, to this court.

A corporation being the mere creature of the Legislature, its rights, privileges and powers are dependent solely upon the terms of its charter. Its creation (except where the corporation is sole) is the investing of two or more persons with the capacity to act as a single individual, with a common name, and the privilege of succession in its members without dissolution, and with a limited individual liability. The right and privilege, or the franchise, as it may be termed, of being a corporation, is of great value to its members, and is considered as property separate and distinct from the property which the corporation itself may acquire. According to the law of most states this franchise or privilege of being a corporation is deemed personal property and is subject to separate taxation. The right of the states to thus tax it has been recognized by this court and the state courts in instances without number. It was said in *Delaware Railroad Tax*, 85 U. S. 18 Wall. 206, 231 [21: 888, 896], that "the state may impose taxes upon the corporation as an entity existing under its laws, as well as upon the capital stock of the corporation or its separate corporate property. And the manner in which its value shall be assessed, and the rate of taxation, however arbitrary or capricious, are mere matters of legislative discretion;" except, we may add, as that discretion is controlled by the Organic Law of the state. And, as we there said also, "it is not for us to suggest in any case that a more equitable mode of assessment or rate of taxation might be adopted than the one prescribed by the Legislature of the State; our only concern is with the validity of the tax; all else lies beyond the domain of our jurisdiction."

The granting of the rights and privileges which constitute the franchises of a corporation being a matter resting entirely within the control of the Legislature, to be exercised in its good pleasure, it may be accompanied with any such conditions as the Legislature may deem most suitable to the public interests and policy. It may impose as a condition of the grant as well as, also, if its continued exercise, the payment of a specific sum to the state each year, or a portion of the profits or gross receipts of the corporation, and may prescribe such mode in which the sum shall be ascertained as may be deemed convenient and just. There is no constitutional inhibition against the Legislature adopting any mode to arrive at the sum which it will exact as a condition of the creation of the corporation or of its continued existence. There can be, therefore, no possible objection to the validity of the tax prescribed by the statute of New York, so far as it relates to its own corporations. Nor can there be any greater objection to a similar tax

upon a foreign corporation doing business by its permission within the state. As to a foreign corporation—and all corporations in states other than the state of its creation are deemed to be foreign corporations—it can claim a right to do business in another state to any extent, only subject to the conditions imposed by its laws.

As said in *Paul v. Virginia*, 75 U. S. 8 Wall. 162, 181 [19: 357, 360], "the recognition of its existence even by other states, and the enforcement of its contracts made therein, depend purely upon the comity of those states, a comity which is never extended where the existence of the corporation or the exercise of its powers is prejudicial to their interests or repugnant to their policy. Having no absolute right of recognition in other states, but depending for such recognition and the enforcement of its contracts upon their assent, it follows, as a matter of course, that such assent may be granted upon such terms and conditions as those states may think proper to impose. They may exclude the foreign corporation entirely; they may restrict its business to particular localities, or they may exact such security for the performance of its contracts with their citizens as in their judgment will best promote the public interest. The whole matter rests in their discretion."

This doctrine has been so frequently declared by this court that it must be deemed no longer a matter of discussion, if any question can ever be considered at rest.

Only two exceptions or qualifications have been attached to it in all the numerous adjudications in which the subject has been considered, since the judgment of this court was announced more than a half century ago in *Bank of Augusta v. Earl*, 38 U. S. 13 Pet. 519 [10: 274]. One of these qualifications is that the state cannot exclude from its limits a corporation engaged in interstate or foreign commerce, established by the decision in *Pensacola Tel. Co. v. Western U. Tel. Co.* 96 U. S. 1, 12 [34: 706, 711]. The other limitation on the power of the state is, where the corporation is in the employ of the general government, an obvious exception, first stated, we think by the late *Mr. Justice Bradley* in *Stockton v. Baltimore & N. Y. R. Co.* 33 Fed. Rep. 9, 14. As that learned Justice said: "If Congress should employ a corporation of ship-builders to construct a man-of-war, they would have the right to purchase the necessary timber and iron in any state of the Union." And this court, in citing this passage, added, "without the permission and against the prohibition of the state." *Pembina Con. S. Min. & Mill Co. v. Pennsylvania*, 125 U. S. 181, 186 [31: 650, 652].

Having the absolute power of excluding the foreign corporation the state may, of course, impose such conditions upon permitting the corporation to do business within its limits as it may judge expedient; and it may make the grant or privilege dependent upon the payment of a specific license tax, or a sum proportioned to the amount of its capital. No individual member of the corporation or the corporation itself can call in question the validity of any taxation which the state may require for the grant of its privileges. It does not lie in any

foreign corporation to complain that it is subjected to the same law with the domestic corporation. The counsel for the appellant objects that the statute of New York is to be treated as a tax law, and not as a license to the corporation for permission to do business in the state. Conceding such to be the case we do not perceive how it in any respect affects the validity of the tax. However it may be regarded, it is the condition upon which a foreign corporation can do business in the state, and in doing such business it puts itself under the law of the state, however that may be characterized.

The only question therefore open to serious consideration in this case is one of fact: Did the Horn Silver Mining Company do business as a corporation within the State? The referee found such to be the fact, as a conclusion from many probative circumstances in the case. That finding was never set aside, but stands approved by the courts of New York. If the correctness of the conclusion could be questioned and held not justified by the facts in evidence—and they should be considered as showing only transactions of interstate commerce, and not business in the state independently of such commerce—it would be impossible to overcome the force of the answer of the defendant in which it alleges that in the years 1881 and 1882 it was a manufacturing company carrying on manufactures within the state of New York. The admission is conclusive that the corporation was engaged in business in the state in those years, though, we are clear, not in such a business as rendered it a manufacturing corporation exempt from the tax prescribed by the statute.

To dispose of the position that the plaintiff in error was a manufacturing corporation, and therefore excepted from taxation under the statutes cited, it is only necessary to refer to the articles of association of the company. By them it appears that it was organized to conduct the business of buying, selling, leasing and operating mines and mining claims in the territory of Utah, and smelting, reducing and refining works there and elsewhere; of conducting a general mining, milling and smelting business in all its branches, including buying and selling mineral ores and bullion; of carrying on a general mercantile business by buying and selling such goods, merchandise, stores and miners' supplies as are usually kept in and required by the wants of a mining camp or settlement; of building and operating all such roads, tramways and transportation routes as may be convenient in transporting the products of its business or procuring supplies; of purchasing, hiring and holding all such real and personal property, wherever situate, as may be required in carrying on any of its business, and when no longer required for business purposes, of leasing, selling or exchanging the same; and generally to do all acts and things incidental to a general mining business or to any of the aforesaid pursuits. They also declare that it was primarily formed for the immediate purpose of working and developing the estate, property and premises known as the Horn silver mine, and the treatment and reduction of the ores and metals therein contained. There is in the business thus detailed

nothing that would characterize the corporation as a manufacturing company, and in no proper sense was it engaged in a manufacturing business within the state. The bullion taken by the company from its mines was shipped to Chicago, and, after being refined and the silver separated from the lead, it was forwarded to the United States assay office in the city of New York, where it had an office, not for occasional business transactions, but where its transfer books were kept, its dividends declared and paid and other business done by it such as is usually performed by corporations where their principal office of business is situated. It is true the greater part of the business of the company was done out of the state, and the greater part of its capital was also without it, but the statute of New York does not require that the whole business of a foreign corporation shall be done within the state in order to subject it to the taxing power of the state. It makes, in that respect, no difference between home corporations and foreign corporations, as to the franchise or business of the corporation upon which the tax is levied, provided it does business within the state as such corporation.

There seems to be a hardship in estimating the amount of the tax upon the corporation, for doing business within the State, according to the amount of its business or capital without the state. That is a matter, however, resting entirely in the control of the state, and not a matter of Federal law, and with which,

of course, this court can in no way interfere.

Since this tax was levied the law of the state has been altered, and now the tax upon foreign corporations doing business in the state is estimated by the consideration only of the capital employed within the state. It is said that against nearly all other foreign corporations except this one the taxes upon their franchises have been computed upon the basis of the capital employed within the state: but as to that we can only repeat what was said in the Court of Appeals of the state, that if this be true, the defendant may have reason to complain of unjust discrimination and may properly appeal for relief to the Legislature of the state, but that it is not within the power of the court to grant any relief however great the hardship upon it.

The extent of the tax is a matter purely of state regulation, and any interference with it is beyond the jurisdiction of this court. The objection that it operates as a direct interference with interstate commerce we do not think tenable. The tax is not levied upon articles imported, nor is there any impediment to their importation. The products of the mine can be brought into the state and sold there without taxation, and they can be exhibited there for sale in any office or building obtained for that purpose; the tax is levied only upon the franchise or business of the company.

Judgment affirmed.

Mr. Justice Harlan dissented.

CIRCUIT COURT OF THE UNITED STATES, SOUTHERN DISTRICT OF NEW YORK.

THE INTERSTATE COMMERCE COMMISSION v. THE TEXAS & PACIFIC RAILWAY COMPANY.

The principal office, within the meaning of the Act of Congress authorizing a Circuit Court, where such office is situated, to enforce orders of the Interstate Commerce Commission, of a railroad corporation created by an Act of Congress which does not prescribe where such office shall be kept is the one where its principal officers have their

business domicil, the meetings of stockholders, directors and executive committee are held, the stock books kept and the dividends declared, rather than the place where the subordinate officers in charge of the operating, traffic and accounting departments of the business discharge their duties.

Decided April 4, 1892.

Wallace, J.:

The question in this case is whether the principal office of the defendant is at the city of New York within the meaning of section 16 of the Act of Congress, commonly known as the Interstate Commerce Act. That section confers jurisdiction upon the circuit courts of the United States to enforce any lawful order of the Interstate Commerce Commission, and in that behalf authorizes the Commission to apply in a summary way by petition to the Circuit Court "sitting in the judicial district in which the common carrier complained of has its principal office, or in which the viola-

tion or disobedience of such order or requirement may happen."

The defendant is a corporation created by an Act of Congress, and operates a railroad in the states of Louisiana and Texas. The Act of incorporation does not prescribe where the principal office shall be kept. If the office where the president, the first vice-president, and the secretary and treasurer have their business domicil, where the regular meetings of the stockholders, the board of directors, and the executive committee, are held, where certificates of stock are issued and registered upon the books, and where the profits, if any

are earned, are received and distributed to the stockholders, is the principal office of the corporation instead of that place where the subordinate officers and agents of the corporation who are in charge of the operating, traffic and accounting departments of its business, discharge their duties, the New York office is the principal office.

The principal office of the corporation is commonly understood to be its chief office or head office—the office at which its most important affairs are regulated and controlled, I conclude that the New York office is the principal office of the defendant within the meaning of the statute.

The statute intends to lodge the power of

enforcing any lawful order of the Commission with that particular Circuit Court which can most effectually compel obedience to its process in the particular case. Obedience to the order of the court is to be enforced by attachment of the directors, officers or agents of the corporation, or by any other process incident or applicable to writs of injunction. In cases of disobedience, process of attachment would ordinarily be most effectual against the chief executive officers of the corporation, and there would seem to be more propriety in directing such process to them than to the subordinate agents. These officers are ordinarily to be found at the head office of the corporation.

The plea is overruled.

IOWA SUPREME COURT.

John C. HOPKINS

v.

C. H. LEWIS, Judge of the District Court for the Fourth Judicial District.

(See S. C. 15 L. R. A. 397.)

A sale of the contents merely of the packages in which liquor was imported into the state, the purchaser being required to open them and empty the liquor into glasses furnished by the

seller, is not a sale by original packages, exempt as interstate commerce from the operations of state laws regulating the sale of intoxicating liquors.

Decided February 10, 1892.

CERTIORARI to the District Court for Woodbury County to review an order finding plaintiff guilty of contempt in violating an injunction restraining him from the unlawful sale of intoxicating liquors and imposing upon him a fine for \$500. *Affirmed.*

The facts are stated in the opinion.

Messrs. Lynn & Sullivan, for plaintiff:

Collins v. Hills, 8 L. R. A. 110, 77 Iowa, 181, shows that the bottles were original packages.

Sales in original packages could not be prohibited.

Leisy v. Hardin, 135 U. S. 100, 84 L. ed. 128; *Tuckman v. Welch*, 42 Fed. Rep. 548; *Wilkerson v. Rahrer*, 140 U. S. 545, 85 L. ed. 572.

Messrs. Carter & Brown, for defendant:

The liquors were delivered in boxes and barrels, securely fastened, containing from two to three dozen bottles of beer.

After receiving boxes and barrels plaintiff opened the same, taking the bottles from the boxes or barrels, and selling the same separately after so opened.

Whatever was said on the subject of what constituted the original package in *Collins v. Hills*, 8 L. R. A. 110, 77 Iowa, 181, was only dictum, and cannot be considered as authoritative or binding upon the court in that respect.

The box has been universally held to constitute the original package.

NOTE.—For note on interstate commerce as related to importations of intoxicating liquors, see *State v. Winters* (Kan.) 10 L. R. A. 616.

4 LITTEK B.

Keith v. State, 10 L. R. A. 480, 91 Ala. 2; *Smith v. State*, 54 Ark. 248, and citations; *State v. Chapman* (S. Dak.) 10 L. R. A. 432; *State v. Fraser*, 1 N. Dak. 425; *Re Beine*, 43 Fed. Rep. 546; *Re Harmon*, 43 Fed. Rep. 372.

Sales having been proved to have been made by plaintiff, and prohibition being the rule, and the right to sell the exception, the burden is upon plaintiff to show that sales made by him were made in a lawful manner.

State v. Cloughly, 78 Iowa, 626; *Keith v. State*, 10 L. R. A. 480, 91 Ala. 2.

Rothrock, J., delivered the opinion of the court:

The cause of John C. Hopkins was abstracted, argued, and submitted in this court with a stipulation that all of the other cases should be submitted upon the same record; the evidence being substantially the same in all the cases. The plaintiffs claim that they were not guilty of contempt, because they made no illegal sales. They insist that they were the keepers of what was known as "original package establishments;" that they sold intoxicating liquors in original packages, which packages were shipped into this state from other states. In other words the claim is made that the sales in question were authorized under the case of *Leisy v. Hardin*, 135 U. S. 100, 84 L. ed. 128. All of the sales were made before the recent Act of Congress known as the "Wilson Bill," relating to the laws of the several states pertaining to the traffic in intoxicating liquors. The plaintiffs rely upon the case of *Collins v.*

Hills, 77 Iowa, 181, 8 L. R. A. 110, in which an original package is defined by this court. Whatever may be thought of the correctness of that definition, it would be a hardship to now hold that it is wrong, because parties were authorized thereby to act in accordance therewith. It is a question of no importance now, in view of the Act of Congress above referred to. But the evidence in these cases shows that the sales in question were not made in accordance with the rule in the case of *Collins v. Hills*. They were not the keepers of original package houses. They kept saloons with bars and other saloon fixtures and appliances. The following is the testimony of one of the witnesses, taken on the trial: "I know a certain place situated upon the northwest corner of Fifth and Pearl streets, occupied by defendant Hopkins. I was there on the 10th day of June, and bought a bottle of beer. At the time I bought the beer Mr. Frank Roberts was with me, and we together drank this beer there at the time. The place where we got this beer was furnished up as an original package saloon. There was a bar and other saloon fixtures and appliances there. There was a shelf back of the bar, and sample bottles on it, and drinking glasses. The beer was cold. We paid for the beer after we drank it. We purchased also a package of whiskey. This beer we bought was lager beer and both the beer and whiskey were intoxicating. Mr. Frank Roberts and myself were there on the 28th of June, and bought a bottle of beer. We saw the defendant there on both occasions. Defendant Hopkins set up the bottle of beer we called for, and said we would have to put up for it before we drank it, as that was the law. Roberts asked him if he could have the bottle and he said 'Yes,' but would have to charge him a nickel for it. This was after drinking. We didn't buy the bottle and defendant took it and put it away. Cross-examination: The bottle of beer we purchased on the 10th of June was sealed. It had a tin-foil and wire over the top. So far as we could judge from its appearance, it had not been opened at all. We opened it. The whiskey had not been opened that we knew of. We didn't have possession of the bottle. We set it on the counter. We had to pull the cork out. We didn't try to carry it off. All the liquor that we ever bought there was in bottles, sealed; and to all appearances they had never been broken. Redirect exam-

4 INTER S.

ination: There was no seal on the bottle of whiskey that we purchased there any more than an ordinary cork in the bottle. There was a paster on there which read: 'Bottled by William Darst, Omaha, Neb.'" It is agreed that the testimony of Frank Roberts is substantially the same as that above set out. This testimony is in no manner contradicted, except that plaintiff Hopkins testified as follows: "I heard the testimony of the last witness in regard to the bottles. After a customer comes in and buys a bottle he leaves it on the counter after he empties it and I take it, and set it on the back of the bar. I own the bottle. I have never prevented a customer from taking it if he desires to. I charge no more where the bottle is taken away than when it is left. Every bottle that we get we get labels on. Those bottles were shipped in original packages, and none have been received while we were in business that were not labeled." It thus appears that the plaintiffs did not sell the packages. They sold the contents. The device of requiring the purchaser to pull the corks from the bottles is of no consequence. The fact remains that it was the liquor, as emptied from the original packages into drinking glasses furnished by the plaintiffs, upon a counter in a saloon, which was sold. The cases of *Leisy v. Hardin* and *Collins v. Hills* were wholly unlike these cases. In those cases the sellers were not the keepers of dram shops. They sold original packages and not the mere contents of the packages. The evidence further shows that the beer which the plaintiffs sold was claimed to be imported from Covington, Neb.; to Sioux City, where the plaintiffs carried on the business. There is much in the evidence tending to show that the shipping of the beer across the Missouri river was a mere device, and that it was not interstate commerce, as understood in the way of trade. The parties owning the beer, and from whom the plaintiffs made their purchases, were in business in Sioux City, and the beer was ordered there, and it was brought over the river, as ordered, in the wagons of a transfer or transportation company, in which the wholesale dealers were interested as owners. We think that the plaintiffs did not show by a preponderance of the evidence that the sales were made by original packages.

The order of the District Court will be affirmed.

(No. 267.)

1. The doctrine that transportation charges should be proportioned to the distances between different points, *where those distances are greatly dissimilar*, has never been advocated by the railroads or recommended by the Commission. While distance is an ever-present element in the problem of rates and not unfrequently a controlling consideration, the general practice of rate making is opposed to the principle of exact proportion, and there is no opportunity for its application under present conditions. Where all the distances brought into comparison are considerable and the differences between them relatively small, there should be substantial similarity in the respective rates unless other modifying circumstances justify disparity.
2. That rates should be fixed in inverse proportion to the natural advantages of competing towns with the view of equalizing "commercial conditions," as they are sometimes described, is a proposition unsupported by law and quite at variance with every consideration of justice. Each community is entitled to the benefits arising from its location and natural conditions, and the exaction of charges unreasonable in themselves or relatively unjust, by which those benefits are neutralized or impaired, contravenes alike the provisions and the policy of the statute.
3. On complaint of a relatively unreasonable rate on lumber from Eau Claire to various points on the Missouri river as compared

with rates to the same points from La Crosse, Winona, and various other lumber shipping points: *Held*, That the case must mainly be determined by comparing the rate in question with the rates from neighboring towns, similar in size, situation and volume of competing traffic, and at approximately the same distance from common markets; that the rate complained of subjects Eau Claire to undue prejudice and disadvantage, and is unlawful; and that such rate should not exceed the rate from La Crosse and Winona by more than two cents per hundred pounds when, as at the time complaint was filed, the rate from those points is not over 11 cents per hundred, nor by more than two and one half cents per hundred pounds above the present rate of 16 cents per hundred from La Crosse and Winona.

4. A railroad cannot be said to discriminate against a town which it does not reach and in whose carrying trade it does not participate; therefore, no case is made out against the carriers which were made parties at the request of the original defendant, because none of them have lines extending to Eau Claire. Preference, prejudice and other like terms imply comparison, and the basis of comparison is wanting unless the rates compared are made by the same carrier. But these parties having defended and endeavored to justify the differential found excessive, while not technically subject to an order for its correction, have no more right to re-

der it ineffectual than to openly disregard a direction clearly within the scope of the Commission's authority. The intervening defendant, the Omaha road, though serving the complaining town, need not, for reasons

stated, be included in the order directing the reduced rate, but the case will be held open as against that company for such direction as may hereafter be required.

Complaint filed July 7, 1890.—Answer of original defendant, Chicago, Milwaukee & St. Paul Railway Company filed August 2, 1890.—Order entered bringing in other defendants September 17, 1890.—Order entered granting leave to Chicago, St. Paul, Minneapolis & Omaha Railway Company to intervene as a defendant, November 24, 1890.—Answers of new defendants filed October 13, 1890, to November 24, 1890; also on September 21, 1891.—Orders entered, allowing petitioning lumber dealers to intervene in behalf of the defense, November 21, December 17, 1890, and June 4, 1891.—Depositions filed April 3 to September 21, 1891.—Hearing had at Chicago, Illinois, September 21 and 22, 1891.—Briefs filed, September 21 to November 12, 1891.—Proposed findings of fact filed by complainant November 19, 1891. Decided June 17, 1892.

RELATIVE RATES on lumber from Eau Claire to points on the Missouri river. See Complaint and Answer, 3 Inters. Com. Rep. 174. Orders, 3 Inters. Com. Rep. 314.

REPORT AND OPINION OF THE COMMISSION.

Knapp, Commissioner:

The substance of complainant's charge in this case is, that the rates maintained by the Chicago, Milwaukee & St. Paul Railway Company for the transportation of lumber, in car-load quantities, from various specified towns in the lumber producing districts of Wisconsin and Minnesota, to Kansas City, Omaha and other Missouri river points, discriminate unjustly against the city of Eau Claire, and operate to its serious prejudice and disadvantage. The formal complaint herein, which was directed against the above named carrier only, sets forth with considerable detail the history and situation of the lumber industry in that region, and contains numerous statements in reference to distances, tariffs, tonnage, population and the

like, all tending to establish the relative injustice asserted. The answer of this defendant substantially admits the specific facts alleged in the petition, but disputes some of its inferences and assertions, and indirectly denies that the rates in question are unreasonable or constitute any violation of legal duty. In further justification of the apparent disparity in charges on west bound lumber, as between Eau Claire and its immediate rivals, this railroad in effect pleads its inability to alter the rates complained of without the consent, hitherto withheld, of other carriers engaged in transporting lumber to western destinations from various places on their respective lines which are competitors of Eau Claire, because those carriers by lowering their rates at competing points, to correspond

with any reduction by this road at Eau Claire, could restore and maintain the existing *relation of rates* between these towns, which is the real grievance of complainant. It was therefore prayed that certain roads, which are enumerated in this answer, should be made parties to the proceeding, in order that the whole subject might be properly investigated and the various interested carriers bound by any ruling of the Commission. In compliance with this request an order was made bringing in the other railroad named in the title, except the Chicago, St. Paul, Minneapolis & Omaha Railway Company, which subsequently, on its own application, was permitted to intervene. Most of these corporations thereupon filed answers to the complaint; some of them setting forth the circumstances which led to the adoption of the present tariff on west bound lumber and alleging that serious disturbance and injury would result from any interference with the rate established at Eau Claire, and all of them denying any actual or intended discrimination against the shippers of that city. In addition to the carriers thus made defendants, a large number of persons, firms and corporations engaged in the lumber business in various places in the states of Iowa, Illinois and Missouri, together with the La Crosse Lumber Exchange of La Crosse, Wisconsin, all claiming a direct and important interest in the controversy, were also at one time or another allowed to intervene. These parties are named and described as intervenors in the title of the case; and so far as they answered, furnished evidence or otherwise participated in the hearing, (and to a great extent they assumed the burden of the defense,) they sought to sustain and defend the rates assailed in this proceeding. The introduction of these defendants, representing a large area of country and numerous transportation and commercial interests, greatly extended the range of investigation and opened up a broad field of inquiry.

In the voluminous testimony which has been placed upon the record there is little disagreement as to actual facts, but the claims of different parties and the elaborate arguments of counsel disclose many conflicting views and wide divergence of opinion. The nature of the controversy, with its diverse phases and relations, is so fully set forth in the formal findings, that no further analysis of the pleadings or other preliminary statement would seem to be required. In order that a complete summary of the proofs may be presented, and without special reference to their materiality or bearing, we find the following facts:

FINDINGS OF FACT.

1. The complainant, the Eau Claire Board of Trade, is an association of citizens and residents of the city of Eau Claire, Wisconsin,
4 INTER 8.

organized to promote the business interests of that city. The defendant railroad companies are severally common carriers engaged in the interstate transportation of lumber and other freight. The sources of supply of the west bound lumber shipped over these roads are the forests of northern Michigan, Wisconsin and Minnesota; and the main points from which such shipments are made are Minneapolis, Eau Claire, Winona, La Crosse, Oshkosh, Milwaukee and Chicago, and the following towns on the Mississippi river, south of La Crosse, to wit: Dubuque, Clinton, Lyons, Fulton, Moline, Rock Island, Davenport, Muscatine, Burlington, Keokuk, Hannibal and Louisiana. The market or distributing towns to which these shipments are made are for the most part the "Missouri river points," Sioux City, Omaha, Council Bluffs, St. Joseph and Kansas City.

2. No one of the defendant roads reaches all these points of production. From Eau Claire shipments of lumber are made to the Missouri river over the Chicago, Milwaukee & St. Paul, the Chicago, St. Paul, Minneapolis & Omaha, and the Wisconsin Central. The Chicago, Milwaukee & St. Paul road, (hereinafter designated the "Milwaukee,") has main lines as follows: from Chicago to Council Bluffs; from Marion, Iowa, on said former line, to Kansas City; from Oshkosh to Milwaukee; from Milwaukee to Sabula Junction; from Minneapolis *via* Wabasha to Sabula Junction, called the "river line;" from Minneapolis to Mason City, called the "Iowa & Minnesota line." Minneapolis, Winona and La Crosse are on the "river line," but Eau Claire is on a branch forty-eight miles in length connecting with that line at Wabasha. The Milwaukee road has an arrangement with the Iowa Central by which, in hauling from Eau Claire and Winona to Council Bluffs, it uses the latter road from Mason City to Pickering, a distance of 97 miles, and, in hauling to Kansas City, it uses the same road from Mason City to Hedric, a distance of 167 miles. The distances *via* the Iowa Central are considerably less than those over the Milwaukee line proper. The Chicago, St. Paul, Minneapolis & Omaha road (hereinafter styled the "Omaha") has a line extending from Eau Claire through St. Paul and Minneapolis to Sioux City, Omaha, and Council Bluffs. It also has lines from Worthington, Minn., to Mitchell in South Dakota; from St. Paul and Minneapolis through Hudson, Wis., to Elroy, Wis.; from Hudson to Ashland and Bayfield on Lake Superior in northern Wisconsin; and from Eau Claire to West Superior and Duluth, Minn. Winona and La Crosse are also both located on the Chicago & Northwestern, and the Chicago, Burlington & Northern. La Crosse is also reached by the Green Bay, Winona & St. Paul, and Winona by the last named road and the Winona & Southwestern,

but these roads apparently do not participate in the lumber traffic.

All the other defendant roads, except the Missouri Pacific and Great Northern, have main lines leading from Chicago, and, by their several connections, from Milwaukee, Oshkosh and other points across the Mississippi to Missouri river markets. The points at which these roads cross the Mississippi, and the Missouri river points reached by them, directly or through connections, are shown by the following table:

Roads.	Crossing points on the Mississippi.	Missouri river points reached.
Chicago & Alton R. R.	Louisiana, Mo.	Kansas City.
Atchison, Topeka & Santa Fé R. R.	Ft. Madison, Ia.	Kansas City, St. Joseph, Atchison and Leavenworth. Kansas City (in connection with the Hannibal & St. Joseph), Leavenworth, Atchison, St. Joseph, Council Bluffs and Omaha.
Chicago, Rock Island & Pacific R'y.	Rock Island, Ill.	Council Bluffs, Omaha, St. Joseph, Atchison, Leavenworth, Kansas City and Sioux City—the last in connection with the Chicago & Northwestern.
Chicago, Burlington & Quincy R. R.	Burlington, Ia. Quincy, Ill.	Council Bluffs, Omaha and Sioux City.
Chicago & North Western R'y.	Clinton, Ia., Winona, Minn. & St. Paul, Minn.	St. Joseph, Leavenworth, direct, and Atchison. Kansas City, Council Bluffs and Omaha, by connections.
Chicago, St. Paul & Kansas City R'y.	Dubuque, Ia.	Kansas City, direct, and St. Joseph, Atchison and Council Bluffs by connections.
Wabash R. R.	Hannibal and St. Louis.	

The Missouri Pacific Railway has lines running west from the Mississippi river to St. Louis and Belmont, Mo., and West Memphis and Helena, Ark., and reaching Kansas City, Leavenworth, Atchison, St. Joseph and Omaha; and the Great Northern line extends west from St. Paul and Minneapolis and reaches Sioux City in connection with Sioux City & Northern Railway.

The roads having lines from the river towns named below to lumber markets on the Missouri are as follows:

From Dubuque,—the Chicago, Milwaukee & St. Paul, Illinois Central and Chicago, St. Paul & Kansas City.

From Clinton,—the Chicago, Milwaukee & St. Paul, Chicago, Burlington & Quincy and Chicago & Northwestern.

4 INTER S.

From Lyons,—the Chicago & Northwestern, and Chicago, Milwaukee & St. Paul.

From Fulton,—the Chicago & Northwestern, Chicago, Milwaukee & St. Paul, and Chicago, Burlington & Quincy.

From Moline,—the Chicago, Milwaukee & St. Paul, Chicago, Burlington & Quincy, and Chicago, Rock Island & Pacific.

From Rock Island,—the Chicago, Rock Island & Pacific, Chicago, Milwaukee & St. Paul, and Chicago, Burlington & Quincy.

From Davenport,—the Chicago, Rock Island & Pacific, and Chicago, Milwaukee & St. Paul.

From Muscatine,—the Chicago, Rock Island & Pacific.

From Burlington,—the Chicago, Burlington & Quincy, and Chicago, Burlington & Kansas City.

From Keokuk,—the Chicago, Burlington & Quincy, Chicago, Burlington & Kansas City, and Chicago, Rock Island & Pacific.

From Hannibal,—the Hannibal & St. Joseph, Chicago, Burlington & Quincy, and Wabash.

From Louisiana,—the Chicago & Alton.

From Quincy,—the Chicago, Burlington & Quincy, Hannibal & St. Joseph, and Quincy, Omaha & Kansas City.

From Winona,—Chicago, Milwaukee & St. Paul, Chicago & Northwestern, Chicago, Burlington & Northern, the last named being a party to the Chicago, Burlington & Quincy system which reaches the Missouri river.

From La Crosse,—Chicago, Milwaukee & St. Paul, Chicago and North Western, Chicago, Burlington & Northern, the last named being a party to the Chicago, Burlington & Quincy system, which reaches the Missouri river.

From Eau Claire,—Chicago, Milwaukee & St. Paul, Chicago, St. Paul, Minneapolis & Omaha; it is also located on the Wisconsin Central which connects with the above named roads.

The Milwaukee and Omaha are the only roads made defendants in this proceeding which reached Eau Claire. The Missouri Pacific, the Chicago, St. Paul & Kansas City, and the Chicago & Northwestern Railway Companies, admit that they are parties to joint rates on lumber from Eau Claire, and all the defendant roads appear to have joined in fixing the differentials complained of in this case. The Wisconsin Central, of which the Northern Pacific Railroad Company is lessee, is not made a party defendant, but its line now reaches Eau Claire and is carrying lumber to Missouri river points in connection with the Chicago, St. Paul & Kansas City, and also in connection with the Great Northern. The differentials, which are the ground of complaint in this proceeding, were fixed by what is known as the "Bogue Award," which is hereinafter

set forth. Since that award was made other lines of road have become engaged in carrying lumber to Missouri river points; among these are the Chicago & Kansas City, and the Atchison, Topeka & Santa Fé roads from Chicago.

3. As above stated, the sources of supply of the lumber carried by these roads are the forests of Northern Minnesota, Wisconsin and Michigan. The Minnesota timber is manufactured into lumber largely at Minneapolis, and thence transported to market; the Michigan timber is manufactured into lumber in that state and carried by water to Milwaukee, Chicago and other lake ports; the Wisconsin timber is manufactured extensively at Eau Claire, Winona, La Crosse and Oshkosh. Eau Claire and La Crosse are in western Wisconsin, the former about 75 miles by water from the Mississippi river, and the latter on its eastern bank; Winona is in Minnesota, on the western bank of the Mississippi, and Oshkosh is on Lake Winnebago in eastern Wisconsin. Minneapolis is about 100 miles from Eau Claire; Winona about 80 miles, and La Crosse about 106 miles. Eau Claire is situated at the junction of the Eau Claire and Chippewa rivers; the Eau Claire is a branch of the Chippewa, and the latter empties into the Mississippi. Logs are floated down the Eau Claire and Chippewa rivers to Eau Claire, and thence on the Chippewa and Mississippi rivers to Winona and La Crosse, and also to Mississippi river points below. Logs are also floated down the Black river to La Crosse and other Mississippi river towns. A large part of the timber on the Eau Claire and Black rivers can be floated with about equal facility down either stream and taken to Winona and La Crosse on the one hand or Eau Claire on the other. Eau Claire, Winona, La Crosse and Oshkosh are small cities, each having from 18,000 to 20,000 inhabitants, while Minneapolis has about 150,000. These cities are all natural lumber markets; they have large saw mills, and the man-

ufacture, sale and shipment of lumber are conducted on a large scale at Minneapolis, and constitute the principal business of the other places. Eau Claire and all the cities of Wisconsin, Minnesota and the northern peninsula of Michigan, and also Mississippi river points engaged in the manufacture and shipment of lumber to the Missouri river, may be said to be in competition in this business, but the most active competitors of Eau Claire are Winona and La Crosse. The principal distributing points for Eau Claire lumber are, and for 20 or 25 years have been, the Missouri river towns, which are also the principal markets for other shipping points both on the Mississippi river and in the interior. Eau Claire seems to be more rigidly confined than its competitors to the Missouri river market. Since 1864 when the Bogue award was made, southern yellow pine from the states of Georgia, the Carolinas, Southern Missouri, Arkansas and Texas, has come into competition with the white pine from Minnesota, Wisconsin and Michigan. This competition extends north to the southern line of Minnesota, and is strong in Missouri, Kansas, Nebraska and Iowa. The natural tendency of this competition is to reduce the price of the northern pine, and in that way affect transportation rates on the latter, but it does not appear to have an appreciable effect on the relation of rates on lumber between Eau Claire and its immediate competitors.

4. Eau Claire is situated in what is known as the "Chippewa District." In this district, and in the vicinity of Eau Claire, are Chippewa Falls, Badger's Mills and Porter's Mills, at which lumber is manufactured in large quantities. As appears from the "North Western Lumberman," copies of which were introduced in evidence, the aggregate cut of lumber at the points and in the districts named therein, from 1878 to 1890, both inclusive, is shown by the following table:

CUT OF LUMBER.

Year.	Chippewa District, including Eau Claire	Winona.	Black River Dist., including La Crosse.	Minneapolis.	Mississippi River.	Total west of Chicago District.
1878.	154,119,000			130,274,076	480,698,000	1,023,974,000

5. The Omaha road was built to Eau Claire in 1878 or 1879, and the Milwaukee road about 1882. Prior to the building of these roads, lumber produced at that place was rafted and then floated down the Chippewa and Mississippi to various towns on the latter river, from which it was distributed by rail to market destinations mainly in the west. These towns on the Mississippi have been engaged in this business since 1850 or 1853. After these roads were constructed, Eau Claire entered largely into the business of "piling, drying and manufacturing lumber" and shipping the same to market by rail. About half the cut at Eau Claire in 1890 was shipped in this way, and the other half was rafted to Mississippi river towns; and it is estimated that eighty per cent of the lumber rafted to points below Winona comes from the Chippewa river. Eau Claire appears to be well adapted by location and in other respects for the manufacture and sale of lumber; it has a natural booming ground or place for the safe storage of logs, cheap transportation from the stump to the mills, proximity to the timber and locations suitable for mills and yards. Being situated nearer the pine forests, the sources of timber supply, and at the confluence of two rivers which penetrate those forests, the Eau Claire and Chippewa, it appears to have natural advantages over its neighboring competitors. Logs for Eau Claire mills are subject to a boomage charge at that place for 50 cts. per thousand feet, and they also have to be separated from the mass of logs intended for Mississippi river towns. Chippewa river logs for those towns are driven at a nominal cost *via* Eau Claire to the Beef Slough Boom where that river empties into the Mississippi. These logs are subject to a boomage charge at Beef Slough of 50 cts. per thousand feet, but are not subject to such charge at Eau Claire. In order to float logs on the Mississippi to lumber points on the river, it is necessary to bind them together in rafts, but this expense is not incurred in floating logs to Eau Claire. These rafts have to be towed from Beef Slough to points below, and this occasions an additional expense. The weight of evidence is to the effect that it costs from 40 cts. to 75 cts. more per thousand feet to transport logs to Winona than to Eau Claire. The cost of towage from Beef Slough to Winona is about 12 cts. per thousand feet; to Rock Island, Davenport, Muscatine and Moline, about \$1.23; and to Hannibal, about \$1.95. There is no evidence as to the cost of towage to other lumber towns on the Mississippi. Besides the Chippewa and Black rivers, logs also come down the St. Croix river to the Mississippi. Rafting is not necessary in bringing logs down the Black river to La Crosse. Logs are not damaged in being transported by water in rafts, but sawed lumber is injured by the boring which is necessary in

4 INTER S.

forming it into rafts and also by discoloration from water. After lumber is in the raft, the cost of its transportation by water down the Mississippi is less than for the same distance by rail; but, including the rafting and preceding expenses, the testimony is to the effect that lumber can be shipped from Eau Claire by rail direct to Missouri river markets at as little, if not less, cost than it can be floated to Mississippi river points and thence transported by rail to those markets. The railway companies whose lines run from Chicago across the Mississippi to the Missouri river territory naturally desire that lumber be carried by water down the Mississippi to shipping points on that river, and be thence shipped over their roads to the Missouri river markets. The Omaha road is also interested in maintaining high lumber rates at Eau Claire, because of an agreement between that road and the purchasers of its timber lands in northwestern Wisconsin, by which those purchasers bound themselves to ship over its line the timber from such lands, (which is further from the Missouri river markets than Eau Claire timber), on condition of receiving the same rates as might be charged by that road on such shipments from Eau Claire.

6. The rates from Eau Claire and the other shipping points to the Missouri river markets are based on the rate from Chicago, being certain differentials over or under that rate, and the same rate is made from any one of the shipping points to all the Missouri river markets, although the distances to the latter vary materially. The rate from Eau Claire seems to have been originally 2 cents per hundred pounds above the rate from Chicago, but there is no evidence of any considerable shipments at that figure, and it does not appear to have become a permanent and established rate. Prior to April, 1883, but little lumber was shipped by rail from La Crosse and Winona, and no regular lumber rate from those towns was in force until that date, when the rate from Chicago to Kansas City and Omaha appears to have been 15 cents, from La Crosse and Winona 15 cents, and from Eau Claire 17 cents. In March, 1884, there was a rate of 15 cents from La Crosse and Winona to Kansas City, and of 20 cents from Eau Claire to that point, but how long it continued does not clearly appear. The Eau Claire rate seems to have remained nominally at 2 cents above the Chicago rate until a period just prior to the Bogue award, when it was advanced to 4 cents above the Chicago rate. This 2 cent differential appears to have occasioned much dissatisfaction, for while it existed there were frequent fluctuations and general instability in the lumber rates. The situation at that time was described by some of the witnesses as a "rate war."

In the early history of the lumber industry

in this territory the principal points of competition were Chicago on the one hand, and St. Louis, Hannibal and Louisiana on the other. Chicago received its lumber from Michigan by way of the lake, and the other towns received theirs by way of the Mississippi. As railroads were built from time to time into the northern pineries, and numerous towns engaged in the manufacture of lumber, the conflict of rates increased and much uncertainty and demoralization resulted. After several unsuccessful attempts to adjust these differences, the railway companies finally submitted the matter to Mr. George M. Bogue, under an agreement between them to abide by his arbitration. The decision rendered by him, known as the "Bogue Award" was made May 26, 1884, and is as follows:

"Award of the Arbitrator as to the Differentials which shall govern on Lumber to Missouri River Points.

Chicago, May 10, 1884.

"J. W. Midgley, Esq.,

Chairman, etc., — Chicago.

"Dear Sir:—The question as to what difference shall govern in rates from the several shipping points on or east of the Mississippi river on lumber destined to Missouri river points, referred to me for arbitration, has had my careful consideration. All the lines in interest had opportunity to present arguments to me, and nearly all of them availed themselves of the privilege; but a few preferred, apparently, to leave the question in my hands. The arguments submitted are very full, covering, I think, every question that can possibly arise in the consideration of the subject; and it is not strange that arguments prepared from so many different standpoints present many conflicting statements. Nearly all the lines appear before me in the light of special pleadings, each representative seeming to think that the interest of his line is paramount to all others. I have, however, very carefully examined the different items of cost, as submitted in the different arguments; have visited the large manufacturing points on the Chippewa river; interviewed many of the lumber manufacturers; have visited several of the

Mississippi river points, and in fact, have taken every precaution to fully inform myself of the subject, so that I might be able to survey the situation from all sides, firmly believing that no decision which is not tolerably equitable will be strictly observed or long respected.

"I am impressed with the idea that, instead of this question being settled on the basis of the cost of lumber, the question at issue is, 'What rate will enable each line party to this arbitration to place its fair proportion of lumber in the territory under consideration?' for it is fair to assume that no road will see its principal lumber points dismantled and dried up till all efforts to retain their prominence have been exhausted; and, meantime, in the effort to do this, a great deal of money will be wasted. It is no doubt true that the roads reaching Chicago—which is the largest primary grain and stock receiving point in the world—can in their return make rates on lumber without loss, which would net a loss if applied to the roads reaching the pineries direct; and it is doubtless true, also, that the actual cost of the haul from Chicago does not greatly exceed the shorter haul from the Mississippi river; and so long as this is the case, it is natural to expect that the Chicago roads will support the Chicago market.

"This theory must not, however, be carried to the extreme, for if transportation costs anything, it certainly costs something for the haul from Chicago to the Mississippi river; and it is neither just nor politic for any road to claim that the rate from the Mississippi river should be as much or more than the Chicago rate, whatever may be the cost or the price at the two markets.

"While, therefore, it seems easily apparent that lumber can be sold at the Mississippi river at as low, or lower, prices than at Chicago, it cannot be safely argued that the same rate should be made for so much greater distance.

"After a most careful investigation of the subject in all its bearings, and with a keen appreciation of the delicate and difficult duty confided to me, I shall make the following award:

From St. Louis.....	6½	cts.	per cwt.	less than Chicago
" Louisiana, Hannibal and Quincy.....	5½	"	"	"
" Keokuk to Burlington inclusive.....	4½	"	"	"
" Rock Island, Moline, Davenport and Muscatine ..	3½	"	"	"
" Fulton, Clinton, Lyons, Sabula, Comanche and Dubuque.....	2	"	"	"
" McGregor and Prairie du Chien.....	1	"	"	"
" La Crosse and Winona.....	1	"	"	above
" Minneapolis and St. Paul.....	2	"	"	"
" Stillwater.....	4	"	"	"
" Menomonie, (Wis.) Eau Claire and Chippewa Falls.....	6½	"	"	"
" Wausau, Steven's Point, Centralia, Merrill, Grand Rapids and territory in that district, or Central Wisconsin.....	7	"	"	"
" Necedah.....	7	"	"	"

From Merillan	6½	cts. per cwt. above	Chicago
" Oshkosh	5½	" " " "	"
" Fond du Lac	5½	" " " "	"
" Menominee and Marinette, Mich.	7	" " " "	"
" Ft. Howard and Green Bay	6	" " " "	"
" Oconto	6½	" " " "	"
" Muskegon, Ferrysburg, Grand Haven, Grand Rapids and Allegan, Mich.	6½	" " " "	"

"All of which is respectfully submitted.

"George M. Bogue, Arbitrator."

7. To show the construction placed upon this award by railroad authorities and their understanding of the principle upon which it was based, we make the following extracts from the testimony: A. C. Bird, Traffic Manager of the "Milwaukee" road, stated that "the acknowledged principle of the award was that each company was entitled to all the lumber it could carry at reasonable rates—that is, rates that were *relatively fair as between the railroads*, and to put all the manufacturers on any one road on a fair equality with the manufacturers on another road, to the end that each road might thereby receive the benefit of its manufacturing industries;" and, again, that "primarily the object of the Bogue award was to place each line in a position to carry its fair share of the Missouri river lumber, and further to place each manufacturing locality upon an even footing with its competitors. . . . *If Eau Claire could produce lumber cheaper than Winona or La Crosse, then the latter points were to have a lower rate so as to enable them to compete.*"

This award appears to have been observed by the defendant roads since its date, May 26, 1884, except that from February 8 to June 20, 1888, the Milwaukee road had a 4 cent differential in force on shipments from Eau Claire. There have also been from time to time slight changes in the differentials at the lower Mississippi river points. As soon as the 4 cent differential was put in force at Eau Claire, rates were reduced in the same proportion at Chicago, Muscatine, Rock Island, Davenport, Louisiana, St. Louis and Minneapolis. Upon this action by the other roads, the Milwaukee road restored the 6½ cent differential. It is plain that if the rate from Eau Claire should be reduced, a corresponding reduction could be made by the roads leading from other lumber producing and shipping points which would restore the present relation of rates between Eau Claire and such other points.

8. At the time the complaint was filed, July 7, 1890, the Chicago rate to Missouri river points was 10 cents per hundred pounds. It has since been advanced to 15 cents.

The following table shows the rates from the towns named therein to Missouri river points, 4 INTER S.

with the "Bogue differentials" applied to the rates from Chicago of 10 and 15 cents, respectively; also the present rates as announced by the tariffs of the Western Freight Association:

	Rates under Bogue Differentials.		Present Rates as Per Tariffs of Western Frt. Assn.
	Cents.	Cents.	Cents.
Chicago	10	15	15
Milwaukee	10	15	15
Minneapolis	12	17	17
Eau Claire	16½	21½	21½
Winona	11	16	16
La Crosse	11	16	16
Oshkosh	15½	20½	20½
Clinton	8	13	14½
Fulton	8	13	14½
Lyons	8	13	14½
Moline	6½	11½	13
Rock Island	6½	11½	13
Davenport	6½	11½	13
Muscatine	6½	11½	13
Quincy	4½	9½	10½
Burlington	5½	10½	11½
Keokuk	5½	10½	11½
Hannibal	4½	9½	10½
Louisiana	4½	9½	10½
St. Louis	3½	8½	8½

While these rates are based on the Chicago rate, it appears that the building of large saw mills at other points, and the extension of railways into the timber regions of the north-west, have, to a large extent, withdrawn from Chicago the business of supplying lumber to western markets. Chicago, however, does as large a business as heretofore in supplying its local demand and in shipping east. Lumber from Oshkosh is also shipped extensively through Chicago to the east; and it appears that the western shipments from both Chicago and Oshkosh are mainly the surplus remaining after eastern markets have been supplied.

9. A carload of lumber is about 15,000 ft., the weight of which is about 85,000 lbs. The following table, showing the distances by short lines from Eau Claire and other shipping points therein named to Sioux City, Council Bluffs,

St. Joseph and Kansas City, is believed to be correct:

DISTANCES BY SHORT LINES.

To	Sioux City.	Council Bluffs.	St. Joseph.	Kansas City.
From	Miles.	Miles.	Miles.	Miles.
Chicago.....	517	488	479	458
Eau Claire.....	358	457	556	605
Winona.....	328	427	556	560
La Crosse.....	358	445	546	540
Minneapolis.....	268	322	481	581
Oshkosh.....	580	604	655	647
Clinton.....				
Fulton.....	382	355	399	380
Lyons.....				
Moline.....				
Rock Island.....	416	317	319	337
Davenport.....				
Muscatine.....	306	297	262	310
Quincy.....	416	317	207	226
Burlington.....	355	291	273	341
Keokuk.....	348	304	214	218
Hannibal.....	416	317	207	226
Louisiana.....	441	342	232	240
St. Louis.....	511	412	307	277

On the basis of these distances and estimating a carload at 35,000 lbs., the following are the rates per car per mile between said points:

RATE PER CAR PER MILE.

To	Sioux City.	Council Bluffs.	St. Joseph.	Kansas City.
From	Cents.	Cents.	Cents.	Cents.
Chicago.....	10.15	10.75	10.90	11.46
Eau Claire.....	21.01	16.46	12.84	12.47
Winona.....	17.07	13.11	10.07	10.00
La Crosse.....	15.73	12.64	10.25	10.37
Minneapolis.....	22.68	16.43	12.11	11.20
Oshkosh.....	12.37	11.87	10.95	11.08
Clinton.....				
Fulton.....	11.91	12.81	11.09	11.97
Lyons.....				
Moline.....				
Rock Island.....	9.67	12.70	12.61	11.94
Davenport.....				
Muscatine.....	10.16	12.55	12.78	12.98
Quincy.....	7.99	10.48	16.08	14.71
Burlington.....	10.25	12.62	13.45	10.77
Keokuk.....	10.56	12.09	17.25	14.71
Hannibal.....	7.99	10.48	16.08	14.71
Louisiana.....	7.53	9.72	14.33	13.85
St. Louis.....	5.82	7.22	9.69	10.74

The rate per ton per mile is shown by the following table:

RATE PER TON PER MILE.

To	Sioux City.	Council Bluffs.	St. Joseph.	Kansas City.
From	Cents.	Cents.	Cents.	Cents.
Chicago.....	0.58	0.61	0.62	0.65
Eau Claire.....	1.20	0.94	0.73	0.71
Winona.....	0.97	0.74	0.57	0.57
La Crosse.....	0.90	0.72	0.58	0.59
Minneapolis.....	1.29	0.68	0.69	0.64
Oshkosh.....	0.72	0.67	0.62	0.63
Clinton.....				
Fulton.....	0.66	0.73	0.67	0.69
Lyons.....				
Moline.....				
Rock Island.....	0.55	0.72	0.72	0.68
Davenport.....				
Muscatine.....	0.58	0.77	0.78	0.74
Quincy.....	0.45	0.60	0.91	0.84
Burlington.....	0.59	0.72	0.78	0.61
Keokuk.....	0.60	0.69	0.98	0.98
Hannibal.....	0.45	0.59	0.91	0.84
Louisiana.....	0.43	0.55	0.81	0.79
St. Louis.....	0.38	0.41	0.55	0.61

From these tables it appears that the rates per car per mile and per ton per mile are considerably greater from Eau Claire to the four Missouri river points named, than from any of its immediate competitors, except in the instance of the rates per car per mile and per ton per mile from Minneapolis to Sioux City, and that said rates are also greater from Eau Claire than from most of the Mississippi river points.

10. As before stated, Minneapolis, Winona and La Crosse are on the main line of the Milwaukee road from Chicago to Minneapolis, while Eau Claire is 48 miles distant from the main line on a branch road from Wabasha. On an average there is a train and a half each way per day on this branch road, which is about one tenth of the business of the main line. This branch road is comparatively level, with no difficult grades, and the cost of "physical movement" of a train over it is not greater than over the main line. It appears, however, that a full train cannot always be made up on this branch line, and hence engines employed there cannot always be utilized to their full capacity. As a general rule the operating expenses per ton per mile are greater on branch than on main lines. Eau Claire, is, however, on the main line of the Omaha road, and is reached by the Wisconsin Central and other roads hereinbefore named. Oshkosh is also on a branch of the Milwaukee road about 40 or 50 miles from the main line. It may be stated as in the nature of an admission that Mr. E. P. Ripley, Third Vice President of the Milwaukee road, testified that he knew of no "conditions that should make the rate higher from Eau Claire than from Oshkosh except that Eau Claire is nearer the lumber producing territory and perhaps may be said to be able to pay more," and that "there are no dissimilar conditions existing at Winona, La Crosse and Minneapolis as compared with Eau Claire which would justify the charge of a higher rate per car per mile on lumber from Eau Claire to the Missouri river points than from the points first named, except that they are farther from the supply and it costs more to get the logs there."

The general rule that the cost is less per ton per mile on long than on short hauls is subject to exceptions, and one of these is found where the business on the long haul goes over different divisions of a line, necessitating extra handling and switching. The evidence is to the effect that it costs less per ton per mile to haul freight from Burlington, Moline, Rock Island, Davenport, Lyons, Fulton and Clinton to Council Bluffs than from Eau Claire, notwithstanding the shorter distances from the former towns, but the extent of this difference in cost is not stated.

It is shown that more or less empty cars are

hailed to Eau Claire, Winona, La Crosse and other shipping points, but it does not appear that the difference between the number of such cars hauled to Eau Claire and to such other towns is sufficient to constitute an important factor in fixing their relative rates.

11. The average weight of a carload of lumber being about 35,000 lbs., the total freight per carload to Missouri river points, under the Bogue differentials, is about \$75.25 from Eau Claire; from Winona and La Crosse about \$56.00, from Minneapolis about \$59.50, from Chicago about \$52.50 and from Oshkosh about \$71.75, making the differences per carload against Eau Claire in favor of Winona and La Crosse about \$19.25, in favor of Chicago about \$22.75, in favor of Minneapolis about \$15.75 and in favor of Oshkosh about \$3.50. As is shown by the table of distances above given, the mileage from Eau Claire is somewhat greater than from Winona and La Crosse.

Eau Claire, Winona and La Crosse procure their lumber from practically the same region of country, but, as before stated, Eau Claire has natural advantages of location over the latter towns in being nearer the sources of supply. Under the system of differentials in force, timber can be and is hauled from points three or four miles west of Eau Claire across the Eau Claire river to Black river, a distance of seven miles, and carried by the latter to La Crosse. The differentials are important factors in making up the price lists on lumber from the several shipping points, and it is estimated that the difference in rates prevailing at Eau Claire, Winona and La Crosse has practically depreciated Eau Claire lumber, as compared with Winona and La Crosse lumber, about \$300,000.00 each year since the Bogue award went into effect. It further appears that since the system of rates established by that award has been in force many mills in and about Eau Claire have gone out of business or been moved to other points, its population has decreased from about 22,000 to 18,000, and, as shown by the table heretofore given, the cut of lumber in the district including Eau Claire has fallen off from 454,544,723 feet in 1884 to 394,622,292 feet in 1890. From 1878, about the time the first railroad (the Omaha) was built to Eau Claire, the cut of lumber in the Eau Claire district had annually increased up to and including 1884. On the other hand, the cut of lumber at Winona increased from 90,630,550 feet in 1884 to 145,000,000 feet in 1890, and in the district including La Crosse it increased from 187,700,000 feet in 1884 to 248,195,583 feet in 1890. There was also an increase at Minneapolis and several of the points on the Mississippi river. Under the 2 cent differential on shipments from Eau Claire, which prevailed more or less constantly from 4 INTER S.

about the time the Milwaukee road was built to Eau Claire until a short time prior to the Bogue award, the lumber companies at Eau Claire expended very considerable sums in changing their mode of business from rafting and floating their lumber down the Mississippi to piling, drying and remanufacturing it at Eau Claire, and shipping thence by rail. During this period Eau Claire rapidly increased in population and appears to have enjoyed a high degree of prosperity. After the Bogue award was put in effect, the shipment of lumber from Eau Claire over the Omaha road was substantially abandoned. The evidence is to the effect that, under the existing differential, Eau Claire cannot successfully compete with Winona and La Crosse in piling lumber and shipping it by rail to Missouri river markets.

12. About a year previous to the commencement of the present proceeding, a similar proceeding was begun in behalf of Eau Claire, but was subsequently discontinued at the request of the traffic manager of the Milwaukee road and the general freight agents of the Omaha and the Wisconsin Central. These railway officers substantially admitted that the 6½ cent differential was too high, and promised on the withdrawal of that proceeding to have the Eau Claire differential lowered if they could induce the other lumber roads to agree to it. At a meeting of railroad officials held for the consideration of this matter, the representatives of these roads voted for a reduction of the Eau Claire rate, but the proposition did not receive the support of the other roads, and was defeated. Furniture and perhaps some other articles take the same rate to Missouri river points from Eau Claire as from Chicago, but it was stated that this rate on furniture was made to encourage its manufacture at Eau Claire. The Milwaukee managers virtually say that they consider the Eau Claire rate on lumber too high, and that they are willing to reduce it, but allege that they are prevented from doing so by carriers from other lumber producing points interested in sustaining the Bogue differential. Most of the evidence was furnished by the intervenors, and no witness was called by the Milwaukee Company.

CONCLUSIONS.

The case presented by the complainant rests upon the general averment that rates on lumber from the city of Eau Claire to certain specified points on the Missouri river are unreasonable and oppressive in comparison with rates on the same article from Minneapolis, Oshkosh, La Crosse and Winona. The lower rates from Minneapolis and Oshkosh are not made the leading feature of this contention, the more distinct and special ground of complaint being the alleged disparity between Eau Claire and its immediate rivals, La Crosse and Winona. These three towns have considerable

similarity in location, industries, population and distance from western centers of distribution, and they are active competitors with each other in the various lumber markets which they seek to supply. So far as has been made to appear, the west bound rates on this commodity from La Crosse and Winona have at all times been the same; but since May, 1884, when the so-called "Bogue award" went into effect, the rate from Eau Claire has always been greater by five and one half cents per hundred pounds, except for a period of about four months in the spring of 1888 when this excess was only three cents a hundred.

The first circumstance to arrest attention is the attitude of the Chicago, Milwaukee & St. Paul road. This carrier is the only defendant named in the original complaint, and the only one against which relief is now distinctly demanded. The great system of railways operated by this company embraces in its mileage lines which connect each of these three towns with the principal lumber markets on the Missouri river, and its alleged discrimination against Eau Claire is the essential grievance sought to be redressed in this proceeding. In the answers filed by this defendant there is no denial that the lumber rate from Eau Claire is out of proportion to the rate from La Crosse to Winona, nor is there any disclosure of facts concerning the location and business of these rival places, and its own relation to them as a common carrier, which are claimed to justify this disparity. No witness was produced upon the trial at the direct instance of this company and the argument of its counsel at the final hearing was mainly confined to a statement of its position. If this position is correctly apprehended by us, the Milwaukee-road virtually concedes that the existing rates on west bound lumber discriminate against Eau Claire, and that it is entitled to lower charges on this article as compared with the competing towns of La Crosse and Winona. This admission is coupled with a professed willingness to make a substantial reduction in the Eau Claire rate, provided other defendant carriers engaged in transportation of lumber to Missouri river markets, from various producing points on their lines, will not make a corresponding reduction at those places to neutralize the effect of lower charges at Eau Claire. As evidence of its good faith in taking this position, the Milwaukee Company shows that the reduced rate which it conceded to Eau Claire in 1888 was followed by equivalent reductions granted at once to those other towns by rival carriers, which rendered its own action in aid of Eau Claire wholly ineffectual, and claims that it was compelled to restore the present differential rather than continue a contest injurious to itself and of no benefit to that community. In effect, therefore, this defendant acknowl-

edges that Eau Claire is unjustly treated, but alleged in extenuation that it is powerless to afford relief.

A brief examination of the findings discloses the reasons for this anomalous situation. At a number of places on the Mississippi south of La Crosse, the manufacture of lumber is extensively carried on, the timber from which it is produced being mainly obtained along the tributary streams north of that point. Each of these towns is connected with the Missouri river by one or more of the defendant railroads other than the Milwaukee. These towns compete in the same markets with the lumber manufacturing districts nearer the timber supply, and they naturally desire to retain and develop an industry in which they are so largely interested. The railroads extending westerly from those places are equally anxious for the traffic which this industry supplies, and they appear to have some advantage over their northern competitors in shorter distances and greater aggregate tonnage. Any reduction, therefore, in the rate established at Eau Claire, which would tend to increase the output of lumber in that locality at the expense of lumber towns more remote from the forest sources, is deemed by those towns and the carriers identified with them inimical to their common interests, and meets, almost as a matter of course, their combined opposition. Under these circumstances it is obvious that the lumber carrying roads which do not reach Eau Claire, and which are quite independent of the Milwaukee system, *have it in their power* to perpetuate the inequality of which that town complains by making a reduction in rates from other points equal to any reduction which the Milwaukee company may make at Eau Claire. This in substance is the excuse offered by the original defendant for maintaining rates on lumber shipments from Eau Claire which it admits to be relatively unjust, and its request that other carriers acting under the Bogue award be made parties to the proceeding was an indirect invitation to them to answer the accusation of the complainant.

So far as the defense interposed by these parties goes to the merits of the controversy, it rests ultimately upon two propositions. One is, that under the schedule of rates fixed by the Bogue arbitration Eau Claire is now paying less for the transportation in question than the lower Mississippi towns, *in proportion to their respective distances from the common markets*; the other is, that any interference with a system of charges which numerous carriers have so long enforced, and to which the lumber interests of so many towns have become adjusted, would result in a demoralizing "rate war" between these competing roads, and inflict injury upon other localities much greater than any advantage which might accrue to Eau Claire.

The first of these positions is readily seen to be untenable. The doctrine that transportation charges should be in proportion to the distances between different points, *where those distances are greatly dissimilar*, has never been advocated by the railroads or recommended by the Commission. It may be the rule to which tariff construction will sometime approximate, but there is no opportunity for its application under present conditions. To fix the rate for a thousand miles at twice the sum prescribed for half the distance would be most arbitrary and intolerable. It does not follow, therefore, that Eau Claire should pay 21½ cents for a haul of 608 miles to Kansas City, because Keokuk pays 11½ cents for a haul of 218 miles to the same place. The whole practice of rate-making is opposed to the principle of exact proportion, and even in theory there is little reason for its adoption. But distance, nevertheless, is an ever present element in the problem of rates and not unfrequently a controlling consideration. Where all the distances brought into comparison are considerable, and the differences between them relatively small, we should expect substantial similarity in the respective rates, unless other modifying circumstances justified a disparity. It is doubtless true that the present adjustment of charges gives Eau Claire a rate per ton per mile not greater than the rate per ton per mile from some of the shipping points on the lower Mississippi; but how does that fact excuse inequality between Eau Claire and places nearer by, whose competition is much more active and direct? The rates now in force may be relatively just as between Eau Claire and Davenport, and yet seriously unequal as between Eau Claire and Winona. Every locality in a producing region of such wide extent as the one in question is more or less interested in the rates on a common commodity from all other shipping places in that territory, but at the same time each of them is chiefly concerned with the rates from contiguous towns whose situation and facilities are not greatly unlike its own, and which are its actual and constant rivals in the same markets. It is, therefore, no sufficient answer to complainant's charge to show that the rate from Eau Claire is not proportionally higher than the rates from remote lumber towns in Missouri and southern Iowa which only indirectly and casually compete with Eau Claire; nor does any suggestion come from the intervenors in this case which seems to counteract the force of the admission made by Mr. E. P. Ripley, Third Vice President of the Milwaukee road, that "there are no dissimilar conditions existing at Winona, La Crosse and Minneapolis, as compared with Eau Claire, which would justify the charge of a higher rate per car per mile on lumber from Eau Claire to Missouri river points than from the points first named

except that they are farther from the supply, and it costs more to get the logs there." This statement seems to us a confession of injustice to the shippers of Eau Claire, which is neither explained nor excused by any facts bearing legitimately upon the rates in question. The discrimination is admitted, and stands without adequate defense.

If rates from different points of shipment to common terminals could properly be fixed on the basis of mileage, there would be great persuasiveness in the argument of the learned counsel for the Atchison road, who contends that the relief, to which he virtually concedes Eau Claire is entitled, can be effectively secured only by increasing the rates from La Crosse and Winona. But charges for distances greatly dissimilar cannot be adjusted on that principle, and it furnishes no practical rule for establishing rates from different places unequally remote from the same destination. It may be that the rates from these northerly towns are generally too high in comparison with the rates from lower Mississippi points, but that question is not before us and we have no occasion to consider it in this proceeding. The distinct issue now presented is the relative reasonableness of the Eau Claire rate, and that must mainly be determined by comparing it with the rates from neighboring towns, similar in size, situation and volume of competing traffic, and at approximately the same distance from common markets. Bearing in mind, also, that since this investigation was commenced all these rates have been advanced by an addition equal to fifty per cent of the rate upon which the others are based, viz, the ten cent rate from Chicago to the Missouri river, we deem it quite unsuitable to attempt the correction of the inequality complained of by ordering a further advance in the rates from competing points in the vicinity of Eau Claire. For this reason it is unnecessary to discuss the power of the Commission, in dealing with discriminations between different localities, to require an increase in rates deemed relatively preferential.

The further general argument against a reduction of the Eau Claire differential does not persuade us that the present rate should be continued. This impression involves some consideration of the Bogue award as it affects the town making this complaint, and the consequences to be apprehended from lowering the lumber rate at that point. The most noticeable fact in this connection is that the results apparently experienced do not accord with the principle upon which that award avowedly proceeds. Mr. Bogue expressly declares the question to be, "What rate will enable each line party to this arbitration to place its fair proportion of lumber in the territory under consideration?" This appears to

usequivalent to asking, "What rate will enable each town in this territory to place its fair proportion of lumber in the common markets?" for the arbitrator surely did not intend to imply that a "line" which, as compared with some rival road, gets its "fair proportion" of lumber tonnage, taking into account the aggregate shipments from all the towns which it serves, may so discriminate *between those towns* as to stimulate production at one and prevent it at the others. The Milwaukee road, for instance, may have a "fair proportion" of the lumber business under the present schedule, but that circumstance furnishes no reason for favoring La Crosse and Winona at the expense of Eau Claire. It could not have been the design of Mr. Bogue to equalize this traffic between the railroads without regard to the interests of competing localities, and his award does not appear to have been so interpreted by the carriers. What he evidently intended was that lumber should cost the producer approximately the same *when delivered at destination*, whether manufactured at one place or another. Increased charges for transportation were to offset advantages of location or other natural facilities for cheap production. In this way the tonnage was to be fairly divided between the roads, and the prosperity of all these towns secured by enabling them to compete on an even footing in the common markets. But the rate prescribed for Eau Claire hardly permitted a result consistent with this theory. As it seems to us, this town has been placed at a manifest disadvantage. So far from enjoying equal opportunity with its rivals, it appears to have been overweighted with a differential which has excluded it, to a great extent, from the field of competition. A number of its establishments have gone out of business, its industrial development has been checked and its population seriously diminished. While neighboring towns have been prosperous, Eau Claire has not held its own. These adverse consequences may not have been caused by the operation of the Bogue award, but no other explanation is suggested. Obviously, such an outcome was not designed, and the fact that it has occurred indicates an injustice to this locality which ought to be corrected.

We are not to be understood as indorsing the principle which governs that award. On the contrary we consider it radically unsound. That rates should be fixed in inverse proportion to the natural advantages of competing towns, with the view of equalizing "commercial conditions," as they are sometimes described, is a proposition unsupported by law and quite at variance with every consideration of justice. Each community is entitled to the benefits arising from its location and natural conditions, and any exaction of charges unreasonable in themselves or relatively unjust,

by which those benefits are neutralized or impaired, contravenes alike the provisions and the policy of the statute. There is no occasion for enlarging upon this point, as it is only incidentally involved in the discussion. Our chief object in commenting on the Bogue award in this connection is to draw attention to the fact that its declared purpose, so far as Eau Claire is concerned, has not been accomplished. Its effect upon that town has proved oppressive. Even if we could accept the theory upon which it is based, we should still be convinced that the rate fixed for Eau Claire was excessive, because its operation has prevented that town, as it seems to us, from retaining its "fair proportion" of the lumber business. As no such result was intended, the rate which produced it cannot be upheld by the rule adopted.

This criticism of the Eau Claire differential carries with it no general impeachment of Mr. Bogue's decision. On the contrary his award deserves great commendation. It was an intelligent and conscientious judgment, and shows a keen appreciation of the difficulties to be overcome. It is not surprising that a trial of eight years should disclose grounds for complaint on the part of one locality; the real surprise is that a schedule of rates was then devised which has since been observed by so many roads and proved fairly acceptable to so many communities. Its correction at this time in a single particular is no discredit to its general excellence.

We are unable to discover how other localities can reasonably object to a more equitable rate for Eau Claire, and our belief is that apprehensions based on a reduction at that point are not well founded. Relatively lower charges may enable Eau Claire to increase its lumber production, but that this will result in serious injury to competing towns is an unwarranted assumption. Remote places on the lower Mississippi can scarcely be affected by the removal of inequalities between Eau Claire and its neighboring rivals, and the latter can not justly complain because the former is accorded a rate fairly proportioned to their own. The relative volume of lumber shipments from La Crosse and Winona may be somewhat reduced by lower charges at Eau Claire, but any such effect will be attributable to natural advantages of which that town cannot justly be deprived. In short we see no reason why justice to Eau Claire should work injustice to any other community, much less result in the general disturbance of an established industry.

Nor will any such consequences follow a reduction of the Eau Claire differential as would justify other carriers in lowering their rates at competing points, for the purpose of preserving the co-relation of rates created by

the Bogue arbitration. Undoubtedly those roads have it in their power to continue the present disparity, but we do not anticipate, and certainly cannot assume, that they will resort to such inconsiderate and arbitrary action in order to nullify the lawful order of this Commission. Even if we believed otherwise, it would still be our duty to render a decision in accordance with our convictions, and thus place the responsibility upon them, if they should attempt to defeat our ruling.

A further position was taken in this proceeding which is apart from the merits of the principal issue. The roads which were made parties at the request of the original defendant insist that no case has been made against them, and that the Commission has no authority to include them in any order based upon the complaint of Eau Claire. We are disposed to agree with this contention. The sole complaint in this case is discrimination, and Eau Claire is the sole complainant. It is not easy to see how any carrier can "discriminate" against a town which it does not reach, and in whose carrying trade it does not participate. None of the roads so brought into the case run to Eau Claire or engage, even indirectly, in the transportation of lumber from that point. Of what offense *against that town* can they be legally guilty? It would be quite absurd to charge a railroad with giving preference or advantage to a community which it does not serve, and it is equally illogical to say that it can prejudice or discriminate against such a community. All these terms imply comparison, and the basis of comparison is wanting unless the rates compared are made by the same carrier. These views are so fully concurred in by counsel for the respective parties that further argument is unsuitable. They lead to the conclusion that no order can properly be made in this proceeding against the roads which do not run to Eau Claire. This determination must also include the intervening manufacturers and dealers, who have obviously no standing in the case independent of the lines which extend from their respective localities. It does not follow that these roads will be legally free to reduce their rates at other points to correspond with any lower rate which may be fixed for Eau Claire. They have responded to the demand that they should defend the differential complained of, and they have endeavored to justify it by evidence and argument. They have presented their case and will be formally notified of our decision. While they are not legally connected with the rate claimed to be excessive, and not technically subject to an order for its correction, they will have no better right to render it ineffectual than they would have to openly disregard a direction clearly within the scope of our authority.

3 INTER 8.

The attitude of the Omaha road is somewhat peculiar. It was not proceeded against originally, and the Milwaukee Company did not ask to have it made a defendant. It voluntarily sought an opportunity to oppose the complainant, and was made a party on its own application. After engaging in the litigation with considerable vigor, it now earnestly asks to be exempted from any order reducing the Eau Claire differential. These circumstances might well justify us in denying this request, but we incline to the opinion that it should be granted. Measured by the lumber rates which it maintains at other places on its line, the Omaha road cannot be said to discriminate against Eau Claire, nor is it charged with enforcing rates at different points which are relatively unequal. For this reason much embarrassment might result to that company from an order requiring it to reduce its rate at the place in question, and as such an order is not demanded by the complainant or deemed necessary for the relief which it seeks, we are disposed to leave that carrier the option of accepting the Eau Claire rate prescribed for the Milwaukee company or going out of the Eau Claire business. No order, therefore, will be made against the Omaha road at this time, but the case will be held as against that company for such directions as may hereafter seem to be required.

These are the general conclusions arrived at in this proceeding. The conflicting interests which we have investigated furnish material for more extended comment, and the discussion might be greatly prolonged. Minute analysis of the testimony has not been attempted in this opinion and many suggestions must remain unnoticed. In the view we take of the case much of the evidence is immaterial, and enough has been said to indicate the principal reasons which have influenced our decision. We hold that the lumber rates in question discriminate against the shippers of Eau Claire, and that such discrimination is unjust and unlawful. The undue prejudice and disadvantage to which Eau Claire is thus subjected consists generally in the lower relative rates accorded to competing towns, especially those granted to La Crosse and Winona, and the complainant is entitled to an order correcting the inequality between these rival places.

The extent to which the Eau Claire differential should be reduced has been the subject of much deliberation. We have not considered it as an abstract proposition, based on mileage and cost of service, but have endeavored to make proper allowance for other existing circumstances and actual conditions. It is our desire to prescribe a rate which will be reasonably just to Eau Claire, and which the Milwaukee road will be fairly satisfied to accept. No mathematical rule has been followed and

no particular theory applied, but that rate has been selected which, on the whole, best satisfies our judgment. To a certain extent our determination is arbitrary, but equally so is the fixing of a rate in the first instance. As the injustice which Eau Claire suffers arises mainly from the lower rates at La Crosse and Winona, the rate from the former should bear a fixed and permanent relation to the rates from the latter, independent of the Chicago rate upon which all the others are based under the Bogue arbitration. Taking everything into account, we think the rate from Eau Claire should not exceed the rate from La Crosse and Winona by more than 2 cents per hundred pounds, when the latter rate is not over 11 cents per hundred; and that such excess over the present rate of 16 cents from La Crosse and Winona should not be greater than $2\frac{1}{2}$ cents per hundred. Compared with the 16 cent rate now in force at these competing towns the rate thus fixed for Eau Claire will be higher by \$8.75 per car; and the rate per car per mile and per ton per mile to the several Missouri river markets will still be considerably greater from Eau Claire than from La Crosse or Winona. All things considered, however, we believe that an addition of $2\frac{1}{2}$ cents to the present rate from

those places will not be unjust to Eau Claire, and that a greater reduction in the differential now in force against that town should not at this time be required. If the operation of this rate fails to give equitable results, the complainant will not be debarred from making a further application for relief.

For the purposes of the formal order in this case, the sixteen cent rate from La Crosse and Winona will be assumed to continue; in case that rate is materially reduced, a proportionate reduction should be made in the difference or excess hereby allowed in the rate from Eau Claire.

The order of the Commission is that from and after the tenth day of July, 1892, the Chicago, Milwaukee & St. Paul Railway Company cease and desist from charging, collecting, or receiving for or on account of lumber transported by it, in carload quantities, from Eau Claire, Wisconsin, to the various Missouri river points mentioned in this report, any greater sum or amount than two and one half cents per hundred pounds more than shall or may from time to time be charged, collected or received by that company for the like transportation from the towns of La Crosse and Winona aforesaid.

UNITED STATES SUPREME COURT.

CHARLES L. FICKLEN, *Plff. in Err.*,

v.

THE TAXING DISTRICT OF SHELBY COUNTY, Tennessee, ET AL.

[No. 97.]

(See S. C. 145 U. S. 1-28, 36 L. ed. —.)

1. A state Legislature may tax trades, professions and occupations in the absence of inhibition in the state constitution in that regard, and where a resident citizen engages in general business subject to a particular tax, the fact that the business done chances to consist, for the time being, wholly or partially in negotiating sales between resident and non-resident merchants of goods situated in another state does not necessarily involve the taxation of interstate commerce, forbidden by the Constitution.
2. A state has power to tax all property having a *status* within its limits, whether employed in interstate commerce or not.
3. A citizen doing a general business at the place of his domicile cannot escape payment of his share of the burdens of municipal government because the amount of his tax is arrived at by reference to his profits.
4. Where complainants took out licenses under the Tennessee law of 1881 to do a general commission business, and gave bond to report their commissions during the year, and to pay the required percentage thereon, they cannot, when they apply for similar licenses for the ensuing year, resort to the courts because the municipal authorities refuse to issue such licenses without the payment of the stipulated tax.

Argued March 18, 21, 1892. Decided April 11, 1892.

IN ERROR to the Supreme Court of the state of Tennessee, to review a judgment of that court, reversing a decree of the Chancellor of that state which overruled a demurrer to a bill filed in the Chancery Court of Shelby county, Tennessee, by Ficklen and others against the Taxing District of Shelby county *et al.*, and decreed a perpetual injunction in behalf of Ficklen to restrain the collection of a tax on his business, and which as to Cooper

& Co., adjudged the payment by them of the tax on their business in Tennessee, and granted an injunction as to the remainder of the tax. The judgment of the Supreme Court also sustained the demurrer and dismissed the suit. *Affirmed.*

Statement by Mr. Chief Justice Fuller:

This bill was filed in the Chancery Court of Shelby County, Tennessee, by C. L. Ficklen and Cooper & Company, against the Taxing District of Shelby County and Andrew J. Harris, County Trustee.

The bill alleged that complainants were "commercial agents or merchandise brokers located within the taxing district of Shelby county, where their respective firms rent a room for the purpose of keeping and, at times, exhibiting their samples and carrying on their correspondence with their respective principals; that they use no capital in their business; that they handle or deal in no merchandise, and are neither buyers nor sellers; they only engage in negotiating sales for their respective principals; they do precisely the same business that commercial drummers do, the only difference being that they are stationary, while the commercial drummers are transitory, and go from place to place and secure a temporary room in each town or city in which to exhibit their samples. That each solicits orders for the sales of the merchandise of their respective principals and forwards the same to them, when such orders are filled by shipping the goods direct to the purchasers thereof in the county of Shelby."

It was then averred that all of the sales negotiated by complainant Ficklen were exclusively for non-resident firms, who resided and carried on business in other states than Tennessee, and all the merchandise so sold was in other states than Tennessee, where the sales were made, and was shipped into Tennessee, when the orders were forwarded and filled.

That at least nine tenths of the sales negotiated and effected by complainants Cooper & Company, and at least nine tenths of their gross commissions, were derived from merchandise of non-resident firms or persons, and which merchandise was shipped into Tennessee from other states, after the sales were effected.

That section 9, chapter 96, of the Acts of 1881, of Tennessee, made sub-section 17 of section 22 of the Taxing District Acts, Taxing District Digest, 50, provides:

"Every person or firm dealing in cotton, or any other article whatever, whether as factor, broker, buyer or seller, on commission or otherwise, (\$50) fifty dollars per annum, and in addition, every such person or firm shall be taxed *ad valorem* (10 cts.) ten cents on every one hundred dollars of amount of capital invested or used in such business; *Provided, however*, that if such person or firm carry on the cotton or other business in connection with the grocery or any other business, the capital invested in both shall only be taxed once; but such person or firm must pay the privilege tax for both occupations; *And provided, further*, that if the persons taxed in this subsection have no capital invested, they shall pay 2½ per cent on their gross yearly commissions, 4 INTER S.

charges or compensations for said business, and at the time of taking out their said license, they shall give bond to return said gross commissions, charges or compensation to the trustee at the end of the year, and at the end of the year they shall make return to said trustee accordingly, and pay to him the said 2½ per cent."

Complainants charged that, as they were neither dealers, buyers, nor sellers, but only engaged in negotiating sales for buyers, they were not embraced within the meaning of said section, and further stated that they had each heretofore paid the privilege tax and the income tax, except for the year 1887, and had tendered the privilege tax of \$50 and costs of issuing license for the year 1888 to the trustee, who refused to accept the same unless complainants would also pay the income tax for the year 1887.

From the bill and exhibits attached it appeared that complainants in January, 1887, each paid the sum of \$50 for the use of the taxing district, and executed bonds agreeably to the requirements of the law in that behalf, and received licenses as merchandise brokers within the limits of the district for the year 1887, and that in January, 1888, they tendered, as commercial brokers, to the trustee fifty dollars and twenty-five cents, each, as their privilege tax and charges for the year 1888, which he refused to accept because they refused to pay for the year 1887 two and one half per cent upon their gross commissions derived from their business for the year 1887, although they executed bonds in January, 1887, to report said gross commissions.

Complainants charged that the law in question was in violation of the commerce clause of the Constitution of the United States and also of the Constitution of Tennessee, and prayed as follows:

"That an injunction issue to restrain the defendants, or either of them from instituting any suit or proceeding against them or either of them for the collection of said 2½ per cent tax upon their respective gross commissions from their said business or from issuing any warrant for their arrest for their failure to pay the same for the year 1887, and that defendants, be also restrained from in any way interfering with them in the carrying on their said business for the year 1888; and upon final hearing they, the defendants, be restrained perpetually from collecting from them or either of them said 2½ per cent tax upon their said gross commissions from their said business, and from collecting said privilege tax of \$50, and they pray for general relief, and will ever pray, etc."

To this bill the defendants filed a demurrer, which was overruled by the chancellor, and, the defendants electing to stand by it, a final decree was entered, making the injunction perpetual in behalf of Ficklen as to the entire tax, including the \$50; and, as to Cooper & Company, adjudging that they were legally bound to pay the sum of \$50 and the tax of two and one half per cent on their commissions, to the extent that those commissions were upon sales of property owned by residents of Tennessee, and perpetuating the injunction in all other respects.

From this decree the defendants prayed an

appeal to the Supreme Court of the state, and that court decided that the Act of the Legislature in question was not in violation of the state constitution, and, further, that "inasmuch as it appears from the bill that the complainants at the beginning of the year 1887 applied for and received, respectively, license to carry on the business of commission brokers without qualification, and that they, the complainants, held said license throughout the year 1887, complainants were chargeable with the privilege tax, as fixed by the Act aforesaid, without regard to the amount or character of the business carried on under said licenses or the places of residence of their principals, and that complainants must have reported and paid 2½ per cent on the gross commissions received by them during the year 1887 before they could have become entitled to licenses for the year 1888."

That when at the beginning of the year 1888 the complainants applied for license as merchandise brokers they were rightfully required (1) to report and pay 2½ per cent on their commissions received during 1887, and (2) to pay the fixed charge of \$50 and give bond to report their gross commissions at the end of the year 1888. . . . That the said Act is not, as to these complainants, violative of art. 1, § 8, of the Constitution of the United States, by which the power to regulate commerce between the states is conferred upon the Congress of the United States; and . . . that complainants, having applied for, accepted, and held for and during the year 1887 unqualified license as commission brokers, and having applied for the same unqualified license for the year 1888, cannot question the validity of the said Act as being in conflict with said provisions of the Constitution of the United States, for that the said complainants were not entitled to the said license upon the facts stated in the bill, whether the business actually done and theretofore conducted by them was or was not exonerated from said privilege tax under the said provision of the Federal Constitution." The decree of the chancellor was accordingly reversed, the demurrer sustained, and the bill dismissed, whereupon a writ of error was taken out from this court.

Messrs. W. Hallett Phillips, McDowell and McGowan and Henry Craft, for plaintiffs in error:

An occupation cannot be taxed if, as has frequently been held, the tax is so specialized as to operate as a burden against the introduction and sale of the products of another state or against the citizens of other states. A tax to do business is a tax on the business, to be paid by and out of the business.

Here the operation of the tax is to exact a duty for permission to exercise interstate commerce within the state. It is for the privilege of making contracts within the county of Shelby to sell merchandise, the product of other states, for merchants of such states to residents of Tennessee. It is for the faculty of doing that business, that the license is required.

A law requiring a person to take out a license in order to confer upon him the faculty or privilege of conducting a business is a regulation of that business; and when the law requires the plaintiffs to take out a license in or-

der to acquire the privilege of conducting interstate commerce, that is a regulation of interstate commerce.

Here business between states is conducted by means of agents, called merchandise brokers, and that business cannot be prohibited unless a license is taken from the state in which the agent is located where the business is transacted.

It is the business really which is taxed, and the validity of the tax in nowise depends on the length of time in which the agent or broker was in the state or intended to remain, but upon the character of the business transacted. If the business was interstate it was not subject to any exaction by the state. If a person of the vocation of plaintiffs should come into the state of Tennessee for the sole purpose of getting orders for non-resident merchants for goods the products of other states, we do not suppose it would be claimed that a state would have a right to levy a tax on such person for the privilege. We repeat, does his liability to the tax depend on the length of his stay?

If it does not, then, it seems to us, it must follow that residence of the person doing the business cannot affect the question. It seems to us that the validity of the tax must be determined by the nature of the business taxed and not by the residence of the agent transacting it.

In *Walling v. Michigan*, the fact that the persons soliciting orders or selling, were located in the state, did not affect the question of the effect of the tax which was, as held by the court, a tax for selling goods brought into the state from other states.

116 U. S. 446 (29: 691).

It must be constantly kept in view that the tax is one on the faculty of conducting business. It will not do to say that the Act does not purport to make any regulation or prescribe any rule in the conduct of interstate business. The real inquiry must be, What is the necessary effect of the tax?

In the *State Freight Tax Case* this court says:

"It has repeatedly been held that the constitutionality or unconstitutionality of a state tax is to be determined not by the form or agency through which it is to be collected, but by the subject upon which the burden is laid." 82 U. S. 15 Wall. 282 (21: 146).

That the entire business of Ficklen, and almost the entire business of Cooper & Company, constituted interstate commerce, can hardly be denied.

Commerce with foreign nations and among the several states can mean nothing more than intercourse with those nations and among the states for the purpose of trade, be the object of the trade what it may, and this intercourse must include all the means by which it can be carried on.

Corfield v. Coryell, 4 Wash. C. C. 379.

Nor is the tax any less objectionable—the nature of the exaction is not changed—because it does not discriminate in favor of domestic business.

State Freight Tax Case, 82 U. S. 15 Wall. 282 (21: 146.)

In *Leloup v. Port of Mobile* (opinion unanimous) it is said: "We fail to see how a state can tax a business occupation when it cannot tax the business itself. Of course, the exac-

tion of a license tax as a condition of doing any particular business is a tax on the occupation, and a tax on the occupation of doing a business is surely a tax on the business."

127 U. S. 645 (32: 813).

It was also observed in answer to the claim that the tax was partially levied on internal commerce: "That fact does not remove the difficulty. The tax affects the whole business without discrimination."

"No state has the right to levy a tax on interstate commerce in any form, whether by way of duties laid on the transportation of the subjects of that commerce or on the receipts derived from that transportation or on the occupation or business of carrying it on, and the reason is such taxation is a burden on that commerce and amounts to a regulation of it, which belongs solely to Congress."

To call the tax in question an occupation tax is only, as *Chief Justice* Marshall says, to vary the form without varying the substance. It is treating a prohibition which is general as if it were confined to a particular mode of doing the forbidden thing.

Brown v. Maryland, 25 U. S. 12 Wheat. 419 (6: 679).

The present case falls equally within the reasoning of *Pickard v. Pullman S. Car Co.*, where it was held that the privilege tax on the running and using of sleeping cars, was a tax on transportation, and hence a restriction on commerce.

Blatchford, J., 117 U. S. 49 (29: 790).

The imposition of taxes upon persons residing within the state or belonging to its population and upon avocations and employments pursued therein not directly connected with foreign or interstate commerce, or with some other employment or business, exercised under authority of the Constitution and laws of the United States, is within the power of the state.

The underlying principle in the *Robbins* case, is that it is not competent for a state to levy a tax or impose any other restriction upon the citizens or inhabitants of other states, for selling or seeking to sell their goods in such state before they are introduced therein.

Robbins v. Shelby County Tax. Dist. 120 U. S. 490 (30: 695).

The decision, by its terms and by necessity, covered all agencies, on the ground that the state had no right to make it a state privilege to carry on interstate commerce.

In the nature of things, it cannot be that when the business is conducted by one instrumentality the state cannot tax it; but when the same business is conducted by a different agency it is subject to state exaction.

That if the order is solicited by an agent called a drummer, who happens to be temporarily in the state, the state is prohibited to interfere, but that when the order is obtained by a person called a merchandise agent or broker located in the state, the state may interpose.

In both cases the levy of the tax or the requirement of a license is for making negotiations in the conduct of interstate commerce.

This the state cannot do, and for the reason that the negotiation of sales of goods for the purpose of introducing them into the state in

which the negotiation is made, is interstate commerce.

Fargo v. Michigan presented the case of a tax on the gross receipts of transportation which was held void.

The court (Miller, J.,) in that case says: "The proposition that the states can, by way of a tax on business transacted within their limits, regulate such business has often been set up as a defense to the allegation that the taxation was such an interference with commerce as violated the constitutional provision now under consideration. But when the business so taxed is commerce itself, and is commerce among the states or with foreign nations, the constitutional provision cannot thereby be evaded."

121 U. S. 244 (30: 894).

Philadelphia & S. SS. Co. v. Pennsylvania, 122 U. S. 336 (30:1200), 1 Inters. Com. Rep. 308, a tax on gross receipts of the steamship company was pronounced void. The court said: "Their business as carriers in foreign or interstate commerce cannot be taxed by the state under the plea that they are exercising a franchise."

A similar general principle was announced by *Mr. Justice* Field in *Welton v. Missouri*, when he said: "The general power of the state to impose taxes in the way of licenses upon all pursuits and occupations within its limits is admitted, but, like all other powers, must be admitted in subordination to the requirements of the Federal Constitution. Where the business or occupation consists in the sale of goods the license tax required for its pursuit is in effect a tax upon the goods themselves. If such a tax be within the power of the state to levy, it matters not whether it be raised directly from the goods or indirectly from them through the license to the dealer; but if such tax conflict with any power vested in Congress by the Constitution of the United States, it will not be any the less invalid because enforced through the form of a personal license."

91 U. S. 279 (23: 349).

"Ordinary occupations," says the court in a later case, "are taxed in various ways, and in most cases legitimately taxed; but we fail to see how a state can tax a business occupation, when it cannot tax the business itself."

"The exaction of a license tax as a condition of doing any particular business is a tax on the occupation, and a tax on the occupation of doing a business tax is surely a tax on the business."

It was held that the state could not compel the company to take out a license for the transaction of business in the city, and that a general license tax on the telegraph company affected its entire business, interstate as well as internal.

Leloup v. Port of Mobile, 127 U. S. 640 (32: 811), 2 Inters. Com. Rep. 134.

And so it has been likewise held that a tax "on the gross receipts derived from business done in this state," when levied on a telegraph company, is invalid where the communication by messages is carried either into the state from without or from within the state to another state.

Western U. Teleg. Co. v. Alabama, 132 U. S. 477 (33: 410).

No state has the right to lay a tax on interstate commerce in any form, whether by way of duties laid on the transportation of the subjects of that commerce or on the receipts derived from that transportation or on the occupation or business of carrying it on, for the reason that such taxation is a burden on that commerce and amounts to a regulation of it which belongs solely to Congress.

Lyng v. Michigan, 135 U. S. 166 (34: 152), 3 Inters. Com. Rep. 143; *Asher v. Texas*, 128 U. S. 132 (32: 869), 2 Inters. Com. Rep. 241; *Stoutenburgh v. Hennick*, 129 U. S. 143 (32: 637), 2 Inters. Com. Rep. 409.

In *McCall v. California*, the license tax questioned was on railroad agencies.

McCall, the agent, was a resident in California. His business consisted in soliciting passenger traffic over the interstate railroad which he represented.

The court held that the soliciting agency was one of the means used by the company to increase its interstate traffic. "The tax upon it, therefore, was a tax upon a means or an occupation of carrying on interstate commerce, pure and simple."

136 U. S. 110 (34: 893), 3 Inters. Com. Rep. 181; *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114 (34: 894), 3 Inters. Com. Rep. 178; *Crutcher v. Kentucky*, 141 U. S. 57 (35: 652); *Corson v. Maryland*, 120 U. S. 505 (30: 700); *Fargo v. Michigan*, 121 U. S. 247 (30: 895); *Ouchita Packet Co. v. Aiken*, 121 U. S. 447 (30: 976); *Philadelphia & S. S. Co. v. Pennsylvania*, 123 U. S. 336 (30: 1201); *Western U. Teleg. Co. v. Pendleton*, 122 U. S. 356 (30: 1188); *Bowman v. Chicago & N. W. R. Co.*, 125 U. S. 496 (31: 710); *Leloup v. Port of Mobile*, 127 U. S. 646 (32: 313), 2 Inters. Com. Rep. 184; *Asher v. Texas*, 128 U. S. 130 (32: 869), 2 Inters. Com. Rep. 241; *Stoutenburgh v. Hennick*, 129 U. S. 143 (32: 639), 2 Inters. Com. Rep. 409; *Leisy v. Hardin*, 135 U. S. 108 (34: 132), 3 Inters. Com. Rep. 36; *McCall v. California*, 136 U. S. 108 (34: 892), 3 Inters. Com. Rep. 181; *Minnesota v. Barber*, 136 U. S. 827 (34: 460), 3 Inters. Com. Rep. 185; *Brimmer v. Reiman*, 133 U. S. 82 (34: 863), 3 Inters. Com. Rep. 485; *Re Rahrer*, 140 U. S. 554 (35: 574); *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 31 (35: 619), 3 Inters. Com. Rep. 595.

Mr. S. P. Walker, for defendants in error: This court, from the case of *Brown v. Maryland*, 25 U. S. 12 Wheat. 419 (6: 678), to the very recent cases of *Robbins v. Shelby County Tax. Dist.*, 120 U. S. 489 (30: 694), *Leloup v. Port of Mobile*, 127 U. S. 640 (32: 311), 2 Inters. Com. Rep. 134; *Crutcher v. Kentucky*, 141 U. S. 47 (35: 649), has so frequently considered the question involved, that it is not our purpose to attempt an extended review or discussion of the authorities. We shall only, therefore, as briefly as possible, undertake to show that the tax in question is not a regulation of interstate commerce.

The case is not within the principles of the opinion in *Robbins v. Shelby County Tax. Dist.*, 120 U. S. 489 (30: 694).

Robbins was the representative of one non-resident firm, and the case was treated as if his principals had come into the state to make sales, and the state had undertaken to seize and tax them.

The tax was held to be in effect not a tax on
4 INTER S.

Robbins but on his principals. Here the reverse is clearly true.

The case is distinguishable from that of *Cook v. Pennsylvania*, 97 U. S. 566 (24: 1015).

In that case the state of Pennsylvania exacted a certain percentage of the proceeds of foreign goods sold at auction, for the privilege of thus selling them; and the tax was held to be a duty on imports, and unconstitutional, under the principles of the leading case of *Brown v. Maryland*, 25 U. S. 12 Wheat. 419 (6: 678).

In this case the state of Tennessee requires that every person pursuing the vocation of merchandise broker shall pay a vocation tax of two and one half per cent of the commissions earned. Can the tax be disputed, on the fact that the goods sold were, at the time of the sale, in another state, and that, as between the principals—buyer and seller—the transaction was one of interstate commerce.

We submit that it is not a tax upon the commerce between the states, but that it is what it purports to be—a tax upon the broker himself, graduated by the amount realized by him from the transaction.

"The property of corporations engaged in foreign or interstate commerce, as well as the property of corporations engaged in other business, is subject to taxation, provided always it be within the jurisdiction of the state."

Gloucester Ferry Co. v. Pennsylvania, 114 U. S. 206 (29: 163).

"The cars of this company, within the state of Pennsylvania, are employed in interstate commerce; but their being so employed does not exempt them from taxation by the state; and the state has not taxed them because of their being so employed, but because of their being within its territory and jurisdiction."

Pullman Palace Car Co. v. Pennsylvania, 141 U. S. 18 (35: 613), 3 Inters. Com. Rep. 595.

That case, as did that of *Pullman Palace Car Co. v. Twombly*, 29 Fed. Rep. 658, in its last analysis, turned upon the question of the property having a *situs* within the state seeking to tax it; and the question was determined upon the general principles of law applicable thereto.

The same proposition is announced in *Marye v. Baltimore & O. R. Co.*, 127 U. S. 117 (32: 94).

In the case of *Woodruff v. Parham*, 75 U. S. 8 Wall. 187 (19: 886), this court, Miller, J., delivering the opinion, said:

"The merchant of Chicago who buys his goods in New York and sells at wholesale in the original packages, may have his millions employed in trade for half a lifetime and escape all state, county and city taxes; for all that he is worth is invested in goods which he claims to be protected as imports from New York.

It is obvious that if articles brought from one state into another are exempt from taxation, even under the limited circumstances laid down in *Brown v. Maryland*, the grossest injustice must prevail, and equality of public burdens in all our large cities is impossible.

Advancing from the question of the power to tax property to that of taxing vocations, business, franchises, we first notice the case of *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 865 (27: 419).

In that case the municipality imposed an

annual license fee of \$100 on the ferry company, whose boats plied between East St. Louis and St. Louis. The company was chartered by the state of Illinois and domiciled in East St. Louis, the case differing in that respect from the case of *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196 (29: 158). The court said: "The exaction of a license fee is an ordinary exercise of the police power by municipal corporations; and the Act by which this exaction is authorized will not be held to be a regulation of commerce."

The cases of *Asher v. Texas*, 128 U. S. 129 (32:368), 2 Inters. Com. Rep. 241, *Stoutenburgh v. Hennick*, 129 U. S. 148 (32: 637), 2 Inters. Com. Rep. 409, were identical, in all essential particulars, with that of *Robbins v. Shelby County Tax. Dist.*

In the case of *McCall v. California*, 136 U. S. 104 (34:391), 3 Inters. Com. Rep. 186, the tax was, "for every railroad agency, \$25 per quarter."

In commenting upon the case of *Smith v. Alabama*, 124 U. S. 465 (31: 508), the court said: "We (there) held, however, that the statute (there) in question (imposing a license tax on locomotive engineers) was not in its nature a regulation of commerce; that so far as it affected commercial transactions among the states its effect was so indirect, incidental and remote as not to burden or impede such commerce, and that it was not therefore in conflict with the Constitution of the United States or any law of Congress."

Perhaps the doctrine of the state's power to tax and its proper limits are found best stated in *Philadelphia & S. SS. Co. v. Pennsylvania*, 122 U. S. 342 (30: 1203). The court there said: "The tax in the present case is laid upon the gross receipts for transportation as such. They are taxed, not only because they are money, or its value, but because they were received for transportation."

A review of the question convinces us that the first ground on which the decision in *State Tax on Railway Gross Receipts* was placed is not tenable; that it is not supported by anything decided in *Brown v. Maryland*; but, on the contrary, that the reasoning in that case is decidedly against it.

The second ground on which the decision referred to was based was that the tax was upon the franchise of the corporation granted to it by the state. We do not think that this can be affirmed in the present case.

Interstate commerce, when carried on by corporations, is entitled to the same protection against state exactions which is given to such commerce when carried on by individuals.

Philadelphia & S. SS. Co. v. Pennsylvania, 122 U. S. 342 (30:1203).

And on page 345 (1204) it was said: "The corporate franchisees, the property, the business, the income of corporations created by a state may undoubtedly be taxed by the state."

In accord with the distinctions here laid down, this court, in the case of *Maine v. Grand Trunk R. Co.*, 142 U. S. 217 (35: 994), sustained a statute of the state of Maine as being a valid tax upon the corporate franchise—the law imposing a tax on the franchise according to the amount of the gross receipts in the state, such amount to be ascertained by divid-

ing the total gross receipts by the total number of miles operated, and multiplying that amount by the number of miles operated in the state.

We submit that the judgment of the state court should be affirmed on the principles of the last utterance of this court upon this subject, as contained in *Maine v. Grand Trunk R. Co.*

Mr. Chief Justice Fuller delivered the opinion of the court:

In *Robbins v. Shelby County Tax. Dist.*, 120 U. S. 489 [30: 694], it was held that section 16 of chap. 96 of the laws of Tennessee of 1881, enacting that: "All drummers and all persons not having a regular licensed house of business in the taxing district of 'Shelby county,' offering for sale, or selling goods, wares, or merchandise therein by sample, shall be required to pay to the county trustee, the sum of \$10 per week, or \$25 per month for such privilege, 'so far as it applied to persons soliciting the sale of goods on behalf of individuals or firms doing business in another state, was a regulation of commerce among the states and violated the provision of the Constitution of the United States which grants to Congress the power to make such regulations. The question involved was stated by *Mr. Justice Bradley*, who delivered the opinion of the court, to be: "Whether it is competent for a state to levy a tax or impose any other restriction upon the citizens or inhabitants of other states, for selling or seeking to sell their goods in said state before they are introduced therein;" and it was decided that it was not. At the same time it was conceded that commerce among the states might be legitimately incidentally affected by state laws, when they, among other things, provided for "the imposition of taxes upon persons residing within the state or belonging to its population, and upon avocations and employments pursued therein, not directly connected with foreign or interstate commerce, or with some other employment or business exercised under authority of the Constitution and laws of the United States." And it was further stated: "To say that the tax, if invalid as against drummers from other states, operates as a discrimination against the drummers of Tennessee, against whom it is conceded to be valid, is no argument; because, the State is not bound to tax its own drummers; and if it does so whilst having no power to tax those of other states, it acts of its own free will, and is itself the author of such discrimination. As before said, the state may tax its own internal commerce; but that does not give it any right to tax interstate commerce."

In the case at bar the complainants were established and did business in the taxing district as general merchandise brokers, and were taxed as such under section nine of chapter ninety-six of the Tennessee laws of 1881, which embraced a different subject-matter from section sixteen of that chapter. For the year 1887 they paid the \$50 tax charged, gave bond to report their gross commissions at the end of the year, and thereupon received, and throughout the entire year held, a general and unrestricted license to do business as such brokers. They were thereby authorized to do any and all kinds of commission business and became liable to pay the privilege tax in question

which was fixed in part and in part graduated according to the amount of capital invested in the business, or if no capital were invested, by the amount of commissions received. Although their principals happened during 1887, as to the one party, to be wholly non-resident, and as to the other, largely such, this fact might have been otherwise then and afterwards, as their business was not confined to transactions for non-residents.

In the case of Robbins the tax was held, in effect, not to be a tax on Robbins, but on his principals, while here the tax was clearly levied upon complainants in respect of the general commission business they conducted, and their property engaged therein, or their profits realized therefrom.

No doubt can be entertained of the right of a state Legislature to tax trades, professions, and occupations, in the absence of inhibition in the state constitution in that regard, and where a resident citizen engages in general business subject to a particular tax, the fact that the business done chances to consist, for the time being, wholly or partially in negotiating sales between resident and non-resident merchants of goods situated in another state does not necessarily involve the taxation of interstate commerce, forbidden by the Constitution.

The language of the court in *Lyng v. Michigan*, 135 U. S. 161, 166 [34: 150, 153], 3 Inters. Com. Rep. 143, was: "We have repeatedly held that no state has the right to lay a tax on interstate commerce in any form, whether, by way of duties laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on, for the reason that such taxation is a burden on that commerce, and amounts to a regulation of it, which belongs solely to Congress." But here the tax was not laid on the occupation or business of carrying on interstate commerce, or exacted as a condition of doing any particular commission business, and complainants voluntarily subjected themselves thereto in order to do a general business.

In *McCall v. California*, 136 U. S. 104 [34: 392], 3 Inters. Com. Rep. 181, it was held that: "An agency of a line of railroad between Chicago and New York, established in San Francisco for the purpose of inducing passengers going from San Francisco to New York to take that line at Chicago, but not engaged in selling tickets for the route, or receiving or paying out money on account of it, is an agency engaged in interstate commerce; and a license tax imposed upon the agent for the privilege of doing business in San Francisco is a tax upon interstate commerce, and is unconstitutional." This was because the business of the agency was carried on with the purpose to assist in increasing the amount of passenger traffic over the road, and was therefore a part of the commerce of the road, and hence of interstate commerce.

In *Philadelphia S. S. Co. v. Pennsylvania*, 123 U. S. 326, 345 [80:1200, 1204], Mr. Justice Bradley, speaking for the court, said: "The corporate franchises, the property, the business, the income of corporations created by a state may undoubtedly be taxed by the state; but in imposing such taxes care should be,

taken not to interfere with or hamper directly or by indirection, interstate or foreign commerce, or any other matter exclusively within the jurisdiction of the Federal government." And this of course is equally true of the property, the business, and the income of individual citizens of a state. It is well settled that a state has power to tax all property having a situs within its limits, whether employed in interstate commerce or not. It is not taxed because it is so employed, but because it is within the territory and jurisdiction of the state. *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18 [35: 613], 3 Inters. Com. Rep. 595; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196 [29:158].

And it has been often laid down that the property of corporations holding their franchises from the government of the United States is not exempt from taxation by the state of its situs. *Union Pac. R. Co. v. Peniston*, 85 U. S. 18 Wall. 5 [21:787]; *Thomson v. Union Pac. R. Co.* 76 U. S. 9 Wall. 579 [19:792]; *Western U. Teleg. Co. v. Massachusetts*, 125 U. S. 580 [31:790].

So in *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 865, 874 [27:419, 423], where an annual license fee was imposed on the ferry company by the city of East St. Louis, the company having been chartered by the State of Illinois and being domiciled in East St. Louis, its boats plying between that place and St. Louis, Missouri, the court said: "The exaction of a license fee is an ordinary exercise of the police power by municipal corporations. When, therefore, a state expressly grants to an incorporated city, as in this case, the power 'to license, tax, and regulate ferries,' the latter may impose a license tax on the keepers of ferries, although their boats ply between landings lying in two different states, and the Act by which this exaction is authorized will not be held to be a regulation of commerce."

Again, in *Maine v. Grand Trunk R. Co.*, 142 U. S. 217 [35:994], we decided that a state statute which required every corporation, person, or association operating a railroad within the state to pay an annual tax for the privilege of exercising its franchise therein, to be determined by the amount of its gross transportation receipts, and further provided that when applied to a railroad lying partly within and partly without a state, or to one operated as a part of a line or system extending beyond the state, the tax should be equal to the proportion of the gross receipts in the state, to be ascertained in the manner provided by the statute, did not conflict with the Constitution of the United States. It was held that the reference by the statute to the transportation receipts and to a certain percentage of the same, in determining the amount of the excise tax, was simply to ascertain the value of the business done by the corporation, and thus obtain a guide to a reasonable conclusion as to the amount of the excise tax which should be levied. In this respect the tax was unlike that levied in *Philadelphia & S. S. Co. v. Pennsylvania*, where the specific gross receipts for transportation were taxed as such, taxed "not only because they are money, or its value, but because they were received for transportation."

Since a railroad company engaged in interstate commerce is liable to pay an excise tax

according to the value of the business done in the state, ascertained as above stated, it is difficult to see why a citizen doing a general business at the place of his domicile should escape payment of his share of the burdens of municipal government because the amount of his tax is arrived at by reference to his profits. This tax is not on the goods or on the proceeds of the goods, nor is it a tax on non-resident merchants; and if it can be said to affect interstate commerce in any way it is incidentally, and so remotely as not to amount to a regulation of such commerce.

We presume it would not be doubted that if the complainants had been taxed on capital invested in the business, such taxation would not have been obnoxious to constitutional objection, but because they had no capital invested, the tax was ascertained by reference to the amount of their commissions, which when received were no less their property than their capital would have been. We agree with the Supreme Court of the state that the complainants having taken out licenses under the law in question to do a general commission business, and having given bond to report their commissions during the year, and to pay the required percentage thereon, could not, when they applied for similar licenses for the ensuing year, resort to the courts because the municipal authorities refused to issue such licenses without the payment of the stipulated tax. What position they would have occupied if they had not undertaken to do a general commission business, and had taken out no licenses therefor, but had simply transacted business for non-resident principals, is an entirely different question, which does not arise upon this record.

The judgment of the Supreme Court is affirmed.

Mr. Justice Harlan dissenting:

It seems to me that the opinion and judgment in this case are not in harmony with numerous decisions of this court. I do not assume that the court intends to modify or overrule any of those cases, because no such purpose is expressed. And yet I feel sure that the present decision will be cited as having that effect.

In *Robbins v. Shelby County Tax. Dist.*, 120 U. S. 489, 496, 497 [30: 694, 697], it was held that Tennessee could not require, even from its own people, a drummer's license for soliciting the sale of goods there on behalf of individuals or firms doing business in another state. This rule, the court said, "will only prevent the levy of a tax, or the requirement of a license, for making negotiations for the conduct of interstate commerce, and it may well be asked where the state gets authority for imposing burdens on that branch of business any more than for imposing a tax on the business of importing from foreign countries, or even on that of postmaster or United States marshal. The mere calling the business of a drummer a privilege cannot make it so. Can the state Legislature make it a Tennessee privilege to carry on the business of importing goods from foreign countries? If not, has it any better right to make it a state privilege to carry on interstate commerce? It seems to be forgotten, in argument, that the people of this country

are citizens of the United States, as well as of the individual states, and that they have some rights under the Constitution and laws of the former independent of the latter, and free from any interference or restraint from them." Again: "It is strongly urged, as if it were a material point in the case, that no discrimination is made between domestic and foreign drummers—those of Tennessee and those of other states; that all are taxed alike. But that does not meet the difficulty. Interstate commerce cannot be taxed at all, even though the same amount of tax should be laid on domestic commerce, or that which is carried on solely within the state. This was decided in the case of *The State Freight Tax*, 82 U. S. 15 Wall. 282 [21: 146]. The negotiation of sales of goods which are in another State for the purpose of introducing them into the State in which the negotiation is made, is interstate commerce. A New Orleans merchant cannot be taxed there for ordering goods from London or New York, because, in the one case, it is an act of foreign, and, in the other, of interstate, commerce, both of which are subject to regulation by Congress alone."

In *Philadelphia & S. S. Co. v. Pennsylvania*, 122 U. S. 836 [30: 1200], a tax, imposed in Pennsylvania, upon the gross receipts of a steamship company, incorporated under the laws of that state, such gross receipts being derived from the transportation of persons and property by sea, between different states, and to and from foreign countries, was held to be a regulation of interstate and foreign commerce, and, therefore, unconstitutional.

In *Leloup v. Port of Mobile*, 127 U. S. 640, 648 [32:311, 314], 2 Inters. Com. Rep. 184, an ordinance of that port requiring a license tax from telegraph companies was held to be invalid in its application to a company, having a place of business in Mobile, and being engaged there in the occupation of transmitting messages from and to points in Alabama to and from points in other states. This court, overruling *Osborne v. Mobile*, 83 U. S. 16 Wall. 479 [21: 470], said that "no State has the right to lay a tax on interstate commerce in any form, whether by way of duties laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on, and the reason is that such taxation is a burden on that commerce, and amounts to a regulation of it, which belongs solely to Congress."

In *Asher v. Texas*, 128 U. S. 129 [32: 368], 2 Inters. Com. Rep. 241, a state law exacting a license tax to enable a person, within the state, to solicit orders and make sales there for a person residing in another state, was held to be repugnant to the commerce clause of the Constitution.

In *Stoutenburgh v. Hennick*, 129 U. S. 141, 147 [32:637, 639], 2 Inters. Com. Rep. 409, the question was whether an Act passed, in 1871, by the legislative assembly of the District of Columbia, requiring commercial agents, engaged in offering merchandise by sample, to take out and pay for a license, was invalid when applied to persons soliciting in the district the sale of goods on behalf of individuals or firms doing business outside of the district. Referring to the particular clause of the Act, upon which it was attempted to sustain the case, this court said:

"This provision was manifestly regarded as a regulation of a purely municipal character, as is perfectly obvious, upon the principle of *noctitur a sociis*, if the clause be taken as it should be, in connection with the other clauses and parts of that Act. But it is indistinguishable from that held void in *Robbins v. Shelby County Tax. Dist.*, and *Asher v. Texas*, 128 U. S. 129 [32:368], 2 Inters. Com. Rep. 241, as being a regulation of interstate commerce, so far as applicable to persons soliciting, as Hennick was, the sale of goods on behalf of individuals or firms doing business outside of the District."

In *McCall v. California*, 136 U. S. 104 [34:392], 3 Inters. Com. Rep. 181, it was held that a license tax imposed by an ordinance enacted by the board of supervisors of the city and county of San Francisco, upon an agent engaged at that city, in the business of soliciting travel for a line of railroad between Chicago and New York, was invalid under the commerce clause of the Constitution.

In *Norfolk W. R. Co. v. Pennsylvania*, 136 U. S. 114 [34:394], 3 Inters. Com. Rep. 178, a tax imposed by Pennsylvania upon a railroad company, incorporated in another state, and whose line extended from Philadelphia into other states, for the privilege of keeping an office in Pennsylvania, to be used by its officers, stockholders, agents, and employes, was a tax upon commerce among the states, and therefore void.

In *Crutcher v. Kentucky*, 141 U. S. 47 [35:649], the court adjudged to be void an Act of the Legislature of Kentucky, so far as it forbade foreign express companies from carrying on business between points in that state and points in other states, without first obtaining a license from the state.

The principles announced in these cases, if fairly applied to the present case, ought, in my judgment, to have led to a conclusion different from that reached by the court. Ficklen took out a license as merchandise broker and gave bond to made a return of the gross commissions earned by him. His commissions in 1887 were wholly derived from interstate business, that is, from mere orders taken in Tennessee for goods in other states, to be shipped into that state, when the orders were forwarded and filled. He was denied a license for 1888 unless he first paid two and a half per cent on

his gross commissions. And the court holds that it was consistent with the Constitution of the United States for the local authorities of the taxing district of Shelby county to make it a condition precedent to Ficklen's right to a license for 1888 that he should pay the required per cent of the gross commissions earned by him in 1887 in interstate business. This is a very clever device to enable the taxing district of Shelby county to sustain its government by taxation upon interstate commerce. If the ordinance in question had, in express terms, made the granting of a license as merchandise broker depend upon the payment by the applicant of a given per cent upon his earnings in the previous year, in interstate business, the court, I apprehend, would not have hesitated to pronounce it unconstitutional. But, it seems, that if the local authorities are discreet enough not to indicate in the ordinances under which they act their purpose to tax interstate business, they may successfully evade a constitutional provision designed to relieve commerce among the states from direct local burdens. The bond which Ficklen gave should not, in my opinion, be construed as embracing his commissions earned in business upon which no tax can be constitutionally imposed by a state.

The result of the present decision is, that while under *Robbins v. Shelby County Tax. Dist.*, a license tax may not be imposed in Tennessee upon drummers for soliciting there the sale of goods to be brought from other states; while under *Leloup v. Port of Mobile*, a local license tax cannot be imposed in respect to telegrams between points in different states; and while under *Stoutenburgh v. Hennick*, commercial agents cannot be taxed in the District of Columbia for soliciting there the sale of goods to be brought into the District from one of the states; the taxing district of Shelby County may require, as a condition of granting a license as merchandise broker, that the applicant shall pay a license fee, and, in addition, 2½ per cent upon the gross commissions received, not only in the business transacted by him that is wholly domestic, but in that which is wholly interstate.

For these reasons I am constrained to dissent from the opinion and judgment of the court in this case.

THE LEHIGH VALLEY RAILROAD COMPANY, *Plff. in Err.*,

v.

THE COMMONWEALTH OF PENNSYLVANIA.

[No. 275.]

(See S. C. 145 U. S. 192, 36 L. ed. 672.)

1. A railroad corporation of a state is liable to taxation by such state upon its receipts, for the mileage within the state, from transportation by

continuous carriage from a point in the state to another point in the state, but over a line which, in its course between those points passes out of

- the state into another state and back again into the State.
2. The grant to Congress of the power to regulate commerce among the states does not embrace that commerce which is completely internal or between different parts of the same state.

3. In the carriage of freight and passengers between two points in one state, the mere passage over soil of another state, does not render that business foreign, which is otherwise domestic.

Argued April 5, 1892. Decided May 2, 1892.

IN ERROR to the Supreme Court of the state of Pennsylvania, to review a judgment in favor of the Commonwealth of Pennsylvania, against the Lehigh Valley Railroad Company for the recovery of taxes upon amounts received by said Company for transportation in that state. *Affirmed.*

Statement by *Mr. Chief Justice Fuller*:

April 28, 1887, the auditor-general of Pennsylvania settled an account with the Lehigh Valley Railroad Company, in accordance with the Act of June 7, 1879, of that Commonwealth, for its taxes on gross receipts for the six months ending December 31, 1886, as follows:

Gross receipts.....	\$4,798,938 54
Proportion taxable in Pennsylvania, $\frac{1}{10}$	8,835,926 60
Tax at rate of eight tenths of one per cent.....	30,642 88

Due Commonwealth..... \$30,642 88"

This settlement was approved by the state treasurer June 3, 1887. The Lehigh Company thereupon prayed an appeal to the Court of Common Pleas of Dauphin county, Pennsylvania, where a declaration and copy of account were filed and the case tried under stipulation by the court without a jury. Upon the trial it appeared from the affidavit of the treasurer of the Lehigh Company, given November 10, 1887, that he had made to the auditor-general for the six months ending December 31, 1886, the report of gross receipts upon which the account for taxes had been settled, and further that "the main line of railroad operated by the Lehigh Valley Railroad Company extends from Perth Amboy, in the state of New Jersey, to Wilkesbarre, in the state of Pennsylvania, with numerous branches in Pennsylvania and New Jersey. The company has also running arrangements with other companies whereby it runs its own trains, both passenger and freight, on a through line from Jersey City, New Jersey, to Buffalo, New York. A very large portion of its business consists of the transportation of freight, passengers, etc., from points in Pennsylvania, to points in other states or from points in other states to points in Pennsylvania, or from points in other states to points in other states, passing through the state of Pennsylvania, about one half of its entire receipts being derived from the transportation of anthracite coal from Pennsylvania into other states."

The affidavit gave a detailed statement showing the several classes of transportation from which the receipts returned were derived, being from transportation of coal; freight other than coal; passengers, express, and mail; distributed as in a summary, with which the

statement concluded, and which was as follows:

1. Total receipts from transportation from points in Pennsylvania to other points in Pennsylvania without passing out of the state.....	\$1,853,441 50
2. Total receipts from transportation by continuous carriage from points in Pennsylvania to other points in Pennsylvania, but over lines partly in Pennsylvania—that is to say, passing out of Pennsylvania into other states and back again into Pennsylvania in course of transportation.....	207,660 42
3. Total receipts from transportation by continuous carriage from points in a foreign state to other points in the same state passing through the state of Pennsylvania.....	50,494 25
4. Total receipts from transportation by continuous carriage from points in other states to points in Pennsylvania.....	292,422 00
5. Total receipts from transportation by continuous carriage from points in Pennsylvania to points in other states.....	2,569,514 58
6. Total receipts from transportation by continuous carriage from points in a foreign state, passing through Pennsylvania, and ending in a third state.....	267,868 59
7. Total receipts from transportation from points in foreign states to other points in foreign states not touching Pennsylvania.....	57,532 19
Total receipts.....	\$4,798,938 58"

In another affidavit, under date January 20, 1888, the same official stated: "Wherever in the said statement of November tenth, 1887, I used the term 'continuous transportation' or 'continuous carriage,' the freight or passengers from the transportation of which the receipts were derived were carried between the points mentioned for a single sum or charge and upon a single way-bill or ticket, and were, when taken upon the cars of this company, destined

to be carried and were actually carried from point to point as in said statement set forth. The Lehigh Valley Railroad Company has no railroad of its own reaching the city of Philadelphia, but transports coal and other merchandise, and sometimes passengers, from Mauch Chunk and other points in Pennsylvania over its own line to Phillipsburg, in the state of New Jersey, from which point it is carried upon the Belvidere & Delaware railroad to Trenton, and thence by the Pennsylvania Railroad lines to the city of Philadelphia. So far as the Lehigh Valley Railroad line is concerned the transportation is from Mauch Chunk, or the other points in Pennsylvania, to Phillipsburg, in New Jersey; but by arrangements between this company and the corporations owning the other roads the transportation is continuous from Mauch Chunk and the other points in Pennsylvania to Philadelphia. The receipts mentioned in my statement of November tenth in the second paragraph in each instance under the respective heads of 'coal,' 'freight other than coal,' and 'passenger, express, and mail,' and also in the second item in the summary, were derived in the manner above explained. Some of the trains, and in many instances the same cars, which carried the freight and passengers indicated between the points in Pennsylvania and the city of Philadelphia carried also freight and passengers destined and carried from points in Pennsylvania to points in New Jersey and New York, and *vice versa*. The various items of receipts shown in my statement of November tenth and classified in the third paragraph of the summary as 'receipts from transportation by continuous carriage from points in a foreign state to other points in the same state, passing through the state of Pennsylvania,' were derived from transportation of freight and passengers billed or ticketed from the city of New York to other points in the state of New York, and *vice versa*. The same trains and the same cars which carried the said freight and passengers carried also freight and passengers destined and carried from points in Pennsylvania to points in other states and from points in other states to points in Pennsylvania."

It was admitted that the Lehigh Company was originally incorporated by the State of Pennsylvania, and that it owned and operated as part of its main line about sixty-six miles of railroad in New Jersey.

The fraction of the entire gross receipts given in the settlement represented the Lehigh Company's mileage within the state.

The Court of Common Pleas found the facts, and held, for the reasons given in *Com. v. Delaware & H. Canal Co.*, (Pa.) 21 W. N. C. 406, and *Com. v. New York, L. R. & W. R. Co.*, (Pa.) 21 W. N. C. 410, that the Commonwealth could only recover taxes upon the two items of \$1,358,441.50, and \$207,660.42 (classes one and two), being the amount received for transportation between points both of which were in the state; and directed judgment accordingly, which, exceptions thereto having been overruled, was thereupon entered. The case was carried by writ of error to the Supreme Court of Pennsylvania, and the judgment affirmed upon the opinion of the court

below. A writ of error was then sued out from this court.

The company, conceding its liability to taxation in respect of the receipts contained in class one, questions by its assignment of errors the validity of the tax as to the receipts in class two.

Mr. M. E. Olmsted, for plaintiff in error:

The seventh section of the Pennsylvania revenue statute of June 7, 1879, which has since been repealed, was three times before this court, and, in each instance, condemned as unconstitutional in so far as it imposed a tax upon receipts derived from interstate commerce.

Philadelphia & S. M. S. Co. v. Pennsylvania, 122 U. S. 326 (80: 1200); *Western U. Tele. Co. v. Pennsylvania*, 128 U. S. 89 (32: 846), 2 Inters. Com. Rep. 241; *Western U. Tele. Co. v. Texas*, 105 U. S. 460 (26: 1067); *Ratterman v. Western U. Tele. Co.* 127 U. S. 411 (32: 229), 2 Inters. Com. Rep. 59.

In *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18 (35: 618), 8 Inters. Com. Rep. 565, the unconstitutionality of this tax as applied to receipts derived from the transportation of passengers interstate, by rail, in Pullman cars was conceded.

Following upon these decisions, the Legislature of Pennsylvania passed a new Revenue Act, approved June 1, 1889 (Laws of Pennsylvania, 420), repealing the seventh section of the Act of June 7, 1879, under which the tax in controversy is claimed; and, in its twenty-third section re-enacting the tax and confining it specifically to receipts "received from passengers and freight traffic transported wholly within this state." In repealing the former Act, however, there was reserved to the Commonwealth the right to collect any taxes accrued under the Act of 1879. The decision of this court will, therefore, not affect the present revenue system of the Commonwealth, but only the taxes of this one company upon its receipts from a single source prior to the passage of the Act of June 1, 1889.

So far as the Lehigh Valley Railroad Company was concerned, the transportation began in Pennsylvania and ended in New Jersey.

So far as the Pennsylvania Railroad Company was concerned, the transportation began in New Jersey and by it was conducted for more than fifty miles in that state, and finally ended in Pennsylvania.

This transportation was interstate commerce; transportation is itself commerce.

Passenger Cases, 48 U. S. 7 How. 283 (12: 702); *State Freight Tax Cases*, 82 U. S. 15 Wall. 232 (21: 146); *State Tax on Railway Gross Receipts*, 82 U. S. 15 Wall. 284 (21: 164); *Fargo v. Michigan*, 121 U. S. 230 (30: 888); *Philadelphia & S. M. S. Co. v. Pennsylvania*, 122 U. S. 326 (80: 1200); *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557 (80: 244).

This court has always and invariably proceeded upon the theory that transportation is commerce; and, wherever the transportation involved has been of an interstate or international character, its regulation by the states has been invariably prohibited.

Ex parte Koehler (Or.) 30 Am. & Eng. R.

Cas. 71; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1 (6: 23); *State Tonnage Tax Cases*, 79 U. S. 12 Wall. 204 (20: 370); *Hall v. DeCuir*, 95 U. S. 485 (24: 547); *Fargo v. Michigan*, 121 U. S. 230 (30: 888); *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557 (30: 244); *Coe v. Errol*, 116 U. S. 517 (29: 715).

The only commerce which a state has any authority to regulate is that which is wholly within her own borders.

Lord v. Goodall N. & P. SS. Co. 102 U. S. 541 (26: 224); *Veazie v. Moor*, 55 U. S. 14 How. 568 (14: 546); *Pacific Coast SS. Co. v. Railroad Comrs.* 18 Fed. Rep. 10.

The regulation here attempted, by means of taxation, is just as much prohibited as any other.

Gloucester Ferry Co. v. Pennsylvania, 114 U. S. 196 (29: 158); *Sternberger v. Cape Fear & Y. R. Co.* 29 S. C. 510, 35 Am. & Eng. R. Cas. 693; *New Orleans Cotton Exchange v. Cincinnati, N. O. & T. P. R. Co.* 2 Inters. Com. Rep. 289.

Commerce between points in the same state, but which, in being carried from one place the other, passes through another state, is interstate commerce.

State v. Chicago, St. P. M. & O. R. Co. 40 Minn. 267; *Lord v. Goodall N. & P. SS. Co.* 102 U. S. 541 (26: 224).

Messrs. James A. Stranahan, Deputy Atty-Gen., of Pennsylvania, and W. U. Hensel, Atty-Gen., of same state, for defendant in error.

Mr. Chief Justice Fuller delivered the opinion of the court:

The Lehigh Valley Railroad Company is a Pennsylvania corporation, which owns and operates an extensive system of railroads in that state, but has no line of its own to Philadelphia. For the traffic from Mauch Chunk to Philadelphia, it makes use of two routes, one by the way of the Philadelphia & Reading road, being wholly within the State, and the other by its own line connecting with the lines of the Pennsylvania Railroad at Phillipsburg, New Jersey, and thence *via* Trenton, in that state, to Philadelphia. Detailed reports of its receipts show that the passenger traffic of the Lehigh Company to Philadelphia from Mauch Chunk is almost wholly taken over the Philadelphia & Reading, while its coal and general freight traffic reaches Philadelphia by the other road. Phillipsburg, New Jersey, lies across the Delaware river, opposite Easton, Pennsylvania. By the running arrangements between the Lehigh and Pennsylvania companies, the transportation of through freight and passengers is continuous from Mauch Chunk to Philadelphia.

The receipts named in class two are confined to that part of the transportation from Mauch Chunk to Phillipsburg, and the taxation to the mileage wholly within the state of Pennsylvania; and the question is whether this taxation in respect of such receipts from freight and passengers carried by continuous transportation to Philadelphia from Mauch Chunk by way of Trenton, New Jersey, amounts to a regulation of interstate commerce.

The conflict between the commercial regulations of the several states was destructive to

their harmony and fatal to their commercial interests abroad, and this was the mischief intended to be obviated by the grant to the Congress of the power to regulate commerce with foreign nations and among the states. But, as was said by *Chief Justice Marshall*, the words of the grant do not embrace that commerce which is completely internal, which is carried on between man and man in a State, or between different parts of the same State, and which does not extend to nor affect other states. "Commerce," observed the Chief Justice, "undoubtedly, is traffic, but it is something more; it is intercourse. It describes the commercial intercourse between nations, and parts of nations, in all its branches, and is regulated by prescribing rules for carrying on that intercourse." 22 U. S. 9 Wheat. 189 [6: 68]. This is no more than an expansion of its simplest signification, that of an exchange of goods, the bringing of them from the seller to the buyer, however vast the range now comprehended by the term in the progress of society.

Taxation is undoubtedly one of the forms of regulation, but the power of each state to tax its own internal commerce, and the franchisees, property, or business of its own corporations engaged in such commerce, has always been recognized, and the particular mode of taxation in this instance is conceded to be in itself not open to objection. And while interstate commerce cannot be regulated by a state by the laying of taxes thereon, in any form, yet whenever the subjects of taxation can be separated so that that which arises from interstate commerce can be distinguished from that which arises from commerce wholly within the state, the distinction will be acted upon by the courts, and the state permitted to collect that arising upon commerce solely within its own territory. *Ratterman v. Western U. Tel. Co.*, 127 U. S. 411, 424 [32: 229, 232], 2 Inters. Com. Rep. 59.

The tax under consideration here was determined in respect of receipts for the proportion of the transportation within the state, but the contention is that this could not be done because the transportation was an entire thing, and in its course passed through another state than that of the origin and destination of the particular freight and passengers. There was no breaking of bulk or transfer of passengers in New Jersey. The point of departure and the point of arrival were alike in Pennsylvania. The intercourse was between those points and not between any other points. Is such intercourse, consisting of continuous transportation between two points in the same state, made interstate because in its accomplishment some portion of another state may be traversed? Is the transmission of freight or messages between two places in the same state made interstate business by the deviation of the railroad or telegraph line on to the soil of another state?

If it has happened that through engineering difficulties, as the interposition of a mountain or a river, the line is deflected so as to cross the boundary and run for the time being in another state than that of its principal location, does such detour in itself impress an external character on internal intercourse? For example, the Nashville, Chattanooga & St. Louis Railway Company is a corporation cre-

ated under the laws of Tennessee and through freight and passengers transported from Nashville to Chattanooga pass over a few miles in Alabama and perhaps two miles in Georgia, but we had not supposed that that circumstance would render the taxation of that company, in respect of such business, by the State of Tennessee invalid.

So as to the traffic of the Erie railway between the cities of New York and Buffalo, we do not understand that that company escapes taxation in respect of that part of its business because some miles of its road are in Pennsylvania, while the New York Central is taxed as to its business between the same places, because its rails are wholly within the state of New York.

It should be remembered that the question does not arise as to the power of any other state than the state of the termini, nor as to taxation upon the property of the company situated elsewhere than in Pennsylvania, nor as to the regulation by Pennsylvania of the operations of this or any other company elsewhere, but it is simply whether, in the carriage of freight and passengers between two points in one state, the mere passage over the soil of another state renders that business foreign, which is domestic. We do not think such a view can be reasonably entertained, and are of opinion that this taxation is not open to constitutional objection by reason of the particular way in which Philadelphia was reached from Mauch Chunk.

Nor is the contrary conclusion supported by *Coe v. Errol*, 116 U. S. 517 [29: 715], and *Lord v. Goodall, N. & P. SS. Co.*, 102 U. S. 541 [26: 224], much relied on by plaintiff in error.

In *Coe v. Errol*, logs cut in Maine and detained at Errol, New Hampshire, on their way down the Androscoggin river to Lewiston, Maine, were held by the Supreme Court of New Hampshire not taxable at Errol, while logs cut in New Hampshire and hauled down to that town for similar transportation were held taxable, and this court sustained the judgment of the state court in reference to the New Hampshire logs, upon the ground that they were still part of the general mass of property of the state, and had not commenced "their final movement for transportation from the state of their origin to that of their destination." The Maine logs had never been part of the property of New Hampshire, and had no *situs* there. They were therefore not taxable, though whether they were or not was not drawn into decision. These logs were also in course of transportation from the place of cutting to another place likewise in Maine, and as that transportation required them to arrive and remain for a time in New Hampshire, the predicament in that regard was referred to in the opinion by way of argument, as being such that New Hampshire could not impose a burden on that transportation. But the right of Maine to tax them was not disputed.

The single question in *Lord v. Goodall, N. & P. SS. Co.*, was, as stated by Mr. Chief Justice Waite, delivering the opinion of the court, whether Congress had power to regulate the liability of the owners of vessels navigating the high seas, but engaged only in the transportation of goods and passengers between ports and

places in the same state, it being conceded that the voyages of the steamship in respect of whose loss the question arose were always ocean voyages. The argument was that "while on the ocean her national character only was recognized, and she was subject to such laws as the commercial nations of the world had, by usage or otherwise, agreed on for the government of the vehicles of commerce occupying this common property of all mankind. She was navigating among the vessels of other nations and was treated by them as belonging to the country whose flag she carried. True, she was not trading with them, but she was navigating with them, and consequently with them was engaged in commerce. If in her navigation she inflicted a wrong on another country, the United States, and not the state of California, must answer for what was done. In every just sense, therefore, she was, while on the ocean, engaged in commerce with foreign nations, and as such, she and the business in which she was engaged was subject to the regulating power of Congress."

But it was unnecessary to invoke the power to regulate commerce in order to find authority for the law in question. As stated by Mr. Justice Bradley in *Re Garnett*, 141 U. S. 1, 12 [35: 631, 633]: "The Act of Congress which limits the liability of ship owners was passed in amendment of the maritime law of the country, and the power to make such amendments is co-extensive with that law. It is not confined to the boundaries or class of subjects which limit and characterize the power to regulate commerce; but, in maritime matters, it extends to all matters and places to which the maritime law extends." In that case the Limited Liability Act was applied to a steamer engaged in commerce on the Savannah river.

In *Ex parte Boyer*, 109 U. S. 629 [27: 1056], it was decided that the admiralty jurisdiction extended to a steam canal boat, in case of collision between her and another canal boat, whilst the two boats were navigating the Illinois & Lake Michigan Canal, although the libellant's boat was bound from one place in Illinois to another place in the same state.

The principle is well settled, and the cases are largely referred to in *Re Garnett*.

In *Pacific Coast SS. Co. v. Board of Railroad Comrs.*, 9 Sawyer, 253, the Circuit Court for the District of California held, Mr. Justice Field delivering the opinion, that the California State Board of Railroad Commissioners had no power to regulate or interfere with the transportation of persons or merchandise by a steamship company between ports within the state, if they were in transit to or from other states, or if the transportation consisted of voyages upon the ocean, bringing the steamships under the exclusive control of Congress.

But that case involved the direct regulation by a state of transportation which had passed beyond the jurisdiction of the state, and did not decide the question of the power of a state to tax its own corporations in respect of transactions within it in the course of a continuous carriage from one point to another in the state, in accomplishing which a part of another state was incidentally traversed.

This Pennsylvania Company was not taxed in respect of its receipts from transportation

from points in foreign states to other points in foreign states not touching Pennsylvania; nor from transportation by continuous carriage from points in a foreign state passing through Pennsylvania and ending into a third state; nor from transportation by continuous carriage from points in Pennsylvania to points in other states; nor from transportation by continuous carriage from points in other states to points in Pennsylvania; nor from transportation by continuous carriage from points in another state to other points in the same state passing through Pennsylvania; but only in respect of

receipts from transportation from points in Pennsylvania to other points in Pennsylvania without passing out of the state, and from transportation by continuous carriage from points in Pennsylvania to other points therein, but passing out of Pennsylvania into another state and back again in the course of transportation.

We do not deem it necessary to continue the discussion. We concur with the state court in sustaining the validity of the tax herein involved, and the judgment is affirmed.

THE INTERSTATE COMMERCE COMMISSION, *Appt.*,
v.
THE BALTIMORE & OHIO RAILROAD COMPANY.

[No. 889.]

(See S. C. 145 U. S.. 263, 36 L. ed. 699.)

1. The Interstate Commerce Act was not designed to prevent competition between different roads, nor to interfere with the customary arrangement made by railway companies for reduced fares in consideration of increased mileage, where such reduction does not operate as an unjust discrimination against other persons traveling over the road.
2. In order to constitute an unjust discrimination under section 2, of the Interstate Commerce Act, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate or other device; but, in either case, it must be for a

like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions.

3. A party rate ticket, which is a single ticket covering the transportation of ten or more persons from one place to another on a railroad is not in violation of the Interstate Commerce Act, although sold at a reduction from the regular passenger rates.
4. Railway companies are only bound under the Interstate Commerce Act to give the same terms to all persons alike under the same conditions and circumstances, and any fact which produces an inequality of condition and a change of circumstances justifies an inequality of charge.

Argued March 17, 18, 1892. Decided May 16, 1892.

APPEAL from a decree of the Circuit Court of the United States for the Southern District of Ohio, dismissing a suit brought by the Interstate Commerce Commission against the Baltimore & Ohio Railroad Company, for a writ of injunction to restrain the defendant from continuing its violation of the order of the Commission that the Railroad Company cease and desist from selling party rate tickets at reduced rates. *Affirmed.*

See same case below, 48 Fed. Rep. 37; see also 2 Inters. Com. Rep. 572, 729.

Statement by *Mr. Justice Brown*:

This proceeding was originally instituted
4 INTER S.

by the filing of a petition before the Interstate Commerce Commission by the Pittsburgh, Cincinnati & St. Louis Railway Company against the Baltimore & Ohio Railroad Company, to compel the latter to withdraw from its lines of road, upon which business competitive with that of the petitioner was transacted, the so-called "party rates," and to decline to give such rates in future upon such lines of road; also for an order requiring said company to discontinue the practice of selling excursion tickets at less than the regular rate, unless such rates were posted in its offices as required by law. The petition set forth that the two roads were

competitors from Pittsburg westward; that the Baltimore & Ohio road had in operation upon its competing lines of road so-called "party rates," whereby "parties of ten or more persons traveling together on one ticket will be transported over said lines of road between stations located thereon, at two cents per mile per capita, which is less than the rate for a single person; said rate for a single person being about three cents per mile."

There was another charge that the defendant was in the habit of selling excursion tickets without posting its rates for the same in its offices; but this charge was subsequently abandoned.

The answer of the Baltimore & Ohio Railroad Company admitted that it had at one time in effect the so-called "party rates," but prior to the filing of the complaint had withdrawn said rates, not that it believed that they were illegal, but because it was claimed by other companies that said rates were put into effect in violation of an agreement between companies belonging to a certain association of which defendant was a member. It further averred that said rates were in no way a violation of the Act to Regulate Commerce, and were an accommodation to the public, necessary to the business of theatrical and other amusement companies, and that when the legality of such rates was properly raised for decision, it was prepared to defend the legality of the same. The answer further denied the right of the complainant to institute the proceeding, and prayed that the complaint might be dismissed.

The cause was heard before the Commission, which found "that so-called party rate tickets, sold at reduced rates, and entitling a number of persons to travel together on a single ticket or otherwise, are not commutation tickets within the meaning of section 22 of the Act to Regulate Commerce, and that when the rate at which such tickets for parties are sold are lower for each member of the party than rates contemporaneously charged for the transportation of single passengers between the same points, they constitute unjust discrimination, and are therefore illegal." It was ordered and adjudged "that the defendant, the Baltimore & Ohio Railroad Company, do forthwith wholly and immediately cease and desist from charging rates for the transportation over its lines of a number of persons traveling together in one party, which are less for each person than rates contemporaneously charged by said defendant under schedules lawfully in effect for the transportation of single passengers between the same points."

The defendant road having refused to obey this mandate, the Commission, on May 1, 1890, pursuant to section 16 of the Interstate Commerce Act, filed this bill in the Circuit Court of the United States for the Southern District of Ohio for a writ of injunction to restrain the defendant from continuing in its violation of the order of the Commission. The bill set up the proceedings which had theretofore been taken before the Commission,

and set forth as its gravamen that the defendant had wholly disregarded and set at naught the authority and order of the Commission in that regard, and had willfully and knowingly disobeyed said order, and had not ceased and desisted from allowing party rates as it had been ordered to do; and had upon divers occasions since the service of said order charged rates for the transportation over its lines of a number of persons traveling together in one party, which were less for each person than rates contemporaneously charged under schedules lawfully in effect between the same points for the transportation of persons, citing a number of instances of such disobedience.

The answer admitted the proceedings set forth in the bill, but denied that it had been made to appear to the Commission that defendant had violated the provisions of the Act to Regulate Commerce, or that the Commission had duly and legally determined the matters and things in controversy and at issue between the parties; and averred that several of the conclusions of fact stated in the report of the Commission were not true, or justified by the evidence produced at the hearing; and that the conclusions of law contained in the report, and the interpretation therein given to the Act, were not correct. It admitted that it had not wholly ceased charging rates for transportation over its lines for a number of passengers traveling together in one party upon one ticket, which are less for each person than rates contemporaneously charged by it for the transportation of single passengers between the same points, and admitted a violation of the order of the Commission.

The seventh and eight paragraphs of the answer are the material ones, and are here given in full:

"7. That for many years prior to the passage of the said 'Act to Regulate Commerce,' all the railroad carriers in the United States had habitually made a rate of charge for passengers making frequent trips, trips for long distances, and trips in parties of ten or more, lower than the regular single fare charged between the same points, and such lower rates were universally made at the date of the passage of said Act. To carry on this universal practice many forms of tickets were employed to enable different classes of passengers to enjoy these lower rates, and so stimulate travel. To meet the needs of the commercial traveler the thousand mile ticket was used: to meet the needs of the suburban resident or frequent traveler, several forms of tickets were used, *e. g.*, monthly or quarterly tickets, good for any number of trips within the specified time, and ten, twenty-five, or fifty-trip tickets, good for the specified number of trips by one person, or for one trip by the specified number of persons; to accommodate parties of ten or more, a single ticket, one way or round trip, for the whole party, was made up by the agent on a skeleton form furnished for the purpose; to accommodate excursionists traveling in numbers too large to use a single ticket special individual tickets were issued

to each person. Tickets good for a specified number of trips were issued also between cities where travel was frequent. In short, it was an established principle of the business that whenever the amount of travel more than made up to the carrier for reduction of the charge per capita, then such reduction was reasonable and just in the interests both of the carrier and of the public. Long experience has proved the soundness of the principle. Under its application grew up the business of commercial travelers, the enormous suburban business, the constant travel between large cities, and the excursion business. Under its application has grown up also the business of traveling companies or parties, which has reached an aggregate of many hundreds of thousands of dollars, and which depends for its existence upon a continuance of the transportation rates under which it has grown up.

"8. That since the passage of the said 'Act to Regulate Commerce,' this respondent has continued as theretofore the practice above stated, of making a lower charge on passenger travel, in consideration of the amount and frequency of the travel, and with that purpose and to accommodate the various class of passengers, it has continued in use all the forms of ticket described in the next preceding section. That the charge fixed by it for the transportation of parties of ten or more, on a single ticket, has been two cents per mile, per capita, which is the same rate charged on thousand mile tickets, and is a higher rate than it charges on long distance passenger travel, and excursion travel, and higher than its general rate for suburban travel on time or other suburban tickets. That the said charge for the transportation of parties on a single ticket is just and reasonable, affording a fair compensation to the carrier, and for the best interests both of the carrier and of the public, because any higher rate would destroy the business. That the business reasons, circumstances, and conditions which induced this respondent to make such lower charge for the transportation of parties as aforesaid, and that make it the interest of this respondent as a carrier to make such lower charge, are precisely the same reasons, circumstances, and conditions that induce it and make it its interest to fix a lower charge for the transportation of passengers buying mileage tickets, time or trip tickets, and excursionists. That while so-called party rate tickets are used principally by traveling amusement companies, because no other form of ticket meets the requirement of such companies, yet this respondent has avoided confining such tickets to any class of business, by offering them on the same terms to the public at large. That this respondent has obviated the danger that such lower charge for parties might be taken advantage of by speculators or ticket brokers, by issuing only one ticket for the whole party. And respondent avers that, as such tickets are now issued by it they are not and cannot be used for speculative purposes, and afford no opportunity for evading the law in the hands of ticket brokers. This

4 INTER S.

respondent further avers that it may rightly and legally make a charge per capita for persons traveling on said party rate tickets, lower than its charge for a single passenger making one trip between the same points, the character, circumstances, and conditions of the service being substantially different, and that the making of such lower charge per capita to the member of the party makes or gives no undue or unreasonable preference or advantage to him, and subjects no person, company, firm, corporation, or locality, or particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

The answer further averred the illegality of the order of the Commission, and averred "that by the true construction of the Act the second section thereof requires the same charge for transportation service only in cases where the commercial circumstances and conditions are substantially similar, and the third section requires the same charge to be made only when a difference in charge would work a prejudice or disadvantage to some one without reason therefor. That the twenty-second section, so far from making exceptions to an otherwise absolute rule, was inserted merely as additional precaution to insure the giving to the second and third sections of the Act the construction which Congress intended. That the twenty-second section is a legislative declaration; that under the provisions of the second section of the Act circumstances and conditions of a commercial nature are to be considered, and among such circumstances and conditions, in the case of passenger traffic, the amount of service purchased or contracted for, and the interest of the carrier in stimulating travel are to be considered."

Upon the hearing before the Circuit Court upon pleadings and proofs the bill was dismissed, separate opinions being delivered by *Judges Jackson and Sage*. 43 Fed. Rep. 37. From this decree the Interstate Commerce Commission appealed to this court. The provisions of the Interstate Commerce Act, so far as the same are material to this case, are set forth in the margin.*

*AN ACT TO REGULATE COMMERCE.

"SEC. 1. That the provisions of this Act shall apply to any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used under a common control, management, or arrangement, for a continuous carriage of shipment.

"All charges made for any service rendered, or to be rendered in the transportation of passengers or property as aforesaid, or in connection therewith, or for the receiving, delivering, storage or handling of such property, shall be reasonable and just; and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful.

"SEC. 2. That if any common carrier subject to the provisions of this Act shall, directly or indirectly, by any special rate, rebate, drawback, or other device, charge, demand, collect, or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property, subject to the provisions of this Act, than it charges, demands, collects, or receives from any other person or persons for doing for him or them a like and contemporaneous service in the trans-

Messrs. Samuel Shellabarger, Alfred G. Safford, Mr. Attorney-General W. H. H. Miller and J. M. Wilson, for appellant.

Railroad companies are subject to legislative control as to their rates of fare and freight, unless protected by their charters.

Chicago, B. & Q. R. Co. v. Iowa, 94 U. S. 161 (24: 95); *Peik v. Chicago & N. W. R. Co.* 94 U. S. 164 (24: 97); *Chicago, M. & St. P. R. Co. v. Ackley*, 94 U. S. 179 (24: 99); *Winona & St. P. R. Co. v. Blake*, 94 U. S. 180 (24: 99); *Stone v. Wisconsin*, 94 U. S. 181 (24: 102); *Laurel Fork & S. H. R. Co. v. West Virginia Transp. Co.* 25 W. Va. 324.

The determination of the question whether two kinds of traffic are conducted under similar circumstances and conditions is a question of fact; and the question of reasonableness of a rate and the fact of its being discriminating or otherwise is a question of fact.

Colliery Co. v. Manchester, 8 Nev. & McNam, 441; *Denaby Main Colliery Co. v. Manchester, S. & L. R. Co.* 11 App. Cas. 97; *Samuels v. Louisville & N. R. Co.* 21 Fed. Rep. 58; *United States v. Tozer*, 2 Inters. Com. Rep. 540, 39 Fed. Rep. 369; Harper, Law Inters. Com. 66-68.

Inequality of charge for contemporaneous and like service under substantially similar conditions taken by itself is created an offense by section 2 of the Act, although such unequal charges may be no more than fairly compensatory considered by themselves.

Messenger v. Pennsylvania R. Co. 37 N. J. L. 531.

A common carrier owes an equal duty to all, and it cannot be discharged if he is allowed to make unequal preferences, and thereby prevent or impair the enjoyment of the common right.

Common law here requires substantially the same degree of equality of charge for freights and fares as is required under the statutes and the decisions in England.

Chicago & A. R. Co. v. People, 67 Ill. 11; *Messenger v. Pennsylvania R. Co.* 36 N. J. L.

portation of a like kind of traffic under substantially similar circumstances and conditions, such common carrier shall be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be unlawful.

"Sec. 2. That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

"Sec. 22 (As amended by § 9 of Act of March 2, 1893, chap. 232, 25 Stat. at L. 855, 856). That nothing in this Act shall prevent the carriage, storage, or handling of property free or at reduced rates for the United States, state, or municipal governments, or for charitable purposes, or to or from fairs and expositions for exhibition thereat, or the free carriage of destitute and homeless persons

transported by charitable societies, and the necessary agents employed in such transportation, or the issuance of mileage, excursion, or commutation passenger tickets; nothing in this Act shall be construed to prohibit any common carrier from giving reduced rates to ministers of religion, or to municipal governments for the transportation of indigent persons, or to inmates of the National Homes or State Homes for Disabled Volunteer Soldiers, and of Soldiers' and Sailors' Orphan Homes, including those about to enter and those returning home after discharge, under arrangements with the boards of managers of said homes; nothing in this Act shall be construed to prevent railroads from giving free carriage to their own officers and employees, or prevent the principal officers of any railroad company or companies from exchanging passes or tickets with other railroad companies for their officers and employees; and nothing in this Act contained shall in any way abridge or alter the remedies now existing at common law, or by statute, but the provisions of this Act are in addition to such remedies: *Provided*, That no pending litigation shall in any way be affected by this Act."

407; *Sandford v. Catawissa, W. & E. R. Co.* 24 Pa. 378; *Shipper v. Pennsylvania R. Co.* 47 Pa. 398; *New England Exp. Co. v. Maine Cent. R. Co.* 57 Me. 188; *Dinsmore v. St. Louis, C. & L. R. Co.* 2 Fed. Rep. 465; *Hays v. Pennsylvania Co.* 12 Fed. Rep. 309; *Crawford v. Wick*, 18 Ohio St. 190; *Central Ohio Salt Co. v. Guthrie*, 35 Ohio St. 666.

Messrs. John J. Cowen and Hugh L. Bond, Jr., for appellee:

Under pretence of regulating fares and freights, the state cannot require a railroad corporation to carry persons or property without reward.

Chicago, M. & St. P. R. Co. v. Minnesota, 134 U. S. 418 (33: 970).

As to railroad companies, the general law forbids unjust discrimination.

New England Exp. Co. v. Maine Cent. R. Co. 57 Me. 188; *McDuffee v. Portland R. R. Co.* 52 N. H. 480; *Hersh v. Northern Cent. R. Co.* 74 Pa. 181; *Scotfield v. Lake Shore & M. S. R. Co.* 1 West. Rep. 812, 43 Ohio St. 571; *Vincent v. Chicago & A. R. Co.* 49 Ill. 33; *Fitchburg R. Co. v. Gage*, 12 Gray, 393; *Ex parte Benson*, 18 S. C. 38; *Johnson v. Pensacola & P. R. Co.* 16 Fla. 623; *Hays v. Pennsylvania Co.* 12 Fed. Rep. 309; *Texas Exp. Co. v. Texas & P. R. Co.* 6 Fed. Rep. 426; *Southern Exp. Co. v. Memphis, etc. R. Co.* 8 Fed. Rep. 799; *Southern Exp. Co. v. St. Louis, I. M. & S. R. Co.* 10 Fed. Rep. 210, 869.

The Act prohibits unjust discrimination.

Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co. 110 U. S. 684-685 (23: 297, 298).

The first section requires that all charges be reasonable and just. All the railroad companies of the country have, by the practice of years, recognized the justice and reasonableness of a lower charge per ride to the passenger buying a time ticket, a ticket for ten trips, or a mileage ticket, and to a passenger riding with nine or more others on a single ticket.

To interpret the second section as requiring the company to charge these passengers the full single trip fare is to interpret the second section as requiring a violation of the prohibition in the first section.

Concord & P. R. Co. v. Forsaith, 59 N. H. 122.

It is only when the discrimination inures to the undue advantage of one man in consequence of some injustice inflicted on another that the law intervenes for the protection of the latter.

Hays v. Pennsylvania R. Co. 12 Fed. Rep. 309; *Hoxier v. Caledonian R. R. Co.* 1 Nev. & McN. 27, 1 Ry. & Canal Cas. 31.

The value of the services is the true test of reasonableness.

Canada S. R. Co. v. International Bridge Co. L. R. 8 App. Cas. 723.

Mr. Justice Brown delivered the opinion of the court:

Prior to the enactment of the Act of February 4, 1887, (24 Stat. at. L. 879), to Regulate Commerce, commonly known as the Interstate Commerce Act, railway traffic in this country was regulated by the principles of the common law applicable to common carriers, which demanded little more than that they should carry for all persons

who applied, in the order in which the goods were delivered at the particular station, and that their charges for transportation should be reasonable. It was even doubted whether they were bound to make the same charge to all persons for the same service; (*Fitchburg R. Co. v. Gage*, 12 Gray, 393; *Buzendale v. Eastern Counties R. Co.* 4 C. B. N. S. 63; *Great Western R. Co. v. Sutton*, L. R. 4 H. L. 226, 237; *Ex parte Benson*, 18 S. C. 38; *Johnson v. Pensacola & P. R. Co.* 16 Fla. 623); though the weight of authority in this country was in favor of an equality of charge to all persons for similar services. In several of the states acts had been passed with the design of securing the public against unreasonable and unjust discriminations; but the inefficacy of these laws beyond the lines of the state, the impossibility of securing concerted action between the legislatures toward the regulation of traffic between the several states, and the evils which grew up under a policy of unrestricted competition, suggested the necessity of legislation by Congress under its constitutional power to regulate commerce among the several states. These evils ordinarily took the shape of inequality of charges made, or of facilities furnished, and were usually dictated by or tolerated for the promotion of the interests of the officers of the corporation or of the corporation itself, or for the benefit of some favored persons at the expense of others, or of some particular locality or community, or of some local trade or commercial connection, or for the destruction or crippling of some rival or hostile line.

The principal objects of the Interstate Commerce Act were to secure just and reasonable charges for transportation; to prohibit unjust discriminations in the rendition of like services under similar circumstances and conditions; to prevent undue or unreasonable preferences to persons, corporations, or localities; to inhibit greater compensation for a shorter than for a longer distance over the same line; and to abolish combinations for the pooling of freights. It was not designed, however, to prevent competition between different roads, or to interfere with the customary arrangements made by railway companies for reduced fares in consideration of increased mileage, where such reduction did not operate as an unjust discrimination against other persons traveling over the road. In other words, it was not intended to ignore the principle that one can sell at wholesale cheaper than at retail. It is not all discriminations or preferences that fall within the inhibition of the statute; only such as are unjust or unreasonable. For instance, it would be obviously unjust to charge A a greater sum than B for a single trip from Washington to Pittsburg; but if A agrees not only to go but to return by the same route, it is no injustice to B to permit him to do so for a reduced fare, since the services are not alike, nor the circumstances and conditions substantially similar, as required by section 2 to make an unjust discrimination. Indeed, the possibility of just discriminations and reasonable preferences is recognized by these sections, in declaring

what shall be deemed unjust. We agree, however, with the plaintiff in its contention that a charge may be perfectly reasonable under section 1, and yet may create an unjust discrimination or an unreasonable preference under sections 2 and 3. As was said by Mr. Justice Blackburn in *Great Western R. Co. v. Sutton*, L. R. 4 H. L. 226, 239: "When it is sought to show that the charge is extortionate as being contrary to the statutable obligation to charge equally, it is immaterial whether the charge is reasonable or not; it is enough to show that the company carried for some other person or class of persons at a lower charge during the period throughout which the party complaining was charged more under the like circumstances."

The question involved in this case is, whether the principle above stated as applicable to two individuals applies to the purchase of a single ticket covering the transportation of ten or more persons from one place to another. These are technically known as party rate tickets, and are issued principally to theatrical and operatic companies for the transportation of their troupes. Such ticket is clearly neither a "mileage" nor an "excursion" ticket within the exception of section 22; and upon the testimony in this case it may be doubtful whether it falls within the definition of "commutation tickets," as those words are commonly understood among railway officials. The words "commutation ticket" seem to have no definite meaning. They are defined by Webster (edition of 1891) as "a ticket, as for transportation, which is the evidence of a contract for service at a reduced rate." If this definition be applicable here, then it is clear that it would include a party rate ticket. In the language of the railway, however, they are principally, if not wholly, used to designate tickets for transportation during a limited time between neighboring towns, or cities and suburban towns. The party rate ticket upon the defendant's road is a single ticket issued to a party of ten or more, at a fixed rate of two cents per mile, or a discount of one third from the regular passenger rate. The reduction is not made by way of a secret rebate or drawback, but the rates are scheduled, posted, and open to the public at large.

But assuming the weight of evidence in this case to be that the party rate ticket is not a "commutation ticket," as that word was commonly understood at the time of the passage of the Act, but is a distinct class by itself, it does not necessarily follow that such tickets are unlawful. The unlawfulness defined by sections 2 and 3 consists either in an "unjust discrimination" or an "undue or unreasonable preference or advantage," and the object of section 22 was to settle beyond all doubt that the discrimination in favor of certain persons therein named should not be deemed unjust. It does not follow, however, that there may not be other classes of persons in whose favor a discrimination may be made without such discrimination being unjust. In other words, this section is rather illustrative

than exclusive. Indeed, many, if not all, the excepted classes named in section 22 are those which, in the absence of this section, would not necessarily be held the subjects of an unjust discrimination, if more favorable terms were extended to them than to ordinary passengers. Such, for instance, are property of the United States, state or municipal governments; destitute and homeless persons transported free of charge by charitable societies; indigent persons transported at the expense of municipal governments; inmates of soldiers' homes, etc., and ministers of religion, in favor of whom a reduction of rates had been made for many years before the passage of the Act. It may even admit of serious doubt whether, if the mileage, excursion, or commutation tickets had not been mentioned at all in this section, they would have fallen within the prohibition of sections 2 and 3. In other words, whether the allowance of a reduced rate to persons agreeing to travel one thousand miles or to go and return by the same road is a "like and contemporaneous service under substantially similar conditions and circumstances" as is rendered to a person who travels upon an ordinary single trip ticket. If it be so, then, under state laws forbidding unjust discriminations, every such ticket issued between points within the same state must be illegal. In view of the fact, however, that every railway company issues such tickets; that there is no reported case, state or Federal, wherein their illegality has been questioned; that there is no such case in England; and that the practice is universally acquiesced in by the public, it would seem that the issuing of such tickets should not be held an unjust discrimination or an unreasonable preference to the persons traveling upon them.

But, whether these party rate tickets are commutation tickets proper, as known to railway officials or not, they are obviously within the commuting principle. As stated in the opinion of Judge Sage in the court below: "The difference between commutation and party rate tickets is, that commutation tickets are issued to induce people to travel more frequently, and party rate tickets are issued to induce more people to travel. There is, however, no difference in principle between them, the object in both cases being to increase travel without unjust discrimination, and to secure patronage that would not otherwise be secured."

The testimony indicates that for many years before the passage of the Act it was customary for railroads to issue tickets at reduced rates to passengers making frequent trips, trips for long distances, and trips in parties of ten or more, lower than the regular single fare charged between the same points; and such lower rates were universally made at the date of the passage of the Act. As stated in the answer, to meet the needs of the commercial traveler the thousand mile ticket was issued; to meet the needs of the suburban resident or frequent traveler, several forms of tickets were issued. For example, monthly or quarterly tickets,

good for any number of trips within the specified time; and ten, twenty-five or fifty-trip tickets, good for a specified number of trips by one person, or for one trip by a specified number of persons; to accommodate parties of ten or more, a single ticket, one way or round trip, for the whole party, was made up by the agent on a skeleton form furnished for that purpose; to accommodate excursionist traveling in parties too large to use a single ticket, special individual tickets were issued to each person. Tickets good for a specified number of trips were also issued between cities where travel was frequent. In short, it was an established principle of the business, that whenever the amount of travel more than made up to the carrier for the reduction of the charge per capita, then such reduction was reasonable and just in the interest both of the carrier and of the public. Although the fact that railroads had long been in the habit of issuing these tickets, would be by no means conclusive evidence that they were legal, since the main purpose of the Act was to put an end to certain abuses which had crept into the management of railroads, yet Congress may be presumed to have had those practices in view, and not to have designed to interfere with them, except so far as they were unreasonable in themselves or unjust to others. These tickets then being within the commutation principle of allowing reduced rates in consideration of increased mileage, the real question is, whether this operates as an undue or unreasonable preference or advantage to this particular description of traffic, or an unjust discrimination against others. If, for example, a railway makes to the public generally a certain rate of freight, and to a particular individual residing in the same town a reduced rate for the same class of goods, this may operate as an undue preference, since it enables the favored party to sell his goods at a lower price than his competitors, and may even enable him to obtain a complete monopoly of that business. Even if the same reduced rate be allowed to every one doing the same amount of business, such discrimination may, if carried too far, operate unjustly upon the smaller dealers engaged in the same business and enable the larger ones to drive them out of the market.

The same result, however, does not follow from the sale of a ticket for a number of passengers at a less rate than for a single passenger; it does not operate to the prejudice of the single passenger, who cannot be said to be injured by the fact that another is able in a particular instance to travel at a less rate than he. If it operates injuriously toward anyone it is the rival road, which has not adopted corresponding rates; but, as before observed, it was not the design of the Act to stifle competition, nor is there any legal injustice in one person procuring a particular service cheaper than another. If it be lawful to issue these tickets, then the Pittsburg, Chicago & St. Louis Railway Company has the same right to issue them that the defendant has, and may compete with it for the same traffic; but it is unsound

to argue that it is unlawful to issue them because it has not seen fit to do so. Certainly its construction of the law is not binding upon this court. The evidence shows that the amount of business done by means of these party rate tickets is very large; that theatrical and operatic companies base their calculation of profits to a certain extent upon the reduced rates allowed by railroads; and that the attendance at conventions, political and religious, social and scientific, is, in a great measure, determined by the ability of the delegates to go and come at a reduced charge. If these tickets were withdrawn, the defendant road would lose a large amount of travel, and the single trip passenger would gain absolutely nothing. If a case were presented where a railroad refused an application for a party rate ticket upon the ground that it was not intended for the use of the general public, but solely for theatrical troupes, there would be much greater reason for holding that the latter were favored with an undue preference or advantage.

In order to constitute an unjust discrimination under section 2, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate, or other device; but, in either case, it must be for a "like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions." To bring the present case within the words of this section, we must assume that the transportation of ten persons on a single ticket is substantially identical with the transportation of one, and, in view of the universally accepted fact that a man may buy, contract, or manufacture on a large scale cheaper proportionately than upon a small scale, this is impossible.

In this connection we quote with approval from the opinion of *Judge Jackson* in the court below: "To come within the inhibition of said sections, the differences must be made under like conditions; that is, there must be contemporaneous service in the transportation of like kinds of traffic under substantially the same circumstances and conditions. In respect to passenger traffic, the positions of the respective persons, or classes, between whom differences in charges are made, must be compared with each other, and there must be found to exist substantial identity of situation and of service, accompanied by irregularity and partiality resulting in undue advantage to one, or undue disadvantage to the other, in order to constitute unjust discrimination."

The English Traffic Act of 1854 contains a clause similar to section 3 of the Interstate Commerce Act, that "no such company shall make or give any undue or unreasonable preference or advantage to or in favor of any particular person or company, or any particular description of traffic, in any respect whatsoever, nor shall any such company subject any particular person or company, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

In *Hosier v. Caledonian R. Co.*, 17 Sess. Cas. 302, 1 Nev. & McN. R. Cas. 27, complaint was made by one who had frequent occasion to travel, that passengers from an intermediate station between Glasgow and Edinburgh were charged much greater rates to those places than were charged to other through passengers between these termini; but the Scotch Court of Session held that the petitioner had not shown any title or interest to maintain the proceeding; his only complaint being that he did not choose that parties traveling from Edinburgh to Glasgow should enjoy the benefit of a cheaper rate of travel than he himself could enjoy. "It provides," said the court, "for giving undue preference to parties *pari passu* in the matter, but you must bring them into competition in order to give them an interest to complain."

This is in substance holding that the allowance of a reduced through rate worked no injustice to passengers living on the line of the road, who were obliged to pay at a greater rate. So, in *Jones v. Eastern Counties R. Co.*, 3 C. B. N. S. 718, the court refused an injunction to compel a railway company to issue season tickets between Colchester and London upon the same terms as they issued them between Harwich and London, upon the mere suggestion that the granting the latter, the distance being considerably greater, at a much lower rate than the former, was an undue and unreasonable preference of the inhabitants of Harwich over those of Colchester. Upon the other hand, in *Ransome v. Eastern Counties R. Co.*, 1 C. B. N. S. 437, where it was manifest that a railway company charged Ipswich merchants, who sent from thence coal which had come thither by sea, a higher rate for the carriage of their coal than they charged Peterboro merchants, who had made arrangements with them to carry large quantities over their lines, and that the sums charged the Peterboro merchants were fixed so as to enable them to compete with the Ipswich merchant, the court granted an injunction upon the ground of an undue preference to the Peterboro merchants, the object of the discrimination being to benefit the one dealer at the expense of the other, by depriving the latter of the natural advantages of his position. In *Ozlake v. North-Eastern R. Co.*, 1 C. B. N. S. 454, a railway company was held justified in carrying goods for one person for a less rate than that at which they carried the same description of goods for another, if there be circumstances which render the cost of carrying the goods

for the former less than the cost of carrying them for the latter, but that a desire to introduce northern coke into a certain district was not a legitimate ground for making special agreements with difference merchants for the carriage of coal and coke at a rate lower than the ordinary charge, there being nothing to show that the pecuniary interests of the company were affected; and that this was an undue preference.

In short, the substance of all these decisions is that railway companies are only bound to give the same terms to all persons alike under the same conditions and circumstances, and that any fact which produces an inequality of condition and a change of circumstances justifies an inequality of charge. These traffic acts do not appear to be as comprehensive as our own, and may justify contracts which with us would be obnoxious to the long and short haul clause of the Act, or would be open to the charge of unjust discrimination. But so far as relates to the question of "undue preference," it may be presumed that Congress, in adopting the language of the English Act, had in mind the construction given to these words by the English courts, and intended to incorporate them into the statute. *McDonald v. Hovey*, 110 U. S. 619 [28: 269].

There is nothing in the objection that party rate tickets afford facilities for speculation and that they would be used by ticket brokers or "scalpers" for the purpose of evading the law. The party rate ticket, as it appears in this case, is a single ticket covering the transportation of ten or more persons, and would be much less available in the hands of a ticket broker than an ordinary single ticket, since it could only be disposed of to a person who would be willing to pay two thirds of the regular fare for that number of people. It is possible to conceive that party rate tickets may, by a reduction of the number for whom they may be issued, be made the pretext for evading the law, and for the purpose of cutting rates, but should such be the case, the courts would have no difficulty in discovering the purpose for which they were issued, and applying the proper remedy.

Upon the whole, we are of the opinion that party rate tickets, as used by the defendant, are not open to the objections found by the Interstate Commerce Commission, and are not in violation of the Act to Regulate Commerce, and the decree of the court below is, therefore, affirmed.

ALABAMA SUPREME COURT.

STATE OF ALABAMA, *Appt.*, v. JOHN C. HARRUB.

SAME, *Appt.*, v. GEORGE MELVIN.

1. A statute prohibiting the shipment out of the state of oysters taken in the public waters of

the state, while they are in shells, and which also prohibits the taking of such oysters by any

NOTE.—For the subject of game laws as affecting interstate commerce, which is akin to the question 4 INTER S.

involved in the main case, see *State v. Geer* (Conn.) 13 L. R. A. 804.

person who is not a resident of the state, is not unconstitutional as a regulation of interstate commerce.

2. The title of an Act "To Regulate the Planting and taking of Oysters in the Waters" of the

state, is sufficient to cover provisions against the taking of oysters by non-residents and the transportation out of the state by any person of oysters in shells.

Decided April 5, 1892.

APPEAL by the State from a judgment of the City Court of Mobile discharging the defendants upon habeas corpus from custody in which they had been placed for an alleged violation of the statute regulating the planting and taking of oysters. *Reversed.*

The facts sufficiently appear in the opinion.

Messrs. William L. Martin, Atty-Gen., and Gaylord B. Clark, for the state:

When the revolution took place the people of each state became sovereign, and in that character held the absolute right to all navigable waters, and the soils under them for their own common use.

There has been no grant of power over the fisheries.

These remain under the exclusive control of the state, which may pass such laws as may be deemed expedient to secure to its own citizens the enjoyment of their common property.

New Orleans v. United States, 35 U. S. 10 Pet. 662, 9 L. ed. 578; *Martin v. Waddell*, 41 U. S. 16 Pet. 367, 10 L. ed. 997; *Pollard v. Hagan*, 44 U. S. 3 How. 212, 11 L. ed. 565; *Den v. The Jersey Co. Assn.* 56 U. S. 15 How. 426, 14 L. ed. 757; *Smith v. Maryland*, 59 U. S. 18 How. 71, 15 L. ed. 269; *McCready v. Virginia*, 94 U. S. 391, 24 L. ed. 248; *Manchester v. Massachusetts*, 139 U. S. 240, 35 L. ed. 159; *Hooker v. Cummings*, 20 Johns. 80, 11 Am. Dec. 249; *Corfield v. Coryell*, 4 Wash. C. C. 371; *Smith v. Levinus*, 8 N. Y. 472; *Dunham v. Lamphere*, 3 Gray. 268; *Moulton v. Libbey*, 37 Me. 472, 59 Am. Dec. 57; *Com. v. Bailey*, 13 Allen. 541; *Haney v. Compton*, 36 N. J. L. 507; *Hess v. Muir*, 3 Cent. Rep. 891, 65 Md. 586; *Huntington v. Lovendes*, 40 Fed. Rep. 625; *Gould, Waters*, (2d ed.) §§ 32, 36, 38, 189; *Tinicum Fishing Co. v. Carter*, 61 Pa. 21, 100 Am. Dec. 597.

The people of Alabama, acting through their Legislature, may appropriate this property to their own exclusive use and enjoyment, or share it with their neighbors, just as the individual citizen may do with that which is his own. They may direct whether and to what extent oysters may be placed on the market, select the market and the means of transportation thereto.

The state may forbid all such acts as would render the public right less valuable, or destroy it altogether.

Smith v. Maryland, 59 U. S. 17 How. 71, 15 L. ed. 269.

The unrestricted shipping of oysters in the shell beyond the state would defeat the utilization of the shells in the propagation of oysters, and thereby render the public right less valuable.

If in any view, the prohibition against shipping oysters in the shell out of the state can be held to affect interstate commerce, it will not
4 INTER S.

be considered as an exercise of that power but as flowing from the acknowledged power of the state to regulate and control the subject.

See *County of Mobile v. Kimball*, 102 U. S. 691, 26 L. ed. 238; *Kidd v. Pearson*, 128 U. S. 1, 32 L. ed. 846; *Escanaba & L. M. Transp. Co. v. Chicago*, 107 U. S. 678, 27 L. ed. 442; *Parkersburg & O. R. Transp. Co. v. Parkersburg*, 107 U. S. 691, 27 L. ed. 584; *Morgan's L. & T. R. & S. Co. v. Louisiana Board of Health*, 118 U. S. 455, 30 L. ed. 237; *Smith v. Alabama*, 124 U. S. 465, 31 L. ed. 508; *Nashville, C. & St. L. R. Co. v. Alabama*, 128 U. S. 96, 32 L. ed. 352; *Kimish v. Ball*, 129 U. S. 217, 32 L. ed. 695.

The fact that the oyster when caught, culled, inspected and the tax paid, becomes an article of commerce within the state of Alabama, does not constitute it an article of interstate commerce; and until it becomes such, it remains a part of the general mass of property of the state and subject to the control, exclusively, of the legislative power of the state.

Coe v. Errol, 116 U. S. 517, 29 L. ed. 715.

Messrs. Gregory L. & H. T. Smith and M. D. Wickersham, for appellee:

The state cannot place burdens or restrictions upon interstate commerce in a commodity which is an article of commerce within its boundaries.

Leisy v. Hardin, 135 U. S. 109, 34 L. ed. 132.

Nor place limitations or burdens on their importations.

Tiernan v. Rinker, 102 U. S. 125, 26 L. ed. 108; *Western U. Teleg. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067; *McCall v. California*, 136 U. S. 105, 34 L. ed. 392; *Brimmer v. Rebmam*, 138 U. S. 78, 34 L. ed. 862.

The purpose of vesting in the United States the exclusive regulation of commerce was to prevent the different states from discriminating in favor of their own products and citizens, against the products and citizens of other states.

County of Mobile v. Kimball, 102 U. S. 697, 26 L. ed. 239.

This may be accomplished as well by prohibiting exporting to other states, as by prohibiting imports from them.

Leisy v. Hardin and *McCall v. California*, *supra*.

Under the law under discussion, the oyster is allowed to be shipped from a point in Alabama to any other point in Alabama, through other states, for the purpose of sale. This not only makes it an article of state commerce, but also of interstate commerce.

Lord Goodall SS. Co. 102 U. S. 541, 26 L. ed. 224.

Whenever a commodity has begun to move as an article of trade from one state to another, commerce in that commodity has commenced.

The "*Daniel Ball*," 77 U. S. 10 Wall. 565, 19 L. ed. 1002; *Kidd v. Pearson*, 128 U. S. 1, 32 L. ed. 846.

Whenever the state Legislature seeks to restrict, burden or prevent interstate transportation, sale, purchase, exchange, or traffic in a commodity it is violative of the Constitution of the United States whether the restraint, burden, or prohibition be placed upon the exportation of the commodity from the state or the importation into the state.

The direct question involved, has, however, been considered and adjudicated in two sister states.

State v. Indiana & O. Oil, Gas & Min. Co. 6 L. R. A. 579, 120 Ind. 575; *Territory v. Evans* (Idaho) 7 L. R. A. 288; *McBride v. Heitz*, 19 Kan. 123.

Coleman, J., delivered the opinion of the court:

The defendants were arrested for a violation of the Act of February 18, 1891, pp. 1072-1084, entitled "An Act to Regulate the Planting and Taking of Oysters in the Waters of this State." Upon habeas corpus proceedings the defendants were discharged, the court holding that the Act of the Legislature was unconstitutional and void as contravening subdivision 8, § 8, art. 1, of the Constitution of the United States. Subdivision 8, § 8, art. 1, provides that Congress shall have power "to regulate commerce with foreign nations, and among the several states, and with the Indian tribes." Sections 1 and 2 of the Act of the Legislature under consideration read as follows: "Section 1. That the title to and property in all oysters in the waters of this state, whether upon public reefs or in so-called 'private beds,' or whether the same be transplanted by riparian proprietors under authority of law or otherwise, or whether the same be a growth from natural deposit, is and shall remain in the state until such title shall be divested in manner and form as herein authorized or provided. Sec. 2. That a license is hereby given to resident citizens of the state of Alabama to catch and take oysters, the property of the state, from the public reefs or from private beds planted and owned by them, or in which they have secured an interest or permission from the proprietor thereof to take such oysters, upon the terms and conditions and subject to the restrictions and regulations hereinafter set forth and enacted, but no person or persons not a resident of the state of Alabama is or shall be authorized to take or transport any such oysters from, in, or through any of the waters of the state of Alabama; and it is unlawful for any person, whether a citizen of the state of Alabama or of any other state or country, to ship beyond the limits of this state any oysters taken from the waters of this state while the same are in the shells: provided, that between the middle of December and the middle of January oysters in the shells may be shipped in barrels by railroad to other states: and provided, further, that such oysters in the shell may be shipped bona fide from any point in the state of Alabama to any other point in said state by the lines of transportation which lie partly within and partly without the state of Alabama: and provided, further, that any resident citizen of the state of Alabama who

shall lawfully take any oysters from the tide-waters of this state, as in this Act authorized, shall have a qualified interest or property in the oysters so lawfully taken while in the shell, which he may sell and transfer to any other person within the limits of the state of Alabama: and after said oysters have been shelled within the state of Alabama such lawful taker, or his assigns, as the case may be, shall be vested with all of the state's property and title in and to said oysters, and shall have the right to sell such oysters and shells, or ship the same beyond the limits of this state, without restriction or reservation: provided, further, that in case of any infringement of the foregoing qualified interest in said taker of oysters, said taker may, in his own name, maintain an action against the wrong-doer, either in case or trover, as may be proper; and in case of larceny or other public offense concerning such oysters while in the hands of a lawful taker, the ownership thereof shall be averred in such taker or possessor when by law it shall be necessary to aver ownership."

We deem it unnecessary to set out the whole Act. The principles of law applicable to the facts of the cases before us do not call for a discussion or adjudication of that clause of section 2 which relates to the shipment of oysters in the barrel by railroad from the middle of December to the middle of January, or that clause which permits transportation by lines which lie partly within and partly without the state. *Jones v. Black*, 48 Ala. 540. The agreed facts are that the oysters were taken and shipped in the shell beyond the limits of the state by the defendants in the month of September in sailing vessels; that Harrub was a citizen of Alabama and Melvin a citizen of the state of Mississippi; and that both were guilty of a violation of the statute. The question involved is as to the constitutionality of the Act.

The first question we will consider is as to the extent of the ownership and control of the state of Alabama in and over the oyster-beds and oysters within her territorial limits. In the case of *Martin v. Waddell*, 41 U. S. 16 Pet. 411, 10 L. ed. 1018, *Chief Justice* Taney declares as a general principle that "when the Revolution took place the people of each state became themselves sovereign, and in that character hold the absolute right to all their navigable waters, and the soils under them, for their own common use, subject only to the rights since surrendered by the Constitution to the general government." In the case of *Smith v. Maryland*, 59 U. S. 18 How. 71, 15 L. ed. 269, the question was as to the constitutionality of an Act of the state of Maryland, which was an "Act to Prevent the Destruction of Oysters in the Waters of This State." The court laid down this principle: "But this soil is held by the state not only subject to, but in some sense in trust for, the enjoyment of certain public rights, among which is the common liberty of taking fish, as well shell fish as floating fish. The state holds the propriety of this soil for the conservation of the public rights of fishery thereon, and may regulate the modes of that enjoyment so as to prevent the destruction of the fishery. In other words, it may forbid all such acts as would render the public right less valuable or destroy it alto-

gether. This power results from the ownership of the soil from the legislative jurisdiction of the state over it, and from its duty to preserve unimpaired those public uses for which the soil is held." In the case of *McCready v. Virginia*, 94 U. S. 391, 24 L. ed. 248, the foregoing principles were reaffirmed, and the court went further, and declared: "The title thus held is subject to the paramount right of navigation, the regulation of which, in respect to foreign and interstate commerce, has been granted to the United States. There has been, however, no such grant of power over the fisheries. These remain under the exclusive control of the state, which consequently has the right, in its discretion, to appropriate its tide-waters and their beds to be used by its people as a common for taking and cultivating fish, so far as may be done without obstructing navigation. Such an appropriation is in effect nothing more than a regulation of the use by the people of their common property. . . . It is in fact a property right, and not a mere privilege or immunity of citizenship. . . . It does not belong of right to the citizens of all free governments, but only to the citizens of Virginia. They, and they alone, owned the property to be used, and they alone had the power to dispose of it as they saw fit. . . . The state may, by appropriate legislation, confine the use of the whole to its own people alone." In the case of *Haney v. Compton*, 86 N. J. L. 522, it was said: "But it cannot with any propriety be said that a statute which simply prohibits nonresidents on board a vessel from subverting the soil of the state and carrying away her property, or that of her grantees, leaving such vessel to pass and repass, and go whithersoever those in charge of her may desire, is a regulation of commerce with foreign nations or among the states. It is a law for the protection of property,—at most an internal police regulation, entirely within the competency of the state to adopt, and it is not perceived that it can by possibility interfere with commerce in the senses in which that word is used in the Federal Constitution." In *Manchester v. Massachusetts*, 189 U. S. 259, 35 L. ed. 164, the court reaffirmed the principle declared in the case of *McCready v. Virginia*, *supra*; and the same principle is announced in *Dunham v. Lamphere*, 8 Gray, 268.

We think it clearly established that the people of Alabama own absolutely the oyster-beds and oysters in question, and that it is a property right as complete and perfect as that held to any other property. As was said by Mr. Justice Waite in *McCready v. Virginia*, *supra*, "the principle is not different from the planting of corn upon dry land." We think it further settled that the people of Alabama, through its Legislature, alone have the power to dispose of their property rights in their oyster-beds and oysters, and if they see proper may dispose of them to their own people only. It is further settled that the Legislature has ample authority to adopt all precautions and regulations deemed desirable or necessary for the preservation and increased production of its fisheries. That the power of Congress to regulate commerce with foreign nations, and among the several states, and with the In-

dian tribes, is unlimited and exclusive of the power of the state, is settled law. Any statute of a state not authorized by Congress which in any way obstructs or interrupts free navigation, or restricts or burdens any commodity which is an article of interstate commerce, must be declared null and void. *Tiernan v. Rinker*, 102 U. S. 125, 26 L. ed. 108; *Western U. Teleg. Co. v. Texas*, 105 U. S. 460, 26 L. ed. 1067; *Brimmer v. Reberman*, 188 U. S. 78, 84 L. ed. 862; *Leisy v. Hardin*, 185 U. S. 109, 34 L. ed. 132. To constitute commerce there must be traffic and intercourse, and to constitute interstate commerce there must be traffic and interstate intercourse,—an "intermingling" between different states. As Mr. Chief Justice Marshall says in the case of *Gibbons v. Ogden*, 22 U. S. 9 Wheat, 1, 6 L. ed. 23: "Comprehensive as the word 'among' is, it may very properly be restricted to that commerce which concerns more states than one." "The completely internal commerce of a state may be considered as reserved to the state itself." We understand this great case to distinctly recognize the absolute power and control of the state upon such subjects within its territorial jurisdiction are not articles of foreign or interstate commerce. The case of *Coe v. Errol*, 116 U. S. 517, 29 L. ed. 715, decides an important principle as to the right of the state to tax its products, although the owner may intend them for exportation, and although they may be in process of preparation for exportation at the time of the assessment of the tax; but the case is important in the present connection in determining that "there must be a time when they (the products) cease to be governed exclusively by the domestic law, and begin to be governed and protected by the national law of commercial legislation,"—quoting from the case of *The "Daniel Ball"*, 77 U. S. 10 Wall. 565, 19 L. ed. 1002, as follows: "Whenever a commodity has begun to move as an article of trade from one state to another, commerce in that commodity between the states has commenced." But that movement, says the court, "does not begin until the article has been shipped or started for transportation from the one state to the other." Carrying it from the farm or forest to the depot is only an interior movement of the property, and, although it may be for the purpose of exportation, this is no part of the exportation itself. If the statute of Alabama under consideration militates against any of these well established principles in regard to interstate commerce, it must yield to the dominant supremacy of the federal Constitution. We do not understand the power vested in Congress to regulate interstate commerce gives it power over domestic commerce, or authorizes it to regulate the commerce between the citizens of the same state or different parts of the same state. This power belongs to the several states, and is exclusive of the power of Congress. If the state of Alabama should attempt, by legislation, to tax or burden or restrict the shipment of oysters from the state of Mississippi or other states, such legislation would be unconstitutional; or if the state of Alabama should attempt to impose similar or other conditions upon the shipment of any articles of interstate commerce from this state to another state, that would be

an interference with the law of interstate commerce, which power alone is vested in Congress. To constitute interstate commerce, however, as we have said, there must be an article or commodity the subject of commerce, and destined to pass from one state to another. These authorities do not militate but recognize the power of the state to confine the use of the oyster to its own citizens, and to regulate its shipment and disposition within its borders for their use. This would be domestic commerce as distinguished from interstate commerce. Neither do we understand the power of Congress to regulate interstate commerce in any way interferes with or restricts the right of the state to prohibit its own property, to which it has an exclusive title, from becoming an article or commodity of interstate commerce. In the same line may be cited the case of *American Exp. Co. v. People*, 133 Ill. 649, 9 L. R. A. 188. The statute of Illinois, for the protection of game, permitted the killing of game birds for two months in the year. The statute forbade the sale of the game birds at any other time, and made it unlawful, under a penalty, for any carrier or corporation knowingly to receive and transport or convey them beyond the state for sale. Under the Act, at the proper time, a person was permitted to kill game for his own use, but not to go upon the market as an article of commerce. The constitutionality of the Act was upheld, the court declaring: "The ownership was in the people of the state. This being so, it necessarily follows that the Legislature had the right to permit persons to kill or take game upon such terms and conditions as its wisdom might dictate, and that the person killing game might have such property interest in it, and such only, as the Legislature might confer. The Legislature never conferred an absolute property in quail upon the person who might kill the same." It was held that the discretion of the Legislature in making rules and regulations for the preservation and protection of the game birds was not subject to judicial control.

The property rights of the oyster being in the state exclusively, and the Legislature having full authority to prohibit it from becoming an article of interstate commerce, and to reserve the oyster for the sole use of its own citizens, and to regulate the sale between its own citizens and between different parts of the state, the question arises, When does the oyster, under the statute, become an article of interstate commerce, and what provision of the statute attempts to burden, restrict, or control it after it has this character? The first section explicitly declares that "the title and property in all oysters in the waters of this state . . . shall be divested in manner and form as herein authorized and provided." That this is a valid enactment, under the principles of law declared in many of the foregoing decisions, cannot be questioned. The second section gives a license to resident citizens to catch and take oysters, the property of the state, and further enacts that "no person or persons not a resident of the state of Alabama is or shall be authorized to take or transport any such oysters from, in, or through any of the waters of the state of Alabama; and it is unlawful for any person, whether a citizen of the state of Alabama or

of any other state or country, to ship beyond the limits of this state any oysters taken from the waters of this state while the same are in the shells, provided that between the middle of December and the middle of January oysters in the shell may be shipped in barrels by railroad to other states," etc. That the state has the right to license its own citizens to catch and take oysters, and to deny to citizens of another state the right to take and transport them, and absolutely to prohibit the shipment of oysters beyond the limits of the state, and to regulate the sale of them within its own limits, not imposing any conditions or burdens or restrictions upon the oyster as a commodity after it has entered another state, or after it may be legally delivered in this state for exportation to a common carrier or ways by which interstate commerce is effected, we think is clearly established by the following authorities: *Haney v. Compton*, 86 N. J. L. 522; *The "Daniel Ball"*, 77 U. S. 10 Wall. 557, 19 L. ed. 999; *Coe v. Errol*, 116 U. S. 517, 29 L. ed. 715; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23; *McCready v. Virginia*, 94 U. S. 391, 24 L. ed. 248; *Kidd v. Pearson*, 128 U. S. 1, 32 L. ed. 346; *Philadelphia & R. R. Co. v. Pennsylvania*, 82 U. S. 15 Wall. 250, 21 L. ed. 146.

If the state has the power to prohibit the exportation of its oysters absolutely, *a fortiori* it may limit the shipment of such oysters to such as may have been shelled. If the Legislature sees proper, as a means to prevent the exhaustion of its oyster-beds, to grant to the takers, who can only be resident citizens of the state, or their grantees within the state, such a qualified property right in the oyster as will permit its exportation only after it is shelled, where is the authority to judicially control this discretion, or what principle of the Interstate Commerce Law is violated by such an enactment? The oyster is the absolute property of the state. It certainly has the power to prevent its becoming an article of interstate commerce. Until it becomes an article of interstate commerce Congress has no authority or control in the premises. The state, by the statute itself, expressly retains the title to the oyster, and prohibits its shipment beyond the state until shelled. Only after it is shelled does the state relinquish its title, and the grantee, previously having but a qualified interest, becomes the absolute owner, and the oyster may then become an article of interstate commerce. When shelled, and the state has parted with its property rights, the state no longer interferes with the article. The owner ships it wherever he pleases and by whatsoever transportation he prefers. The statute nowhere interferes with or obstructs the sailing of the vessels. They can come and go when and whithersoever those in control see proper; but this did not authorize them to subvert the soil of Alabama, and to transport in September oysters in the shells from the reefs of Alabama to other states. The statute expressly prohibited it. The error in the argument of the defendants' counsel is in assuming that the oyster in the shell was an article of commerce, when in fact the taker, who could only be a citizen of the state, as we have seen, had but a qualified interest in the oyster, which he could dispose of only in the state. It would

be unsound reasoning to hold that the state could prohibit absolutely the taking of its oysters, or confine the use of them exclusively to its own citizens, and yet could not prevent the taker from shipping them beyond the limits of the state. If the statute had undertaken to invest the taker or his grantee with a full and absolute property right and title to the oyster in the shell, so as to invest him with the power to convert it into an article of commerce, and had then undertaken to prevent its shipment, or burden its shipment with a tax, a different question might arise. That is not the case here. The state carefully guards against this condition, and it is only after being shelled can it be said that the oyster has become an article of interstate commerce. These conclusions are fully sustained by the reasonings and principles declared in the case of *Kidd v. Pearson*, *supra*, in which Mr. Justice Lamar discusses at length and with great clearness the doctrine of interstate commerce, and the application of the principles stated in *Gibbons v. Ogden* and *Coe v. Errol*, *supra*, and other cases cited above.

The policy of the Legislature in making provision to keep the shells within the state might be based upon many considerations.

However, this court is not called upon to adjudicate upon the policy of the Legislature, and we will not consider this view further than to make the following citations from section 5, vol. 2, U. S. Com. Fish, etc., 564: "Besides being useful for making roads, streets, filling wharves and lowlands, and making lime, the shells are of great utility as stools for new oyster-beds, as experiments beginning fifty years ago have demonstrated. . . . These and other minor utilizations are disappearing, however, along the northern coast, through the increased value of the shells to spread on the bottom for the foundation of new colonies, as has been explained; and before long no doubt nearly all the shells accumulated will be saved by planters for this purpose as a better economy than to sell them." When tested by the rule declared in *Bailentyne v. Wickersham*, 75 Ala. 583, the statute is not obnoxious to the objections that it contains subjects not clearly expressed in the title. The rule, as there held, is, that it is "sufficient if they [the subjects] are all referable and cognate to the subject expressed" in the title. Our conclusion is that the Act is not unconstitutional, and that the court erred in its judgment.

Reversed and remanded.

BEFORE THE INTERSTATE COMMERCE COMMISSION.

PHELPS & Co.

v.

THE TEXAS & PACIFIC RAILWAY COMPANY.

(No. 380.)

ANSWER OF DEFENDANT.

The Texas & Pacific Railway Company,

Insists that the facts set out in the complaint do not constitute a violation of the Act to Regulate Commerce, and prays that complaint be dismissed for insufficiency.

Defendant alleges that it is only fair and reasonable, where shipments are received from other carriers, that until the actual weight is ascertained, either at point of shipment or destination, that shippers should pay for a minimum weight and have any excess returned to them afterwards, and that defendant is not bound or controlled by weights inserted in the bills of lading by other carriers from whom consignments are received.

RE WABASH RAILROAD COMPANY.

(Order.)

At a General Session of the Interstate Commerce Commission, held at its office in the City of Washington, D. C., on the 18th day of June, A. D. 1892.

Present: Hon. William R. Morrison, Hon. Wheelock G. Veazey, Hon. Martin A. Knapp, Hon. James W. McDill, Hon. Judson C. Clements—*Commissioners*.

(No. 343.)

Whereas: Informal complaint has been made to the Interstate Commerce Commission that the Wabash Railroad Company, in its business of

transporting property from divers places and stations in Nebraska *via* Chapin, Illinois, to Toledo, Ohio, for Reynolds Bros. of Toledo, Ohio, Melman, Boardman & Company, of New York City, and Gill & Fisher, of Baltimore, Maryland, and others, through the device of fictitious expense bills and otherwise, unjustly discriminate in favor of said shippers upon traffic over the route aforesaid.

And Whereas: The Interstate Commerce Commission of its own motion has decided to investigate the said informal complaint by inquiring into the business of the said Wabash Railroad Company between the points aforesaid.

Therefore, it is hereby ordered, That the Wabash Railroad Company on or before the 7th day of July, 1892, do file its specific verified answer with the Secretary of the Interstate Commerce Commission at Washington, in the District of Columbia, setting forth all the facts and circumstances connected with the transportation by it of property for any or all of said shippers during the past year, and particularly to set forth all sums of money paid or allowed to any or all of said firms during that period, whether in form of expense bills or otherwise,

And it is also hereby further ordered, That the Wabash Railroad Company do appear before the Interstate Commerce Commission at the United States Court House at Omaha, in the state of Nebraska, at 10 o'clock in the forenoon on Monday the 18th day of July, 1892, when the said Commission will proceed to make inquiry into and investigate the management of the business aforesaid by the carrier aforesaid.

In testimony whereof, etc.

Re BALTIMORE & OHIO RAILROAD COMPANY *et al.*

(Order.)

At a General Session of the Interstate Commerce Commission, held at its offices in the city of Washington, D. C., on the 18th day of June, 1892.

Present: Hon. William R. Morrison, Hon. Wheelock G. Veazey, Hon. Martin A. Knapp, Hon. James W. McDill, Hon. Judson C. Clements—*Commissioners.*

(No. 844.)

Whereas: Informal complaint has been made to the Interstate Commerce Commission, that notwithstanding the fact that the various railroad companies engaged in transporting passengers and property from Chicago to eastern seaboard points have filed with the Interstate Commerce Commission tariffs and schedules of rates, fares and charges as required by law, that persons representing said companies at Chicago, aforesaid, solicit transportation at rates less than the rates named in the tariffs filed with the Commission and published by them as required by the Act to Regulate Commerce.

And Whereas: It is stated in said complaint that the said carriers resort to ingenious devices whereby rates less than the established rates are given to favored shippers,

And Whereas: The Interstate Commerce Commission of its own motion has decided to investigate said informal complaints by inquiring into the business of the carriers engaged in the transportation of property from Chicago to Eastern seaboard points.

Therefore, it is hereby ordered, That the Baltimore & Ohio Railroad Company, The Chicago & Eastern Illinois Railroad Company, The Chicago & Grand Trunk Railway Company, The Grand Trunk Railway Company of Canada, The Cleveland, Cincinnati, Chicago & St. Louis Railway Company, The Chicago & Erie Railroad Company, The Michigan Central Railroad Company, The Lake Shore & Michigan Southern Railway Company, The Pennsylvania Company, The New York, Chicago & St. Louis Railroad Company, The Wabash Railroad Company, The Delaware, Lackawanna & Western Railroad Company do appear before the Interstate Commerce Commission, at the office of the United States attorney, in the United States Postoffice Building in Chicago aforesaid, at 10 o'clock in the forenoon on Wednesday the 18th day of July, A. D. 1892, when the said Commission will proceed to make inquiry into and investigate the management of the business aforesaid, by the carriers aforesaid.

In testimony whereof, etc.

J. K. FARRELL and 54 others

THE LOUISVILLE & NASHVILLE R. Co.
and 81 other railroads.

(No. 381.)

ANSWERS OF DEFENDANTS.

THE LOUISVILLE & NASHVILLE RAILROAD COMPANY

Demands proof as to who the complainants are and what they do.

4 LETTER S.

Denies that they are common carriers under any common control, management or arrangement with any of the defendants.

That Columbia is located on the Nashville & Decatur Railroad, which is operated by defendant under a lease.

That the Nashville, Florence & Sheffield Railway extends from or near Columbia to Florence and Sheffield, Ala.; that defendant owns a majority of the stock, but does not operate it. That the distances between Columbia and places named are not stated correctly and the following are correct:

Louisville to Nashville	185 miles
Louisville to Columbia	232 "
Columbia to Nashville	47 "
Columbia to Evansville	202 "
Columbia to Cincinnati	342 "
Nashville to Birmingham	209 "
Nashville to Montgomery	305 "
Nashville to New Orleans	628 "

Rates on coal from mines at Earlington and Providence, Ky., to Nashville April 1st to June 30th, \$1.00 per ton.

July, August, September, October.
\$1.10 \$1.20 \$1.30 \$1.40 per ton

November 1st to March 31st \$1.50 per ton.

The rates through Nashville to Columbia June, July and August \$1.75 per ton. September 1st to May 31st \$2.10 per ton.

That the rates on coal to Nashville for manufacturing purposes from the mines \$1.00 per ton and on the same kind to Columbia is \$1.80 per ton.

That the rates named in complaint on coal to Columbia from Coaldale, Pierces, Warrior and Maples are not correct, they are \$1.75 per ton. From Watts, Broke, Jefferson and New Castle \$1.90 per ton and from Birmingham and south \$2.10 per ton.

The rates to Nashville from same mines are, May 1st to July 31st \$1.50 per ton, August \$1.60, September \$1.70, October 1st to April 30th \$1.80 per ton.

That rates named in complaint are not correct and following are the correct rates:

To Nashville			To Columbia		
From	C. D. F.		C. D. F.		
St. Louis	18 15 34		30 24 60		
Louisville	11 10 20		24 19 48		
Evansville	11 10 20		25 20 48		
Henderson	11 10 20		24 19 48		
Jeffersonville	11 10 20		24 19 48		
Owensboro	11 10 20		24 19 48		
Paducah	11 10 20		25 20 48		
To Huntsville, Decatur, Florence and Sheffield	C. D. F.		Birmingham, Selma, Montgomery, Ala.	C. D. F.	
From St. Louis	28 22 58			31 25 54	
Louisville					
Evansville					
Henderson					
Jeffersonville	19 17 39		24 20 40		
Owensboro					
Paducah					

That where the rate is more to Columbia than to farther points, it is on account of the rail and water competition, and that the freight, if transported by the competition, would not have to pass through Columbia to reach its destination.

Admits the following rates are correct:

Louisville to Nashville, class C	11 cents
" " "	" F. 20 "
" " Columbia	" C. 25 "
" " "	" F. 48 "

but denies that the rates are unjust or discriminating.

Admits that on class C to Huntsville, De-

catur, Florence, Tusculmbia and Sheffield, the rate per 100 pounds is one half cent less than class F, being flour in barrels and being estimated at 200 pounds and as long as the difference between class C and F is maintained from St. Louis and Ohio river points, the same relative adjustment is maintained on shipments from Columbia to the same points of destination.

Admits that the rates stated in complaint to Georgia and Florida points are correct and that from Nashville and Columbia the rate on class C is generally 4 cents higher than class D, which is grain.

That the through rate to Palatka on class C is 8 cents per 100 pounds higher than class D, from Nashville as well as Columbia.

That the relation between classes C, D, F, is not in every case uniform to Palatka, for instance, the rates are made by adding certain arbitraries or local rates from Jacksonville, which rates are controlled by boats on the St. John's river, which allows the rails line to secure on flour in sacks a higher rate than in barrels, and that in the adjustment of the rates on class C, D and F, that is no discrimination in favor of Nashville as against Columbia.

That the rate on grain, Nashville to New Orleans is 15 cents per hundred except wheat, which is 18 cents per 100 pounds; the rate from Evansville to New Orleans on grain is 18 cents per 100 pounds, and from Louisville it is 20 cents per 100 pounds, and Columbia to New Orleans, a distance of 579 miles, it is 25 cents per 100 pounds.

Admits that Columbia is 47 miles nearer New Orleans than Nashville.

Denies that it is 232 miles nearer from Columbia to New Orleans than Louisville by the short line or rate making line between Louisville and New Orleans.

That the rates on grain from Nashville, Louisville and Evansville to New Orleans are controlled by rail and water competition.

That the rates on corn from Columbia to interior points are in no case more than 3 cents per 100 pounds more than from Nashville; that the rate was 5 cents for a long time and this defendant, after careful consideration of the conditions surrounding the shipments of grain from Columbia and other points in the same territory and with a view of protecting the interests of the farmers and millers, voluntarily reduced the rates.

Denies that the rates on grain from Columbia to all northern cities are 10 cents per 100 pounds higher than from Nashville to the same points.

From		
Nashville to Louisville	9	Cincinnati
Columbia	19	28

From			
Nashville to Baltimore, Philadelphia, N. Y. Boston	31	32	34
Columbia	39	40	42

From	
Nashville to Virginia cities, including Newport News and Norfolk	25 cents

Columbia	25 3/4 cents
----------	--------------

Denies that the rates from Louisville to Columbia are excessive or that the circumstances and conditions of transportation are the same as to Nashville, as the water compe-

4 INTER S.

tition controls the rates to Nashville and that the low rates forced by the competition to Nashville has benefited the citizens at Columbia and adjacent points on the Nashville & Decatur Railroad.

The rates on sugar from New Orleans to Nashville in barrels per car load is 19 cents per 100 pounds; less than car loads 22 cents, and if not in barrels, in any quantity 22 cents, and to Columbia in any quantity 37 cents.

That rate on coffee to Nashville from New Orleans is 28 cents and to Columbia 38 cents; on rice and molasses to Nashville 22 cents; to Columbia 37 cents.

Denies that the service to Columbia is exactly the same as that to Nashville, or is performed under similar circumstances and conditions, but is widely different, and that the rates named of 37 cents per 100 pounds from New Orleans to Columbia on sugar or similar articles a distance of 575 miles are reasonable and low and if it was not on account of the low rates to Nashville, the rates to Columbia would be higher than they now are.

The rates on meal, bran and grain from Nashville to Decatur is 10 cents per 100 pounds and from Columbia it is 18 cents.

Denies that there is a rate of \$180.00 per car on oranges from Florida points to Columbia and \$160.00 to Nashville; that the rates are 42 cents per box to Nashville and 58 cents to Columbia.

Admits that the rates on potatoes in car load lots are 8 cents per 100 pounds more from Columbia than Nashville to Birmingham and other points, but denies that the service performed is the same or that the charge is unjust or unreasonable.

That the rates given in complaint are not correct to points in Alabama on class B and the following are correct:

Class B to Talladega, Anniston, Birmingham, from

Nashville	25	25	28
Columbia	40	40	38

Denies that on all freights carried into Columbia, no matter where from, the rate charged is the Nashville rate, plus the local from Nashville to Columbia or that it is often or at any time higher than the Nashville plus the local, and that there is any lawful preference given to Nashville merchants in violation of the Interstate Commerce Law.

Defendant alleges that it would be unjust to them and Nashville and many other places situated like Columbia to give to Columbia the same rates as Nashville, that the rates now charged are just and reasonable and if any citizen of Columbia has been charged over the tariff rates, that defendant is ready at any time on proof of the same to refund the overcharge.

THE MOBILE & OHIO RAILROAD COMPANY

Denies each and every allegation of the complaint.

Denies that they have a tariff rate in force over their road to or from Columbia.

Allege that they had no shipments of freight over their road to or from Columbia during the year 1891, and up to March 10th, 1892.

Prays that they be dismissed as a defendant to the complaint.

THE NORFOLK & WESTERN RAILROAD COMPANY

Allege that they have no control in making the rates to or from Columbia.

Prays that the complaint be dismissed.

THE CAPE FEAR & YADKIN VALLEY RAILROAD COMPANY

Allege that they have no rates over their line to or from Columbia.

Prays that complaint be dismissed.

THE OLD DOMINION STEAMSHIP COMPANY, THE BALTIMORE STEAM PACKET COMPANY and THE SEABOARD & ROANOKE RAILROAD COMPANY

Allege that they have no information as to who the complainants are.

Admit they are common carriers and subject to the Act to Regulate Commerce.

Allege that they are members of the Southern Railway & Steamship Association.

Allege that they have not transported over its road any of the coal, flour, grain, or any of the freight mentioned in the complaint.

Allege that complainants have no ground of complaint against them and that they should not be a party to the proceedings, and prays that complaint be dismissed.

THE NASHVILLE, CHATTANOOGA & ST. LOUIS RAILWAY COMPANY, for themselves and as lessee of the Western & Atlantic Railroad Company

Allege that they are operating the Western & Atlantic Railroad as lessee.

That they are not advised as to the business of complainants.

Admits they are common carriers, but not under a common control, management or arrangement with defendants.

Admits that Columbia is the terminus of one of its branch lines, extending from Columbia to Dechard, Tenn.

Deny that they are interested in and parties to rates charged for transportation over the respective lines made defendants between Columbia and Nashville, Tenn., and various points in the United States outside of the state of Tennessee, or that Columbia is nearer to all points in Georgia reached by Nashville, Chattanooga & St. Louis Railroad, than Nashville is.

Allege that Dechard is half way between Columbia and Nashville.

Denies that its classification and tariffs are unjust and unlawful on classes C and F, in that they haul sack flour, class C, from Ohio river points to Nashville at 11 cents, and on class F at 20 cents, and charge to Columbia, class C, 25 cents and class F, 48 cents. Submit Exhibit A as correct rates.

Denies that the Columbia shippers to all points covered by southeastern tariff, except Huntsville, Decatur, and points named in Alabama pay a higher rate on class C than class F, or that the rate is generally 4 cents per 100 pounds more on C than F class, and that the rates named in complaint are all correct.

41STER 8.

Exhibit A.

Nashville to	C. D. F.			Columbia to	C. D. F.		
	C.	D.	F.		C.	D.	F.
Americus, Ga.	34.	20.	40 $\frac{1}{2}$.	Same	31.	27 $\frac{1}{2}$.	55.
Jessup, Ga.	30.	25.	51 $\frac{1}{2}$.	Same	33 $\frac{1}{2}$.	33.	67 $\frac{1}{2}$.

Columbus, Ga.	22.	not by our line	Same	26.	21.	43.	
Augusta, Ga.	23.	19.	38.	Same	29 $\frac{1}{2}$.	24 $\frac{1}{2}$.	48.

Denies that Columbia ever gave to the Nashville, Chattanooga & St. Louis Railroad Company any sums of money to have a competing road or to give Columbia the same rates that were given to Nashville.

Allege that on October 2d, 1879, they leased the Duck River Valley Railroad for forty years, and agreed that the rates from Columbia and other points named to Chattanooga and Atlanta should be the same as from Nashville, and the rates from Chattanooga and Atlanta should be the same to Columbia as Nashville; that on November 23d, 1887, it purchased in fee simple the railroad under no other consideration than that the road should be changed from a narrow gauge to a standard gauge by December 31st, 1888, and that no mention was then made as to what rates were to be charged and the lease was canceled by consent of both parties.

Denies that the transportation of freight over the branch line to Columbia is under similar circumstances and conditions as on its main line, as the branch line is very expensive to operate on account of the high grades, which will average 50 feet to the mile more than the main line.

Denies that its rates are unlawful or discriminating, or that it has violated Section 4 of the Act to Regulate Commerce.

THE NEWPORT NEWS & MISSISSIPPI VALLEY RAILROAD COMPANY, and THE LOUISVILLE, NEW ORLEANS & TEXAS PACIFIC RAILWAY COMPANY

Demur to the complaint upon the following grounds:

That complainant states no cause of action or grievance against demurrants.

That not one of the different lines over which petitioner's shipments are said to be overcharged or discriminated against are or allege to be under the control of the demurrants.

The specifications of the complaint show rates made from sundry points over lines of the Louisville & Nashville Railroad, and the Nashville, Chattanooga & St. Louis Railroad, not one thereof being over lines or routes owned or controlled by demurrants, or with which they have any connection in anywise whatsoever.

The demurrants waiving no rights under their demurrer, answer—

That their lines beginning at Louisville, Ky. and run down the Ohio river to Paducah, Ky., with a branch line from Evansville to the main line at Princeton and down the Mississippi river to Memphis, Vicksburg and New

Orleans, but do not pass within 200 miles of Columbia.

That they are competitors of the Louisville & Nashville Railroad, and not in anywise connected with business for Columbia, and have never participated in any of the alleged illegal rates.

That a few shipments of live stock or grain may have been transported over their line to be delivered to the Nashville, Chattanooga & St. Louis Railway at Paducah Junction, to be carried to Nashville and by the Louisville & Nashville Railroad to Columbia, but in such and every case in which the rates are complained about, were those charged by the Louisville & Nashville Railroad for their haul, in which respondents had no share.

THE WESTERN RAILWAY OF ALABAMA

Admits that they are common carriers, but not under a common control, management or arrangement.

Admits the rates from Nashville as set out in complaint which affects defendant, are correct except to Jessup, Rome, Fernandina and Columbus, which are not correctly stated.

Denies each and every other allegation of complaint and demands proof of the same.

Denies that it has been a party to any unlawful discrimination or has, violated the Interstate Commerce Law.

Prays that complaint as to defendant be dismissed.

THE ATLANTA & WEST POINT RAILROAD COMPANY

Has no knowledge as to who the complainants are or what they do and demands proof of the same.

Admits they are common carriers, but not under a common control, management or arrangement.

The location of Columbia may be correct.

Has no knowledge as to the control of the roads into Columbia and demands proof of the same.

That freight transported from Ohio river points or Birmingham and Montgomery do not pass over defendant's line.

That the allegation as to the Georgia, North Carolina, South Carolina, and Florida rates be stricken out as to defendant, as no charge is alleged that defendant made any illegal rate.

Denies that they have violated the Act to Regulate Commerce.

THE ILLINOIS CENTRAL RAILROAD COMPANY.

That defendant's only relation to matters complained of in the complaint, is that it connects with the Nashville, Chattanooga & St. Louis Railway and quotes through rates from Cairo to Nashville and Columbia and other points.

The rates to Columbia are higher than to Nashville on account of the water competition at Cairo to Nashville, and Columbia is the longer haul, and the freight transported either to Nashville or Columbia over defendant's line, leaves it at Martin, 55 miles from Cairo, and the interest in the business is the same to both places.

4 INTER 8.

That the other allegations of complaint relate to matters over which this defendant has no control.

THE KANSAS CITY, MEMPHIS & BIRMINGHAM RAILROAD,

Without waiving any insufficiency in complaint and insisting that the same does not show a breach of any legal duty that defendant should perform, answer:

Denies that it has ever carried freight for any of the complainants to or from Columbia, or that they have ever issued itself or in connection with other defendants rates to or from Columbia, and demands proof that it has ever discriminated against Columbia or violated the Interstate Commerce Law.

Admits that it is a common carrier, but not under a common control with defendants; that the only connection that is made is with the Louisville & Nashville Railroad, and the only tariff in which defendant is interested in the Tennessee rates over the Louisville & Nashville Railroad is Tariff Rate No. 718, April 22, 1891, and mailed to the Commission on April 8, 1891.

That as to the other allegations of complaint they constitute no charge against the defendant as it was not a participant in any of the rates or classifications therein mentioned.

THE JOINT ANSWER OF THE RICHMOND & DANVILLE RAILROAD AND THE GEORGIA PACIFIC RAILWAY

Denies that they have violated the Interstate Commerce Law.

Denies that they are common carriers under common control or management.

Allege that the complaint does not charge the defendants with violation of any kind that the Commission can investigate or cause these defendants to become parties to this action and asks that they be dismissed.

THE CENTRAL RAILROAD OF GEORGIA.

That the Louisville & Nashville Railroad Company being the initial line, that their answer shall be the answer of this defendant.

SALT LAKE CHAMBER OF COMMERCE, Petitioner, v.

THE UNION PACIFIC RAILWAY *et al.* Defendants.

(No. 338.)

ANSWERS OF DEFENDANTS.

THE SOUTHERN PACIFIC COMPANY

Admits they are common carriers.

Denies that the rates for transportation of freight from Missouri river points to Salt Lake City are unreasonable or unjust or in violation of the first section of the Act to Regulate Commerce, and alleges that the cost of the actual movement of freight does largely exceed one half of one cent per ton per mile and denies that the charges collected in any case is nine times, or in no case less than three times the cost of movement.

Denies that the rates from Missouri river points to San Francisco and Salt Lake City constitutes unjust discrimination or in violation of section four of the Act to Regulate Commerce, or gives a preference or advantage to the merchants of San Francisco in transportation of freight over the merchants of Salt Lake City.

Denies that the transportation of freight from Missouri river points to Salt Lake City are made under substantially similar circumstances and conditions as to San Francisco.

Denies that Salt Lake City is the largest or only important centre of trade between Denver and San Francisco.

Denies that the rates charged for transportation of freight are excessive or unlawful or in violation of the Act to Regulate Commerce.

THE UNION PACIFIC RAILWAY

Admits that complainants are a body corporate and for the purposes alleged.

Admits that they are common carriers, but not under a common control or management.

Denies that the rates are unreasonable or unjust and that the cost of transportation as alleged by complainants is true, and alleges that the cost does exceed one half of one cent per ton per mile.

Denies that freight transported from Missouri river points to Salt Lake City are under substantially similar circumstances and conditions as to San Francisco.

Admits that the distances mentioned in complaint between river points and Salt Lake City are correct and that it is the most important centre of trade on their line between Denver and San Francisco, but denies the fact of the favorable situation and natural advantages as a source of supply to the large surrounding country, and denies that the rates charged are in violation of the Act to Regulate Commerce.

Alleges that Salt Lake City is an inland city which does not enjoy the natural advantages afforded by being a sea port town and that San Francisco is situated practically upon the Pacific Ocean and, therefore, the circumstances and conditions are entirely dissimilar and the rates to San Francisco are controlled by the water competition and the rates to Salt Lake City are controlled only by rail lines and has not the benefits that would be derived if it had the water competition.

Denies that the rates to Salt Lake City from Missouri river points are unjust or unreasonable, or that they are a discrimination in favor of any city.

THE BURLINGTON & MISSOURI RIVER RAILROAD,

THE DENVER & RIO GRAND RAILROAD,

Denies that the rates for transportation of freight from Missouri river points to Salt Lake City are unreasonable or unjust.

That they do not participate in any traffic between San Francisco and Salt Lake City, which originates at or terminates in Salt Lake City.

Alleges that the cost of movement of freight over its line exceeds one half of one cent per ton per mile.

4 INTER 8.

Denies that it gives any undue advantage to the merchants of San Francisco against the merchants of Salt Lake City.

Denies that the circumstances and conditions affecting rates between Missouri river points and Salt Lake City are substantially similar to those of San Francisco; that the water competition regulates the rates to San Francisco and that Salt Lake City being an inland town, freight is transported by rail competition only, and that if defendants did not compete for the through business, the rates to Salt Lake City would have to be much higher than they now are.

THE RIO GRANDE WESTERN RAILWAY

Admits that complainants are a corporate body for the purposes alleged.

Admits they are common carriers, but not under common control or management.

Denies that the rates between Missouri river points and Salt Lake City are unjust or unreasonable.

Alleges that the cost of movement of freight exceeds one half of one cent per ton per mile, and that the charges collected are not over nine times, or not less than three times, the cost of movement.

Denies that they give to the merchants of San Francisco an undue advantage over those of Salt Lake City.

Denies that the conditions and circumstances of the transportation of freight to Salt Lake City are similar to those of San Francisco.

Alleges that the haul between Missouri river points and Salt Lake City over their line is 292 miles; that 100 miles is a desert with almost no local business, and the other part is over mountain ranges with steep grades, and that portions of its line which are tillable and settled districts are parallel to competing lines and the cost of maintaining and operating its line of road compared with the amount of traffic, is necessarily greater and requires higher rates to be reasonable than on roads with a large local traffic and light grades, and with the competition the rates are as low as can be made reasonable and compensatory.

That the water compensation controls the rates to San Francisco, and that Salt Lake City, being an inland city, does not enjoy the benefits derived by cities so situated where there is water competition.

That Salt Lake City merchants, have no market between said city and San Francisco which can be reached by San Francisco merchants, unless for a short distance on the Southern Pacific Railroad west from Ogden, and those points are 37 miles nearer Ogden than to Salt Lake City and the merchants ship from the east to Ogden and any difference in rates from said common points to Salt Lake City and San Francisco, would not equal the local rate back from San Francisco to any point which Salt Lake City merchants have a market.

THE ATCHISON, TOPEKA & SANTA FE RAILROAD,

THE CHICAGO, ROCK ISLAND & PACIFIC RAILWAY,

Admits they are common carriers.

Denies that the rates from Missouri river

points or San Francisco to Salt Lake City are unjust or unreasonable, or in violation of the Act to Regulate Commerce.

Alleges that the cost of transportation exceeds one half of one cent per ton per mile, or that it charges over nine times or not less than three times the cost of transportation of freight over its line.

Denies that the rates are discriminating against Salt Lake City in favor of San Francisco, or that they violate the 4th section of the Act to Regulate Commerce.

Denies that the transportation of freight from Missouri river points to Salt Lake City are under similar circumstances and conditions as to San Francisco, and freight transported for San Francisco over defendant's line does not pass through Salt Lake City.

JAMES & ABBOT
v.

CANADIAN PACIFIC R. CO., MAINE CENTRAL R. CO., BOSTON & MAINE R. CO.
(No. 834.)

ANSWER OF DEFENDANTS.

The defendants answering the complaint, admit they are common carriers. Admits that the rates named in the complaint on the 20th of February, 1892, were correct. That the rates now charged are as follows:

From Maine points.

Lumber, 15½ cents per 100 pounds.

Shingles, 26½ " " "

Province of New Brunswick points.

Lumber, 14½ cents per 100 pounds.

Shingles, 20 " " "

That the circumstances and conditions attending the traffic at the two groups of places, are substantially dissimilar as to value, volume and relation to other traffic over the same line of railway.

That the water competition exercises a controlling effect upon the rates of freight obtainable from Fredericton to Boston, but which does not exist at Fort Fairfield, Hurds Siding and Stevens Siding.

That the said Maine points are situated on a branch line and that the character and volume of the traffic on said branch line, and the cost of hauling said traffic and operating said branch line, render the rates now in force barely remunerative, and that any further reduction in said through rates would compel defendant, the Canadian Pacific Railway Company, to operate the said branch line, the Arnostook Railroad of Maine, as a local line.

Denies that the rates now in force from the circumstances are unjust or discriminating.

Denies that they have violated the Act to Regulate Commerce.

Denies that the complainants are entitled to any damages under the proceedings.

The complainants were informed of the change in the rates, and replied that they were not satisfied and demanded a hearing unless the rates on shingles from Fort Fairfield were reduced to 18½ or 19 cents per 100 pounds to Boston.

Complaint was then served.

4 INTER S.

F. FEARNLEY
v.

CENTRAL RAILROAD COMPANY OF NEW JERSEY
SEY et al.

(835.)

ANSWER OF DEFENDANTS.

THE CENTRAL RAILROAD OF NEW JERSEY.

Admits they are common carriers.

That in August, 1891, complainant shipped from Lebanon, N. J., to Buffalo, N. Y., six car loads of peaches on which freight was charged at 22 cents per basket, with a minimum number of baskets for each car of 500, and return the baskets free.

That the peaches were transported under a published rate given to the public, of which the agent at Lebanon had in his possession a copy.

Admits that the official classification of peaches are rated 1½ first class, and that it was by the regular freight trains that such shipments would be transported, but the special rate of 22 cents per basket is by special fast freight trains, which are fitted up at large expense and includes the cost of handling and returning the baskets free.

Denies that they have violated the Interstate Commerce law and prays that complaint be dismissed with costs.

THE DELAWARE, LACKAWANNA & WESTERN RAILROAD

Admits they are common carriers.

Admits that in August, 1891, they transported six cars of peaches for complainant Lebanon, N. J., to Buffalo, N. Y.

Denies that there was any overcharge in rate or weight.

The the official classification and tariff did not apply to shipments of peaches from points on Central Railroad of New Jersey, but were carried under a joint special tariff 28-51, dated July 15, 1887, issued by Central Railroad of New Jersey and took effect July 25, 1887, copy of which was filed with the Commission.

That the number of baskets reported to the railroad agent at Lebanon in the six cars was 3404 and on arrival at Buffalo 8556 baskets were found in the six cars and freight on the excess was charged for and collected.

Denies that they have violated the Interstate Commerce law and prays that complaint be dismissed.

E. J. DANIELS
v.

THE CHICAGO, ROCK ISLAND & PACIFIC RAILWAY COMPANY, THE BURLINGTON, CEDAR RAPIDS & NORTHERN RAILROAD COMPANY AND THE SIOUX CITY & NORTHERN RAILROAD COMPANY.

(No. 387.)

The complaint alleges:

That complainant is a merchant at Sioux Falls, South Dakota, engaged in shipment of interstate commerce from Duluth, Minnesota.

That defendants are common carriers under common control, management or arrangement for transportation of property from South Dakota and Iowa to points in Minnesota and are subject to the Act to Regulate Commerce.

That the rates from Duluth to Sioux Falls from September, 1890, to February 9, 1891, were the same as to Sioux City as follows:

September 29, 1890.

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
70.	58.	42.	28.	21.	23.	23.	18.	16.	15.

January 15, 1891.

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
75.	60.	42.	30.	25.	30.	25.	20.	17½.	16.

That on February 9, 1891, the rates were increased to Sioux Falls as follows:

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
81.	65.	45.	32.	27.	32.	27.	22.	19.	17.

That the distance to Sioux Falls is at least 72 miles less than to Sioux City over the same lines.

That the rates are unjust and unreasonable and a discrimination in favor of Sioux City against Sioux Falls.

That the rates are greater for a short than the long haul.

ANSWERS OF DEFENDANTS.

THE GREAT NORTHERN RAILWAY,

Admits they are common carriers.

Admits complainant is a merchant at Sioux Falls.

Admits that the rates stated in complaint are correct.

Admits that the distance from Duluth to Sioux Falls is 72 miles less than to Sioux City over defendants' line.

That the distance from Duluth to Sioux Falls by defendants' line and the Willman & Sioux Falls Railway is 844 miles.

Denies that the rates from Duluth or Lake Superior points to Sioux Falls are unreasonable or discriminating.

That the rates are the same as those made by the completing lines, and defendants must adopt the rates made by the Chicago lines or abandon the business.

THE SIOUX CITY & NORTHERN RAILROAD,

Admits they are common carriers.

That in connection with the Great Northern Railway it is enabled to engage in the transportation of freight and by the competing lines being the shortest route, the rate established by them has to be adopted to secure any of the business.

That the rates are not unreasonable or discriminating against Sioux Falls in favor of Sioux City.

4 INTER 5.

E. J. DANIELS

v.

THE GREAT NORTHERN RAILWAY COMPANY AND THE SIOUX CITY & NORTHERN RAILWAY COMPANY.

(No. 386.)

The complaint alleges:

That complainant is a merchant in Sioux Falls, South Dakota, and engaged in shipment of interstate commerce from Chicago.

That defendants are common carriers.

That the rates charged for transportation of freight from Chicago to Sioux Falls from September 22, 1890, to February 14, 1891, were the same as to Sioux City, to wit:

September 22, 1890.

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
70.	58.	42.	28.	21.	23.	23.	18.	16.	15.

January 1, 1891.

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
75.	60.	42.	30.	25.	30.	25.	20.	17½.	16.

That on February 14, 1891, the rates to Sioux Falls were increased and are now the same, to wit:

Classes.

1.	2.	3.	4.	5.	A.	B.	C.	D.	E.
81.	65.	45.	32.	27.	32.	27.	22.	19.	17.

That the distance to Sioux Falls is at least 50 miles less than to Sioux City over defendant's lines and a greater rate is charged for the short than the long haul.

That the rates now charged by defendants to Sioux Falls are unreasonable and unjust, and discriminating against Sioux Falls merchants in favor of other merchants of Sioux City, in violation of the Act to Regulate Commerce.

That defendants be required to answer complaint and an order be made commanding them to cease and desist from violating the Act to Regulate Commerce.

ANSWERS OF DEFENDANTS.

THE BURLINGTON, CEDAR RAPIDS & NORTHERN RAILWAY, and THE CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

Admits that complainant is a merchant located at Sioux Falls, South Dakota.

Admits that they are common carriers.

Admits that rates for transportation mentioned in complaint are correct.

Admits that the distance from Chicago to Sioux City by the lines of these defendants to the complaint is greater than to Sioux Falls than by the lines of the Chicago, Rock Island & Pacific Railway and the Burlington, Cedar Rapids & Northern Railway.

Denies that the rates are unjust or unreasonable and that they discriminate against Sioux Falls in favor of Sioux City, or that they have violated the Act to Regulate Commerce.

Alleges that the defendant's line or the Burlington, Cedar Rapids & Northern Railway reaches Sioux City; that the distance from Chicago to Sioux Falls *via* these lines is not included in the distance from Chicago, which is 622 miles; that from Lester, where the de-

defendant connects with the Burlington, Cedar Rapids & Northern Railway, it is 73 miles to Sioux City, while it is 24 miles to Sioux Falls.

That the rate to Sioux Falls and Sioux City is made by the short line, the same being to Sioux City 517 miles and to Sioux Falls 555 miles.

That the defendants' line being the longer line by 105 miles, to participate in the transportation of the freight from Chicago to Sioux City, the rates of the short line have to be adopted.

That the following are the distances:

Chicago to Sioux Falls *via* C. B. & Q. and B. C. R. & N. 555 miles.

Chicago to Sioux Falls *via* C. R. H. P. & B. C. R. & N. 573 miles.

Chicago to Sioux Falls *via* Illinois Central Railway 580 miles.

Chicago to Sioux Falls *via* C. M. & St. P. Railway 590 miles.

THE SIOUX CITY & NORTHERN RAILROAD

Admits they are common carriers.

Denies that the rates are unjust or unreasonable or that they discriminate against Sioux Falls in favor of Sioux City, and have violated the Act to Regulate Commerce.

Alleges that it has no line into Sioux Falls or out of Chicago.

That its western terminus is Sioux City and that there are three lines from Sioux City to Chicago, the Illinois Central, the Chicago, Milwaukee & St. Paul and the Chicago & Northwestern Railroad.

That the defendant connects at Lester, Iowa, with the Burlington, Cedar Rapids & Northern Railway and it connects with the Chicago, Rock Island & Pacific at West Liberty and by rail route to Sioux City defendants are enabled to ship goods from the east.

That the said mentioned roads from Chicago to Sioux City are shorter lines than defendants and have established rates and defendants have to adopt the same to engage in the transportation of the freight.

That Sioux City is much larger than Sioux Falls and that the freight transported to Sioux City is largely in excess of that to Sioux Falls.

That if defendants are compelled to reduce the rates from Chicago to Sioux Falls to the same as to Sioux City, they will be unable to compete for the business with the shorter and competing lines.

RE ILLINOIS STEEL COMPANY *et al.*

(ORDER.)

At a General Session of the Interstate Commerce Commission, held at its offices in the city of Washington, D. C., on the 14th day of June, A. D. 1892.

Present: Hon. William R. Morrison, Hon. Wheelock G. Veazey, Hon. Martin A. Knapp, Hon. James W. McDill, Hon. Judson C. Clements—*Commissioners.*

(No. 841.)

Whereas: Informal complaint has been made to the Interstate Commerce Commission, that

the Illinois Steel Company, a corporation created, chartered and existing under and by virtue of the laws of the state of Illinois, has caused to be incorporated under the laws of the state of Illinois, The Calumet & Blue Island Railway Company for the purpose of operating its switches and side tracks at South Chicago in the state of Illinois, and engaging in traffic by a continuous shipment from cities and places without the state of Illinois to cities and places within the state of Illinois in connection with the Baltimore & Ohio Railroad Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the Lake Shore & Michigan Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, the Pittsburgh, Fort Wayne & Chicago Railway Company, the Pennsylvania Company, the Pennsylvania Railroad Company and the Belt Railway Company of Chicago; and has also caused to be incorporated the Chicago & Southeastern Railway Company (of Illinois) under the laws of the state of Illinois for the purpose of operating its switches and side tracks at Chicago in the state of Illinois, and engaging in traffic by a continuous shipment from cities and places without the state of Illinois to cities and places within the state of Illinois in connection with the Chicago & Alton Railroad Company and the Chicago Railway Transfer Company; and has also caused to be incorporated the Joliet & Blue Island Railway Company under the laws of the state of Illinois for the purpose of operating its switches and side tracks at Joliet, Illinois, and engaging in traffic by a continuous shipment from cities and places without the state of Illinois to cities and places within the State of Illinois, in connection with the Chicago & Alton Railroad Company, the Atchison, Topeka & Santa Fé Railway Company, the Elgin, Joliet & Eastern Railway Company and the Chicago, Rock Island & Pacific Railway Company; and has also caused to be incorporated under the laws of the state of Illinois the Chicago & Kenosha Railway Company for the purpose of operating its switches and side tracks at Chicago aforesaid, and engaging in traffic by a continuous shipment from cities and places without the state of Illinois to cities and places within the state of Illinois, in connection with the Chicago & Northwestern Railway Company and the Chicago, Milwaukee & St. Paul Railway Company; and has also caused to be incorporated under the laws of the state of Wisconsin the Milwaukee, Bay View & Chicago Railroad Company for the purpose of operating its switches and side tracks at or near Milwaukee in the state of Wisconsin, and engaging in traffic by a continuous shipment from cities and places without the state of Wisconsin to cities and places within the state of Wisconsin in connection with the said Chicago, Milwaukee & St. Paul Railway Company and the Chicago & Northwestern Railway Company;

And Whereas: It is stated in said informal complaint that the said Illinois Steel Company owns and controls certain of the above-named companies, to wit, the Calumet & Blue Island Railway Company, the Chicago & Southeastern Railway Company, the Joliet & Blue Island

Railway Company, the Chicago & Kenosha Railway Company, the Milwaukee, Bay View & Chicago Railroad Company and operates the same in connection with the railroads of the other railroad companies hereinabove named, as a device for the purpose of evading the provisions of the Act to Regulate Commerce, and obtaining special illegal, unjust and unreasonable rates for the transportation of interstate traffic and operates the same by the connivance and consent of said other connecting railroad companies in such a manner as to give to the said Illinois Steel Company an illegal, undue and unreasonable preference and advantage and subjecting other persons, firms and companies to undue and unreasonable prejudice and disadvantage as to the transportation of property from divers cities and places without the states of Illinois and Wisconsin to divers cities and towns within those states and between those states;

And Whereas: It has been made to appear that the said railroad companies so owned, controlled and operated by the said Illinois Steel Company for more than six months last past have been and still are engaged in the transportation of property by railroad in connection with the other companies above named, under a common control, management or arrangement for a continuous carriage or shipment from divers cities and towns without the states of Illinois and Wisconsin, to divers cities and places within those states and between those states, and it appearing that none of the said railroad companies so owned, controlled and operated by the Illinois Steel Company have filed copies of their contracts, agreements and common arrangements with the said other companies, nor have they filed with the Interstate Commerce Commission tariffs or schedules of their rates, fares, and charges for the transportation of interstate business as required by the 6th section of the Act to Regulate Commerce;

And Whereas: The Interstate Commerce Commission, of its motion, has decided to investigate the said informal complaint by inquiring into the business of all said railroad companies, both those so owned, controlled and operated by the Illinois Steel Company and also said other railroad companies operated in connection therewith and the management thereof by all of such carriers with reference to the alleged making of illegal, unjust and unreasonable special rates and also as to the alleged unjust and illegal discrimination in favor of the Illinois Steel Company, as well as the failure on the part of said carriers to file their contracts, agreements or tariffs as required by law.

Therefore, it is hereby ordered, That the Calumet & Blue Island Railway Company, the Chicago & Southeastern Railway Company, the Joliet & Blue Island Railway Company, the Chicago & Kenosha Railway Company, the Milwaukee, Bay View & Chicago Railroad Company, the Baltimore & Ohio Railroad Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the Lake Shore & Michigan Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, the Pittsburg, Fort Wayne & Chicago Rail-

way Company, the Pennsylvania Company, the Pennsylvania Railroad Company, the Belt Railway Company of Chicago, the Chicago & Alton Railroad Company, the Chicago Railway Transfer Company, the Atchison, Topeka & Santa Fé Railroad Company, the Elgin, Joliet & Eastern Railway Company, the Chicago & Northwestern Railway Company and the Chicago, Milwaukee & St. Paul Railway Company on or before the 7th day of July, A. D. 1892, do severally make and file with the Secretary of the Interstate Commerce Commission, at its office in Washington, in the District of Columbia, a full, complete, perfect and specific verified answer setting forth all and singular the facts and circumstances in regard to the matters and things thereof complained against them as hereinbefore set forth, and particularly, the said railroad companies are required to state and make known in their said answers, as follows:

1. Does any traffic contract, agreement or arrangement in writing or otherwise exist between the companies above alleged to be under the control of and operated by the said Illinois Steel Company and any of the other companies with reference to interstate traffic? If so, state the contract, agreement or arrangement.

2. Are any tariffs of rates and charges for the transportation of interstate property in effect between said companies above alleged to be under the control of and operated by the Illinois Steel Company and said other railroad companies? If so, what are they and what are the divisions thereof between the several carriers.

3. Have the companies above alleged to be under the control of and operated by the Illinois Steel Company received interstate traffic from any of the other carriers above mentioned, during the six months last past, or have they delivered any such traffic to such other carriers during that time, for any person, firm or company, other than the Illinois Steel Company, and if so, to what amount.

And it is also hereby further ordered, That all of said companies appear before the Interstate Commerce Commission, at the office of the United States attorney, in the United States Postoffice building in Chicago aforesaid, at 10 o'clock in the forenoon on Wednesday the 18th day of July, A. D. 1892, when the said Interstate Commerce Commission will proceed to make inquiry and investigate into the management of the business aforesaid, by the carriers aforesaid.

RE CHICAGO & GRAND TRUNK RAILROAD COMPANY *et al.*

(Order.)

At a General Session of the Interstate Commerce Commission, held at its offices in the city of Washington, D. C., on the 18th day of June, A. D. 1892.

Present: Hon. William R. Morrison, Hon. Wheelock G. Veazey, Hon. Martin A. Knapp, Hon. James W. McDill, Hon. Judson C. Clements, *Commissioners*.

(No. 842.)

Whereas: It appears from Tariff No. 1129 filed by the Chicago & Grand Trunk Railway

Company on behalf of itself and the Cincinnati, Saginaw & Mackinaw Railroad Company and the Grand Trunk Railway Company of Canada, effective since June 18, 1892, that said railroad companies make a different and less charge for the transportation of all classes of property from Chicago and other western points to Montreal, Point Levi, Portland and Boston if said property is intended for transatlantic carriage than they make if said property is destined to the same points and not intended for export.

And, Whereas: Informal complaint has been made to the Interstate Commerce Commission that the aforesaid practices by said railroad companies subjects divers persons, companies, firms, corporations, localities and traffic to an undue and unreasonable prejudice and disadvantage.

And, Whereas: The Interstate Commerce Commission of its own motion has decided to investigate said informal complaints by inquiry into the business of said railroad companies with reference to the making of said alleged illegal, unjust and discriminative rates.

Therefore, it is hereby ordered, That the Chicago & Grand Trunk Railway Company, The Cincinnati, Saginaw & Mackinaw Railroad Company and the Grand Trunk Railway Company of Canada do severally make and file with the Secretary of the Interstate Commerce Commission on or before the 7th day of July, 1892, at its office in Washington, in the District of Columbia, specific and verified answers setting forth all and singular the facts and circumstances in regard to the matters and things thereof complained against them as hereinbefore set forth.

And it is also hereby further ordered, That all of said companies appear before the Interstate Commerce Commission, at the office of the United States attorney, in the United States Postoffice Building in Chicago aforesaid, at 10 o'clock in the forenoon on Wednesday the 18th day of July, A. D. 1892, when the said Interstate Commerce Commission will proceed to make inquiry into and investigate the management of the business aforesaid, by the carriers aforesaid.

In testimony whereof, etc.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF NEW YORK.

THE INTERSTATE COMMERCE COMMISSION

v.

THE TEXAS & PACIFIC RAILWAY CO.

Upon the petition of the Interstate Commerce Commission, filed in this court under the sixteenth section of the Act to Regulate Commerce, for the enforcement of its order requiring the defendant to cease and desist from carrying any article of imported traffic shipped from any foreign port upon through bills of lading to any place within the United States at any other than the same rates established by the inland tariff of the defendant for the carriage of other like kind of traffic, *Held*,

1. That the proceeding is not defective because the Southern Pacific Company, a connecting carrier participating with defendant in the carriage between certain points, was not made a party defendant herein. If the defendant is violating a

proper order of the Commission it should be restrained from doing so and it cannot escape upon the objection that another wrong-doer is also violating it.

2. The Interstate Commerce Act would be emasculated in its remedial efficacy, if not practically nullified, if a carrier can justify a discrimination in rates merely upon the ground that, unless it is given, the traffic obtained by giving it would go to a competing carrier. A shipper having a choice between competing carriers would only have to refuse to send his goods by one of them unless given exceptional rates to justify that one in making the discrimination in his favor on the ground of the necessity of the situation. The order prayed for in the petition is granted.

Decided October 5th, 1892.

For report and opinion of the Interstate Commerce Commission with reference to the previous steps in the case, see 8 Inters. Com. Rep. 417; see also *ante*, p. 62.

Edward Mitchell, U. S. District Attorney, *Simon Sterne* and *John D. Kernan*, for Commission.

John F. Dillon and *Winslow S. Pierce*, for defendant.

OPINION OF THE COURT.

Wallace, J.:

This is an application to enforce an order of the Interstate Commerce Commission, made January 29th, 1891, in a proceeding instituted by the New York Board of Trade and Trans-

portation. The petition in that proceeding complained of unjust discrimination made by various railway carriers. The defendant was duly notified of the complaint and appeared in the proceeding and submitted its rights. It was shown to the Commission, as appears by the findings of fact in their report, that the defendant, in conjunction with the Southern Pacific Company, made joint rates from New Orleans to San Francisco covering carriage of traffic by the rails of the defendant from New Orleans to El Paso and thence by the rails of the Southern Pacific Company to San Francisco; and also made joint rates with vessel owners in London and Liverpool covering carriage of traffic from those places to San Fran-

cisco *via* New Orleans. It was also shown that the ordinary tariff rates charged by the two companies upon traffic delivered to the defendant at New Orleans and shipped at New York, Chicago and other places in this country for carriage from New Orleans to San Francisco, were somewhat more than double the rates charged for carriage of similar traffic sent from Liverpool or London by through bills of lading to San Francisco *via* New Orleans. To illustrate, it was shown that the rates made by the two companies in conjunction with Liverpool vessel owners, by through bills of lading from Liverpool to San Francisco by the rails of the defendant from New Orleans to El Paso, were, per hundred pounds on books, on carpets and on cutlery, \$1.07, while the regular tariff rates of the two companies upon the articles when sent to New Orleans from other places in this country were, per hundred pounds, on books, \$2.64, on carpets, \$2.88, and on cutlery, \$3.26, and that the rates on these articles when shipped from Liverpool were 80 cents per hundred pounds for carriage from New Orleans to San Francisco. The defendant contended that it was justified in making the discrimination between the foreign and domestic traffic because owing to the competition of sailing vessels and foreign carriers between Liverpool and San Francisco it could not get any appreciable amount of foreign traffic without meeting the competitive rates by making the rates given. The Commission while conceding the facts to be as asserted by the defendant ruled against the validity of the excuse and made an order which in substance required the defendant to desist from carrying any article of imported traffic shipped from any foreign port upon through bills of lading destined to any place within the United States at any other than the same rates established by the inland tariff of the defendant for the carriage of other like kind of traffic. It is admitted by the answer of the defendant that since the order of the Commission was made it has maintained a substantially similar disparity in its transportation rates for these articles as well as in those for the transportation of numerous other articles depending upon the foreign or domestic origin of the shipment. The defendant insists that its action in this regard is not prohibited by the provisions of the Interstate Commerce Act, and that as it has not been guilty of any unjust discrimination within the meaning of that Act, the order of the Commission ought not to be enforced. It also insists that the proceeding is defective because the Southern Pacific Company is not made a party to the defense. If the order made by the Commission was a lawful one I see no reason why the defendant should not be compelled to obey it, notwithstanding the Southern Pacific Railway Company is not at present pursued. If the defendant is violating a proper order of the Commission it should be restrained from doing so and it cannot escape upon the objection that another wrong-doer is also violating it. The real question, as it seems to me, is whether the existence of the peculiar facts which were relied upon before the Commission by the defendant as an excuse for its discrimination, justifies its conduct.

4 LYNN S.

It must be conceded as true, for the purposes of the present case, that the rates for the transportation of traffic from Liverpool and London to San Francisco are in effect fixed and controlled by the competition of sailing vessels between those ports and also by the competition of steamships and sailing vessels in connection with railroads across the Isthmus of Panama, none of which are in any respect subject to the Act to Regulate Commerce. It must also be conceded that the favorable rates given to the foreign traffic are, for reasons to which it is now unnecessary to advert, somewhat remunerative to the defendant; and it must also be conceded that the defendant would lose the foreign traffic by reason of the competition referred to and the revenue derived therefrom unless it carries it at the lower rates and by doing so it is enabled to get a part of it which would otherwise go from London and Liverpool to San Francisco around the Horn or by the Isthmus of Panama. The case presents a question of much interest and importance to the defendant and carriers similarly situated, and also to our own merchants and manufacturers who in supplying the wants of consumers at places within the United States, have to meet the competition of foreign merchants and manufacturers and are placed at a serious disadvantage if they are compelled by the railway carriers to pay higher rates of transportation upon their goods. The question does not, however, seem to be such a doubtful one as to require more than a brief statement of the conclusions reached. The second section of the Interstate Commerce Act prohibits unjust discrimination and declares that the common carrier charging a greater or less compensation for any service rendered in the transportation of passengers or property than it charges any other person for doing a like and contemporaneous service in the transportation of a "like kind of traffic under substantially similar circumstances and conditions," shall be deemed guilty of unjust discrimination. The third section provides that it shall be unlawful for the carrier to make or give any undue or unreasonable preference or advantage to any particular person, locality, or particular description of traffic in any respect whatsoever, or to subject any particular person or locality or any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. The third section is substantially taken from the second section of the English Act of Parliament known as the Railway and Canal Traffic Act of 1854.

Either section is sufficiently comprehensive in its terms to prohibit an interstate carrier from making an unfair discrimination between different shippers in charges for a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions. But neither section is intended to prohibit all discriminations or preferences. In considering whether an undue discrimination has been made, the fair interests of the carrier are to be taken into account, and although lower rates are given to one shipper or class of shippers than to another for carrying the same kind of traffic, the latter have no just ground of com-

plaint of unjust discrimination if the conditions of the service enable the carrier to take the traffic of the former at a less cost; nor is the discrimination unjust if made conformably to some agreement by which the favored shipper gives the carrier an adequate consideration for the reduced rates. Upon this principle it was decided not to be an unjust preference under the English Act for a railway company to carry at a lower rate, in consideration of a guarantee of large quantities and full train loads at regular periods, provided the real object of the Company was to obtain thereby a greater remunerative profit by the diminished cost of carriage, although the effect might be to exclude from the lower rate those shippers who could not give such guarantee. *Nicholson v. Great Western R. Co.* 4 C. B. N. S. 886. The discrimination between different shippers is a lawful one if it is such as the carrier may fairly give because of the difference in cost, expense or the exceptional character of the service. *United States v. Delaware, L. & W. R. Co.* 2 Inters. Com. Rep. 617, 40 Fed. Rep. 101.

Prior to the enactment of the Interstate Commerce Act the courts were of the opinion that discriminations by railway carriers in the rates of freight charged to shippers based solely on the ground of the quantity of freight shipped, without reference to any conditions, tending to decrease the cost of transportation, were contrary to sound public policy and inconsistent with the obligations of such carriers to the public. *Hays v. Pennsylvania Co.* 12 Fed. Rep. 309; *Burlington, C. R. & N. R. Co. v. Northwestern Fuel Co.* 81 Fed. Rep. 652.

It might well be that shippers would be induced to increase their traffic with a carrier by the offer of such discrimination, perhaps by withdrawing part of it from a rival carrier, perhaps by stimulating the shipper to enlarge his business operations and thus the discrim-

ination might be profitable to the carrier. The English courts, in cases arising under the English Traffic Act, have held that preferences given to particular shippers to induce them not to divert traffic from the carrier or to induce them to transfer traffic to one carrier which otherwise would go to another carrier, are unlawful and cannot be justified on the ground of profit to the carrier allowing them. *Harrison v. Cockermouth & Warrington R. Co.* 3 C. B. N. S. 698; *Evershed v. London & N. W. R. Co.* L. R. 2 Q. B. Div. 254.

In the first of these cases the judges in opinion pointed out that if they were to justify a discrimination upon such reasons a railway company might in any case grant a preference to one person over another, provided it acted *bona fide* in the belief that such a course would be to its advantage. In the second case the court in pronouncing against the validity of the justification used this language:

"We think that a railway company cannot, merely for the sake of increasing their traffic, reduce their rates in favor of individual customers, unless at all events there is a sufficient consideration for the reduction which shall lessen the cost to the company of the conveyance of their traffic or some other equivalent or other services are rendered to them by such individual in relation to such traffic."

The Interstate Commerce Act would be emasculated in its remedial efficacy, if not practically nullified, if a carrier can justify a discrimination in rates merely upon the ground that unless it is given the traffic obtained by giving it would go to the competing carrier. A shipper having a choice between competing carriers would only have to refuse to send his goods by one of them unless given exceptional rates to justify that one in making the discrimination in his favor on the ground of the necessity of the situation.

The order is granted.

THE NEW YORK & NORTHERN RAILWAY COMPANY

v.

THE NEW YORK & NEW ENGLAND RAILROAD COMPANY.

Upon the petition of the New York & Northern Railway Company, filed in this court under the 16th section of the Act to Regulate Commerce, for the enforcement of an order of the Interstate Commerce Commission requiring the defendant, under the third section of said Act, to cease and desist from discriminating in facilities and rates between petitioner and another connecting line, *Held,*

1. The motion to dismiss must be determined upon the assumption that the averments of the petition and the findings of fact of the Commission (made by the statute *prima facie* evidence) correctly set forth the matters therein stated.
2. Neither the case before the Commission, nor its decision therein, was confined to the question of discrimination in rates and charges, and the requirement in the order to cease and desist from refusing to interchange traffic was proper.
3. The respondent has restored the joint through tariff and desisted from refusing to accept freight on through bills, but has so arranged the running

of its trains that the facilities for interchange, forwarding and delivering are (as is alleged) substantially no better than before, and not equal to those afforded to the competing lines; and respondent contends that because no question of the hours of running trains was presented to the Commission its acts in that respect may not be shown before this court, acting summarily under section 16 of said Act. To refuse altogether to receive traffic from one connecting line; to receive it only under arrangements which impose such obligations upon the shippers as to transfer and rebilling as would make the transaction of the business impracticable in competition with a more favored line; to receive it without reshipment and transfer indeed, but to systematically neglect to forward it; to receive and forward it, but to so arrange the hours or manner of delivery as to deprive it of facilities equal to those afforded to traffic coming from the competitor; these and a great variety of other devices which might be suggested, while differing some in detail, are

in substance practically the same. To require petitioner to bring a new proceeding each time the ingenuity of the offending carrier may devise some slight variation of the methods by the means of which its violation of the statute is persisted in, would be to fritter away the system of procedure provided in the statute to secure obedience to its requirements. The order of the Commission was no broader than the petition and proofs before them warranted; and this court may properly investigate the charge that respondent is disobeying the requirements of such order by acts and omissions in substance the same as those considered by the Commission, directed to the same end, and accomplishing precisely the same result.

4. There is nothing in the Act which makes mere distance between connecting points, whether a furlong, a mile, or ten or twenty, controlling of the question of discrimination in facilities to connecting lines. In the face of the finding of the Commission that "the physical conditions for interchange of traffic with both the connecting lines are suitable, adequate, and *substantially equal*," the requirements of the second clause of the third section seem to be plainly applicable. Until such finding is questioned, and the record

in this court completed, further discussion of this point is unnecessary.

5. The only link between respondent and its favored connecting line is such community of interest as springs from the existence of the contract for the interchange of traffic. If it be that such a contract makes each line a mere continuation or extension of the other, it is hard to conceive how a case of refusing equal facilities could ever be made out. The very granting of superior facilities to one line would make it a part of the one that favored it, and no longer a connecting road, when compared with its unsuccessful rival.

6. The "arrangements" between the respondent, the Housatonic road, and the New England Terminal Company, are such that they form a combination of carriers, within the meaning and effect of section 1, so as to make them a legal unit within the provisions of the Act, and, as such, jointly responsible for affording equal facilities in proper cases to competing lines connecting with such combined continuous lines. But, besides the duty which any one of these corporations may owe, jointly with the others, it is not relieved from its obligations under the Act to all roads which connect directly with itself.

Decided May 31, 1898.

For report and opinion of the Interstate Commerce Commission, with reference to previous steps in the case, see 3 Inters. Com. Rep. 542.

Lacombe, Circuit Judge:

This is an application on petition of the New York & Northern Railway Company, as a person interested, to enforce obedience to an order or requirement made May 6, 1891, by the Interstate Commerce Commission, and is presented under section sixteen of the Interstate Commerce Act as amended by chapter 382 of the Laws of 1889. Upon the return day of the order to show cause, heretofore granted, defendant filed its answer, and before any proofs were taken moved to dismiss the petition. Such a motion must be determined upon the assumption that the averments of the petition and the findings of fact of the Commission (made by the statute *prima facie* evidence) correctly set forth the matters therein stated. It seems undesirable at this stage of the case to summarize generally the facts thus assumed to be true, as subsequent evidence taken in this court may modify such assumptions.

The section invoked by the petitioner upon its application to the Commission reads as follows:—

"SECTION 8. That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic in any respect whatsoever or to subject any particular person, company, firm, corporation, or locality, or any particular description of

traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

"Every common carrier, subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines and for the receiving, forwarding and delivery of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines.

"But this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

Section 18 provides that any person (or) corporation . . . complaining of anything done or omitted to be done by any common carrier subject to the provisions of this Act, in contravention of the provisions thereof may apply to the Commission by petition, which shall briefly state the facts. Under that section this petitioner applied to the Commission, and, after taking proofs, obtained the order or requirement it is now seeking to enforce.

The respondent contends that the second clause of section 8, above quoted, enacts two different and independent subjects as grounds of complaint against carriers, the one being the denying the reasonable, proper and equal facilities for the physical interchange and prosecution of traffic between a company's line and connecting lines, the other being discrimination in respect to rates and charges between such connecting lines. A similar construction is adopted in the opinion of the Commission, which holds that the provision "embraces the imposition of an affirmative

duty to interchange and forward traffic between connecting lines and a prohibition that there shall be no discrimination in rates and charges between such connecting lines." Respondent further contends that the charge and allegations before the Commission dealt only with one of these subjects, and that therefore any order of the Commission requiring the respondent to cease and desist from any violation which is embraced within the other subject would not be a "lawful" order, and apparently also insists that the judgment of the Commission was in fact confined to discrimination in rates and charges. An examination of the record, however, does not support this contention. The petition which was presented to the Commission charged that the respondent was depriving petitioner of reasonable, proper, and equal facilities (as compared with those afforded to the Houstonian Railroad, a competing connecting line) for the interchange of traffic between the petitioner and complainant and for the receiving, forwarding, and delivery of property to and from the line of said petitioner and the line of the respondent. In support of such charge it averred not only a discrimination in rates and the withdrawal of a joint through tariff, which had been theretofore in force and operative between the parties, but also that respondent had threatened to close the through route *via* petitioner's line altogether and had refused to accept freight at all on through bills, thus compelling shippers to attend at Brewster's, the point of connection, to transfer and rebill their goods. This was plainly a charge not only of a discrimination in rates, but of a failure to discharge the affirmative duty, to interchange and forward traffic with the equal facilities required by the first subdivision of the second clause of the third section above quoted. The petition prayed for an order directing the respondent to grant equal facilities for the interchange of traffic and for the receiving, forwarding, and delivering of property to and from the line of petitioner and that of respondent as were here afforded to the Houstonian Railroad. The Commission found that there had been a refusal to afford facilities for the interchange of interstate traffic and the receiving, forwarding and delivering of the same, reasonable, proper, and equal to the facilities afforded to the other connecting road; that the respondent was "guilty of the discrimination charged in the complaint, in its rates and charges for the interchange of interstate traffic, and in the arrangements it makes for through lines for the freight traffic."

And the order or requirement of the Commission commanded the respondent to desist from discriminating against petitioner, (1) by refusing to make such arrangements with or afford such facilities to the petitioner for the interchange at the point of connection of interstate traffic and for the receiving, forwarding, and delivering of such traffic as are reasonable and proper and equal to arrangements made or facilities afforded by it for interchange between respondent's line and the other connecting roads, and also (2) from discriminating in respect to rates and charges, etc.

4 INTER S.

The decision of the Commission manifestly disposed of both subjects of complaint, and it seems quite plain from the record that both subjects were before them.

Since the service of the order the respondent has restored the joint through tariff. It has also desisted from refusing to accept freight on through bills, but has so arranged the running of its trains that the facilities for interchange, forwarding, and delivering are (as is alleged) substantially no better than before, and not equal to those afforded to the competing line. The respondent contends, however, that such acts may not be shown before this court, acting summarily under section 16 in review and enforcement of the order of the Commission, because no question of the hours of running trains was presented to the Commission. It is manifest that equal facilities may be refused quite as much in one way as in the other, and both grounds of complaint relate to the subject-matter of physical interchange and prosecution of traffic instead of to a discrimination in rates. To refuse altogether to receive traffic from one connecting line; to receive it only under arrangements which impose such obligations upon the shippers as to transfer and rebilling as would make the transaction of the business impracticable in competition with a more favored line; to receive it without reshipment and transfer indeed, but to systematically neglect to forward it; to receive and forward it, but to so arrange the hours or manner of its delivery as to deprive it of facilities equal to those afforded to traffic coming from the competitor—these, and a great variety of other devices which might be suggested, while differing somewhat in detail, are in substance practically the same. Any one of them, if satisfactorily proved, may justify the conclusion that a common carrier subject to the provisions of the Act is deliberately refusing to "afford all reasonable, proper, and equal facilities for the interchange of traffic" with a connecting line which the statute makes it his affirmative duty to afford; and there seems no good reason for holding that the order of the Commission should not be as broad as the conclusion directing the carrier to "cease, desist, and thenceforth abstain" from refusing to afford such facilities, when such refusal was the offense charged and proved. To require petitioner to begin a new proceeding each time the ingenuity of the offending carrier may devise some slight variation of the methods by means of which such refusal is persisted in would be to fritter away the system of procedure provided in the statute to secure obedience to its requirements.

It must be held therefore upon this motion, assuming the facts to be as stated, that the order made by the Commission was no broader than the petition and proofs before them warranted; and that this court may properly investigate the charge that respondent is disobeying the requirements of such orders by acts and omissions in substance the same as those considered by the Commission, directed to the same end and accomplishing precisely the same result.

The consideration of the next objection, viz: that the point where the respondent exchanges traffic with the petitioner is sixteen

miles from the point where it exchanges traffic with the competing road, and that it cannot be required to furnish equal facilities to all roads at different places, may be postponed till the proofs are closed. No doubt, as respondent contends, the question of the existence of discrimination and of an actionable refusal of equal facilities is to be ascertained by applying all the considerations of equity affecting the case and should be found to exist only when such facilities can be afforded "under substantially similar circumstances and conditions;" but there is nothing in the Act which makes mere distance between connecting points, whether a furlong, a mile, or ten or twenty, controlling of that question. There is no suggestion here of affording new facilities at a new connecting point; so far as the record shows, the affording of equal facilities to both connecting roads at their several points of connection has been at all times entirely practicable, easy, and convenient, and the existing equality was destroyed by the defendant solely to divert the business of petitioner to a more favored road. In the face of the finding of the Commission that "the physical condition for interchanging of traffic with both the connecting lines are suitable, adequate, and substantially equal—a finding which the form of this motion leaves unchallenged—the requirements of the second clause of the third section seem to be plainly applicable. Until this finding of fact is questioned and the record upon which the case made in this court is to be finally determined is completed, further discussion of this point would be a waste of time.

It is further contended that there is no question here of equal facilities to two connecting lines; that what the petitioner is really asking is that the New England Company shall extend to petitioner's line the same facilities which it extends to its own line. The facts do not seem to warrant such a contention. The Housatonic Company is a separate corporation, independent from the New England Company; the latter, so far as appears, does not own even a share of the former's stock; it neither built nor bought nor leased it; it neither conducts its business nor takes the earnings therefrom. The only link between them is such community of interest as springs from the existence of the contract for the interchange of traffic, which it is claimed secures the former road unequal facilities. If it be that such a contract makes each line a mere continuation or extension of

4 INTER 8.

the other, it is hard to conceive how a case of refusing equal facilities could ever be made out. The very granting of superior facilities to one line would make it a part of the one that favored it, and no longer a connecting road, when compared with its unsuccessful rival. Nor am I able to see that the mere ownership of half the stock of the Terminal Company, which connects the terminus of the Housatonic road with New York, alters the situation in any way, when the immediate question is as to the respective facilities accorded to the Housatonic Railroad and to the petitioner. Respondent cites the first section of the Act, providing that it shall "apply to any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad or partly by railroad and partly by water, when both are used under a common control, management or arrangement for a continuous carriage or shipment from one state, etc., to any other state," etc. That the respondent (considered by itself) is so engaged is not disputed; it runs through or into the states of Massachusetts, Rhode Island, Connecticut, and New York. It is no doubt true that the arrangements between respondent, the Housatonic road, and the Terminal Company are such that they form a combination of carriers within the meaning and effect of section one, so as to make them a legal unit within the provisions of the Act, and as such jointly responsible for affording equal facilities in proper cases to competing lines connecting with such combined continuous line; but, besides the duty which any one of these corporations may owe, jointly with the others, it is not relieved from its obligations under the Act to all roads which connect directly with itself. The New England railroad might perhaps by reason of its combination with the other two be charged with some duty towards lines connecting physically with the Housatonic Railroad, but such combination cannot excuse it from fulfilling its own obligations to roads which connect physically with itself, unless its union with the other combined lines is of such a character that their lines have become its own; and such a state of affairs does not seem to exist here.

The motion to dismiss the petition is therefore denied.

Counsel may arrange for a trial of the issues immediately upon the adjournment of the present jury session.

(No. 814-817, 324-326.)

THE FOURTH section of the Act to Regulate Commerce.

Complaints in Nos. 314, 315, 316 and 317 filed October 22, 1891.—Answers filed November 9, 1891, to January 18, 1892.—Also on March 25, 1892.—Complaints in Nos. 324, 325 and 326 filed January 20, 1892.—Answers filed February 15 to March 25, 1892.—Hearing at Atlanta, Ga., March 24, 25, 1892.—Briefs filed, July 1 to Aug. 24, 1892.—Decided November 11, 1892.

1. The fact of a receivership for a defendant carrier subsequent to complaint should not interfere with the progress of a proceeding brought merely for the purpose of railway regulation.
2. The phrase "common control, management or arrangement for continuous carriage or shipment" in the first section of the Act to Regulate Commerce was intended to cover all interstate traffic carried through over all rail or part water and part rail lines. The receipt successively by two or more carriers for transportation of traffic shipped under through bills for continuous carriage over their lines is assent to a common arrangement for such continuous carriage or shipment and previous formal arrangement between them is not necessary to bring such transportation under the terms of the law.
3. The total rate for through carriage over two or more lines, whether made by the addition of established locals, or of through and local rates, or upon a less proportionate basis, is the through rate that is subject to scrutiny by the regulating authority; how the rate is made is only material as bearing upon the legality of the aggregate charge, and how any reduction may be accomplished is matter for the carriers to determine among themselves.
4. The second, third and fourth sections of the Act to Regulate Commerce compared with provisions in English statutes. English decisions examined, and the frequent citation of such decisions to influence cases brought under greatly dissimilar statutory
- 4 INTER 8.
- provisions in this country, without regard to differences in facts, time, extent of country and methods of trade and transportation, considered and criticised.
5. The fourth section of the Act to Regulate Commerce construed, and the principles laid down in *Re Petitions of Louisville & Nashville R. Co.*, 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 31, reaffirmed, except the ruling therein whereby carriers were permitted to judge for themselves in the first instance of what constitutes "rare and peculiar cases of competition between railroads which are subject to the statute, when a strict application of the general rule of the statute would be destructive of legitimate competition," which is hereby overruled.
6. The competition of carriers subject to the Act to Regulate Commerce does not create circumstances and conditions which the carriers can take into account in determining for themselves in the first instance whether they are justified under the fourth section in charging more for shorter than for longer distances over their lines.
7. The competition of markets on different lines for the sale of commodities at a given point served by both lines does not create circumstances and conditions which the carriers can take into account in determining for themselves in the first instance whether they are justified under the fourth section in charging more for shorter than for longer distances over their lines. To determine the force and effect of such competition involves consideration of commercial questions pecu

- liar to the business of shippers, such as advantage of business location, comparative economy of production, comparative quality and market value of commodities, all of which are entirely disconnected from circumstances and conditions under which transportation is conducted. Carriers cannot create abnormal situations by making rates which equalize advantages and disadvantages of localities and thereupon claim justification for greater charges on shorter hauls on the ground that the lesser long haul charges which accomplish such equalization are necessary to secure increase in traffic over their lines.
8. The carrier has the right to judge in the first instance whether it is justified in making the greater charge for the shorter distance under the fourth section in all cases where the circumstances and conditions arise wholly upon its own line or through competition for the same traffic with carriers not subject to regulation under the Act to Regulate Commerce. In other cases under the fourth section the circumstances and conditions are not presumptively dissimilar and carriers must not charge less for the longer distance except upon the order of this Commission.
9. When a carrier on complaint under the fourth section avers substantial dissimilarity in circumstances and conditions as justifying its greater charge for shorter hauls, it is concluded by its pleading and must affirmatively show that the circumstances and conditions of which it is entitled to judge in the first instance are in fact substantially dissimilar; but upon an application for relief under the fourth section proviso the carrier is not limited by such a rule of evidence, and may present to the Commission every material reason for an order in its favor. There seems to be no limitation upon the power of the Commission to grant relief under that proviso when, after investigation, the Commission is satisfied that the interests of commerce and common fairness to the carriers require that an exception should be made.
10. Complaints in cases No. 324 and No. 325 dismissed. In cases Nos. 314, 315, 316, 317 and 326, defendants ordered to cease and desist from charging more to shorter than to longer distance points mentioned in the complaints, or file applications for relief under the proviso clause of the fourth section and show cause thereon, within a time specified.

REPORT AND OPINION OF THE COMMISSION.

Veasey, Commissioner :

The complaints in the above entitled cases, brought by the members and in the name of the Railroad Commission of the state of Georgia, allege that rates charged by the defendants for the transportation of freights from Cincinnati and other Ohio river points and from New York and other North Atlantic ports to various named places, nearly all within the state of Georgia, are "unreasonable, discriminating and in direct violation of section four of the Act to Regulate Commerce."

The violations of law alleged in the several

complaints being of the same general character, differing only as to points and routes, it was understood at the hearing that the testimony taken in each case would be considered in the others so far as applicable, and it is proper, therefore, that all these cases should be embraced in the same decision.

The main question presented by the pleadings is whether charges which are greater for shorter than for longer distances in the same direction over the defendant lines are unlawful under the statute.

The defendants in their answers deny that transportation to the longer and shorter dis-

tance points is under substantially similar circumstances and conditions, and that therefore the greater charges for shorter distances complained of do not contravene the provisions of the Act to Regulate Commerce. The principal grounds on which this denial is based are the competition of all rail and part rail and part water lines from the same point of consignment to the same point of destination; the competition of all rail and part rail and part water lines from different points of consignment to the same destination; and the influence of water routes which either reach the point of destination direct, or deliver to a connecting carrier at a point in the same territory.

Still another ground of defense was set up in some of the cases, that property destined to intermediate points is not carried under circumstances and conditions substantially similar to those applying at the longer distance points because through rates are given only to the latter, while rates to the shorter distance points are made up of a through rate in effect to a basing point plus local rates of the terminal carrier therefrom.

There are, however, two minor questions to be considered: 1. Is the complainant authorized to bring and maintain these proceedings? 2. Are certain of the defendants common carriers over the line between points mentioned?

The Georgia Railroad Commission, complainant herein, is directed by a statute of the state of Georgia to bring complaint before this Commission whenever, after failure to obtain a satisfactory adjustment of rates, it finds through rates charged into Georgia to be excessive, unreasonable or discriminating, and by section thirteen of the Act to Regulate Commerce, this Commission is directed to investigate any complaint forwarded by the Railroad Commission of any state or territory. It is immaterial whether the complainant be the state Railroad Commission itself, or the parties on whose behalf it requests the investigation to be made. The Georgia Railroad Commission is a proper complainant in these proceedings.

As to the second of the minor questions, whether certain of the defendants, to wit, the Georgia Railroad & Banking Company, the Central Railroad & Banking Company, the Georgia Pacific Railway Company, and the Richmond & Danville Railroad Company, are common carriers controlling rates and operating roads parts of through lines between points of shipment and destination, it seems sufficient to hold generally that only those defendants who are in any degree responsible for transportation charges over the respective roads will be expected to comply with any order for the re-adjustment of those charges which may hereafter be issued in these proceedings.

It was claimed on the hearing that the defendant, the Central Railroad & Banking Company of Georgia, was then in the hands of receivers, and not properly before the Commission. That Company was served with a copy of each complaint in which it was interested and before the receivers assumed control of its affairs; answers were filed on its behalf, and the receivers afterwards appointed were represented by counsel at the hearing. Under these facts the proceedings may well go on without a present determination whether a regulating order in the case would affect the receivers without an order of the court which appointed them. As a general proposition we see no reason why the fact of a receivership subsequent to complaint should interfere with the progress of a proceeding brought merely for the purpose of railway regulation.

Another question in the cases is whether the transportation of property over the roads composing the respective through lines to the intermediate points is conducted under a common control, management, or arrangement for continuous carriage or shipment, but this question is raised by the defendants in connection with the main point in controversy, and should not be determined until after the facts in the cases are found and stated.

In view of the fact that the issues present mainly a single question of violation of the fourth section, the decision of which will also involve the disposition of the subsidiary matters of unreasonable and discriminating rates alleged and denied herein, it seems unnecessary to further analyze the pleadings. The respective routes, points and rates involved in the several cases are described in the following statement of facts, rates to points termed shorter distance points being those of which complaint is made. The cases will, with a single exception, be taken up in the order in which they were heard.

FACTS.

Case No. 317.

1. In this case the route is all rail from Cincinnati or other places called "Ohio river points" over either the Cincinnati, New Orleans & Texas Pacific Railway to Chattanooga or Boyce, near Chattanooga, or the Louisville & Nashville Railroad to Nashville, and the Nashville, Chattanooga & St. Louis Railway to Chattanooga, and from Boyce or Chattanooga by the Western & Atlantic Railroad, operated under lease from the state of Georgia by the Nashville, Chattanooga & St. Louis Railway Company, to Calhoun, Adairsville, Kingston, Cartersville, Acworth and Marietta, shorter distance points, and Atlanta, the longer distance point, all in the state of Georgia. This route will be designated "The Chatta-

nooga-Atlanta All-Rail Route," and is shown below:

THE CHATTANOOGA-ATLANTA ALL-RAIL ROUTE.

Freight is carried from Cincinnati over this route to the various destinations on the Western & Atlantic road as through shipments under through bills of lading issued by the initial line. Through freight is delivered free to consignees in Atlanta either by carting or switching to warehouse doors; no free delivery is made at the local stations on the Western & Atlantic.

2. Rates to Atlanta on property shipped from north of Chattanooga are divided between the carriers in certain proportions, but charges to all points north of Atlanta and south of Chattanooga are combinations of established rates to Chattanooga and local rates of the Western & Atlantic from Chattanooga. In 1887, the Western & Atlantic issued a circular to its connections stating in effect that it would not accept less than its regular local charges on through business to points on its line where competition did not compel it to participate in and agree to lower through rates. This circular does not appear to have been 4 INTER 8.

filed with the Commission, nor were the defendants able to produce it at the hearing, but there is no reason to doubt its having been issued.

When the circular was issued this road was under another management, but the lessee now operating the road introduced evidence concerning the circular and continues to charge according to its terms.

Rates and distances over the Chattanooga-Atlanta route from Cincinnati are shown by the following table. Rates to Chattanooga and Atlanta are single rates, while those to the other points are combination rates to Chattanooga and locals therefrom.

Statement Showing Class Rates from Cincinnati to the Following Stations on the Western & Atlantic R. R.

Miles	From Cincinnati, O. To	1.	2.	3.	4.	5.	6.	A	B	C	D	E	H	F.

463	Vinings, Ga.	123	106	94	78	65	51	36	43	33	29	57	63	59
74	Atlanta, Ga.	107	92	81	68	56	46	28	35	28	24	48	53	48

The local rates and distances over the Western & Atlantic from Chattanooga and intermediate points are as follows:

Statement Showing Class Rates from Chattanooga to Local Stations on the Western & Atlantic R. R.

Miles	From Chattanooga To	1.	2.	3.	4.	5.	6.	A	B	C	D	E	H	F.
23	Ringgold, Ga.	22	20	18	16	13	11	11	11	7	6	13	16	15
38	Dalton, Ga.	27	24	22	20	16	12	12	12	8	7	16	20	16
60	Calhoun, Ga.	33	30	27	24	19	14	14	14	9	8	19	24	18
60	Adairsville, Ga.	36	33	29	26	20	15	15	15	9	9	20	26	19
70	Kingston, Ga.	39	36	31	28	21	16	16	16	10	9	21	28	20
90	Cartersville, Ga.	42	38	33	29	22	17	17	17	11	10	22	29	21
103	Acworth, Ga.	48	42	37	31	24	19	19	19	12	11	24	31	23
117	Marietta, Ga.	51	44	39	32	25	20	20	20	13	12	25	32	24
127	Vinings, Ga.	54	46	41	33	26	21	21	21	13	12	26	33	25
138	Atlanta, Ga.	57	48	43	34	27	22	22	22	12	11	27	34	24

The proportions received by the carriers of the rate from Cincinnati to Atlanta were not testified to, but the Commission is informed that the following divisions were in effect some time ago:

C. N. O. & T. P. to Chattanooga, 386 miles	70	9-10	per cent.
W. & A. to Atlanta, 128 miles	20	1-10	" "
	474	100	

Out of the rate of \$1.07 first class, this would

give to the C. N. O. & T. P. about 76 cents, its regular rate to Chattanooga, and the W. & A. 31 cents, and it gets this proportion by either route from Cincinnati. The local rate of the Western & Atlantic, Chattanooga to Atlanta, is 57 cents per hundred pounds.

3. Other lines which reach Atlanta from Cincinnati are:

Cincinnati, New Orleans & Texas Pacific to Chattanooga, 836 miles; and East Tennessee, Virginia & Georgia to Atlanta, 152 miles, through distance 486 miles.

Louisville & Nashville to Nashville, 295 miles, Nashville, Chattanooga & St. Louis to Chattanooga, 151 miles; East Tennessee, Virginia & Georgia to Atlanta, 152 miles; through distance, 598 miles.

Louisville & Nashville, and Nashville, Chattanooga & St. Louis to Chattanooga, 446 miles, or Cincinnati, New Orleans & Texas Pacific to Chattanooga, 836 miles, and from thence the Chattanooga, Rome & Columbus (now Central of Georgia) to Kramer, 125 miles, and Georgia Pacific to Atlanta, 53 miles; through distances, respectively, 624 miles and 514 miles.

Louisville & Nashville system to Jellico, 216 miles, and East Tennessee, Virginia & Georgia to Atlanta 289 miles; through distance 505 miles.

Either the Cincinnati, New Orleans & Texas Pacific or the Louisville & Nashville is the initial carrier in each of these competing through lines, and both are defendants herein. The Louisville & Nashville owns most of the capital stock of the Nashville, Chattanooga & St. Louis Railway Company, and the latter leases from the state of Georgia and operates the Western & Atlantic Railroad. The through distance over this line is 584 miles. The Louisville & Nashville in sending traffic from Cincinnati to Atlanta prefers this route, while the Cincinnati, New Orleans & Texas Pacific favors the East Tennessee, Virginia & Georgia with which it connects at Chattanooga. The short line to Atlanta from Cincinnati is the Cincinnati, New Orleans & Texas Pacific to Boyce and the Western & Atlantic to Atlanta, distance about 474 miles, but the rate is the same by either line. The Cincinnati, New Orleans & Texas Pacific reaches Chattanooga by its own line over the shorter distance from Cincinnati and its local rate to Chattanooga is the joint rate over the longer line of the Louisville & Nashville, and Nashville, Chattanooga & St. Louis roads.

4. There is competition for the sale of commodities in Atlanta between Cincinnati and other cities, such as Boston, New York, Philadelphia and Baltimore, and the transportation from these Atlantic points is either all rail or water and rail by the Atlantic Coast Line, Seaboard Air-Line, Richmond & Danville, Norfolk & Western and East Tennessee and others.

The water lines run to the ports of Norfolk, Portsmouth, Charleston, Savannah, Brunswick, and possibly through Port Royal and Jacksonville. From these ports Atlanta is reached by rail; the South Carolina & Georgia roads from Charleston, the Central of Georgia the Savannah, Florida & Western and East Tennessee, from Savannah; the East Tennessee from Brunswick; the Port Royal & Augusta Railway from Port Royal, the Queen and Crescent and Louisville & Nashville run from New Orleans, and Mobile stands on similar footing.

There are also rail lines from various Mississippi and Ohio river points, which compete for Atlanta trade such as Vicksburg, Greenville, Memphis, Cairo, Paducah, Evansville and Louisville.

Freight from Cincinnati for Atlanta might reach Atlanta by a rail line over the Chesapeake & Ohio and Richmond & Danville roads, or by water and rail through Baltimore, and steam or sail craft could also be employed to the South Atlantic ports, but these routes are very circuitous, and would only be used under very exceptional conditions. Freight might go from Cincinnati to Memphis by water, and from thence by rail to Atlanta, but it was not made to appear that any appreciable amount of general-freight actually does go that way in competition with the all rail route; the distance from Memphis to Atlanta by the Kansas City, Memphis & Birmingham and Georgia Pacific is about 418 miles, only 56 miles less than the through all-rail route from Cincinnati to Atlanta.

There is no competition by independent water routes to Atlanta. Traffic shipped from any Ohio or Mississippi river point, or from a North Atlantic port must pass over a line of one or more railroads in order to reach Atlanta, and such traffic is forwarded as a through shipment and taken either by all rail or by water and rail carriers under through bills of lading and at agreed through rates. The distance from Baltimore to Atlanta through the port of Charleston for the purpose of rate divisions is put at 160 constructive miles by the water way to Charleston, and about 310 miles for the rail carriage from that port to Atlanta, or about 470 miles through. The distance from Baltimore to Atlanta by the Richmond and Danville and Baltimore and Potomac roads, the direct all-rail line is 691 miles.

The rates of the eastern rail lines from New York and other seaboard cities to Cincinnati are very low, for instance, the first class rate New York to Cincinnati is 65 cents. The first class rate New York to Chattanooga is \$1.14 and the all rail rate to Atlanta is \$1.22.

The present adjustment of rates to Atlanta is the outcome of severe competition between lines leading from competing markets like

St. Louis, Baltimore, Cincinnati, etc., and, with some modifications occurring from time to time, has been in effect for a considerable period. The lines controlling rates to Georgia territory are all members of the Southern Railway & Steamship Association and there is not now any actual competition between them as to rates on through business to points in that territory from one market like Cincinnati, or from different markets like Cincinnati and Baltimore or New York. These rates resulted from agreement between the several lines. The Atlanta rates were agreed upon by the lines with a view of affording to each some share of the traffic.

The Rome Railroad connects Kingston, Ga. with the East Tennessee and Central of Georgia at Rome, Ga. From Marietta the Marietta & North Georgia Railroad runs northerly 204 miles to Knoxville, Tenn. where it connects with the East Tennessee line, and also with the Knoxville, Cumberland Gap & Louisville Railroad which extends 72 miles to Middlesboro, Ky., and there meets the Louisville & Nashville system by which Cincinnati can be reached over a distance of 280 miles from Middlesboro; this gives a possible competing line from Cincinnati to Marietta of 506 miles, and to Atlanta of 527 miles. From Cartersville, Ga., the East and West Railroad of Alabama runs westerly to Rock Mart 22 miles, connecting with the East Tennessee and 16 miles farther it reaches the Central of Georgia at Cedartown. Competition has not forced rates down at Kingston, Marietta or Cartersville. No railroad other than the Western & Atlantic runs to Calhoun, Adairsville or Acworth.

6. On December 27, 1890, the Western & Atlantic Railroad was leased by the state of Georgia to the Nashville, Chattanooga & St. Louis Railway Company for 29 years at an annual rental of \$420,012.00. The operation of the leased line has not been separately reported since that date. Prior to that time the road was operated under lease by the Western & Atlantic Railroad Company, at an annual rental of \$300,000. The road being owned by the state no report was made of "Capital Stock" or "Cost of Road, Equipment and Permanent Improvement" by the lessee Company. From the report of this road to this Commission for the year ending June 30, 1890, the following statement is compiled:

The "Gross Earnings from Operation" were \$1,562,059.76; "Operating Expenses," \$1,022,668.70; "Income from Operation," \$539,391.06; "Income from Other Sources," \$10,615.89; "Total Income" \$550,006.95. From this amount there were paid as "Deductions from Income" \$312,677.24, \$300,000.00 of which was the rental paid by the operating company to the state of Georgia, leaving a "net income"

of \$237,329.71. From this last named item there was paid \$78,225.00 on income bonds for principal and coupons, so that the "Surplus from Operations of year ending June 30, 1890" was \$159,104.71. This combined with the "Surplus" from the previous year made the "Surplus on June 30, 1890" \$381,077.86. The "Freight Revenue" was \$1,255,778.49, from which there were repayments on account of "Overcharge to shippers" \$71,787.27, and "Other Repayments," \$18,110.53, — Total \$4,847.80, leaving "Total Freight Revenue" \$1,170,980.69.

A reference to the "Comparative General Balance Sheet" shows that the company operating the road has as "Assets," \$8,350.00, "Stocks" and "Bonds of other companies owned," "Cash and Current Assets," \$414,611.98; "Materials and Supplies," \$4,815.89. Their "Liabilities" were "Current Liabilities," \$96,199.96, and "Profit and Loss" ("Surplus"), \$381,077.86.

Referring to the "Freight Traffic" of the road, it appears that the "Number of tons carried of freight earning revenue" were 1,083,336; the "Number of tons carried one mile" 125,220,827, which shows the "Average distance haul of one ton" 115.96 miles. It appears that of the "Number of tons carried of freight earning revenue," 156,585 tons only originated on the road, and the balance, 926,751 tons was "Received from Connecting Roads and other Carriers." The "Average receipts per ton per mile," were .00,985 cents; "Estimated cost of carrying one ton one mile," .00,555 cents; "Freight earnings per train-mile," \$1.03,052; and "Estimated cost of running a freight train one mile," .61,201 cents.

By the foregoing it appears that of the 1,083,336 tons carried that year only 156,585 tons originated on the road, the balance, 926,751 being received from connecting and other carriers; that is to say, less than 15 per cent, or but very little over one seventh of the total tonnage was local business, and some of this was doubtless carried over the whole line. The average distance haul per ton of the entire tonnage was 115.96 miles or nearly 84 per cent of the road's length of 138 miles. The bulk of the local business may be assumed to consist of shipments between Chattanooga or Atlanta and intermediate stations, and as the average distance haul per ton of the total tonnage was over 115 miles, say as far as Marietta, only 21 miles from Atlanta, going south, and Ringgold, only 23 miles from Chattanooga, going north, it may be stated as a fact that nearly all of the freight traffic received from other carriers was carried over the entire distance between Chattanooga and Atlanta, the termini of the road.

7. Rates from Cincinnati to Calhoun, Adairsville and Kingston are higher than the rates to

Atlanta on all classes except class 6. To Cartersville, Acworth and Marietta they are higher on all classes. To bring rates to these points down to the level of Atlanta rates will require the following reductions per hundred pounds.

Classes.....	1	2	3	4	5	6	A	B	C	D	E	H	F
Calhoun cts.	2	3	3	3	3	3	6	5	4	3	5	4	8
Adairsville....	5	6	5	5	4	4	7	6	4	4	6	6	9
Kingston.....	8	9	7	7	5	8	7	8	4	3	7	8	7
Cartersville...	11	11	9	8	6	1	9	8	6	5	8	9	11 1/4
Acworth.....	17	15	13	10	8	8	11	10	7	6	10	11	13
Marietta.....	20	17	15	11	9	4	10	10	7	6	8	12	14
Vinings.....	15	14	13	10	9	5	8	8	5 1/2	5	9	10	11 1/4

Rates on classes A, B, C, D, E, H and F are also somewhat higher to Ringgold and Dalton than to Atlanta, but they are lower to these points on classes 1 to 6, inclusive. There is no evidence showing even approximately the amount of traffic carried to Calhoun, Adairsville, Kingston, Cartersville, Acworth and Marietta, from points on other lines, but as stated in the last finding, the bulk of the traffic received from connecting and other carriers was carried over the whole length of the road, and therefore the number of tons shipped from Cincinnati and other northerly points to Calhoun and other more distant intermediate stations must have been comparatively insignificant.

The rates per ton per mile on the highest and lowest classes from Cincinnati and Chattanooga to the above named stations on the Western & Atlantic road are as follows:

Rates per Ton per Mile.

From Cincinnati. From Chattanooga.

	Class 1	Class A	Mis	Class 1	Class A	Mis
Chattanooga	4.52 c.	1.19 c.	336			
Ringgold	5.46 "	1.74 "	359	19.13 c.	9.56 c.	23
Dalton	5.51 "	1.50 "	374	14.21 "	6.31 "	38
Calhoun	5.50 "	1.72 "	396	11.00 "	4.66 "	60
Adairsville	5.53 "	1.73 "	405	10.44 "	4.34 "	69
Kingston	5.54 "	1.74 "	415	9.87 "	4.05 "	79
Cartersville	5.54 "	1.74 "	426	9.33 "	3.78 "	90
Acworth	5.65 "	1.78 "	439	9.32 "	3.69 "	103
Marietta	5.61 "	1.68 "	453	8.73 "	3.42 "	117
Vinings	5.31 "	1.55 "	463	8.50 "	3.30 "	127
Atlanta	4.51 "	1.18 "	474	8.26 "	3.19 "	138

Case No. 314.

8. This route is from New York and other North Atlantic ports over the through water and rail line formed by steamships of the Clyde Steamship Company delivering at Charleston to the South Carolina Railway which connects with and delivers to the Georgia Railroad at Augusta; the points of destination being located on and along the latter line, which terminates at Atlanta. The intermediate points to which rates are complained of as being higher than for the longer distance to Atlanta are Greensboro, Madison, Social Circle, Covington, Conyers and Stone Mountain.

This will hereinafter be called "The Augusta-Atlanta Part Water Route."

of which appears by the following diagram.

THE AUGUSTA-ATLANTA PART WATER ROUTE.

The Georgia Railroad is owned by the defendant the Georgia Railroad & Banking Company, and jointly operated under lease by the defendants, the Louisville & Nashville Railroad Company and the Central Railroad & Banking Company of Georgia.

Freight is carried over this route to the points above mentioned under through bills from the point of shipment. The facts before stated with reference to the Chattanooga-Atlanta route in regard to competing lines for Atlanta traffic, including free delivery of freights at that point, apply also to this route.

9. Rates to Augusta and Atlanta are divided between the carriers upon a proportionate basis. Rates to points intermediate between Augusta and Atlanta are combination rates made up of rates to the terminal points with locals added. Charges to these intermediate points are based as follows: Greensboro and Madison on the Augusta rate; Social Circle, classes 1 and B on Atlanta; Class 3, 4, 5, 6, A, C, D, E, H & F on Augusta; class 2 on either Augusta or Atlanta; Covington; Classes 1, 2, 3, A & B, on Atlanta the others on Augusta; Conyers, Classes 1, 2, 3, 4, A, B & H, on Atlanta; Classes 6, C, D, E and F, on Augusta, and Class 3, on either; Stone Mountain, Classes D & F on Augusta, Class C, on either, and the other Classes on Atlanta.

When rates are based on Atlanta, they consist, of the charge through the point of destination to Atlanta, plus the local back. The following table shows the rates:

*From New York, Philadelphia, etc. via Charleston to Georgia
Railroad Stations.*

CLASSES.	1	2	3	4	5	6	A	B	C	D	E	H	F
Augusta.....	.96	.81	.70	58	47	37	28	42	31½	31	43	54	61
Greensboro.....	1.37	1.18	1.02	87	69	54	45	59	42½	41	65	83	82½
Madison.....	1.44	1.23	1.07	89	71	56	47	60	43	42	67	85	84
Social Circle.....	1.44	1.25	1.09	90	72	57	48	61	43½	42½	68	86	85
Covington.....	1.41	1.22	1.08	91	73	58	48	60	44	43	69	87	86
Conyers.....	1.38	1.19	1.05	90	74	59	47	59	44½	43	70	87½	86
Stone Mountain.....	1.32	1.14	1.01	85	71	58	45	57	47	44	69	80	80½
Atlanta.....	1.14	.98	.86	78	60	49	36	48	40	39	58	68	78

Local Rates on Georgia R. R. From Augusta.

To	Miles	1	2	3	4	5	6	A	B	C	D	E	F
Greensboro.....	89	41	37	32	29	22	17	17	17	11	10	22	21½
Madison.....	109	48	42	37	31	24	19	19	19	11½	11	24	23
Social C.....	119	51	44	39	32	25	20	20	20	12	11½	25	24
Covington.....	130	54	46	41	33	26	21	21	21	12½	12	26	25
Conyers.....	140	57	48	43	34	27	22	22	22	13	12½	27	26½
Stone Mt.....	155	62	52	46	36	29	24	24	24	14	13	29	28½
Atlanta.....	171	64	54	47	37	30	25	25	25	15½	14½	30	31

The evidence does not show how rates to Atlanta are divided between the carriers over this route. The Commission has reason to believe, however, that these rates are divided upon a mileage basis, the Clyde line being allowed 250 miles for the distance to Charleston. On the basis of such mileage the divisions of the rate to Atlanta, \$1.14 first class, would be about 51 cents for the Clyde line's 250 miles to Charleston; 29 cents for the South Carolina road's 187 miles to Augusta, and 34 cents for the Georgia road's 171 miles to Atlanta.

The rates per ton per mile to the Georgia railroad stations from Augusta on the high est and lowest class rates are as follows.

	Class 1.	Class D.
Greensboro.....	9.88 cents	2.41 cents
Madison.....	9.22 "	2.14 "
Social Circle.....	8.57 "	1.93 "
Covington.....	8.30 "	1.84 "
Conyers.....	8.14 "	1.78 "
Stone Mountain.....	8.00 "	1.68 "
Atlanta.....	7.49 "	1.70 "

The through first class rate, rail or water and rail, from New York to Chattanooga is \$1.14, the same as the water and rail rate to Atlanta, and is in effect over all routes. The first class all rail rate to Atlanta is \$1.23, water and rail \$1.14; to Augusta the all rail rate is \$1.04 and by water and rail it is 96 cents. But the first class rate to Augusta or Atlanta from Cincinnati is \$1.07, while to Chattanooga it is 76 cents. From Baltimore to Augusta the all rail charge is 97 cents, while the water and rail rate is 89 cents; to Atlanta the water and rail rate is \$1.07 and by all rail it is \$1.15. Rates on the other classes are similarly adjusted. A full statement of through rates to various important basing points from New York, Baltimore and Cincinnati is hereinafter set forth.

10. Of the intermediate points mentioned, namely Greensboro, Madison, Social Circle, Conyers, Covington and Stone Mountain, only 4 INTER 8.

two, Madison and Social Circle, are junction points. At Madison the Georgia Railroad connects with the branch of the Richmond & Danville running between Macon and Lula on the Atlanta & Charlotte Division of the main line. The distance from Lula to Madison is 72 miles; the distance from Lula to Atlanta by the Richmond & Danville is 66 miles; practically the same distance. At Social Circle the Georgia Railroad connects with the Gainesville, Jefferson & Southern Railroad which extends from Social Circle to Gainesville, a distance of 52 miles, where it connects with the Atlanta & Charlotte division of the Richmond & Danville line. The distance from Atlanta to Gainesville by the Richmond & Danville is 53 miles, about the same as from Social Circle to Gainesville. The first class water and rail rate from New York to Madison or Social Circle is \$1.44 as against \$1.14 to Atlanta. The fact that different lines run to these two points has not compelled reductions in rates thereto, but it was stated in evidence that the fact of direct railroad connection between Madison and Macon would soon be likely to cause a lowering of rates to Madison, the short water and rail route from New York being through Brunswick and Macon.

11. The following is taken from the report of the Georgia Railroad Company to the Commission for the year ending June 30, 1891. The report states in regard to "Capital Stock" as follows: "The franchise owned by the lessee organization is not capitalized. Said franchise is a lease of the Georgia R. R. and branches (not including Banking Department) for a period of 99 years from and after April 1, 1881, at a rental of \$600,000.00 per annum payable by the lessee organization, \$300,000.00 on April 1, and \$300,000.00 on October 1, in each year." It has no "Funded Debt." Its "Current Liabilities" are \$335,228.35 which includes \$600,976.47 which is designated as "Ownership Debt," and is explained by a foot-note. "The owners of the lease have advanced to the lessee organization." The "Cost of Road, Equipment, and Permanent Improvements" is reported by the lessor organization. However, the lessee expended during the year in improvements which it included in "Operating Expenses," \$185,399.79. The "Gross Earnings from Operation" were \$1,905,159.94.

"Operating Expenses" \$1,236,796.65. "Income from Operation" \$668,863.29. "Income from other Sources" \$60,618.00. "Total Income" \$729,481.29. From this "Total Income" there was paid as "Deductions from Income" \$610,302.42 of which \$600,000.00 was on account of rental paid for the use of the road. This leaves the "Net Income" \$118,678.87, which was carried to "Surplus from Operations of Year ending June 30, 1891." On June 30, 1890, there was a "Deficit" of \$494,479.47 which would leave the "Deficit on June 30, 1891," \$365,800.60. The "Freight Revenue" was \$1,291,732.69, from which there were repayments on account of "Overcharge to Shippers" and "Other Repayments" of \$16,751.20, which leaves the "Total Freight Revenue" \$1,274,981.49. The road also received other freight earnings on account of "Stock Yards," "Elevators," and "Other Items," \$538.90, making its "Total Freight Earnings" \$1,375,520.39.

The total "Assets" shown in the "Comparative General Balance Sheet," including the "Cash and Current Assets," "Materials and Supplies," and "Profit and Loss" (deficit), were \$963,150.70. The "Liabilities," in addition to the "Current Liabilities" heretofore referred to, were "Agents' Deposits" \$20,900.00, and "Annual Inventory" \$107,027.35.

Referring to the "Freight Traffic" of this road, it appears that the "Number of tons carried of freight earning revenue" was 669,784. The "Number of tons carried one mile" was 90,870,108, which indicates that the "Average distance haul of one ton" was 135 miles. The "Average receipts per ton per mile" were .01411 cents; the "Estimated cost of carrying one ton per mile" was .00935 cents. Of the "Number of Tons carried of freight earning revenue," it appears that 180,730 tons originated on this road and 489,054 tons were "Received from Connecting Roads and other Carriers."

Case No. 325.

13. In this case the transportation involved is from Cincinnati and other Ohio river points over the Cincinnati, New Orleans & Texas Pacific to Chattanooga, or else to the same point on the Louisville & Nashville and Nashville, Chattanooga & St. Louis roads, and from Chattanooga to Atlanta by either the East Tennessee or the Western & Atlantic; from Atlanta the traffic goes to the several destinations on the lines of the Atlanta & West Point and Western Railway of Alabama, to wit, Grantville, Hogansville, La Grange, West Point and Shorters, shorter distance points to which rates are complained of and Opelika and Montgomery, the longer distance points, Opelika being nearer, however, than Shorters to Atlanta.

4 INTER S.

This route will be called the Atlanta & West Point All-Rail Route, and is shown below:

THE ATLANTA & WEST POINT ALL-RAIL ROUTE.

Traffic is carried under through bills to the several destinations, but the Nashville, Chattanooga & St. Louis does not participate in traffic to points between Montgomery and West Point except on consignments from points on the Ohio river below Henderson, and such consignments probably go *via* the Louisville & Nashville from Nashville and through Montgomery instead of Atlanta; but freight from any other Ohio river point for stations on the Atlanta & West Point, including West Point, may go over its line through Chattanooga and be forwarded *via* Atlanta. Therefore traffic from points below Henderson to points on the Western Railway of Alabama, except West Point, going over the N. C. & St. L. does not pass through the intermediate points above named, and such points are longer instead of shorter distance points as to traffic so shipped and routed.

The Louisville & Nashville operates its own lines from Cincinnati, Louisville, Owensboro, Evansville, Henderson and other points on the Ohio river through Nashville, Decatur, and Birmingham to Montgomery, and freights from those points consigned over its road for Montgomery and points on the Western Railway of Alabama, are carried over this line instead of the route through Chattanooga and Atlanta mentioned in the complaint, but it does send traffic by the route complained of to Atlanta & West Point stations east of West Point. West Point freight goes over the Montgomery route unless directed to be forwarded *via* Atlanta. The distance from Cincinnati to Montgomery by the Louisville & Nashville is 600 miles; by the Atlanta & West Point route it is 640 miles; but the shortest distance to Montgomery from Cincinnati is by the Cincinnati, New Orleans & Texas Pacific to Birmingham, 478 miles, and the Louisville & Nashville from that point to Montgomery 96 miles; total 574 miles. Montgomery can therefore be reached from Cincinnati and other Ohio river points over shorter routes than the one involved in this controversy.

The Louisville & Nashville connects at Birmingham with the Columbus & Western Railroad, operated by the Central of Georgia, and extending from that point to Opelika and Columbus. The distance from Cincinnati to Birmingham by the Louisville & Nashville is 504 miles, and from Birmingham to Opelika by the Columbus & Western, it is 128 miles, a total of 632 miles. The distance from Cincinnati to Opelika by the Atlanta route is 583 miles; by the Louisville & Nashville to Montgomery and Western of Alabama, it is 666 miles; and by the Cincinnati, New Orleans & Texas Pacific through Montgomery it is 640 miles. The Cincinnati, New Orleans & Texas Pacific is the shortline to Birmingham from Cincinnati, being 478 miles, and in connection with the Columbus & Western Opelika is 606 miles from Cincinnati by this route. The distance from Montgomery to Shorters, one of the shorter distance points mentioned in the complaint, is 23 miles, and the mileage from Cincinnati to Shorters *via* Montgomery is only 597 miles, while *via* Atlanta it is 626 miles. The evidence does not show how the Cincinnati, New Orleans & Texas Pacific routes its traffic to stations on the Western Railway of Alabama between Montgomery and West Point.

The shortest distance from Cincinnati to West Point is by the Atlanta route, 561 miles, and the bulk of freight for that point may go that way when shipped over the Cincinnati, New Orleans & Texas Pacific.

13. Montgomery is situated upon the Alabama river which empties into Mobile Bay. There is possible direct water communication between points on the Ohio river and Montgomery, and some water competition on freight from Western and Ohio river points has existed for six or seven years. The all water competition was not shown to be active under railroad rates now in effect. The Mobile & Ohio Railroad carries freight from St. Louis to Mobile at the prevailing low rate, and this can come up the river to Montgomery.

Two lines of steamers run up the Alabama river from Mobile. There is water transportation of freights from eastern points to Mobile also, one line being the New York & Mobile Steamship Company. No water route extends to Opelika, but the Apalachicola and Chattahoochee rivers are navigable from Apalachicola up to Columbus except during a portion of the summer. It was not shown, however, that this route is much used except for lumber ships, or that it can be extensively employed by all vessels until the channel is materially improved. Columbus is 29 miles from Opelika, and connected therewith by the Columbus & Western road, operated by the Central of Georgia. There is competition by eastern cities, as Baltimore, Philadelphia, New York and Boston over all rail and water and rail lines through South Atlantic ports for the sale of traffic in Montgomery, Opelika, and all points in Georgia and Alabama territory.

14. Rates to West Point, Opelika and Montgomery are divided between the carriers upon an agreed basis, but those in effect to Grantville, Hogansville, La Grange and Shorters are found by the addition of locals and rates to Atlanta, Montgomery or Opelika, whichever gives the lowest combination. Opelika rates are adjusted with reference to Montgomery rates, and West Point rates are based upon either Montgomery or Opelika, whichever gives the lowest rates, but West Point rates are the subject of agreement between the lines.

The following table shows rates from Cincinnati, O., to stations on the Atlanta & West Point and Western Railway of Alabama:

Rates from Cincinnati, O., to Stations on Atlanta & West Point Railroad and Western Railway of Alabama.												
Cincinnati, O., to Atlanta & West Point R. R.		Classes.										
	Miles	1	2	3	4	5	6	A	B	C	D	E H

From Montgomery to			
Shorters,	24.35 "	8.70 "	

4 LETTER S.

15. The Atlanta & West Point and Western Railway of Alabama are corporations independent of each other, but for purposes of economy the roads are operated under one set of officers and the same crews, cars and engines run over both lines. The following financial statements are made up from reports to the Commission of these companies for the year ending June 30, 1891:

Atlanta & West Point Railroad Company:—
The "Capital Stock" of this road was \$1,232,200.00. "Funded Debt" \$1,232,200.00; "Current Liabilities" \$95,067.78; "Cost of Road, Equipment, and Permanent Improvements" \$2,464,400.00. The "Gross Earnings from Operation" were \$483,053.50; "Operating Expenses" \$343,689.45; "Income from Operation" \$139,364.05. There was paid from this as "Deductions from Income" \$36,873.82, leaving "Net Income" \$52,485.73. There was also paid a dividend of 6 per cent on Common Stock of \$73,982.00, leaving the "Deficit from Operations of Year ending June 30, 1891,"

\$21,440.27. There was a "Surplus on June 30, 1890," of \$124,359.28, which would make the "Surplus on June 30, 1891," \$102,918.01. The "Freight Revenue" was \$274,651.80, from which there was repaid as "Overcharge to Shippers" \$7,100.83, which leaves the "Total Freight Revenue" \$267,550.97. In addition to the "Cost of Road" heretofore referred to, the road returns in its "Comparative General Balance Sheet" as "Assets," "Cash and Current Assets" \$180,837.85; "Materials and Supplies" \$17,642.94. Its only "Liabilities" in addition to the "Capital Stock," "Funded Debt" and "Current Liabilities" hereinbefore referred to, are the "Profit and Loss" (surplus), \$102,918.01. The "Grand Total" of the Balance Sheet is \$2,662,380.79.

Referring to the "Freight Traffic," it appears that the "Number of tons carried of freight earning revenue" was 196,300. The "Number of tons carried one mile" was 13,761,055, which indicates that the "Average distance haul of one ton" was 70 miles. The "Average receipts per ton per mile" were .01,944 cents; the "Estimated cost of carrying one ton per one mile," .01,245 cents. Of the "Number of tons carried of freight earning revenue" 109,716 tons originated on this road and 86,584 tons were "Received from Connecting Roads and other Carriers."

Western Railway Company of Alabama: The "Capital Stock" of this road is \$3,000,000.00; "Funded Debt" \$1,548,000.00; "Current Liabilities" \$168,771.88. The "Cost of Road, Equipment and Permanent Improvements" is \$4,543,000.00. The "Gross Earnings from Operation" were \$572,220.49; "Operating Expenses" \$400,911.19, which leaves an "Income from Operation" of \$171,309.30. The "Income from Other Sources" was \$6,460.46, making the "Total Income" \$177,769.76. From this there was paid as "Deductions from Income" \$137,617.31, leaving the "Net Income" \$40,152.45, which was carried to "Surplus from Operations of Year ending June 30, 1891." The "Surplus on June 30, 1890," was \$47,990.40, which would make the "Surplus on June 30, 1891," \$88,142.85. The "Freight Revenue" was \$340,802.21, from which there were repayments on account of "Overcharge to Shippers" of \$5,499.29, leaving the "Total Freight Revenue" \$335,302.92.

Reference to the "Comparative General Balance Sheet," discloses that in addition to the "Cost of Road" heretofore referred to, the road has "Assets" of "Cash and Current Assets" \$204,792.87; "Materials and Supplies" \$52,121.36, making the "Grand Total" of the "General Balance Sheet" \$4,799,914.23. Its "Liabilities," in addition to the "Capital Stock," "Funded Debt" and "Current Liabilities," were the "Profit and Loss" (surplus),

\$88,142.85. Reference to the "Freight Traffic" shows that the "Number of tons carried of freight earnings revenue" was 320,428. The "Number of tons carried one mile" was 20,323,159, which shows that the "Average distance haul of one ton" was 63 miles. The "Average receipts per ton per mile" were .01,650 cents, and the "Estimated cost of carrying one ton one mile" was .01,061 cents. Of the "Number of tons carried of freight earning revenue," 148,474 tons originated on this road, and 171,954 tons were "Received from Connecting Roads and other Carriers."

Case No. 315.

16. This was the next case heard, and the route is a water and rail line from New York and other North Atlantic ports by steamships of the Ocean Steamship Company to Savannah, which delivers to the Central Railroad of Georgia for carriage to points on its South-western Division beginning at Macon. The points involved are situate on two terminating roads both in the same division of the Central of Georgia system. These points are, 1, Everett's, Butler, Geneva and Schatulga, shorter distance points, and Columbus, the longer distance point, 2, Smithville, Dawson and Cuthbert, shorter distance points, and Georgetown, the longer distance point. These terminal roads will hereinafter be called the Columbus Branch and the Georgetown Branch, respectively. A drawing of this route is here given under the title of:

THE MACON-COLUMBUS-GEORGETOWN PART WATER ROUTE.

The Central Railroad of Georgia has close traffic relations with the Ocean Steamship line. Traffic over this route is carried under through bills to the several destinations.

17. Rates to the shorter and longer distance points are straight rates and are not based on a combination of rates to and from basing points. The highest first class rate to any point is \$1.81 and the lowest is \$1.14, except to Macon, \$1.09, and Albany, which takes the Macon rate. Macon is a shorter distance from New York than any of the stations on this division, and Albany is not "on the same line" with the shorter and longer distance points directly involved in this case. The table shown below sets forth the rates to various points on this division, but as above stated rates are complained of only to Everett's, Butler, Geneva and Schatulga on the Columbus Branch, and Smithville, Dawson and Cuthbert on the Georgetown Branch.

Statement showing Class Rates from New York, N. Y., Philadelphia, Pa., etc., to the following stations on the Southwestern Division of the Central Railroad of Georgia, January 20, 1892.

Distance from Macon, Ga., To	Miles.	1.	2.	3.	4.	5.	6.	A.	B.	C.	D.	E.	H.	Per Bbl. F.
Everett's	36	.181	.111	.98	.82	.67	.56	.46	.52	.40	.37	.67	.78	.75½
Butler,	50	.181	.111	.98	.88	.69	.56	.46	.53	.41	.38	.67	.78	.78
Geneva,	70	.181	.111	.98	.88	.69	.56	.46	.54	.42	.39	.67	.78	.80
Schatulga,	91	.181	.111	.98	.88	.69	.56	.46	.55	.43	.40	.67	.78	.82
Columbus,	100	.114	.98	.86	.73	.60	.49	.36	.48	.40	.39	.58	.68	.78
To Macon		.109	.96	.83	.70	.59	.48	.34	.47	.35	.34	.52	.60	.58
Fort Valley,	29	.114	.98	.86	.73	.60	.49	.36	.48	.40	.37	.58	.68	.75½
Marshv.	37	.114	.98	.86	.73	.60	.49	.36	.48	.40	.37	.58	.68	.75½
Montezuma,	49	.114	.98	.86	.73	.60	.49	.36	.48	.40	.38	.58	.68	.78
Americus,	71	.114	.98	.86	.73	.60	.49	.36	.48	.40	.39	.58	.68	.78
Leesburgh,	96	.181	.111	.98	.88	.69	.56	.46	.55	.41	.40	.67	.78	.81
Albany,	107	.109	.96	.83	.70	.59	.48	.34	.47	.35	.34	.52	.60	.68
Smithville,	88	.181	.111	.98	.88	.69	.56	.46	.55	.41	.39	.67	.78	.80
Dawson,	98	.181	.111	.98	.88	.69	.56	.46	.55	.42	.40	.67	.78	.81
Cuthbert,	118	.181	.111	.98	.88	.69	.56	.46	.56	.42	.39	.67	.78	.82
Georgetown,	141	.114	.98	.86	.73	.60	.49	.36	.48	.40	.39	.58	.68	.78

At Columbus the following lines center: The Central of Georgia, Southwestern Division, and The Columbus & Western Division, which runs to Birmingham; Georgia Midland & Gulf to McDonough, Columbus Southern to Albany, Columbus & Rome to Greenville, and Mobile and Girard to Seagriff, the two latter being also a part of the Central of Georgia system. Georgetown is the first station east and two miles from Eufaula, the terminus of the Georgetown branch, and takes Eufaula rates. The Montgomery & Eufaula division of the Central of Georgia extends from Eufaula to Montgomery. Everett's, Butler and Schatulga have no railroad communication except the Central of Georgia. Smithville is the junction of the Albany and Eufaula, or Georgetown, branches. Dawson has connection between the Central of Georgia and Columbus Southern. Cuthbert is the junction of the Georgetown road with a branch for Fort Gaines.

4 INTER 8.

19. There is possible competition to Columbus and Eufaula from New York by steamship to Jacksonville, rail to the Chattahoochee river, and steamer up that river to Eufaula and Columbus, or by water all the way if a line were established, but under present rates and navigable conditions the river route is not a dangerous competitor. The various lines all-rail and water and rail, which penetrate this territory are competitors for the carrying trade, but the Central system controls the rates to Eufaula and Columbus, in a large degree, except by the river.

20. For the year ending June 30, 1890: The "Average receipts per ton per mile" of the Central of Georgia Railroad System was .01,903 cents, and the "Estimated cost of carrying one ton one mile" was .01,428 cents, .00,474 cents, nearly half a cent less than the rate received. Its "Net Income" was \$1,026,597.66, from which was paid an 8 per cent dividend on

\$7,500,000, the entire "Capital Stock," amounting to \$600,000 and the balance \$426,597.66 was carried to the "surplus" account, which on June 30, 1890, was \$950,113.22. The "Number of tons carried of freight earning revenue" was 1,705,688, of which 944,521 tons originated on the road, and 761,162 tons were "Received from Connecting Roads and other Carriers." This report is based on an operated mileage of 1,317.46 miles. The report was made by the "Central Rail road and Banking Company of Georgia."

Case No. 316.

21. This is an all rail route from Cincinnati and Ohio river points over the Cincinnati, New Orleans & Texas Pacific Railway to Chattanooga, the East Tennessee, Virginia & Georgia to Atlanta and the Atlanta Division of the Central Railroad of Georgia to the points of consignment mentioned in the complaint as

Jonesboro, Hampton, Griffin, Barnesville and Forsyth, intermediate stations, and Macon the terminus, to which, though a longer distance, lower rates are charged than to the shorter distance points mentioned. This route is here termed the Atlanta-Macon All Rail Route, and is as follows:

ATLANTA-MACON ALL RAIL ROUTE.

Traffic goes over this route under through bills of lading to the various destinations named above. By this line Atlanta is 488 miles from Cincinnati and 108 miles from Macon, making the distance to Macon from Cincinnati 591 miles. There is no water route to Macon, but the same strong competition exists between carriers and markets for the Macon as for the Atlanta trade.

22. The same rates are in effect to both Atlanta and Macon from Cincinnati, except on classes B, C, D, E, H and F, which are two cents higher to Macon. Some of the rates to intermediate points are based on rates to Atlanta or Macon, plus the locals therefrom, especially rates on the higher classes, the others are straight rates. A table of these rates with distances from Cincinnati is here given:

Rates taken from Cincinnati, New Orleans & Texas Pacific R. R. Supplement No. 2.

From Cincinnati, O.,		Classes, rates in cents per 100 pounds.													Per bbl.	
	Miles		1	2	3	4	5	6	A	B	C	D	E	H	F	
To Atlanta	488	Ga.	107	92	81	68	56	46	38	35	28	24	48	53	48	
Jonesboro	509	"	129	112	99	83	69	57	39	46	35	30	61	68	61½	
Hampton	520	"	133	115	103	87	71	58	40	47	35½	31	63	72	63	
Griffin	531	"	139	121	107	87	72	57	42	49	36½	32	66	73	65½	
Barnesville	548	"	139	121	107	91	75	60	42	50	37	32½	69	78	66	
Forsyth	564	"	181	114	101	86	70	58	40	48	36½	32	65	73	65	
Macon	591	"	107	92	81	68	56	46	28	38	33	29	50	55	58	

4 INTER S.

Through Tariff No. 15, effective August 24, 1891, and through Freight Tariff No. 15 effective April 16, 1891.

The rates per ton per mile on the highest and lowest classes are as follows:

To	Class 1.	Class D.
Atlanta	4.33 Cents	.96 Cents
Jonesboro	5.07 "	1.18 "
Hampton	5.12 "	1.19 "
Griffin	5.23 "	1.20 "
Barnesville	5.07 "	1.18 "
Forsyth	4.64 "	1.18 "
Macon	3.62 "	0.96 "

23. Jonesboro, Hampton and Forsyth have no other railroad service than that afforded by the Central of Georgia roads. Griffin has railroad connection with the Georgia Midland and Gulf, and is also the junction of the Atlanta and Chattanooga divisions of the Central of Georgia. The distance to Griffin from Cincinnati over the C. N. O. & T. P. to Chattanooga and the Central of Georgia from Chattanooga is 584 miles, only 3 miles greater than by the way of Atlanta. Barnesville is the junction of the Atlanta Division and the Upson County Branch, a 16 mile road to Thomastown. On freights from New York, Philadelphia & Boston, Griffin enjoys the Atlanta water and rail rate of \$1.14 first class, and also the Atlanta water and rail rate from Baltimore of \$1.07, but from Cincinnati its first class rate is as above stated \$1.39. Macon has a rate of \$1.09 from New York, and \$1.02 from Baltimore.

Case No. 326.

24. This case was heard last of all, but as the remaining case refers only to one commodity, while this, like the others, extends to all classes of freights, the facts pertaining to it will be stated now. The route here is water and rail from New York and other North Atlantic ports *via* the Clyde Steamship line to Charleston, the South Carolina Railway to Augusta, the Georgia Railroad to Atlanta, and the Atlanta & West Point and Western Railway of Alabama to the destinations mentioned in the complaint, which are Newnan, Grantville, Hogansville, La Grange and West Point, shorter distance stations and Opelika the longer distance point. This route is distinguished by the name:

“THE ATLANTA & WEST POINT PART WATER ROUTE.”

25. The rates are as follows:

From New York, N. Y.
Philadelphia, Pa.

To Atlanta West Point R. R.
Atlanta Ga.
Newnan
Grantville
Hogansville
La Grange
West Point
Western R. R. of Alabama.
Opelika, Ala.

Classes, Rates in cents
per 100 lbs.

Per
bbl.

1	2	3	4	5	6	A	B	C	D	E	H	F
114	98	86	78	60	49	36	48	40	39	58	68	78
131	111	98	88	69	56						78	
147	128	114	97	80	64						94	
151	131	116	100	81	65						97	
154	135	118	102	82	66						99	
142	124	110	98	77	63						88	
114	98	86	78	60	49	36	48	40	39	58	68	78

Rates taken from Tariff issued by R. D. Carpenter, Commissioner of Associated Railways of Virginia and the Carolinas for March, 1892 (How to Ship).

Rates by the way of the Ocean Steamship line to Savannah and the Central of Georgia and connections are substantially the same.

Except Newnan, the stations in this case were considered in the findings under Case 325, relating to traffic from Cincinnati over the Atlanta & West Point all rail route.

26. The distance by the Central of Georgia from Savannah to Atlanta is 295 miles, 13 miles less than the distance from Charleston to Atlanta. The distance from Savannah to Augusta by the Central of Georgia is 132 miles, 5 miles less than the mileage from Charleston

to Augusta by the South Carolina road. The distance from Savannah to Opelika by the Central of Georgia through Macon and Columbus is 321 miles, 26 miles less than the distance to Newnan, the first shorter distance point, over the route from Charleston, and only 13 miles greater than the distance from Charleston to Atlanta. The Central of Georgia route Savannah to Opelika is with the exception of the 29 miles from Columbus, wholly in the state of Georgia. Freights can be shipped by the Central of Georgia from Savannah through Opelika to West Point and La Grange, and carried over a less distance than by the route from Charleston or the routes from Savannah through Augusta or Atlanta. It is only 6 miles farther to Hogansville *via* Savannah and Opelika than from Charleston; only 20 miles greater distance to Grantville, and but 44 miles farther to Newnan. There is a still shorter route from Savannah to Opelika, namely the Central of Georgia to Lyons, 75 miles, the Savannah, Americus & Montgomery, called the “Sam” road, to Americus, 124 miles, and the Central system to Opelika, 98 miles, or 292 miles in all. It is a less distance by this route from Savannah through Opelika to all the shorter distance stations named in the complaint, except Newnan, than from Charleston.

From the port of Brunswick, Ga., Opelika can be reached by the Savannah, Florida & Western to Albany, 169 miles, and the Central

of Georgia to Opelika, 124 miles, or a distance of 298 miles through. It is nearer from Brunswick *via* Opelika to all the shorter distance points in this case, except Newnan, than to these points from Charleston *via* Atlanta, and it is only 21 miles farther to Newnan from Brunswick than from Charleston.

But Savannah traffic can also reach Newnan by the Central of Georgia to Griffin and its Chattanooga division over a short distance of 288 miles, 7 miles less than the distance from Savannah to Atlanta and 20 miles less than from Charleston to Atlanta. Newnan is 89 miles from Atlanta, and therefore the mileage from Charleston to Newnan is 847 miles as against only 288 miles from Savannah.

Case No. 324.

27. This case relates to rates on fertilizers from Charleston to points on the Atlanta & West Point and Western Railway of Alabama. The route from Charleston is all rail and the same as the rail portion of the route in Case No. 326. The destinations are also the same. This route, denominated The Atlanta & West Point Fertilizer Route, is set out in the diagram below:

"THE ATLANTA & WEST POINT FERTILIZER ROUTE."

Traffic is shipped under through bills to the various points.

28. The rates and distances from Charleston are as follows:

Rates on Fertilizers from Charleston.

To	Distance	Rate per ton Dollars.	Rate per ton per mile Cts.
Atlanta	306	3.14	1.02
Newnan	347	3.25	0.98
Grantville	359	3.72	1.04
Hogansville	366	3.62	1.04
La Grange	379	3.89	1.03
West Point	395	3.70	0.94
Opelika	417	3.00	0.72
Montgomery	483	3.00	0.62

These rates are the same as those in effect from Savannah to the same points over a route to the shorter distance points mentioned which may be wholly within the state of Georgia, and the rates from Savannah are subject to approval by the Georgia Railroad Commission, the complainant in this case.

The fertilizer rate to Newnan where competition in carrying exists by the Central of Georgia is only 11 cents more than the Atlanta rate, while to Grantville only 12 miles farther from Atlanta it is 58 cents above Atlanta and 47 cents higher than the rate to Newnan.

29. Fertilizers are low grade freight and much of it comes by water to South Atlantic ports. The rail rate per ton on fertilizers to all stations beyond Atlanta on the Atlanta & West Point road, including West Point, is the same from Richmond, West Point, Norfolk, Portsmouth or Pinners Point, namely, \$4.35 per ton, and it is \$3.89 from Wilmington, the same as the rate from Charleston to La Grange and West Point. The rate to Opelika from Wilmington is \$3.89 and from the other ports it is \$4.25 per ton.

31. The following statements show rates by all-rail and rail and water routes from New York, Baltimore and Cincinnati to the more important basing points in the territory under consideration.

82. The complainant, the Georgia Railroad Commission, under authority conferred by the Legislature of the state of Georgia, has jurisdiction of railroad transportation wholly within the borders of that state, but that Commission has no control over passengers or property transported wholly by railroad, or partly by railroad and partly by water when both are used, under a common control, management or arrangement for a continuous carriage or

shipment, between points in different states or territories of the United States. The defendants in these several cases arrange for the through carriage of property from Ohio river points, or North Atlantic ports, as the case may be, to the destinations named in the complaints. The initial line accepts traffic for through carriage and issues through bills at rates of charge for the whole distance. The carriers concerned receive the property and transport

it on to the point of destination where it is delivered to the consignee who pays to the terminal carrier the total expense of transportation, unless it has been prepaid by the shipper, and the money so collected is paid by the carrier receiving it, after deducting its own share, to the other carriers composing the through line according to the proportion which, by previous understanding or arrangement, each is entitled to receive. The initial carrier of each route is fully acquainted with the terms which each of the other carriers exacts for receiving, forwarding and delivering traffic.

The Western & Atlantic, and others, it may be assumed, have soliciting agents at Cincinnati. The various through lines are represented at important points of shipment, either by their agents or by railroad association officials, or by agents of friendly initial carriers from those points.

83. The following extracts from "Rules Governing the Transportation of Freight," issued by the Georgia Railroad Commission were put in evidence:

"RULE 6."

"Regulations Concerning Freight Rates.—The freight rates prescribed by the Commission are maximum rates, which shall not be transcended by the railroads. They may carry, however, at less than the prescribed rates, provided, that if they carry for less for one person, they shall for the like service carry for the same lessened rate for all persons except as mentioned hereafter; and if they adopt less freight rates from one station, they shall make a reduction of the same per cent at all stations, along the line of road, so as to make no unjust discrimination as against any person or locality."

"But when there are between any two points in this state two or more competing roads not under the same management or in the same system, then the longer line or lines, in order to give said points the benefit of competition, may reduce the rates between said two points below the standard tariff, without making a corresponding reduction at all stations along the lines of said roads: *Provided*, said reduction shall not make the rates less than the standard tariff rates for the shortest line between the two points. *Provided further*, that before taking effect, the proposed change of rates shall be submitted to and approved by the Commission."

By Circular No. 6 issued April 29, 1880, the Georgia Commission added the following language to "Rule 6."

"Competing lines, not all within the jurisdiction of the Commission:—But when from any point in this state there are competing lines, one or more, subject to the jurisdiction of the Commission, then any line or lines which are so subject may at such competing point make rates below the standard freight tariff, to meet such competition, without making a corresponding reduction along the line of road."

The following is an extract from a letter of 4 INTER S.

the Commission dated June 3, 1880, to Virgil Powers, then General Commissioner of the Southern Railway & Steamship Association, now a member of the Georgia Railroad Commission, the complainant in these cases:

"Under the law, freights coming from or going beyond the boundary of the state are not within the jurisdiction of the Commissioners. A shipment from Rome to Charleston, passing over the Rome, Western & Atlantic, Georgia, and South Carolina Railroads, for example, could not in any way be regulated by the Commissioners. This line then is not subject to the jurisdiction of the Commission. It competes with lines to the sea, however, which are within the jurisdiction of the Commission. All such cases are intended to be covered by Rule 6 to the end that our own roads and seaports may be able to compete with roads and seaports without the state. Shipments covered by note 1, over more than one road in this state, being shipped from any point in this state to another point in the state, are held to be within the meaning of that note—the intention being to give the railroads the largest liberty in fostering the industries of the state—and each road in such line can lower rates on such articles without conflicting with Rule 6."

"Two or more roads in the state desirous of making joint rates between points on their respective roads, may make such joint rates on articles not controlled by Note 1, by taking the rate allowed for an equal distance, if the points were on one road, and applying it to the different roads. For example:

First class—Marietta to Atlanta	20 miles	
per 100 pounds		20 cents
Atlanta to Macon,	108 miles	
per 100 pounds		48 cents
Macon to McRae,	76 miles	
per 100 pounds		30 cents

The sum of these locals for 199 miles would be \$1.07

But the rate for 199 miles, if on one road, would be per 100 pounds—first class—70 cents. Now a joint rate of \$1.07 or of 70 cents for 100 pounds could be made or a rate between these amounts—the railroads making their own divisions of the total rates between themselves."

In regard to the denial of several of the defendants that they participate in the transportation of property between points mentioned in the complaints under a common control, management or arrangement, upon the facts stated in the findings we decide that the transportation of property between points of shipment and destination named in the complaints is conducted by the connecting defendant lines under a common arrangement for continuous carriage or shipment within the meaning of the first section of the Act to Regulate Commerce.

The receipt successively by two or more carriers for transportation of traffic shipped under through bills for continuous carriage over their

lines is assent to a common arrangement for such continuous carriage or shipment, and previous formal arrangement between them is not necessary to bring such transportation under the terms of the law.

Traffic is either state or interstate traffic according to its origin and destination. It is shipped by the consignor in the state where the consignee dwells, or it is not. If not, it is interstate traffic, and when carried over two or more lines, it is, by the fact of having been received, forwarded, and delivered as one through shipment, transported under a common control, management or arrangement, as the case may be, for continuous carriage or shipment.

The phrase "common control, management or arrangement for continuous carriage or shipment" in the first section was intended to cover all interstate traffic carried through over all rail, or part water and part rail lines. The "arrangement" for continuous carriage or shipment is complete whenever the carriers have arranged for delivering and receiving through traffic to and from each other and such an arrangement is necessarily "common."

This construction of the words "common arrangement" as used in the first section of the law is in line with our decisions in *Boston Fruit & Produce Exch. v. New York & N. E. R. Co.* 3 Inters. Com. Rep. 498, 4 I. C. C. Rep. 664, and *Mattlingly v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 806, 3 I. C. C. Rep. 592, and with other rulings of the Commission.

In several of these cases the through charge to intermediate stations is made by the addition of the terminal carrier's local rate to the through rate in effect to a point on its line. This practice has been disapproved of by the Commission in other cases. *Re Tariffs and Classifications of Atlanta & West Point R. Co.* 2 Inters. Com. Rep. 461, 3 I. C. C. Rep. 19; *Hamilton v. Chattanooga, Rome & Columbus R. Co.* 3 Inters. Com. Rep. 482, 4 I. C. C. Rep. 686.

The addition of a local rate to a reasonable through rate in order to fix the through charge to the local station is liable to produce a relatively unreasonable rate to that station. The difference in situation of the basing and local points in respect of through traffic is not properly measured by the local rate for carriage between them. The reasonableness of the added local, as a local rate, is not under consideration in a case where the rate complained of is the total charge over different lines. The total rate or charge for through carriage over two or more lines, whether made by the addition of established locals, or of through and local rates, or upon a less proportionate basis, is the through rate that is subject to scrutiny by the regulating authority; how the rate or charge is

made is only material as bearing upon the legality of the aggregate charge, and how any reduction ordered may be accomplished, whether by lowering locals or proportions, is matter for the carriers to determine among themselves.

The rate over through connecting lines is correctly adjusted upon the distance through, and not upon the shorter distances over the several lines. *Coze Bros. v. Lehigh Valley R. Co.* 3 Inters. Com. Rep. 460, 4 I. C. C. Rep. 535. Through and continuous lines imply through rates which must be reasonable rates. *Brady v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 78, 2 I. C. C. Rep. 181.

Where two or more roads forming a continuous connecting line between points in different states bill and carry interstate traffic through to certain stations on the last road forming such line, neither the roads together nor any one of them can evade the obligations of the Act to Regulate Commerce by declaring that as to such traffic destined to such stations on such terminal road it is a local carrier. *James & Mayer Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.*, 3 Inters. Com. Rep. 682, 4 I. C. C. Rep. 744.

As these cases all stand upon the charge of violation of the long and short haul clause, the fourth section of the statute, it becomes necessary to consider whether the defendants are justified in their conceded disregard of the prohibitive part of the provision. The point of the defense is that the transportation for shorter distances is under circumstances and conditions which are substantially dissimilar to those surrounding the transportation to the longer distance points; and this upon the assumption that they may in any case determine the question for themselves in the first instance.

The phrase "substantially similar circumstances and conditions" occurs in both the second and fourth sections of the Act to Regulate Commerce. An intelligent construction of this phrase involves the duty of ascertaining how it originated in the statute.

The words "under substantially similar circumstances" were in the discrimination clause of the original House Bill reported by the Commerce Committee of the House of Representatives in 1884. In the Reagan substitute bill the words did not appear, nor were they in the bill as it passed the House in January, 1885. The words "under similar circumstances" were used in connection with discriminations in the summary statement of causes of complaint against the railroad system contained in the Report of the Senate Select Committee presented in 1886; and the phrase "under substantially similar circumstances and conditions" was a part of the sec-

ond section of the original Senate Bill which was introduced by Senator Cullom.

During the debate upon amendments proposed by Senator Camden and Senator Aldrich some discussion was being had in regard to the word "quantity." Senator Camden proposed that the words "of a like kind of property under substantially similar circumstances and conditions" be substituted for the amendments offered, and the substitute was adopted.

A short history of the framing of the fourth section is given in the opinion of the Commission, in *Re Petitions of the Louisville & Nashville R. Co.* 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 81.

The words "under similar circumstances" had been put into a short haul provision by the legislature of Connecticut before the interstate commerce law was enacted and that statute was referred to in the Congressional debates.

The words "under the same circumstances" are in section 90 of the English Act of 1845, and they and also the words "under like circumstances," have been frequently employed by the courts of England.

Whatever use may have been made in English decisions of the word "circumstances" or of the word "conditions" the value of these decisions as precedents to be followed in deciding cases in this country depends greatly upon the similarity of the statutory provision governing the English case to the provision of our law under which the case to be determined is brought. A comparison of certain clauses in English statutes with the second, third and fourth sections of the Act to Regulate Commerce is shown below :

EQUALITY CLAUSE.

English Act.

Sec. 90 Railway Clauses Act 1845.

"And whereas it is expedient that the company should be enabled to vary the tolls upon the railway so as to accommodate them to the circumstances of the traffic but that such power of varying should not be used for the purpose of prejudicing or favoring particular parties or for the purpose of collusively or unfairly creating a monopoly, either in the hands of the company or of particular parties; it shall be lawful, therefore, for the company, subject to the provisions and limitations herein and in the special act contained from time to time to alter or vary the tolls by the special act authorized to be taken, either upon the whole or upon any particular portions of the railway, as they shall think fit:

4 INTER S.

UNJUST DISCRIMINATION CLAUSE.

American Act.

Sec. 2, Act to Regulate Commerce, 1887.

That if any common carrier subject to the provisions of this act shall, directly or indirectly, by any special rate, rebate, drawback, or other device, charge, demand, collect, or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property, subject to the provisions of this act, than it charges, demands, collects, or receives from any other person or persons for doing for him or them a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions, such common carrier shall be deemed guilty of unjust discrim-

ination, which is hereby prohibited and declared to be unlawful.

provided, that all such tolls be at all times charged equally to all persons, and after the same rate, whether per ton per mile, or otherwise, in respect of all passengers, and of all goods or carriages of the same description, and conveyed or propelled by a like carriage or engine, passing only over the same portion of the line of railway under the same circumstances; and no reduction or advance in any such tolls shall be made either directly or indirectly in favor of or against any particular company or person traveling upon or using the railway.

UNDUE PREFERENCE CLAUSE.

English Act.

Sec. 2, Railway and Canal Traffic Act, 1864.

Sec. 11, Railway and Canal Traffic Act, 1873.

* * * and no such company shall make or give any undue or unreasonable preference or advantage to or in favor of any particular person or company, or any particular description of traffic, in any respect whatsoever, nor shall any such company subject any particular person or company, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever, * * *

UNDUE PREFERENCE CLAUSE.

American Act.

Sec. 8, Act to Regulate Commerce.

That it shall be unlawful for any common carrier subject to the provisions of this act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

THE 4TH SECTION OF THE ACT TO REGULATE COMMERCE.

"That it shall be unlawful for any common carrier subject to the provisions of this act to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance over the same line, in the same direction, the shorter being included within the longer distance; but this shall not be construed as authorizing any common carrier within the terms of this act to charge and receive as great compensation for a shorter as for a longer distance; *Provided, however,* That upon application to the Commission appointed under the provisions of this act, such common carrier may, in special cases, after investigation by the Commission, be authorized to charge less for longer than for shorter distances for the transportation of passengers or property; and the Commission may from time to time prescribe the extent to which such designated common carrier may be relieved from the operation of this section of this act."

At the time of the enactment of this section no similar provision was contained in any English statute. The Railway and Canal Traffic Act of 1888, after re-enacting the undue

preference clause of 1854, also provides in paragraph 3, section 27, as follows:

"The Court or the Commissioners shall have power to direct that no higher charge shall be made to any person for services in respect of merchandise carried over a less distance than is made to any other person for similar services in respect of the like description and quantity of merchandise carried over a greater distance on the same line of railway."

The difference between the English and American acts in respect to long and short hauls is that there the Commission or the Court is *empowered to prohibit* the greater charge for the shorter distance, while here the law itself prohibits the greater charge for the shorter distance when the circumstances and conditions surrounding the transportation are substantially similar, but *empowers the Commission to authorize* the less charge for longer distances.

In England a complaint of greater charge for the shorter haul is triable under the undue preference clause, which is nearly identical with a portion of section 3 of our law, and the English Commission or Court may prohibit such greater charge. But in the United States such a proceeding must be brought under the fourth section of the Act to Regulate Commerce.

In either country a complaint of undue preference or prejudice must (prior to the English Statute of 1886 which shifted the burden to the carrier) be supported by proof of damage which makes the preference or prejudice unreasonable or undue, but in cases brought under our fourth section or long and short haul clause, which particularly describes the act it declares to be unlawful, such proof is not required.

A case of undue or unreasonable preference or advantage or prejudice or disadvantage includes, as the terms themselves imply, consideration of all those circumstances and conditions which bear, not only upon the transportation by the carrier, but also often relate to the value and volume of the traffic, the favorable or unfavorable location of the places involved in the controversy, character of grades on different divisions, lateral lines, and other essential elements which enter more particularly into matters of relative services and relative rates.

This undue preference clause may justly be termed an omnibus provision, enacted first by Parliament and then by Congress to prohibit carriers from doing any act which unduly or unreasonably puts one shipper or description of traffic up in the scale of favor or puts another shipper or description of traffic down to his or its disadvantage or wrong. But when the Act to Regulate Commerce was passed Congress not only adopted that clause but saw fit to go further and specify that certain charges by the

carrier would in themselves constitute wrong. The second and fourth sections of the Act—that is, the unjust discrimination and long and short haul clauses—are provisions of this character. Under these sections the carrier must not charge more for like service nor more for less service rendered in the transportation of a like kind of traffic under substantially similar circumstances and conditions. These provisions describe the offense and limit the circumstances and conditions to be considered to those under which the transportation is conducted. The undue preference clause of the English statute, which was copied into the third section of our law, contains no such description or limitation, nor do the words, "substantially similar circumstances and conditions," or any of them, appear therein.

Considerable variation in language is also found in comparing the English equality clause of 1845 with the second or unjust discrimination clause of our law. That the latter covers much more ground must be apparent to the casual observer, and if it were not for the fact that our second section contains the phrase "substantially similar circumstances and conditions" and the English equality clause in its proviso has the words "under the same circumstances" no reference or comparison would be deemed necessary.

The frequent citation of English decisions in cases affecting interstate transportation with manifest disregard of vast differences in facts, time, extent of country, methods of trade and transportation and great dissimilarity in statutory provisions, is ample warrant for the above somewhat extended comparison and for the following examination of some English cases which have been quoted for the purpose of influencing decisions in this country.

The case of *Attorney General v. Birmingham & Derby Junction R. Co.* (2 Ry. & Can. Cas. 124), was recently cited in a case brought under the second section of the Act to Regulate Commerce. The English case was decided in August, 1840. The American case was tried in 1890, fifty years later. The railway in the English case was operated under a special act which contained an equality clause similar to the proviso of section 90 of the English Act of 1845, above quoted. A passenger journeying to London over connecting railways was charged by the first railway for the carriage between two points on its line less than it charged to another passenger who only traveled between the two points on the first carrier's line, but the through charge to London was not less than the charge for the local or intermediate journey. The case was dismissed because prejudice to the latter class of passengers was not shown, and for the further reason that the higher rate charged was not in itself unreasonable. In that case the differ-

ence in destination made out the difference in circumstances which the special act required should be "the same." To charge less per mile for greater distances is a common rule of transportation and its legality is well settled.

The case in which the foregoing was cited related to charging a party of ten or more persons less *per capita* than was charged to single passengers, the journeys of the party and of the single passenger being between the same points, and in the same train; it was brought under a provision of our law which merely specified that the circumstances and conditions should be *substantially similar*, and not the same, and its phraseology is entirely different from that of the English Equality Clause of 1845. The fact that charges are not unreasonable *per se* does not prevent their being relatively unreasonable or constituting unjust discrimination under our second section by reason of being unequal. If the circumstances and conditions are substantially similar for like service, the discrimination is declared in the law to be unjust, but the English Statute required the circumstances to be the same.

The case of *Hozier v. Caledonian R. Co.* 1 Nev. & McN. 80, was also cited in the same case as showing that the parties must be shown to be competitors. So, also, in like manner were *Jones v. Eastern Counties R. Co.* 1 Nev. & McN. 45; *Painter v. London, B. & S. C. R. Co.* 3 C. B. N. S. 702, and *Infracombe T. C. Co. v. London S. W. R. Co.* W. N. 289, referred to. All these cases were tried with reference to undue preference or prejudice, which had to be shown to exist before the defendants could be held guilty of unlawful action. But in the case they were cited to influence no such showing was called for. Can it be said that the cases thus cited might not have been differently decided if tried under a provision of law like our second section, which not only forbids but defines the thing forbidden? The English statutes do not show any such definitive rule as is contained in the second and fourth sections of the Act to Regulate Commerce. Section 90 of the 1845 statute, in its proviso required equality when the carriage is over the *same portion of the line* under the same circumstances. Section 2 of our Act only requires the traffic to be like, the service to be like and contemporaneous, and the transportation under *substantially similar* circumstances and conditions. The provisions are so different in terms that the same set of facts might constitute immunity under the English provision and guilt under our law. Indeed, the Supreme Court of the United States tersely says of the English acts: "These traffic acts do not appear to be as comprehensive as our own and may justify contracts which, with us, would be obnoxious to the long and short haul clause of the Act, or would be open

to the charge of unjust discrimination." *Interstate Commerce Commission v. Baltimore & O. R. Co.* 145 U. S. 263, 36 L. ed. 98. Take the case of *Hozier v. Caledonian R. Co.*, above mentioned. This was a long and short haul case. The decision was under the undue preference clause and to the effect that there must be competition of interest, or the complainant must show personal disadvantage, before he has title to complain, the fact that the complainant had frequent occasion to travel not being sufficient. Would this decision be possible under our fourth section?

The case of *Jones v. Eastern Counties R. Co.* 1 Nev. & McN. 45 is another passenger case where more was charged from one station than from another station situate a further distance on the same line. The rule was refused because *undue preference* was not shown. The mere suggestion of undue preference was held to be insufficient. Under the fourth section of the Act to Regulate Commerce, proof of the greater charge for the shorter distance would have been sufficient, for there was nothing whatever in the case upon which the defendant could base justification under our long and short haul clause. In a brief for defendants in these cases of the Georgia Railroad Commission this case of *Jones v. Eastern Counties R. Co.* is cited to show that through and local traffic constitutes such difference that the greater charge does not unduly prejudice the shorter distance points, and also that when active competition exists at the longer distance point it affords a good reason for making the lower charge. If our long and short haul clause did not exist and the case were brought under the undue preference provision the through and local traffic defense might possibly have some weight, but in the face of the mandate contained in the fourth section the claim of justification on the ground that one traffic is local and the other through is absurd. To allow such claim would be to defeat the object of the section. The rate on through traffic to the longer distance point may be proportionately less than the rate on local traffic to the intermediate point, but under the fourth section it cannot be less in the aggregate. As to competition, the position of the Commission has hitherto been well defined. Some competition does afford justification and some does not, and this matter we expect to treat extensively further on in this report. But the Jones case had in it no element of competition. Whatever was said there in relation to through and local traffic and competition was spoken by the judges at the trial. The decision was that the mere suggestion of preference because of the greater charge for the shorter distance was insufficient.

The same brief cites *Strick v. Swansea Canal Co.* 16 C. B. N. S. 245, decided in 1864. A pro-

viseo in a canal act was similar to the proviso in section 90 of the 1845 statute. It was held competent for the company to carry at a lower rate for a particular individual in consideration of a large guaranteed minimum toll in order to enable them (the company) to enter into competition with a rival line of railway. We think other English decisions in similar cases have a different conclusion, but whether this is true or not it is too manifest for discussion that our second section would forbid the ruling here (*Providence Coal Co. v. Providence & W. R. Co.* 1 Inters. Com. Rep. 368, 1 I. C. C. Rep. 107), and moreover, that such a contract would in this country be held in contravention of the common law. *Hays v. Pennsylvania Co.* 12 Fed. Rep. 809.

In a case lately decided by the English Commission entitled *Liverpool Corn Trade Assn. v. London & N. W. R. Co.* L. R. 1 Q. B. Div. 120, 45 Am. & Eng. R. Cas. 216, the conflict of English decisions was commented upon as follows:

"The question had several times been mooted whether a rate so low as, when compared with another, to amount *prima facie* to an undue preference, could be justified on the ground that it was rendered necessary by the existence of competitive modes of carriage, whether by land or water. The state of the authorities upon the matter was far from satisfactory. The dicta in *Harris v. Cockermouth R. Co.* 3 C. B. (N. S.) 693, at p. 718; *per Cockburn, L. C. J.*, and in *Ransome v. Eastern Counties R. Co.* 4 C. B. (N. S.) 185, at p. 177, *per Crowder, J.*, are I think, very difficult to reconcile with the decision in *Budd v. London & N. W. R. Co.* 4 R. & C. T. Cas. 893, n.; 36 L. T. (N. S.) 802. The manner in which the question how far the necessities of competition will justify preferential charges was touched upon in *Garton v. Bristol & Exeter R. Co.* 6 C. B. N. S. 639, throws no additional light upon the subject. *Budd's case*, 4 R. & C. T. Cases, 393 n., 36 L. T. (N. S.) 802, is open to the further observation (for which I am indebted to *Sir F. Peel*) that it is in conflict with the subsequent Scotch case of *Murray v. Glasgow & S. W. R. Co.* 4 R. & C. T. Cas. 456, 11 Court Sess. Cas. 4th Series, 205, in the court of session, and the case of *Denaby Main Colliery Co. v. Manchester, S. & L. R. Co.* 14 Q. B. Div. 209, 11 App. Cas. 97, 26 Am. & Eng. R. Cas. 93, in the English court of appeals, where it was laid down that an action will not lie to recover overcharges made in violation of the provisions of the Act of 1854, against undue preferences. When the *Denaby Main case*, 14 Q. B. Div. 209, 11 App. Cas. 97, 26 Am. & Eng. R. Cas. 93, was in the House of Lords the question was not decided, and the state of the authorities has been discussed by *Cave, J.*, in his judgment in *Lancashire & Y. R. Co. v.*

Greenwood, 21 Q. B. Div. 215, 35 Am. & Eng. R. Cas. 587."

In a still more recent case decided in the English Court of Appeal, the above mentioned cases of *Harris v. Cockermouth*, *Denaby Main Colliery Co. Ransome v. Eastern Counties R. Co.* and also *Evershed's Case*, L. R. 3 App. Cas. 1029, were discussed; and the case of *Budd* was held to be no longer law.

The ruling on the main question presented by the appeal was that the railway commissioners or the court may take into consideration the existence of a competing route between the same points in considering a case of alleged undue preference.

Phipps v. London & N. W. R. Co. [1892] 2 Q. B. 229.

In that opinion *Lord Herschell* said of the Equality and Undue Preference clauses:

"Where there is a breach of the equality clause, no doubt you may sue to recover the difference on the basis that you can compel the railway company to pay you back anything which you have paid over what, for precisely the same service, they have charged to another. But under the Railway and Canal Traffic Act, as was pointed out in the House of Lords, the company have their option. They may put up one charge, they may put down the other. It is not an equality clause; it is only a clause relating to undue preference or advantage."

"The words of the equality clause have no elasticity at all; there are no outside circumstances to be taken into consideration, and it is not a question of regarding the position of the one trader as compared with the other, and then saying whether there is any undue preference. It is an absolute rigid equality which is demanded by the statute."

These words of the learned English judge clearly illustrate what we have said in relation to our own second and fourth sections as compared with the undue preference section which was copied from the English statute into our law.

It is unnecessary to continue this examination. In a case purely of alleged undue preference or prejudice the English cases have direct application. Even in cases under our second and fourth sections, English cases brought under the undue preference clause in which the decision has held undue preference to exist, have value as showing how strictly the English Commission or Court has applied the broad language of the clause to a particular set of facts, but when English decisions under the undue preference clause are cited by a carrier in justification of its action under the strict language of our second and fourth sections, the citations have greatly diminished force. These sections apply only against rates in specific cases, but the undue preference clause or third section is inclusive; it applies both to rates and facilities, and says generally to the carrier, you shall not in any manner un-

duly prefer one person or kind of traffic over another, and leaves it to the Commission or the Court to say when the undue preference is given. In the second and fourth sections what is unlawful is clearly defined, the circumstances and conditions of the transportation being similar in substance. We think, therefore, that while English cases are valuable as defining undue preference or prejudice their value is greatly limited in cases where the statute itself describes the offense it declares unlawful.

In regard to such elements of transportation as through and local traffic and cost of service we cannot do better than reiterate what was held by the Commission in *Re Louisville & Nashville R. Co.*:

"The Commission further decides that when a greater charge in the aggregate is made for the transportation of passengers or the like kind of property for a shorter than a longer distance over the same line in the same direction, the shorter being included in the longer distance, it is not sufficient justification therefore, that the traffic which is subjected to such greater charge is way or local traffic, and that which is given the more favorable rates is not.

"Nor is it sufficient justification for such greater charge that the short haul traffic is more expensive to the carrier, unless when the circumstances are such as to make it exceptionally expensive, or the long haul traffic exceptionally inexpensive, the difference being extraordinary and susceptible of definite proof."

Disproportionate expenses of carriage and great variation in the volume of traffic to various points are ever present in railroad service, were within the knowledge of Congress when the section was framed, and must of necessity have been considered as not constituting substantially dissimilar circumstances and conditions, in other than extraordinary cases, for under the contrary view it is manifest that in a large majority of cases the design of the section would be defeated. As above stated, a defense of the higher rate for the shorter haul which is based upon cost must amount to a practical demonstration that the short haul traffic is exceptionally expensive or the cost of the long haul transportation exceptionally low.

It is unnecessary to go over ground which was so carefully covered by the Commission in the Louisville & Nashville opinion, and we will at once proceed to the main question: What are the circumstances and conditions which a carrier may in the first instance take into account in fixing rates for longer and shorter distances over its line?

Under necessary and well settled rules of railroad transportation essentially different circumstances and conditions constantly arise. The section says, "The transportation of a like kind of property under substantially sim-

ilar circumstances and conditions." A barrel of flour is a like kind of property with a carload of flour, but they are different units of quantity, and the transportation of a carload is not under substantially similar circumstances and conditions with those which apply to the shipment of a barrel, or, under present rules of transportation, any number of barrels less than a carload. Other examples would be one horse and a carload of horses, furniture knocked down or set up, small lots of grain in sacks or loose in carloads, and so on through the great variety of articles of commerce which seek carriage in different quantities and forms.

It is proper also to recognize the right of a carrier to charge different but duly published rates according as its liability is diminished by proper conditions stated upon the bill of lading accepted by the shipper or upon the ticket accepted by the passenger whereby the carrier, under such special contract, secures to itself some lawful pecuniary or economic advantage. These and other transportation methods not necessary or possible to specify constitute many kinds of essentially dissimilar circumstances and conditions arising upon its own line by which a carrier may rightfully be governed.

Circumstances and conditions affecting transportation also arise through competition with other carriers for business; that is, circumstances and conditions which do not wholly arise upon the carrier's own line.

The necessity for a construction of the fourth section of the Act became apparent almost immediately after the organization of the Commission. A large number of applications for relief were then filed by roads operating in all sections of the country. Investigations were held in many places and on June 7, 1887, the applications were disposed of in the opinion above quoted from, the Louisville & Nashville case, and it was intended that the construction there laid down should be sufficient for all cases based on similar grounds which might thereafter arise under the fourth section; but the construction put upon the statute at that time seems to have been misapprehended in some essential particulars by carriers.

The Commission held in that case that the phrase "under substantially similar circumstances and conditions" in the fourth section is used in the same sense as in the second section; and under the qualified form of prohibition in the fourth section carriers are required to judge in the first instance with regard to the similarity or dissimilarity of the circumstances and conditions that forbid or permit a greater charge for the shorter distance. The Commission said in regard to the employment of the same qualifying phrase in both sections 2 and

4: "It will be observed that the phrase is precisely the same; and there can be no doubt that the words were carefully chosen, probably because they were believed to express more accurately and precisely than would any others the exact thought which was in the legislative mind. And in this section (2) as well as in section 4, the phrase is employed to mark the limit of the carrier's privilege; its privilege, too, in respect to the very subject matter with which section 4, where it is employed, has to do, namely, the charges for transportation service."

In all cases under the second section the actual facts are of necessity entirely within the carrier's knowledge. The qualifying phrase, under substantially similar circumstances and conditions, used in the same sense in the second and fourth sections, has no greater force or different meaning in the one than in the other.

In reviewing what was held in the Louisville & Nashville case the precise wording of the statute must not be overlooked. The first part of the section forbids carriers to charge more for the shorter than for the longer haul when the transportation is under substantially similar circumstances and conditions. The other portion of the section, that which relates to a relieving order by the Commission, permits such an order only for the purpose of a lesser charge for the longer haul, but the discretion of the Commission is not limited, except that the case must be special—must present a question requiring authoritative action. The Commission said in that case that if the section had passed as it once stood without containing the qualifying phrase "under substantially similar circumstances and conditions" the Commission might have exercised its discretion in all cases where the circumstances and conditions appeared to be different, and it would have entered upon its duties "with a distinct understanding of the task imposed, even though its adequate performance might have been out of the question, but modified as it now stands the necessity for a relieving order is greatly narrowed, it being obvious that no order is needed to relieve against the operation of the statute when nothing is done or proposed which it makes unlawful."

But the Commission clearly foresaw at that time that a construction of the statute which would deliver even questions purely of fact unto the carrier's judgment in the first instance, must be accompanied by a statement of principles on which such judgment must be based or the greatest confusion and litigation would follow, and thereupon proceeded to lay down for the guidance of carriers rules which would not warrant them in making charges greater for shorter distances than those established for longer hauls.

4 INTER 8.

The rules limiting the judgment of the carrier in respect to greater charges for shorter hauls were briefly stated as follows:

"Sixth: The Commission further decides that when a greater charge in the aggregate is made for the transportation of passengers or the like kind of property for a shorter than for a longer distance over the same line in the same direction the shorter being included in the longer distance it is not sufficient justification therefor that the traffic which is subjected to such greater charge is way or local traffic, and that which is given the more favorable rates is not.

"Nor is it sufficient justification for such greater charge that the short haul traffic is more expensive to the carrier, unless when the circumstances are such as to make it exceptionally expensive, or the long haul traffic exceptionally inexpensive, the difference being extraordinary and susceptible of definite proof.

"Nor that the lesser charge on the longer haul has for its motive the encouragement of manufacturers or some other branch of industry.

"Nor that it is designed to build up business or trade centers.

"Nor that the lesser charge on the longer haul is merely a continuation of the favorable rates under which trade centers or industrial establishments have been built up.

"The fact that long haul traffic will only bear certain rates is no reason for carrying it for less than cost at the expense of other traffic."

The Commission might have stopped there and directed the carriers to withdraw their applications, leaving further construction of the section to come up in cases of complaint or subsequent application for relief. But before laying down any principles except the construction as to the carrier's right of primary determination it said:

"It is manifestly important to the public interest, as well as to that of the railroads themselves, that mistakes shall as far as possible be avoided. It is also important that the general rule laid down by the statute be strictly complied with whenever compliance appears to be fairly practicable, and that carriers direct their attention more to the feasibility of coming into conformity with it than to the possibility of finding reasons upon which to ground exceptions. They are therefore entitled to the benefit of such conclusions as we have already reached upon the general merits of their applications that they may be guided thereby in the preparation of their tariffs respectively. In giving these conclusions we limit ourselves strictly to the cases presented and leave out of view such other grounds of relief, if any, as are not yet formally brought forward."

The Commission then proceeded to discuss and lay down the rules above set forth. It being apparent that competition of various kinds would constitute a main subject for consideration in cases of long and short hauls the Commission discussed the force and effect of the competition of carriers not subject to the law, and also that of carriers subject to its provisions, for the purpose of arriving at such

general conclusions in regard thereto as would properly direct carriers in establishing rates for longer and shorter hauls.

The Commission said generally on the subject of competition as creating dissimilarity in circumstances and conditions that Congress in rejecting the fourth section as introduced in both of its branches, and insisted upon in the bill passed by the House, "understood that they were not adopting a measure of strict prohibition in respect to charging more for the shorter than for the longer distance, but that they were, instead, leaving the door open for exceptions in certain cases, and among others in cases where the circumstances and conditions of the traffic were affected by the element of competition, and where exceptions might be a necessity if the competition was to continue; and water competition was beyond doubt especially in view."

But the Commission immediately said in that connection that Congress must be supposed to have allowed this because the public interest required it, and "that only legitimate open and fair competition was meant, not everything that has been done under the name of competition and which in many cases has been equally destructive of public and private right. Among common abuses have been the granting of special favor in exceptional rates, rebates, drawbacks, etc., all of which are now expressly prohibited by law when they assume the form of unjust discrimination. There has also been favoritism between places and communities, as a result of competition; but this is no longer permissible." It was also expressly stated in the opinion that the prohibitions against unjust and unreasonable rates and unjust discriminations apply as well to cases under section 4 as in other cases.

In taking this view of the meaning of the statute the Commission undoubtedly relieved itself of many onerous duties in the consideration of cases arising on applications for orders granting leave to charge less for the longer distance on the score of competition; and the difficulty of discharging these duties was clearly set forth in the beginning of the opinion. By defining the kinds of competition which might entitle the carrier to make less charges for the longer distances and thereby justify consequent greater charges on its line for shorter hauls the Commission has recognized that competition of that character constitutes a state of facts of which the carriers could judge in the first instance without giving color of right to any charges on the competing line.

Now what kind of competition did the Commission hold might, by warranting a lesser long haul charge, justify carriers in establishing greater charges for shorter hauls? The answer is: Competition with water carriers. 4 INTER 8.;

Competition with foreign railroads. Competition with railroad lines wholly in a single state. Such carriers are not subject to the law. They are independent of all regulation by the Federal authority, and consequently the carrier, subject to such regulation, in first determining for itself to charge less for the longer distance because of such competition, does not by meeting the competitive rates give color of right to rates on the other competing lines, for the law does not regulate such rates.

The Commission described one other kind of competition which might entitle a carrier to charge less for a longer haul and thereby justify short haul charges. This was in "rare and peculiar" cases of competition with a railroad subject to the Act where a strict application of the general rule of the statute would be destructive of legitimate competition. This class of cases was illustrated by two instances of very circuitous routes; one being where the competing lines run from the point of shipment, one in a direct line to the longer distance point while the other runs in the opposite direction and its traffic reaches the longer distance point by taking a wide circuit. This was the Pittsburgh or Youngstown case. The other illustration was that of roads running north and south delivering to connections at terminals or intermediate junctions, and competing to and from a common market with direct east and west roads which by reason of greatly less distance make the rates to the longer distance point.

The belief was indulged in that the carriers by strictly observing the limitations put upon their judgment in that opinion, and at the same time obeying the other provisions of the statute, would find little necessity for applying to the Commission for relief; that the operation of the law upon two carriers subject to its provisions would render competition between them an infrequent cause for seeking aid in an order relaxing the rule. But from the outset the Commission realized that the provision for relief in the fourth section would promote the interests of interstate commerce and uphold the rights of carriers by preserving competition between carriers subject to the Act which the Commission should ascertain to be legitimate. The opening part of the opinion under consideration states the view of construction which was thereafter discussed and approved: That "the order for relief would be needful only when the case was not one of plainly dissimilar circumstances and conditions, but in which, nevertheless, there might be reasons and equities that would sanction such greater charge."

Further on the Commission said:

"The later clause in the same section which empowers the Commission to make orders for relief in its discretion does not in doing so re

strict it to a finding of circumstances and conditions strictly dissimilar but seems intended to give a discretionary authority for cases that *could not well be indicated in advance by general designation*, while the cases which upon their facts should be acted upon (by the carriers) as *clearly exceptional* would be left for adjudication when the action of the carrier was challenged. The statute becomes on this construction practical and this section may be enforced without serious embarrassment."

It would be impossible to "indicate in advance by general designation" all cases of competition between carriers subject to the Act that should or should not come under the general rule. Competition between carriers subject to the Act does not constitute plainly dissimilar circumstances and conditions, for reasons which we shall now proceed to state, and the duty of primarily determining the question is laid upon the Commission by the fourth section of the statute.

The necessity for supplemental construction at this time arises from the fact that carriers in the operation of their lines have not held strictly to the principles laid down in the Louisville & Nashville opinion, under a possible misapprehension of the scope of that decision.

In stating in that opinion what kinds of competition might entitle the carrier to make lesser long-haul charges, or that create dissimilar circumstances and conditions under which it would be justified in charging more for shorter hauls, we now think, in the light of more than five years operation of the statute, that the Commission should not have included in such statement, "rare and peculiar cases of competition between railroads subject to the Act where a strict application of the general rule of the statute would be destructive of legitimate competition," if this language in the opinion was fairly susceptible of the interpretation which the carriers have put upon it. As an exception it was not consistent with the otherwise harmonious theory on which the whole opinion was based.

It constituted an exception to the clear reservation for the primary action of the Commission in cases involving competition between carriers subject to the Act which is implied in the fourth section. Because the instances of such "rare and peculiar" cases cited in the opinion are such as indicate a hardship that the Commission would not fail to recognize and by an order under the provisory clause relieve, if applied for, was no good ground for permitting the carriers to determine for themselves what cases of such competition are *rare and peculiar* or when any cases of strife for traffic between carriers subject to the law will, if the strict rule of the fourth section is applied, be "destructive of legitimate competition." From the fact that many carriers have, as was natural, expanded the permission restricted to

"rare and peculiar cases" into a privilege to presume that whenever they engage in competition with other carriers subject to the Act the case becomes "rare and peculiar," the exceptional ruling has become inoperative, delusive, and opened the door to many evasions of the statute. We think there is nothing in the statute which warranted the exception.

The prohibitory part of the fourth section of the statute is followed by this proviso:

"That upon application to the Commission appointed under the provisions of this Act, such common carrier may, in special cases, after investigation by the Commission, be authorized to charge less for longer than for shorter distances for transportation of passengers or property; and the Commission may from time to time prescribe the extent to which said designated common carrier may be relieved from the operation of this section of this Act."

Force must be given to this part of the section as well as the other.

In the framing of the fourth section it appears that a proviso of this character was made a part of it before the words "under substantially similar circumstances and conditions," were inserted in the preceding general rule. The debate indicates that the then object of the proviso was to give the Commission substantially discretionary power to relieve carriers from the operation of the general rule. The subsequent incorporation of the clause, "substantially similar circumstances and conditions" in the prohibitory part of the section, the same phrase being already in the second section, could only have been intended to provide for a class of cases where the carrier is capable of determining for itself whether the transportation conditions are similar, and this it can easily do when the competition is with carriers not subject to regulation under the Act. If it had been intended by that phrase to cover all cases of dissimilar circumstances and conditions apparent and actual, regardless of whether fairness and justice to carriers, shippers and localities demanded the exceptional charge, then the proviso would have been stricken out when the similarity clause was inserted. But the debates indicate that both the proviso and the clause were regarded as necessary, and that the proviso would apply to a class of cases not intended to be covered by the similarity clause.

In the absence of anything in the phraseology of the statute which clearly indicates to what class of cases these two provisions respectively apply, it becomes necessary to seek for an interpretation that is reasonable and will give effect to both clauses. A statute must, if possible, be so construed as to give effect to all its provisions.

The competition of carriers subject to the Act with carriers not amenable to its provisions plainly constitutes dissimilar circumstances

and conditions which justify a reasonable departure from the rule of the fourth section if the competition be actual and controlling in respect to traffic important in amount. This includes the competition of independent water lines, independent state railroads, and foreign railroads, where they have not so connected themselves with the carriage of interstate traffic as to thereby become subject to the Act.

Of the similarity or dissimilarity in the circumstances and conditions which originate in real and tangible competition with lines not subject to the Federal authority the carrier is obviously well qualified to judge and determine for itself in the first instance. Such circumstances and conditions have direct bearing upon traffic over the line and are not subject to qualification by a multitude of other facts pertaining to lines of other carriers subject to Federal regulation. For instance, the competition between rail carriers both subject to the Federal law for business between two points does not *because it exists* constitute circumstances and conditions of transportation which one carrier is competent to say will warrant exceptional rates on its road, even though the other may have the shorter line. Such a case presents questions that can only be properly determined by the regulating authority created by the law. Rates on the competing line may or may not be lawfully adjusted, and the low rates to the competitive point may be remunerative on the shorter line but unreasonably low and unprofitable over the longer line. This is a case for investigation by the Commission, not only with reference to the long line but it also involves a scrutiny of the rates of the competing road and the reasons which cause the low rates to be charged. Another consideration is that the carriers if left to themselves are likely to force the already low rate lower and lower, whether it originally paid both carriers or not, until finally a point is reached where other traffic on both lines is burdened with part of the cost which properly belongs to the business competed for; charges to many points on both lines are thrown out of just relation, and, what is still worse, the competition which has become illegitimate is likely to have so affected rates of roads not interested in the original strife, but which have felt obliged to give relatively lower rates to competitive points on their lines in the same territory, that they too stand in unlawful light. This is illustrated to a considerable extent in the territory now under consideration. Competition unrestrained will naturally develop into reckless warfare, or, through that combination which is the logical result of destructive or ruinous competition, perpetuate a system of rates which is burdensome to many communities while it unduly favors a few, and yet brings no additional returns to the carriers

concerned. The law-making power never intended that competition should have such unrestrained and disastrous sway before the remedy of regulation should be invoked and applied.

But competition between carriers subject to the Act to Regulate Commerce *may* furnish grounds for disproportionate rates on the line of one of the carriers, and when such a railroad company meets a stronger competitor in the strife for business between the same points, such a case should, if the weaker line will gain some profit from the competitive rate, be brought to the attention of the Commission as a *special case* for relief under the proviso of the fourth section. The Commission will investigate the matter, and having in view the rights of both carriers and their duties to the persons and communities they serve, equitably determine the questions involved.

The regulation provided by the Act to Regulate Commerce is not intended to limit or restrict, but rather to preserve and encourage legitimate competition between carriers subject to its jurisdiction: but the legality of such competition should in no case be arbitrarily determined by the competitors themselves. Those who are subject to the law can never find excuse for disobedience in the disobedience of another and neither should be allowed to judge of what constitutes obedience on the part of another. Competition between carriers subject to the Act, to be legitimate, must be based upon actual compliance with the provisions of that law. When the competing carrier is not subject to the Act that fact alone may constitute a substantial dissimilarity in circumstances and conditions, because the rates of the competing carrier are not subject to regulation under the statute, so that there is no room for presumption or doubt in such a case.

In such a case it is easy to see that it was wise for Congress to allow the carrier to act independently of the regulating body in deviating from the general rule, but in a case where both carriers are subject to the statute there can be no presumption of the existence of facts that would warrant a departure from that rule, and the question whether they do exist or not must necessarily be a mixed question of fact and law depending on various considerations, as hereinbefore shown, which the regulating body must pass upon; and complicated as such a question is herein shown to be it would be contrary to all analogy to allow one of the parties in interest to determine for itself. It would be a novelty in the drafting of statutes to charge a person who is made subject to the law with the solution of such difficult and intricate problems as must arise under the fourth section of this statute on the claim of a right, arising from competition with

another carrier also subject to that law, to disregard its general provision, and which Congress foresaw could only receive just solution by wholly disinterested minds. The protection of the law extends equally to carriers and the public, and no other interpretation of its provisions than that which awards even handed justice to both is admissible.

The line between the right of a carrier to conclude for itself in the first instance and the necessity of applying to the Commission for relief we think is sharply drawn at the point where the carrier is manifestly unable to rightfully decide.

We think that in no case is there any presumption of dissimilarity of circumstances and conditions where the competing lines are both subject to the Act, and there being no such presumption neither road can deviate from the general rule on its own motion, but must apply for relief under the proviso clause of the section, and the burden will rest upon the road seeking such relief.

Under that proviso there seems to be no limitation upon the power of the Commission to grant relief when, upon consideration of all the facts the Commission is satisfied "that the interests of the commerce of the country and common fairness to the common carriers require that an exception should be made."

It is difficult to see why this proviso is not broad enough to enable the Commission to relieve all cases of hardship under the fourth section arising from competition between carriers subject to the Act, including many of the embarrassments now felt by American carriers in competition with Canadian carriers which may be subject to the Act in respect to the traffic competed for.

The foregoing has been especially directed to the competition of carriers subject to the Act between the same points.

The same course should be taken when carriers meet the competition of other lines which carry traffic to the same point but from different points of origin. The strife for trade between different markets seeking transportation for like commodities to the same locality is undoubtedly one of the most potent commercial forces of our time. But a common carrier cannot rightfully assume that this or that market upon its line is entitled as a matter of right, in shipments to a given point, to rates which another carrier sees fit to give from a market on its line to the same point. It does not follow that markets competing for trade in the same territory must enjoy similar rates in order to compete with each other; and the carrier which serves one market has no right to assume that substantially equal rates must be given. Market competition does not create circumstances and conditions which the carriers can take into account in determining for

themselves in the first instance whether they are justified under the 4th section in charging more for a shorter than for a longer distance over their lines. To determine the force and effect of such competition involves commercial considerations peculiar to the business of shippers, such as advantage of business location, comparative economy of production, comparative quality and market value of commodities, all of which are entirely disconnected from circumstances and conditions under which transportation by the carrier is conducted. Carriers cannot create abnormal situations by making rates which equalize advantages and disadvantages of competing localities and thereupon claim justification for greater charges on shorter hauls on the ground that the lesser long haul charges which accomplish such equalization are necessary to secure increase in traffic over their lines. Under the 4th section where doubt exists as to the existence of facts which would legitimately force a lower rate for the longer haul, and we think doubt must always exist where the competing carriers run from different markets, the carrier cannot assume to solve it. The propriety of applying to the Commission for relief in such a case is apparent.

To repeat the idea above discussed, the competition of carriers subject to the law between the points mutually served, or competition between different markets to the point where competing lines join, does not merely because it exists make out the dissimilar circumstances and conditions upon which a carrier may on its own motion base a lower rate for one point, while it keeps in effect a higher rate for a shorter distance over its line. They are not presumptively dissimilar. Investigation by the Commission may, with no wrong to the carrier, but with permanent benefit to the places they serve, result in bringing charges to all points in the immediate territory into closer conformity with the law, and render a lower rate for the longer distance unnecessary, or else furnish sound reasons for its being sanctioned. Regulation having been provided by Congress, its application is not only constant, but the machinery of the law is at all times available by the carriers governed, as well as by the public which the carriers serve.

The special cases referred to in the proviso of the fourth section, in which the Commission is empowered to make investigation and grant relief from the requirements of the general rule, include all cases that primarily involve questions of regulation over the respective competing lines. The line which forces the lower rate may itself be guilty of disproportionate rates. Such disparity may not be so great as to have caused a complaint to the Commission by the patrons of the line, notwithstanding the burdens imposed may be

manifest, but when rates so adjusted are made the basis of another line's departure from the rule of equitable charges, the situation imperatively calls for the intervention of the regulating authority, both in the interests of the connecting roads and of their patrons.

A construction of the law which allows a carrier to determine for itself in every instance whether the lower rate for the longer distance is warranted, is liable, when such lower rate is adopted by it, to cause another carrier serving the same territory to feel justified in establishing a lower rate for the longer distance on its line to the same point or to a different point appearing to require relatively favorable rates; and is also liable to cause other carriers in the same section to take similar action; thus creating an artificial or abnormal situation which constantly provokes belief and claim of unjust discrimination and endless controversies between shippers and carriers. Such a situation, left unchanged, presents a railroad problem most difficult of solution. But a construction of the law which will compel a carrier, before putting in a lower rate for the longer distance, to seek relief by a method which will involve a careful examination of the traffic conditions as to all the lines competing for carriage in the same territory, would tend to promote a solution more beneficial for all parties.

A concise statement of this construction of the fourth section on the point above discussed is: The carrier has a right to judge in the first instance whether it is justified in making the *greater charge for the shorter distance* under the fourth section in all cases where the circumstances and conditions arise *wholly upon its own line* or through competition for the same traffic with carriers not subject to regulation under the Act to Regulate Commerce. In other cases under the fourth section the circumstances and conditions are not presumptively dissimilar, and carriers must not charge *less for the longer distance* except upon the order of this Commission.

Aside from overruling the "rare and peculiar cases" exception, this construction is no departure from previous rulings and is not new. Soon after the Louisville & Nashville opinion was promulgated by the Commission, Judge Pardee of the United States Circuit Court approved this construction in *Missouri Pac. R. Co. v. Texas & P. R. Co.* 31 Fed. Rep. 527. Upon *ex parte* application of the receivers of the defendant for advice in relation to the construction of the fourth section of the Act to Regulate Commerce, the court held:

Under section 4 of the Interstate Commerce Law, relating to the charges for the long and short haul, it seems that where the circumstances and conditions are dissimilar there is no prohibition; where the circumstances and conditions are similar the prohibition attaches; and that where it is difficult to point out clearly

the circumstances or conditions which produce dissimilarity, the doubt should go in favor of the object of the law, and the circumstances and conditions should be taken as substantially similar. Where the circumstances and conditions are similar, or substantially similar and the result to the carrier is injurious, relief can be had only through the commission.

Neither is our view in serious conflict with the opinion expressed by Judge Deady in *Ex parte Koehler*, 1 Inters. Com. Rep. 817. The *Ex parte Koehler* cases all involved water lines and the rulings were made with especial reference to the influence of competition by that mode of carriage; and the language of the judge in the course of discussion must be construed with like reference.

The case of the *Interstate Commerce Commission v. Atchison, T. & S. F. R. Co.*, 50 Fed. Rep. 295, was brought to enforce an order of the Commission issued against the defendants in a proceeding brought before it by the San Bernardino Board of Trade. In the case before the court the defendants took a great deal of additional evidence upon the subject of water transportation at the longer distance point. The court discussed the evidence at considerable length and held that such means of transportation actually exists, is actually and actively seeking the traffic, and that shipments by water are increasing. The decision turned upon this showing, and the language of the court in the course of the discussion must be held to have been made with reference to the facts therein set forth. The principle stated by the court that to render lawful a greater charge for a shorter than for a longer haul, under section four of the Act, it is not necessary to first obtain authority of the Commission; that such charge is lawful if the circumstances and conditions are not in fact substantially similar and the carrier may determine for himself, subject to a liability for violating the Act, if, on investigation, the fact be found against him, is clearly in line with our view as to competition by water lines, or the competition of foreign railroads, or the competition of independent state railroads. The decision was not rendered upon any controlling considerations of competition between carriers subject to the law.

In the case of *Osborne v. Chicago & N. W. R. Co.*, 48 Fed. Rep. 49, Judge Shiras in charging the jury, said:

"Whether the railway company was justified by a cut rate, making what was called in argument 'illegitimate competition,' and circumstances of that kind which grow out of the handling and management of the railroad business of the country, by other competing lines, and its effect upon the business of the defendant company, in the judgment of the court, is a question that cannot be submitted to you. Questions of that kind are for the

judgment and determination of the board of commissioners appointed under this Act, and the courts and juries, when they are called to act upon particular cases arising under this Act, where it is denied that the law has been violated, are only authorized to determine the question whether in the service rendered, the character of the property, its conveyance, and other facts which inhere in the carrying of freight upon the particular line which is charged with wrong doing, there existed dissimilar circumstances and conditions relieving this company from the charge of collecting a larger rate for the shorter haul over the same line, in the same direction, and under otherwise substantially similar circumstances and conditions."

This decision distinctly follows the construction that where doubt exists, the circumstances and conditions should be taken as substantially similar. Doubt always exists as to the legitimate force of the competition between carriers subject to the law which one of them claims to compel the making of exceptional charges over its line. The law restrains both alike and the true presumption is that they have equal advantage under the law. But if hardship is encountered then relief, temporary and continuing, may on proper showing be obtained under the proviso of the fourth section.

In a case where the competition of a state railroad which in no way made it subject to the Act, was alleged to justify the lower rate this Commission sustained the defendant and laid down the following principle:

"The words 'substantially similar circumstances and conditions' as found in the second and fourth sections of the Act to Regulate Commerce in certain important particulars define the rights and duties of carriers and the rights of shippers as well. For example, if the carrier claims to act under the compulsion of circumstances and conditions of his own creation or connivance in the making of an exceptional rate, then these will not avail him; or if the carrier claims to act under a compulsion of circumstances and conditions in the making of an exceptional rate which he could obviate by reasonably fair and just exertion on his part, then they will not avail him. But if the carrier is in good faith acting under a compulsion of circumstances and conditions beyond his control, not of his own connivance, and which he could not obviate by any reasonably fair and just effort on his part, and to avoid large loss adopts exceptional rates on a portion of his line, not unreasonable in themselves, and forced upon him by the action of an independent state railroad, which is not subject to the Act to Regulate Commerce, and which is operating a slightly shorter and competing line with his own, these are circumstances and conditions under the operation of the statute which justify him in adopting such exceptional rates thus forced upon him on this portion of his line." *Business Men's Assn. v. Chicago, & P. M. & O. R. Co.* 2 Inters. Com. Rep. 41, 2 I. C. C. Rep. 52.

4 INTER S.

This ruling excludes the competition of carriers subject to the Act from the carriers' judgment.

The distinction herein made between the competition of carriers' subject to the Act, and the competition of such a carrier with those not subject to the Act, is also applicable to competition alleged in cases under the second and third sections, and the Commission so considered in *Harwell v. Columbus & W. R. Co.*, 1 Inters. Com. Rep. 631, 1 I. C. C. Rep. 237.

In a case where railroad competition was alleged by the respondent to justify the exceptionally lower rate, which came before the Commission for investigation in July, 1888, it appeared that the lower rate was caused by what the respondent termed unfair competition by the competing line, and the evidence tended strongly to show that the long haul rate was unreasonably low. *Re Chicago, St. P. & K. C. R. Co.* 2 Inters. Com. Rep. 187, 2 I. C. C. Rep. 231. In its annual report to Congress for that year the Commission said of its decision in that case:

"The reasoning seemed strong and was certainly plausible. But the question involved was a question of the construction of the Act; its answer was to be arrived at on consideration of what was probably the legislative intent. It was seen that the circumstances and conditions relied upon as entitling the carrier to make the exceptional rates were not circumstances growing out of natural causes; they were not the outcome of competition by water routes; there was no peculiarity of the line which would make the rates at the termini and at other stations relatively just; the only dissimilarity in the circumstances and conditions which attended the making of the rates at the different points was that at the termini there was sharp railroad competition and at the intermediate stations there was not.

"But this was a state of things that, at the pleasure of the railroad companies acting generally, or even of single companies disposed to act in hostility, might be made to exist at any point of railroad connection in the country; and if the greater charge on the shorter haul was admissible in the case under investigation the rule of the fourth section would be of no practical value whatever. Any railroad company might by its action absolve a competitor from its obligation, and be itself absolved in return. The legislature never intended this consequence. It did not intend, as the Commission believed, that the carriers subject to the law should at pleasure thus make the rule of the statute ineffectual.

"The carrier under investigation conformed to this conclusion and graded its rates accordingly, and the objectionable rates made by the carrier complained of were also soon discontinued."

It may not be out of place here to refer to a late English construction of the law of undue preference contained in the Act of 1888 as applied to a case where competition with other railways between the same points and also

water transportation was relied upon to justify a lower charge for a longer distance, but the shorter was not included within the longer distance.

A clause in the statute relating to the public interest and interests of the railways is carefully construed. As to the public interest it was held that the fact that it is seldom not in the interest of the public to have a choice of competing routes does not decide the question. "*It is clear that the Act contemplates the possible existence of competition which may not be in the interests of the public although it be effectual to secure traffic.*"

After considering the words "public interests" the following rules are stated in the English opinion: "It is however, as a general rule, against the public interests that uncertainty should be introduced into trade by frequent or violent or *arbitrary* changes of the circumstances under which people engaged in business have to carry it on and to make their living. It is, as a broad general rule, *against the public interests that artificial circumstances, which at the will or caprice or for the self interest of any man, or body of men, may be swept out of existence as lightly as they were perhaps created, should be permitted to interfere with the natural course of trade.* *Liverpool Corn Trade Asso. v. London & N. W. R. Co. L. R. 1 Q. B. Div. 120, 45 Am. & Eng. R. Cas. 216.*

This English case clearly illustrates our construction of the law that the existence of competition between carriers subject to the Act does not justify them in the first instance in charging a lower rate for the longer distance. We do not think that case a proper one to cite as a precedent in a long and short haul case under our statute, for the circumstances of carriage are very different. It was purely a case of relative rates of undue preference between markets, but it shows how strictly the English authorities interpret the broad language of their law in accordance with the evident intent of the law-making power.

A proceeding known as the "Import Rate Case," and instituted by this Commission to enforce its order restraining carriers from charging less for services rendered in carrying import traffic from American seaports, when shipped from foreign ports under through bills, than they charge for carrying domestic shipments of like kind of traffic between the same points was decided in the United States Circuit Court, Southern District of New York, on October 5 of the present year. The long and short haul question was also to some extent involved. Wallace, J., writing the opinion, which sustains the ruling of the Commission, in conclusion said:

"The Interstate Commerce Act would be emasculated in its remedial efficacy, if not 4 INTER S.

practically nullified, if a carrier can justify a discrimination in rates merely upon the ground that unless it is given the traffic obtained by giving it would go to a competing carrier. A shipper having a choice between competing carriers would only have to refuse to send his goods by one of them unless given exceptional rates to justify that one in making the discrimination in his favor on the ground of the necessity of the situation."

We also refer to the decision of the Commission in the case of *James & Mayer Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 3 Inters. Com. Rep. 682, 4 I. C. C. Rep. 744. In that case the defendants sought to justify the greater charge for the shorter haul on the ground of the competition of water carriers in connection with delivering rail lines from a different market. On this point the Commission held that—

"Water competition to *justify* the greater charge for the shorter distance must be competition in transportation to the longer-distance point and as to freight which, if not carried over the line on which it is located, would reach such destination by water transportation."

The case was brought by complaint. There was no appearance at the hearing first assigned. The defendants subsequently, upon the order of the Commission that the burden was upon them took a little testimony by deposition, and the case was submitted with little or no argument on either side. The ruling and the order to cease and desist from charging more for the shorter than for the longer distance was in accordance with the spirit of the Commission's previous decisions and the only logical outcome of the case. The defendants attempted to justify the greater charge for the shorter distance on the ground of substantially dissimilar circumstances and conditions, but they were not plainly dissimilar, under the construction of the section as laid down by the Commission and approved by the courts. The competition relied upon to constitute the dissimilarity in circumstances and conditions was not only from a different point of shipment but it was the competition by carriers over through routes subject to the Act. What was said in that decision with reference to the competition of markets we now re-affirm. (686, 687). The competitors stood presumably with equal advantage under the law and the exceptional rate could only be sanctioned by an order granted upon investigation which should sustain the carrier's application for relief.

The language of the fourth section presents one very important consideration which should always be kept in view, namely: that which will not amount to a *justification* of the greater charge for the shorter haul under the prohibitory rule of the section may nevertheless *warrant* the Commission in granting a relieving order upon an application for relief under the proviso clause of the section. To stand

upon one's right under the law is one thing, and to obtain relief by process of law is another. Ordinarily the Commission should not alter the standing of parties in proceedings before it. When upon complaint under the 13th section of charges alleged unlawful under the rule of the fourth section, the carrier avers substantial dissimilarity in circumstances and conditions as justifying the greater charge for the shorter distance, it is concluded by its pleading and must affirmatively show that the circumstances and conditions of which it is entitled to judge in the first instance are in fact substantially dissimilar. But upon an application under the fourth section proviso the carrier is the petitioner, not the respondent; it is not limited by the terms of the rule and may present to the consideration of the Commission every material reason for an order in its favor. And upon investigation of the matter the Commission is not confined to issues made by pleadings, but may, among other things, examine into the legality of rates on competing lines. The Commission may for cause shown on such an application institute on its own motion a collateral proceeding for the purpose of correcting apparently unlawful rates on the competing line, and pending the proceeding grant temporary relief to the petitioning carrier.

But it must not be inferred by this that the Commission will entertain applications for relief based on frivolous grounds. The petition or application must make out in statement a *prima facie* case of hardship under the rule, and when the competition of another carrier is the cause of an application to charge less for the longer distance, it must appear therein that traffic considerable in amount will be lost to the petitioning carrier if through action of the Commission its situation in regard to such longer distance rate shall not be relieved.

We must dispose of these cases under the above construction of the law. Taking up the cases in the order in which they are treated in the findings the Chattanooga-Atlanta fall-rail route, Case No. 817, comes first. In this case where all the competing lines are subject to the Act to Regulate Commerce and the jurisdiction of this Commission as to through shipments from Cincinnati, New York, Philadelphia, Boston and Baltimore, or from any Ohio river or Mississippi river point or any Atlantic port north of Charleston, the defendants had no right to put in the higher rates for the shorter distance upon their own motion, but should have made application to the Commission for relief under the proviso clause of the fourth section, and are technically not now entitled to make defense to this complaint. But a considerable portion of the evidence was devoted to this route and we ought to give the

parties the benefit of our comment and conclusions as the facts now stand.

A schedule of rates from Cincinnati to Atlanta which affords a rate per ton per mile varying on the different classes from 1.18 to 4.51 cents cannot be considered too low; on the contrary, if such a rate sheet were challenged it would take strong evidence to overcome the presumption that such rates per ton per mile are unreasonably high. But the unreasonableness of Atlanta rates is not questioned here, these rates being the lower charges for the longer distance with which rates complained of are compared. The distance from Cincinnati to Chattanooga is 886 miles, the first class rate is 76 cents and the rate per ton per mile is about 4½ cents. The distance from Cincinnati to Atlanta is 474 miles, the first class rate is \$1.07 and the rate per ton per mile is also about 4½ cents. But the rate per ton per mile from Cincinnati to Marietta, a distance of only 451 miles, is over 5 cents and 6 mills. Marietta takes a first class rate of \$1.27 from Cincinnati, being the Chattanooga 76 cent rate and the Western & Atlanta 51 cent local to Marietta. The rate per ton per mile Chattanooga to Marietta is over 8 cents and 7 mills for carrying about 117 miles, over one third the mileage Cincinnati to Chattanooga and nearly one fourth of the total distance from Cincinnati to Marietta. The per ton per mile rate to Marietta is for a fourth part of the carriage nearly double the rate per ton per mile for the other three fourths. There is 81 cents difference between the rates on first class traffic from Cincinnati to Chattanooga and from Cincinnati to Atlanta. On through business from Cincinnati 81 cents would seem to afford a sufficient margin for carrying between Chattanooga and any point on the Western & Atlantic Railroad.

Considering the relative amounts of through and local tonnage of the Western & Atlantic road, it is apparent that the reduction of rates to intermediate points to those in effect at Atlanta would result in but small loss of revenue from traffic shipped at present rates and this would very likely be more than made up by consequent increase in traffic to those points.

Carterville, Kingston and Marietta are reached by other lines than the Western and Atlantic but these lines make no competition with the Western & Atlantic in rates on traffic to these points.

In view of these facts and others shown in the statement of findings we hold that the defendants are not upon the evidence justified in making the greater charges complained of in this case. But this being the first case since the Louisville and Nashville decision in which the Commission has been called upon to specifically hold that relieving orders must be ap-

plied for in this class of cases, we think the carriers should have an opportunity in this case of applying for relief under the proviso of the 4th section, and, if possible, of bringing forward voluntarily as applicants, instead of defendants, additional evidence that may be admissible under such a proceeding, as indicated in this opinion. The order will therefore be that the defendants in this case cease and desist, within 20 days after receiving a copy thereof, from charging or receiving any greater compensation in the aggregate for the transportation of a like kind of property from Cincinnati or other points called and known as Ohio river points for the shorter distance to Calhoun, Adairsville, Kingston, Cartersville, Acworth or Marietta than for the longer distance over the same line in the same direction to Atlanta, the shorter being included within the longer distance, or, that the defendants, make and file with the Commission within the time above specified an application or applications as the case may require, as provided in the proviso of the fourth section of the Act to Regulate Commerce, for relief from the operation of that section in respect to the prohibition therein contained against charging or receiving any greater compensation in the aggregate for the transportation of like kind of property from Cincinnati and other Ohio river points to the shorter distance points above mentioned than for such transportation over the same line in the same direction for the longer distance to Atlanta, and show cause within 60 days after service of the order why such application for relief should be granted; and upon such application the evidence already taken in this case may be used. In case the application for relief shall be denied the order to cease and desist shall stand, and compliance therewith will be required within twenty days after service of the order denying the application.

The next case is the Augusta-Atlanta part water route, case No. 314. Atlanta is the longer distance point in this case as in the case just decided, and the competing lines for through transportation from New York, Philadelphia, Boston, Baltimore, Cincinnati, etc., are also the same as in that case. This route is through Charleston and there is a competing route by the Ocean Steamship Company and Central Railroad of Georgia through Savannah and Macon to Atlanta; the distance being for all practical purposes about the same over either route. The transportation by the route through Savannah is composed of a water line and a line of railroad wholly in Georgia, but we shall not now undertake to discuss what effect an attempt of the water and state lines to make low individual rates and act independently of each other as to billing and shipment or carriage, might have upon traffic routed

through Charleston. We are dealing with existing facts, and transportation over both routes is now through, and as to such transportation the carriers over both routes are subject to the Act. The East Tennessee and the Savannah, Florida & Western connecting at Jessup, Ga., also run from Savannah, Ga., through Macon, and the East Tennessee has its own line from Brunswick to Atlanta. High per ton per mile rates are produced by the locals of the Georgia Railroad and these rates, by being made part of through charges between interstate points, cause very considerable increase in rates per ton per mile for the whole route to intermediate points as compared with the rate per ton per mile produced by agreed through rates to the terminals. We are led to believe and hold upon the facts now before us that through charges over the route to the intermediate or shorter distance points are unlawful. For the reasons expressed in regard to the preceding case we shall direct the defendants to charge no more to the shorter distance points than to Atlanta, the longer distance station, or apply for relief and show cause thereon in the manner and within the time stated in the foregoing order in case No. 317. Before closing the discussion as to this case we desire to call attention to an admission by the defense in this case, namely, that Madison one of the shorter distance points would under the present method of defendants in fixing rates soon be likely to receive considerably reduced rates on account of the competition to that point through Macon situate on the Savannah route. A line extends from Macon up through Madison to Lula on the Richmond & Danville line. Madison and Social Circle both shorter distance points on the Georgia road are but 16 miles apart, and the present rates to Madison and Social Circle over this route are substantially the same. Social Circle is also connected with the Richmond & Danville road by a line to Gainesville. The apparently favorable situation of these two places in respect to transportation facilities is worthy of note.

The case numbered 325, and called the Atlanta & West Point all-rail route from Cincinnati and other Ohio river points is next in order. We do not think this case comes within the rule of the fourth section. It is conceded by the complaint and the fact appears in evidence that water competition exists to Montgomery by the Alabama river. Opelika the other longer distance point is benefited by rates lower than it would receive were it not for the influence of competition at Montgomery; and West Point is also favored thereby though in less degree. But the inherent defect in the complaint is that the transportation is not over the same line in the same direction to both the shorter and longer distance points.

The shorter is not included within the longer distance. Traffic for Montgomery and Opelika and even West Point routed by the Louisville & Nashville, one of the initial defendants, goes over a wholly different route, and as to the Cincinnati, New Orleans & Texas Pacific, another initial defendant, while the evidence is not clear upon the point, still the length of its line leads us to believe that in handling Cincinnati traffic for Montgomery and Opelika, it carries such traffic first to Birmingham and forwards to Montgomery and Opelika by connecting lines from that point. Freight from Ohio river points below Henderson may possibly go through Atlanta, but the principal point of shipment to which our attention was directed by the evidence is Cincinnati. The complaint in this case must be dismissed.

In Case No. 315, the Macon-Georgetown-Columbus Part Water Route, the lines are the Ocean Steamship Co. and the Central Railroad of Georgia, which transport the traffic from New York and other north Atlantic ports through the port of Savannah to Columbus, a longer distance point, and Everett, Butler, Geneva and Schatula, shorter distance points on the same line, and also to Georgetown, a longer distance point, and Smithville, Dawson and Cuthbert, shorter distance points on the same line. These destination points are on the southwestern division of the Central system, beginning at Macon and ending by one branch at Columbus and by another at Georgetown or Eufaula on the opposite bank of the Chattahoochee river. Columbus is also on that river. The defense claims that water competition exists at Columbus and Georgetown, the latter being about a mile east of the river, by a route which is water New York to Jacksonville, rail from Jacksonville to Chattahoochee River Junction, and steamboat up that river to Columbus and Georgetown, but admits that under present rates the Chattahoochee competition is not an element to be feared. It is also in evidence that the channel of the Chattahoochee would need to be improved before it could be extensively employed for vessels of considerable draught; but how much improvement would be necessary was not shown. This route controls the rates to the points mentioned except as they may be influenced by the river line.

There is much less disparity in rates to the shorter and longer distance points upon this route than those in effect to such points on any of the other routes named in these complaints. The highest first class rate is \$1.31 and the lowest is \$1.14, making 17 cents difference between the first class rates to Columbus or to any shorter distance station. The rates to each point are straight rates and not the addition of rates to and from a basing point. It is apparent to us that an intelligent effort has been made to keep the disproportion in long and

short haul rates down to a low degree, and upon a plan of making rates direct to the point of destination, and it is possible if not probable that the application of proper regulation to other lines in this territory may enable the carriers upon this route to strictly comply with the general rule, or at least further reduce the difference between charges for the longer and shorter distances.

But we are not assured by the evidence that water competition by the Chattahoochee river is a seriously threatening and potential factor in rate making at this time, or that if in effect it would not be over a route wholly or partially subject to our jurisdiction, and as competition with other lines subject to the Act is also in this case we think the proper and consistent course is found in the issuance of an alternative order like the one directed in cases 317 and 314, and such an order will be prepared.

The next case in order is the Atlanta-Macon all-rail route from Cincinnati. Here the Central of Georgia is again the terminal road. Macon is the longer distance point and Jonesboro, Hampton, Griffin, Barnesville and Forsyth are the shorter distance points. Macon and Atlanta, the two terminals of this the Atlanta division of the Central system, take substantially the same rates from Cincinnati. The rates to the intermediate stations are highest to the points about equi-distant between the terminals and rates on the higher classes are based on the terminal which gives the most favorable combination rate; but the lower class rates are as a rule not arrived at by adding established locals to basing point charges. The rate per ton per mile Cincinnati to Griffin, one of the shorter distance points, is 5½ cents on the first class rate of \$1.39, and the rate per ton per mile on the class D rate of 32 cents, the lowest class, is 1 cent and 2 mills. The Macon first class rate of \$1.07 is about 3 cents and 6 mills per ton per mile and the class D rate of 29 cents is about 1 cent per ton per mile. We do not hesitate to say, as a general proposition that a rate per ton per mile of 5½ cents on any class of goods for a distance of over 500 miles, as is in effect to Griffin, is apparently unreasonable; neither is a rate per ton per mile of 3 cents and 6 mills for nearly 600 miles, such as Macon has, apparently too low. We think the latter rate is in itself evidence of being profitable, and that the amount of the former leads directly towards a belief in its being extortionate. But rates generally in southeastern territory range higher than in other sections of the country, the evidence adduced at the hearing on the question of reasonableness was meagre, and we are no more prepared to say in this than in the other cases that the defendants are unable to rebut the presumption of unreasonableness which is raised by an examination of the rates alone. On this route from

Cincinnati to Atlanta the East Tennessee carries only between Chattanooga and Atlanta, but the East Tennessee runs on through Atlanta to and beyond Macon to the sea at Brunswick. It also connects at Jessup with the Savannah, Florida & Western for Savannah. The distance from Cincinnati to Macon by the East Tennessee route is 576 miles as compared with the distance by the route in this case of 591 miles, but the short route Cincinnati to Macon is formed by the Cincinnati, New Orleans & Texas Pacific to Chattanooga; the Western & Atlantic to Atlanta, and East Tennessee to Macon; distance 562 miles. The mileage from the sea to Macon is 192 miles by the Central of Georgia from Savannah, and about 200 miles by the Savannah & Western and East Tennessee from Savannah. The distance by the East Tennessee from Brunswick to Macon is about 190 miles. So that the mileage between Macon and the sea at the two ports named is about the same by either of the roads. The rates to Macon from New York or Baltimore, water and rail, and from Cincinnati, all rail, have but little variation. Macon rates, all rail or water and rail appear to meet on a nearly common basis. The Atlanta rates have been herein referred to and commented upon in other cases. Traffic to both the shorter and longer distance points in this case is only carried over lines which are subject to regulation at our hands. We therefore direct that the like order be issued in this case as was directed to be entered in the Chattanooga-Atlanta case No. 317.

We next consider case number 326, the Atlanta & West Point, part water route through Charleston from New York and other northern ports to Newnan, Grantville, Hogansville, La Grange and West Point, shorter distance points, and Opelika, the longer distance point. All of these stations are located on the Atlanta & West Point road except Opelika which is upon the Western of Alabama line. As shown by the findings applicable to this route, water and rail lines through Savannah and Brunswick can reach all the shorter distance points through Opelika, the longer distance point, except Newnan, over a shorter rail mileage than by this route from Charleston. The water lines to Savannah and Brunswick do not touch at Charleston and the difference in distance by water from New York and other points to Charleston, Savannah or Brunswick is in view of the low cost of water carriage too inconsiderable to affect the merits of the case. The actual routing of the freight over these competing routes, which also reach Atlanta, and, one of them, Newnan, by direct lines from the seaboard, is not shown, they not being parties to the case. We assume that it would be for the advantage of the Central road taking freight from steamer at Savannah

for West Point or even La Grange to route it through Opelika the longer distance point in this case, for its carrying distance would be longer than by delivering at Atlanta or Newnan. But traffic to the shorter and longer distance points does go over the route in this case, the Charleston route, and it is therefore within the rule of the fourth section and different from case 325 which we have dismissed. All the competing lines are subject to the provisions of the Act to Regulate Commerce and while under present rates of shorter lines to Opelika, West Point, etc., there may and doubtless do appear to the carriers composing the route under consideration reasons which they as carriers can but regard as forceful and controlling as to traffic and revenue, yet an application for relief by the carriers interested in present rates on traffic over this route, supported by such evidence and argument as the carriers' interest will lead them to present, and coupled with like investigation of the rates on the competing lines, may change the whole situation by bringing or retaining proper rates into effect and at the same time preserving all the just rights of each carrier and insuring equity and justice to the shippers and localities concerned. An alternative order as above outlined will likewise be entered in this case.

The Atlanta & West Point Fertilizer Route from Charleston, Case No. 324, is over the same railroads that form part of the last mentioned route from New York, to Newnan and other points. The fertilizer rates from Charleston are made in competition with rates from Savannah, and to the shorter distance points set forth in the complaint and findings the transportation from Savannah may be wholly within the state of Georgia. The rail lines from Savannah and Brunswick can also reach the shorter distance points through Opelika with fertilizers as they do with class freights mentioned under the Atlanta & West Point Part-Water Route. Fertilizers are low grade freight brought mostly, it is believed, in cheap bottoms to Atlantic ports. Rates on shipments of fertilizers from Savannah to Newnan, Grantsville, Hogansville, La Grange and West Point are exclusively subject to regulation by the complaining Georgia Commission, when the transportation is all in Georgia, and the Charleston dealer in fertilizers must meet the Savannah man by reducing prices if he cannot obtain from the Charleston route rates equally as low as those fixed by the Georgia Commission from Savannah. It seems to us that the remedy for the correction of rates on shorter hauls when competing rail shipments originate at seaports, one in and the other out of Georgia, is with the Commission of that state which is also the complainant herein. We might shut our eyes to this fact by holding that the competition is not from the same

point of departure, but considering the power and office of the complainant, we believe such a ruling would be founded more on sentiment than fact, and not be warranted by the slight evidence in this case.

This case does not fall because of the competition of the Savannah and Charleston fertilizer markets for trade at the destination points named in the complaint. If free market competition were the only factor in the case, we should decide adversely to the defendant's claim of justification. But the rates from Savannah to all the shorter distance points are not only not subject to investigation by this Commission, but are subject to the authority vested by the state of Georgia in the Railroad Commission of that state, the complainant in this case, and such complainant has, as shown in the 33d finding, made a general ruling, the stated intention of which is to give the railroads in Georgia "the largest liberty in fostering the industries of the state" in or-

der "that our own roads and seaports may be able to compete with roads and seaports without the state." We have here the anomalous case of a state board authorizing a carrier subject to its supervision to enter unrestrainedly into competition as to rates from a seaport in Georgia with interstate carriers from a neighboring seaport without the state of Georgia, and yet complaining against the interstate carriers that they violate the same long and short haul principle which it authorizes the state carriers to disregard. While the rule and explanation set forth in the 33d finding are kept in effect by the Georgia Railroad Commission, we do not think a complaint by it of rates from a southeastern seaport outside of Georgia to points in Georgia, reached also by rail lines from a seaport in that state, should be sustained.

Orders in the several cases will be made in accordance with the conclusions above stated. In this report and opinion all the Commissioners concur.

NOTE.—Since this opinion was written, the Osborne case, cited upon page 81, has been reviewed in the Circuit Court of Appeals, and the judgment of the court below was reversed, but there is nothing in the opinion of Mr. Justice Brewer which disapproves the principles laid down by Judge

Shiras in his charge to the jury, so far as quoted in this opinion; nor was anything said in the opinion of the appellate court in the Osborne case, necessary to the decision therein, in conflict with any views above expressed.

IN RE Alleged Unlawful Charges for the Transportation of Coal by THE LOUISVILLE & NASHVILLE RAILROAD CO.

Upon investigation had in a proceeding instituted by the Commission on its own motion, it appeared that the respondent had in force over its line to Nashville a special rate on coal when used for manufacturing purposes by persons named upon the manufacturers' lists prepared by the railroad company. These lists were furnished to dealers who, on selling coal to such manufacturers, issued certificates which entitled them to obtain a refund from the railroad company amounting to the difference between the regular and special rates. Pending investigation the respondent discontinued the "manufacturers rate" and put in force a new coal tariff to Nashville whereby coal, "run of mines, nut and slack," is given a rate of \$1.00 per ton the year round, and "screened" coal a rate of \$1.15 per ton. April to September, and for the remainder of the year a rate of \$1.40 per ton. The rate from the same mines to Memphis, a point affected by water competition for coal traffic, is \$1.40 per ton on all coal the year round, and respondent buys

coal at the mines and sells it in the Memphis market, *Held*,

1. That the practice abandoned by the respondent common carrier of arbitrarily determining what persons should receive the so-called "manufacturers rate" was a clear violation of the Act to Regulate Commerce.
2. That the rate of \$1.00 per ton charged by respondent upon coal, "run of mines, nut and slack," is not unreasonably low, nor disproportionate to the rate of \$1.40 per ton to Memphis; neither, in view of circumstances affecting coal traffic at Memphis, is a rate of \$1.15 on screened coal to Nashville relatively unreasonable as compared with the Memphis rate, but so long as the Memphis rate does not exceed \$1.40, rates on said kinds of coal from the mines to Nashville should not during any portion of the year exceed \$1.00 or \$1.15, respectively, and any reduction in the Memphis rate should be accompanied by proportionate reductions in rates on said different kinds of coal to Nashville.

Order served July 16, 1891.—Answer filed August 14, 1891.—Depositions filed December 21, 1891.—Hearing had March 30, 1892.—Briefs filed April 12 to 16, 1892.—Decided November 17, 1892.

Ed. Baxter, for Louisville & Nashville R. Co.
J. P. Bradford, for United Electric Railway.
George H. Armstead, for Nashville Commercial Club.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner :

This proceeding had its inception in a letter addressed by the United States District Attorney for the Middle District of Tennessee, to the Attorney General of the United States, which letter was referred by the Attorney General to the Interstate Commerce Commission for its attention. The Commission, shortly after receiving this letter, issued a notice and order, reciting that informal complaints had been made against the Louisville & Nashville Railroad Company, of unjust and unreasonable discrimination in charges for the transportation of coal, as follows: First, from different points of production, to Nashville, Tenn., as compared with the charges made for the transportation of the same commodity from the same place to Memphis, Tenn., and particularly that the rates from Earlington, Ky. to Nashville were unjustly discriminating, as compared with the rates from the same place to Memphis.

Second, that unjust discrimination was effected by the said company through the medium of rebates, between its various patrons in the city of Nashville, consisting particularly in this, that said railroad company allowed such rebates to some manufacturers and to persons engaged in running steamboats which were not allowed to the Electric Street Railroad Company of Nashville, and to other patrons of the Louisville & Nashville Railroad.

The notice further recited that the Interstate Commerce Commission had decided, on its own motion, to investigate these complaints, and it was thereupon ordered that the Louisville & Nashville Railroad Company answer the complaints above specified, and particularly state:

"First, what rates does it now charge, and what rates had it charged during the twelve months last past, for the transportation of coal from Earlington and other mines in the state of Kentucky, Jellico and other mines in the state of Tennessee, to Nashville and Memphis in the state of Tennessee.

"Second, under what circumstances, if any, and for what reasons, does the Louisville & Nashville Railroad Company pay rebates to

any person or persons at Nashville or Memphis aforesaid, on account of shipments of coal from any of the Kentucky and Tennessee mines, to this city; and if any rebates have been paid on that account during the twelve months last past, when, to whom, and in what amounts."

To this notice and formulation of complaints a paper in the nature of an answer, was filed by S. R. Knott, Traffic Manager of the Louisville & Nashville Railroad Company dated August 1st, 1891. In this paper it is admitted that the rates which that company was then charging, and had for the last twelve months charged, for transportation from the coal districts on the Owensboro Division and the Henderson Division of the Louisville & Nashville R. R. Co., were from April 1st to July 1st, one dollar per ton; and then an increase of ten cents per ton during each month (commencing with July) until November 1st, when the rates per ton reached a dollar and a half, at which figure they remained until April 1st, following.

From the mines on the Knoxville Division, embracing Jellico, the rates were all the time ninety cents higher than those above mentioned.

But the above rates were the general tariff rates; and it was admitted and explained by Mr. Knott, that on manufacturer's coal, so-called, from the Henderson and Owensboro divisions, the rate the year round, was five cents a hundred, or a dollar per ton. The rates to Memphis from points on the Henderson and Owensboro divisions, Mr. Knott stated to be one dollar and twenty cents per ton; from the Knoxville Division to Memphis, they were, as stated by him, two dollars and forty cents per ton, as of July 1st, 1890, and two dollars and sixty cents per ton, as of August 7th, 1890. Mr. Knott also stated that prior to June 5th, 1890, the rates from mines on the Henderson and Owensboro divisions to Memphis were one dollar and forty cents per ton for a time, and still prior to that time they were one dollar and sixty cents per ton.

This answer also admits that the average distance from the coal mines on the Henderson Division to Nashville is about one hundred

miles, Earlington, the principal shipping point, being one hundred and five miles from Nashville. The average distance of the same mines from Memphis is about two hundred and sixty miles. On the Owensboro Division the average distance of the mines from Nashville is about one hundred and seven miles, and from Memphis about two hundred and fifty miles. The distance from Jellico *via* Louisville & Nashville lines to Nashville, is three hundred and twenty-five miles, and to Memphis five hundred and seventeen miles. There are no special rates given to manufacturers, or on manufacturers coal at Memphis.

This answer sets up the competition at Memphis of coal brought by the river from Pittsburgh, in explanation of the low rate made by the Louisville & Nashville road on coal over its various divisions to that city, and states that the rate of one dollar and twenty cents was reluctantly agreed to by the lines hauling coal from Kentucky to Memphis, as a matter of necessity, and not as a remunerative rate, but to aid the operators to continue their coal in that market if practicable.

The answer offers the following explanation of the uniform one dollar per ton rate allowed on steam coal from mines on the Henderson Division and Owensboro Division to Nashville.

"As above shown, the L. & N. has a rate on coal to Nashville from these districts, when used for production of steam for manufacturing purposes, of 5c per hundred pounds, or one dollar per ton. The L. & N. Co. pays no rebates to any party at Nashville on account of shipments of coal from any of its mines in Kentucky. It does, however, refund the overcharges accruing between the rate on domestic coal effective from time to time, and the rate on steam coal, when such coal is used for manufacturing purposes. Owing to the manner in which coal on the Nashville market is handled by the several operators, through their agents, no other method of protecting the agreed legal rates issued from time to time on coal, whether for manufacturing or other purposes has been considered as more effective than the rules under which we are now operating. We find that it imposes much labor upon our accounting departments which we would, under ordinary circumstances gladly be rid of. At Nashville the coal is largely, in fact, almost entirely, consigned by the operator to his agent at that point. There is no specific or exclusive grade of coal used for manufacturing purposes but the several grades of coal are used equally for manufacturing or other purposes, and frequently, for their own convenience, agents deliver part of a carload to a domestic consumer and a part of the same carload to a manufacturer. While the rate on domestic coal to Nashville, considering the

value of that article at the mines and the price for which it is sold, as now fixed, is believed to be entirely reasonable, the railroad companies hauling the coal to Nashville were willing and anxious to co-operate with the manufacturers and the coal operators in furnishing that market with a good class of steam coal for manufacturing purposes at low prices, so long as it could be done without a reduction of revenues on other traffic which the transportation lines were carrying at just and reasonable rates. With this object in view and also in view of the circumstances under which coal is shipped to Nashville as above mentioned, the present plan of making and protecting rates on coal for manufacturing purposes has been allowed for several years, and I think to the satisfaction of all manufacturers at that point and in no way tending to increase the price or cost of fuel for any other purposes. It has been an advantage to the manufacturers as well as to the producer.

"The overcharges are settled on statements submitted by the several agents handling coal on the Nashville market. The Nashville manufacturer, who has used the fuel makes a certificate to that effect."

The names of a number of parties who, as manufacturers, have received this advantage are set forth in the answer, and in reference to the Street Railroad Company it is then stated:

"We have declined to extend the manufacturers' rate to the United Electric Street Railway Company of Nashville. Our rates to that point are well known. The rules governing the manufacturers rate and the reason for such rate are equally well known. They have been a matter of discussion in the public print and before committees of commercial and legislative bodies.

"We do not extend this company the benefit of the manufacturers rate because we do not recognize it as a manufacturer. We do not believe that the circumstances governing the conduct of its business at Nashville, are such as to require or even permit of our making a special concession in favor of that company, not made to other consumers at that point, and we have declined therefore, from time to time, to concede the request for such special concession in its fuel rates which the United Electric Railway Company at Nashville has made upon us from time to time, even when coupled with threats of attack through courts, the legislature and the public prints, as they have been. We do not believe that our rates on coal to Nashville, whether for manufacturing or other purposes constituted any unjust or illegal discrimination against that point or against any consumer there, but, on the other hand, that they are only fair and reasonable compensation for the service performed."

A large amount of testimony was taken in the case which establishes the following

Facts.

The Louisville & Nashville Railroad Company and the Nashville, Chattanooga & St. Louis Railway Company are the only railroad companies by which the coal in question is brought into Nashville. The coal is brought over the Louisville & Nashville, from points north of Nashville in Kentucky, and from points south of Nashville in Alabama. The coal is brought over the Nashville, Chattanooga & St. Louis from points southeast of Nashville, but in the same state—Tennessee.

The Louisville & Nashville owns a controlling interest in the stock of the Nashville, Chattanooga & St. Louis, and the coal rates over both lines into Nashville are made and maintained by agreement or "understanding" between the traffic officers of the two companies. There is no competition between railroad companies in the transportation of coal to Nashville. The Louisville & Nashville and the Nashville, Chattanooga & St. Louis also worked in harmony under an understanding to the following effect: from the coal mines in western Kentucky, on the Louisville & Nashville lines, and from the mines in Tennessee on the Nashville, Chattanooga & St. Louis lines, a rate was made to general consumers of coal in Nashville carrying according to the season of the year from \$1.00 to \$1.50 per ton; but to "Manufacturers," the minimum rate of \$1.00 per ton was accorded the year round.

Who the "manufacturers" were, who should be given this specially advantageous rate, was a matter determined entirely and exclusively by the railroad companies. The companies were in the habit of issuing lists of persons entitled to manufacturers' rates, and of changing the lists at their pleasure by either adding names of new parties or striking off names which had previously been placed there. And it very clearly appears that in some instances business men, firms or companies were refused the special rate, whose occupation would seem to be much more properly termed "manufacturing" than that of other parties to whom the special rate was given.

The "manufacturers' rate" so called was not established by a direct contract or agreement between the railroad companies and the "manufacturer," but was applied in manner following.

Consumers of coal at Nashville whether for domestic or manufacturing purposes, make their purchases from coal dealers in the city. The dealers were furnished by the railroad company with a "manufacturers' list" made up by the Company. Shipments were made to the dealers and the regular domestic coal rate was charged them, on all shipments. But

on receiving from the dealers a certificate that certain quantities of coal had been sold by them to parties on the "manufacturers' list," the railroad companies would refund, the difference between the rate paid, and the lower "manufacturers' rate."

The dealers did not however get any personal advantage from this refunding. The benefit thereof went entirely to the consumer—"manufacturer"—in the reduced price made to him by the dealer.

From Earlington, Kentucky, and other Kentucky mines on the Henderson, and the Owensboro divisions of the Louisville & Nashville Road to Nashville, the manufacturers' rate, on coal the year round was 5 cts. per 100 lbs. or \$1.00 per ton, the benefit thereof being given according to the direction of the railroad company, in the manner above described.

From the same mines to Nashville, the rate made, to all other persons, was \$1.00 per ton during April, May and June, \$1.10 per ton during July, \$1.20 per ton during August, \$1.30 per ton during September, \$1.40 per ton during October, and \$1.50 per ton from the 1st of November to the last of March.

The rate from the same mines to Memphis is now and since September 1st, 1891, has been \$1.40 per ton. This rate has remained the same during all seasons of the year and is made on all coal whether to be used for domestic or manufacturing purposes.

The mines on the Henderson division of the Louisville & Nashville road in Kentucky, are grouped along the road some twenty miles, and are from 90 to 110 miles from Nashville,—Earlington the largest shipping point on that division is 105 miles from Nashville. The mines on the Owensboro division are located along some 15 miles of the road and are from 103 to 118 miles from Nashville.

From the various mines on the Henderson division to Memphis the distance is from 250 to 270 miles, and from the mines on the Owensboro division to Memphis the distance is from 245 to 260 miles.

The Louisville & Nashville itself buys coal at these mines to sell in the Memphis market where it has an agency for the purpose. Of the total shipments of coal during the four years prior to Nov. 1st, 1891, over the Louisville & Nashville road to Memphis,—amounting to about 193,000 tons, that company through its coal agency sold about 88,000 tons.

The Louisville & Nashville, so far as appears from the testimony, has no coal agency in Nashville, and sells no coal there.

Pending the investigation in this case, the Louisville & Nashville Railroad Company has put in a new coal tariff from the western Kentucky mines to Nashville, taking effect April 1st, 1892. By this the "manufacturers' rate,"

has been abolished, and the company has relinquished the custom of arbitrarily deciding who are "manufacturers" entitled to the rate. The rates are now fixed according to the character of the coal transported, not according to the business or occupation of the person by whom it may be used. At present there is a uniform rate from the western Kentucky mines to Nashville of \$1.00 per ton to all persons, on the kinds of coal known as "run of mines, nut and slack," and this rate does not vary with the season. On "screened coal" the rate is \$1.15 per ton during the period from April 1st to Sept. 1st, while for the remainder of the year, viz: from Sept. 1st to April 1st, it has been fixed at \$1.40 per ton.

As above noted there is an unvarying rate on all coal at all seasons of \$1.40 from the same mines to Memphis.

It is the custom with some, but not all of the southern railroads, to classify coal for transportation about as the Louisville & Nashville has done by the new arrangement above referred to, and to charge a somewhat higher rate on "screened coal" than on "run of mines, nut and slack."

Among the lines which do this are the Norfolk & Western, the East Tennessee, Virginia & Georgia, the Georgia Pacific and the New-Port News and Mississippi Valley.

Among the lines which make no difference in the classification and rate, are the Cincinnati, New Orleans & Texas Pacific, and the Chesapeake & Ohio.

The Louisville & Nashville, not only makes this difference in classification between "screened coal" and the other kinds, but on the "screened coal" it makes the rates vary with the season,—that is from April to August inclusive the rate is \$1.15 and from September to March inclusive the rate is \$1.40,—while on other varieties it is \$1.00 the year round. This varying of rates with the seasons is not generally customary on other roads, and on the Louisville & Nashville it applies only on the rates to Nashville.

Concerning the practice formerly prevailing at Nashville, where the railroad company exercised the exclusive power of determining upon the persons to whom the so-called "manufacturers' rate" should be given, it need only now be said that it seems to have been a clear violation of the Act, and would have been forbidden by the Commission, had not the carrier abandoned it.

But the question still remains whether the present adjustment of rates, is a violation of law, as operating either an unjust discrimination, between Memphis and Nashville, or an unjust discrimination between different consumers in Nashville; or as establishing an unreasonably high rate on "screened coal" to

Nashville,—especially during the winter season.

The Commercial Club of Nashville, in a memorial addressed to the Commission, most earnestly protests that the new arrangement of the coal rates to that city has not really removed the discrimination complained of, and that no substantial benefit will result to the city therefrom.

The question of the probable effect of the change on the general interests of the citizens and consumers of Nashville, has been argued on the other side, by the Louisville & Nashville R. Co. in a reply to the memorial above referred to, and the claim is therein made with great earnestness and some degree of plausibility that upon the showing in the memorial and upon figures given therein a very considerable saving would result to the consumers of coal at Nashville by the new arrangement. In the record however there is no sufficient evidence as to the quantity and kinds of coal used at Nashville nor any proof of specific facts to justify a conclusion as to this matter, but upon the estimates given by the disputants it seems probable that considerable saving would result to the consumer by the new rates.

And there is this great improvement in the present adjustment over the old, that the present does not involve the arbitrary discrimination between different customers in the city, that the former adjustment did.

As between Memphis and Nashville, considering the respective distances of those cities from the mines in western Kentucky, the rate of \$1.00 per ton to Nashville, does not seem to be low compared with the \$1.40 rate to Memphis. And notwithstanding the argument that the rates to Memphis are forced down to that figure by water competition, this significant fact cannot be ignored: that the L. & N. railroad has for a number of years past been, and still is, buying coal at the western Kentucky mines, hauling it to Memphis and selling it there. There must be profit to the railroad company somewhere in the transaction and from the statements made as to the very low price of coal in Memphis as compared with the price (or cost of production) at the mines, it would seem that the profit is in the transportation.

It thus appears that the rate to Memphis is a remunerative rate to the carrier and that it is not an unreasonably low rate.

This being the case, the rate of \$1.00 per ton from the same mines to Nashville would seem to be not at all unreasonably low to the carrier. It is an average rate of about one cent per ton per mile, as against a rate of a little over one half a cent per ton per mile to Memphis.

The circumstances at Memphis may, perhaps, make it difficult to make a difference between the charges for hauling "screened coal" and "run of mines, nut and slack" to that place. And in view of the incidental testimony in this case as to the value of the different kind of coal, and of the custom prevalent among some roads of classifying "screened coal" higher than the other kind, and charging more for hauling it, it cannot with confidence be said that a difference in the rate to Nashville on the different kinds is not justified.

The amount of the difference made at different seasons of the year cannot, however, be justified either by the evidence in this case or by the custom of other roads. Indeed, the practice of making such a difference is confined on the L. & N. road to Nashville alone, and there seems no good reason why the practice should longer exist.

A difference of 15 cents per ton between the rate on "screened coal" and that on other kinds would seem to be sufficient at any season of the year. A greater difference than that is unreasonable.

The rate should be so arranged that while Memphis is getting a rate as low as \$1.40, Nashville should have a rate from the same mines of not more than \$1.00 on "run of mines, nut and slack," and not more than \$1.15 on "screened coal" at any season.

It is, therefore, ordered that from and after this date, so long as the rate charged by the Louisville & Nashville Railroad Co. for the

transportation of coal of any kind or class, from the mines on its Henderson and Owensboro divisions, in the state of Kentucky, to Memphis, shall not exceed the amount of \$1.40 per ton, the rate charged by the said company for the transportation from said mines to Nashville, of coal classed as "run of mines, nut and slack," shall not at any time, exceed the amount of \$1.00 per ton, and the rate charged by said company for the transportation from said mines to Nashville of coal classed as "screened coal" shall not at any time, exceed the amount of \$1.15 per ton. And any reduction made by the Louisville & Nashville Railroad Co., in the rate for the transportation of coal of any kind or class from said mines to Memphis, shall be accompanied by a proportionate reduction in the rates charged for the transportation of "run of mines, nut and slack" coal and of "screened coal" respectively from said mines to Nashville.

And the Louisville & Nashville Railroad Co. is hereby ordered to conform its schedules of rates, fares and charges to this order, as required by law, and is ordered to cease and desist from publishing, posting, or putting into effect or from charging, demanding, collecting or receiving for the transportation of coal from the mines on its Henderson and Owensboro divisions, in the state of Kentucky to Nashville, any greater rates than those hereby allowed and provided for.

|--|--|
| <p>1. It is the duty of the carrier to equip its road with the means of transportation, and, in the absence of exceptional conditions, those means must be open impartially to all shippers of like traffic.</p> | <p>2. Ownership of a car rented to a carrier and for the use of which the carrier pays a full consideration, does not of itself entitle the owner to the exclusive use of such car, and, if the owner may in the contract of hire to</p> |
|--|--|

the carrier stipulate for the exclusive use of the car, it must be upon such terms as shall not constitute an unjust discrimination against shippers of like traffic in cars owned by the carrier and who are excluded from the use of the car so hired.

3. Where oil is transported by the carrier both in barrels and tank cars and the use of the tank cars is not open to shippers impartially but is practically limited to one class of shippers, the charge for the barrel package in barrel shipments in the absence of a corresponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipment and des-

tinuation than to the tank shipper, is a discrimination against the former in favor of the latter, for which no legal justification has been shown in these cases.

4. The oil rates from Oil City and Titusville, Penn. to New York and New York harbor points and Boston and Boston points, exclusive of the charge for the barrel package in barrel shipments, are not shown to be either unreasonable in themselves, or relatively unreasonable as between those points.
5. An agreement for the pooling of traffic between a carrier by rail subject to the Act to Regulate Commerce and a carrier by pipe line does not fall within the description of contracts prohibited by section 5 of that Act.

Complaints filed in first two cases, Dec. 4, 1888, and in third case, Jan. 30, 1889.—Answers filed, Dec. 26, 1888, to Feb. 28, 1889.—Heard at Titusville, Pennsylvania, May 15, 1889.—Briefs filed Feb. 11, 1890, to Sept. 23, 1891.—Decided November 14, 1892.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner:

These three cases were heard together and may be disposed of at the same time.

The Independent Refiners' Association of Titusville, Pennsylvania, and the Independent Refiners' Association of Oil City, Pennsylvania, the complainants in each case, are composed of separate and distinct companies engaged in the manufacture and sale of refined petroleum and products of petroleum at works owned and operated by them in the oil regions of Pennsylvania at or near said cities of Titusville and Oil City.

The complaint in the first case is against the Western New York & Pennsylvania Railroad Company, the New York, Lake Erie & Western Railroad Company, the Delaware & Hudson Canal Company, the Fitchburg Railroad Company and the Boston & Maine Railroad Company, and it is alleged therein in substance that complainants as refiners and sellers of petroleum products ship from their works over the railroads of defendants "large quantities of petroleum to Boston, Mass., and intermediate points, and to Portland, Maine, and various points in the New England states, for sale in the markets of said places," and that the said five railroad companies, defendants, as common carriers engaged in interstate transportation, connect with each other, and by and under contracts between themselves and

various traffic arrangements form and operate a continuous through route for the transportation of petroleum products, at through joint rates of freight divided among themselves, from the oil refineries of complainants situated as aforesaid, through or partly through the states of Pennsylvania, New York, Massachusetts, Maine and other New England states. The complaint then charges:

1. That defendants, "for the transportation of the manufactured products of petroleum in barrels in carload lots from Titusville and Oil City, to Boston and other points in the New England states on the line of the Fitchburg Railroad Company and Boston & Maine Railroad Company, called "Boston points," have established and published a schedule of joint through rates, under which they charge and receive "25 cents per hundred pounds, making the rate per barrel \$1.00, the weight of the package being included and charged for therein," and that said rates are excessive, unjust and unreasonable, in violation of the Interstate Commerce Law.

2. The said rates "subject complainants and their traffic and the said localities to which their petroleum products are carried to an undue and unreasonable prejudice and disadvantage," because, (1), among other things, said rates are "practically prohibitory upon the traffic of complainants to said localities,

and under average circumstances and conditions sufficient to nearly absorb the profit of complainants in their trade to said localities, and, under conditions as they exist during some periods of each year and under competition, will entirely absorb all profit in the business of complainants to said localities, and if continued, will compel them to abandon their trade in that region of country:" and because, (2), said rates "are disproportionate as compared with the rates for the like service in the like traffic under substantially similar circumstances and conditions from Titusville and Oil City to New York and New York points, which rate is now 66 cents per barrel." It is here averred that there is "competition in said traffic by ocean transportation from New York City to Boston points, and any unjust or unreasonable difference in rates to said points as compared with New York points is injurious to complainants' business and discriminates against their traffic and said Boston points."

3. That complainants are subjected to undue and unreasonable prejudice and disadvantage in their said business and undue and unreasonable preference and advantage is given, in relation "to the traffic and transportation of refined petroleum," over the lines of defendants, "to an organization known as the Standard Oil Trust," which it is alleged "is formed by a combination of numerous firms, associations, and corporations engaged in the business of refining, buying and selling petroleum and its products for home trade and for export, and is also engaged in the business of storing crude petroleum in iron tanks, gathering the same from wells in the oil region of Pennsylvania and transporting it as a common carrier by means of pipe lines to the seaboard, at or near Philadelphia, Baltimore and New York, and to Buffalo, N. Y., and Cleveland, O., the charge to the seaboard through said pipe lines being the same as that made by the railroad companies known as the Trunk Lines." In connection with this allegation, it is further charged on information and belief, "that the defendants, either directly or indirectly, act under contracts, agreements and arrangements made by the said Standard Oil Trust or some of the pipe line common carriers allied with and forming a part of said Standard Oil Trust, to wit, The National Transit Company, with other common carriers by rail engaged in interstate transportation of petroleum, for the pooling of freights of different competing common carriers and for dividing between them some part of the net proceeds of the earnings of said common carriers from petroleum interstate traffic or of said traffic in specie, by means of which such net earnings are divided, in violation of section 5 of the Act to Regulate Commerce;" and that

the rates herein complained of are fixed by said combination under said pooling contracts or agreements, "and all connecting roads, including the initial railroad, The Western New York & Pennsylvania, which complainants must use and from which they must and do obtain their rates of through freight, are obliged to accept and charge the rate so fixed, and that said rate is made in the interest of said Standard Oil Trust and its allied companies, and with the intent, *inter alia*, of giving said Standard Oil Trust an advantage over complainants in the manufacture, transportation and sale of their products."

4. That the said rates of 25 cents per hundred pounds and \$1.00 per barrel were by a notice dated Oct. 25, 1888, effective, Nov. 6, 1888, abrogated and withdrawn as to Manchester in the state of New Hampshire, Salem in the state of Massachusetts, Portland in the state of Maine, and about one hundred and fifty other points in said states reached by the Boston & Maine Railroad Company; that said notice was not communicated to complainants, and public notice was not given thereof, and the same was not posted for public inspection in the depots or stations of the initial road, The Western New York & Pennsylvania Railroad Company, until Nov. 2, 1888; that the defendants, since said rates to said points were so abrogated, have not established and published any rates for said service to said points, although often requested by complainants so to do, and, while the defendants do not refuse to carry complainants' traffic for said points yet they will not state what the charges will be and give complainants to understand that an arbitrary addition will be made to the said already unreasonable and excessive rates of 25 cents per hundred pounds and \$1.00 per barrel (established Sept. 3, 1888) and, that, because of these things complainants are unable to ship their products to said points.

The second case is against the said Western New York & Pennsylvania and New York, Lake Erie & Western Railroad Companies, defendants in the first case and also the Lehigh Valley Railroad Company, and the complaint relates to the business of the complainants in shipping oil from their refineries at Titusville, and Oil City, over the railroads of the three defendants to the Atlantic seaboard at or near Perth Amboy, New Jersey. It is alleged that Perth Amboy is "commercially a New York harbor point," and that "the greater portion of petroleum products shipped by complainants to New York harbor points, is a very low priced refined oil, designed for export and which has no other market." The rate complained of is that fixed by the defendants for the transportation of petroleum products from said refineries over their line

through the states of Pennsylvania, New York and New Jersey. The said rate so fixed is stated to be 16½ cents per hundred pounds, or 66 cents per barrel, the weight of the package being included and charged for therein, and then follow the same averments as those in the first case as to the unreasonableness of said rate in itself, its discriminatory character as against the complainants and the alleged pooling contracts or arrangements with the Standard Oil Trust or National Transit Company.

The defendants in the third case are the Western New York & Pennsylvania Railroad Company, a party defendant in the first two cases, and the Pennsylvania Railroad Company. The complaint in this case relates to the through rate on petroleum and its products of the lines formed by defendants' roads from Titusville and Oil City *via* Irvineton and Corry, Pennsylvania, respectively; to tide-water in New York harbor in the state of New Jersey. It is alleged :

1. That the members of the complainants' associations and other refiners of petroleum, and, also, various persons, firms, corporations and associations affiliated to the Standard Oil Trust, ship petroleum and its products over said lines of the defendants between said points, and that the shippers affiliated to complainants ship principally in wooden barrels or gondola, box, cattle, or other cars, and those affiliated to the Standard Oil Trust ship principally in bulk in tank cars.

2. That a corporation, known as the "National Transit Company," controlled by the Standard Oil Trust owns a pipe line or lines from said oil regions to tide-water in New York harbor, through which oil is transported, and in consequence of the low cost of such transportation, the refining business of those affiliated to the Standard Oil Trust has increased and become very remunerative and prosperous at the Atlantic seaboard; and that within a few years, and partly due to the concentration of the refining business at the Atlantic seaboard by those affiliated to the Standard Oil Trust, there has grown into existence a large refining business in the oil regions of Pennsylvania, principally owned by the refiners forming complainants' associations.

3. That "in consequence of an advantage possessed by the refiners forming complainants' associations over the seaboard refiners, for the local and domestic markets of their vicinity and of the west, they have been enabled to maintain and increase their business," but they are subjected to great disadvantage, as compared with the refiners affiliated with the Standard Oil Trust, in respect to tide water shipments, and in the business of refining petroleum there is about forty per cent of the product which cannot readily be sold in the United States and must be shipped to the Atlantic

seaboard for transshipment to the foreign market, and without this export trade "the business of refining petroleum cannot be carried on with any profit."

4. That the National Transit Company is a common carrier of oil by pipe lines from the oil regions to New York harbor and "for the purpose of enabling it to charge and maintain a high price for the transportation of oil, so as to secure a large profit and maintain an advantage for the Standard Oil Company, and its affiliated industries, now controlled by the Standard Oil Trust, over all competitors," it has entered into a contract with the Pennsylvania Railroad Company for the pooling or division of the traffic on oil by railroad and by pipe line, one consideration of which was the maintenance of the same rates by pipe and rail line and by which the former guarantees the latter twenty-six per cent of the entire oil traffic between said points, and since the making of such contract, they have maintained the same rate of charges by rail and pipe line on such traffic.

5. That for some years the rate by defendants' lines from the oil regions to New York harbor had been 52 cents per barrel irrespective of whether the oil was shipped in bulk in tank cars or in wooden barrel packages, and under this rate, notwithstanding the disadvantage in rates (estimated at about 48 cents per barrel to which they were subjected in their export trade in competition with their rivals affiliated to the Standard Oil Trust, they were enabled by *their advantages in the local markets to maintain and even increase their business*; but that about September 13, 1888, the defendants, in common with all other railroad companies having lines leading from the oil regions of Pennsylvania to New York harbor, advanced their charges on oil shipped in wooden barrels over such lines from 52 cents to 66 cents per barrel, an advance of 14 cents per barrel, while the rate on oil shipped in bulk in tank cars remained as before 52 cents per barrel; and that the effect of this advance is to prevent the refiners affiliated with complainants from competing with those affiliated with the Standard Oil Trust for the export trade and "must result in the still further aggrandizement of the monopoly of the petroleum industry of the country already held by the Standard Oil Trust." It is charged that the rate of 66 cents per barrel is unreasonable and excessive, that it is discriminatory, that it gives the Standard Oil Trust and affiliated firms and shippers of oil in bulk in tank cars an undue and unjust preference and advantage over complainants' Associations and shippers of oil in barrel packages and subjects the latter to an undue and unjust prejudice and disadvantage.

The prayer in each of the complaints is in substance, that the defendant railroads be or-

dered, to "cease and desist from" the alleged unlawful acts complained of, to adopt reasonable and just rates for the service of transportation of petroleum and its products over their respective lines between points named, to make reparation to complainants for their alleged injuries, and for general relief.

The railroad companies made parties defendant in the three complaints have filed answers. All the allegations of acts or conduct on the part of the defendants in contravention of any of the provisions of the Interstate Commerce Law are put in issue, and the reasonableness of the rates complained of and justice of the course pursued by the defendants in respect to the traffic which is the subject-matter of the controversy, are affirmed. To avoid unnecessary repetition, the specific denials, admissions, and explanatory and argumentative statements of the several answers, will not be set forth here, but, so far as deemed material, will be referred to and considered further on in the discussion of the questions of fact and law involved in these cases.

It is suggested in the answers of the Western New York & Pennsylvania Railroad Company and also set forth in a memorandum filed by the complainants, that there are other lines of railroads besides those made parties defendant to these complaints, which carry on joint through rates petroleum products from the Western Pennsylvania oil regions eastward for the inland and for the export trade, and that these routes, including those complained against, form two classes, one carrying for the New England trade or Boston points and the other for New York points, each of said classes having the same rates for itself, and that the railroads forming these different routes are interested in the question of the reasonableness of the through rates complained of in these cases. The complainants state that they desire the general rates to be investigated rather than the special features of any particular rate, and have filed the following schedule of such lines or routes:

1. Western New York & Penna. R. R., West Shore R. R., Boston & Maine R. R., Fitchburg R. R., and several other smaller roads in the New England states to Boston points.

2. Western New York & Penna. R. R., New York Central & Hudson R. R., and Boston & Albany R. R., to Boston.

3. Western New York & Penna. R. R., Delaware, Lackawanna & Western R. R., Delaware & Hudson Canal Company's R. R., Fitchburg R. R., to Boston.

4. Western New York & Penna. R. R., New York Central & Hudson R. R. R., to New York City.

5. Western New York & Penna. R. R., West Shore R. R., to New York.

6. Dunkirk, Allegheny Valley & Pittsburgh R. R., Lake Shore & Michigan Southern R. R.,

4 INTER 8.

New York Central & Hudson R. R. R., Boston & Albany R. R., to Boston.

7. Dunkirk, Allegheny Valley & Pittsburgh R. R., New York, Lake Erie & Western R. R., Delaware & Hudson Canal Company, Boston & Albany R. R., to Boston.

8. Dunkirk, Allegheny Valley & Pittsburgh R. R., Lake Shore & Michigan Southern R. R., New York Central & Hudson R. R. R., to New York, etc.

9. Dunkirk, Allegheny Valley & Pittsburgh R. R., New York, Lake Erie & Western R. R., Lehigh Valley R. R., to Perth Amboy, etc.

10. Western New York & Penna. R. R., Philadelphia & Erie R. R., Delaware, Lackawanna & Western R. R., Delaware & Hudson Canal Company's R. R., Fitchburg R. R. to Boston.

11. Western New York & Penna. R. R., Philadelphia & Erie R. R., Pennsylvania R. R., to Communipaw, N. J., etc., New York delivery.

12. Dunkirk, Allegheny Valley & Pittsburgh R. R., Lake Shore & Michigan Southern R. R., West Shore R. R., Fitchburg R. R., to Boston.

13. Dunkirk, Allegheny Valley & Pittsburgh R. R., Lake Shore & Michigan Southern R. R., West Shore R. R., Boston & Albany R. R., to Boston.

14. Dunkirk, Allegheny Valley & Pittsburgh R. R., New York, Lake Erie & Western R. R., New York & New England R. R., to Boston.

15. Western New York & Penna. R. R., New York, Lake Erie & Western R. R., to New York.

16. And same connecting at Newburg, N. Y., with New York & New England R. R., to Boston.

Also the two routes mentioned in complaints filed.

Other points and routes incidentally interested.

A. Western New York & Penna. R. R., Philadelphia & Erie R. R., Pennsylvania R. R., "Green Line," to Philadelphia.

B. Western New York & Penna. R. R., Philadelphia & Erie R. R., Northern Central R. R., "Green Line," to Baltimore, Md.

On the filing of the memorandum of complainants and the above schedule, this Commission ordered that the various carriers composing said routes be furnished with copies of the complaints, answers and orders in these cases and allowed to intervene as parties by filing notices to that effect.

The following are the carriers named in said schedule other than those originally complained against:

1. West Shore Railroad Company.

2. New York Central & Hudson River Railroad Company.

3. Boston & Albany Railroad Company.

4. Delaware, Lackawanna & Western Railroad Company.

5. Dunkirk, Allegheny Valley & Pittsburgh Railroad Company.

6. Lake Shore & Michigan Southern Railroad Company.

7. Philadelphia & Erie Railroad Company.
8. New York & New England Railroad Company.
9. Northern Central Railroad Company.

The provisions of the order of the Commission were subsequently extended so as to embrace the Philadelphia & Reading Railroad Company and the Fall Brook Coal Company, and they, together with the above named carriers, were served with copies of the pleadings and orders in the several cases and allowed to intervene pursuant to the order of the Commission. No answers to the charges in the complaints have been filed by any of these carriers, but the Lake Shore & Michigan Southern Railroad Company enters an appearance and asks notice of hearings and other proceedings, and the New York Central & Hudson River Railroad Company "gives notice of a desire to intervene as a party defendant in said causes and to appear and be heard therein."

The Pennsylvania Railroad Company in the case against it and the Western New York & Pennsylvania Railroad Company, on June 20, 1891, filed an application to take additional testimony. The complainants in their answer resisting this application, make certain admissions as to the facts offered to be proven by the Pennsylvania Company, and that company in its reply to the answer of complainants claims that said answer "at least impliedly, admits the fact to establish which this respondent in its application asked leave to offer testimony." The application to reopen the case for the submission of additional testimony is made a year and eight months after the last testimony in the case had been taken, and over a year and four months after the case had been submitted on oral argument. There is no claim that the evidence offered has been newly discovered and no excuse whatever is presented for not producing it at the hearings where the Pennsylvania Company was represented by counsel and a large number of the officials of the Pennsylvania Company who had knowledge of the alleged facts, if they existed, were examined as witnesses. In view of the admissions of the complainants in their answers to the application, which the applicant in its reply to said answers treats as substantially conceding the facts offered to be proven (and which admissions and reply will be duly considered so far as relevant and material in our disposition of the case), and of the further fact that no additional delay should be had in these proceedings except in a clear case of necessity, the application must be and is denied.

FACTS AND CONCLUSIONS.

The leading questions raised by the pleadings in these cases relate, (1), to the lawfulness of the charge for the barrel package under the circumstances and conditions disclosed by the evidence; (2), to the reasonableness in them-

selves of the rates in question; and (3), to the relative reasonableness of the rates to Boston and New England points as compared with those to New York and New York harbor points.

1. The lawfulness of the charge for the barrel package was for the first time distinctly presented for decision and passed upon by this Commission in the case of *Rice v. Western New York & P. R. Co.* 8 Inters. Com. Rep. 162, 4 I. C. C. Rep. 181. That case was originally decided adversely to the complainants therein, 2 Inters. Com. Rep. 298, 2 I. C. C. Rep. 389, but the complaints in the present cases having been filed about that time and it appearing that a much fuller investigation of the general subject of oil transportation would be made, this Commission on motion of said complainants, April 15, 1889, issued an order opening said case for further hearing and providing that the testimony taken in the present cases should apply to said case, so far as it might be relevant. It is stated in the final decision in the case, that "as at first presented it rested mainly upon a comparison of the existing rate with a former rate of 25 cents a barrel from Titusville to Buffalo and with the proportion received by the respondent of a joint through rate from Titusville to the seaboard *via* Buffalo, but that the additional facts elicited at the hearings in the cases now under consideration introduced other and more important elements tending to show unjust discrimination between shippers of oil in tanks and in barrels, and in other particulars," and it was held in substance that the charge for the barrel package when no charge is made for the package when tanks are used, both modes of transportation being employed by the carriers, was an unjust discrimination against the shipper in barrels in favor of the shipper in tanks, and that the correction of this discrimination required "that in the transportation of oil in carloads, barrels as well as tanks, shall be regarded as only a means of carriage of the commodity, and as in case of transportation in tanks, the rate shall be charged only for the weight or quantity of the oil carried, exclusive of the weight of the barrel, and be the same for like weight or quantity carried in tanks."

The Western New York & Pennsylvania Railroad (which is a party defendant in each of the present cases, being the initial carrier in all the lines complained against) was the sole party defendant in the case of *Rice, Robinson & Witherop*, but the charge in that case was not only against the rate by that road from Titusville to Buffalo, but also involved a consideration of the proportion received by it of the through rate from Titusville *via* Buffalo to the seaboard at Perth Amboy, and the facts pertinent to the question of the lawfulness of the charge for the barrel package applicable to that case were substantially the same as

those bearing upon that question in the present cases.

The defendants transport oil in bulk in tank cars and in wooden barrels in box and rack cars. Prior to Sept. 3, 1888, the rates over the lines of the defendants on shipments of oil both in tanks and barrels had been the same for a like quantity of that commodity exclusive of any charge for the weight of the barrel in barrel shipments, but about that time, the rates on barrel shipments were increased 14 cents to New York points and more to Boston points, this additional charge being for the weight of the barrel, and as the rates on tank shipments, not including the weight of the tank or package, were not advanced but allowed to remain as they were, the result was a discrimination in favor of the tank as against the barrel shipper. The question is whether that discrimination is in the language of the statute an "unjust discrimination."

The defendants set up several matters in excuse or justification of their action in this matter. They claimed in the first place that in originally making the additional charge for the barrel package, they did so in compliance with what they conceived to be the ruling of this Commission in reference thereto in the case of *Rice v. Louisville & N. R. Co.* 1 Inters. Com. Rep. 722, 1 I. C. C. Rep. 508. This point is fully discussed in the case of *Rice, Robinson & Witherop* and it is made clear that not only no warrant for the action of the carriers proceeded against in the present cases is found in any ruling of this Commission, but also that said action is in disregard of the "principle plainly and emphatically laid down by the Commission," in said case of *Rice* and also in the subsequent case of *Scofield v. Lake Shore & M. S. R. Co.* 2 Inters. Com. Rep. 67, 2 I. C. C. Rep. 80. If it be conceded that in the language used by the Commission in said cases there was some color for the original institution of the discrimination arising from the charge from the weight of the barrel, yet no authority for the continuance of that discrimination can be predicated of such language since the issuance by the Commission and communication to the carriers of the memorandum entitled, "*Re Relative Tank and Barrel Rates on Oil*," 2 Inters. Com. Rep. 245, 2 I. C. C. Rep. 365, in which it was declared that the action of the carriers in this particular was unwarranted by the decisions in said cases.

Having instituted the discrimination in order, as they allege, to bring their practice into conformity with what they understood to be the rulings of this Commission, the carriers now seek to justify and maintain this departure from their former custom of long standing on other grounds.

It is claimed that in case of special facilities at loading and unloading points, the tank cars

are handled more rapidly than cars carrying oil in barrels. This may be true, but the testimony is that the railroads do not provide these facilities and there are none at the seaboard of which the complainants can avail themselves. When special facilities for loading and unloading tank cars are not available, greater delay occurs than in loading and unloading barrel cars.

It is further set up by the carriers in justification of the charge by the barrel package, that the barrel belongs to the shipper and is an article of merchandise, and when shipped from the oil region to the seaboard sells for an advance over cost in the oil region equal to the freight paid on the barrel. They estimate the cost of the barrel in the oil region without manufacturer's profit at from \$1.11 to \$1.16 and the selling price in New York at from \$1.80 to \$1.82½ per barrel, which would be a profit somewhat greater than the amount of the freight charge of 14 cents. This estimate, however, only includes the cost of the barrel as received from the barrel maker and ignores the further cost incurred by the refiner in preparing the barrel as a receptacle of oil. After the barrel is received from the manufacturer, the refiner has to paint it on the outside, coat it with glue within, put in a bung hole and provide a bung, plug worm holes, recooper the barrel and see that it is perfectly tight. The proof shows that the cost of the labor and material for this preparation of the barrel is from 16 cents to 17 cents per barrel, and that this added to the original cost as received from the manufacturer makes the total cost per barrel to the refiner from \$1.80 to \$1.82½, the selling price in New York.

The total cost of the barrel and its preparation to the refiner at Titusville and Oil City is shown by the following itemized statements, the first being made at Oil City and the second at Titusville:

I.

New Barrels with heavy iron for export.....	1.16
Labor in coopering, gluing, painting, and loading on cars per barrel.....	.065
Glue per bbl.....	.065
Paint, Rosin, Naptha, &c., per bbl.....	.020
Bungs, Stencils, Brushes, Repairs to machinery and buildings, Steam Rc.....	.025
Total per bbl.....	\$1.825

II.

New Barrels, heavy hoops, average price.....	1.13
Total labor.....	Per bbl..... .06
Glue.....	"..... .06
Paint, Rosin, Naptha.....	"..... .02
Bungs, Rivets, Iron, Plugs.....	"..... .005
Stencils, Brands, Brushes, Brooms, etc., per bbl.....	.005
Tools, Utensils, fillers, hose and machinery..	.02
Total per barrel.....	\$1.30

If sold in New York or paid for as part of the consignment, the barrel does not bring more than its cost to the shipper and when returned empty it is at the shipper's expense. Moreover, as is said in the *Rice, Robinson &*

Witherop case, "in the carriage of oil the barrel is not shipped as merchandise but as a package or means of transportation of the oil." 3 Inters. Com. Rep. 162, 4 I. C. C. Rep. 152.

It is also maintained that the transportation in tanks yields the carrier a larger revenue above the cost of service than that in barrels. In support of this contention, tables showing dead and paying weight hauled in tank cars carrying oil in bulk and in box cars carrying oil in barrels, respectively, were introduced in evidence on the part of the defendants and it appears therefrom that the amount of paying freight hauled in the average tank car is greater than that in the average car loaded with barrels, and that in consequence the revenue to the carrier is somewhat greater in the former case than in the latter, even when the barrel package is charged for and is of course still greater where no charge is made for the barrel package. It is estimated by one of the witnesses that at the present rate of 16½ cents per 100 lbs. to New York points, the carrier would receive on an average train load, the barrel package being charged for, \$35.76 more for the transportation of oil in tanks than in barrels, and excluding the charge for the barrel package, \$237.20 more. Without affirming the strict accuracy of these tables and estimates, it may be conceded the evidence shows the amount of paying freight to be materially greater in tank shipments than in barrel shipments. In the case of *Scofield v. Lake Shore & M. S. R. Co.* 2 Inters. Com. Rep. 67, 2 I. C. C. Rep. 90, it was found that "the tank car taking the gross weight of the car and oil, pays slightly more to the carrier per ton than the stock car with the full load." 2 Inters. Com. Rep. 71, 2 I. C. C. Rep. 108.

This plea that the transportation in tanks is the more profitable to the carrier in yielding a larger revenue above the expense of service was presented in the case of *Rice, Robinson & Witherop* and was in effect held to be no justification of the discrimination between tank and barrel shippers *under the circumstances and conditions regulating the use of the two modes of transportation*. These circumstances and conditions do not present a case of two modes of transportation open indiscriminately to shippers in general, the one at a higher rate than the other, and as to which the shipper may take his choice and pay accordingly, but a case where the *cheaper-rated* and, as is claimed by the defendants, the *better*, mode of transportation is available practically to only a particular class of shippers. The railroads do not to any material extent own tank cars or furnish facilities for loading and unloading them, but they are owned almost entirely by the shippers and *limited in their use to such owners*. It is claimed by the railroads that it is impracticable for them to own a sufficient

supply of tank cars and construct the terminal facilities for the receipt and delivery of oil necessary to their profitable employment and that the cars should be owned and these facilities be constructed by the shipper. In reference to this state of facts the following language is used in the case of *Rice, Robinson & Witherop*: "It is not the business of the shipper to furnish the vehicle of transportation. That is the duty of the carrier. Under its franchise the carrier must do more than construct his roadway. He must equip it with the means of transportation, and these means, of whatever style or pattern, must be open *impartially to all shippers of like traffic*. If the carrier hire or arrange in any manner for the use of vehicles he does not own, he has one of two things to do: he must either furnish like vehicles to all competitors in the traffic, or must be careful to make no unjust discrimination and give no undue preference in his rates. For all transportation purposes, so far as the public is concerned, a carrier makes every vehicle his own that he uses upon his road, no matter how acquired. His responsibility to the public is the same in respect to rates and other transportation duties whether he owns or hires his vehicle. When, therefore, he accepts tank cars owned by shippers who can afford to build and furnish them, and has none of his own to furnish to other shippers, but can supply only box cars in which barrels must be used for oil, he is bound to see that he gives no preference in rates to the tank shipper, and that he subjects the barrel shipper to no disadvantage. It is at this point that the duty of the carrier to the public is rigorous, and where no plea of inability to furnish tanks, or other excuse, is admissible."

It is contended by counsel for the Western New York & Pennsylvania Railroad Co., that the Commission erred in holding it to be the duty of the carrier to furnish the vehicle of transportation. On this point it is said in the case of *Scofield*, that while the statute does not clothe the Commission with power to determine what kind or number of cars the carrier shall place upon its line for transportation purposes, yet "the duty of the . . . carrier is none the less obligatory at common law and by its charter to furnish an adequate and proper car equipment for all the business . . . it undertakes and advertises in its tariffs it will do." 2 Inters. Com. Rep. 76, 2 I. C. C. Rep. 117. In *Rice v. Louisville & N. R. Co.* 1 Inters. Com. Rep. 722, 1 I. C. C. Rep. 547, the Commission says, "it is properly the business of railroad companies to supply to their customers suitable vehicles of transportation and then to offer their use to everybody impartially"—citing *Ogdensburg & L. C. R. Co. v. Pratt*, 89 U. S. 22 Wall. 123, 183, 22 L. ed. 827, 830. There is no obligation upon any one to enter

into the business of common carriage, but having undertaken and advertised to conduct such business, it seems clear that the duty of furnishing vehicles of transportation is incurred. *Chicago & A. R. Co. v. Dawson*, 79 Mo. 296, 18 Am. & Eng. R. Cas. 521; *Ayres v. Chicago & N. W. R. Co.* 71 Wis. 372, 380, 5 Am. St. Rep. 226; *Smith v. New Haven & N. R. Co.* 12 Allen, 531; *St. Louis & S. E. R. Co. v. Dorman*, 72 Ill. 506.

If it be not the duty of the common carrier to furnish the vehicle of transportation, then his only legal obligation is to transport over his road-bed such vehicles when furnished by others. He could not be compelled to do more, and if he chose to pursue such a course, the privilege of transportation of both person and property over his line might be denied to the great mass of the public and limited to the few who were able and found it to their advantage to invest in cars for their own use. It is manifest that in such transportation there would be but a small, if any, element of common carriage; it would be a prostitution of the franchise received from the state and call for its forfeiture.

In fact and in law, however, the carrier furnishes the tank as well as the barrel car. The shipper in tank cars (who is also the owner) is only the source of supply. He does not, strictly speaking, furnish the tank car, but lets it to the carrier, charging and receiving the customary mileage both ways, and the carrier, the hirer furnishes it. If there were nothing more in the transaction than this, it could not be successfully contended that it is not the duty of the carrier to offer the use of the tank car to shippers indiscriminately. But it may be said that the owner of the tank car has acquired these cars for the purpose of having his own products transported therein, and that in the contract of hire to the carrier he may stipulate for their exclusive use. Conceding that this may be done, it must be upon such terms as shall not constitute an unjust discrimination against shippers of like traffic in cars owned by the carrier.

In the Rice case, it is said, "The carrier has no right to hire rolling stock and then allow it to be used exclusively by one class of persons on such terms as will drive out of business those who are compelled to use its own rolling stock in a competitive traffic. This, however, is precisely what takes place in this traffic, if the rates for the transportation in barrels are considerably in excess of those which are charged for the transportation in tanks. The tank cars, . . . whether the use is paid for or not, ought properly to be held for the use of all; but if this is found impracticable, it is very certain and very obvious that proprietorship of the car for the use of which the carrier pays . . . can fairly entitle the

owner to no special consideration in the making of rates." *Rice v. Louisville & N. R. Co.* 1 Inters. Com. Rep. 722, 1 I. C. C. Rep. 548. If the carrier should rent from a car-furnishing company, who are not shippers, cars better adapted to a particular traffic than its own, and should limit their use to one class of its customers and at a cheaper rate than is charged to its other customers for the use of its own cars, no one could question the injustice of such discrimination. In principle the case is the same, whether the shipper or some outside party is the source of supply.

The tank of the tank car performs the function of a package in tank shipments, as the barrel does in barrel shipments. The carrier, in renting and paying mileage for the tank car, furnishes the tank shipper a package and free transportation thereof; the barrel shipper furnishes his own package and is charged for its transportation. At 14 cents a barrel on the minimum carload of 60 barrels, the discrimination against the barrel shipper amounts to \$8.40, equivalent to freight at tank rates on over 16 barrels of oil. The average distance from Oil City and Titusville to New York harbor points by the railway lines between those points is over 500 miles. The mileage paid per car for round trip at 4 cents per mile amounts to over \$7.50. The tank shipper, therefore, receives about \$7.50 per round trip for the use of his car including a package for his oil, while the barrel shipper pays \$8.40 per car for the transportation of his packages one way.

The cost of the tank car is from \$600.00 to \$634.00; it requires special facilities for loading and unloading, has to be cleaned out after use to render it fit for carriage of different qualities of oils, and carries no return loads from the east. Barreled oil is transported in box and rack cars; the box cars generally used for that purpose are old and inferior, unfit for the transportation of merchandise in general, and new box cars are seldom so used, as the leakage and odor of the oil are calculated to render them unsuitable for the carriage of freight liable to be damaged thereby. The box car costs about \$450.00. It is estimated and the evidence tends to show that from five to ten per cent of the cars used in carrying oil in barrels return loaded.

A statement introduced in evidence, dated Oct. 1, 1889, shows that the total tank car equipment of the United States so far as then known was 7864 cars, owned and operated as follows:

Owned by railroads.....	1242
Owned by companies and individuals not connected with the Standard Oil Company (approximately).....	1844
Leased by Standard Oil Co. to outside parties.....	300
Total operated by parties not connected with Standard Oil Co. (approximately).....	8486

Owned by Standard Oil Company.....	4497
Less leased to others.....	300
Total operated by Standard Oil Company.....	4197
Owned in part by Standard Oil Company.....	181
	4378
Total tank car equipment.....	7864

From this it will be seen that the Standard Oil Company owns and operates over half of the total tank car equipment of the United States. The complainants manufacture refined petroleum and its products at or near Oil City and Titusville and sell the same in the domestic markets and at the Atlantic seaboard for export. They do this business in competition with the Standard Oil Co., and others. The capacity of the refineries of complainants is about two millions barrels per annum, and their actual shipments for the year 1888, were about a million and a half barrels of petroleum products. The shipments were entirely by rail and for the most part in barrels.

The counsel for the Western New York & Pennsylvania R. Co. admits that the method of making rates by weight including the barrel package "might lead to injurious effects to those who shipped their oil exclusively, or the greater portion of their oil, in barrels," but contends that it would be difficult to decide that this method of making rates was a discrimination in favor of the Standard Oil Co., in view of the testimony introduced which shows that the shipments for that company over the Green Line (which is a department of the Pennsylvania R. R. having charge of all the eastbound transportation of oil in car-loads over that road) for the six months ending Dec. 31, 1888, were, in barrels, 354,793, and in bulk, 808,899 barrels, and over the New York, Lake Erie & Western R. R. in barrels, 117,993, and in bulk, 92,730 barrels. These figures show that for the period named, the Standard Oil Co., and its "affiliated industries" shipped more oil by rail in barrels than in tanks to the east over said lines. During about two months and a half of that period, to wit, from July 1, to Sept. 13, 1888, the charge on the barrels package was not in force, and in the itemized statement introduced in evidence showing shipments by months, the shipments for the last of the six months (December) were less in barrels than in bulk, being by the Green Line in barrels, 35,098, and in bulk, 43,645, and by the New York, Lake Erie & Western R. R., in barrels, 19,126, and in bulk, 25,588. The aggregate shipments, however, for the portion of the six months during which the charge for the barrel package was in force, were greater in barrels, than in bulk. The witness by whom this proof was made was in the employ of the Standard Oil Co. as assistant manager of the Union Tank Line, and he does not testify positively, but that "he thinks" the same proportion as to barrel and tank shipments prevailed for a like period before and since the period

stated. The evidence would have been more satisfactory if some period covered entirely by the barrel package charge had been selected and the witness had given the figures, presumably accessible to him, showing the shipments during the like periods before and since the institution of the charge for the barrel package. The witness could not state the amount of the Standard Oil Company's shipments by pipe lines or the proportion of such shipments to its shipments by rail. The rate by the pipe lines to the public is the same as the tank rate by rail. The shipments shown by the above figures, moreover, were from Rochester, Buffalo, Pittsburgh, Cleveland, and other points besides Oil City and Titusville, and in the shipments from the latter points the bulk shipments largely exceeded the barrel shipments, being by the Green Line from Oil City, 156,597 in bulk and 91,089 in barrels, and from Titusville 63,101 in bulk and none in barrels, and by the New York, Lake Erie & Western R. R., from Oil City, 7,510 in bulk and none in barrels, and from Titusville 981 in bulk and none in barrels. The ultimate question, however, in these cases relates to an unjust discrimination not as between particular parties, but as between two classes of shippers, the barrel shipper and the tank shipper. The fact that the Standard Oil Company owns and operates more than half of the total tank car equipment of the United States, would seem to justify the inference that its gain is largely greater than its loss by the discrimination in favor of tank shipments.

In the statement above of the total tank car equipment of the United States, 1842 is the number given as owned by railroad companies. Of these 1130 belong to the Pennsylvania R. Co., leaving 212 as the number owned by all other railroads in this country. Practically, then, with the exception of the Pennsylvania R. Co., the defendants carry oil in tank cars for such shippers only as own the cars and supply them to the roads. The application of that company to take additional testimony heretofore referred to was, so far as deemed material and as stated therein, for the purpose of showing that it is the owner of 1100 oil tank cars, of which about 450 cars or so many of them as from time to time are necessary to meet the demands therefor, are furnished indiscriminately to all parties desiring shipments of refined oil to points upon its own or affiliated lines of railroads, including the seaboard points on the New York harbor, at Philadelphia and Baltimore, and "that with few exceptions occurring occasionally during the period of heaviest shipments . . . these cars have been equal to, and often in excess of, the demands upon them by shippers." The complainants answering admit that said railroad company "is the owner of about 1100 tank cars of which

about 450 are devoted to the carrying of refined oil and offered indiscriminately to the shippers of that product;" but allege that "if the demand for these cars is no greater than is stated, it is because the Pennsylvania R. Co. will not permit them to go to any other place on the seaboard at New York harbor, than Communipaw, and only there at the docks of the National Storage Co., which is allied to the Standard Oil Trust," and that it "refuses to permit its cars to go to Perth Amboy, the export station to which the Independent Refiners" (complainants) "ship most largely." In reply, the railroad company construes the answer of complainants as "at least impliedly admitting the said facts to establish which the application was made," and itself admits that "it transports oil going over its lines to the New York seaboard to Communipaw and not to Perth Amboy," assigning as reasons that oil is a traffic dangerous to other merchandise and that has to be handled at a separate point of delivery, and that Communipaw is only a mile and a half from its regular deliveries in Jersey City and the most convenient point for oil delivery by its road, while Perth Amboy is distant about nineteen miles and one of the terminal stations of an active competitor, the Lehigh Valley R. Co. It also alleges that the individual shipper can obtain at Communipaw equal facilities at equal rates with those obtainable at Perth Amboy. The allegation of complainants that the road will only deliver at the docks of the National Storage Co. at Communipaw and that that company is allied to the Standard Trust is not denied. The evidence shows that the National Storage Company advertises itself as the agent of the Green Line and Pennsylvania R. Co., and has charge of that Company's terminals at Communipaw and that the tank cars of that line and company are allowed to run only to the National Storage Company's docks. This Storage Company has facilities at Communipaw for unloading tank cars into bulk steamers or vessels but these facilities are not open to complainants, and a witness (Confer) testified that in order to get oil shipped in bulk from Communipaw, the Independent refiner has to sell it to the Standard Oil Company. From this state of facts it appears that while about 450 tank cars of the Pennsylvania R. Co. may be "open to shippers indiscriminately," it is only upon the conditions of shipment to Communipaw for delivery there to the National Storage Company and that the facilities owned by this Storage Company for bulk shipment are not available to shippers in general. The fact testified to, that the facilities of the National Storage Company at Communipaw for bulk shipment are not open to outside shippers and that in order to have oil shipped in bulk from that point it has to be

sold to the Standard Oil Company, tends to sustain the allegation of complainants that the storage Company is an ally of the Standard Oil Trust. The Pennsylvania R. has a connection with the Lehigh Valley road seven or eight miles from Perth Amboy and there is no physical obstruction to prevent the cars of the former road running through to Perth Amboy. The agent in charge of the Green Line at the time of the hearing (Motheral) stated that the tank cars of the Pennsylvania road were not permitted to run to Perth Amboy because of a contract of the road with the National Storage Company to deliver to their yard. The Green Line, as before stated, is the oil transportation department of the Pennsylvania R. Co., and this agent testified, that the Green Line could not meet the demand of the business of the Standard Oil Company for tank cars on its line and had to use sometimes as many as 600 cars of the Union Tank Line, a department of the Standard Oil Co., in the Standard Oil business.

After full investigation and mature consideration, our conclusion in reference to the charge for the barrel package is in line with that in the case of Rice, Robinson & Witherop and with the principles pertinent to the question laid down in that case and in the cases of Rice and Schofield, and we hold, that where both modes of transportation are employed by the carrier and the use of one, the tank car, is not open to shippers impartially but is practically limited to one class of shippers, the charge for the barrel package in barrel shipments in the absence of a corresponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipment and destination than to the tank shipper, is an unjust discrimination, subjecting the barrel shipper to an unreasonable disadvantage and giving the tank shipper an undue advantage, and that no circumstances and conditions have been disclosed by the evidence in these cases authorizing such discrimination by any of the defendant carriers.

At the institution of these cases, the defendants were making what is termed an "outage" allowance for alleged waste in transportation, of 62 gallons from the full capacity of the tank, with no corresponding deduction on barrel shipments. Notwithstanding this allowance, the shippers received pay for the full capacity of the tank. The testimony tends to show that the Union Tank Line, a department of the Standard Oil Company, was originally the only beneficiary of this practice, but the matter having become known to the other tank shippers, it was then extended to them. After the commencement of these proceedings, the allowance was reduced to 42 gallons. This practice was condemned by this Commission

as an unlawful discrimination in favor of the tank as against the barrel shipper, in the case of Rice, Robinson & Witherop and, also, the recent case of *Rice v. Cincinnati, W. & B. R. Co.* 8 Inters. Com. Rep. 841, 5 I. C. C. Rep. 193. Since the promulgation of the decision in the latter case, the Western New York & Penn. R. Co. has issued supplements to all its oil tariffs, effective Sept. 1, 1892, providing, among other things, that "the minimum carloads of tank cars will be the full capacity of the tanks," and the "wastage" allowance has thus been wholly discontinued over the lines of defendants.

II.

The question of the reasonableness in themselves of the rates now in force, exclusive of the charge for the barrel package in barrel shipments, will be next considered.

The defendants in the case against The Western New York & Pennsylvania R. Co., The New York, Lake Erie & Western R. Co., The Delaware & Hudson Canal Co., The Fitchburg R. Co., and the Boston & Maine R. Co., form a route over which petroleum products are transported in carloads from the Pennsylvania Oil regions to Boston and New England points; the defendants in the case against the Western New York & Pennsylvania R. Co., The New York, Lake Erie & Western R. Co., and the Lehigh Valley R. Co., form a route over which such transportation is conducted from such oil regions to New York harbor points; and the defendants in the case against The Western New York & Pennsylvania R. Co., and the Pennsylvania R. Co., form what is known as the "Green

Line" route from said oil regions to New York harbor. The "Green Line" as before stated, is a department of the Pennsylvania R. Co., having charge of and conducting the oil transportation over said route. These railroad companies are common carriers engaged in interstate transportation of petroleum from the Western Pennsylvania Oil regions eastward for the inland and export trade and this transportation is conducted on joint through rates except as to the Boston & Maine road, on which through rates are made only to certain junction points. In addition to the roads against which the complaints are filed there are also so engaged the several roads heretofore named to whom leave was given to intervene and be heard as parties defendant. These last mentioned carriers are parts of many different routes (see statement *supra* filed by complainants) by which petroleum products are or can be carried between the points named. In many instances the same railroad forms a link in several routes. The Western New York & Pennsylvania R. R. is the initial carrier in each of the three routes formed by the roads complained against and is also the initial carrier in most of said other routes. All these routes form two classes; one composed of those carrying for the New England trade or Boston points, and the other, of those carrying for New York harbor and vicinity, mainly for export. Each class, respectively, maintains the same rates. Those rates, so far as shown by tariffs on file with this Commission up to date, have been as follows:

As to rates prior to those shown in the above tables, the evidence tends to show that from Oil City and Titusville to New York harbor, over the Pennsylvania R. Co's Green Line, the open rate was 48 cents per barrel from about July, 1882, to Feb., 1884, and from the latter date to January, 1885, 52 cents per barrel. From both these rates a rebate of 18 cents was allowed, leaving the net rates for said periods, respectively, 35 cents and 39 cents. Beginning at January, 1885, the open rate of 52 cents was paid without any rebate and from January, 1886, to Sept. 8, 1888, the rate by all lines to New York was generally 52 cents per barrel, but there is evidence tending to show that in 1886 there was a rate of 60 cents to Jersey City.

About 1881, two pipe lines for conveying crude oil from the Pennsylvania Oil regions to the seaboard were completed, the Tide Water Pipe Line and that of the National Transit Company. The Tide Water Pipe Line was first constructed. Both these pipe lines are carriers of crude oil between the points named and originally were in competition with each other and with the rail lines. The low rates prevailing by rail from about 1881 to about January, 1885, are, it is claimed, attributable to this competition. Under this competition the rates reached a very low, if not unremunerative, figure, both by pipe and rail, and about December, 1888, the pipe lines with a view of getting better rates adjusted their differences and the competition between them ceased. The pipe line business appears then to have passed into the control of the National Transit Company. The Pennsylvania R. Co. about 1885 entered into the contract with the National Transit Company, which, as set forth in the complaint against the Pennsylvania Company and the Western New York & Pennsylvania Company, is a contract "for the pooling or division of the traffic on oil between the Pennsyl-

vania Company and the National Transit Company, one consideration of which contract was the maintenance of the same rates on oil by the railroad and by pipe line and under and by virtue of which the said National Transit Company guarantees to the Pennsylvania R. Co., twenty-six per cent of the entire oil traffic from the Pennsylvania Oil Regions to tide-water." The Pennsylvania R. Co. admits the contract substantially as stated by the complainants, but avers "that the sole purpose of it was to secure and maintain a reasonable and compensatory rate to itself for the service to be rendered; that the rates now charged are only reasonable and just and that it would be impossible to carry said traffic at a lower rate without entailing upon itself unreasonable loss." The evidence tends to show that under this contract the rate of 52 cents per barrel for tank and barrel shipments was put in force both by the pipe lines and by the Pennsylvania Company and was thereupon adopted by all the class of lines to New York harbor points. September 8, 1888, notice was given of an advance of 14 cents per barrel for the weight of the barrel on barrel shipments to become effective Sept. 18, 1888, making the rate on such shipments 66 cents per barrel.

On the basis of the estimated or constructive weights placed by the carriers on oil by the gallon in tank shipments and on the barrel and its contents in barrel shipments (which weights will be considered further on), both the 52 cts. rate and 66 cents rate amounted (when they were adopted) to 16½ cents per hundred pounds of oil transported.

The evidence is to the effect that from 1882 to about March, 1883, the rate to Boston was 65 cents per barrel on both barrel and tank shipments out of which 5 cents was refunded for cartage; that at the latter date, the rate was advanced to 80 cents, with the same reduction for cartage; and that from 1884 to July, 1885, there was what is termed an "export rate" to Boston of 80 cents, with a rebate of 26 cents, making a net "export rate" of 54 cents. The rates of 94 cents per barrel in barrel shipments and 74 cents per barrel in tank shipments (shown in the table of rates to date heretofore given) were estimated to amount to 23½ cents per hundred pounds of oil transported.

The following tables introduced in evidence on the part of the defendants show the rate, to within a small fraction, per ton per mile under present through rates, exclusive of the charge for the barrel package, from Oil City over the routes named to New York, to New York harbor and to Boston:

OIL CITY TO NEW YORK.

18½c. per 100—\$3.70 per ton.

Rate per ton per mile via different routes.
Via W. N. Y. & P. and P. R. R. 526 miles—
7 mills.

Via W. N. Y. & P. and West Shore, 566 miles— $6\frac{1}{2}$ mills.

Via W. N. Y. & P. and N. Y., L. E. & W., 520 miles— $7\frac{1}{2}$ mills.

Via W. N. Y. & P. and N. Y. C. & H. R. R., 582 miles— $6\frac{1}{2}$ mills.

Via W. N. Y. & P. and D., L. & W. R. R., 547 miles— $6\frac{1}{2}$ mills.

Via N. Y., P. & O. and N. Y., L. E. & W., 551 miles— $6\frac{1}{2}$ mills.

Via L. S. & M. S. and N. Y. C. & H. R. R., 659 miles— $5\frac{1}{2}$ mills.

NOTE.—In the above rate to New York City is included a lighterage charge making it 2 cts. higher than the rate to New York harbor points—the present rate is $19\frac{1}{2}$ cts. per cwt.

OIL CITY TO NEW YORK HARBOR:—

16½c. per 100—\$3.30 per ton.

Rate per ton per mile *via* different roads.

Via W. N. Y. & P. and Lehigh Valley, 538 miles—6 mills.

Via W. N. Y. & P. and P. R. R., 526 miles— $6\frac{1}{2}$ mills.

Via N. Y., P. & O. and N. Y., L. E. & W., 551 miles—6 mills.

OIL CITY TO BOSTON:—

23½ per 100—\$4.70 per ton.

Rate per ton per mile *via* different roads.

Via W. N. Y. & P. and P. R. R.—“Wilkesbarre Route” 747 miles— $6\frac{1}{2}$ mills.

Via W. N. Y. & P., West Shore and N. Y. & N. E. R. R., 788 miles— $6\frac{1}{2}$ mills.

Via W. N. Y. & P., N. Y. L. E. & W. and Fitchburg, 641 miles— $7\frac{1}{2}$ mills.

Via W. N. Y. & P., N. Y. C. & H. R. R. and B. & A. R. Rds. 636 miles— $7\frac{1}{2}$ mills.

Via W. N. Y. & P., West Shore and Fitchburg, 638 miles— $7\frac{1}{2}$ mills.

Via W. N. Y. & P., D. L. & W., D. & H. C. Co. and Fitchburg, 676 miles— $6\frac{1}{2}$ mills.

Via N. Y., P. & O., N. Y. L. E. & W. and Fitchburg, 669 miles—7 mills.

Via L. S. & M. S., N. Y. C. and B. & A. R. R., 718 miles— $6\frac{1}{2}$ mills.

The average receipts per ton per mile and estimated cost of carrying a ton a mile for the year ending June 30, 1888, 1889 and 1890, as appears from the reports of the roads named on file with this Commission, are shown in the following table:

AVERAGE RECEIPTS PER TON PER MILE AND ESTIMATED COST OF CARRYING ONE TON ONE MILE FOR THE YEARS ENDING JUNE 30, 1890, 1889 AND 1888.

NAME OF ROAD.	Average receipts per ton per mile.			Estimated cost of carrying one ton one mile.

(4) Included in Pennsylvania R. R.

By a comparison of the foregoing tables it will be seen that the rates per ton per mile under the rates per hundred pounds now in force, exclusive of the charge for the barrel package, as shown by the first three tables, are less on several of the roads than the reported estimate in the last table of the cost of carrying a ton of general freight a mile, and are less than the reported average receipts per ton per mile on a majority of said roads.

Evidence was introduced tending to show a lower rate per ton per mile on refined oil between other points and on other lines than the rate per ton per mile under the rates and on the lines involved in these cases, and among others,

that in 1886 the rates from Titusville to Indianapolis, Indiana and other named western points, ranged from 40 cts per barrel of refined oil to Indianapolis, Indiana to 90 cts. per barrel to Omaha, Neb. and Minneapolis, Minn. and that these rates amounted to from 4 mills to 48.7 mills per ton per mile; also, that the rate from Lima, Ohio, to New York on fuel oil in 1888 was 19 cts. per hundred weight and 4.9 mills per ton per mile, and from New York to Chicago, on lubricating oil, 25 cts. per hundred weight and 5.87 mills per ton per mile. While these rates amount to a less rate per ton per mile than the rates now under consideration, this is in many instances due to the greater mileage and it does

not appear that the circumstances and condition of the transportation in the two cases are substantially similar. Something more is required than the mere comparison of rates between different localities on different lines in order to establish the unreasonableness of a rate complained of.

Oil is transported over the lines of defendants under what is known as a commodity tariff and there is no regular classification of it in the Official Classification. The rate on oil is higher than the sixth class rate under the Official Classification. The sixth class rate from Titusville and Oil City to New York City was given as 15 cts. per hundred pounds, less 3 cts. light-erage, and to Boston as 18 cts. It is contended by complainants that a comparison of the "nature and value" of the commodities classified and rated as sixth class with oil, shows that the latter should receive a rate even lower than the sixth class rate. As oil shipped in tanks and in barrels must have the same rate, the fact should be duly weighed that in cases of tank shipments to the east there are no return loads and in barrel shipments but a small percent—the oil in the latter case rendering the cars unfit for the transportation of general merchandise. The evidence shows that, while the loss from fire is very small, if not insignificant, to the shipper, it has been at times very heavy to the roads—one fire alone from oil destroying about a half a million dollars worth of property. These and perhaps other considerations are ignored by complainants in the views they present on the question of oil rates and classification. There is evidence that on the Boston & Maine system and some other New England roads oil is carried as a sixth class commodity and that in the first part of 1887 it was carried from the Pennsylvania Oil regions to New York by some of the respondents as sixth class. The object of classification is to furnish a basis for rate charges, but an incorrect classification would neither authorize an unjust rate nor render unlawful a just rate. The question is not one of classification, but as to the reasonableness of the rate under consideration. *Murphy v. Wabash R. Co.* 8 Inters. Com. Rep. 725, 5 I. C. C. Rep. 122. The fact, if shown, that oil is charged a higher rate than other commodities of like nature and value would be a circumstance to be considered for what it was worth in connection with the other evidence bearing directly upon the reasonableness of the respective rates. Oil may be of like or less value than some articles of the sixth class, but it is different from most, if not all of them, in nature, and we are not prepared to hold under the proof that its transportation is conducted under substantially similar circumstances and conditions.

There is a net work of local pipe lines in the oil regions which convey the oil to the local

refineries and to the railroads for shipment, and the charge for this service by these lines is 20 cts. per barrel irrespective of distance. These local pipe lines by which complainants' refineries are served are operated for the most part, if not entirely, by the National Transit Company, which, there is evidence tending to show, is controlled by the Standard Oil Company. The oil regions are divided into three or four "oil fields." One of these is known as the "Bradford Field," and the price of oil quoted on the New York market is the price of the oil of this field. The complainants are in another field and get their oil from the district immediately surrounding them. The oil from this district being fresher is somewhat better than that from the Bradford district and there was about two years before the hearing a premium on it of 8 cts. per barrel. The evidence tends to show that this premium represented about the excess in value of the oil in complainants' district and used by them over that in the Bradford district. This premium was, however, raised to 18 cts. per barrel and about August 18, 1888, a short while before the 14 cts. charge for the barrel package was placed on barrel shipments, it was raised to 20 cts. per barrel. The complainants have to pay, therefore, 20 cts. more for the oil used by them than the price of the Bradford oil, which is the New York market price, and this 20 cts., according to the weight of the evidence, is 12 cts. more than the difference in quality of the two classes of oil would justify. The evidence tends to show that complainants get their oil from the National Transit Company, and there is also evidence that the local pipe lines in order to secure the patronage of the producer bid against each other for the oil and that the advance in the premium is due in part at least to this competition.

The complainants have introduced in evidence two statements of the results of refining 1,000 barrels of crude oil at Titusville and Oil City, respectively, the one showing a loss in refining of \$282.98 and the other, a loss of \$278.45. In the cost are included among other items, the above mentioned premium of 20 cts. per barrel and the pipeage to the railroad of 20 cts. per barrel. These statements are dated, respectively, May 14 and May 15, 1889. The witness who made out one of these statements (Burwald) testified that the loss in refining had only been since January, 1889, and had gradually increased during February, March, April, and May, 1889. He further stated that this was the dull season of the year in the oil business and that the greater part of the refining business is done from June to January. No item of transportation charges is embraced in these statements except the change of 20 cts. per barrel for the service of the local pipe lines, and the losses shown are the results of the re-

fining up to the time of shipment on the railroad. The business of the refineries in the oil regions appears to have been generally unprofitable at the date of the hearings and several of them had partially or entirely ceased operations. About 40 per cent of the products of the crude oil is an inferior oil, which is for the most part exported and known as "export oil." In the export business, the refiners whose refineries are located in the oil regions are placed at a disadvantage with those of the Standard Oil Company and its allies at the seaboard near New York. The latter own or control the pipe lines to the seaboard, and also the facilities for transfer of the oil out of pipes and tank cars into bulk steamers or vessels. This, together with the fluctuating market prices of petroleum products and other matters hereafter referred to besides the cost of rail transportation, have probably contributed to depress the business of the local refineries.

The complainants and their witnesses testify that the business of the local refineries cannot be conducted profitably, if at all, under the present rates. On the other hand, the officials and employes of the defendant railroads state that these rates barely afford a reasonable compensation and that any reduction will be ruinous to their business. In the case of complainants and their witness reference is had for the most part to the advanced rate on barrel shipments for the barrel package, resulting in a through rate to New York points of 66 cts. per barrel and to Boston points of 94 cts. per barrel. The charges in the complaints are against these rates as being excessive and unreasonable, and in the case against the Pennsylvania Railroad Company and the Western New York & Pennsylvania Railroad Company, the complainants set forth, that notwithstanding they were subjected to disadvantages by the rates prior to the institution of the barrel package charge in their "*export trade* in competition with their rivals affiliated to the Standard Oil Trust," still "they were enabled by their advantages in the *local markets* to maintain and even increase their business." It would appear from this statement and the facts elsewhere set forth as to the transportation and other facilities possessed by the seaboard refineries, that the complainants, or local refineries in the oil regions, had the advantage in the *local markets* and the seaboard refiners had the advantage in the *export trade*, and that the former so far counterbalanced or offset the latter, that under the rate existing at the time the charge for the package was placed on barrel shipments, the local refiners were able to maintain and increase their business. In regard to the position of the defendants towards the old rates, as before stated in the discussion of the question of discrimination as between tank and barrel shipments, the charge for the

barrel package was not originally made by the roads on the ground that it was necessary in order to yield them a fair remuneration for the service of transportation, but only, as claimed by them, for the purpose of conforming to what they understood to be the ruling of this Commission. Two of the roads against whom complaint is filed, the Fitchburg Railroad Company and the Delaware & Hudson Canal Company, in their answers express willingness for a reduction of the rates. On this point the Fitchburg Company says, that "it has no voice or control in the fixing of the rates and charges complained of, the same being made by the trunk lines," and "that it has no objection to the granting of complainants' petition so far as the same relates to the reduction of rates and is willing to take its proportion of the through rates should they be reduced as prayed for," and the Delaware & Hudson Canal Company, "That any rates which have been established for such freight, were established by the initial road without its knowledge and consent, and it is willing to accept any rates for such freight that may be adopted and established by the other roads in interest." In the original printed argument filed Feb. 24, 1890, by counsel for the Pennsylvania Railroad Company, it is only contended "that the present rates charged, *aside from the additional rate charged on the package*, are just and reasonable." Referring to the testimony on this question, the counsel says, "that there is a consensus of opinion of the experts placed upon the stand, that the present rates *independent of the question of charge for the barrel package*, are just and reasonable" and "that complainants' as well as defendants' witnesses agree upon this point." This statement is correct as to at least two of complainants' leading witnesses, namely, A. D. Deming, President of the Independent Refiners' Association of Oil City (one of the complainants), and Louis L. Walt, of the Penn Refining Company. They stated in substance that, if the rates had remained as they were before the charge for the barrel package, they would have been satisfactory and no complaint would have been made.

The 52 cts. per barrel rate to New York points had been in force for a considerable period before the additional charge for the barrel package was instituted and no complaint is shown to have been made. Under this rate the complainants state they maintained and increased their business. The prior materially lower rates to New York points appear to have been the result of competition between two pipe lines and the railroads. The rate per ton per mile under present rates, exclusive of the charge for barrel package, are not in excess of the reported average receipts per ton per mile on about twelve out of fifteen of the roads in-

volved in these cases and interested in the question under consideration; they are much less than such average receipts on nine of them; and are less than the estimated cost of carrying a ton of general freight a mile on four of them. (See table p. 175.) While this rate is fully as high as it should be in view of the nature of the traffic and the conditions surrounding it and might possibly be made less without depriving the carriers of a fair remuneration for their service, we do not feel authorized under all the facts and circumstances disclosed by the record and evidence in these cases, to order a reduction in addition to the exclusion of the charge for the barrel package, and our conclusion is that the rate to New York points should be not more than 18½ cts. per hundred pounds, both in tank and barrel shipments, to be charged in both cases only for the weight or quantity of oil carried, exclusive of any charge for the package.

III.

The reasonableness of the oil rate from Oil City and Titusville to Boston and Boston points remains to be inquired into and in that connection the charge made by complainants against the roads forming lines between said points, that said rate is "disproportionate as compared with the rates for the like service on the like traffic under substantially similar circumstances and conditions from Oil City and Titusville to New York and New York points. The roads involved in this charge allege that the differential rates demanded and collected on the oil traffic to Boston and Boston points are just and reasonable, and in due proportion to those to New York and New York points. The present rates to Boston of 94 cents per barrel on barrel shipments and 74 cents per barrel in tank shipments were, as before stated, estimated to amount to 23½ cts. per hundred pounds of oil transported. The 74 cent rate in tank shipments, which is on the oil alone, is 22 cts. in excess of the 52 cents rate to New York points. It will be observed that in the table heretofore given of existing rates, the rate to New York City was when these complaints were filed 18½ cts. per hundred pounds of oil, being 2 cents, more than that to New York harbor points. The rate now by the West Shore line (it has been discontinued by the others), is 19½ cts. per 100 lbs., or 3 cts. more than the New York harbor rate. This difference is made on account of the lighterage charge paid by the roads where the shipment is to New York City. The rate of 19½ cts. per hundred pounds of oil according to the estimated weight of the contents of a barrel amounted to about 61½ cts. per barrel. The rate to Boston, then, of 74 cents per barrel of oil is 12½ cents more than the rate to New York City, and, as above

shown 22 cents, more than the rate to New York harbor points. The charge for the barrel package being held to be unlawful, our inquiry will relate to the rate of 23½ cts. per hundred pounds (estimated to be 74 cents per barrel on the contents of the barrel) common to both barrel and tank shipments to Boston. This 23½ cts. rate per 100 lbs. is 7 cents more than the New York harbor rate of 16½ cts. per 100 lbs. The difference between the barrel rate including the charge for the package to Boston and that rate to New York Harbor points is 28 cents, which is greater than the difference in the rates between said points on the contents of the barrel—the latter difference being, as appears above, 22 cents. *The complaint and most of the testimony on the subject relate to the rates including the barrel package charge and the disparity between those rates.* It will also be noted that the 74 cent rate to Boston is 4 cents less than the rate (78 cents per barrel) which had been in force about a year prior to the institution of the charge for the package in barrel shipments. As before stated, about March, 1883, a net rate of 75 cents was adopted, the rate being 80 cents, less a reduction of 5 cents for cartage and from some time in 1884 to July, 1885, there was a net "export rate" of 54 cents, which was the result of a rebate of 26 cents from the full rate of 80 cents. With the exception of this "export rate," the regular tariff rate from March, 1883, to the present time appears to have been greater than the 74 cent rate (estimated 23½ cts. per cwt.) now in force on the barrel in tank shipments. The rate per ton per mile under this through rate is from 6.3 to 7.3 mills by the different routes given in the table *supra*.

This rate per ton per mile is not only less than the average receipts per ton per mile but also than the estimated cost of carrying a ton a mile on the following roads running to Boston and to Boston or New England points, as reported by said roads and shown below:

Roads.	Average receipts per ton per mile.			Estimated cost of carrying a ton a mile.		
	1888	1889	1890	1888	1889	1890
	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.
Boston & Albany R. R.	1.009	1.080	1.105	.819	.753	.791
Boston & Maine R. R.	2.180	1.888	1.706	1.331	1.207	1.090
Fitchburg R. R.	1.116	1.015	.965	.840	.777	.738
New York & New England R. R.	1.192	1.344	1.220	1.154	.962	.829

The cost of transportation on the roads running to Boston and Boston points appears to be greater than that on roads to New York and New York points. The distance by shortest route from Oil City and Titusville to Boston is over a hundred miles greater than to New

York and New York points and is still greater through Boston to Boston points. It is claimed that the volume of traffic to New York is very much larger than to Boston. There is also a terminal expense at Boston of about 1 cent per hundred pounds included in the Boston rate, which is not the case with the rate (52 cents) to New York harbor points. Moreover the roads to New York harbor are in competition as to the oil traffic, with the pipe lines. The evidence tends to show that the cost of transportation by pipe line is very much less than that by rail.

In the case of the *Boston Chamber of Commerce v. Lake Shore & M. S. R. Co.* 1 Inters. Com. Rep. 754, 1 I. C. C. Rep. 486, the Commission says: "The contention of petitioners for equality of rates with New York is not supported by equality of distance, of cost of service, or by other considerations, such as volume of business, competition of rail and water ways, ocean service, terminal facilities, and storage capacity—all elements of more or less importance in the determination of rates, and some of them of controlling influence." The conclusion in that case was that the Boston Chamber of Commerce had not, "upon any legitimate grounds of rate-making, maintained their application for equality of rates with New York for eastbound local shipments to Boston." In the recent case of *Toledo Produce Exch. v. Lake Shore & M. S. R. Co.* 3 Inters. Com. Rep. 890, 5 I. C. C. Rep. 166, the propriety of higher rates to Boston than to New York from Chicago and other western points was maintained, but the methods pursued by the carriers in ascertaining the amount of the difference—that is, by a fixed arbitrary added to the New York rate—was condemned, and it was held that "the arbitrary differential between New York and Boston should be abandoned and the differential should be adjusted upon the basis of percentage." The principal fact upon which this decision rests, is, that the rate from Chicago to New York is taken as the basis for rates to Boston and other points. The system of making the rates to Boston and such other points by adding an arbitrary to the New York rate, which arbitrary remained the same notwithstanding changes or fluctuations in the New York rate, was held to be wrong in principle and calculated to work injustice. For example, the Commission say, "By the use of an arbitrary sum there is no proper proportion maintained, if the New York rate changes; thus, if the grain rate to New York were fifty cents the present arbitrary would make the Boston rate 10 per cent greater; and if the New York rate should be fifteen cents, the use of the present arbitrary would make the Boston rate 33 per cent greater." In the matter now under consideration of the oil rates from Titusville and Oil City to New York and Boston, respectively,

it does not appear that the former is the basis of the latter or that the difference between the two rates is an arbitrary fixed differential. As will be seen from the tables of rates heretofore given, the difference between the oil rates to New York and Boston has varied from time to time and the difference on the contents of the barrel is less now by four cents than it was prior to the adoption of the charge for the barrel package.

Oil is not classified but has a special commodity rate. The circumstances and conditions attending its transportation from the Western Pennsylvania Oil regions to New York and New York harbor are, as we have shown, materially variant from those which affect that transportation to Boston and New England points, and particularly, *in the matter of pipe line competition*. In view of all the foregoing facts bearing on this question, and the matters hereinafter discussed, which are not subject to regulation by this Commission, and which, independent of the rates in question, place the refiners at Oil City and Titusville at a disadvantage as to the New England trade with the seaboard refiners at New York harbor, we are not prepared to hold that the New York and Boston rates on the contents of the barrel (to which our inquiry is now limited) are unjustly discriminative or relatively unreasonable as between those cities. We are also, of the opinion that it has not been made to appear that a Boston rate of 23½ cents per hundred weight of oil transported, common to barrel and tank shipments and exclusive in both cases of any charge for the package, is in itself unjust or unreasonable. As before shown, this rate is less than the rate previously in force and against which no complaint appears to have been made. The present complaint, it is to be noted, is against the rates with the barrel package charge included.

The Western New York & Pennsylvania R. Co. issued a tariff sheet, dated April 27, 1888, giving Boston rates on eastbound shipments from Oil City and Titusville in carloads to about one hundred and forty points reached by the Boston & Maine system including Manchester, N. H., Salem, Mass., and Portland, Me. These through rates were abrogated by order dated Oct. 25, 1888, taking effect Nov. 6, 1888, and since that time through rates have been made by the Western, New York & Pennsylvania line only to its point of junction with the Boston & Maine road, from which junction points the local rates are charged to points of destination. The reason assigned for the withdrawal of the through rates to those points, is, that the proportion of the through rate demanded by the Boston & Maine road was so great that the other roads could not afford to maintain it. Only four or five days notice to shippers and the public of the abrogation of the rates was given. The notice is

dated over 10 days before it was to become effective, and the General Freight Agent of Western New York & Pennsylvania R. R. Co. testified that the 10 days' notice required by law would have been given but for the failure of the clerk to whom the matter was intrusted to follow instructions, and that the road offered to refiners to protect any shipments made by them under the canceled rates prior to the time when the regular ten days' notice would have expired. There is no other evidence on this point, and it does not appear that the failure to give the notice the required time was *willful*, or that in consequence thereof any *injury* has been sustained by any shipper or other person. *Railroad Commission of Florida v. Savannah, F. & W. R. Co.*, 8 Inters. Com. Rep. 688, 5 I. C. C. Rep. 18. The complainants in their printed brief request this Commission to order a restoration of the through rates abrogated as above stated. Joint through rates are matters of contract or agreement among carriers engaged in interstate commerce, and this Commission has no power under the statute to compel them to enter into an arrangement for such through rates. *Capehart v. Louisville & N. R. Co.*, 8 Inters. Com. Rep. 278, 4 I. C. C. Rep. 285; *Little Rock & M. R. Co. v. East Tennessee & G. R. Co.*, 2 Inters. Com. Rep. 454, 3 I. C. C. Rep. 1.

The evidence tends strongly to show that the Standard Oil Co. and its allies own or control the pipe line system to New York harbor points. Whether or not they pay the regular rates, does not appear. If they own the pipe line, the payment of freight charges would be merely going through the process of "taking money out of one pocket and putting it in another;" if they control them, they can, and probably do, dictate terms as to rates. Whether or not they own the facilities at the seaboard for transshipment of tank oil to bulk steamers or vessels, they have a monopoly of those facilities to the exclusion of complainants. The crude oil is run by them through the pipe lines to the seaboard and there refined. They then ship it by sea (a cheap mode of transportation) to points along the New England coast, where reservoirs are prepared for its reception. From those receiving stations, the oil is carried to interior New England points. By reason of their superior facilities and great advantage in the way of cheap transportation, together with the abrogation of the through rates on the Boston & Maine Railroad system, these refiners at the seaboard near New York are, as competitors of complainants, enabled to undersell them at New England points. The complainants being for the most part barrel shippers, the charge for the barrel package has, also contributed to this result. The facilities for transshipment at the seaboard do not appear to be furnished by, or to be under the control of the railroads,

4 INTER S.

It cannot be affirmed with any degree of certainty that the disadvantageous position of the complainants with reference to the New England trade is attributable to rates, the regulation of which is within the control of this Commission under the Act to Regulate Commerce.

The fact that the 52 cent rate to New York harbor points was the result of the contract between the Pennsylvania R. Co. and the National Transit Co. even though the latter company be an ally of, or owned and controlled by, the Standard Oil Company, will not invalidate that rate. If it be in itself just and reasonable. It is contended by complainants that this contract is in violation of Section 5 of the Act to Regulate Commerce, which relates to pooling of freights and division of earnings by common carriers subject to the provisions of the Act. That section provides, "That it shall be unlawful for any common carrier subject to the provisions of this Act to enter into any contract, agreement, or combination with any other common carrier or carriers for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads, or any portion thereof." The contracts, agreements or combinations forbidden are those "for the pooling of freights of different and competing railroads," or for the division of the earnings "of such railroads." The contract under consideration is not one for the pooling of freights of different railroads, or for a division of the earnings of different railroads, but for a division of traffic between a railroad and a pipe line. A railroad is not interdicted from pooling with a competing pipe line. This contract, therefore, does not fall within the description of contracts forbidden in the Act. On this ground the Commission has in the matter of express companies expressed the opinion that such companies when in competition might pool their earnings without being guilty of a violation of the law. *Re Express Companies*, 1 Inters. Com. Rep. 677, 1 I. C. C. Rep. 368. Although transportation by express companies and pipe lines should doubtless be made subject to the provisions of the Act to Regulate Commerce, the failure to make them so can be remedied only by Congress.

When a motion was made by complainants' counsel for the production of the contract between the Pennsylvania R. Co. and the National Transit Company, it was resisted by counsel for the Pennsylvania Company on the ground, among others, that it might furnish evidence which would tend to criminate that Company. The Commission denied the motion for the reason that if put in evidence the contract would be material only for the purpose of throwing light on the question of the reasonableness of the rates complained of and

the facts which the complainants alleged would be shown by the contract had been admitted in the answer of the defendant and therefore the production of the contract itself was unnecessary. In this connection, however, it was said that it was "within the power of the parties holding this contract to remove by its production any proper legal inference that might be drawn from the facts that are admitted and that if not produced they are probably prepared to accept whatever legal consequences may follow from a refusal to produce." It is difficult to conceive of any legitimate inference consistent with absolute fair dealing to be drawn from the refusal to produce the contract and, particularly, when one of the grounds of the refusal is that above stated. The precise date of this contract is not shown but it appears to have been made in the first part of 1895. About August 18, 1888, the advance to 20 cents per barrel of the premium on oil used by complainants took place; a little over two weeks thereafter, on Sept. 3, 1888, the charge for the barrel package in barrel shipments was adopted; and on October 25, 1888, the through rates to points on the Boston & Maine railroad system were abrogated. These three events, occurring within a period of two months and a week, all prejudicial to the complainants as refiners at Oil City and Titusville and advantageous to those at the seaboard in the vicinity of New York, lend color to, if they do not substantiate, the charge made by complainants of concert of action between the roads immediately concerned and the seaboard refiners for the purpose of favoring and giving an undue advantage to such seaboard refiners to the disadvantage and at the expense of complainants. The defendants are not shown, however, to be in any way responsible for the advance in premium and it does not appear to be a matter subject to regulation by this Commission, and, as before stated, we have no power to order a restoration of the abrogated through rates.

By the supplements of the Western New York & Pennsylvania R. Co. to its oil tariffs, effective, Sept. 1, 1892, heretofore mentioned, not only was the "wastage" allowance in tank shipments discontinued, but the estimated weight of a gallon of tank oil was raised from 6.8 lbs. to 6.4 lbs. Fifty gallons being the contents of a barrel, as adopted by the roads for transportation purposes, the weight per barrel at 6.3 lbs. per gallon was 315 lbs., and, at 6.4 lbs. per gallon, it is 320 lbs.—a difference of 5 lbs. The rates per hundred pounds are unchanged. At the rate to Boston and Boston points of 23½ cts. per hundred pounds, the 5 lbs. increased weight would amount to an increase of rate on tank shipments of 11.7 mills per barrel, and at the 16¼ ct. per hundred pound, rate to New York harbor points, to 8.2 4 INTER S.

mills. This increase of rate per barrel on tank shipments is inconsiderable *in comparison* with the greater charges on barrel shipments (arising from the charge for the barrel package) than on tank shipments to those points, which are, respectively, 20 cts. and 14 cts. By the Pennsylvania R. R. (Green Line) the oil rate is by barrel alone and not by the hundred pounds. The barrel rate by that line appears to have remained unchanged. This being the case and the number of gallons per barrel remaining the same, the increase of weight per gallon can effect no change of rates as to that line. Where the rate is by the barrel and remains unchanged, an *actual* increase of the weight of the contents will effect a decrease of rate as more oil will be hauled for the same price but if there is no actual but only an estimated increase of weight of contents there will result no change of rate, as the same quantity will still be hauled for the same price. While the weight of the tank gallon was at the commencement of these proceedings and until recently (Sept. 1, 1892) placed by the carriers at 6.3 lbs., the weight of the barrel and contents in barrel shipments was placed at 400 lbs.—the contents in both cases being 50 gallons. These weights of the gallon and of the barrel and contents, are *estimated* weights and it is shown in the case of *Rice v. Cincinnati, W. & B. R. Co.* 8 Inters. Com. Rep. 841, 5 I. C. C. Rep. 198, that they vary materially from the actual average weights, and result in "a constant and appreciable advantage to the shipper in tanks." The grounds of this ruling are clearly and forcibly stated in the opinion in that case and need not be repeated here. The raise in the weight of the tank gallon was made since that decision was rendered, and, being without a corresponding raise in the weight of the barrel and contents in barrel shipments, was, doubtless, intended to do away with the discrimination in this respect against the barrel shipper. The order of the Commission in that case was that the defendants "base their charges on petroleum and its products upon the *actual weight* of shipments whether in tanks or barrels; and for all cases where actual weights cannot be ascertained without great inconvenience," that they "adopt and employ such a rule or method of estimating weights as shall practically operate to secure to the shipper in barrels, for the same aggregate sum as may be paid by the shipper in tanks in any case, the transportation between the same points of an equal amount of freight paid for." (This order, it was declared, should not "be understood as authorizing charges on barrels when tanks are carried free, that question being expressly reserved for further consideration.") The raising of the gallon tank weight from 6.3 lbs. to 6.4 lbs., the weight of barrel and contents being estimated at 400 lbs. as before, is not a compliance with

the order that "charges on petroleum and its products be based upon *actual weight* whether in tanks or barrels." Whether the condition exists on which the alternative requirement of the order is based, that "actual weights cannot be ascertained without great inconvenience," and if so, whether the raise of the tank gallon weight to 6.4 lbs. meets that requirement, we abstain from determining on the facts and evidence now before us, and these cases will be held open for further developments and investigation in reference to these matters. As to the Pennsylvania Railroad (Green Line), as we have seen, the rate being by barrel alone both in tank and barrel shipments, the increase in estimated weight of the tank gallon effects no change in the relative rates on tank and barreled oil.

The practice of making arbitrary reductions in computing freight charges from the actual amount of the commodity transported and for which the shipper receives pay, as in the case of the discontinued "wastage" allowance on tank shipments, and of *estimating* weights where it is practicable to ascertain actual weights, opens the door for preferences, discriminations and evasions of the law. The material facts as to estimated weights in tank and barrel shipments being substantially the same in the present cases as in the case of *Rice v. Cincinnati, Washington & Baltimore R. Co.*, the order above recited, issued in the latter case, is adopted in the present cases and the defendants herein are directed to comply therewith.

It is further ordered, That the defendants' cease and desist from charging or collecting any rate or sum for the transportation of the barrel package on shipments of oil in barrels over their roads or lines from the oil regions of Western Pennsylvania to New York and New York harbor points or to Boston and Boston points; or, on reasonable notice, promptly furnish tank cars to complainants, and others who may apply therefor, for the purpose of loading and shipping oil therein to such New York harbor and Boston points as the shippers may direct; and that said defendants notify the public accordingly by publication in their tariffs of rates and charges, pursuant to the provisions of sections 6 of the Act to Regulate Commerce, and also file copies of said tariffs with this Commission as required by the provisions of said section. It is further ordered that the rate on shipments of oil both in tanks and in barrels over said roads shall be the same and said rate from said oil regions to New York points shall not exceed 16½ cts. per hundred pounds, and to Boston and Boston points shall not exceed 23½ cts. per hundred pounds; and the defendants are required to refund to the several parties legally entitled thereto, within 60 days after notice of this decision

and demand thereof by such parties, all sums received by them for transportation over their roads of the barrel package on shipments of oil in barrels, when the use of the tank cars has not been open to shippers impartially, and the shipper claiming reparation has been thereby deprived of their use.

Inasmuch as the amounts wrongfully received from the complainants respectively cannot be ascertained from the evidence already taken, the proceedings will be continued for such further action or inquiry in that behalf as may become necessary.

We desire to supplement our conclusions in this case with the following remarks:

In the cases at bar the principal cause of alleged unlawful discrimination is the charge for the barrel, and our attention has been particularly directed to that feature of the transportation. In order to guard against misapprehension the Commission wishes to say that these cases are decided purely upon the facts as set forth and the situation as delineated in the record and by the evidence. It is not intended to hold, nor should this report be construed to hold, that, aside from other controlling circumstances, the carrier in hauling packages is not entitled to pay according to the weight thereof. It is simply held that on account of the peculiar circumstances in these cases to charge for the weight of the barrel places barrel shippers at a disadvantage as against tank shippers, and the practice in these cases, while the circumstances and conditions remain unchanged, should be condemned.

It was stated in the *Rice* cases, 8 Inters. Com. Rep. 841, 5 I. C. C. Rep. 193, that—

"Whether the advantages which the tank shipper apparently enjoys are a mere incident of his business, for which the carrier should not be held responsible, or whether these benefits result from discriminating usages adopted by the railroads, and their failure to supply all customers with a special vehicle suited to the demands of a special traffic, must be, in any particular case, a most perplexing inquiry. To require the barrels in which this article is shipped to be carried without expense is contrary to the general and lawful custom which includes the package in the freight to be paid for; yet, in certain situations and under certain circumstances, there may be no other remedy for actual injustice, and no other effectual means by which the carrier can render equal and impartial service to every patron.

"We have already taken occasion to point out the only instance in which this precise claim has been heretofore made or allowed, and in doing so have sought to emphasize the proposition that rulings based upon special facts and local conditions are not to be regarded as formulated precepts for general observance."

These *Rice* cases cover the greater portion of the country, and the conditions of trans-

portation and of commerce vary greatly in the different sections affected by the controversies; but the cases now under consideration relate to the transportation of oil from refineries to the seaboard, and through a comparatively small territory in which the Commission has been investigating cases involving oil transportation for a number of years. Upon the facts herein we are forced to the conclusion that the only practical remedy for the unjust

discrimination now existing is to give defendants the alternative of abolishing the charge for the barrel, and in so doing we are only permitting them to return to a practice which they followed during a long period, which they only discontinued under a mistaken construction of our original Rice decision, and which they now seek to justify on wholly different grounds.

THE MERCHANTS' UNION OF SPOKANE FALLS

v.

THE NORTHERN PACIFIC R. CO. and THE UNION PACIFIC RAILWAY COMPANY.

1. Transportation by rail from eastern points to the "Pacific Coast Terminals," Portland, Tacoma and Seattle, is affected by the competition, of controlling force and in respect to traffic important in amount, of water carriers reaching the same terminals, but such competition does not affect like transportation from said points to the city of Spokane, Washington: *held*, therefore, that defendants are justified, by reason of such dissimilarity in circumstances and conditions, in maintaining higher rates on shipments of like property from said points for the shorter distance to Spokane than for the longer distance to said Pacific terminals. The competitive position and attitude of the Canadian Pacific Railway, a foreign carrier, considered in connection with existing water competition, but the separate effect of competition by the Canadian route not found or determined.
2. Class rates in effect upon the defendant lines and the lower commodity rates to their Pacific terminals examined and discussed: *held*, that the only justification for a through rate less than an intermediate rate on the same article is the compulsion of rail carriers to accept the reduced compensation or suffer ocean rivals to perform the service, and where the pressure of this alternative is not felt there is no ground upon which the lower through charge can be excused. No article should be carried to terminal points on commodity rates, which, if the class rates were imposed would still seek rail rather than water transportation, and any violation of this rule is unjust discrimination against the intermediate town compelled to pay the higher class rate on the same article.
3. In the matter of carload and mixed carload rates, minimum weight of shipments entitled to carload rates, and in all other respects, defendants are required to provide for and allow the same privileges, facilities and advantages on shipments to Spokane as are provided or allowed on like shipments to Portland or other Pacific coast terminals.
4. "Blanket" class rates applying upon the Northern Pacific road for a distance of over five hundred and eighty miles found relatively unreasonable: *also held*, that rates to Spokane, the principal distributing center to which such blanket rates apply, are unreasonable in themselves. Defendants ordered to cease and desist from charging rates on property from eastern points to Spokane which materially exceed 82 per cent of class rates now in effect both to Spokane and Pacific coast terminals. Provision made for reopening the case if necessary, and bringing in other carriers who may be affected by the order.
5. The Northern Pacific Railroad Company, notwithstanding certain provisions in its charter, is subject, like all other interstate carriers, to the authority conferred by Congress in the Act to Regulate Commerce. Citing and affirming *Raworth v. Northern Pac. R. Co.* 8 Inters. Com. Rep. 857, 5 I. C. C. Rep. 257.

[No. 189.]

Complaint filed April 2, 1889.—Answers filed April 24, 1889, and May 4, 1891.—Hearings had May 27, 28, 29 and 30, and June 4, 1891.—Briefs filed August 4, 1891, to January 11, 1892.—Decided November 23, 1892.

LOWER charges for longer hauls. Unreasonable rates for the shorter distance.

4 INTER S.

REPORT AND OPINION OF THE COMMISSION.

* *Knapp, Commissioner:*

The charges investigated in this proceeding, which are mainly directed against the Northern Pacific Railroad Company, are summarized in the brief of complainant's counsel as follows:—

First: That the rates charged on all classes of freight to Spokane Falls are unreasonable.

Second: That freight rates are so adjusted with reference to competing points, to wit: Portland, Tacoma, Seattle, Ellensburg and Missoula, as to constitute the same an unreasonable discrimination against Spokane Falls and in favor of said competing points.

Third: That a greater rate is charged to Spokane Falls for the transportation of property from eastern terminals than is charged to Portland, Tacoma and Seattle for like kinds of property under substantially similar circumstances and conditions; all the said points being on the line of the Northern Pacific Railway, Spokane being more than 550 miles east of Portland and more than 400 east of Tacoma and Seattle, and being included in the haul from eastern terminals to said Portland, Tacoma and Seattle.

In the complaint on file these general charges are set forth in numerous allegations relating to the location and commercial importance of the city of Spokane, with many illustrations of the disparity in rates on west-bound shipments between Spokane and the several towns above-mentioned, all tending to show the resulting disadvantage and injustice to the locality in whose behalf this proceeding is instituted. The relief sought by the complainant is such a reduction of the rates now exacted at Spokane as will make the same fair and reasonable; a readjustment of existing tariffs so as to prevent undue advantage to towns competing with Spokane in the territory alleged to be tributary to the latter place, and the enforcement of the prohibitory rule of the fourth section of the Act to Regulate Commerce, except so far as, in the judgment of this Commission, departure therefrom may be justified by the competition of the Canadian Pacific Railroad.

The answer of the Northern Pacific Company, so far as it need be referred to in this connection, bases resistance to this application upon two propositions. In the first place it denies that the charges now imposed upon traffic from eastern terminals to Spokane are in any respect excessive or unreasonable, and alleges that no unlawful discrimination against that town can be predicated upon the relatively lower rates accorded to Portland, Tacoma and Seattle, because the circumstances and conditions attending the transportation to those localities are greatly dissimilar. It avers, in

the second place, that these lower rates on through shipments from the east to its several terminals on the Pacific are forced upon this defendant by the competition of ocean carriers reaching the same points from various Atlantic ports, and other ports on the Pacific coast, and by the Canadian Pacific railroad, none of which are subject to the Act to Regulate Commerce. The nature and extent of this competition, and its consequent influence upon the trans-continental rates of this defendant, was a controverted question of fact to which much of the testimony was directed.

A third defense, not disclosed or suggested by the answer, is strenuously urged upon our attention in the brief filed by counsel for the Northern Pacific Company. It is insisted, in effect, that the transportation charges of this carrier are not subject to reduction or regulation by the Interstate Commerce Commission, because its charter, granted by special Act of Congress, vests in its board of directors the final and conclusive power, free from legislative control, of determining the compensation which its services shall receive, except those performed for the general government.

The facts disclosed by the investigation which are deemed material, and upon which we base the conclusions of this report, are found and stated as follows:

Findings of Fact.

1. The complainant in this proceeding represents the city of Spokane in the state of Washington. It is a voluntary association of merchants and business men organized, among other purposes, to secure equal and reasonable rates for railroad transportation to and from that city. Originally this town was known by the name of Spokane Falls, and that continued to be its designation until sometime after this complaint was filed. Prior to the hearing, however, the corporate name had been changed by dropping the word "Falls," and the name of Spokane, therefore, will be hereafter used in this report. When this proceeding was commenced, which was in March, 1889, the Northern Pacific was the only railroad reaching Spokane and, accordingly, that carrier was the sole defendant named in the petition. In October of that year the Union Pacific completed a branch road which connected Spokane with its main line at Pendleton, Oregon, a distance of 251 miles, and thereupon became a competitor for the carrying trade of Spokane. It has, however, at all times made the same rates as the Northern Pacific on Spokane traffic, and the two roads appear to be united in maintaining the rates

of which that town complains. In view of its obvious interest in the controversy arising upon this complaint, the Commission of its own motion made an order, April 21st, 1891, allowing the Union Pacific Company to intervene as a party to the proceeding. It did so within the time prescribed by adopting substantially the answer which had previously been filed by the original defendant. The hearing took place, mainly at Spokane, in May, 1891, and the case was submitted without oral argument, briefs being thereafter filed by the respective counsel. Both defendants are common carriers engaged in the transportation of interstate commerce.

2. The Northern Pacific Railroad Company was chartered by Act of Congress approved July 2d, 1864, and subsequently re-organized under the provisions of another Act approved September 29th, 1875. It owns and operates a line of railway for the transportation of freight and passengers from Ashland, Wis. to Portland, Ore. and Wallula, Wash. a distance of 2,187 miles. Its principal eastern termini are the cities of St. Paul, Minneapolis and Duluth in the state of Minnesota; and its principal western termini the city of Portland on the Willamette river in the state of Oregon, and the cities of Tacoma and Seattle on Puget sound in the state of Washington. It also owns or controls numerous tributary and branch lines, some of which are of considerable length and importance, those in the territory surrounding Spokane being the Central Washington Railroad, the Spokane & Palouse Railway, and the Spokane Falls & Idaho Railroad. The aggregate mileage operated by this company exceeds 4,600 miles. The city of Spokane is in eastern Washington, on the main line of the Northern Pacific, 1,512 miles west of St. Paul and 544 miles east of Portland. The distance from Spokane to Tacoma is about 400 miles and to Seattle 440 miles.

3. The Union Pacific Railway Company was also chartered by special Act of Congress approved July 1st, 1862, and numerous acts subsequent so that date have enlarged its corporate powers. Its main line extends from Council Bluffs, Iowa, to Ogden, Utah, a distance of 1,038 miles. At Ogden it connects with the Southern Pacific system, forming a trans-continental line to San Francisco and other points on the Pacific coast. It also controls or operates various roads extending from Ogden, and also from Granger, Wyoming, on its main line to Portland, Oregon, with branch lines diverging at different points, the whole constituting, in conjunction with the main stem and its connections, a trans-continental system of great magnitude. Among these branch lines is the one from Pendleton to Spokane above mentioned, and one from Pocatello, Idaho, to Helena, Montana, which latter

place is also on the main line of the Northern Pacific about 1,180 miles west of St. Paul. The distance from Chicago to Portland by the Union Pacific appears to be some 200 miles less than by the Northern Pacific, but the former reaches Spokane by a much more circuitous route than the latter, the Northern Pacific having the shorter line between Chicago and Spokane by more than 400 miles. The difference in distance from St. Paul to Spokane in favor of the Northern Pacific is still greater.

4. Spokane is by far the largest and most important town in eastern Washington. It is situated at the falls of the Spokane river which afford a natural water power of great volume and value. When the Northern Pacific road was completed to this point in 1881, it had but a few hundred inhabitants and a limited retail business. Its growth since that time has been so rapid and substantial as to attract widespread attention and justify expectations of great prosperity in the future. At the time of the hearing its population had increased to twenty thousand or more, and its business had expanded into large proportions. More than three and a half million of dollars were shown to be invested in the various branches of its wholesale trade, and it exhibited many indications of great activity and enterprise. Its location is fortunate and its natural advantages superior. It appears to be the commercial center of a large district into which railroads have already been constructed in several directions. It is separated from the towns with which it seeks to compete, both on the east and on the west, by mountain ranges over which railroad construction is difficult and costly, and where operating expenses must necessarily be large. Its nearest tide-water rival is four hundred miles away, and included in that distance are the long and heavy grades by which the Northern Pacific crosses the barrier of the Cascades. Within convenient reach are numerous mining regions and an agricultural country of great extent and high degree of fertility. About seventy-five miles to the southeast are the Coeur d'Alene mines, with a population of about five thousand, connected with Spokane by a railroad operated by the Northern Pacific. Less than ninety miles east on the main line of that company are the Pend d'Oreille mines supporting some three thousand persons. To the northeast are the Kootenai mines in British Columbia, reached *via* Hope on said main line eighty-five miles east of Spokane and supporting some two thousand inhabitants. The Salmon river mines, with a population of five thousand, are about one hundred and fifty miles northwesterly, and between lies a fertile farming region, called the "Big Bend Country," situated on a bend of the Columbia river, and already occupied by upwards of fifteen thousand persons

Southerly and southwesterly is the "Palouse Country," so called, with an area of some twelve thousand square miles, peculiarly adapted to wheat raising, and containing an estimated population of forty thousand. Into this district runs the Spokane & Palouse railroad operated by the Northern Pacific. In various directions within a radius of one hundred and fifty miles are numerous towns and villages surrounded by farming communities, or supported by mining and kindred industries. The advantages of soil and climate, and the attractions of great mineral resources, have already brought to eastern Washington a large and enterprising population, and there is every reason to believe that its further development in wealth and numbers will be rapid and permanent. The natural location of Spokane, and the transportation facilities afforded by the various railroads which converge at that point, indicate that it is the appropriate and destined center for the distribution of an extensive and steadily increasing traffic through a large territory of consumers. These facts are stated at this length because they bear, quite forcefully we believe, upon the measure of compensation which public carriers may justly receive for services rendered to a community so situated and having such important relations to a large portion of this state.

5. The chief competitors of Spokane for the distributing trade of eastern Washington are the western terminals of the Northern Pacific, Portland, Tacoma and Seattle, all situated on navigable waters connected with the Pacific ocean, and the interior towns of Ellensburg in Washington, Genesee in Idaho and Missoula in Montana. Portland is on the Willamette river a few miles above its junction with the Columbia and about one hundred and thirty miles from the sea. It is the principal city on the Pacific coast north of San Francisco, of large wealth and commercial importance, and a population of nearly seventy thousand. Until within a comparatively few years it enjoyed almost a monopoly of the wholesale trade in the territory now comprising the states of Oregon, Washington and Idaho, and its jobbing business at the present time is said to exceed \$175,000,000 a year, one fourth of which is in eastern Washington. It reaches the Palouse country, some 400 miles distant, by an independent railroad, and its trade now extends to the towns and villages on the lines of the Northern Pacific as far east as Spokane. The rail rates obtained by Portland on through shipments from the east are so much lower than those accorded to Spokane that Portland dealers can lay down their merchandise in the territory immediately surrounding Spokane at prices which Spokane wholesalers cannot profitably meet. Indeed, it appears from the testimony that Portland merchants, and possibly

those of Tacoma and Seattle also, actually compete on some lines of goods for the trade of Spokane itself. In consequence of this disparity in rates the wholesale business of Spokane is necessarily confined to a limited area, and its distributing trade kept within small dimensions. Where the cost of transportation forms in any event so large a part of the selling price of an article, the difference in rates between Spokane and Portland is great enough to give the latter the command of the market even in territory naturally tributary to the former. When the local rate from Spokane is added to the higher rate to that point, it is obvious that the Spokane dealer cannot successfully extend his business to any considerable distance in the direction of Portland. So long as the present co-relation of rates between these towns is maintained, Spokane will be practically debarred from competing for trade in the territory bordering it on the west, even that lying at its doors, and its development as a distributing center to that extent prevented.

The competition of Tacoma and Seattle is similar in character to that of Portland, and so also is its effect. Both these cities are situated on Puget sound, and have the advantage of water communication with the seaports of the world. They have grown with great rapidity in recent years, Tacoma having upwards of 36,000 inhabitants and Seattle several thousand more. Their through rates from the east are the same as Portland's, and each of them has built up an extensive trade in the surrounding country. Ellensburg lies nearer the Salmon river mining region and parts of the "big bend country" than Spokane, but is less accessible to those districts on account of the Columbia river and the physical conditions of the intervening country. Genesee is the southern terminus of the Spokane and Palouse railway, and engages to some extent in the business of supplying the district by which it is immediately surrounded. Neither of these towns, however, by reason of their population, railroad facilities or relatively lower rates of transportation, sustain any vital relation to the main controversy in this proceeding. Missoula is something over two hundred and fifty miles east of Spokane, on the main line of the Northern Pacific, and competes with the latter place more or less successfully in the territory lying between them. Freight rates from the east are considerably lower to Missoula than to Spokane in proportion to their respective distances from eastern points of shipment, and the alleged disadvantage to which Spokane is thereby subjected is one of the grievances of which that town complains. The population of Missoula is stated to be about thirty-five hundred, and it is a station of considerable importance in the adjustment of rates affecting Spokane.

6. The freight rates investigated in this proceeding are made by the Northern Pacific Railroad and the Trans-Continental Association, of which both defendants are members. A clear understanding of the principal question in this case will be aided by some explanation of the general method pursued in constructing the tariffs of this association, and a statement of the territory to which they apply.

The Trans-Continental Association, as we understand, is composed of the following roads, viz: Atchison, Topeka & Santa Fe; Atlantic & Pacific; Burlington & Missouri River; Canadian Pacific; Chicago, Rock Island & Pacific (West of Missouri river); Colorado Midland; Denver & Rio Grande; Great Northern; Missouri Pacific; Northern Pacific; Oregon & California; Rio Grande Western; Southern California; Southern Pacific; St. Louis & San Francisco; Texas & Pacific, and Union Pacific. The territory covered by this Association, over which rates are made, includes, on the one hand, common points east of the 97th meridian of longitude located on roads of the Association, and points east thereof on roads with which the Association has an agreed basis for dividing rates, and on the other "Pacific Coast Terminals" and "Intermediate Points."

The Pacific Coast Terminals are the following: San Francisco, Sacramento, Marysville, Stockton, San Jose, Oakland (16th St.), Los Angeles and San Diego, in the state of California. Portland, East Portland, Albina and Astoria in Oregon. Tacoma, Seattle, Port Townsend, Olympia, Anacortes, Fair Haven, New Whatcom, Edmonds, Everett, Blaine and Quartermaster Harbor in Washington. Vancouver, Victoria, Nanaimo, Ladner's Landing and New Westminster in British Columbia.

Intermediate points are described in the tariffs of the Association as follows: "Intermediate points are points located on roads of this Association on direct line over which traffic passes in reaching any of the following "Terminals," viz:

(1) "San Francisco, Sacramento, Marysville, Stockton, San Jose, and Oakland (16th St.), California, when routed *via* any of the lines members of this Association, except the Canadian Pacific Ry.;

(2) Los Angeles and San Diego, Cal. when routed *via* any of the lines members of this Association, except the Canadian Pacific Ry.

the Northern Pacific R. R. or the line of the Union Pacific System *via* Huntington and East Portland;

(8) Portland, East Portland and Albina, Ore. when routed *via* the Canadian Pacific Ry. Northern Pacific R. R. or Union Pacific System; and *via* Ogden, Roseville Junction, El Paso, Mojave, and the Mt. Shasta route;

(4) Astoria, Ore. when routed *via* the Canadian Pacific Ry. Northern Pacific R. R. or Union Pacific System only;"

(5) "Tacoma, Seattle, Port Townsend, Olympia, Anacortes, Fair Haven, New Whatcom, Edmonds, Everett, Blaine, and Quartermaster Harbor, Wash.; Victoria, Nanaimo, and Ladner's Landing, B. C. *only* when routed *via* the Canadian Pacific Ry. Northern Pacific R. R. or Union Pacific Ry. and steamer from Portland, Ore."

"(6) Vancouver and New Westminster, B. C. *only* when routed *via* the Canadian Pacific Ry. or Northern Pacific R. R."

The region between the 97th meridian of longitude and the Atlantic seaboard is divided into six groups or territories, as follows:

Missouri River Common Points,
Mississippi River Common Points,
Chicago—Milwaukee and Common Points,
Cincinnati—Detroit and Common Points,
Pittsburgh—Buffalo and Common Points,
New York, Boston, Philadelphia, Baltimore, and points common with each.

The tariffs of the Association give detailed descriptions of the boundaries of each of the above mentioned territories.

Theoretically, the various articles of traffic are divided into ten classes, designated by the numerals, 1, 2, 3, 4, 5, and the letters A, B, C, D and E; and each class ordinarily has a different rate between the same points. Upon all classified traffic carried under the tariffs of the Trans-Continental Association the Western Classification is applied. This classification is made by a committee representing the lines leading westward from Chicago and the Mississippi river, and governs all through and local traffic on such lines; but upon transcontinental business its application is extended to embrace shipments originating at the Atlantic seaboard.

The following table shows the present *class* rates between "Pacific Coast Terminals" and "Intermediate Points," and the six territories above described; east of the 97th meridian of longitude. These rates apply in both directions, and there have been no material changes in them since September 1, 1888.

Spokane is an "Intermediate Point" within the definition of that phrase in the tariffs of the Association, and takes the same class rates as the above mentioned "Terminals."

Rates to and from San Francisco *via* Canadian Pacific Railway are the following differentials lower than the rates shown above:

	Classes.									
	1	2	3	4	5	A	B	C	D	E
St. Paul & Minneapolis.....	15	12	10	10	10	8	8	7	5	5
Chi.-Mil. & Com. Pts.....	17	14	12	10	10	8	8	7	5	5
Cinn. — Det. & Com. Pts.....	21	17	14	11	11	9	9	7	5	5
Ptsb. — Buff. & Com. Pts.....	22	18	15	12	12	10	10	8	7	5
N. Y., Boston, Phila., Balto. & Com. Pts.....	28	24	17	14	14	12	12	8	8	5

Besides these class rates there are a large number of *special commodity rates* both east and west bound. The commodity rates applying west bound, however, are largely in excess of those applying east bound. In the west bound tariffs as now printed there are about three pages of commodity rates applying to both "Pacific Coast Terminals" and "Intermediate Points," and more than fifty pages applying to "Terminal" points only. The latter list probably includes the greater portion of articles which are shipped from points east of the 97th meridian to Pacific coast points. When a commodity rate to a "Terminal" point plus the local back to an "Intermediate" point makes a lower rate than the straight "Intermediate" rate, the combination rate applies.

The rates upon classified traffic to Pacific coast points are the maximum rates to intermediate points.

It will be observed that the roads which are members of the Trans-Continental Association extend no further east than the Mississippi river, while rates are published by the Association from the various eastern grouped territories described. Under the present plan of co-operation with lines east of the Mississippi river, tariffs are promulgated by the Trans-Continental Association only after concurrence in the rates by the lines east of the Mississippi through their associations, under which arrangement the eastern lines exact certain proportional rates to the Mississippi river.

The rates from St. Paul to Spokane are made and published by the Northern Pacific Railroad. These rates are progressive until a point is reached where the rate is found to be as high

as the class rate to Pacific coast terminals; from such point to the coast the terminal rate is applied under the rule that the rate to the Pacific coast shall be the maximum rate to intermediate points, except when a commodity rate to a "terminal" point plus the local back to an "intermediate" point under the classification produces a lower rate than the straight "intermediate" rate.

As the tariffs are now arranged the maximum class rate is reached at Athol, Idaho, forty-two miles east of Spokane, and continued from there west to Portland, a distance of 586 miles. No group of points receiving the same rate embracing anything like so great a distance is observed on any other portion of the road. The next largest group, West End, Montana, to Garrison, Montana, inclusive, covers only 160 miles.

7. The class rates to Spokane on the several classes of freight from eastern terminals of the Northern Pacific are as follows:

Merchandise in cents per 100 lbs.

1	2	3	4
350	300	250	200

Special carload classes in cents per 100 lbs.

Fifth Class	A	B	C	D	E
175	175	155	125	110	90

All stations west of Spokane to and including Portland, *via* Tacoma, and all stations on the Spokane and Palouse road, are grouped with Spokane and charged the same rates. As a general rule commodity rates are made to terminal points, and classification and local rates to intermediate points. Ellensburg freight appears to be billed through to Tacoma and returned at local east bound rates.

The great bulk of shipments from eastern points to Spokane is charged the class rates above given, while most of the traffic to Portland and other western terminals is taken at commodity rates, as already stated. In the printed tariffs Spokane has only two or three pages of articles bearing commodity rates against upwards of fifty pages applying to Portland.

The following table exhibits the class rates and distances from St. Paul to the various stations therein named, with the rates per ton per mile on first class freight to each such station, from which may be seen the increased rate per hundred pounds compared with increased distance from starting point.

Miles from St. Paul.	Stations.	Rates per ton per mile 1st class.	Per hundred pounds.

1254	Missoula, Mont.....	04.15	280	225	185	155	135	120	102	87	77	67
1512	Spokane, Wash.....	04.63	350	300	251	200	175	175	155	125	110	90
2056	Portland, Oregon.....	03.40	350	300	250	200	175	175	155	125	110	90

The following deductions from this table show the increase in first class rates between different points at substantially equal distances from each other between St. Paul and Spokane.

Hitterdal, 231 miles from St. Paul,	77 cents.
Sims, 255 " " Hitterdal,	53 "
Miles City, 258 " " Sims,	40 "
Livingston, 263 " " Miles City,	65 "
Missoula, 247 " " Livingston,	25 "
Spokane, 238 " " Missoula,	90 "

The increase on the other nine classes is in approximately the same proportion.

These tables show an extraordinary increase from Missoula to Spokane. Figured in cents per ton per mile, the increase on through freight from the east to Spokane and Missoula respectively, for the 250 miles east of each place, is approximately as follows:

First class	{ Spokane, 7½ cents.
	{ Missoula, 2 "
Fifth class	{ Spokane, 3½ "
	{ Missoula, 1½ "
Class E,	{ Spokane, 2 "
	{ Missoula, 7 mills.

The rates to Spokane and Missoula were originally on a similar progressive basis, but upon the construction of the Great Northern road to Missoula that town was granted a \$2.60 rate. While Missoula has proportionally lower rates on shipments from the east, its rates from San Francisco are but little higher than those to Spokane. On fifth class freight, for instance, rates from the east to Spokane are 40 cents higher than to Missoula, while the rates from Portland to Missoula are only ten cents higher than to Spokane. The highest rate on sugar going east is at Spokane, but on most other articles at Miles City, Montana. On east bound freight, Pacific coast products, Missoula is grouped with Spokane on certain commodity rates, and on classified traffic the increase from Spokane to Missoula is only about one third the increase on west bound freight from Missoula to Spokane.

The rate per ton per mile, St. Paul to Spokane, on each of the ten classes is approximately as follows: 1st, 4½ cents; 2d, 4 cents; 3d, 3½ cents; 4th, 2½ cents; 5th, 2½ cents; A, 2½ cents; B, 2 cents; C, 1½ cents; D, 1½ cents; E, 1½ cents.

The average, therefore, of the first five classes is about 3½ cents, and of all the classes 2½ cents. Assuming the average (commodity) rate to Portland to be \$1.50 per 100 lbs. the average rate per ton per mile would be about 1½ cents. On this assumption the rate per ton per mile from the east to Portland is less than three fifths as much as to Spokane, although the distance is more than one third greater. And if, as seems to be the fact, most of the goods shipped are in the first five classes, the disparity between these towns is still more marked. There is no point on the line of the

Northern Pacific where west bound rates are higher than to Spokane; consequently western terminals pay no more than Spokane even on articles carried at classification rates, and notwithstanding such articles may not be adapted to water carriage or actually subject to water competition.

8. The freight tonnage carried to Spokane and the earnings derived therefrom, compared with corresponding figures relating to Portland, Tacoma, and Seattle, give some idea of the relative revenues obtained at these towns respectively.

The following statement furnished by the Northern Pacific Company, shows tonnage received and earnings therefrom at the several stations therein named for the year ending June 30, 1890.

Freight Received.		
Station.	Tonnage.	Earnings.
Spokane.....	182,018	\$1,664,905.48
Seattle.....	122,174	1,216,494.42
Tacoma.....	524,219	1,859,645.86
Portland.....	73,883	743,194.99

Tonnage given in tons of 2,000 lbs.

The total number of tons handled by this company during the same year was 3,569,969, and the total freight earnings, \$15,600,319.22.

The following figures are for the eleven months ending May 31, 1891:

Freight Received.		
Station.	Tonnage.	Earnings.
Spokane.....	199,752,385	\$ 970,061.60
Seattle.....	295,642,502	1,261,950.17
Tacoma.....	1,424,075,167	2,068,119.82
Portland.....	195,347,991	871,825.15

Tonnage given in pounds.

The freight shipped from these points during the same periods and the earnings therefrom appear from the following statements furnished by the same company:

Freight Forwarded.		
Station.	Tonnage.	Earnings.
Spokane.....	48,809	\$163,848.82
Seattle.....	19,371	110,882.97
Tacoma.....	84,404	457,789.44
Portland.....	118,086	585,451.14

Tonnage given in tons of 2,000 lbs.

Freight Forwarded.		
Station.	Tonnage.	Earnings.
Spokane.....	32,602,738	\$203,044.52
Seattle.....	66,448,832	158,305.58
Tacoma.....	192,247,775	509,847.16
Portland.....	241,682,675	711,250.54

Tonnage given in pounds.

The foregoing figures include all the business of the Northern Pacific, both through and local, at the places and during the periods named, but the division of that business between through and local at either point cannot be determined from the evidence. Of the aggregate earnings of this company from its whole mileage, about 26 per cent is received at terminal and 74 per cent at intermediate points. Mr. Hannaford, the General Traffic Manager of this road, testified in substance that 60,000 tons a year was a moderate

estimate of the traffic to Spokane from St. Paul and points further east, but the tonnage of such traffic to Pacific coast terminals, or either of them, does not appear. Neither do the proofs show how the through shipments to Spokane are divided between the different classes of freight, nor the relative tonnage of different articles taken at commodity rates to the several terminals. There may be some estimates upon these points but no accurate and reliable figures. The information, however, is of no special value. The main question upon this branch of the case grows out of the rates themselves in connection with the distances and other related facts which distinctly appear and are wholly undisputed.

Since the completion of its branch line from Pendleton, the Union Pacific has secured from ten to fifteen per cent of the eastern traffic to Spokane, and probably handles about one fourth of the entire tonnage of that town. It does not appear to be in a situation to do otherwise than meet the rates made by the Northern Pacific.

The tonnage from east to west on the Northern Pacific is much greater than from west to east; consequently a large number of empty cars must be hauled in the latter direction. This feature of the business seems more prominent in respect to western terminals than points in eastern Washington, and this circumstance may have some bearing on the relatively higher rates from the coast to Spokane than to Missoula and more easterly points.

9. As already explained most of the traffic to Pacific terminals is carried, not at class rates, but at special commodity rates. The difference between the class rate and the commodity rate on any particular article is easily ascertainable from the tariffs, and the difference in revenue can be determined by multiplying the tonnage actually carried to terminal and intermediate points respectively by the respective rates to each. This difference will sufficiently appear, without entering into numerous calculations, by the following illustrations, taken at random from the tariff sheets, and showing the rates actually charged on shipments from the east to the several points named, on a number of articles of general consumption, the traffic in which is presumably large. It will be remembered that Tacoma, Seattle and other terminal points take the same rate as Portland.

Statement showing rate per 100 lbs. on the several commodities named from St. Paul to the points given.

Rates to Missoula, Spokane and Genessee are local class rates of the Northern Pacific R. R. from St. Paul.

Rates to Ellensburg are constructed upon a combination of the commodity rate to Portland and the class rate Portland to Ellensburg.

4 INTER S.

Rates to Portland are the commodity rates to "Terminal" points as per Trans-Continental Association Tariffs.

Class.	Commodity.	Missoula.	Spokane.	Genessee.	Ellensburg.	Portland.
5	Canned Goods, C. L.	135	175	175	162	107

These examples, it is believed, fairly characterize the entire list of commodities, and indicate the general relation of rates between Spokane and the other points named in the table. A simple computation shows that the average rate per 100 pounds on the twenty-three articles or classes of merchandise above mentioned is \$2.60 to Spokane and Genessee, \$1.94 to Missoula, \$2.29 to Ellensburg, and \$1.54 to Portland. Substantially the same results would doubtless be obtained by a more extended comparison. On the basis of these figures the rate per ton per mile is $3\frac{4}{10}$ cents to Spokane as against $1\frac{8}{10}$ cents to Portland. It is manifest from this showing that numerous articles of common consumption which are produced at various points in the east can be laid down at Portland, Tacoma or Seattle so much cheaper than at Spokane that the latter town is placed at constant and serious disadvantage.

10. We also find in a few instances differences in classification which favor these terminal points irrespective of their lower rates. On some articles car-load rates are made to Portland when no car-load rate is given to Spokane. In such a case the less than car-load rates apply to Spokane although the shipment is in car-load quantities, thus depriving Spokane of the advantage of Portland's car-load rate. The privilege of shipping mixed car-load lots at car-load rates is also allowed to Portland when the same privilege is denied to Spokane; and there appear to be some instances in which the car-load rate is granted to Portland on a shipment of 15,000 pounds, but not accorded to Spokane on a

shipment under 30,000 pounds. The virtual admission of the defendants that such discriminations are unlawful, and their avowed intention of correcting all inequalities of this description, render it unnecessary to cite examples from the evidence or add further statement to this general finding.

11. The comparative volume of eastern traffic which actually reaches these Pacific terminals by water cannot with entire satisfaction be determined from the evidence. Special facts relating to particular shipments might be multiplied indefinitely, but their chief value would consist in furnishing instances of ocean carriage; while general statements, though leading more directly to correct conclusions, would doubtless be subject to modifying exceptions. The primary question, however, is not so much whether rail rates to the Pacific are lower than is necessary to prevent water carriers from doing the business, but whether in fact such competition exists at these western terminals as justifies the railroads in maintaining higher rates to intermediate points than are accepted by them for through transportation. In other words, is the dissimilarity of conditions so substantial and unavoidable that the greater charge for the lesser distance may be lawfully exacted? The fundamental fact observed in this connection is that all of these three towns, Portland, Tacoma and Seattle, possess the natural advantages of seaport location. They enjoy the benefits of water communication with the great supply markets of the world. The opportunity for receiving eastern shipments independent of the rail transportation furnished by the defendants is constantly afforded them. Through the navigable waters which connect them with the Pacific, sea-going vessels of ample size can bring merchandise from all quarters directly to their docks. In the nature of the case the railroads neither have nor can have a monopoly of the carrying trade to these towns, for the facilities of water carriage are always available to them. Having the choice of two methods they can employ the one which on the whole proves most economical. Under these circumstances the railroads must necessarily make rates low enough to secure the business or abandon it to rival carriers using the cheaper modes of water transportation. Prior to the construction of the trans-continental lines the great bulk of eastern merchandise consumed on the Pacific coast was conveyed to its destination in ocean vessels either around Cape Horn or by the Isthmus of Panama. This resulted in an established commerce by those routes between Atlantic and Pacific ports. When the railroads were built they were able to participate in this trade only by offering rates which, all things considered, were more advantageous to

shippers than those afforded by the water lines. That was the obvious condition upon which they could engage to any great extent in carrying freight to the Pacific coast. They had the alternative of making rates which would attract the business or leaving it mainly to the ocean carriers. But while the inducements held out by the railroads have given them a large portion of this through traffic, they have at no time secured it all. More or less has always gone by water, and a considerable share of it still follows the ocean routes notwithstanding the low rates offered by the overland lines.

The extension of railroad facilities to the Pacific coast caused a large addition to the population west of the Rocky mountains, and greatly stimulated the demands of that territory for eastern products. The volume of business rapidly increased and is all the while enlarging. The railroads, it would seem, are amply equipped for handling the entire traffic, but the ocean lines have not been discontinued. The cheaper cost of water transportation cannot be wholly overcome by the advantages of rail conveyance. Under the existing relation between land and water rates a certain amount of eastern freight will continue to reach the Pacific coast by ocean carriage, and the constant opportunity to employ that mode of shipment is an unyielding limitation upon the through charges of the railroads.

Nor is the quantity of merchandise which now goes by water to these western terminals by any means insignificant. A line of steamships between New York and San Francisco by the Isthmus of Panama dispatches a steamer of large tonnage every ten days and has done so for a number of years, and numerous sailing vessels take cargoes with more or less regularity from Atlantic and foreign ports to various distributing points on the Pacific coast. Several lines of steamers run from San Francisco to Portland and Puget Sound ports, one of them sending a vessel to the last named ports every five days, and two others every ten days. Between August, 1888, and April, 1889, nineteen ships with merchandise cleared from New York for San Francisco and Portland, and during the twelve months ending in May, 1891, eight loaded vessels entered the port of Portland sailing directly from the Atlantic coast. Clipper ships also make more or less frequent voyages from New York to Puget Sound ports direct, bringing merchandise of various kinds to Tacoma and Seattle in competition with the overland roads. In addition to these are occasional vessels coming to those ports for return cargoes of lumber, wheat, etc. and willing to take outgoing freight in place of ballast at almost nominal figures. The eastern goods conveyed to these points by water are mostly of the coarser and cheaper grades,

such as heavy hardware, groceries and commodities of a similar character; but they include, to some extent at least, such merchandise as school and blank books, ink, paper, certain kinds of drugs, foreign crockery, notions, and many other articles of general consumption. Part of this traffic comes direct from the eastern port of shipment, and part of it is transshipped at San Francisco. In the aggregate it is quite moderate both in weight and value compared with the rail transportation to these terminals, probably not exceeding five per cent of the total tonnage. The average time required for a voyage from New York around Cape Horn to Puget Sound ports is approximately five months, and this circumstance alone gives an enormous advantage to the carrier by rail. The great variation in the length of ocean voyages, uncertain and irregular arrivals of sailing vessels, increased liability to loss and damage while in transit, cost of marine insurance and long interval between date of shipment and arrival, with consequent loss of interest upon the purchase price, all operate against the general and constant use of water transportation for such unusual distances. Articles of a delicate or perishable nature will rarely take the ocean routes when any other method of conveyance is obtainable, while the great variety of goods which are adapted to a particular season or depend upon the fluctuations of fashion will, as a matter of course, seek the speedier movement and more certain delivery afforded by the overland lines. In favor of the ocean routes, however, are their constantly lower charges. Rates which would be ruinous to the railroads are freely offered by their competitors. The water carriers solicit traffic for transportation from the Atlantic seaboard to Pacific terminals at a cost to the shipper greatly below the commodity rates of these defendants. Shipments are made by the ocean lines at 50 to 75 cents per hundred on many lines of goods, and the average water rate appears to be not more than half the rail rate to the same points on the Pacific coast. Freight is sought for by agents of the water lines at \$10 per ton from New York to Seattle, and it seems to have been carried for less than \$9 per ton by steamer to Antwerp and thence by sailing vessel to Puget Sound.* Between the lower rates offered by one carrier and the greater speed, safety, etc., afforded by the other, the shipper can choose from time to time

as interest seems to dictate. The opportunity for choice between competing modes of transportation, permanently enjoyed by these terminal towns, places them in a very different relation to the railroads than intermediate points not favored with a similar competition.

The investigation of this case satisfies us, and we so find, that under existing rates for land and water transportation respectively, the tendency is in the direction of increased shipments by the ocean routes. This is due in part to the improved facilities and diminished cost of water carriage, but still more to the enlarged business and greater financial strength of wholesale dealers on the Pacific coast. As these terminal points develop and their trade becomes more assured and important, the increase of capital will gradually remove the necessity for quick delivery and speedy sales of eastern purchases, while competition with each other will more and more compel resort to the cheaper modes of transportation.

Between the lowest charges of the rail carriers and the rates accepted by the water lines there is a wide margin in favor of the latter. So long as this margin exceeds the items of interest, insurance and the like, the ocean routes will attract the patronage of shippers whose financial condition leaves them at liberty to select the cheapest method of securing their supplies. While the rail tariffs in question remain so much above the water rates, it may be reasonably expected that staple goods required for general consumption at all seasons of the year, particularly the low-priced and and heavy grades in which the traffic is extremely large, will, so far as they are fairly adapted to long distance transportation by water, very largely take that method of reaching their destination.

12. The commodity rates accepted by the defendants on shipments to their western terminals afford them a margin of profit over the cost of moving the traffic. Their net revenues are increased by engaging in this competitive business. Measured by the income which these roads are entitled to receive upon the large outlay required for their construction, their through rates are not remunerative. Their entire business could not be done on the same basis without financial disaster. A certain revenue above operating expenses is necessary to their solvency and justified by the original investment. But such returns would not be realized if they were compelled to carry freight to all points on their lines at rates proportioned to their through charges, nor even if the intermediate rate in no case exceeded the present terminal rate. If the existing intermediate or class rates should be enforced on all shipments to the Pacific, a large portion of the through traffic would go to the ocean carriers and the railroads be mainly con-

*To these facts which are established by the testimony in this case, it may not be improper to add that information subsequently acquired in other proceedings shows a much more extensive use of water transportation and much lower rates by water lines than are indicated by the foregoing statements. The actual course of business at the present time justifies the finding that water transportation, of merchandise adapted to that mode of conveyance, is practically available for shipments from the Atlantic seaboard to the Pacific terminals.

fined to the business of their local and interior points. It is quite suitable, therefore, for the defendants to make through rates which enable them to participate in this competitive traffic, provided the receipts therefrom clearly exceed the added risk and expense involved in handling the business. This we find to be the general fact in respect of the through rates in question.

Conclusions.

From the foregoing statement of our views respecting the principal questions of fact in this case, it follows that the complainants' petition cannot be sustained so far as it seeks to enforce the general rule of the statute prohibiting the greater charge for the lesser distance. The circumstances and conditions under which through transportation is effected over the lines of the Northern Pacific to its western terminals are substantially different from those attending like transportation to Spokane, such dissimilarity consisting in the competition at these terminal points of carriers not subject to the Act. To what extent this competition is created by the rates made and traffic secured by the Canadian Pacific road does not very clearly appear. The known facts concerning that road, however, are not wanting in significance. It is a foreign railroad, chartered and subsidized by a foreign government and not directly amenable to the regulating authority of Congress. It extends entirely across the continent at no great distance from our northern border, and is so located and connected with domestic lines as to constitute a prominent factor in all questions of transportation between the eastern and western sections of the United States. The circumstance that this carrier is allowed certain differentials by agreement of the transcontinental lines, presumably with the view of insuring stability of rates, plainly indicates its power to divert traffic from the American lines and the generally formidable character of its competition. How far the rivalry of the Canadian Pacific would excuse the defendants in making lower rates to terminal than to intermediate points, if no water competition existed at those terminals, we do not undertake to determine. Whatever opinion might be formed under such circumstances, it is manifest that the existing situation is modified in a considerable degree by the presence of this foreign railroad; that it exercises a distinct and appreciable influence upon the rates in question, and that it is not to be disregarded in estimating the obligations of the defendants to the various localities which they serve. In saying this, however, no assumption is implied that the Canadian Pacific road is not subject to the Act to Regulate Commerce, as to this competitive traffic; the observations are made without reference to

that question. This explanation is perhaps needful as nothing is intended to be here stated conflicting in any respect with our recent decision in the Georgia Railroad Commission cases, *Trammell v. Clyde SS. Co.* 4 Inters. Com. Rep. 120.

There is sharp disagreement between the parties both as to the kind and volume of shipments which actually reach these Pacific terminals by water, and as to the necessary effect of water carriage and water rates upon the proper adjustment of railroad charges. Without reviewing the evidence or repeating the findings upon that issue, we are constrained to hold that water competition of controlling force, and affecting a variety of traffic important in character and amount, actually exists at these several terminals, and that such competition, taken in connection with the competitive position and attitude of the Canadian Pacific road, justifies the defendants in accepting less compensation on eastern shipments to the cities of Portland, Tacoma and Seattle than they may lawfully charge on like shipments to the intermediate city of Spokane. The conditions attending transportation to the interior towns are radically different with respect of obtainable rates than those governing like transportation to the Pacific coast. The carrying trade to Spokane is monopolized by the defendants, but the traffic to their various terminals is subject to constant and controlling competition. The ocean lines which reach these ports furnish independent and efficient facilities for the carriage of eastern merchandise, and offer their services at rates which the rail carriers must approximate or be mainly excluded from participation in the through business. Virtually in one case the railroads exact "what the traffic will bear;" in the other they must carry for what they can get. The lower charge to competitive points is fairly excused by the necessities of the case.

While this conclusion is reached without serious difficulty, we have the impression at the same time that some of the commodity rates under which traffic is taken to western terminals are lower than is necessary to prevent water lines from getting the business, and that commodity rates are accorded to more or less articles which are not adapted to water transportation and therefore not subject to water competition. The only justification for a through rate less than the intermediate rate on the same article is the compulsion of the rail carriers to accept the reduced compensation or suffer their ocean rivals to perform the service. Where the pressure of this alternative is not felt there is no ground upon which the lower terminal charge can be excused. Nothing but the stress of unavoidable competition can legalize the inequality resulting from higher rates for shorter than for longer hauls.

It is evident, therefore, that no article should be carried to terminal points at commodity rates, which if the class rates were imposed, would still seek rail rather than water transportation. Any violation of this rule is an unjust discrimination against the intermediate town compelled to pay the higher class rate on the same article. Theoretically it would be suitable to examine the entire list of commodities with the view of ascertaining which of them in fact are practically adapted to ocean carriage, and to restrict the defendants in making lower terminal rates to such articles as are actually subject to water competition. Merchandise which would usually and naturally go by the overland lines, if the classified rates were enforced, should not be allowed the more favorable tariffs granted to strictly competitive business. If that principle is regarded the discriminations complained of will be limited to traffic fairly capable of conveyance by either mode, and the rates in question equitably adjusted to the different conditions prevailing at terminal and intermediate points. Moreover, as it seems to us, the interests of the rail carriers themselves would be promoted and their revenues increased by adherence to this policy in regulating their charges. But the evidence upon this subject permits no such minute analysis of the situation and furnishes no basis for such detailed directions. Upon the facts before us we can do little more than decide the general question involved in this phase of the controversy and indicate the rule which, under that decision, should be rigidly applied in making lower rates to competitive terminals than may lawfully be maintained at shorter distance points where no other transportation is available than that furnished by the defendants. The principle of relative justice will not be observed if commodity tariffs are made needlessly low to prevent traffic from going by the ocean lines, nor if articles not really subject to water competition are given through carriage at commodity rates. Our impression that this rule is departed from in some cases may be erroneous, but even if well founded the correction of any injustice in this direction must await further investigation of the facts and circumstances relating to particular articles and the commodity rates at which they are carried.

It should be understood, therefore, that nothing contained in this report is intended to formally approve the present schedule of commodity rates to Pacific terminals either in detail or as a whole. We sustain the general contention of the defendants that competitive conditions existing at these terminals justify a departure from the rule which prohibits a higher charge for a shorter than for a longer haul, but we pass no judgment upon the necessity or propriety of any particular rate.

4 INTER 8.

All questions of that character are reserved for future inquiry. If specific cases of discrimination against interior shippers are alleged to result from these commodity rates, either because some article receives a rate clearly below the necessities of competition, or because the commodity rate is applied to an article not actually competitive, the Commission will be at liberty within the spirit of this decision to investigate any complaint of that nature and make such correcting order as the facts may require.

Although we find justification for the defendants in maintaining higher rates on shipments to Spokane than they accept on like shipments to Portland and other Pacific terminals, we are at the same time clearly convinced that the rates now in force from St. Paul and eastern points to Spokane are in themselves unreasonable and should be considerably reduced. The conditions of water and rail competition at western terminals may compel these roads to make through rates less than those justly established at intermediate places, but the intermediate rate must itself be fair and reasonable. The Spokane rate does not meet this requirement; we are satisfied that it is excessive. It discriminates against those who are compelled to pay it, not because lower rates are granted to towns at greater distance from St. Paul, but because under all the circumstances it is unreasonably high; and our warrant for this conclusion is found in the published tariffs and long continued practices of the railroads themselves. In connection with other carriers they have promulgated and for years maintained certain class rates on traffic to Pacific terminals which are identical with their rates on shipments terminating at Spokane. Their standing proposition is to carry at these class rates to their several terminals regarded as noncompetitive points. In effect they say, we should charge these class rates and no more for transportation of all kinds to our Pacific terminals, if there was no competition for the carrying trade to those points, and we would be willing in the absence of such competition to perform the service for that compensation. This is equivalent to a declaration on their part that the class rates afford reasonable and adequate remuneration for hauling traffic to the Pacific coast. They profess now to charge the class rates on all articles not suited to water carriage and for that reason not subject to water competition, and they excuse the lower commodity rates on through shipments solely on the ground of such competition. They must be deemed to admit, therefore, that only the present class rates would be expected for carrying to their various terminals if those terminals were noncompetitive points under similar conditions to those existing at Spokane. In short the class

rate is concededly fair compensation for through carriage to the Pacific. But if the class rate is reasonable and compensatory for carrying to Portland, must not the same rate for carrying only to Spokane be excessive and unreasonable? If that rate sufficiently rewards the carrier for the greater service, is not the lesser service clearly overpaid? Bearing in mind the great difference in the distances of these towns from eastern points, and the difficult grades over the intervening Cascades, a rate which is admitted to be enough for the longer haul would seem little less than extortionate for the shorter. There can be no justification for applying the same tariffs to places so far apart as these, with a range of mountains between them, when rates are made without reference to competitive conditions at the longer distance point. The scheme of tariff construction by which uniform charges are made to all points between the eastern line of Washington and the city of Portland, a distance of more than five hundred and sixty miles, carries on its face the presumption of injustice. A "blanket" of such extraordinary dimensions must cover a multitude of transportation sins.

Moreover, the great disparity in this case between through and intermediate rates tends strongly to prove the unreasonableness of the latter. The Northern Pacific would not be competing for terminal business at these low commodity rates if they did not yield a margin of profit over the cost of performing the service. Granted that those rates applied to all the traffic of this company would not produce the revenue to which it is entitled—and we have so found—nevertheless the earnings on competitive business exceed the additional expense incurred in its transportation. Something, the carrier asserts, is made on this traffic over the cost of "physical movement." That is the fact relied upon to excuse the lower rates on through shipments and constitutes the ground upon which the policy of the railroads is defended. But if it is profitable even to that extent to carry merchandise of every grade 2056 miles to Portland at an average compensation of about \$30 per ton, must there not be, in the broadest sense, an unreasonable profit in taking \$52 a ton for carrying the same merchandise to Spokane a distance of only 1512 miles? If a rate of less than one and a half cents per ton per mile yields a desirable margin over the bare cost of moving the traffic, may we not fairly infer that a rate of nearly three and a half cents per ton per mile pays an unwarranted return upon the whole investment? The difference between these figures is too great to permit the lower charge to be justified by the rule of expediency without condemning the higher charge by the rule of reasonable compensation. The fact that through business

is sought at these terminal rates leaves no doubt in our minds that the Spokane rate is excessive.

This conclusion seems quite inevitable when comparison is made between rates to Spokane and rates to Missoula and points further east. The distance from St. Paul to Missoula is 1254 miles, only 258 miles less than to Spokane, yet the difference in first class rates is ninety cents per hundred pounds, viz: \$3.50 to Spokane and \$2.60 to Missoula. Rates on the other classes differ in about the same proportion. From every point of view the Missoula rate is materially lower than the Spokane rate, and no substantial reason appears for this striking inequality. The increased distance to Spokane is about 20 per cent of the distance to Missoula, but the increase in rate for this distance is nearly 35 per cent of the Missoula rate. Under the ordinary and suitable rules of tariff construction, rates per ton per mile diminish as distances increase, but Spokane's rate per ton per mile is considerably greater than Missoula's, as great in fact as Livingston's, only two thirds the distance from St. Paul. The increase in first class charges from Livingston to Missoula is only 25 cents per hundred though the distance is nearly as great as from Missoula to Spokane. The increase from Miles City to Livingston, a distance of 263 miles, is 65 cents, and this is the largest increase between any points east of Missoula at similar distances from each other. In brief the rates of the Northern Pacific are built up much faster from Missoula to Spokane than on any other portion of its line, though nothing appears in the way of more expensive construction or operation between these points to account for the relatively greater rates charged for the longer haul. The same classification is used to both points, and the only variation from the comparative figures contained in the table set forth in the findings is in cases where the Trans-continental Association rate through to the Pacific, plus the local rate back to Spokane, makes a less rate than those figures give to Spokane; in such cases the lower rate is applied. But the instances must be quite rare when a combination of through and local rates materially improves the situation of the Spokane jobber, since the rates to all points west of Spokane are subject to the same exception, so that when the local rate back is used in making the through rate to Spokane a still lower local is used in making the through rate to the points west of that town.

The rates to Spokane and Missoula respectively might be compared indefinitely and from every standpoint, without finding any ground upon which the Spokane rate can be upheld. The more it is contrasted with the rates which Missoula receives, and even with those granted to Livingston, Miles City and

other places, the more indefensible does it appear. Whatever rule is applied or test resorted to confirms the belief that it is relatively and inherently unjust. The fact that more favorable rates have long been accepted by the defendants for carrying merchandise to these other places, where the general conditions competitive and otherwise are substantially similar to those existing at Spokane, is sufficient proof that the transportation charges imposed upon the latter town are so clearly excessive as to constitute a violation of the law which requires all rates to be fair and reasonable.

The amount of reduction to which Spokane is entitled cannot easily be determined. There may be general agreement that the present tariff is too high, and great conflict of opinion as to how much it should be reduced. Any relieving order containing definite directions in that regard must be more or less arbitrary. Between the opposing interests of the defendants on the one hand and the Spokane shippers on the other, we must decide as fairly as we are able by prescribing for this locality such maximum rates as on the whole best accord with our judgment. We are largely influenced in the conclusions we have reached by the classified rates which the railroads have voluntarily fixed for transportation to the Pacific coast and by the measure of compensation which, with equal freedom, they have so long accepted on shipments to Missoula and other points east of Spokane. Between the lower schedule to the latter places and the uniform rates now extending from the Idaho line to Portland, there must be an intermediate scale which approximates justice to both shipper and carrier. The practical basis we have decided to adopt is a percentage reduction from the classified rates now applied equally to Spokane and the Pacific coast; our conviction being that a fixed relation between intermediate rates to Spokane and class rates to the terminals is the most equitable theory upon which a re-adjustment can be effected. If the great bulk of terminal traffic was governed by the class rates now in force, so that those rates measured the compensation actually received for through transportation, we should have little hesitation in holding that the Spokane rate should not be much below ninety per cent of the class rate to the terminals. But in point of fact comparatively little of the through business pays the classified rates; the main volume of rail shipments to the Pacific takes the lower commodity rates made necessary by water competition. The class rates, therefore, are little more than nominal so far as through traffic is concerned. To base the Spokane reduction solely on those rates is to assume their reasonableness for through transportation if they were in fact obtained on a large portion

of the business, and to apply a rule which, under existing conditions, would not insure relative justice to Spokane. That being the main purpose to be kept in view, we cannot overlook the long list of commodity rates which are freely accepted for carriage to terminal points, because those rates are of material and unmistakable value in determining what is just compensation for the shorter haul. Taking into account the respective rates actually established at terminal and intermediate points, and the wide difference between class and commodity rates on the principal articles to which they are applied, a greater reduction is required at Spokane than its distance and location would warrant if the class rates were in fact enforced on shipments to the Pacific. We must have regard also, in seeking the proper differential for Spokane, to the tariff rates maintained at Missoula and points further east where the circumstances and conditions appear to be substantially the same. The result, in a word, must be arrived at upon an examination of the entire field and a survey of the whole situation. These considerations lead to the conclusion that the Spokane rate should be approximately eighteen per cent below the rates now in force at that point, and should not materially exceed eighty-two per cent of the present class rates to Pacific terminals, the latter being used as a convenient basis for fixing the reduction at Spokane. For the purpose of avoiding fractions, and because there may be some reason why the reduction in first class rates should be under rather than over the percentage named, the general basis may be so far modified as to give the following figures, as a maximum reasonable rate, for each of the several classes, viz: Class 1, \$2.90; 2, \$2.46; 3, \$2.05; 4, \$1.64; 5, \$1.44; A, \$1.44; B, \$1.28; C, \$1.02; D, \$0.90; E, \$0.74.

We undertake no demonstration of the exact correctness of this conclusion. We take into account the geographical position of Spokane between Missoula on the east and Pacific points on the west, and make that division between the rates now applied to these respective localities which, all things considered, we deem just and fair to Spokane and best calculated to produce equitable results. It may be that the practical operation of these rates will disclose the propriety of some alterations, but that can be determined only by the test of experience, in the light of which the rates can be re-adjusted upon the application of either party. Our idea is to make the Spokane rate a definite percentage of the class rate to the Pacific, and we have fixed the relation which, under present conditions, is most in harmony with our convictions. In case the class rates to western terminals are reduced, there should be a corresponding reduction in rates to

Spokane, unless such reduction should greatly increase the volume of shipments at classified rates to Pacific terminals, in which case the proper relation between Spokane and the terminals on such traffic can be further considered. This ruling will not apply to the commodity rates now accorded to Spokane nor will it excuse the defendants in withdrawing or increasing such commodity rates.

This decision will apply not only to rates from St. Paul and other eastern terminals of the defendants, but is intended to include directions for a proportionate reduction in the grouped rates from points east of St. Paul, so far as they are applied to Spokane traffic. The railroads which join with the defendants in making these rates were not made parties to this proceeding; but the case will be reopened, if necessary, for the purpose of bringing them in, to the end that all carriers affected may be bound by the order herein unless cause be shown for a different ruling.

It is quite apparent that a reduction of Spokane rates in compliance with this decision will require some modification in rates to shorter distance points to avoid infraction of the long and short haul clause of the statute. This will especially be the case on the line of the Union Pacific between Pendleton and Spokane, to both of which towns the rates on that road are the same. The lines of the defendants in this territory are practically parallel, the Northern Pacific reaching Pendleton through Spokane, and the Union Pacific reaching Spokane through Pendleton; but whatever embarrassment may result from this situation must be met in the first instance by the railroads themselves.

The contention of counsel that this Commission has no authority over the rates of the Northern Pacific railroad, by reason of certain provisions in its charter, has already been considered in another proceeding against that company where the same defense was interposed. *Raworth v. Northern Pacific R. Co.* 3 Inters. Com. Rep. 857.

The opinion of the Commission in that case reviews the argument by which this claim of immunity is supported, and rejects the proposition as demonstrably unsound. The question will not be discussed in this report further than to add a single suggestion. The language mainly relied upon to sustain the position is, "... and they (the Board of Directors) shall from time to time fix, determine and regulate the fares, tolls and charges to be received and paid for transportation of persons and property on said road or any part thereof."

Does this provision add anything to the incidental and essential powers which are inherent in the nature of such a corporation? If this express declaration were omitted, would

not the same authority exist by necessary implication?

The right to construct and operate a railroad, whether acquired under general laws or by special enactment, includes and carries with it the implied right to fix and collect compensation for its services. In the absence of statutory restrictions there is no limitation upon this authority except the common law rule of reasonable charges. It seems to us, therefore, that the charter of this company confers no peculiar or exclusive control over its rates and charges, because, in the absence of the express authority contained in the paragraph quoted, its Board of Directors would have the same power in all respects that they now possess to "fix, determine and regulate the fares, tolls and charges" in question. We adhere to the ruling in the Raworth case and hold that the Northern Pacific road, notwithstanding those provisions in its charter, is subject like all other interstate carriers to the authority conferred by Congress in the Act to Regulate Commerce.

There are some features of the case more or less novel and interesting, which are not referred to in this opinion, because want of time and the necessary length of our report confine the discussion to questions actually decided. We have attempted only to set forth the material facts upon which the controversy depends and the general reasons which have induced our conclusions. As some little time may be required for a revision of tariffs and re-adjustment of rates in conformity with this decision, a reasonable interval will be allowed for that purpose. Reducing our determination to the form of specific directions, the order of the Commission in this proceeding is stated as follows:

1. The defendants herein, by reason of the competition at their Pacific terminals of carriers not subject to the Act to Regulate Commerce, may make commodity rates on competitive traffic to those terminals which are less than their rates on like traffic to Spokane; but such commodity rates must not be lower than are necessary from time to time to meet such competition, nor allowed in any case on articles not actually subject thereto.

2. In the matter of car-load rates, mixed car-load lots at car-load rates, minimum weight of shipments entitled to car-load rates, and in all other respects, the defendants and each of them will furnish, provide and allow the same privileges, facilities and advantages on shipments to Spokane as are or may be at any time furnished, provided or allowed on like shipments to Portland or other Pacific terminals.

3. On or before the first day of January, 1893, the defendants in this case and each of them

will prepare, publish and put in effect tariff rates on all classified traffic from their eastern terminals to Spokane which shall be approximately eighteen per cent less than the tariffs now in force at that point, and shall not materially exceed eighty-two per cent of the class rates now applied both to Spokane and the Pacific terminals; and thereafter the defendants will not, nor will either of them, charge, collect or receive for transportation from their eastern terminals to Spokane a greater sum or amount than the rates fixed and prescribed by such reduced tariffs.

The following named rates on each of the ten classes respectively shall be deemed a compliance with this requirement, viz: Class 1, \$2.90; 2, \$2.46; 3, \$2.05; 4, \$1.64; 5, \$1.44; A, \$1.44; B, \$1.28; C, \$1.02; D, \$0.90; E, \$0.74.

In case of any reduction in class rates to Pa-

cific terminals a further and corresponding reduction will be made on like shipments to Spokane except as provided in the foregoing opinion.

This order will apply not only to rates from St. Paul and other eastern terminals of the defendants, but is intended to include directions for a corresponding reduction in the grouped rates from points east of St. Paul so far as they are applied to Spokane traffic. As the railroads which join with the defendants in making these rates have not been made parties to this proceeding, the case will be reopened, if necessary, for the purpose of bringing them in, to the end that all carriers affected may be bound by this order unless cause be shown for a different ruling.

In this report and opinion all the Commissioners concur.

MAINE SUPREME JUDICIAL COURT.

ANTHONY A. LAFARIER
v.
GRAND TRUNK R. CO.

A state statute making railroad tickets good for six years and giving the holder of one the right to stop off at as many stopping places as he pleases, before reaching his destination, cannot, in view of the power of Congress over commerce, be applied

contrary to their terms to tickets sold beyond the limits of the state and entitling their holders to passage from a point in a foreign state or country to one in the state which enacted the statute.

Decided February 4, 1892.

EXCEPTIONS by plaintiff to rulings of the Supreme Judicial Court for Oxford County made during the trial of an action brought to recover damages for the alleged wrongful ejection of plaintiff from defendant's train, which resulted in a verdict in favor of defendant. *Overruled.*

The facts are stated in the opinion.

Mr. James L. Wright, for plaintiff:

No railroad company shall limit the right of a ticket holder to any given train; but such ticket holder may travel on any train, whether regular or express, and may stop at any of the stations along the line of the road, at which such train stops; and such ticket shall be good for a passage as above for six years from the day it was first used; provided, that railroad companies may sell excursion, return, or other special tickets at less than the regular rates of

fare, to be used only as provided on the ticket.

Me. Rev. Stat. chap. 51, § 44.

Section 45 of chap. 51, Me. Rev. Stat. provides that "any ticket or check given in exchange for the unused portion of a partially used ticket, continues in force for the full term of the original ticket."

This statute is obligatory upon this defendant corporation; "and it is its duty, when doing business in this state, to conform to it."

Dryden v. Grand Trunk R. Co. of Canada, 60 Me. 519.

While the law of Canada where the ticket was purchased, in the absence of proof is supposed to be the common law, as determined in *Carpenter v. Grand Trunk R. Co.*, 72 Me. 888, 39 Am. Rep. 340, yet, when the plaintiff got within the territorial limits of this state, he

4 INTER S.

For note on power of Congress to regulate interstate commerce, see *State v. Indiana & O. Oil, Gas & Min. Co.* (Ind.) 6 L. R. A. 579. See also the recent case of *Bagg v. Wilmington, C. & A. R. Co.* (N. C.) 14 L. R. A. 586.

was entitled to be conveyed upon his ticket or check according to the law of Maine. And while using this ticket within this state all limitations thereon were inoperative, by force of the statute.

Mr. A. A. Strout for defendant.

Peters, Ch. J., delivered the opinion of the court:

The plaintiff purchased a ticket for a passage on defendant's road from Somerset, in the dominion of Canada, to Portland, in this state, the ticket reading thus:

"Issued by Grand Trunk Railway. Good for one second-class passage within five days from date. Not good to stop over. Not transferable. From Somerset to Portland. Conductors will collect or exchange this ticket for check 'Z.' L. S. 6. Series B. J. Hickson, General Manager."

While on the route, before passing out of Canada, the conductor took up the ticket, and gave the plaintiff a check, which represented the same contract that the ticket did,—a matter well understood by the plaintiff, who had been a frequent traveler on the road. The ticket was purchased at a cheaper rate than stop-off tickets were sold. The plaintiff passed on his ticket to Paris, in this state, where he stopped off for two months. At the end of that time he undertook to resume his passage for Portland, when, refusing to pay any fare, he was ejected from the train by the conductor, for which act he sues the road. The case turns wholly upon the question whether our statute, which makes railroad tickets good for six years, with the right of the holder to stop off at as many stopping places as he pleases, can constitutionally be made to apply to a ticket sold by the Grand Trunk Railway Company for a continuous passage from a place in Canada to a place in Maine, so that the holder can rightfully stop off on such ticket, and afterwards pursue the passage at any time during the period named while within the limits of this state. We think the statute, if to be applied to a case like the present, is amenable to the objection of unconstitutionality as an interference with both interstate and foreign commerce.

We regard the question as virtually determined by the case of *Carpenter v. Grand Trunk R. Co.*, 72 Me. 888, 89 Am. Rep. 840, although there is some difference between that case and this. In that the ticket was purchased for a passage from Portland to Montreal, and the passenger was put off in Canada, while in this case the ticket was for a passage from a place in Canada to Portland, and the passenger was put off in this state. The act of the company in that case was decided to be justifiable. It is difficult, however, to appreciate any difference of principle in the two cases. It seems inconsistent that a ticket for a continuous passage should be binding while going one way, but not the other; or rather, perhaps, that either contract should be valid while the passenger is riding in Canada, and not valid while upon the soil of Maine. Such apparent incongruity is avoidable by construing the statute as applying to contracts for passage to be performed wholly within the state, and not to

contracts performable partly within and partly without the state.

The plaintiff places great reliance upon the case of *Dryden v. Grand Trunk R. Co. of Canada*, 60 Me. 512, a case much like the present, where the statute in question was held to be valid. But that was many years ago, and the point now presented was not even intimated to the court. No thought was taken of it. Questions of interstate commerce have grown to an immense national importance since the time of that decision.

It is now well settled that the principles of foreign or interstate commerce apply to persons as well as to property,—to passengers as to freight; also that the power of the nation is paramount to that of the state on such questions. And, if Congress does not exercise its power upon any subject of commerce, still the state cannot interfere with it, if it be of a national rather than of a local character, or admits of a uniform system of regulation. The powers of Congress in such case are exclusive. If Congress does not legislate, the presumption is that legislation is not deemed necessary. No legislation may be the best legislation. Not only is there a constitutional prohibition against state interference, but there is now a congressional prohibition as well, expressed by the Interstate Commerce Act of 1887, which intrusts to a judicial commission the decision of many questions concerning carriage between states, or states and adjacent foreign countries.

These principles apply closely to the case in hand. The ticket in this instance entitled its bearer to a passage from a place in a foreign country, through portions of the states of Vermont and New Hampshire, into and across the state of Maine. Each state might have a policy of its own, and Canada another, affecting the contract between the railroad and the passenger, conflicting with one another. It would be even a more awkward result should there be conflicting state policies as to the carriage of freight as well as passengers. To be sure, the state of Maine does not undertake to regulate the contract beyond the limits of the state, but the trouble is that interference within the state in a case like this has the effect of interference without. There should be some uniform rule established by each railroad for itself, or by Congress or the interstate commission for all roads. As said before, the absence of Federal regulation is the best evidence that the management of such interstate carriage should be left free. The omission of regulations is of itself a regulation. It is enough that the subject-matter is susceptible of management through some uniform plan or system. See 2 Redfield, Railroads (6th ed.) pp. 505, 513, notes and cases.

Nor can such an application of the statute as the plaintiff insists upon be justified upon the ground that it is an exercise of a portion of the police power of the state. A right conferred or protected by the Federal Constitution cannot be overthrown or impaired by any authority derived from the police power. 1 Dill. Mun. Corp. (3d ed.) § 143, and citations. Congress can best exercise its own police power on national subjects. In the matter under present

discussion, the three states interested might exercise such power differently, and undertake to enforce their contradictory policies with penalties, thus placing the road in an uncomfortable predicament. Whatever different views may be entertained as to the power of Congress to supersede the action of a state in some particular applications of the principle of police power, no court has gone to such an extreme as to pretend that a state can, in the abused name of police power, intermeddle with the affairs of interstate carriage to the extent that the statute in question would if literally construed. It relates to no matter of life or health or morals; but it imposes burdens, and affects or alters contracts.

Speaking of the power vested in Congress over foreign and interstate commerce, in *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347, Mr. Justice Field said, "The power is unlimited." That case declared a state license act void which imposed a tax for vending from place to place goods manufactured in another state. Chief Justice Waite, in speaking on the same subject in *Pensacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708, says: "The powers thus granted keep pace with the progress of the country, and adapt themselves to the new developments of time and circumstances. They extend from the horse and its rider to the stage coach, from the sailing vessel to the steamboat, from the coach and the steamboat to the railroad, and from the railroad to the telegraph, as these new agencies are successively brought

into use to meet the demand of increasing population and wealth." In that case a tax levied upon interstate telegraphic business by virtue of a state enactment was held to be void. In *State Freight Tax Case*, 82 U. S. 15 Wall. 232, 21 L. ed. 146, a statute of Pennsylvania was held void which provided for taxing a railroad corporation upon its receipts from interstate traffic. The case of *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527, is to the same effect. So is the case of *Hall v. De Cuir*, 95 U. S. 485, 24 L. ed. 547, upon the strength of which the opinion in the case of *Carpenter v. Grand Trunk R. Co.* 72 Me. 388, 39 Am. Rep. 340, largely depended.

There are numerous other decisions by the Federal supreme court and also many decisions by state courts, to the effect that state legislation is not allowable which imposes burdens or restraint upon interstate commerce, but they are not better illustrations of the doctrine than the cases cited. The only exceptions are cases which allow of acts of legislation that are designed to obtain from railroads a reasonable and just taxation. The principle of the above cases and of all similar cases is the principle of the present case. Here no taxes were sought for. But a burden is imposed, a meddlesome interference and restraint, which the railroad corporation is not obliged to endure.

Exceptions overruled.

Walton, Virgin, Emory, Foster, and Haskell, JJ., concurred.

ALABAMA SUPREME COURT.

MOBILE & OHIO R. CO. *Appt.*

v.

H. C. DISMUKES.

1. A state statute regulating the rights of carriers and declaring what rates shall be regarded as extortionate does not apply to the case of interstate shipments.
2. A contract with a carrier for rates less than those on its schedule, and which is,

therefore, unlawful as to the carrier because in violation of the Interstate Commerce Law, may nevertheless be enforced by the shipper if he had no knowledge that the schedule rate was higher than that given him.

Decided November 27, 1891.

NOTE.—*Relief to less guilty party to illegal contract.*

Unless the parties are *in pari delicto* as well as *particeps criminis* the courts, although the contract be illegal, will afford relief, where equity requires it, to the more innocent party whether it has been executed or not. *Tracy v. Talmage*, 14 N. Y. 181, 67 Am. Dec. 132.

In equity as between the parties the general maxim of *in pari delicto* does not always prevail; circumstances in the particular case often form exceptions and when it is necessary relief will be granted. *Bellamy v. Bellamy*, 6 Fla. 62.

"Where the parties to a contract against public policy, or illegal, are not *in pari delicto* (and they are not always so), and where public policy is considered as advanced by allowing either, or at least the most excusable of the two, to sue for relief against the transaction, relief is given to him, as we know from various authorities." *Reynell v. Sprye*, 1 De G. M. & G. 680-679, Knight-Bruce, J.

The rule of law governing the decision of the main case is admirably expressed by Mr. Bishop: "If, as in some special cases, it happens, the contract was unlawful in one of the parties only, the other may recover back what he has paid under it; and this principle is sometimes even carried to the extent that if both are in fault, yet not equally so, and especially if the one more in the wrong has taken any unconscientious advantage of the other, the more culpable party may be compelled to refund what the less culpable has paid." Bishop, *Cont.* § 623, 629, citing *Tracy v. Talmage*, *supra*; *Curtiss v. Leavitt*, 15 N. Y. 9; *Smith v. Bromley*, 2 Dougl. 695, note; *Worcester v. Eaton*, 11 Mass. 368, 376.

In the case of *Lowell v. Boston & L. R. Corp.* 23 Pick. 24, where the objection was raised that the parties were *particeps criminis*, it was said: "In respect to offenses, in which is involved any moral delinquency or turpitude, all parties are deemed equally guilty, and courts will not inquire into

APPEAL by defendant from a judgment of the Circuit Court for Mobile County in favor of plaintiff in an action brought to recover damages for the alleged conversion of certain goods which had been delivered to defendant for transportation. *Affirmed.*

The facts sufficiently appear in the opinion.

Mr. E. L. Russell for appellant.

Mr. Shelton Sims for appellee.

McClellan, J., delivered the opinion of the court:

A statute of this state (Code, § 1159) provides that "any person or corporation engaged in the business of transporting passengers or freights over any railroad in this state who shall exact and receive more than just compensation therefor, or demands more than the rates specified in any bill of lading issued for such freights, . . . is guilty of extortion, and is liable to the party injured in double the damages sustained," etc. The Act of Congress, known as the "Interstate Commerce Law," of February 4, 1887, as amended by acts approved March 2, 1889, makes it unlawful for any common carrier to issue bills of lading at rates, or to demand or receive freight charges variant from the rates, established and published as therein prescribed, and filed with the interstate commerce commission; and this, whether the carriage in a given instance is by one common carrier, or by more than one, having traffic arrangements and a joint tariff of charges. Not only so, but it is also made unlawful for any person or corporation, by what means soever, and whether with the consent and con-

nivance of the carrier or otherwise, to knowingly obtain transportation at less than the regular rates at the time in force on the line of transportation; and the infraction of the statute in the particulars referred to, as well by consignors and consignees as by carriers, is made a highly penal offense. In the case at bar the Mobile & Ohio Railroad Company received at Cairo, Ill., certain goods of the value of about \$40 for transportation to Sunny South, Ala., a station on the Mobile & Birmingham Railway, with which the initial line connected at Mobile, Ala.; and delivered to the shipper a bill of lading whereby it was undertaken to transport the goods over the two roads in question to Sunny South, and there deliver them to H. C. Dismukes, for a compensation of \$5.44. There was at the time a joint tariff of rates in force between the Mobile & Ohio and the Mobile & Birmingham Railway Companies between the initial and terminal points of this shipment, which had been duly filed with the interstate commerce commission, approved, promulgated, and published in consonance with the Act of Congress; and, according to the rates fixed in this schedule, the freight charges on this consignment were, or should have been, \$29.30. On arrival of the goods at Sunny South, the consignee tendered to the agent of the Mobile & Birmingham Railway Company \$5.44, the amount of charges stipulated in the bill of lading, and demanded the property. This demand was refused, the insistence being that, the bill of lading to the contrary notwithstanding, the consignee was liable for the schedule rate of \$29.30; and thereupon the consignee instituted

their relative guilt. But where the offense is merely *malum prohibitum*, and is in no respect immoral, it is not against the policy of the law to inquire into the relative delinquency of the parties, and to administer justice between them, although both parties are wrongdoers." The same doctrine was reiterated in *Atlas Bank v. Nahant Bank*, 3 Met. 581.

The principle of these cases was also adopted by the New York supreme court in the case of *Mount v. Waite*, 7 Johns. 434, in which it was held that one who had paid a premium for insurance on a ticket in a foreign lottery was entitled to recover it on the ground that he was not equally guilty with the defendants.

So in *Wheaton v. Hibbard*, 20 Johns. 280, 11 Am. Dec. 284, it was held that usurious interest paid by a borrower could be recovered independent of the statute, and that the maxim *inter partes in part delicto potior est conditio defendentis* did not apply as the law considered the borrower the victim of the usurer.

In *Schermerhorn v. Talman*, 14 N. Y. 93, Selden, J., reviews earlier cases as follows: "There is no rule better established than that which refuses the active interposition of a court of equity in favor of one who is *particeps criminis*; but like most other rules it admits of exceptions. There are certain cases where the party seeking relief, although *particeps criminis*, is not *in part delicto*, to which it does not apply. This distinction seems to have been first taken by Lord Mansfield, in the case of *Smith v. Bromley*, 2 Dougl. 686, note to *Jones v. Barkley*, 2 Dougl. 684. The exception was there applied only to cases where the law violated was intended to protect one of the parties from particular acts of oppression or extortion by the other, as for instance the statute against usury. Subsequent cases, however, show that the principle is 4 INTER S.

not confined to that class of cases. The next case in which the question arose was that of *Jaques v. Goddard*, 2 W. Bl. 1073. The plaintiff had paid to the defendant money as a premium for insuring lottery tickets, a transaction prohibited by statute, and the action was brought to recover it back. It was insisted for the defendant that the plaintiff, being *particeps criminis*, could not recover. But the action was sustained. Blackstone, J., said it was not like the stock-jobbing act; 'because there both parties are made criminal, and subject to penalties.' Browning v. Morris, Cowp. 790, was another case of the same kind. Lord Mansfield there draws the distinction between acts which are *malum in se*, such as bribery, and those which are merely prohibited by statute; and in the course of his opinion remarks that, "It is very material that the statute itself by the distinction it makes has marked the criminal; for the penalties are all on one side,—upon the office keeper." A similar question afterwards arose in the case of *Williams v. Hedley*, 8 East. 378, where it was very elaborately examined by Lord Ellenborough, who confirmed the doctrine of the previous cases. The principle of these cases is so obviously just that no argument seems necessary to sustain it. To say that in every transaction prohibited by positive enactment the parties concerned are necessarily *in part delicto*, would in many cases be manifestly absurd; and the test adopted by Lord Mansfield and Mr. Justice Blackstone, by which to determine the relative guilt of the parties, viz: to see upon which party the penalty is imposed, would seem to be just.

These cases have been several times reviewed and approved by the Supreme Court of Massachusetts. In the case of *Worcester v. Eaton*, 11 Mass. 368, Parker, Ch. J., after referring to the cases of *Smith v. Bromley* and *Browning v. Morris*, *supra*,

this action for the value of the goods as upon a failure to deliver the same to him, before a justice of the peace, whence, on judgment for plaintiff, an appeal was taken to the circuit court, where a trial *de novo* was had before the judge without jury on agreed facts. Judgment was again entered for plaintiff in the circuit court, and from that judgment this appeal is prosecuted, presenting for review the conclusion of the trial judge on the facts.

The statute of Alabama which we have quoted is relied on in support of the judgment. We do not think any aid can be derived from that source. The shipment—the transportation being from a point in Illinois, through the states of Kentucky, Tennessee, and Mississippi, into Alabama,—was an act of interstate commerce, and clearly within the laws of the United States regulating that commerce. It, of course, cannot be doubted that Alabama is without power to declare what rates of charge in respect of such commerce shall amount to extortion on the part of the carrier, or to declare that the demand for an amount of freight charges which the carrier is authorized under the Act of Congress to impose is rendered extortionate by reason of the fact that a less amount is stipulated to be paid and received between the parties to the bill of lading. To hold otherwise would be to give paramount efficacy to state regulation of a subject which is not only within exclusive national control, but with respect to which national legislation has already provided all regulations deemed necessary or expedient. Our statute may, no doubt, be looked to as determining what is extortion in freight charges for transportation within the state, and also, it may be, as affording a remedy and measure of

redress for extortion in interstate shipments, but not as declaratory of what shall constitute extortion in transactions of the class last named.

But, leaving the Alabama statute out of consideration, there is an element of contract in this case which, in our opinion, upon the agreed facts, will support the judgment below. The Mobile & Ohio Company agreed and bound itself to carry this consignment to Sunny South, Ala., and there deliver it to Dismukes, for a certain compensation. That company had no right, under the law and its tariff of rates adopted, approved, and promulgated as by the law provided, to enter into any such contract; and so far as the company is beneficially concerned in it, so far as the contract might otherwise be relied on by the carrier against the consignee, it is void, as being in the teeth of the law of Congress, as the same has been put into practical operation, upon the carrying business of the company. But it by no means follows that the consignee has no rights under it, or, indeed, any less or other right than would have been his had the rate set down in the bill of lading been the approved rate for the transportation. It nowhere appears that either the consignor or consignee knew that the stipulated rate was different from the approved rate. It is not in the contemplation of the Interstate Commerce Law that persons dealing with common carriers should be held to a knowledge of what their published schedules of rates contain. These schedules are no part of the law which all men are held to know, but are resultants *in pais*, so to speak, of the acts of the carrier, and of the interstate commerce commission, done under and in execution of the law. There is nothing in the law

says: "This distinction seems to have been ever afterwards observed in the English courts; and being founded in sound principle, is worthy of adoption, as a principle of common law in this country." The same question afterwards arose in the same court, in *White v. Franklin Bank*, 22 Pick. 181, and was there very fully discussed. The suit was brought to recover money which the plaintiff had deposited with the defendant, under an agreement that it should remain for a certain specific time, in violation of an express statutory provision, which prohibited the bank from making contracts "for the payment of money at a future day certain." The action was held to lie, and the principle of the English cases was emphatically sustained by the unanimous opinion of the court. *Lowell v. Boston & L. R. Corp.* 23 Pick. 24; *Atlas Bank v. Nahant Bank*, 3 Met. 581.

In *Woodruff v. Erie R. Co.*, 93 N. Y. 609, it is said there is a manifest distinction between cases arising under contracts which are contrary to public policy or *malum in se* or *malum prohibitum*, and those which are claimed to be *ultra vires* alone.

In *Manchester & L. R. Co. v. Concord R. Co.* (N. H.) 9 L. R. A. 689, it is said the doctrine everywhere running through the books is that relief will be granted where both parties are *in delicto* provided they do not stand *in pari delicto*.

In that case a railroad company which continued to operate a rival and competing line under a prior contract after the passage of a statute prohibiting such contracts and subjecting a company which operated a rival line to a penalty was not allowed to retain the money acquired by such operation when called upon by the owner of the road for an accounting although the continuation was illegal, since the owner not being *in pari delicto*

was entitled to an equitable share of the earnings.

In *Duval v. Wellman*, 124 N. Y. 156, it is said that courts both at law and equity have held that two parties may concur in an illegal act without being deemed in all respects *in pari delicto*; and that in many such cases relief from the contract will be afforded to the least guilty party when he appears to have acted under circumstances of imposition, hardship, or undue influence, and especially where there is a necessity of supporting public interests or a well-settled policy of the law whether that policy be declared in the statutes of the state or by the outgrowth of the decisions of the courts.

The doctrine thus stated was applied in that case to a marriage brokerage contract and it was held error to hold as a legal conclusion of law that the parties to such a contract were equal in guilt.

In *Place v. Hayward*, 117 N. Y. 487, a person who made a fraudulent transfer to his lawyer of property held by him in a representative capacity for the purpose of protecting it and covering it up against the assaults of his father's creditors where this was done under his attorney's advice was held not to be *in pari delicto* with the lawyer so as to prevent relief from the transfer.

In *Timmerman v. Bidwell*, 62 Mich. 206, the decision although not put on exactly this ground seems to come very near this principle. In that case a person who had become a member of an organization which proposed to repay to each member an extravagantly large profit on moneys paid it was held to be a dupe of a sharp, unscrupulous swindle, and that the latter could not be permitted to say that his scheme for fraud was so transparent that the other parties ought to have seen through it.

F. S. R.

which forbids shippers to contract for transportation at other rates than those specified in these schedules. It is only when the shipper knowingly contracts for a rate differing from that therein prescribed that his act is denounced as unlawful and punished as a crime. The motive of this legislation, moreover, is the protection of persons dealing with common carriers. Its primary purpose is to prevent a resort on the part of carriers to the undue advantages which accrue to them from the circumstances of their relations to persons having need for their services. The provisions of the law should not be so strained or contorted as to defeat its purposes, and convert the shield it was intended to afford the unwary shipper, who has no choice but to patronize the carrier, into a sword with which to work his destruction more certainly and completely than would have been possible had not the arm of the government been put forth in his behalf. To allow the carrier to draw the shipper, entirely ignorant of the schedule of rates approved by the commission, into a contract of affreightment, upon which the goods are delivered and carried, at a stipulated rate which the shipper can afford to pay,—as in this instance, about 12½ per cent of the value of the property,—

and then to refuse to deliver the shipment to the consignee, except upon payment of a rate which he cannot afford to pay,—in this instance, 75 per cent of the value,—and upon which the property would not have been shipped at all, would be to put a construction on the law of Congress which its terms do not require or justify, and which would defeat the purposes which actuated its enactment. True it is that the contract here is one which the Mobile & Ohio Company had no right to make. True it is that its execution on their part involved a crime. But the act of the shipper in entering into it is not, in the absence of knowledge on his part of the schedule rate, tainted with criminality, or violative of any provision of the interstate commerce acts. He is not *in pari delicto* with the contracting carrier; and he is entitled to the protection of that principle of law which enforces such a contract in behalf of the innocent party to it,—a principle which we conceive to be logically sound, and thoroughly settled upon authority. See *Tracy v. Talmage*, 14 N. Y. 162, and numerous later cases, which are cited and discussed in a *note* to that case as reported in 67 Am. Dec. 153.

Affirmed.

IOWA SUPREME COURT.

CAMPBELL *et al.* Railroad Commissioners,
Appts.,
v.
CHICAGO, MILWAUKEE & ST. PAUL
R. CO.

1. Shipments between points within the same state do not constitute interstate commerce because made on a railroad which runs for part of the trip in another state.
2. The enforcing of an order of railroad commissioners requiring a railroad company to conform to their schedule of rates is a matter of public

right for which an action may be maintained in behalf of the state.

3. A claim for the refusing to a shipper of an overcharge made in a petition by railroad commissioners for the enforcement of their order as to rates is waived on appeal if not asked in the appellate court.

Decided October 24, 1892.

APPEAL by complainants from a judgment of the District Court for Lyon County in favor of defendant in an action brought to compel defendant to conform its freight rates to the schedule made by the board of railroad commissioners, and to compel it to refund cer-

tain charges which it had made in excess of such rate. *Reversed.*

The facts sufficiently appear in the opinion. *Messrs. John Y. Stone, Atty. Gen., and T. C. Dawson* for appellants. *Mr. John W. Cary* for appellee.

NOTE.—Whether shipments from points in the same state lose their character of domestic commerce by passing out of the state during transportation.

In *Lord v. Goodall*, N. & P. S. S. Co., 102 U. S. 541, 38 L. ed. 224, it was decided that vessels navigating the high seas although engaged only in the transportation of goods and passengers between ports and places in the same state were subject to the acts of Congress regulating the liability of the owners of vessels navigating the high seas by virtue of the power of Congress over commerce.

4 INTER S.

But in the recent case of *Lehigh Valley R. Co. v. Pennsylvania*, 145 U. S. 192, 36 L. ed. 672, 4 Inters. Com. Rep. 87, affirming the decision of the supreme court of Pennsylvania reported in 2 Inters. Com. Rep. 228, also in *note* to 1 L. R. A. 232, it was also decided by the Supreme Court of the United States that the mere passage of freight and passengers over the soil of another state in transit between points in the same state, does not render the transportation interstate commerce so as to exclude the power of the state in which the shipments were made to tax the traffic. And the court says that it

Robinson, Ch. J., delivered the opinion of the court:

At different times during the months of October, November, and December, 1889, and January, 1890, one D. J. Carpenter shipped from Beloit, Iowa, to Sioux City, Iowa, 15 carloads of livestock over the railway of defendant. He was charged by defendant for the transportation of the freight so shipped the sum of \$289.38, or \$56.76 more than the schedule rate as fixed by the board of railroad commissioners. Carpenter made complaint of the overcharge to the board and also complained that the defendant had raised its rate for transporting flour between the points named from ten cents per 100 pounds as fixed by the commissioners' schedule, to seventeen cents per 100 pounds. The commissioners investigated the complaints, found that the facts were as claimed by Carpenter, and ordered the defendant to conform its charges to the maximum schedule which they had established, and informed defendant that the overcharge of \$56.76 should be refunded to Carpenter. The defendant having failed to obey that order, this action is brought to enforce it. The defendant admits that the shipments and charges were substantially as claimed by Carpenter, but contends that its railway between Beloit and Sioux City is partly in Iowa and partly in South Dakota, and that the shipments in question were interstate commerce, and therefore not subject to the control of this state nor to the schedule of rates fixed by its board of railroad commissioners. The district court found that the statutes of Iowa, so far as they attempted to authorize the making of the order in question, were unconstitutional, and that the order was invalid.

1. The railway of defendant from Beloit to Sioux City is sixty-seven miles in length, and a little more than one half of it is in this state, the remainder being in South Dakota. Between the points named the railway crosses the boundary of the state four times. The schedule of the board of railroad commissioners in question was adopted under the provisions of chapter 28 of the Acts of the 22d General Assembly. Section 1 of that Act contains the following: "The provisions of this Act shall ap-

ply to the transportation of passengers and property, . . . and shall also be held to apply to shipments of property made from any point within the state to any point within the state, whether the transportation of the same shall be wholly within this state or partly within this state and an adjoining state or states." The question presented for our determination is whether freight shipped from Beloit to Sioux City over the railway described is interstate commerce, within the meaning of that provision of section 8 of article 1 of the Constitution of the United States which reads as follows: "The Congress shall have power to regulate commerce with foreign nations and among the several states, and with the Indian tribes." In *Welton v. Missouri*, 91 U. S. 280, 23 L. ed. 849, the Supreme Court of the United States used this language: "'Commerce' is a term of the largest import. It comprehends intercourse for the purposes of trade in any and all its forms, including transportation, purchase, sale and exchange of commodities between the citizens of our country and the citizens or subjects of other countries, and between the citizens of different states." In *Mobile County v. Kimball*, 102 U. S. 702, 26 L. ed. 241, it was said that "commerce with foreign countries and among the states, strictly considered, consists in intercourse and traffic, including in these terms navigation, and the transportation and transit of persons and property, as well as the purchase, sale, and exchange of commodities." In construing the constitutional provision under consideration, the same court, in *Gibbons v. Ogden*, 22 U. S. 6 Wheat. 189, 6 L. ed. 68, defined commerce as follows: "Commerce undoubtedly is traffic, but it is something more; it is intercourse. It describes the commercial intercourse between nations and parts of nations in all its branches, and is regulated by prescribing rules for carrying on that intercourse." The language last quoted was used to refute the claim that the commerce contemplated by the Constitution was mere traffic, the buying and selling or the interchange of commodities; but it was quoted with approval by the court which used it in the recent case of *Lekigh Valley R. Co. v. Pennsylvania*, 145 U. S. 192, 36 L. ed. 672, 4 Inters.

was unnecessary in *Lord v. Goodall, N. & P. S. S. Co.* 102 U. S. 541, 26 L. ed. 224, to invoke the power to regulate commerce in order to find authority for the law in question as it might be referred to the power as to maritime law. Another consideration as stated in both cases is that the laws of nations on the high seas might become involved and the United States compelled to respond.

In *Pacific Coast S. S. Co. v. Board of Railroad Comrs.*, 9 Sawy. 253, the circuit court of the United States held that California state railroad commissioners had no power to regulate or interfere with transportation by a steamship company between ports within the state if they were in transit to or from other states or if the transportation consisted of voyages upon the ocean bringing the steamships under the exclusive control of Congress.

The above decision of the United States Supreme Court seems to settle the law in accordance with the decision in the main case, thus overruling *State v. Chicago, St. P. M. & O. R. Co.*, 3 L. R. A. 238, 40 Minn. 267, in which the railroad and warehouse commission of the state was held to have no au-

thority to fix the rates for transportation between two points within the state over a route extending across a neighboring state. And it would seem also to overrule *Sternberger v. Cape Fear & Y. V. R. Co.*, 2 L. R. A. 105, 29 S. C. 510, 2 Inters. Com. Rep. 426, in which the decision was similar to that of the Minnesota case unless a distinction is to be made in the South Carolina case by reason of the fact that the transportation between points in the same state was over several railroads, some of which were entirely in that state and some entirely in North Carolina and others partly in both states.

Somewhat remotely connected with this question is the decision in *Scammon v. Kansas City, St. J. & C. B. R. Co.*, 41 Mo. App. 194, to the effect that a shipment from another point in the same state to Kansas City, Mo., does not become interstate commerce because the delivery was actually made across the state line in Kansas where the consignee's place of business was, as the contract was for a shipment to Kansas City, Mo., and any other place of delivery was merely for the convenience of the parties.

B. A. R.

Com. Rep. 87, and applied to facts similar to those under consideration. The question involved in the case last cited was whether the state had the power to levy and collect a tax on the gross earnings of a railway for the continuous transportation of passengers and freight from points in Pennsylvania to other points in the same state, over a line of railway which passed from that state to another and back. It was held that such transportation was not interstate commerce within the meaning of the Federal Constitution, and that the tax was valid. Since the question under consideration is a Federal one, the decision last cited is decisive of it. Following that decision, we hold that the continuous transportation of articles of commerce from Beloit to Sioux City over the line of railway described is not interstate commerce, and that the statute under which the schedule of rates in question was made is not unconstitutional, so far as it has been questioned on this appeal. The board of railroad commissioners were authorized to make a schedule of reasonable maximum charges for the continuous transportation of freight from points in this state to other points in this state

over a railway partly in another state. It is not shown that the rates fixed by the schedule in question are unreasonable, and, in the absence of a showing to the contrary, we must presume that they are fully authorized by the statute.

2. Counsel for appellee insists that this action cannot be maintained in behalf of the state, for the reason that, so far as the record shows, it is solely for the benefit of Carpenter. The enforcing of the order of the commissioners requiring defendant to comply with the schedule of rates prepared for it is a matter of public right, and an action therefor can be maintained for the state. No objection to the prosecution of this action in the name of the commissioners has been made. Appellants have not asked in this court a refund of the overcharge, and the claim therefor made in the petition must be deemed waived. Therefore we decide nothing in regard to the right of the state to prosecute an action in behalf of a private person to compel the refunding of overcharges he has paid. For reasons indicated the judgment of the district court is reversed.

INTERSTATE COMMERCE COMMISSION.

P. H. LOUD, JR.,
v.

THE SOUTH CAROLINA R. COMPANY; THE BLACKVILLE, ALSTON & NEWBERRY RAILROAD COMPANY; THE CHARLOTTE, COLUMBIA & AUGUSTA RAILROAD COMPANY; THE CAROLINA, CUMBERLAND GAP & CHICAGO RAILWAY COMPANY; THE VIRGINIA MIDLAND RAILWAY COMPANY; THE BARNWELL RAILROAD COMPANY; THE RICHMOND & DANVILLE RAILROAD COMPANY; THE PORT ROYAL & WESTERN CAROLINA RAILWAY COMPANY; THE PENNSYLVANIA RAILROAD COMPANY AND THE NORTH CAROLINA RAILROAD COMPANY.

[No. 252.]

1. The question, whether property of a carrier in the hands of a receiver appointed after the matters complained of before this Commission are alleged to have occurred, is subject to an order of reparation issued by this Commission, is one to be presented to and disposed of by the courts on proceedings therein for the enforcement of such order.
2. Rates should bear a fair and reasonable relation to the antecedent cost of the traffic as delivered to the carrier and to the commercial value of such traffic (*Delaware State Grange of Patrons of Husbandry v. New York, P. & N. R. Co.* 8 Inters. Com. Rep. 561, 4 I. C. C. Rep. 605), but it is incumbent on parties invoking this rule to make satisfactory and reliable proof as to such antecedent cost and commercial value.
3. In passing upon the reasonableness of rates, the question whether they afford the carrier a proper return for the service rendered is to be considered as well as the result of the business to the shipper or producer of the traffic.
4. Where a special service is required of the carrier, such as rapid transit and speedy delivery in cases of perishable freight, a higher rate than for the carriage of ordinary freight is warranted, and, if a carrier charging a rate based on such special service, fails to render it, to the damage of the shipper, and without legal excuse, the remedy of the latter would seem to be by a proper proceeding in a court of law.
5. A reduction in rates by a carrier is not *per se* evidence that the former rates were unreasonable, as such reduction may, as in the present case, be accounted for because of a decrease in cost of transportation and an increase in the volume of the traffic to which such rates apply.
6. The rates on melons complained of in this case having been materially reduced by the defendant carriers since the commencement of this proceeding and there being no satisfactory evidence that the rates so reduced are unreasonable or excessive, the complaint is dismissed.

Complaint filed, February 13, 1890.—Answers filed, March 6 to May 15, 1890.—Testimony taken at Aiken, S. C., April 3, 1891, and at Atlanta, Ga., March 24, 1892.—Brief filed for Complainant, April 26, 1892.—Decided, December 24, 1892.

SEE Complaint, 2 Inters. Com. Rep. 782. Order 2 Inters. Com. Rep. 768.

Messrs. Croft & Chafee, John Gary Evans and E. S. Hammond, for complainant.
Messrs. Lawton & Cunningham and Joseph Ganahl, for the Port Royal & Western Carolina Railway Company.
J. T. Worthington and John N. Staples, for the Richmond & Danville lines.
James A. Logan, for Pennsylvania Railroad Company.
Messrs. Brawley & Barnwell, for the South Carolina Railway Company.

REPORT AND OPINION OF THE COMMISSION.

Clements, Commissioner:

The complaint in this case is made by P. H. Loud, Jr., who, it is alleged, during the seasons of 1887, 1888 and 1889, was engaged in planting and buying watermelons and shipping them over lines formed by defendants from Williston, Blackville, and other points in the state of South Carolina, to New York, Philadelphia, Baltimore, Washington and other cities on those lines.

The complainant charges:

1. That the defendants had established 24,000 lbs. as the weight of a carload of melons and exacted from complainant as freight on such carload from shipping points on the South Carolina Railway, the sum of \$87.12 to Washington and Baltimore, \$96.72 to Philadelphia, and \$103.92 to New York, and charged "excess freights on all carloads which they claimed exceeded 24,000 pounds in weight, the excess rates being per hundred pounds for all over 24,000 pounds;" that these rates of freight are unreasonable and excessive, and that 32,000 pounds would be a just and fair weight to allow for a carload of melons and \$75.00 would be an adequate and reasonable freight charge for such carload.
2. That the defendants, "in violation of the law and the rights of the complainant, have discriminated against him by charging him a higher rate of freight than they did other shippers of same weights per carload over their lines of railways."
3. That the defendants "in determining the weight of such carloads have rendered untrue and false weights."
4. That the defendants have "in a number of instances charged a higher rate per hundred pounds than they agreed to charge" and "have changed their rates of freight without giving the notice required by law."
5. That melons being of a perishable nature, the defendants received complainant's shipments with the understanding that they were to have rapid transportation to their destination and immediate delivery, but that in many instances the defendants failed to make "rapid transit and immediate delivery, in consequence

of which the melons were overripe and in bad condition on their arrival, to the great injury of the complainant."

The complainant claims that by reason of these alleged breaches of contract and violations of the Act to Regulate Commerce on the part of defendants, he has been damaged to the amount of \$5,000 and asks for an order of reparation; he further prays that the defendants be required to cease and desist from said alleged violations of the law, and for general relief.

Answers have been filed by or on behalf of all the defendants except the Carolina, Cumberland Gap & Augusta Railroad Company and the Barnwell Railroad Company. These answers put in issue all the allegations of the complaint charging violations of the interstate-commerce law or other wrongful and illegal act on the part of the defendants or any of them. The answer on behalf of the South Carolina Railway Company is filed by D. H. Chamberlain, who alleges among other things that he was, October 7, 1889, appointed receiver of that company in proceedings in the United States Circuit Court for the District of South Carolina and that "inasmuch as all the matters and things complained of occurred before his appointment as such receiver, no judgment should be entered affecting the property in his hands." As to this proposition, we here remark, that the question raised by it would properly be presented and disposed of on proceedings in the courts for the enforcement of any order of reparation which might be issued by us in this case.

The Richmond & Danville Railroad Company, in answering for itself and The Charlotte, Columbia & Augusta Railroad Company, The Virginia Midland Railway Company and the North Carolina Railroad Company, alleges that during the period embraced in the complaint, it (the Richmond & Danville) "was operating said other roads" for which it answers "under contracts of lease made with them respectively, and that neither of said roads was during said period in charge of or operating its line of railway or committed

either or any of the acts alleged in the complaint." This respondent further asked that an order be issued requiring the complainant "within a day therein named to make his complaint more certain and definite to the end that the Commission and the respondents be duly informed and notified of the cause of complaint set forth only in general language in said complaint." In response to this request an order was issued, March 10, 1890, requiring the complainant within twenty days from the service of the order to file a verified statement "showing as nearly as he may be able each shipment of melons over the respondents' lines during the period covered by the complaint, with the quantity and weight, point of origin and destination and dates of shipment." The complainant in compliance with this order filed a list of shipments during the months of July and August, 1889, accompanying it with an affidavit setting forth that in the limited time allowed, he was able to furnish only a "partial statement of his transactions with the defendant companies, showing a portion of his shipments for the season of 1889, upon which he would make his case." Subsequently, when the testimony was taken, the complainant, through his attorney, stated that he could not furnish a statement of all the shipments of which he complained unless the railroads would make out for him a list of all the cars he had shipped and their destinations.

The Richmond & Danville Company furnished a statement of shipments by the complainant from stations on the Charlotte, Columbia & Augusta Road during July and August, 1889. None was furnished by the other defendants.

Facts.

We find the following to be the material facts established by evidence:

1. The complainant was engaged during the seasons of 1887, 1888 and 1889, in planting and buying watermelons and shipping them to market over lines of railway formed by the defendants. These shipments were made from various localities in the state of South Carolina. As appears from the statements filed by the complainant and the Richmond & Danville Company, shipments during the season of 1889 (July and August of that year) were made by complainant from Williston, Bamberg, St. Matthews, Elko, Grahams and other towns and stations on the lines of the South Carolina Railway; from Lewiedale, Summit, Leesville, Batesburg, Johnston and Ridge Springs, on the Charlotte, Columbia & Augusta Railroad; from Ellenton and Hattiesville, on the Port Royal & Augusta Railway; from Barnwell on the Carolina Midland Railroad; and from four stations on the Blackville, Alston & Newberry Rail-

road. (None of these shipments appear to have been made from stations on the Port Royal & Western Carolina Railway and the complaint was probably aimed at the Port Royal & Augusta Railway.) The market points or points of destination of these shipments were New York, Philadelphia, Newark, Baltimore, Washington, Richmond, and numerous other cities in the states of New York, Pennsylvania, New Jersey and Virginia.

2. The defendant roads are common carriers and constitute lines of railway over which the shipments of complainant are transported under a common arrangement for continuous carriage between the localities above named, and in respect to such transportation are subject to the Act to Regulate Commerce. The South Carolina Railway Company has a main line from Charleston to Augusta; also, a line from Branchville on the said main line to Columbia, and several smaller lines, among which is the line from Aiken on the main line to Edgefield Court House, called the Carolina, Cumberland Gap & Chicago Railway Company, which is made a party defendant to the complaint. The Blackville, Alston & Newberry Railroad (now the Carolina Midland) is a small branch road which connects with the South Carolina Railway at Blackville on its main line. The Barnwell Railroad is a branch of the Carolina Midland from Barnwell on the latter road to Walterborough. The Port Royal & Western Carolina Railway is a part of the Central Railroad of Georgia extending from Spartansburg where it connects with the Richmond & Danville system, to Augusta. The Charlotte, Columbia & Augusta Railroad is leased and operated by the Richmond & Danville and runs from Charlotte through South Carolina *via* Columbia to Augusta, connecting with the South Carolina Railway at Columbia and Augusta. The Virginia Midland Railway and the North Carolina Railroad are also divisions of the Richmond & Danville system. The Richmond & Danville system extends from Augusta *via* Columbia and Charlotte to Danville and from Danville by one line to Richmond and by another *via* Lynchburg and Charlottesville to Alexandria; at the latter point it connects with the Pennsylvania Railroad, by which the carriage of complainant's melons is continued to Washington, Baltimore, Philadelphia, New York and other points. In 1887, the melon traffic went largely by the Clyde Line of steamers from Charleston and to some extent by the Atlantic Coast Line, but in 1888 and 1889 it was turned to the route *via* Columbia and the Richmond & Danville Line, and in the latter year, the complainant's shipments appear to have been exclusively by that route. The rates by these different lines were the same and they were equally open to shippers, but the South Carolina Railway Com-

pany preferred the Richmond & Danville line because of return loads by that line and would not furnish cars for shipments over the coast line.

3. The rates from stations on the South Carolina Railway are the same to any one point of destination; this is the case for the most part, also, as to the other initial roads. The rate sheets giving rates from stations on the South Carolina Railway and its local tributaries, the Carolina, Cumberland Gap & Chicago Railroad, the Blackville, Alston & Newberry Railroad and the Barnwell Railroad, to the north-eastern markets *via* Columbia and the Richmond & Danville route, are issued from the freight office of the South Carolina Railway at Charleston by the General Freight Agents of that Company and of the Richmond & Danville Railroad. The rate sheets giving rates from stations on the Charlotte, Columbia & Augusta Railroad (which as before stated is a division of the Richmond & Danville system running from Charlotte through South Carolina *via* Columbia to Augusta) are issued from the General Freight Department of the Richmond & Danville Railroad Company at Richmond. The following table shows the rates on melons per hundred pounds to the points named therein, from stations on those roads and the Port Royal & Augusta Road, during the months of July and August, 1889, and for some time previous, with minimum carloads of 24,000 pounds:

From	Stations on South Carolina Railway.	Stations on Carolina, Cumberland Gap & Chicago Railroad.	Stations on Barnwell Railroad.	Stations on Barnwell, Alston & Newberry Railroad.	Stations on Charlotte, Columbia & Augusta Railroad, South of Columbia.	Columbia.	Stations on Port Royal & Augusta Railway.
To	cts.	cts.	cts.	cts.	cts.	cts.	cts.
Richmond, Lynchburg, Petersburg, Norfolk, Alexandria, Washington, Baltimore, Philadelphia, Jersey City, New York.	31.3	33.5	33.5	34.	25.	23.	31.
	6.3	38.5	38.	.9.	30.	28.	36.
	40.3	42.5	.5	43.	34.	32.	40.
	43.3	45.5	4.5	46.	37.	35.	43.

The above rates applied to the stations on all the initial roads in South Carolina, from which it appears that complainant's melon shipments were made.

Since the institution of proceedings in this case, the above rates have been reduced, and, as appears from tariffs on file with this Commission, are now as follows:

4 INTER S.

Interstate Commerce Commission,
July 27, 1892.

4. On shipments to New York there is a terminal charge by the delivering road of 7 cts. per hundred pounds, for handling in the harbor and making deliveries within the lighterage limits. There also appears to be a charge of 1 cent per hundred pounds by the initial road for gathering up the melons. These charges are deducted from the through rate and the remainder is divided between the connecting roads. The rate sheets filed by the defendants do not show these terminal charges but only the through gross rates.

5. Twelve hundred melons of average weight of 20 lbs. per melon, are estimated as a carload. The better grades average about 23½ pounds. Few, if any, under 20 pounds, are shipped. The minimum carload during complainant's shipments in 1889 was fixed by the roads at 24,000 pounds, and any excess charged for at the carload rate per hundred pounds. The cars are not loaded to their full capacity, as that would be detrimental to the bottom layers of melons and render them unsalable. A car of ordinary size loaded to the extent practicable will carry from 24,000 to 26,000 pounds.

6. The roads have special melon trains and place cars on the side tracks where they are loaded with melons by the shipper or owner.

The cars furnished for this purpose are for the most part box cars and the shipper has to prepare them by laying straw on the bottom to the depth of 8 or 10 inches as a bed for the melons and by sealing the door horizontally with strips of lumber 2 or 3 inches apart. Melons are perishable freight and begin to deteriorate two or three days after they mature, but this depends to a great extent upon the weather. They are also liable to injury from the bumping of the cars against each other. The transportation of melons by the road is at the owner's risk; but the roads sometimes have to sell the melons to pay freight charges, and when they do not bring enough for that purpose, it is the loss of the roads. As a security against this loss, the roads, whenever they deem it advisable, require prepayment of freight. The roads do not contract to make melon shipments within a specified time, but publish schedules for their melon trains and the understanding is that quick time and prompt delivery are to be made. The schedule time on the lines of defendants during complainant's shipments in 1889 appears to have been 49 hours from Augusta and 41½ hours from Columbia to New York, and proportionately less for intermediate points. This gives a speed of from 16 to 18 miles per hour, and is a reasonable time for the performance

of the service by the roads. There is evidence tending to show that melon trains are frequently delayed much beyond the schedule time and that the freight has been greatly injured in this way; but there is no reliable data as to the amount of the damage thus sustained, and it does not appear what was the cause of the delay or whether it was avoidable by reasonable diligence on the part of the roads. Cars employed in transporting melons to the east bring return loads, but to what extent is not satisfactorily shown.

7. There is a charge of 10% commissions by the commission merchant on the sale of melons and a cartage and handling charge, amounting to \$8 or \$10 per car, at Baltimore and Philadelphia. In New York the melons are usually sold directly from the dock and no expense is incurred for cartage or handling. A charge of \$2 per car is also made for "passing" the melons from the car to the vehicle by which they are carried to their destination. All these expenses are paid by the shipper. There is no evidence as to the cost of the raising of melons and placing them on board the cars for shipment. An average carload of melons at shipping point is estimated to be worth, taking the season through, from \$50 to \$75, and they sell in the eastern markets, according to the testimony of the complainant, at from 12 to 16 cts. per melon; another witness testifies that good melons bring in New York from 14 to 25 cents per melon.

A carload of melons generally loses from 100 to 150 by reason of their becoming unsalable in transit. The testimony was to the effect that the melon business had not proved very profitable to the shipper. The markets are sometimes over-stocked, and, the melon being perishable, if it does not reach the market at the right time, cannot be held over and has to be sold for anything it will bring. The business of raising and shipping melons appears, however, to have grown steadily; in 1887, it is stated, there were shipped over the South Carolina Railway about 500 carloads—in 1888, about 1,000 carloads, and in 1890, nearly 2,200 carloads. It is to the interest of the roads to encourage the melon industry and they appear to have done so; the cars placed upon the side track for receipt of the melons are allowed to remain there for some time for the convenience of the shipper and telegraphic information as to the state of the market and other facilities are furnished by the roads free of cost to persons engaged in the business.

8. The melon shipping season extends through July and August. During those months in 1889, the complainant's partial statement and that furnished by the Richmond & Danville Company for the Charlotte, Columbia & Augusta road, show 121 carloads shipped by him. Of these 114 weighed (ac-

cording to those statements) 24,000 lbs., six weighed 30,000, and one 35,750 lbs. The complainant states that during the season of 1887, 1888, 1889 and 1890, he shipped between four and five hundred carloads of melons.

9. The complainant testifies that for carloads of lighter weight he was charged during the season of 1889, the same or a greater amount of freight than other parties were charged on two or more carloads of greater weight. There is, however, no satisfactory proof as to the weights of the carloads referred to. The evidence also fails in our opinion to sustain the charge that the defendants willfully "rendered untrue and false weights." As to overcharges, it appears that some of small amount were made by the road, but no complaint was ever made of them by the complainant and the attention of the railroad officials was not called to them. The complainant appears to have attributed the overcharges to "mistake in rates." In one instance, an offer was made after the institution of this proceeding to refund the amount of one of the alleged overcharges, but the complainant refused to accede to the offer. It is also shown that in some instances, the complainant was charged for less than the actual weight of his carloads. The complainant's method of ascertaining the weight of melons was to have an expert estimate the weight of such melons as he could and weigh those as to which he was in doubt.

10. As showing that the defendants "changed their rates without giving the notice required by law," the complainant introduced in evidence a rate sheet of the "Richmond & Danville Despatch" dated July 13, 1888, No. 1266, superseding one dated July 6, 1888, No. 1261. The through rates on both these rate sheets are, however, the same, and there is no difference between them except as to the divisions between the connecting roads of the through rate to Baltimore. A rate sheet signed by the general freight agents of the Richmond & Danville Railroad and the South Carolina Railway, dated July 12, 1889, and taking effect July 15, 1889, was also placed in evidence; but it does not purport to supersede any former rate sheet and appears to have only established melon rates to certain points on the North Carolina and other railroads to which they had not been previously announced. The changes in the rates on melons appear to have been for the most part (if not entirely) reductions and they were made prior to the melon shipping season. The complainant was duly advised as to the rates each season and no injury is shown to have resulted to him or any other shipper from a want of notice. There is no positive or other satisfactory proof that the rates were not in fact posted as required by law and none whatever of a willful neglect

on the part of any of the defendants of their duty in this respect. *Railroad Commission of Florida v. Savannah, F. & W. R. Co.* 5 I. C. C. Rep. 13, 8 Inters. Com. Rep. 688.

11. In letters dated, respectively, Dec. 8, and Nov. 24, 1888, the complainant wrote the General Freight Agent of the Richmond & Danville Road, expressing the hope that rates would remain as they were and that the same treatment as in the past would be accorded to melon shippers. At that time, the rates in force were about the same as those now complained of being (as shown by the rate sheets of July 6 and July 13, 1888) per carload to Washington and Baltimore \$88.00, to Philadelphia \$96.00 and to New York \$102.00. By rate sheet of June 20, 1888, the rates were very much higher, being 51 cents per hundred pounds, or \$122.40 per carload, to New York. In a subsequent letter, dated Feb. 26, 1889, the complainant, while referring to the "liberal treatment" the roads had accorded shippers of melons during the past season asked for a reduction of from 10 to 15 per cent.

Conclusions.

The claim of the complainant for an order of reparation calls in question the reasonableness of the rates charged on complainant's shipments in July and August, 1889, and which were in force when this proceeding was instituted. As bearing on this question, the complainant alleges that 32,000 lbs. would be a just and fair minimum carload weight to be allowed on melons and not 24,000 lbs., the weight established by the defendants. The complainant, however, testifies (and the other evidence is to the same effect) that from 24,000 to 36,000 lbs., is the proper weight of melons to be loaded in a car and it appears that a greater weight would result in detriment to the lower layers of the melons. The smallest melons shipped, moreover, do not as a rule weigh under 20 lbs. and as 1200 melons is a carload in numbers, 24,000 lbs. would seem to be the natural minimum carload weight. In any event the real question is as to the reasonableness of the rates in themselves.

These rates, as alleged in the complaint, yielded on a carload of 24,000 pounds from stations on South Carolina Railway, \$103.92 to New York; \$96.72 to Philadelphia; and \$87.12 to Baltimore and Washington. According to complainant's testimony, the average market price of a melon in New York is about 14 cents. As there is a loss of from 100 to 150 melons in transit, the carload on reaching market would not contain on an average more than 1075 salable melons, which at 14 cents per melon, would sell for \$150.50. Deducting from this the 10 per cent commission on sales, \$15.05, and the freight to New York, \$103.92, there is left a balance of \$31.53 for the shipper. This is less than the amount (from \$50.00

to \$75.00 per carload), which, according to the testimony, the carload would sell for at point of shipment. The only other witness as to the market price in New York (a witness for complainant) states that good melons sold there at from 14 cents to 25 cents per melon. This gives an average of 19½ cents per melon and at this price a carload shipped to New York would net the shipper after deducting freight charges and commissions, \$84.74. It is not reasonable that shipments would be made of a commodity which is worth more to the shipper at point of shipment than it yields him in the market shipped to, and we are of opinion that the market price in New York as testified to by the witness last referred to is more nearly correct than that given by complainant. There is no evidence as to the market price of melons at other points. At Baltimore and Philadelphia, the shipper has to pay for cartage and hauling as appears from our statement of facts.

The evidence in this case is materially deficient in furnishing no data whatever as to the cost of raising melons (embracing interest on investment, labor and other items of such cost), and the expense of conveying them to the cars and preparing the latter for their safe transportation.

The complainant in his brief invokes the rule laid down by us in the case of *Delaware State Grange Patrons of Husbandry v. New York, P. & N. R. Co.*, 8 Inters. Com. Rep. 561, 4 I. C. C. Rep. 605, that "rates should bear a fair and reasonable relation to the antecedent cost of the traffic as delivered to the carrier for transportation, and the average market price the freight will command, or, as it is termed, the commercial value of the property." In the absence of any evidence showing the "antecedent cost of the traffic as delivered to the carrier" and in view of the meagre and unsatisfactory evidence as to the "average market price of melons," it would seem impracticable to apply that rule in this case as now presented to us.

In passing upon the lawfulness of rates, the question whether they afford the carrier a proper return for the service rendered is to be considered as well as the result of the business to the shipper or producer of the traffic. Melons being perishable, rapid transit and prompt delivery are of the first importance and where the carrier renders this special service a higher rate than for the carriage of ordinary freight is warranted. *Delaware State Grange Patrons of Husbandry v. New York, P. & N. R. Co. supra.* The defendants furnish special trains for the melon traffic and undertake to make quick movement and speedy delivery. It appears that in numerous instances they have, from some cause not stated, failed in this respect to the damage of the shipper. This

failure, when avoidable by the exercise of reasonable diligence on their part, would seem to constitute a ground of action for damages in the courts. If, because of such default on the part of the carrier, the rate should be, at the shipper's request, reduced to such a rate as would be reasonable in the absence of rapid transit and prompt delivery, the carrier would be relieved of the duty of rendering this special service, so essential to the melon traffic. It would seem, therefore, to be to the interest of the shipper not to seek a reduction of rates on the ground of a failure of duty on the part of the carrier, but to endeavor to enforce that duty by proper proceedings in the courts. A reduction of rates by us would, as we have shown, tend to a contrary result.

By a comparison of the table in our statement of facts showing the rates per ton per mile under the old as well as the present rates from the several shipping points to New York, Philadelphia, Baltimore and Washington, with that giving the average receipts per ton per mile on freight in general and the estimated cost of carrying a ton a mile, for the three years, 1888, 1889 and 1890, as reported by the roads, it will be seen that those rates per ton per mile are less than the average receipts per ton per mile on all the roads named except the Pennsylvania, and are also less than the estimated cost of carrying a ton a mile on most of them. There was no evidence introduced as to the actual cost to the roads of melon transportation.

The complainant contends that the reduction in rates since this proceeding was commenced is in the nature of an acknowledgment that the rates as they existed before the reduction were excessive. This does not necessarily follow. On an examination of the tables of rates complained of and present rates, it will be seen that the main reduction is in the rates from stations on the South Carolina Railway and the small roads tributary to it—the reduction from those stations being 7 cents per hundred pounds, while from stations on the other roads it is only from 1 to 8 cent. It will also be seen from the table relating to that matter, that the estimated cost of carrying a ton a mile on the South Carolina Railway has decreased from 1.227 cents in 1889 to .885 cents in 1890. A decrease in cost of transportation and the increase shown to have taken place in the volume of the melon traffic might authorize and account for a reduction in rates. The rates complained of appear to have been less than those at times previously in force and the complain-

4 INTER S.

ant does not appear, when he wrote the letters referred to in our statement of facts, to have considered such prior rates excessive.

We have been considering the reasonableness of the rates in force during the complainant's shipments in 1889 as bearing upon the claim of complainant for an order of reparation. We do not feel justified under the state of proof in issuing such order based on the ground that those rates were excessive and unlawful.

Under the present rate of 86 cents per hundred pounds the freight on a carload of 24,000 lbs. from stations on the South Carolina Railway to New York is \$86.40. Taking the complainant's statement of the market value of melons in New York and deducting the above freight and 10 per cent commissions, there will be left \$49.05 per carload. On the testimony of the other witness as to such market value, the balance after making those deductions will be \$102.80. In order to find the net profit to the producer or shipper, there must be subtracted from the balance so ascertained, the cost of raising the melons, conveying them to and loading them in the cars and preparing the latter for their transportation. Of this cost, as before stated, we have no proof. The complainant claims that a rate somewhat lower than that now in force should be made, but we are not prepared, on the facts disclosed by the record, to sustain this claim. In view of the absence of any evidence whatever as to the cost incurred by the producer or shipper in raising the melons and otherwise as above stated prior to the commencement of the transit, and of the other matters bearing on this question to which we have adverted, we do not feel justified in ordering a greater reduction of the rate complained of than that already made by the defendants since the commencement of this proceeding. It may be noted in this connection that the complainant in his letter of February 26, 1889, to the General Freight Agent of the Richmond & Danville Road, asked for a reduction on rates of from 10 to 15 per cent. The present rates from stations on the South Carolina Railway are about 15 per cent less than those in force at that time. The rates specifically set forth in the complaint as exorbitant are those then in force from stations on the South Carolina Railway.

¶ As to overcharges, or charges in excess of the published or agreed rates, and false weighing, we deem it unnecessary to add anything to what we have said in our statement of facts.

The complaint must be dismissed.

THE BOARD OF TRADE OF CHATTANOOGA

v.

THE EAST TENNESSEE, VIRGINIA & GEORGIA R. CO.; THE NORFOLK & WESTERN RAILROAD COMPANY; THE OLD DOMINION STEAMSHIP COMPANY; THE WESTERN & ATLANTIC RAILROAD COMPANY; THE CENTRAL RAILROAD & BANKING COMPANY OF GEORGIA; THE GEORGIA RAILROAD COMPANY; THE OCEAN STEAMSHIP COMPANY OF SAVANNAH; THE SOUTH CAROLINA RAILWAY COMPANY; THE CLYDE STEAMSHIP COMPANY; THE CINCINNATI, NEW ORLEANS & TEXAS PACIFIC RAILWAY COMPANY; THE BALTIMORE & OHIO RAILROAD COMPANY; THE CENTRAL RAILROAD COMPANY OF NEW JERSEY; THE NASHVILLE, CHATTANOOGA & ST. LOUIS RAILWAY COMPANY; THE PENNSYLVANIA RAILROAD COMPANY; THE PENNSYLVANIA COMPANY; THE NEW YORK, LAKE ERIE & WESTERN RAILROAD COMPANY; THE NEW YORK & NEW ENGLAND RAILROAD COMPANY AND THE DELAWARE & HUDSON CANAL COMPANY.

[No. 259.]

1. Upon complaint alleging that rates on traffic from New York and other Atlantic seaboard points to Chattanooga are unreasonable and greater for the shorter distance to Chattanooga than for the longer distance over the same line in the same direction to Memphis and Nashville:

Held, That defendants are justified by the existence of water competition of controlling force in charging less on such traffic for the longer distance to Memphis, but that no such competition exists for such traffic to Nashville, and any greater charge for the transportation of like kind of property from said seaboard points for the shorter distance to Chattanooga than for the longer distance through Chattanooga to Nashville is in violation of the fourth section of the Act to Regulate Commerce. Defendants ordered to cease and desist from making such greater

charge to Chattanooga, with leave to file application for relief under the proviso clause of the fourth section within a specified time. *Trammell v. Clyde SS. Co.* 4 Inters. Com. Rep. 120; 5 I. C. C. Rep. 324, cited and affirmed.

2. One transportation line cannot be said to meet the competition of another transportation line for the carrying trade of any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it.
3. When great disparity exists between charges which are lower to competitive than to intermediate points much less remote, the inference is irresistible that the lower rate must be unremunerative upon any theory, or else the larger rate gives an unwarranted return for the service rendered.

Complaint filed, April 9, 1890.—Answers filed, May 5 to June 20, 1890.—Heard at Chattanooga, Tennessee, November 12, 1890.—Briefs filed, January 2 to January 20, 1891.—Decided December 30, 1892.

THE FOURTH section of the Act to Regulate Commerce. See Complaint, 2 Inters. Com. Rep. 798; Answer, 3 Inters. Com. Rep. 106.

4 INTER S.

REPORT AND OPINION OF THE COMMISSION.

Knapp, Commissioner:

The complainant, an association of merchants and manufacturers of the city of Chattanooga, Tennessee, incorporated under the laws of that state in the name of "The Board of Trade of Chattanooga," alleges that its objects, among others, are "to study the workings of our" (the Chattanooga's) "system of transportation, upon which our" (Chattanooga's) "commercial prosperity depends so largely, and to endeavor to remedy, by all proper means, the defects and abuses existing therein;" and that the defendants, as common carriers engaged in interstate commerce, "separately and jointly, have been and are now transporting property and participating in *through rates* of freight charges for transporting the same," from Boston, New York, Philadelphia and Baltimore, designated as Eastern Seaboard points, to Nashville, Memphis and Chattanooga, in the state of Tennessee.

The complaint charges in substance:

1. That the through rates to Chattanooga participated in by the defendants are unjust and unreasonable in themselves, (as well as relatively to those to Nashville and Memphis) and therefore, in violation of section 1 of the Act to Regulate Commerce.

2. That Nashville, Memphis and Chattanooga compete for business in the same territory; that the through rates so charged and participated in by defendants are much lower to Nashville and Memphis than to Chattanooga "for transporting like property from said seaboard points under the same, or substantially the same circumstances and conditions;" and that the defendants are thus guilty of unjust discrimination against Chattanooga, in violation of section 2 of the Act to Regulate Commerce, and of giving an undue preference or advantage to Nashville and Memphis and subjecting Chattanooga to an undue prejudice or disadvantage in violation of section 3 of said Act.

3. That the defendants are guilty of a violation of section 4 of the Act to Regulate Commerce, in that under said through rates they charge and receive a greater compensation for the transportation of the "like kind of property, under substantially similar circumstances and conditions" from said eastern seaboard cities to Chattanooga than they charge and receive for such transportation over their several lines *through* Chattanooga to Nashville and Memphis, which latter cities are respectively 151 miles and 810 miles farther from said eastern seaboard points.

In proof of these allegations, complainant

refers to the tariffs on file with the Interstate Commerce Commission, and gives tables illustrating the alleged discriminating and otherwise illegal character of said rates.

The prayer of the complainant is, that, after hearing and investigation by this Commission on due notice, "an order be made commanding the defendants to cease and desist from said violations of the Act to Regulate Commerce, and that said order require them to transport property to Chattanooga from eastern seaboard points at such rates as this Commission may decide to be just and reasonable," and "to cease transporting property from eastern seaboard points to the cities of Nashville and Memphis at lower rates of freight charges than they charge and collect for transporting like property to the city of Chattanooga; and for such other and further order as the Commission may deem necessary to grant relief to the merchants and manufacturers of Chattanooga."

All of the defendants filed answers to the complaint except the Pennsylvania Company, The Old Dominion Steamship Company and the Clyde Steamship Company.

Some of these answers put in issue the allegation of complainant that Nashville, Memphis, and Chattanooga compete for business in the same territory, and the answer of the Norfolk & Western Railroad Company sets up that "there are natural causes between Nashville and Chattanooga, or between Cincinnati and Chattanooga, in the shape of ranges of mountains and streams that divide the territories naturally and, as a consequence, commercially, that absolutely prevent under any reasonable conditions a growth of trade to any extent northward from Chattanooga in the direction of Nashville for any considerable distance along the line of the Nashville, Chattanooga & St. Louis Railway, or northward in the direction of Cincinnati along the line of the Cincinnati Southern Railway; that the character of the productions of the territories named, the interdependence of the communities in said sections one upon another, and in their relations towards the larger markets that lie in the direction of Ohio, Kentucky or Indiana, as well as the community of interest between the cities of Nashville or Cincinnati and the towns along the respective lines of railway named, are sufficient to determine or control the trade of said communities toward said cities or others adjacent thereto." This answer also contains the following statement: "The adjustment of rates between eastern cities and Chattanooga in a uniform measure with those for all important points in interior Alabama and Georgia, was

because of the necessity that existed, commencing in 1868, for harmonizing the various commercial interests of said towns and cities, and, as the result of such effort, a system of rate adjustment was indicated in 1874, under the auspices of an association then formed, called the Southern Railway & Steamship Association, which, first embracing the cities of Atlanta, Chattanooga, Montgomery, Selma and Rome, became enlarged in its area as other railway lines were built and as the freight interests of other towns interested became enlarged. The cities or towns taking rates uniform with Chattanooga at this time are, Anniston, Ala., Athens, Ga., Atlanta, Ga., Birmingham, Ala., Cedartown, Ga., Columbus, Ga., Dalton, Ga., Montgomery, Ala., Eu-
 faula, Ala., Rome, Ga., Selma, Ala., Meridian, Miss., Opelika, Ala., Talladega, Ala., and possibly others. The natural conditions that exist, as well as the transportation facilities that are enjoyed by each of these towns, make them more or less competitive with each other, and a large portion of them competitive with Chattanooga, those more particularly competitive with Chattanooga being Anniston, Ala., Atlanta, Ga., Birmingham, Ala., Rome, Ga., and Dalton, Ga., and taking New York as a representative point, the rates to said points are as have been named by the complainants, viz: \$1.14, \$.98, \$.86, \$.73, \$.60 and \$.49, for the six figured classes of merchandise traffic; and your respondent believes that the competition for business and the interchange of traffic one town with another or one territory with another, in which Chattanooga is most largely if not wholly interested, is with the towns named or with the territories that said towns likewise reach, and that it is in reference to rate adjustment in connection with these towns that the efforts of the complainants should be directed."

It is expressly admitted in most of the answers, and not denied in any, that the through rates from said eastern seaboard cities are higher to Chattanooga than to Nashville and Memphis; but it is claimed that this is not in violation of any of the provisions of the Act to Regulate Commerce, because it is alleged, the rates to Nashville and Memphis are forced upon the defendants by actual water competition of controlling force at both said points, and the transportation thereto from said eastern seaboard cities is not under substantially similar circumstances and conditions as that to Chattanooga. It is further denied that the rates to Chattanooga are unjust and unreasonable in themselves.

The East Tennessee, Virginia & Georgia Railway Company, The Norfolk & Western Railroad, The Central Railroad & Banking Company of Georgia and The Ocean Steamship Company of Savannah, allege that among

4 INTER S.

other circumstances which justify them in charging less rates for the longer haul through Chattanooga to Memphis and Nashville than are charged to Chattanooga, is the fact that, while the transportation is through Chattanooga the rates to Memphis and Nashville from said seaboard points are made through Cincinnati. It is also claimed by some of the defendants that the through rates to Memphis and Nashville are not made under a joint prorating arrangement, but are made by adding the regular tariff rate under the Official (or Trunk Line) Classification to Cincinnati to the rates of the railroads south of that point, and that for said last named rates said roads south of Cincinnati are alone responsible.

On the part of the Nashville, Chattanooga & St. Louis Railway Company it is alleged, that said company "neither owns nor operates any railroad running into Chattanooga except the one from Nashville," and said company denies that it has anything to do "in fixing the rates or participating therein on freight shipped from any of the named points to Chattanooga," but it admits "that it takes freight destined for Nashville of its codefendants at Chattanooga from said named points at through rates and participates therein with its codefendants."

The New York, Lake Erie & Western Railway Company alleges "that the freight and traffic sent by it go direct to Memphis and Nashville via Louisville and do not pass through Chattanooga, and, therefore, that the Board of Trade of Chattanooga has no legal ground of complaint against it under the Act to Regulate Commerce, as it has no control whatever of the rates to Chattanooga."

The Cincinnati, New Orleans & Texas Pacific Railway Company avers that it is operating as lessee thereof the Cincinnati Southern Railway, extending from Cincinnati to Chattanooga, and "that the city of Nashville is not on the defendant's line of railway and that it does not operate or control any part of any through route from said eastern seaboard points to Nashville."

The Central Railroad Company of New Jersey denies "that it makes through rates from any seaboard points named in the complaint to Chattanooga, Memphis and Nashville."

Facts.

1. The complainant is an association of merchants and manufacturers of the city of Chattanooga, Tennessee, incorporated under the laws of that state for the purposes named in the complaint, and the defendants, The East Tennessee, Virginia & Georgia Railway Company, The Norfolk & Western Railroad Company, The Old Dominion Steamship Company, The Western & Atlantic Railroad Company, The Central Railroad & Banking Company

of Georgia, The Georgia Railroad Company, The Ocean Steamship Company of Savannah, The South Carolina Railway Company, The Clyde Steamship Company, The Cincinnati, New Orleans & Texas Pacific Railway Company (as lessee of the Cincinnati Southern), The Baltimore & Ohio Railroad Company, The Delaware & Hudson Canal Company, The Pennsylvania Company, The Pennsylvania Railroad Company, The New York, Lake Erie & Western Railroad Company, The New York & New England Railroad Company, and The Nashville, Chattanooga & St. Louis Railway Company, are severally common carriers engaged in interstate commerce as parts of through lines and under joint tariffs of rates to Chattanooga, Nashville and Memphis, Tennessee. There is no proof controverting the denial of the Central Railroad Company of New Jersey that it is so engaged.

2. The following are the through rates from New York and Boston to Chattanooga, Nashville and Memphis, respectively:

Classes:—	1	2	3	4	5	6
To Chattanooga.....	114	98	86	78	60	49
To Memphis, 310 miles farther	100	85	65	45	38	35
To Nashville, 151 miles farther	91	78	60	42	36	31

It thus appears that the rates from New York and Boston are less to Nashville than to Chattanooga, on the six numbered classes respectively, by 28 cents, 20 cents, 26 cents, 31 cents, 24 cents and 18 cents; and less to Memphis than to Chattanooga by 14 cents, 13 cents, 21 cents, 28 cents, 22 cents and 14 cents. These differences prevail in favor of Nashville and Memphis on all goods transported to those cities from eastern seaboard points through Chattanooga—the distance to Nashville being 151 miles, and to Memphis 310 miles, further than to Chattanooga.

3. There are a number of routes by which traffic from the eastern seaboard is carried to Nashville. These may be separated into two classes or groups; one consisting of the lines passing through Chattanooga, the other of the lines passing through Cincinnati, Louisville, Evansville and possibly other points north of Chattanooga. How the aggregate through business to Nashville is divided between these different groups was not very definitely shown, but it is fairly inferable from the evidence that the lines through Chattanooga carry fifty to sixty per cent of the total tonnage. There was considerable disagreement as to whether the through rate to Nashville (with reference to the routes *via* Cincinnati, Louisville, etc.) is pro-rated on the whole mileage, or made up by adding certain arbitrary amounts to the "trunk line" rates from the east to these intermediate points respectively.

4 INTER 5.

The rates from New York and Boston to Cincinnati are:

1	2	3	4	5	6
65	57	44	30	26	22

From the same points to Louisville the rates are:

1	2	3	4	5	6
75	65	50	35	30	25

And to Evansville:

1	2	3	4	5	6
88	72	55	39	33	28

The above charges are imposed for carrying the traffic to these towns respectively, whether the transportation terminates there or is continued to Nashville; in other words the lines east of these points receive the same compensation in either case. The through rate to Nashville, hereinbefore stated, is less than the local rates from these several places plus the trunk line rates from the seaboard to each of them respectively, that is, less than the amount produced by adding the locals from Cincinnati, Louisville or Evansville to the eastern rates severally applied to those towns. For this reason the Nashville rate may be said to be made by "arbitrary" additions to the trunk line rates to the intermediate points. On the other hand a comparison of these additions with the distances to Nashville from the several points mentioned shows that they give substantially the same rate per ton per mile in each case—one and seven tenths cents—as the trunk line rate per ton per mile east of those points. Practically, therefore, the Nashville rate by the several routes now under consideration is an extension of the trunk line rate to that point, the total charge being divided between the several carriers in nearly exact proportion to the mileage operated by each. This being the material fact, the origin of the rate, or the proper name by which to describe it, can be of no importance. As any differences between the several routes in this group appear to be insignificant, their relation to the controversy will be sufficiently shown by taking one of them as an illustration, and accordingly the route *via* Cincinnati will be hereafter used for that purpose.

The following comparison shows the difference between the local rate from Cincinnati to Nashville and the amounts added to the trunk line rate to the former place to make the through rate to the latter.

Local Rate	1	2	3	4	5	6
Cin. to Nash.	53	48	39	31	25	25
Additions to	1	2	3	4	5	6
Trunk Line Rate	—	—	—	—	—	—
to Cincinnati	26	21	16	13	10	9

The seaboard traffic which is carried to Nashville through Chattanooga reaches the lat-

ter place by several different routes. The most important of these appears to be the East Tennessee, Virginia & Georgia Railway with its eastern connections by rail and water. The water portion of this route is by the vessels of the old Dominion Steamship Company from New York to Norfolk, where they connect with the Norfolk & Western Railroad which extends to Bristol, Tennessee, the eastern terminus of the East Tennessee, Virginia and Georgia; the rail portion of this route consists of the Pennsylvania system, and possibly other lines, reaching Roanoke, Va., on the main line of the Norfolk & Western by way of the Shenandoah Valley. All traffic over this route passes through Knoxville, Tenn., the rates to which point are about the same as to Memphis.

Another route is by the Clyde Steamship Company to Charleston, connecting at that port with rail lines running through Augusta and Atlanta; and a third route is by the Ocean Steamship Company to Savannah, and thence by rail through Macon and Atlanta. There is no testimony in the case indicating the relative portion of Nashville traffic *via* Chattanooga which passes by either of these routes, but our understanding is that the greater portion of it goes by the one first above described.

The traffic from Atlantic seaboard points to Memphis is also divided between several independent routes. One of these general routes is by the all rail lines through Cincinnati, Louisville, Evansville, etc. The Memphis through rate is the trunk line rate to Cincinnati, etc., plus certain additions which are less than the local rates from those points to Memphis. The difference between such local rates and these additions appears by the following statement:

Local Rate	1	2	3	4	5	6
Cin. to Memp.	75	60	55	40	35	30
Additions to	1	2	3	4	5	6
Trunk Line Rate	—	—	—	—	—	—
to Cincinnati	35	29	21	15	12	13

A comparison of these additions with the distances from Cincinnati, etc., shows that the Memphis through rate, like the Nashville through rate, is in effect an extension of the trunk line rate to Memphis, the total charge being divided between the different carriers in proportion to their respective mileage.

A second route is the one through Chattanooga, formed by the East Tennessee, Virginia & Georgia Railway with its eastern connections, and requires no further description.

Two other routes are those already mentioned by way of Charleston and Savannah respectively. The Memphis traffic by the last named routes does not necessarily go through Chattanooga, but may take a shorter course from Atlanta by way of Birmingham.

In addition to these is the ocean route to New

Orleans, and thence to Memphis by rail or by the Mississippi river.

There are likewise several routes by which shipments terminating at Chattanooga reach their destination. A portion of this traffic goes by the trunk lines to Cincinnati, and thence by the Cincinnati Southern Railroad, now controlled by the Cincinnati, New Orleans & Texas Pacific Company. The through rate by this route, as in the case of Nashville and Memphis, is made by adding to the trunk line rates to Cincinnati certain amounts which represent the proportion of the total charge taken by the carrier from Cincinnati to Chattanooga. The additions so made give a considerably greater rate per ton per mile for this portion of the haul than the trunk line rate east of Cincinnati, but they are at the same time materially less than the local rates between those points. The precise difference appears by the following statement:

Local rates	1	2	3	4	5	6
Cin. to Chat.	76	65	57	47	40	30
Additions to	1	2	3	4	5	6
Trunk Line	—	—	—	—	—	—
Rates to Cin.	49	41	42	43	34	27

Another portion of the Chattanooga traffic goes by the route formed by the lines of the East Tennessee, Virginia & Georgia Railway and its eastern connections by rail and water hereinbefore mentioned. The other routes by which Chattanooga shipments reach their destination are those by water and rail through Charleston and Savannah respectively which have already been sufficiently described. The proportions of the through rate taken by the several lines operating the three routes last named are not disclosed by the record; nor is there any proof showing the relative amount of Chattanooga shipments by either of the routes mentioned. Our impression, however, is that the larger portion of this traffic goes by the Cincinnati route and by the route of the East Tennessee, Virginia & Georgia Railway and its connecting lines.

There may be other routes or lines by which traffic from the Atlantic seaboard reaches Nashville, Memphis or Chattanooga, but the foregoing are those by which the great bulk of eastern shipments is carried to these several points, and the only ones which need to be considered in this investigation. The rates to each of these towns are the same by whatever route the transportation is effected, except the rate to Memphis *via* New Orleans.

Cincinnati, Louisville and Evansville have water communication with Nashville by the Ohio and Cumberland rivers, and also with Memphis by the Ohio and Mississippi rivers, but no traffic from the eastern seaboard by way

of Cincinnati, etc., reaches Nashville or Memphis by these water routes.

4. As the matter of distance is of considerable importance in one aspect of this case, the following tables are given which are believed to be substantially correct.

Distances via Cincinnati, Louisville and Evansville.

	miles
New York to Cincinnati.....	757
Cincinnati to Nashville.....	295
New York to Nashville.....	1052
New York to Louisville.....	927
Louisville to Nashville.....	185
New York to Nashville.....	1112
New York to Evansville.....	986
Evansville to Nashville.....	157
New York to Nashville.....	1143
New York to Cincinnati.....	757
Cincinnati to Memphis.....	487
New York to Memphis.....	1244
New York to Louisville.....	927
Louisville to Memphis.....	377
New York to Memphis.....	1304
New York to Evansville.....	986
Evansville to Memphis.....	322
New York to Memphis.....	1308
New York to Cincinnati.....	757
Cincinnati to Chattanooga.....	335
New York to Chattanooga.....	1092

Distances via Chattanooga all rail.

New York to Bristol.....	659
Bristol to Chattanooga.....	242
New York to Chattanooga.....	901
Chattanooga to Nashville.....	151
New York to Nashville.....	1052
New York to Chattanooga.....	901
Chattanooga to Memphis.....	310
New York to Memphis.....	1211

Distances via Chattanooga, part water.

Norfolk to Bristol.....	408
Bristol to Chattanooga.....	242
Norfolk to Chattanooga.....	650
Chattanooga to Nashville.....	151
Norfolk to Nashville.....	801
Norfolk to Chattanooga.....	650
Chattanooga to Memphis.....	310
Norfolk to Memphis.....	960

(This does not include water distance from New York to Norfolk.)

Charleston to Chattanooga.....	448
Chattanooga to Nashville.....	151
Charleston to Nashville.....	599
Charleston to Chattanooga.....	448
Chattanooga to Memphis.....	310
Charleston to Memphis.....	758

(This does not include water distance New York to Charleston.)

Savannah to Atlanta.....	295
Atlanta to Chattanooga.....	140
Savannah to Chattanooga.....	435
Chattanooga to Nashville.....	151
Savannah to Nashville.....	586

Savannah to Chattanooga.....	435
Chattanooga to Memphis.....	310
Savannah to Memphis.....	745

(This does not include water distance New York to Savannah.)

The distance from New Orleans to Memphis by rail is 394 miles, and by river very much greater.

The distance from Cincinnati to Nashville by the Ohio and Cumberland rivers is about 617 miles.

5. The city of Chattanooga is in southeastern Tennessee on the river bearing the same name as the state. During the last ten years especially its growth has been extremely rapid, and it has become a manufacturing and commercial point of considerable importance. It competes for the trade of the surrounding country largely in the same territory as Nashville, and also to some extent in the same territory as Memphis. By reason of the disparity in charges on shipments from the east, in favor of Nashville and Memphis, Chattanooga is placed at serious disadvantage in this competition and its business materially lessened. The tendency of existing rates to these rival towns is to limit the area in which eastern merchandise can be profitably distributed from Chattanooga, and to impede the growth and prosperity of that city which would naturally result from the development of its wholesale trade.

Under the tariffs now in force goods may be carried from the east through Chattanooga to Nashville, and back through Chattanooga to points south and east, and there sold at lower prices than Chattanooga merchants can sell for; and this appears to have actually occurred in many instances. On a carload of first class freight, 40,000 pounds, the charges to Chattanooga, at \$1.14 per hundred, amount to \$456.00; while to Nashville, at 91 cents, the charges are only \$364.00, making a difference of \$92.00 in favor of Nashville, the longer haul by 151 miles. On fourth class freight the advantage in favor of Nashville is \$124.00 per car, and on sixth class, \$72.00. The advantage in favor of Memphis, a longer haul by 310 miles, is also large.

The proportion of the Nashville through rate charged on a ton of first class goods from Cincinnati to Nashville via the Louisville & Nashville Railroad, a distance of 295 miles, is \$5.20, while the proportion of the Chattanooga through rate charged from Cincinnati to Chat-

tanooga *via* the Cincinnati Southern Railway, a distance of 335 miles (only 40 miles further), is \$9.80.

It is quite unnecessary to multiply examples showing the differences resulting from these relative rates in the transportation charges on eastern merchandise to these several towns, as their necessary effect in limiting the distance to which distribution from Chattanooga can be profitably effected is sufficiently obvious without further illustration.

6. As appears from tariffs on file with the Commission, the following cities and towns, among others, are grouped with Chattanooga and take the same *rail and water* rates on classified traffic, to wit: Dalton, Rome, Atlanta, Americus, Athens, Columbus, Fort Gaines, and Griffin, in the state of Georgia; Huntsville, Decatur, Sheffield, Tusculumbia, Florence, Gadsden, Oxford, Talladega, Anniston, Birmingham, Opelika, Montgomery, Selma, and Eufaula, in the state of Alabama; and Enterprise and Meridian, in the state of Mississippi. Of these, Dalton, Rome, Atlanta, Americus, Athens, Columbus, Griffin, Anniston, Gadsden, Oxford, Opelika and Eufaula have higher *all rail* class rates than Chattanooga—their all rail rates on the six numbered classes being as follows:

1	2	3	4	5	6
122	104	91	77	68	51

The rates to Chattanooga and the above named common points, both *rail and water* and *all rail*, are established by the Southern Railway & Steamship Association, of which the defendant lines herein are members, and all traffic to those points is governed by the classification of that Association. The traffic to Nashville and Memphis, however, irrespective of the route by which it is transported, is governed by the Official or Trunk Line classification. There may be some disadvantage to Chattanooga from this circumstance, since an article of a given class under the first named system may be in a lower class under the other system, but the injury, if any, resulting from differences of that character is not believed to be serious.

The general range of rates in the territory covered by the Southern Railway & Steamship Association is materially higher than in the territory of the Trunk Line Association, the difference resulting mainly from the much greater volume of traffic in the latter section; and it is inevitable that difficulties should exist and complaints arise along the line of division between varying systems of classification and unlike methods of tariff construction.

7. There are no through lines by water from Cincinnati to Nashville, but a few boats are run from Cincinnati to Paducah, Kentucky, and two or three a week, carrying from six to eight carloads each, from Paducah

to Nashville. Boats are unloaded and loaded again at Paducah. No eastern business of any consequence is done, and these water lines have no agents to solicit eastern trade. Their traffic is from Ohio river points. The Atlantic seaboard shipments to Nashville by way of Cincinnati are carried wholly by rail.

The lower Cumberland river, on which Nashville is situated, is navigable about nine months in the year, and boats run that number of months on an average. Many years ago, before the days of railroads, there were through lines of boats to Nashville from Cincinnati and other cities, but they have all been discontinued on account of the rates and facilities afforded by the railroads. The railroads have the advantage in time, insurance and handling. If goods were shipped from the East and sent by water from Cincinnati to Nashville, they would have to be unloaded from the cars and loaded in boats at Cincinnati, and loading and unloading would also be necessary at Paducah. A through line of boats was established and kept up with difficulty for some time after the war, but was long ago abandoned. The uncertainty of return cargoes from Nashville would apparently prevent the maintenance of such a line of boats at the present time, even if secured against a reduction in rates by the railroads.

8. The lower rates accepted by the carriers engaged in the transportation of eastern merchandise to Nashville *via* Chattanooga are not forced upon them by any water competition at the former place. In performing this service for the compensation fixed by the present tariffs, these carriers are not affected by the circumstance that water communication exists between Cincinnati and Nashville. The Nashville rate is independent of the lines operating through Chattanooga, and those lines have no voice in determining its amount. That rate is made by the all rail carriers *via* Cincinnati, and their action is uncontrolled by the defendant lines. The competition which the latter meet at Nashville is distinctly the competition of the trunk lines and the Louisville & Nashville system whose northern termini are at points on the Ohio river which receive trunk line rates on eastern shipments. The competitors of the defendants for this Nashville traffic, therefore, are the railroads from the Atlantic seaboard reaching Nashville by way of Cincinnati, etc., all of which are interstate carriers subject to the Act to Regulate Commerce. These carriers established rates and united in joint tariffs from eastern points to Nashville long before the lines through Chattanooga engaged in the Nashville business. The acceptance of the rates so fixed by the rail lines *via* Cincinnati was the necessary condition upon which the lines *via* Chattanooga could compete for Nashville traffic.

As already stated, the through rate to Nashville by the Cincinnati route is made by certain additions to the trunk line rate from the east to the latter point. The amount of such additions was doubtless fixed originally with reference to the water rates between those cities, and it may be that the possibilities of water carriage have some influence in maintaining the present figures. But we are far from satisfied, and refuse to find on the evidence in this case, that there is any actual water competition for traffic from Atlantic points to Nashville, or that the Louisville and Nashville road is forced to take such traffic at the compensation now received by it, because of river communication between Cincinnati and Nashville furnishing the opportunity for such competition. The river rates between those places are now considerably lower than the rail rates, and more or less of the local traffic goes by water; but the through business from Atlantic cities, saving the time, distance and cost of breaking bulk at Cincinnati, would continue to go by rail, in our judgment, even if the disparity between land and water rates were materially greater than it is now. There might, of course, be such an advance in rail rates that shipments from the east would take the water route from Cincinnati. What amount of difference would produce that result it is impossible to determine from the testimony; but we find that such difference might be substantially greater than it is at present without important effect upon the railroad tonnage from the east, and that the through rate to Nashville is in no sense controlled by water competition at that point, either actually encountered or seriously apprehended.

9. The situation is quite different with respect to Memphis. The defendant lines actually meet water competition at that point which is direct and to a large degree controlling. The heavy shipments from the Atlantic seaboard to Memphis go for the most part by way of New Orleans, and the carriers complained of in this proceeding make little effort to compete with the water lines on traffic of that description. At least a third of the entire volume of eastern merchandise appears to reach Memphis by ocean steamer to New Orleans, and thence by water or rail to destination. The differences between the rates on the several classes of freight from eastern cities over the routes through Chattanooga, and the rates by ocean to New Orleans and thence by the Mississippi river to Memphis, are shown by the following table:

By defendants' lines.

1	2	3	4	5	6
1.00	.85	.65	.45	.88	.85

4 INTER S.

By New Orleans and River.

	.65	.60	.45	.33	.28	.27
Differences.	.85	.25	.20	.12	.10	.08

On shipments from New York to New Orleans by ocean, and thence by rail to Memphis, the rates now in force for the several classes are 83 cents, 75 cents, 57 cents, 40 cents, 34 cents and 32 cents; also the following commodity rates, viz: on bags, bagging, soda and coffee 82 cents; on boots and shoes, dry goods, carpets, clothing and notions 68 cents; and on cotton piece goods 52 cents.

There are two steamers per week of large capacity from New York to New Orleans, and three or four lines of boats ply the Mississippi at all seasons of the year between the latter place and Memphis. Large quantities of dry goods, staple groceries and other similar articles, which at Memphis amount to a very large tonnage, reach the wholesale dealers of that city *via* New Orleans at the rates above stated. The rail carriers from the east cannot meet these rates and do not control this class of business. Their participation in the traffic is mainly confined to the higher grades of freight, on which the advantages in time, insurance and other items compensate for the increased cost of transportation. It appears also that the East Tennessee, Virginia & Georgia Railway, and presumably the other defendants, have agreed with the steamship lines running to New Orleans, and their connecting carriers to Memphis, upon the present differentials in favor of the New Orleans route to that destination; and the fact of such an agreement to prevent ruinous rate cutting indicates with much force the existence and positive influence of water competition for the carrying trade to that town. The apparent effect of these differentials is to give to the water routes a large share of the heavy and bulky traffic, especially the coarser and cheaper goods of general consumption at all periods of the year, while the lines operated by the defendants transport the greater portion of the more valuable commodities embraced in the higher classes.

It is possible, also, that the obtainable rates on Memphis traffic are affected, in some measure at least, if not to a controlling degree, by the tariffs made and business secured by the rail lines reaching that point through Cincinnati. The action and influence of those lines have already been described in the findings relating to Nashville, and further statements in regard thereto can hardly be required in this connection. Indeed, there seems to be no occasion for reciting other facts bearing upon transportation charges to Memphis, because the still lower rates enjoyed by Nashville, and the greater proximity of that town to Chat-
ta-

nooga, present the leading issue in this investigation. An equitable adjustment of the relative rates applied to these two cities will, as it now appears, make any special consideration of the Memphis tariff practically unnecessary.

10. There is a conceded margin of profit in the rates now in force to Nashville and Memphis, with reference to the additional expense incurred in carrying eastern traffic to those destinations, but whether that margin affords reasonable compensation for the services thus rendered cannot be determined from the evidence.

Conclusions.

The situation which we have thus attempted to describe is one of peculiar difficulty. It is easy to perceive the disadvantages which gave rise to this complaint, but the remedy that can be applied, with due regard to the rights of the carriers affected, is not readily discovered. The prejudice to which Chattanooga is subjected by reason of the lower rates of transportation to Nashville and Memphis is obvious and conceded, but how to avoid that result without unjust consequences to the defendants is an extremely obstinate problem. There are certain considerations, however, bearing upon this question which indicate the direction in which a solution is to be sought.

In the findings of fact above set forth we have stated that the rates accepted for carrying eastern traffic to Nashville through Chattanooga are not influenced by water competition at the terminal point, but that the sole competition for Nashville business from the Atlantic seaboard comes from the all rail lines reaching the same destination by way of Cincinnati. We do not see how there can be actual competition between carriers except under circumstances where the traffic for which they compete would be taken by one of them if the other were not in the field; and such competition can be controlling at a given point only to the extent that either is in a position to do the entire business if the others were unable or unwilling to engage in it. One transportation line cannot be said to meet the competition of another transportation line for the carrying trade of any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it. This being so, the defendants cannot maintain that there is water competition for the carriage of eastern merchandise to Nashville, because none of that traffic would reach its destination by water if the lines through Chattanooga withdrew or were excluded from the Nashville business. Plainly, in such event, all traffic from the east to that point would be carried over the rail routes *via* Cincinnati; the water lines on the Ohio and Cumberland rivers would not participate in it any more than they

do at present. In other words the real competitors of the defendants for this transportation are the all rail carriers reaching Nashville by way of Cincinnati, and those carriers are confessedly amenable to the Act to Regulate Commerce. If these views are correct they control, *prima facie* at least, the determination of this case, for the primary question involved has been recently decided by the Commission.

In a series of proceedings instituted by the Georgia Railroad Commission, we have taken occasion to review with much care the fourth section of the statute, familiarly known as "the long and short haul clause," and have given it a construction intended to have general application.

Trammell v. Clyde Steamship Company, 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324.

The consideration which this feature of the law received in the cases here referred to, and the reasons advanced for the conclusions therein announced, will appear from an examination of the report of the Commission in those cases, made public a few weeks ago, and need not be repeated in this opinion. The proposition which distinctly applies to the present proceeding was stated with conciseness in the following language:

"The carrier has the right to judge in the first instance whether it is justified in making the greater charge for the shorter distance under the fourth section in all cases where the circumstances and conditions arise wholly upon its own line or through competition for the same traffic with carriers not subject to regulation under the Act to Regulate Commerce. In other cases under the fourth section, the circumstances and conditions are not presumptively dissimilar, and carriers must not charge less for the longer distance except upon the order of this Commission."

This ruling is directly in point and conclusive upon the primary issue in this controversy, because the competitors of these defendants for the Nashville traffic in question are themselves interstate carriers by rail, and subject in all respects to the Act to Regulate Commerce. It follows, therefore, that the carriers herein complained of which engage in the transportation of freight from the eastern seaboard to Nashville *through* Chattanooga, and publish and accept rates therefor which are lower than the rates maintained by them for like transportation to Chattanooga,—a shorter haul included in the longer haul to Nashville,—are acting in plain violation of the fourth section, and that the resulting discrimination against Chattanooga must be adjudged unlawful.

Upon the facts ascertained in this case and the interpretation of the statute to which we adhere, any other conclusion would be quite inconsistent. The construction placed upon the long and short haul clause in the Georgia

cases was deliberately adopted, and its controlling application to the present controversy is not open to serious question. We must hold that the lower rates accorded by the defendants on shipments to Nashville are without warrant of law, and that the higher charges exacted on shipments to Chattanooga cannot be sanctioned in this proceeding.

In justice to the various parties in interest, however, it should be added that this disposition of the case is not intended to preclude the defendants from applying to the Commission for relief from the restrictions imposed by the fourth section of the Act, on the ground that the situation in which they are placed with reference to this Nashville traffic constitutes one of the "special cases" to which the proviso clause of that section should be applied.

It is stated in the foregoing findings that the present Nashville rate is prescribed by the rail lines reaching that point *via* Cincinnati, and that the defendant lines through Chattanooga have no voice or influence in determining its amount. These lines are under compulsion, therefore, to meet the rates which other carriers have established, or leave those carriers in undisturbed possession of the entire traffic. They have no alternative but to accept the measure of compensation dictated by independent rivals, or abandon the large percentage of Nashville business which they now secure. In addition to this, the geographical position of these two cities, the diverse character and divergent courses of the several groups of lines which connect them with the Atlantic seaboard, the varying systems of classifications by which they are severally affected, and the greater volume of traffic at the lower rates prevailing in the trunk line territory, are existing conditions which govern, to some degree at least, the transportation in question. For these conditions the carriers complained of do not appear chiefly responsible, because the lower rate to Nashville is beyond their control, and the allowance of the same rate to the shorter distance point might reduce their revenues below the limits of fair compensation. Without in any sense prejudging the case, we hold that the defendants may invoke its consideration in an appropriate proceeding.

Any such intimation, however, should not be understood as covering an implied indorsement of the present disparity in rates as between Chattanooga and Nashville, for no such inference is intended. The suggestion here made goes no further than the propriety of an unprejudiced investigation, when permission to deviate from the general rule of the statute is applied for by these carriers on account of the special circumstances by which they are surrounded.

It seems improbable that the discrimination complained of can be made less oppressive

by any increase in the Nashville rate, and on that assumption the only practical relief is a reduction in rates to Chattanooga. We are aware of the difficulties attending a readjustment upon that basis, but we cannot regard them insuperable. On the contrary we firmly believe that the eastern rate to this point can be materially reduced without injustice to the defendants and without serious disturbance to the general scheme of tariff construction with which that rate is connected. Compared with rates to other points and on other lines, for similar distances and a corresponding volume of traffic, the rate to Chattanooga seems extremely liberal, to say the least; while a strong presumption of its unreasonableness is created by the voluntary action of the defendants themselves in seeking business at decidedly lower rates to points much more remote. When these carriers, for instance, charge seventy-three cents per hundred pounds on fourth class freight from New York to Chattanooga, and at the same time carry like shipments 150 miles further to Nashville for forty-two cents a hundred, and do this not incidentally but for a series of years, the belief that the higher rate is excessive becomes a positive conviction. We are familiar with the argument by which the policy of lower rates to competitive points is defended, and concede its conclusiveness in certain cases and within certain limits; but when the disparity between long and short distance charges reaches the proportions here exhibited, the inference is irresistible that the lesser rate must be unremunerative upon any theory, or else the larger rate gives an unwarranted return for the services rendered. As the Commission has said in another case where a similar question was considered: "the difference between the figures is too great to permit the lower charge to be justified by the rule of expediency without condemning the higher charge by the rule of reasonable compensation."

We entertain little doubt, therefore, that equity between shipper and carrier requires some reduction in the rates now enforced on Chattanooga traffic from Atlantic points, and are convinced of the necessity for such a reduction to secure relative justice between that town and Nashville. We refrain from further statement of the reasons which have induced this conclusion, as the amount to which the Chattanooga rate should be reduced will not now be decided. If the carriers engaged in Nashville transportation through Chattanooga act upon the suggestion above made, and apply for relief from the restrictive rule laid down in the fourth section, the subject can be more fully considered in disposing of that application; while if such action is not taken by them within the time allowed for that purpose, it will be the duty of the Commission to make a

final order in this proceeding prohibiting higher charges on shipments to Chattanooga than are or may be accepted on like shipments to Nashville. In addition to this, it may be remarked that the complainant's case was presented on the theory that the prohibitive requirement of the statute should be strictly enforced against these defendants, while they in turn contended that the full difference now maintained between rates to Chattanooga and to Nashville was justified by the necessities of the situation. The question which may arise, if permission is sought to depart from the general rule relating to long and short hauls, was not specially discussed. On this ground, also, it would seem suitable to allow opportunity for a further hearing before fixing maximum rates on shipments to Chattanooga.

We deem it unnecessary to make any comment upon the rates in force at Memphis or give any directions in respect thereto, because, as stated in the findings, the fundamental question in this case arises between Chattanooga and Nashville, and an equitable adjustment of rates between those towns may obviate any separate consideration of the Memphis tariff.

These views lead to the following order:

For reasons stated in the foregoing opinion, it is adjudged unlawful for the defendants herein to make or accept rates on shipments from Atlantic seaboard points to Nashville through Chattanooga, which are lower than the rates made and enforced by them at the same time on like shipments to Chattanooga—a shorter distance included in the longer distance to Nashville. The defendants, therefore, are ordered and required to cease and desist from making, enforcing or receiving any higher rates for such transportation as aforesaid to Chattanooga than are or may be made or accepted by them at the same time for like transportation to Nashville.

To enable the defendants to apply for relief under the proviso clause of the fourth section of the Act to Regulate Commerce, this order will be suspended until the first day of February, 1898; but the same will take effect and be in force from and after that date unless such application be made prior thereto. In case such relief shall be applied for within the time mentioned, the question of further suspending this order until the hearing and determination of such application will be duly considered.

In this report and opinion all the Commissioners concur.

THE POTTER MANUFACTURING COMPANY

THE CHICAGO & GRAND TRUNK R. CO.; THE ATCHISON, TOPEKA & SANTA FE RAILROAD COMPANY, and THE SOUTHERN PACIFIC COMPANY.

1. Continuance of a system of unjust rates cannot be required or excused on the ground that parties have made investments and entered into the business affected thereby on the faith of assurances from carriers of their maintenance, although a change might work injury to the parties whom such rates had unduly favored.
2. An advantage, resulting from just rates coupled with the enterprise and outlay necessary to utilize them, is legitimate, and carriers should not undertake to deprive a shipper of this advantage by a change of such rates.
3. A rate on a particular class of goods which is unreasonable or discriminatory in itself, is not justifiable on the ground that the same rate is given another (and in this case a competitive) class of goods and as applied to the latter is liberal and advantageous.
4. The question as to correct weights and shipments, as between carrier and shipper, is one of fact to be determined in a manner just to both parties and as to which the *ex parte* action of either cannot conclude the other.
5. Taking into consideration the difference in value of the unfinished and finished cheap bedroom sets involved in this case and the greater tonnage per carload which can be hauled of the former, and having in view the interests of both carrier and shipper, it is held, that the rate on unfinished cheap bedroom sets as shipped by complainant from Lansing, Mich., to Oakland, Cal., should not exceed 85 per cent of whatever rate may be adopted for such sets in a finished condition.

Complaint filed Oct. 17, 1891.—Answers filed Nov. 2 to Nov. 16, 1891. Decided December 9, 1892

R. W. Montague, for complainant.

W. A. Day, for Chicago & Grand Trunk Railway Company.

A. B. Browne, for the Atchison, Topeka & Santa Fe Railroad Company.

H. S. Brown, for the Southern Pacific Company.

REPORT AND OPINION OF THE COMMISSION.

Clements, Commissioner.

The complainant, the Potter Manufacturing Company, is a corporation created under the laws of Michigan and engaged in the manufacture of furniture at Lansing in that state. The defendant railway companies are common carriers engaged in interstate transportation and under a common arrangement for continuous carriage transport the goods of complainant from Lansing to Emory, a station or switch near Oakland, California.

At its factory in Lansing the complainant does the machine and bench work on the furniture and ships it in an unfinished condition to the Michigan Furniture Company at Emory, where the work is completed. The Michigan Furniture Company is a corporation created under the laws of California. While the Potter Manufacturing Company (complainant) and the Michigan Furniture Company are distinct corporations, George N. Potter and James W. Potter of Michigan, own two thirds of the stock in each, and the latter was organized for receiving and finishing in California the unfinished furniture shipped by the former from Michigan. The Potter Manufacturing Company ships no goods to California except to the Michigan Furniture Company. The freight on such shipments is paid by the Michigan Furniture Company and the transaction is a sale by complainant to that company. The market for this furniture, when completed, is on the Pacific coast.

The substance of the complaint is that the rate charged by the defendants on cheap bedroom sets shipped by the complainant in an *unfinished* condition from Lansing to the Michigan Furniture Company at Emory is the same as that on such bedroom sets in a *finished* condition and that this is an unjust discrimination against complainant's shipments which consist for the most part of cheap unfinished sets, in favor of shippers of completed sets and gives an undue or unreasonable preference to the traffic in such finished furniture over that in such unfinished furniture.

The rate complained of was fixed by the Transcontinental Association Tariff No. 34, which became effective Sept. 21, 1891. In that tariff,

"Furniture, as from machine or bench, K. D., *unfinished*, in the white, not mahogany, rosewood, ebony, black walnut, maple or cherry, minimum weight of 24,000 lbs. per 4 INTER 8.

car not exceeding 30 ft. in length inside measurement, proportionate minimum weight to apply on cars in excess of 30 ft. in length," is charged a rate of \$1.30 per hundred pounds, and the same rate is fixed for

"Bedroom sets, not mahogany, rosewood, ebony, black walnut or cherry, consisting of six pieces, bedstead, bureau, washstand, small table and two chairs, actual value \$25.00 or less per set; or three pieces, bedstead, bureau and washstand, actual value \$20.00 or less per set, O. R. chafing and breakage, minimum weight 20,000 lbs."

In the above item of the tariff relating to unfinished furniture, the minimum weight is fixed at 24,000 lbs. "per car not exceeding 30 ft. in length inside measurement." This is objected to by complainant as an unjust discrimination. It was announced at the hearing (April 8, 1892) by counsel for defendants that the limitation as to length of car had been done away with, and it appears to have been omitted in Transcontinental Association Tariff No. 36, effective July 18, 1892.

In this tariff the item as to finished bedroom sets is also changed by the substitution of sets of four pieces (chairs being left out) of value of \$25.00 or less, for sets of six pieces, and by the addition of sets of two pieces, bedstead and bureau, of value of \$16.50 or less. It may be noted that this substitution of sets of four pieces for sets of six was made after the testimony in this case had been taken and that John H. Potter testified, among other things, that the Michigan Furniture Co. (of which he was a stockholder) did not handle chairs at all and made all its price lists on four piece sets. In the latter tariff *mixed* carloads of the cheap bedroom sets of minimum weight of 20,000 lbs. are also provided for at the rate of \$1.30 per hundred pounds.

As to all finished bedroom sets except the cheap ones above specified, the rate is \$2.75 per hundred pounds from Michigan points. At the time (Sept. 21, 1891) when Tariff No. 34, under which finished and unfinished cheap bedroom sets have the same rate, was adopted, and prior thereto, there was no distinction made in the matter of rates between cheap and costly bedroom sets, the rate at that date being \$2.75 on cheap sets as well as on the more costly, and the change was brought about by reducing the rate on the cheap bedroom sets from \$2.75 per hundred pounds to \$1.80. At the same time the rate on such unfinished sets

was reduced from \$1.35 per hundred pounds to \$1.30. These reductions amount to \$1.45 on finished and 5 cents on unfinished sets.

Prior to Sept. 21, 1891, a distinction in rates as between finished and unfinished cheap sets had been observed, the rate on the former having been materially higher than that on the latter. The following table gives the rates as they appear from a sworn statement furnished by J. W. Potter, General Manager of complainant, and not controverted, at the dates named therein on shipments of these two classes of freight to Oakland:

Date.	Rate Unfinished.	Rate Finished.	From
May, 1886.....	\$.70	\$1.00	Chicago.
Apr. 2, 1887.....	.80	1.00	"
July, 1887.....	.96	2.10	"
Aug. 1887.....	1.02	2.10	Factory.
March, 1888.....	1.11	2.10	"
Sept. 1, 1888.....	1.20	3.50 T.C.	"
Oct. 22, 1889.....	1.28	2.75	"
Jan. 15, 1891.....	1.35	2.75	"
Sept. 21, 1891.....	1.30	1.30	"

The change, making the rate on finished cheap bedroom sets the same as that on unfinished furniture, went into effect, as before stated, Sept. 21, 1891, but it was determined upon at the June session, 1891, of the Trans-continental Association, and this fact appears to have become known to the trade. The evidence tends to show that in anticipation of the change there was a large falling off during July and August, 1891, in the business of the complainant in the shipment of unfinished cheap bedroom sets to the Michigan Furniture Company at Emory and in the business of the latter company in such sets, and after the new rate became effective, there was a still greater decrease, if not a total discontinuance, of such shipments by the complainant. There were very few (if any, besides complainant) furniture companies or dealers in California that were prepared for manufacturing unfinished furniture at Michigan points and shipping it in that condition for completion and sale in the California and other Pacific coast markets, and the high rate on finished cheap furniture prevented its importation to any extent. These dealers, therefore, bought a large proportion of their cheap furniture from complainant's consignee, the Michigan Furniture Company. Since the adoption of the new rate on cheap bedroom sets *finished*, the shipment of these sets from Michigan and Wisconsin to the Pacific coast has greatly increased. One witness states that the importation of that class of goods by the California dealers has become tenfold greater. It appears that the reduction of the rate on completed sets was asked for by the Pacific coast furniture men, who represented that "the \$2.75 rate on cheap bedroom sets was prohibitory and precluded their importing that grade of furniture," and the Gen-

eral Freight Agent of the Southern Pacific Company states that in granting the reduction the object of the roads was to "give these people (Pacific coast traders) an opportunity of competing with the other good people that were bringing their goods here in unfinished form and completing them on this (Pacific) coast."

It is stated in the complaint that the rate of \$1.30 per hundred pounds on cheap unfinished furniture as provided in the Tariff of Sept. 21, 1891, "has been and would still be satisfactory except for the great reduction in finished sets;" but it is claimed that the rate for such unfinished furniture should not, since the reduction of the rate on finished sets to \$1.30 per 100 pounds, "exceed 90 cents per hundred pounds from Michigan points." In other words the complaint is, not of the rate on the unfinished cheap furniture as being unreasonable in itself, but of the alleged discrimination against the unfinished furniture resulting from giving unfinished furniture and finished sets the same rate.

In the case of *Bates v. Pennsylvania R. Co.*, 2 Inters. Com. Rep. 715, 8 I. C. C. Rep. 485, the complaint was the *reverse* of that in the present case. It appears that the defendant carriers in that case had for a long time maintained the *same* rate on corn and its direct products from Indianapolis to the eastern seaboard, and while this was the case and relying upon this equal rating, the complainants and others had at and in the vicinity of Indianapolis made investments and entered upon the business of buying and grinding corn and selling its direct products near eastern seaboard points where the principal markets for such products existed. Suddenly a discrimination was made between the two commodities by reducing the rate on corn four and a half cents per hundred pounds below that on the products. This resulted in serious injury to the milling industry at Indianapolis, and the Commission say: "The market for the product being in the east, it is plain that it would be folly to grind the corn in the west and transport the product when four and a half cents per hundred pounds could be saved by transporting the corn to the eastern market and grinding it there, *when presumably it could be done at about the same cost at both points.*" It was accordingly held, that the reduction of the rate on corn below that on its direct products, being "without necessity or advantage to the carrier or any reason founded on the character or condition of the traffic," gave the millers at the eastern terminus of the defendant roads an undue advantage over the complainants and other millers at and in the vicinity of Indianapolis and subjected the latter to an undue disadvantage, in violation of section 8 of the Act to Regulate Commerce, "notwithstanding the new rate on

corn was open to all persons equally and with equal service."

In the present case, as in *Bates v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 715, 3 I. C. C. Rep. 485, it will be presumed in the absence of proof on the subject, that the cost of manufacturing cheap bedroom sets or finishing such sets when in the condition in which they are shipped by complainant from Lansing, is about the same in Michigan and Wisconsin as on the Pacific coast. This being so, and it being borne in mind that the Potter Manufacturing Company (complainant) and the Michigan Furniture Company, although distinct legal entities, are practically one in interest, the much smaller rate on unfinished furniture (\$1.85 per cwt.) than on finished cheap sets (\$2.75 per cwt.) gave those companies a very great advantage over the shippers of the latter from Michigan and Wisconsin. This advantage, while primarily over the manufacturers and shippers of completed cheap sets from those states, operated also to the disadvantage of the California and Pacific coast jobbers by depriving them of the benefit of the lower prices which presumably would have resulted from competition on equal terms between complainant and its complement, the Michigan Furniture Company, on the one hand, and the western manufacturers of such sets, on the other. The Pacific coast dealers, therefore, importuned the roads for a reduction of the rate on finished cheap sets, and the latter thereupon adopted a tariff and classification which gave unfinished cheap furniture and finished cheap bedroom sets the same rate.

All the complainant asked for in the case of the *Chicago Board of Trade v. Chicago & A. R. Co.*, 3 Inters. Com. Rep. 283, 4 I. C. C. Rep. 158, in order to place the Chicago packers on an equal footing with the western packers was the *same* rate on the live hog as on the hog product, and all the Indianapolis miller claimed in the *Bates* case, *supra*, as necessary to place him on an equality with the seaboard miller, was the *same* rate on corn and its direct products. Under the principles laid down in the latter case, the lower rates on unfinished cheap bedroom sets than on finished cheap bedroom sets which prevailed from the east to the Pacific coast prior to Sept. 21, 1891, were in violation of section 3 of the Act to Regulate Commerce, *unless they were justified by "necessity or advantage to the carrier" or some "reason founded on the character or condition of the traffic."*

It was found in those cases that these grounds of justification were not shown by the evidence to exist and the principal questions in this case are, (1), Is there any such justification for lower rates on unfinished cheap bedroom sets than on finished cheap bedroom sets on shipments thereof over the de-

fendants' lines from the east to the Pacific coast, and, (2), If so, how much lower should the rate be on the former than on the latter.

As preliminary to the discussion of these questions, we remark that the fact, which the evidence tends to show and upon which great stress is laid by complainant, that the Potter Brothers (who originally conducted the business in Michigan and afterwards virtually organized the complainant and the Michigan Furniture Company) entered into the manufacture of unfinished cheap furniture and made their investments in Michigan and California on the faith of assurances by railroad authorities of low rates on such furniture and a maintenance of the greatly lower rates thereon than on finished goods, is not in itself a sufficient reason for adhering to such disparity in rates, if it is shown to be wrong in principle. In the case of *Bates v. Pennsylvania R. Co.*, 2 Inters. Com. Rep. 718, 3 I. C. C. Rep. 444, it is said, that "this Commission would not hold that a classification that was wrong should be adhered to, *although* its change might work injury to individuals whom the wrong classification had unduly favored."

On the other hand, the fact, that the lower rates on the unfinished goods shipped by complainant than on such goods in a finished condition, gave complainant and the Michigan Furniture Company so great an advantage as we have shown over the shippers of the latter does not authorize a change in the rate making it the same on the two classes, if the pre-existing inequality was on principle just and proper in itself. Carriers should not undertake to deprive a shipper of an advantage resulting from just rates by change of those rates. An advantage is legitimate, if it results from just rates coupled with the enterprise and outlay necessary to make use of such rates. Others may compete with the Potters by doing as they have done and this will result in benefit to the public by reducing the price of the commodity to the consumer.

As bearing upon the question, whether a lower rate on complainant's unfinished furniture than on such furniture when finished is justified by "any reason founded on the character and condition of the traffic," we will first consider the relative values of the two articles. The evidence on this point is conflicting and very indefinite. The machine and bench work is done at Lansing, and the finishing, which includes varnishing, at Emory; at the latter place, also, the plate glass and trimmings are furnished and the goods are packed for market. The cost of thus completing the work is stated by one witness to be about \$3.50 on a set that would sell for \$10.00 in carload lots, and \$7.00 on a set that would bring \$15.00 in carload lots. Another witness estimates it to be about \$1.00 on the cheapest sets and \$1.50 on the more

expensive. We are of the opinion that the first estimate is the more reliable. The evidence is that 61 per cent of the shipments of completed sets from the factory at Emory average \$7.50 per set; 4 per cent, \$15.00; and 55 per cent \$10.00. These shipments, then, would not average on the whole over \$10.00 per set, and the cost of completing the work at Emory would not average over \$3.50. Deducting this from \$10.00, we have the average value of the unfinished sets as shipped from Lansing, about \$6.50 per set. The \$3.50 is the actual cost of completion, and no profit is included. The completed sets would appear, therefore, to be worth about 50 per cent more than the unfinished goods. The evidence is that the completed sets average about 235 lbs. to the set; there is no evidence as to the weight of the unfinished material of a set as shipped from Lansing. At 235 lbs. per set a minimum carload (20,000 lbs.) would contain about 85 sets, and these at \$10.00 per set would be worth \$850. Deducting \$3.50 per set (the cost of finishing), the unfinished material for these sets as shipped from Lansing would be worth about \$570. This is as definite a result as we have been able to arrive at from the meager and conflicting evidence. While it is far from satisfactory, and we cannot affirm its accuracy, we are of the opinion that the value of the unfinished material as shipped by complainant is materially less than that of the finished sets.

Cost of service and the carrier's compensation are also important elements in fixing transportation charges. There is no evidence as to the actual cost of carrying either the unfinished or finished furniture. There appears to be nothing in the nature of the unfinished material for cheap bedroom sets as shipped by complainant or in the circumstances and conditions attending its transportation which calls for a higher than the average rate on shipments in general. The following table gives the estimated cost of carrying a ton of freight in general a mile as reported to this Commission by the Atchison, Topeka & Santa Fé and Chicago & Grand Trunk companies, for the years 1888, 1889, 1890 and 1891, and the cost on the line of the Southern Pacific Company, in the absence of a report, as computed by our statistician:

Name of road.	1888.	1889.	1890.	1891.
	cts.	cts.	cts.	cts.
Atchison, Topeka & Santa Fé.....	.861	.866	.656	.720
Chicago & Grand Trunk.....	.404	.411	.304	.305
So. Pacific Atlantic Sys.....	.733	.972	.679	.751
" Pacific Sys.....	.829		1.024	.900

The average cost, on the basis of the above figures, of carrying a ton a mile on these roads to the Pacific coast, was, .696 cents for 1888, .749 cents for 1889, .691 cents for 1890, and .672 cents for 1891. The distance from Lan-

sing to Oakland being 2790 miles, the rate per ton per mile, at \$1.30 per hundred pounds for the whole distance, is .981 cents. Deducting from this the above average estimated cost of carrying a ton a mile on the three roads to the Pacific coast for the year 1891, there is left .259 cents, or over $2\frac{1}{2}$ mills, per ton per mile. This amounts to \$7.23 per ton for the 2790 miles, and on a carload of 24,000 lbs. (12 tons) to \$86.64, as the amount per minimum carload, which the \$1.30 rate yields the defendants over the estimated average cost of carriage in general. For the years 1888, 1889 and 1890, it is somewhat less.

The complainant introduced in evidence a statement of fifteen of its carload shipments from Lansing to Oakland during the period from May 27 to September 11, 1891. The total "invoice value" of these shipments appears to have been \$14,305.52, an average of \$953.66 per carload, and the total freight paid \$5,502.73, an average of \$366.85 per carload and over 38 per cent of the average invoice value. These shipments were made under the \$1.35 rate. The total weight of these shipments at Oakland is given at 403,830 lbs. At the present rate of \$1.30, the total freight on that tonnage would be \$5243.94 or an average per carload of \$349.59, which is over 36 per cent of the above average invoice value per carload.

The unfinished furniture being required by the tariff under consideration to be shipped "knocked down" (K. D.), a larger tonnage of it can be carried in a car of given dimensions than of the finished bedroom sets as to which there is no such requirement. The carriers, recognizing this, have fixed the minimum carload of unfinished furniture at 24,000 lbs. and of the finished sets at 20,000 lbs. These carloads, respectively, at the rate of \$1.30 per hundred pounds, yield the carrier, \$312.00 and \$260.00—being \$52.00 more on a carload of unfinished furniture than on a carload of the finished sets. The actual weight per carload of complainant's shipments appears to be much in excess of the minimum prescribed, as the weights of the fifteen taken at Oakfield and referred to above show an average per carload of 26,922 lbs. and of four others, an average of 39,455 lbs. There is no reliable evidence as to the actual weight of carloads of finished sets, but it is shown that 20,000 lbs. and more of such sets can be loaded in the cars used for their transportation. While "a carrier should receive a greater compensation in the aggregate for hauling a carload of large tonnage than one of less tonnage, yet, other things being equal, as a general rule, the rate per hundred pounds should be less in the former than in the latter case." *Murphy, Wasey & Co. v. Wabash R. Co.* 3 Inters. Com. Rep. 725, 5 I. C. C. Rep. 122. This principle seems to have

had almost universal recognition by carriers in their rate sheets and systems of classification—the rate per hundred weight being less, and the class being lower, other things being equal, where a larger minimum carload weight is required. In the case of *Murphy, Wasey & Co., supra*, it was held, that a lower than the existing rate should be given unfinished chair material in view “particularly of the large minimum weight to be allowed and the larger actual weight per car of complainants’ shipments.” The minimum weight of 24,000 lbs. per carload of unfinished furniture is not only greater than that fixed for cheap bedroom sets completed but also than that on nine tenths or a greater proportion of the articles covered by the Transcontinental Association tariffs.

As appears from the table of rates heretofore given, the defendants for a number of years prior to Sept. 21, 1891, maintained rates on unfinished furniture fifty per cent or more lower, on an average, than the rates on finished furniture, and they still keep up this disparity in rates as between all unfinished and finished furniture except the unfinished and finished cheap bedroom sets specified in the items of their tariff which we have quoted. No just reason has been shown, for making the latter an exception to the general rule. The evidence tends to show that the railroad authorities concede that in the nature of things a lower rate should be placed on unfinished than on finished furniture. The object of the roads in giving unfinished and finished cheap bedroom sets the same rate, appears to have been, as stated by the General Manager of the Atlantic & Pacific Fast Freight Line, “to shut up the local factories on the Pacific coast, that were making this class of cheap stock and especially pine sets” and thus “give extra traffic” to the defendants.

Under the item in relation to “unfinished furniture,” there is no limitation as to value or character of such furniture, except as to the kind of wood to be used in its manufacture. This authorizes the shipment at the \$1.80 rate of expensive as well as cheap unfinished furniture and of other unfinished furniture besides the bedroom sets. It is contended in behalf of the defendants, that this is sufficient “to divest the tariff of anything like discrimination”—in other words, that the benefit to be derived from the low rate on the costly unfinished goods compensates or is an offset for any injury or disadvantage which may result to the traffic in unfinished material for cheap bedroom sets from giving those sets the same rate as such finished material. This position is not sustainable on principle. A rate on a particular class of goods which is unreasonable or discriminatory in itself, cannot be justified on the ground that the same rate is given another

class of goods and as so applied is liberal and advantageous. The benefit to the one is no proper offset for the injury done the other. If a party were engaged in shipping both classes of traffic, the question whether or not the average result would be advantageous to him, would depend upon the quantities shipped of each. In the present case, it appears that the bulk of the complainant’s shipments consists of the unfinished cheap bedroom sets. Moreover to sustain the application of the same rate to two articles of widely divergent values and tonnage per car on the ground of reasonable “general average,” is to imply that it is too low on one and exorbitant on the other.

Conclusions.

The action of the roads in reducing the rate on the finished cheap bedroom sets specified in their tariff, below that on greatly more valuable finished furniture was, in our opinion, correct, and must be sustained. The same reason, however, that justified this action in reference to the two classes of finished furniture would seem to apply to them in their unfinished condition. We can, furthermore, find no ground for making the unfinished cheap bedroom sets an exception to the general rule recognized by the defendants that unfinished furniture should have a lower rate than the finished of the same grade. Our conclusion is, that the cheap bedroom sets described in the tariff when transported in an unfinished condition as shipped by the complainant, should have a lower rate than such sets when finished, and, also, than the more costly unfinished furniture. The question is, how much lower or what proportion should the rate on unfinished cheap sets bear to that on the finished. As before stated, the complaint is not that the existing rate is unreasonable in itself, but that the same rate is given the two classes of freight. It appears from the statement of rates furnished by complainant that for the four years preceding Sept. 21, 1891, the rates on shipments of unfinished furniture from complainant’s factory at Lansing varied from \$1.02 to \$1.85 per hundred pounds. During the last three years of that period, the average was over \$1.22 per hundred pounds. It must be borne in mind, however, that these rates applied to expensive as well as cheap unfinished furniture and must have been fixed with regard to that fact. If they had covered cheap furniture alone, it is reasonable to suppose they would have been less. Taking into consideration the difference in value of the unfinished and finished furniture involved in this inquiry and the greater tonnage per carload which can be hauled of the former, and having in view the

interest of the carrier as well as the shipper, our opinion is that the rate on cheap unfinished bedroom sets should not exceed 85 per cent of the rate on such sets in a finished condition. While the rate on finished sets remains as at present \$1.80, this will give a rate within a fraction of \$1.10 on the unfinished sets.

Our attention is called by the defendants to the fact, that the freight on the shipments of complainant, The Potter Manufacturing Co., from Lansing to Oakland is paid by the consignee, The Michigan Furniture Co. Whether freight is paid by the shipper or consignee, it is equally a charge on the commodity in the hands of the shipper, and if excessive, or discriminatory, or otherwise in violation of law, may be made the subject of complaint before this Commission on the part of the shipper as a party in interest. Moreover, the two corporations, while distinct in law, are substantially under the same ownership and are operated in unison, the one as supplementary of the other. No order of reparation, however, will be granted in this case as asked for in the complaint, requiring repayment to complainant of the difference between the rate complained of and that determined by us to be reasonable.

The complainant further asks in the brief filed in its behalf for "an adjudication that freight charges upon complainant's goods may be based upon weights at the point of shipment, as per original bill of lading, and that all sums heretofore collected on said goods in excess thereof were unlawfully taken and shall be repaid to the Michigan Furniture Co. who paid the same." It appears that the weights of complainant's carloads as taken at Oakland, the point of delivery, and on which the freight charges are based, are greater than the weights given at Lansing, the point of shipment. It is not shown by whom or how the weights are determined at either point and there is nothing in the record to indicate which set of weights

is correct. There is no proof, therefore, of an overcharge by means of false weights upon which we can act, and nothing upon which to base "an adjudication that freight charges upon complainant's shipments must be based upon weights at point of shipment." If the weights at point of shipment are furnished by the shipper, the roads would have the right to verify them by reweighing and if found to be incorrect, to charge and collect freight on the true weight. The question is one of fact to be determined in a manner just to both parties and as to which the *ex parte* action of either cannot conclude the other.

It is also made a ground of complaint that complainant's shipments are carried by Emory, where the factory of the Michigan Furniture Company is located, about a mile to the 16th St. Station, Oakland, and is brought back from that station to Emory at a charge of 25 cents per ton. The complainant alleges that Emory is a regular station of the Southern Pacific Co., but the weight of the evidence is that it is not a station at which transcontinental freight is delivered. It further appears that the factory of the Michigan Furniture Co. is not located on the main line at Emory but on a local track, and that complainant's carloads are hauled from the regular station in Oakland over this local track to Emory by switch engines and that the charge for this service is reasonable.

Our order is, that the rate on cheap unfinished bedroom sets, such as are described in the item of the tariff under consideration, shall not exceed from Michigan points to California points 85 per cent of whatever rate may be fixed for such sets in a completed condition and that the defendants forthwith cease and desist from charging or collecting a higher rate on the former than that above indicated and also make such alterations in their tariff of rates as will bring it into conformity with the conclusions herein arrived at.

[No. 329.]

1. When a local rate from a given point is alleged unreasonable, but it appears from the record that such local rate is also a proportion of through rates from that point, and as such is the real subject of controversy, the complaint should be directed against the aggregate through rate, not the share received by any initial carrier, and all the carriers composing the through line are necessary parties.
2. A town favorably situated with respect to one through route, but competing in a common market with another town more favorably located on another through route, should not have a reduction of the local rate over roads connecting the two through routes for the purpose of overcoming the natural advantage which the latter competing town enjoys.
3. A milling town possessing great natural, acquired and improved advantages for the carrying on of that industry, and favorably situate in point of distance to a large grain producing region, is entitled to the benefits arising from its location, and carriers of grain to that point and to a competing town considerably more remote from points of production, and in other particulars less advantageously located, are not justified in making rates on grain to the competing towns which destroy the advantage the former is entitled to enjoy.
4. Rates on wheat from points in North and South Dakota to Minneapolis as compared with the rates charged over considerably greater distances from the same points to Duluth and adjacent Lake Superior ports subject Minneapolis millers to undue and unreasonable prejudice and disadvantage. Defendants ordered to adjust their rates on wheat from said points to Minneapolis and Duluth upon the basis of distance over nearest practicable routes.

Complaint filed February 3, 1892.—Joint answer filed March 19, 1892.—Amendments to complaint allowed March 24, to May 14, 1892.—Answer to amended complaint filed April 15, 1892.—Petitions for leave to intervene filed and allowed April 19 to June 21, 1892.—Hearing at Minneapolis, Minnesota, May 25-27, 1892.—Hearing at Washington, D. C., July 7-9, 1892.—Briefs filed August 12, to September 12, 1892. Decided January 3, 1893.

RELATIVE rates on wheat; local rate as part of through rate on flour.

S. A. Thompson for Duluth Chamber of Commerce.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner:

The petition in this proceeding states that complainant is a corporation created and existing under and by virtue of the laws of the state of Minnesota, and that a main purpose of its organization is to advance the general prosperity and business interests of the city of Minneapolis. The other important allegations in the petition are as follows:

That the Great Northern Railway Company is a common carrier by railroad between points in North and South Dakota and Minnesota, to and from Minneapolis, Minnesota, and to and from Duluth, Minnesota, and to and from West Superior, Wisconsin, over its own line. Substantially the same allegation is made with reference to the other defendants, except the St. Paul & Duluth Railroad Company, which is stated to be a common carrier over its own line of railroad between Minneapolis and Duluth, Minnesota, and West Superior, Wisconsin.

That each and all of the defendants are engaged in the transportation of wheat and flour over their own separate lines, or in combination with the lines of each other under a common control, management or arrangement, by continuous all-rail carriage from common points, or from a common belt of wheat producing territory, situate and lying southwest, west and northwest of the state of Minnesota, and in the western part of the state of Minnesota, to Minneapolis, Minnesota, or through or around Minneapolis to Duluth and other Lake Superior ports in the states of Minnesota and of Wisconsin, and thence to eastern points in combination with various eastern rail and vessel lines, and therefore subject to the Act to Regulate Commerce.

That the rates established and charged by defendants for the transportation of wheat from competitive and intermediate points in North and South Dakota and Minnesota to Minneapolis are unreasonable and unjust.

That by said rates as compared with rates charged by defendants from the same points to Duluth and other Lake Superior ports,

Minneapolis is unjustly discriminated against and subjected to undue and unreasonable prejudice and disadvantage, and undue and unreasonable preference and advantage is given to said Lake Superior ports.

That the rate on flour from Minneapolis to Duluth which defendants, the Great Northern, Northern Pacific, St. Paul and Duluth, and Chicago, St. Paul, Minneapolis & Omaha, have increased from five to seven and a half cents per hundred pounds is unjust and unreasonable as against Minneapolis, and in connection with the wheat rates aforesaid, subject Minneapolis to further undue and unreasonable prejudice and disadvantage. That this rate of seven and a half cents on flour from Minneapolis to Duluth, while rates on wheat are, from a large section of country, the same to both of those points, imposes upon Minneapolis flour a cost of fifteen cents for each barrel when put upon Lake Superior shipboard over and above the cost of transportation involved in the manufacture of flour at Duluth or the other Lake Superior points; and that the effect thereof is to make milling at Minneapolis unprofitable.

That the Great Northern, the Northern Pacific, the Omaha, and Duluth companies now own and control wharves, docks, elevators, lands and other facilities at Duluth and other Lake Superior ports, and are also by ownership or control or by traffic arrangements with lines of boats reaching eastern markets *via* the lakes, largely interested in developing the traffic to and from such lake ports; and that this increase in the flour rate is intended to foster and build up their interests in manifest disregard of the interests of Minneapolis.

The complainant prays that defendants be ordered to cease and desist from charging more for the transportation of wheat to Minneapolis than 75 per cent of the rate charged by them for carrying said commodity from the same points to Duluth and other adjacent Lake Superior ports, and from charging more for the transportation of flour from Minneapolis to Duluth and said other ports than 34 cents

per hundred pounds; or that said defendants be ordered to so adjust their charges that the rate on wheat from points of shipment to Minneapolis added to the rate on flour from Minneapolis to Duluth and said other ports shall not exceed the rate charged by them for carrying wheat from the same points of shipment to Duluth and the other lake ports aforesaid.

For convenience, the defendant carriers will hereinafter be called by the following titles: Great Northern—for the railway company of that name; St. Paul—for the Chicago, Milwaukee & St. Paul Railway Company; Northern Pacific—for the railroad company of that name; Northwestern—for the Chicago & Northwestern Railway Company; Omaha—for the Chicago, St. Paul, Minneapolis & Omaha Railway Company; "Soo"—for the Minneapolis, St. Paul & Sault Ste. Marie Railway Company; Duluth—for the St. Paul & Duluth Railroad Company; Eastern of Minnesota—for the Eastern Railway Company of Minnesota.

The Great Northern, the Northern Pacific, the St. Paul, the Northwestern, the Omaha and the "Soo" companies, filed a joint answer to the petition in which they state:—

That the Great Northern road in the direction of Lake Superior points terminates at Hinckley in Minnesota, and there connects with the Eastern of Minnesota, a line which extends from Hinckley into Superior and Duluth.

That the St. Paul does not own or control a line extending to Lake Superior points, but that it and the Northwestern reach Lake Superior points by connecting lines.

That the Duluth road does not extend east of St. Paul or west of Minneapolis, and its line between St. Paul, Minneapolis and Duluth is wholly within the state of Minnesota.

They deny that the rates demanded and collected for traffic named in the petition are unreasonable or unjust, or that they unlawfully discriminate against the wheat or milling or any industries of Minneapolis, or occasion undue preference to lake traffic under similar conditions and circumstances at Lake Superior points, and allege that rates for the carriage of wheat to Minneapolis have never been lower, at least relatively lower, than at the present time, and that for years past the rates have been relatively the same from North and South Dakota to Minneapolis and Lake Superior as at present. They also deny that the wheat, milling or business interests in Minneapolis have been injuriously affected in any way by the maintenance of existing rates.

The Omaha, Duluth, Northern Pacific and Great Northern Companies admit that they have an interest in docks and transfer facilities at Lake Superior points; but deny that they or either of them have made and maintained

rates with a view of building up the interests of Lake Superior points at the expense of Minneapolis.

They admit that the rate on flour of five cents per hundred pounds was for a time maintained, but allege that it was unreasonably low and the result of unfair competition, and deny that the rate of seven and a half cents per hundred now charged on flour from Minneapolis to Lake Superior points is unreasonable.

The joint answer states that the distances from Minneapolis to Duluth are, *via* the line of the Great Northern, 187 miles; *via* the Duluth, 158 miles; *via* the Omaha, 188 miles; and *via* the Northern Pacific, 287 miles. That the rate from Minneapolis to Duluth, though it is named as a local rate, is in fact part of a through rate on shipments destined to points east of Buffalo or to points on the seaboard. That the reduction of the rate on flour from Minneapolis to Lake Superior points while apparently a reduction of a local rate, would be in fact a reduction made for the purpose of affecting the through rate from Minneapolis to eastern points, and the practical effect of such reduction would be to fix only the proportion between Minneapolis and Lake Superior points of the through rate to New England points, Canadian points and the Atlantic seaboard.

The St. Paul Company and the Northwestern Company allege in the joint answer that along their lines between Minneapolis and Lake Michigan points there are flouring mills, which, in the aggregate, produce a quantity equal to if not in excess of the entire product of Minneapolis, and which find their principal markets at eastern points or on the seaboard. That the rates from Minnesota and North and South Dakota for the carriage of wheat to Minneapolis and Duluth are adjusted with reference to through rates to such eastern and seaboard points from Minnesota, and territory west of the Mississippi river. That the reduction of the rate on flour from Minneapolis to Lake Superior points would necessitate a corresponding reduction of the rate from mills and points where flour is produced along the lines of the respondents last named and be injurious to such respondents, as rates now in force are so low as to be barely remunerative. That if present rates *via* Lake Michigan from other points to the seaboard should be maintained while the reduction asked by complainants is granted, milling interests at those points would suffer and in many instances be destroyed.

On the 24th of March, 1893, the complainant asked and obtained leave to amend the petition by adding the Eastern of Minnesota Company as a party respondent, and on the 14th of May, 1893, the petition was further amended by designating the Duluth Company, already a defendant to the proceeding, as "The St. Paul & Duluth Railroad Company,

individually and as lessee of the Duluth Short Line Railway."

The Eastern of Minnesota answered that it is organized as a railway corporation under the laws of the state of Minnesota, and has a line extending from a connection with the Great Northern at Hinckley in the state of Minnesota to West Superior in the state of Wisconsin, at which point it has a number of tracks and convenient terminal facilities. That from West Superior its trains run into Duluth in the state of Minnesota, over the tracks of other railroad companies to stations and yard tracks owned by it in Duluth. That it has a contract right to and does run its trains from St. Paul over the tracks of the Great Northern Railroad Company to Hinckley. That it runs through freight and passenger trains from St. Paul to West Superior and Duluth, and its rates and charges are in all respects just and reasonable. For further answer it adopts the joint answer filed by its co respondents.

Various parties have been allowed to intervene, namely, the Chamber of Commerce of Milwaukee; the Jobbers Union of Duluth; the Chamber of Commerce of Duluth; the Board of Trade of Duluth; the Eastern Minnesota Millers Association representing mill owners at Winona, Wabasha, Red Wing, Hastings, La Crosse, Hokah, Houston, Minnesota City, Dundas, Northfield, Faribault, Owatonna, and Lanesboro; the Wisconsin Milling Companies at Centralia, Watertown, Wassau, Berlin, Fond du Lac, Janesville, and Stoughton, Wisconsin; also the Southern Millers Association of Minnesota.

They claim that to give Minneapolis millers the rate of flour asked (8½ cents per hundred pounds) would seriously cripple them in the prosecution of their business, discriminate against them in favor of Minneapolis, and subject them to undue disadvantage in the markets, unless a corresponding reduction in rates should be granted to them on lines over which they ship their flour.

With reference to Milwaukee and points not directly connected with the Duluth and Lake Superior route, it was claimed that the relative rates, adjusted after long discussion between Lake Superior and Lake Michigan routes, were now so arranged as to give the above named milling interests a very narrow margin of profit, and if Minneapolis secured the rate sought on flour from that city to Duluth, it would in effect drive them out of the market, unless accompanied by corresponding rate reductions on flour to Chicago and the seaboard from points on the lines leading to Lake Michigan; and that present rates on flour from Minneapolis to Duluth and Lake Superior points are fair and reasonable and in proportion to other rates. It was further claimed

that the prevailing rate on flour from Duluth to the seaboard being (at the time the answers were filed) 17½ cents per hundred pounds, the reduction asked would give Minneapolis a rate of 21½ cents per hundred pounds by that route; whereas the rate on flour from Minneapolis to Chicago being (at that time) ten cents, and from Chicago to the seaboard 15 cents per hundred pounds, the prevailing through rate on flour to the seaboard *via* Chicago was 25 cents per hundred pounds. The disadvantage of four cents on the hundred pounds or eight cents on the barrel of flour would, it was claimed, injure intervenors seriously, as ten cents per barrel is an unusually large profit upon the barrel of flour produced.

The Duluth Association says that local shipments of wheat from Minneapolis to Duluth are mixed and inferior grades, not used in milling, and of no benefit to the mills of Duluth; that Minneapolis is 160 miles farther from the seacoast than Duluth; that Minneapolis mills are unduly capitalized, are older and less thoroughly modern in equipment, are compelled to incur double cost for both steam and water equipment, and therefore are at a disadvantage as compared with Duluth mills.

As stated above the complaint in this case is three fold: 1. That wheat rates to Minneapolis are unreasonable and unjust. 2. That said rates as compared with rates from the same points to Duluth and other Lake Superior ports, subject Minneapolis to undue and unreasonable prejudice and disadvantage, and give undue and unreasonable preference and advantage to said lake ports. 3. That the rate on flour from Minneapolis to Duluth is unreasonable and unjust to Minneapolis, and in connection with the wheat rates aforesaid, subjects Minneapolis to further undue and unreasonable prejudice and disadvantage.

The specific grievance, as developed, is that the millers at Minneapolis are required to pay the same for the transportation of wheat from a large territory in North and South Dakota and Minnesota to Minneapolis as the millers at Duluth and other Lake Superior points are required to pay from the same territory to those places, although Minneapolis is considerably nearer that territory than Duluth and other Lake Superior points; that Minneapolis millers in order to get their product to Duluth and other Lake Superior points from which it goes east by water, have to pay a large additional charge for transportation; and that to the extent of this additional charge the Minneapolis millers are handicapped in competition with millers at Duluth and other Lake Superior points in the eastern and export markets.

There is no evidence to show that there are milling interests at any Lake Superior point, except Duluth, which, by reason of the existing adjustment of railway charges, enjoys an

advantage over Minneapolis millers injuriously affecting the interests of the latter. It appears that there is a mill at Superior, but its capacity is not given, and it seems to have been mentioned as showing that Minneapolis is menaced, though it may not yet be actually injured, by the competition of mills other than those at Duluth. The question of the flour rate from Minneapolis is therefore principally important in connection with the transportation of that product to Duluth.

Duluth and Minneapolis are both in the state of Minnesota. There are three rail routes connecting these cities; one of them, the Duluth road, is entirely in the state of Minnesota and the others, the Omaha road, and the Great Northern in connection with the Eastern of Minnesota, are partly in the state of Wisconsin.

The decision of the Supreme Court of the United States in the case of *Lehigh Valley R. Co. v. Pennsylvania*, 145 U. S. 192, 36 L. ed. 672, 4 Inters. Com. Rep. 87, seems to be to the effect that railway traffic beginning and ending in the same state is not under the authority of the Federal government, even though in the course of transportation it passes through another state. Where the entire transit is within the limits of a single state Federal regulation is excluded by the provisions of the Act to Regulate Commerce. The termination of the shipment from a point in a state at another point within the same state without the contemplation of any further movement seems, under that decision, to stamp and characterize the movement as purely state as distinguished from interstate commerce.

If, then, the transportation of flour from Minneapolis to Duluth be considered as local business, it is contended that the Commission has no jurisdiction over it. But without passing upon this question, for the reason that in the view taken of the case its determination is unnecessary, we remark that the testimony of the witnesses, the arguments of counsel, and the whole record, show that the attack upon the rate of seven and a half cents per hundred pounds on flour from Minneapolis to Duluth and adjacent ports is made on the ground that it is a part of the through rate on flour to the seaboard and interstate rates to intermediate points, yet necessary parties are absent from the complaint; moreover its justice and reasonableness could not be considered except by an investigation of the entire through rate.

The case has not been prepared and presented by the complainant in such manner as to enable the Commission to determine this question. We desire to say, however, in regard to the flour rate between Minneapolis and Duluth, that it is apparent that Duluth has some natural advantages over Minneapolis

with reference to the seaboard and export trade. Among these are shorter distance from the seaports and its location at the head or beginning of a water way. On the other hand, Minneapolis is considerably south of the line passing through the country east and west *via* Duluth to the seaboard, and the expense of transportation to Duluth necessarily represents largely the cost of carriage or portage from a location naturally on the Lake Michigan route across to the Lake Superior route to the seaboard. This additional expense Minneapolis should always be willing to pay. Such evidence as the record contains indicates that in adjusting the rates to the seaboard from the northern and western wheat region Chicago and Duluth have been the points of comparison, the one a Lake Michigan and the other a Lake Superior point; and treating the question as one of through rates to the seaboard, it is made quite plain that any reduction of the rate on flour between Minneapolis and Duluth would, if seaboard rates are now relatively adjusted in proper proportion, be accompanied by similar reductions on the Chicago or Lake Michigan route. On the other hand, Minneapolis has natural advantages to which she is entitled, namely, nearness to the wheat fields and a large outgoing or westward moving business which must entitle her to some advantage over Duluth in these particulars.

That portion of the complaint in this case which relates to the flour rate from Minneapolis to Duluth and adjacent ports having thus been disposed of, we have next to consider the railroad rates for the transportation of wheat to Duluth and Minneapolis, respectively, from points west of those cities; and in this connection careful consideration must be given to the probable effect of any change in the present adjustment of those rates upon business dependent on interstate rates from points in the Dakotas, Minnesota, Iowa and Wisconsin to Milwaukee and Chicago.

In considering the rates to Duluth and Minneapolis the field of inquiry and the jurisdiction of the Commission is further limited to territory outside the state of Minnesota. Both these cities being in that state the Commission has no authority over rates from any Minnesota point to either of them, if the shipment terminated and was intended to terminate at either point. The evidence does not enable us to determine whether any and, if so, what portion of the wheat shipped from points in Minnesota west of Minneapolis and Duluth is destined in its movement to points outside the state, but the scope of the arguments upon the record, and the record itself, favor the conclusion that a very large portion of it at least, is consigned and destined to Minneapolis or Du-

luth for manufacture into flour, thus being presumably a local shipment and the rate a domestic rate.

The inquiry is then, in fact, practically limited both by the complaint and the testimony to rates from points in North Dakota and in South Dakota to Minneapolis and Duluth, and to the effect of a change in those rates upon interstate transportation of wheat and flour to Lake Michigan ports.

A vast amount of testimony has been submitted in this case. Much of it relates to the reasonableness of the rate on flour from Minneapolis to Duluth, and this for reasons above given may be left out of consideration.

An immense mass of figures and statements has also been submitted, giving not only the distances and the rates on wheat by various routes and from various places to Minneapolis and Duluth, but also in great detail, (though with considerable conflict between complainant's and defendants' testimony) the average receipts and the average cost per ton per mile on all freight and on wheat over the lines of the defendants, and over lines elsewhere.

In the view we take of the case, it is not necessary to consider all these details; to do so it is believed would only tend to confusion.

A few prominent facts stand out in the record, or may be clearly deduced therefrom, which in our judgment afford a solution of the questions involved; and their significance is not materially affected, one way or the other, by the incidental mass of details from which the respective disputants seek to draw variant conclusions.

These leading facts, a proper understanding of which will be assisted by reference to the accompanying map, are as follows:

The line between the two Dakotas and Minnesota, to points west of which the inquiry is confined, coming southward from the national boundary line, passes just east of Grand Forks, Fargo and Wahpeton, and a few miles east of Fairmount—all in North Dakota. Then deflecting, first westward and then eastward, it passes just west of Brown's Valley and Ortonville, both in Minnesota. And from Ortonville, or a point a little west thereof, it runs due south, passing not many miles east of Sioux Falls, South Dakota.

The following table shows the distances and routes to Minneapolis and Duluth, respectively, from some of the principal points in the two Dakotas which have the same rates to either place:

Fargo <i>via</i> Northern Pacific to Duluth, 257 miles, <i>via</i> Great Northern to Minneapolis, 281 miles.	
Casselton " " " 277 "	" " " 259 "
Wahpeton " " " 227 "	" " " 208 "
Davenport " " " 276 "	" " " 243 "
Edgley " " " 366 "	N. P. & Soo " 305 "
Ellendale G. N. " 361 "	G. N. " 290 "
Boynton S. & G. N. " 368 "	Soo " 288 "
La Moure N. P. " 345 "	N. P. & Soo " 284 "
Oakes S. & G. N. " 339 "	Soo " 264 "
Oakes N. P. " 355 "	" " 264 "
Aberdeen G. N. " 376 "	C. M. & St. P. " 288 "
Redfield C. & N. W. & G. N. " 386 "	C. & N. W. & G. N. " 295 "
Doland " " " 365 "	" " " 264 "
Elrod " " " 359 "	" " " 288 "
Hankinson G. N. " 281 "	Soo " 206 "
Rutland G. N. " 312 "	G. N. & Soo " 236 "
Andover { C. M. & St. P. & G. N. (about) " 365 "	C. M. & St. P. " 259 "

Fargo and Casselton are points of junction of the Northern Pacific main line with the Great Northern, and Wahpeton is a junction point of the Milnor branch of the Northern Pacific with the Great Northern. These junction points and all points west of them on the main line and the Milnor branch of the Northern Pacific, are nearer to Duluth over that road than over the Great Northern or any other line, by 40 or 45 miles, and it seems proper, therefore, that the rates to Duluth should in all cases be fixed by the Northern Pacific. On the other hand, the distance from Fargo and Casselton and all points north and west thereof is less *via* the Great Northern to Minneapolis than *via* the Northern Pacific to Duluth by about 20 miles, or from 7 to 8 per cent of the 4 INTER S.

distance *via* the Northern Pacific (the shortest line) to Duluth. So Wahpeton and points west thereof, as far as Milnor and north as far as the main line of the Northern Pacific, are nearer *via* the Great Northern to Minneapolis, than *via* the Northern Pacific to Duluth by about 28 miles, or about 10 per cent of the distance *via* the Northern Pacific (the shortest line) to Duluth.

Hankinson, Rutland, Ellendale, Boynton and Oakes are about 75 miles nearer to Minneapolis than to Duluth by the shortest practicable routes, there being about 20 to 23 per cent difference in favor of Minneapolis. By the route actually taken from Boynton and Oakes the difference is much greater in favor of Minneapolis.

Aberdeen is about 88.5 miles nearer to Minneapolis than to Duluth by the shortest routes, or nearly 25 per cent in favor of Minneapolis.

Andover is about 106 miles nearer to Minneapolis than to Duluth by the nearest practicable route, or about 80 per cent in favor of Minneapolis. By the routes actually taken from Andover the difference is greater in favor of Minneapolis.

Redfield, Doland and Elrod are about 101 miles nearer to Minneapolis than to Duluth by the shortest practicable routes, or about 27 per cent in favor of Minneapolis. By the routes actually taken from Redfield, Doland and Elrod, the difference in favor of Minneapolis is greater than this.

From Huron, Watertown, Sioux Falls and other points in South Dakota, Minneapolis has rates on wheat less than the rates to Duluth by from 2 to 5 cents per hundred, but complainant contends that this differential is not sufficiently great. The difference in distances from these points to Duluth and to Minneapolis is on an average about 25 per cent in favor of Minneapolis by the nearest practicable routes, and is more than this by the routes actually used from most of these points.

Edgley, the terminus of one of the Northern Pacific branch lines, is very near to Boynton on the "Soo," though these lines do not actually intersect at either place. Oakes, the terminus of another Northern Pacific branch line, is also on the "Soo," and La Moure at the intersection of the Oakes and Edgley branches is only some 20 miles from Oakes and the same distance from Edgley. So that wheat might be routed from either Edgley or La Moure over the Northern Pacific to Oakes and thence over the "Soo" to Minneapolis; and the distance from either place by this route to Minneapolis would be less by more than 60 miles than the distance *via* the Northern Pacific to Duluth. Treating Edgley and Boynton as practically one place, as for the purposes of rate making they are, Edgley is nearer by 60 miles to Minneapolis over the "Soo" than it is to Duluth over the Northern Pacific. And from Oakes, which is a point of actual intersection, the distance is less by about 90 miles to Minneapolis over the "Soo" than it is to Duluth over the Northern Pacific. Edgley, Oakes and La Moure are then on an average nearer to Minneapolis than to Duluth over the nearest practicable routes by about 70 miles, or 20 per cent of the distance to Duluth, over the Northern Pacific.

Jamestown is about the same distance from Minneapolis by the line of the Northern Pacific alone, or by the lines of the Northern Pacific and the "Soo" *via* Oakes, as it is from Duluth *via* the Northern Pacific.

Davenport, the point of intersection of the Edgley branch of the Northern Pacific with
4 INTER S.

the Great Northern, is about 38 miles nearer to Minneapolis by the Great Northern than to Duluth by the Northern Pacific, and this is about 12 per cent of the distance to Duluth.

Where reference is made in this statement to the "nearest practicable routes" it is meant that the initial road connects at some point between the point of origin of the freight and its final destination, with some other road over which the shipment might be made, though in fact it may actually go by a longer route. Thus from Boynton and Oakes, the actual routing of wheat consigned to Duluth is over the "Soo" road to Minneapolis and thence by another road to Duluth. But the same shipment might be transferred from the "Soo" to the Great Northern at Hankinson, and go *via* the last named road through St. Cloud to Duluth, thus saving a very considerable distance in the haul. So from Andover to Duluth the actual routing is probably by the St. Paul road to Minneapolis and thence by the Duluth road to Duluth. But the routing might be northward over a branch of the St. Paul road to its intersection with the Great Northern and thence over the last named line *via* St. Cloud to Duluth, thus effecting a considerable saving in distance. From Redfield, Doland and Elrod, while the actual routing is probably over either the St. Paul, or the Northwestern, through Minneapolis and thence to Duluth, a great saving in distance might be gained by routing over the Northwestern to Watertown, and then over the Great Northern *via* St. Cloud to Duluth.

The difference in distance from most of these places to Minneapolis and to Duluth respectively, is much more by the routes actually taken, than by the nearest practicable routes. Therefore no injustice can be done either the carriers or the commercial interests of Duluth, by taking the nearest practicable routes as a basis of comparison of railroad rates to the two cities.

The railroads which serve this territory in the two Dakotas and transport their wheat product to Minneapolis and Duluth are,

1st. The Northern Pacific, the main line of which from Fargo extends westward through Casselton and Jamestown, and a branch of which extends southwestward through Davenport and La Moure to Edgley, with another branch from Carrington, a point north of the main line running southeasterly through Jamestown and La Moure to Oakes. Another branch of the Northern Pacific leaving the main line at Wadena passes westerly through Wahpeton to Milnor. All points on the main line and the above mentioned branches of the Northern Pacific are practically the same distance from Minneapolis as from Duluth *by the Northern Pacific road*.

Staples is the point of divergence on that road of freight consigned to Minneapolis from that consigned to Duluth.

2d. The Great Northern, the northwestern branches of which intersect the main line of the Northern Pacific at Fargo and Casselton, and intersect the Edgley and Milnor branches of the Northern Pacific at Davenport and Wahpeton respectively. The Great Northern also has a line extending from Ellendale eastward through Rutland and Hankinson, the last named place being a point of junction with the "Soo" road; and it has a branch running southwesterly from Rutland to Aberdeen. Other branches of the Great Northern extend northwestward from Sioux Falls and from Huron through Watertown.

3d. The St. Paul Company, which has a direct line from Aberdeen eastward through Andover, Milbank and Ortonville to Minneapolis, with a branch northward from Aberdeen through Ellendale to Edgley; a branch south from Aberdeen to Redfield; a branch northward from Andover to Harlem, intersecting the Great Northern and the "Soo" roads; a branch southward from Andover through Elrod, intersecting the Northwestern and the Great Northern; a branch from Sisseton to Milbank; and a branch southward from Fargo, through Wahpeton and Fairmount to Ortonville.

4th. The "Soo" line, extending eastward from Boynton through Oakes and Rutland.

5th. The Northwestern, which extends eastward from Redfield through Doland, Elrod and Watertown to a connection with the Omaha road, by which it reaches Minneapolis and Duluth. The Northwestern has a branch extending northward from Redfield through Aberdeen to Oakes, intersecting the St. Paul, the Great Northern and the "Soo." It has another branch extending northward from Doland to Groton a point on the St. Paul road between Aberdeen and Andover.

6th. The Omaha road, which extends from Sioux Falls northeastward to Minneapolis and Duluth.

The Northern Pacific and the Omaha reach both Minneapolis and Duluth with their own lines.

The Great Northern reaches Minneapolis with its own line, but going to Duluth it uses the line of the Eastern of Minnesota from Hinckley to Duluth.

The "Soo" and the St. Paul reach Minneapolis with their own lines, but to reach Duluth they have to use other lines connecting those cities.

The Northwestern road reaches neither Minneapolis or Duluth with its own line, but uses the Omaha from St. Peter to both places.

The lines connecting Minneapolis & Duluth are, first the Duluth, second the Omaha, and 4 INTER 8.

third the Great Northern and Eastern of Minnesota, working jointly by way of Milaca and Hinckley. The Northern Pacific line between Minneapolis and Duluth is too circuitous for practical use, compared with the others.

Upon the theory that the shortest line should make the rate, and that there should be a differential in favor of Minneapolis, proportioned to its shorter distance, the rate to Minneapolis over the Great Northern and the St. Paul roads from points of intersection with the main line of the Northern Pacific, and points north thereof should be from 7 to 8 per cent less than the rates to Duluth; or 15 cents to Minneapolis while the rate to Duluth is 16 cents; and the rate to Minneapolis over the Great Northern and the St. Paul from their point of intersection at Wahpeton, and points north thereof as far as the main line of the Northern Pacific, should be about 10 per cent less than the rates to Duluth, or 14½ cents to Minneapolis while it is 16 cents to Duluth.

On the same theory, Edgley, Boynton, Oakes and Ellendale, and points on the Northern Pacific, the "Soo" and the Great Northern lines in the vicinity of those places, should have a rate to Minneapolis about 20 per cent less than the rate to Duluth, or 16 cents to Minneapolis while the rate to Duluth is 20 cents. From Rutland and points east thereof on the Great Northern, and from stations on the "Soo" immediately north, the rates, if adjusted upon the difference in distance to Minneapolis and Duluth respectively, by the lines of the Great Northern and the "Soo," should be about 25 per cent less to Minneapolis than to Duluth. But this differential should be reduced by the consideration that the Milnor branch of the Northern Pacific runs nearly parallel to and at no great distance from the "Soo" and the Great Northern from Milnor eastward to the state line, and furnishes a route from the intervening territory to Duluth, considerably nearer than the route *via* the Great Northern to Duluth. Where the rate to Duluth is 19, 15 would be about right to Minneapolis from Rutland and the proportion of 16 to 14½ from Hankinson. On the same theory of proportioning rates according to distance by the nearest practicable routes, all points in the two Dakotas lying south of that branch of the Great Northern road which extends from Ellendale eastward through Rutland and Hankinson, should have a rate to Minneapolis less by from 25 to 33 per cent than the rate to Duluth.

In no case, upon this theory, should the differential in favor of Minneapolis from points in the Dakotas south of the said branch line be less than 5 cents per hundred while the rate to Duluth is as much as 20 cents per hundred from the same points.

Assuming that the rates to Duluth remain as

they were fixed from the various points which have been named above at the time of the hearing in this case, a re-adjustment of the rates to Minneapolis upon this theory would give rates to those two cities as follows:

Rates from.	To Duluth.	To Minneapolis.
Fargo,	16	15
Casselton,	17½	16½
Davenport,	17½	15½
Wahpeton,	16	14½
Milnor,	19	17
Hankinson,	16	14½
Rutland,	19	15
Harlem,	20	16
Edgley,		
La Moure,		
Boynnton,		
Oakes,		
Ellendale,	20	15
Aberdeen,		
Andover,		
Groton,		
Redfield,		
Doland,	20	20
Elrod,		
Woolsey,		
Huron,		
Lake Preston,		
Watertown,	Duluth 5 cents more than Minneapolis.	
Sisseton,		
Woonsocket,		
Vilas,		
Madison,		
Sioux Falls,	20	20
Jamestown,		

Since the hearing in this case, the rates from Fargo, Casselton, Davenport and Wahpeton, have been reduced to the extent of one-half a cent per hundred pounds. This is so slight a reduction, that upon the theory here advanced the differential in favor of Minneapolis should still be as above suggested. That is the rates to Duluth from the points above named being, respectively, 15½, 17, 17 and 16 cents per hundred pounds, the rates from the same points to Minneapolis should be respectively 14½, 16, 15 and 13 cents per hundred.

The rate on flour from Duluth or other lake Superior ports *via* lake to Buffalo and thence to New York varies from 17½ cents to 22½ cents per hundred during the season of open lake navigation. The rate on flour from Minneapolis to Duluth is 7½ cents per hundred; on wheat 5 cents per hundred. The rate on flour from Chicago, Milwaukee or other Lake Michigan ports *via* lake to Buffalo and thence to New York varies from 15 to 20 cents per hundred, being always 2½ cents less than the rate from Duluth. The rate on flour destined from Minneapolis *via* Lake Michigan ports by water to Buffalo and thence to points east is 10 cents per hundred from Minneapolis to such lake ports during the season of open navigation.

The rates on flour from Minneapolis to eastern and export markets are thus seen to be the same at any time during open navigation, by

way either of Duluth or of Milwaukee, Chicago, or other Lake Michigan ports; for example, Gladstone or Duluth millers, being on the lakes, have during open navigation the advantage of Minneapolis millers in rates to eastern and export markets to the extent of the railroad charge for transporting flour from Minneapolis to Duluth, which is 7½ cents per hundred or 15 cents per barrel. This advantage applies principally when flour is shipped by lake; that is, during about six months of the year. During closed navigation, when Duluth and Minneapolis send their flour east all-rail *via* Chicago, the rate to Chicago and thence east is the same from both places. But there is a route from Duluth *via* the Canadian Pacific over which the rate is 2 cents less than *via* Chicago. In using this Canadian Pacific route, Minneapolis, even during the season of closed navigation, still has the disadvantage of the 7½ cents per hundred as compared with Duluth. The bulk of the flour, however, goes during open navigation, taking the lake routes, and from Minneapolis goes *via* Duluth or Gladstone,—very little by Milwaukee and Chicago.

From Duluth to New York by lakes and Buffalo is 1414 miles, from Minneapolis to New York by Gladstone, lakes and Buffalo, the shortest lake route is 1478 miles.

The daily capacity of the Minneapolis mills is about 40,000 barrels; the average daily output is less than this by several thousand barrels. The daily capacity of the Duluth mills is about 6,000 barrels and is being rapidly increased. The annual aggregate output of the mills at other points on the St. Paul line alone is as much as the output of the Minneapolis mills. The Minneapolis millers have the advantage over those of Duluth in the matter of cost of power, water power being principally used at Minneapolis and steam exclusively at Duluth. Duluth has the advantage of Minneapolis in the lesser cost and capitalization of plant in proportion to production or capacity.

The rates from the wheat fields to Minneapolis are usually so adjusted that the wheat rate to Minneapolis plus the flour rate from Minneapolis to Lake Michigan ports, Chicago, Milwaukee, Gladstone, is the same as the wheat rate from the fields direct to those ports. From Minneapolis to those ports the flour rate is 10 cents per hundred. This is done apparently to keep Minneapolis on a parity with milling points on Lake Michigan of which Milwaukee is the chief.

Milling points in Central and Southern Minnesota and Wisconsin are kept on a parity with Minneapolis and Milwaukee by giving them the privilege of "milling in transit." That is, the millers at points intermediate between the wheat fields and Lake Michigan, on receipt of wheat at their mills pay the full rate through

to the lake, and are then allowed to forward the product (flour), to the lake without further charge.

While the millers of Minneapolis, Milwaukee and Central and Southern Minnesota and Wisconsin are thus on a parity as regards rates, Duluth has from a considerable territory much the advantage of any of them. This advantage is chiefly over Minneapolis, but it applies against Milwaukee and the country mills as well, in all cases where the wheat rates to Duluth are as low as to Minneapolis.

Minneapolis is a great wheat market as well as a great milling centre, and much of the wheat converted into flour by the Milwaukee and country millers is purchased by them in Minneapolis.

A reduction of the wheat rate to Minneapolis should, if the parity between millers at that city, Milwaukee and interior points is to be preserved, be followed by a corresponding reduction in the rate from the same points to Lake Michigan ports, and in the transit rate to interior mills.

The tonnage going west over the various defendant roads from Minneapolis is usually much greater in amount and also of a higher class, and will therefore bear a much higher freight charge, than that going west from Duluth. More back loading of wheat cars with profitable freight can be had from Minneapolis than from Duluth.

The St. Paul road pays the Duluth road for taking from Minneapolis to Duluth, wheat consigned over its line to Duluth about 4 to 5 cents per hundred. Similar payments are made by other roads reaching only to Minneapolis, but billing to Duluth. Before the Great Northern road was built there was no direct rate to Duluth. The charge to Duluth was simply that to Minneapolis with the local thence to Duluth added.

The general prosperity of Minneapolis is largely dependent on the prosperity of the milling interests of the city. The lumber and milling interests, both of which are very great are especially helpful to each other. Cars coming in from the west with wheat are largely loaded back with lumber, and the lumber is often paid for by elevator receipts for wheat, or drafts on millers who have purchased wheat. The general jobbing trade of the city, notably in the line of agricultural implements, is also largely influenced by the volume of the wheat and flour trade.

It can hardly be doubted, in view of the testimony, that under the present adjustment of rates on wheat the milling interests of Minneapolis, and with them its general prosperity, and possibly its population, must decline. So far as such a result would be attributable solely to the greater natural advantages of Duluth as a point for manufacture and ship-

ment of flour, nothing perhaps could properly be done to avert it. Duluth is nearer to the markets than Minneapolis, and to this extent its advantages can not and ought not to be denied or taken from it. But on the other hand Minneapolis is nearer to the wheat fields than Duluth and to this extent it is entitled to the advantage over Duluth which on that account should naturally belong to it. This natural advantage is denied to Minneapolis in the present adjustment of railroad rates, as between it and Duluth, from the wheat fields.

As a general proposition it is conceded that the shortest line should fix the rate, and several railway experts have testified in this case that the rates to Minneapolis and Duluth should be adjusted according to mileage, taking the shortest route to each place as the basis of comparison. As a general rule it is probably true that rates should not be proportioned strictly to mileage, the more distant point should usually have a greater actual rate, but a less proportionate or ton mile rate than the nearer point. This is due largely to the fact that the terminal expenses which do not vary with distance constitute a considerable part of the entire charge in either case and operate to reduce ton mile rates on the longer haul.

But this consideration in the present case seems to be fully balanced, perhaps more than balanced, by the fact that *back loading*, which is also a powerful element in the establishment of rates, is so much more certain, and the west bound traffic so much more profitable, from Minneapolis than from Duluth.

While it is true that from points on the main line and the Edgley and Milnor branches of Northern Pacific, Duluth and Minneapolis are equidistant by that line, yet these points are accessible to Minneapolis by routes composed in part of other roads which are decidedly shorter than the route *via* the Northern Pacific alone, and we are clearly of opinion that Minneapolis should have a differential in the wheat rate from the territory in dispute proportioned to its lesser distance as compared with the distance to Duluth by the nearest practicable routes in either case.

Should this principle be varied by the fact that from some points in this territory there is one road over the lines of which the distances to Duluth and Minneapolis are the same? It does not seem necessary to decide this question. Certainly that road (the Northern Pacific) could not be held to discriminate against Duluth, by charging a greater rate to it than to Minneapolis from points having a much shorter line to the latter place. The Northern Pacific can therefore meet the lower rate to Minneapolis, which the equities of the situation plainly demand of the other lines, without lowering its rates to Duluth.

One other step the Northern Pacific might

possibly take, and that is to bring down its rates to Duluth to the level of the reduced rates ordered over the other lines to Minneapolis. Should it do so the other lines would either immediately have to reduce their Minneapolis rates again, or go out of the Duluth business from points accessible to the Northern Pacific. They would probably adopt the former alternative and thus frustrate any advantage the Northern Pacific might seek to derive by inaugurating the original reduction to Duluth. The result of any such proceeding would manifestly be highly injurious to all the roads, and it can hardly be supposed that the Northern Pacific will undertake it. At all events, the anticipation of such a course on its part should not prevent an effort on the part of the Commission to abolish the discrimination which Minneapolis now suffers at the hands of other lines. It is believed that the readjustment of rates about to be ordered will still leave Duluth an advantage in rates over Minneapolis, considering the additional price the latter must pay to get its flour to Duluth, and from all points on and naturally tributary to the Northern Pacific and its branches, the advantage of Duluth will be very decided, securing apparently its full share of the business to the Northern Pacific. We are of opinion that

while the rates to Duluth remain as they now are, the rates *via* the St. Paul, the "Soo," the Great Northern, the Northwestern, and the Omaha roads should be adjusted as follows:

From and including Fargo, Casselton and Sidney and points north of them, the rates should be 1 cent per hundred less to Minneapolis than to Duluth. From and including Wahpeton and points north as far as the main line of the Northern Pacific and south to Fairmount the rates to Minneapolis should be 1½ cents per hundred less than to Duluth. From and including Fairmount and all points west thereof on the "Soo" and the Great Northern lines, including Harlem and Edgley, the differential in favor of Minneapolis should be not less than 2 cents, and as much more as may be necessary to reduce the maximum rate to Minneapolis from any point to 16 cents per hundred, and from Rutland and points east thereof to not exceeding 15 cents per 100. From all points in the two Dakotas south of lines extending eastward from Ellendale through Rutland, Hankinson and Fairmount (and east of the Fargo branch of the St. Paul road) there should be a differential in favor of Minneapolis at not less than 5 cents per hundred.

TEXAS SUPREME COURT.

MISSOURI PACIFIC R. CO., *Appt.*,

v.

SHERWOOD, THOMPSON & CO., for the Use of the Insurance Company of North America.

1. The burning of cotton while awaiting compression as provided by a bill of lading, in a compress not owned or operated by the carrier, is within a clause in the bill exempting the carrier from loss by fire while the property is on deposit in place of transshipment or depots or landings or at points of delivery.
2. A shipment is not within the provisions of a statute forbidding carriers within the state to limit their common-law liability where the contract provides for the carrying of the goods to a foreign port by means of the carrier's own line, its connecting lines in another state, and an ocean steamship company.

3. A statute forbidding common car-

NOTE.—Shipments within a state as part of interstate or foreign transportation.

The general doctrine that an agency in transportation which is entirely within the limits of a state may be regarded as engaged in interstate or foreign commerce has been long established. Thus a steamer running entirely within the limits of a state is an instrument of interstate commerce when engaged in receiving and transporting goods in the course of transportation from one state to another. The *Daniel Ball v. United States*, 77 U. S. 10 Wall. 557, 19 L. ed. 999.

So any railroad which forms a part of or constitutes a link in a through line extending into several states is engaged in interstate commerce so far as it transports goods bound from one state to another. *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114, 34 L. ed. 304.

And vessels engaged in towing or lightering in 4 INTER S.

aid of vessels which are engaged in foreign or interstate trade and commerce are themselves to be regarded as engaged in such commerce. *Moran v. New Orleans*, 112 U. S. 69, 23 L. ed. 653; *Sinnot v. Davenport*, 63 U. S. 22 How. 227, 16 L. ed. 243; *Foster v. Davenport*, 63 U. S. 22 How. 244, 16 L. ed. 243; *Harmon v. Chicago (Ill.)* 84 Am. & Eng. Corp. Cas. 149.

While the above cases do not directly decide any question of shipments but questions as to license, taxation or other control and regulation of the agencies of commerce, they involve questions as to the nature of transportation within a state when it is only a part of transportation beyond the limits of the state.

So the regulation of charges for transportation within a state by a railroad which is only a part of a through transportation between states is beyond the power of the state. *Wabash, St. L. & P. R. Co.*

riers within the state, on land or in boats or vessels on the waters entirely within the body of the state, to limit or restrict their liability as it exists at common law, applies to shipments purely domestic beginning and ending in the state.

4. A clause limiting the liability of a railway company to its own line which is wholly within the state will not convert into a domestic bill of lading an instrument which purports on its face to be a through bill of lading to a foreign port, providing for the transportation of the goods to their foreign destination and fixing the through rate of freight.

5. A written notification to the consignee by a carrier's freight claim agent of the destruction of property received for transportation is not admissible

against the carrier to prove the loss of the property until it is shown to have been made in discharge of the agent's duties or within the scope of his powers and while the obligation of the carrier with reference to the property yet continued.

6. That a witness did not see the fire will not preclude his testifying that it consumed certain property where he states that he knows of his own knowledge that it did so. To exclude the evidence it must appear that his knowledge was founded so entirely on hearsay as to be inadmissible.

7. Evidence of the value of an entire lot of cotton, while not sufficient to prove the value of a portion of it, in the absence of facts showing the average weight, value, and quality, is admissible as tending to show such value.

Decided March 22, 1892.

APPEAL by defendant from a judgment of the District Court for Dallas County in favor of plaintiffs in an action brought to recover the value of certain cotton burned while alleged to have been in defendant's possession for transportation. *Reversed.*

The facts are stated in the commissioner's opinion.

Messrs. Leake, Shepard & Miller, for appellees:

The bill of lading, though nominally a through bill of foreign shipment, is in reality domestic, because, by its terms, the liability of the railway company is limited to its own line and ends with the delivery of the cotton to the steamship company at Galveston, within the limits of the state of Texas where its bill of lading was to be taken up and another given by the steamship company whose liability then attached. This contract limiting its liability to its own lines entirely within the state of Texas, being one permitted by the laws of said state (see *Gulf, C. & S. F. R. Co. v. Baird*, 75 Tex. 256), notwithstanding the guaranty of fixed through rate and delivery as specified in the bill of lading, said bill of lading is strictly local and domestic—one wholly to be performed within the state in so far as the Missouri Pacific Railway Company is concerned.

Heisermann v. Burlington, C. R. & N. R. Co. 63 Iowa, 732; *Stone v. Farmers Loan & T. Co.* 116 U. S. 333, 29 L. ed. 645.

The law is a regulation of the contract merely, and is controlled by the law of the place where made.

Liverpool & G. W. Steam Co. v. Phenix Ins. Co. 129 U. S. 397, 32 L. ed. 788; *Pennsylvania Co. v. Fairchild*, 69 Ill. 260; *Talbot v. Merchants Despatch Transp. Co.* 41 Iowa, 247, 20 Am. Rep. 589; *Hale v. New Jersey Steam Nav. Co.* 15 Conn. 539, 39 Am. Dec. 398; *Arayo v. Currell*, 1 La. 528; *Ryan v. Missouri, K. & T. R. Co.* 65 Tex. 18, 57 Am. Rep. 589; *Cantu v. Bennett*, 39 Tex. 303.

The statute of Texas is within the police power of the state and is not a regulation of interstate commerce as such.

Chicago & N. W. R. Co. v. Fuller, 84 U. S. 17 Wall. 560, 21 L. ed. 710; *Sherlock v. Ailing*, 93 U. S. 99, 23 L. ed. 819; *Smith v. Alabama*, 124 U. S. 465, 31 L. ed. 508; *Nashville, C. & St. L. R. Co. v. Alabama*, 128 U. S. 96, 32 L. ed. 352; *Liverpool & G. W. Steam Co. v. Phenix Ins. Co. supra*; *Cardwell v. American River Bridge Co.* 113 U. S. 205, 28 L. ed. 959; *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155, 24 L. ed. 94; *Peik v. Chicago & N. W. R. Co.* 94 U. S. 164, 24 L. ed. 97; *Gulf, C. & S. F.*

v. Illinois, 118 U. S. 557, 30 L. ed. 244; *Louisville & N. R. Co. v. Railroad Commission of Tennessee*, 19 Fed. Rep. 679.

But when two carriers act independently though concurrently in making reduced rates, and no through bill of lading or freight receipt is given, and neither is interested in or liable for the carriage of goods beyond its own line, the transportation by one carrier entirely within the limits of a state is not interstate commerce although the transportation by the other carrier extends into another state and the Interstate Commerce Act does not apply to the former carrier unless the goods are shipped directly to or from a foreign country. *Ex parte Koehler*, 30 Fed. Rep. 867.

When the products of the farm or the forest are collected and drawn, floated, or otherwise brought in to a town or station, whether on a river or a line of railroad, they are not exports or in process of exportation until committed to a common carrier

for transportation out of the state or started on such ultimate passage. *Coe v. Errol*, 116 U. S. 517, 29 L. ed. 715.

Where transportation of goods destined for a point without the state has been actually begun temporary stoppage within the state without the intention of abandoning the original movement which is ultimately completed will not deprive the transportation of the character of interstate commerce. *Delaware & H. Canal Co. v. Com. (Pa.)* 1 L. R. A. 232, 2 Inters. Com. Rep. 222.

Neither can the character of transportation to another state be destroyed by shipping to an agent within the state by a local bill of lading and re-shipment by him without unloading, breaking bulk or delay to the ultimate consignees in another state, and the shipment to the agent is not subject to the regulation as to rates by the state railroad commission. *Cutting v. Florida R. & Nav. Co.* 46 Fed. Rep. 641.

R. Co. v. Dwyer, 75 Tex. 572; *Providence Coal Co. v. Providence & W. R. Co.* 2 New Eng. Rep. 505, 15 R. I. 303, 26 Am. & Eng. R. Cas. 42; *Western U. Teleg. Co. v. Pendleton*, 95 Ind. 12, 48 Am. Rep. 692; *Western & A. R. Co. v. Exposition Cotton Mills*, 2 L. R. A. 102, 81 Ga. 522.

It was not error to permit plaintiff to read in evidence the memorandum of the cotton burned which had been furnished by the freight claim agent of the defendant for the information of the consignees.

Morse v. Connecticut River R. Co. 6 Gray, 450; *Burnside v. Grand Trunk R. Co.* 47 N. H. 554, 93 Am. Dec. 474; *Adams Exp. Co. v. Harris*, 7 L. R. A. 214, 120 Ind. 73.

Messrs. Alexander & Clark for appellant.

Tarleton, J., delivered the opinion of the court:

Appellees, as plaintiffs, brought this suit September 29, 1888, in the district court of Dallas county, to recover from appellant, as defendant, the sum of \$13,770, besides interest, the alleged value of 270 bales of cotton, which defendant failed to deliver, according to its contract, at Liverpool, England. The petition avers that the defendant is a corporation created under and by virtue of the laws of the state of Texas. It alleges that on November 14, 1887, Martin, Wise & Fitzhugh, of Paris, Tex., purchased 500 bales of cotton on account of plaintiffs, which they delivered to the defendant at Greenville, Tex., to be by it carried on its lines in Texas and forwarded to the city of Liverpool, England; that defendant received the cotton, and undertook and promised, in consideration of \$1.86 per 100 pounds, to carry upon its lines in Texas, and to have carried by its connecting lines, the 500 bales of cotton, and deliver them to Martin, Wise & Fitzhugh or their assigns at Liverpool; that thereupon defendant executed to Martin, Wise & Fitzhugh, plaintiffs' agent, five bills of lading, by which it acknowledged the receipt of the cotton, and agreed to carry the same upon its lines and deliver it to its connecting lines, to be carried to the city of New Orleans, La., there to be delivered to the West India Pacific Steamship Company, and to be transported to Liverpool and delivered to Martin, Wise & Fitzhugh, or their assigns; that the bills of lading, which contained the written direction, "Notify Sherwood, Thompson & Co., Liverpool, England," were duly assigned and delivered to plaintiffs; that of the 500 bales so shipped the defendant failed to deliver 270 bales, which plaintiffs charge were lost or destroyed while in the possession of defendant within the limits of Texas, or converted by it to its own use. The defendant pleaded a general demurrer, general denial, and specially as follows: That it is a corporation duly and legally incorporated under the laws of the state of Missouri; that it is a railway, and that its line of railway, and especially that part of it on which said cotton was to be shipped, does not now, and at the time of the alleged shipment did not, lie wholly within the state of Texas, but partly within said state and partly without said state; that, as alleged by plaintiffs, it delivered said five bills of lading to Martin,

Wise & Fitzhugh, which were duly assigned and delivered to plaintiffs; that plaintiffs received and accepted the same, subject to the terms and conditions thereof; that under and by virtue of the terms of said five bills of lading the same were foreign shipments from the town of Greenville, Tex., to the city of Liverpool, England; that they were not shipments wholly within the state of Texas; that in said five bills of lading, and in each of them, it was expressly agreed and stipulated that this defendant should not be liable for loss or damage of said cotton by fire or other casualty while in transit, or while in deposit or place of transshipment or depots or landings, or at the points of delivery; that if said cotton was destroyed, as claimed by plaintiffs, it was destroyed by fire at Greenville, Tex., while in transit, while in the Greenville compress, in no wise owned or operated by this defendant, while awaiting to be compressed, as provided by said bills of lading; that, if it was destroyed in said compress, it was by fire without fault or negligence on defendant's part, or on the part of its servants or agents. Plaintiffs, by supplemental petition, demurred to defendant's said plea, setting up said exemption from liability for loss by fire as a stipulation of said bills of lading, on the ground that the same is unreasonable, contrary to public policy, and prohibited by the laws of the state of Texas. Plaintiffs also replied specially that the defendant's railway at the time of the contract was wholly within the state of Texas, and that in order to carry the plaintiff's cotton from Greenville to its destination the defendant would have been compelled to deliver the same on the boundary of Texas to some other carrier: that the contract of shipment or bill of lading, by its express terms, stipulates, and said stipulation is permissible by the laws of Texas, that "for all loss or damage occurring in the transportation of said cotton the legal remedy shall be against the particular carrier, only, in whose custody the cotton may be at the time of the happening thereof;" that it is further expressly provided in the contract "that the liability of the defendant is limited to its own line of railway, and is to cease upon delivery to the next succeeding carrier of the freight specified in said bill of lading," etc. The bill of lading, read in evidence, shows that the cotton was received at Greenville, Tex., to be carried from that point to Liverpool, England. It also provides that the Missouri Pacific Railway Company, and its connections which received said property shall not be liable for loss or damage by fire or other casualty. It further provides that, in the case of loss or damage, that company alone shall be held answerable therefor in whose actual custody the same may be at the time of the happening of such loss or damage. It is also provided that the loss shall be computed at the value or cost of the goods and property at the place and time of shipment. It is further agreed that the Missouri Pacific Railway Company has the liberty to forward the property to the port of destination by any other steamer or steamship company than that named, and that the liability of the Missouri Pacific Railway as a common carrier terminates on the delivery of the property to the steamship or its

agent at Galveston, when the responsibility of the steamship company commences, and not before. Further, the property shall be transported from Galveston, Tex., to Liverpool, England, by the steamship of the West and Pacific Steamship Company. It is provided also that the bill of lading, duly indorsed by consignees, is to be given up, on demand of the agent of the steamship, in exchange for the ship's copy and order of delivery. It is further provided that the liability of the Missouri Pacific Railway Company is hereby limited to its own line of railway, and is to cease upon delivery to the next succeeding carrier. The bill of lading is signed for the railway company by A. L. Downer, who signs as agent, severally but not jointly, for the railway and steamship companies. The court sustained plaintiffs' exception to defendant's plea setting up its exemption from liability for loss by fire, and trying the case without a jury, September 10, 1890, rendered judgment for the plaintiffs in the sum of \$16,498.36 principal and interest. From this judgment, defendant appeals.

The first question to be considered is, Did the court err in sustaining the special exception addressed by plaintiffs to defendant's answer? The defendant seeks to shield itself under the stipulation that it should not be liable for loss by fire while in transit, or while on deposit in place of transshipment or depots or landings, or at points of delivery. By such loss we understand a loss due to fire which is not directly traceable to the negligence of the carrier or his servant. Porter's Law of Bill of Lading, § 223, pp. 161, 162, note 1. It is alleged in the defendant's answer that, if the cotton was destroyed, it was destroyed by fire at Greenville, Tex., without fault or negligence of defendant or its servants, while in transit while in the Greenville compress, in no wise owned or operated by defendant, while waiting to be compressed as provided by the bills of lading. Fire occurring under such circumstances, in view of the exemption clause in the bill of lading pleaded by defendant, is not to be ascribed to the negligence of the carrier. *Lancaster Mills v. Merchants Cotton Press & S. Co.*, 89 Tenn. 1. That a common carrier may, unless forbidden by statute, so contract as to exempt itself from liability for loss by fire, unless caused by the negligence of itself or its servants, is well settled. Such a limitation is reasonable. *Missouri Pac. R. Co. v. Harris*, 67 Tex. 166; *York Mfg. Co. v. Illinois Cent. R. Co.* 70 U. S. 3 Well. 107, 18 L. ed. 170; *Southern Exp. Co. v. Caldwell*, 88 U. S. 21 Wall. 264, 22 L. ed. 556; *Hart v. Pennsylvania R. Co.* 112 U. S. 838, 28 L. ed. 720. Appellees, however, claim that the restriction here pleaded is forbidden by our statute, (article 278, Rev. Stat.) which reads as follows: "Railroad companies and other common carriers of goods, wares, and merchandise for hire, within this state, on land, or in boats or vessels on the waters entirely within the body of this state, shall not limit or restrict their liability, as it exists at common law, by any general or special notice, or by inserting exceptions in the bill of lading or memorandum given upon the receipt of the goods for transportation, or in any other man-

ner whatever; and no special agreement made in contravention of the foregoing provisions of this article shall be valid." Appellant holds that appellees cannot invoke the provisions of this statute, because (1) the shipment here involved is not a domestic, but is a foreign or interstate shipment; (2) the statute applies only to domestic shipments; (3) if the statute be intended to apply to foreign shipments, and to annul a contract of foreign shipment exempting a carrier from liability for loss by fire not chargeable to its negligence, the statute is a regulation of interstate commerce, and as to such regulation is void.

1. Is the contract of shipment set out in the petition of appellees a contract of domestic or a contract of foreign or interstate shipment? By a contract of domestic shipment is understood such a contract as contemplates the shipment of goods from one point in a state to another point therein. By a contract of foreign or interstate shipment is understood such a contract as contemplates the transportation thereunder of goods from a point within a state to a foreign country, or to a point within another state. Transportation is only domestic when confined to the boundaries of the state in which the contract of shipment is entered into. *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244; *Louisville & N. R. Co. v. Railroad Commission of Tennessee*, 19 Fed. Rep. 679. Applying these definitions to the contract set out in plaintiffs' petition, the conclusion is inevitable that the shipment there described is a foreign shipment. The petition alleges an undertaking on the part of the carrier, defendant, to carry the cotton upon its lines, and to deliver it to its connecting lines, to be carried to the city of New Orleans, La., there to be delivered to the West India Pacific Steamship Company, to be transported to Liverpool, and there delivered to Martin, Wise & Fitzhugh, or their assigns.

2. Does the statute referred to apply to an interstate or foreign shipment? This question has been several times suggested to our supreme court, but the disposition of the cases in which it was presented did not require a solution of it. *Ryan v. Missouri, K. & T. R. Co.* 65 Tex. 13, 57 Am. Rep. 589; *Missouri Pac. R. Co. v. Harris*, *supra*; *Missouri Pac. R. Co. v. China Mfg. Co.* 79 Tex. 26. We are of opinion that the question must be answered in the negative; that the statute applies to shipments purely domestic, beginning and ending in the state of Texas. Our conclusion is founded upon the language of the statute itself. "Railroad companies and other common carriers . . . within this state, on land, or in boats or vessels on the waters entirely within the body of this state, shall not limit or restrict their liability, as it exists at common law." Railroads and other common carriers within this state, on land, are put, as to transportation, upon the same plane, so to speak, as boats or vessels on the waters entirely within the body of this state. As to transportation within the state, they are forbidden to limit their liability as it exists at common law. The limitation prescribed by the statute, if it be more extended as to railroads than to boats or vessels, is so only in the sense that, as to the former, it is not confined to carriers operating

exclusively within the state, while, as to the latter, it is restricted to carriers plying on waters wholly within the state. The track of a railroad company may extend beyond the limits of the state; yet, if the goods be carried by it from one point to another within this state, such carriage constitutes transportation within this state, and such railroad is a "carrier within this state." But if the railroad, whether by itself, or by its connecting lines, its agents, transports goods from a point within this state to a point in another state, it is a carrier, not "within this state," but within and out of this state into another. In the latter event, it is engaged in interstate commerce. With reference to its domestic character, we do not think that any discrimination was intended by the legislature between a shipment by water and by rail. The scope of the limitation is logically the same whether applied to the carrier as a railroad or as a steamboat. Transportation "within this state" is, in either case, the subject-matter of the legislation. Our legislature seems to have had in mind, in the adoption of the statute, article 1, § 8, of the Federal Constitution, investing Congress with the power to regulate commerce among the states.

3. Having concluded that article 278 applies only to domestic shipments, and that the shipment described in the plaintiffs' petition is not a domestic shipment, it becomes unnecessary to discuss, and we consequently refrain from considering, the third question presented by appellant, viz: the validity or invalidity of this statute as a regulation of interstate or foreign commerce, provided it was intended to apply to such commerce. Appellees seem to contend that, without reference to the action of the court on their demurrer, the judgment is nevertheless proper, because the bill of lading, though nominally a through bill of lading, is, so far as the Missouri Pacific Railway Company is concerned, in reality domestic; that it is a domestic bill, "because, as they contend, by its terms the liability of the railway company is limited to its own line, and ends with the delivery of the cotton to the steamship company at Galveston, within the limits of the state of Texas, where its bill of lading was to be taken up, and another given by the steamship company, whose liability then attached." The bill of lading described in plaintiffs' original petition provides for a transportation of the cotton from Greenville, Tex., by the Missouri Pacific Railway Company, and its connecting lines, through Louisiana to New Orleans, and thence to Liverpool. It is silent as to a limitation by the company of its liability to its own line. The bill of lading described in the plaintiffs' supplemental petition (in which it is alleged that the defendant's railway was at the time wholly within the state of Texas) provides "that the liability of the defendant is limited to its own line of railway." The bill introduced in evidence purports on its face to be a foreign bill of lading. It provides for the transportation by the Missouri Pacific Railway Company of the cotton at the rate of \$1.36 per 100 pounds from Greenville, Tex., to Liverpool, England. It provides that the liability of the company is limited to its own line of railway, and is to cease on the delivery of the

goods to the steamship company or their agent at Galveston, when the liability of the steamship company commences, and not before. The bill is signed for the railway company by A. L. Downer, who signs as agent, severally but not jointly, for the railway and steamship companies. It will be seen that the bill of lading introduced in evidence differs from that described in the original petition, though it is perhaps supported by the averments of the supplemental petition. Does the provision limiting the liability of the company to its own line, terminating at Galveston, so affect the character of the instrument as to make of it a domestic bill of lading? We think not. The instrument on its face purports to be a foreign bill of lading. It constitutes, as we view it, an undertaking on the part of the carrier, defendant, to transport and have transported from Greenville, Tex., to Liverpool, England, the cotton in question. It provides for a rate of freight between these points of \$1.36 per 100 pounds. It contemplates a continuous transportation from Greenville, Tex., to Liverpool, England. These are all features of a "through" contract of shipment. Porth. Bill Lad. §§ 323, 324, 326, 331. In *Liverpool & G. W. Steam Co. v. Phenix Ins. Co.*, 129 U. S. 401, 32 L. ed. 788, a bill of lading providing for a shipment from Nashville, Tenn., to Liverpool, England, and limiting the liability of the connecting carriers to their own lines, was treated by the Supreme Court of the United States as a through shipment. The stipulation referred to was intended, we think, solely to qualify the responsibility of the carrier, without affecting the character of the shipment as a through shipment. We cannot regard the bill of lading in question as a mere receipt by the carrier of goods marked for a destination beyond the terminus of its route. It is more. It is a contract of shipment, and an undertaking to transport from Texas to a foreign country. Our attention is called by appellees, in support of their proposition already stated, to the case of *Heiserman v. Burlington, C. R. & N. R. Co.* 68 Iowa, 782. In that case, while it was true that goods shipped at West Union, Iowa, were destined for Milwaukee, Wis., the contract of the carrier was to transport them from West Union to Postville, Iowa, and no further. The goods, under the contract with the carrier, were to be transported and delivered at Postville, where the freight for such transportation was to be paid to the carrier. This was plainly a domestic shipment; the carrier not having contracted to carry the goods, or to have them carried, to Milwaukee.

One A. H. O'Neal testified by deposition, for plaintiffs, as to the loss of the cotton in question. Attached to his deposition, as a part of his answer, was a statement read in evidence to prove the burning of the cotton. This statement was furnished Martin, Wise & Fitzhugh by C. H. Dent, freight claim agent of the Missouri Pacific Railway Company, to enable Martin, Wise & Fitzhugh to be in position to officially notify the consignees of the cotton that their cotton had been destroyed by fire, in order that they might take such steps as in their judgment might be proper and necessary. The witness testified that he believed the statement was made out personally by

Dent, and was in his handwriting, and that he believed it to be correct. The statement is tabulated showing the names of consignors and consignees, date and number of bills of lading, and marks of cotton, and showed that it was destroyed by fire at Greenville, Tex., November 14, 1887. Objection was made to the introduction of this statement because (1) there was not sufficient evidence to establish that the statement was made by C. H. Dent; (2) if made by Dent, the statement was not *res gestæ*, and there was no evidence showing that he had authority to bind defendant by such statement. The evidence showed that the statement was furnished by Dent, and was sufficient, we think, to constitute it his declaration. But, admitting this to have been the fact, was it binding on the company? The rule is that declarations of an agent, to be admissible, must be within the scope of their authority, and "while the transaction is yet depending." In *Burnside v. Grand Trunk R. Co.*, 47 N. H. 554, 98 Am. Dec. 474, the declarations of a general freight agent concerning goods delivered to him for transportation were held to be admissible against the company, though made eight months after their delivery to him; it appearing that the carrier's duty had not yet terminated. In making the statement here in question, it does not appear whether or not Dent was acting within the scope of his agency. We are nowhere apprised of the extent of his authority, except by the use of the term "freight claim agent," and about the duties and powers of such an agent the record is silent. Until it had been made to appear that such a statement was made in the discharge of the agent's duties, or within the scope of his powers, and while the obligation of the carrier, with reference to the cotton, yet continued, the statement should have been excluded.

The witness O'Neal testified that, at the time of the loss of the cotton in question, he was the general manager of Martin, Wise & Fitzhugh, located at Paris; that the 478 bales of cotton were destroyed by fire on November 14, 1887, at Greenville, and, as far as witness knows, were not delivered; that he knows this cotton

was destroyed by fire at Greenville, Tex., November 14, 1887, of his own knowledge, as far as it is possible for him to know it without actually seeing it burn. Defendant objected to this testimony because it appeared that on November 14, 1887, witness lived at Paris, and was not at Greenville, and that his evidence as to the burning of the cotton is hearsay. We are unable to say that the knowledge of the witness, to the existence of which he swears, was founded on pure hearsay. There are conditions in which one can acquire knowledge without seeing. We cannot adjudicate that the action of the court in admitting the evidence was erroneous. While it appears that the witness was at the time stated located in business at Paris, it does not appear that he was not at Greenville on November 14, 1887; and, while he did not see the fire which consumed the cotton, his statement may have been based on information derived from a source which would bind defendant. The cross examiner did not sufficiently probe the sources of the witness' knowledge to justify us in holding that it was founded entirely on hearsay, rendering his testimony inadmissible.

With reference to the value of the cotton, the witness O'Neal was permitted to testify that the value of 473 bales of cotton, of which the cotton involved in this suit was a part, was in excess of \$23,649.20. This testimony was objected to as irrelevant, immaterial, and incompetent. We think that the evidence tended at least to prove the value of the cotton lost, and that it was admissible. We do not, however, hold that it was sufficient to prove such value; in the absence of facts showing at least the average weights, value, and quality of the cotton, or showing that such average weights, value, or quality could not be ascertained. The judgment should be reversed, and the cause remanded.

Per Curiam:

Reversed and remanded, as per opinion of commission of appeals.

Rehearing denied.

IN THE CIRCUIT COURT OF THE UNITED STATES IN AND FOR THE NORTHERN DIVISION OF THE EASTERN JUDICIAL DISTRICT OF MISSOURI.

GEORGE K. TOZER, *Plaintiff in Error*,

v.

THE UNITED STATES OF AMERICA, *Defendant in Error*.

(No. 73.)

1. Comparison on the local freight rate from a terminal to an intermediate point on a carrier's line, with the share which it receives of a joint through rate established with a connecting carrier for hauling freight received from the latter between such points is not a proper method of determining whether or not the local rate is

within the provisions of section 3 of the Interstate Commerce Act which prohibit undue and unreasonable preferences or advantages.

2. A conviction for criminal violation of the section of the Interstate Commerce Act, which prohibits undue or unreasonable preferences or advantages, cannot be sustained upon the finding

of a jury that a certain charge was an unreasonable preference, if no standard of comparison is

established by which such unreasonableness is shown with definiteness and certainty.

IN ERROR to the District Court. Before **Brewer**, *Circuit Justice*, and **Caldwell**, *Circuit Judge*.

Messrs. Thos. J. Porter and Aldace F. Walker for plaintiff in error.

Messrs. Geo. D. Reynolds and Chas. Claflin Allen for United States.

Opinion by **Brewer**, *Circuit Justice*:

Plaintiff in error was indicted in the District Court for an alleged violation of the Interstate Commerce Act. There were five counts in the indictment. The court sustained a demurrer to the fourth; and the defendant was found not guilty under the first and fifth, but guilty under the second and third counts. The judgment for conviction rendered thereon was brought to this court for review, by writ of error.

The facts in the case were these: Tozer was the agent of the Missouri Pacific Railway Company at Hannibal, Missouri. That company operated a line of road extending from Hannibal to Hepler, Kansas. At Hannibal it connected with the road of the Chicago, Burlington & Quincy Railroad Company. The two companies by agreement established a joint tariff. By the joint tariff sugar was shipped from Chicago to Hepler at 51 cents a hundred pounds. The local tariff of the Missouri Pacific Railway Company from Hannibal to Hepler was 46 cents per hundred. The joint tariff was divided between the two companies by giving to the Missouri Pacific Company 34, and to the Chicago, Burlington & Quincy Company 17 cents. The Hayward Grocer Company, a firm doing business in Hannibal, shipped sugars from that place to Hepler, upon which shipment the regular local rate of 46 cents was charged and collected. They also ordered a Chicago firm to ship sugar from Chicago to the same point. This shipment was made over the Chicago, Burlington & Quincy Railroad, and upon it the joint rate, 51 cents, was charged and paid. It was agreed in the trial court that the Chicago, Burlington & Quincy Railroad Company made a contract to carry the sugars from Chicago to Hepler, and that after carrying them over its own line to Hannibal, it employed the Missouri Pacific Company to carry it for the balance of the way, and paid it 34 cents; or, to state it in another way, the Missouri Pacific Company charged the Chicago, Burlington & Quincy Company only 34 cents for carrying the sugars from Hannibal to Hepler, while it charged the Hayward Grocer Company, and others living in Hannibal, 46 cents for doing a like work; and it was held that this constituted a giving to one person an undue and unreasonable advantage, and subjected one to unjust and unreasonable disadvantage, within the denunciation of section three of the Interstate Commerce Act. In other words, a comparison was drawn between the local rate of the one company and the share which it received by agreement of the joint through rate of the two companies, and the two being unequal the agent was found guilty of violating the Act.

The decision of the court of appeals of this circuit, just announced, in the case of the *Chicago & N. W. R. Co.*

go & N. W. R. Co. v. Osborne, post, 257, precludes the necessity of any extended discussion. It was there held that each company established its own tariff; and that the reasonableness of the tariff of one is not determined by that of any other. It was also held, that two connecting companies forming by agreement a joint through tariff, create thereby, as it were, a line new and independent of that of either of the connecting companies; and hence, that, such joint tariff or the share that either takes of such tariff, is not the basis by which the reasonableness of its local tariff is to be determined. It is true, that in that case the question arose under section four, with reference to long and short hauls, while in this it arises under section three, prohibiting undue or unreasonable preferences or advantages; but still the questions there decided are controlling here. If the joint through tariff of two connecting roads is not a standard by which the local tariff of either can be declared in violation of section four, neither can it be the standard by which the question of undue preferences is determined under section three. Because the local rate is in excess of the share of the joint rate, it does not follow that an undue preference or advantage has been given. The trial court seemed to recognize this proposition, for it charged: "Now conceding that some difference between the local rate and the Missouri Pacific Railway Company's proportion of the through rate is permissible, owing to the different conditions affecting the two shipments—the question that I submit to you under the second and third counts is whether the difference shown in this case between the two rates of twelve cents per hundred pounds—is under all the circumstances of the case a reasonable difference or an undue and unreasonable difference, not justified by the different circumstances under which through shipments from Chicago and local shipments from Hannibal are made."

"If you find that the difference in rate of twelve cents per 100 pounds is an undue and unreasonable difference, and, as before explained, that defendant as agent of the Missouri Pacific Railway Company knowingly and willfully gave the Chicago, Burlington & Quincy Railroad the advantage of such difference in the shipment of the two barrels of sugar mentioned in the indictment—then you may return a verdict of guilty on the second and third counts although you acquit on the first count."

"In determining the last question submitted to you as to the reasonableness or unreasonableness of the difference between the local rate and the Missouri Pacific Company's proportion of the through rate, I give you full liberty to consider all the facts, circumstances and reasons, adduced by the various witnesses

in justification of the difference shown, and I ask you to consider the same carefully and fairly without any prejudice or bias whatsoever."

But in order to constitute a crime, the act must be one which the party is able to know in advance whether it is criminal or not. The criminality of an act cannot depend upon whether a jury may think it reasonable or unreasonable. There must be some definiteness and certainty. In case of the *Chicago & N. W. R. Co. v. Dey*, 2 Inters. Com. Rep. 325, 1 L. R. A. 744, 35 Fed. Rep. 866, 876, I had occasion to discuss this matter, and I quote therefrom as follows: "Now the contention of complainant is that the substance of these provisions is, that, if a railroad company charges an unreasonable rate, it shall be deemed a criminal, and punished by fine, and that such a statute is too indefinite and uncertain, no man being able to tell in advance what in fact is, or what any jury will find to be, a reasonable charge. If this were the construction to be placed upon this Act as a whole, it would be certainly obnoxious to complainant's criticism, for no penal law can be sustained unless its mandates are so clearly expressed that any ordinary person can determine in advance what he may

and what he may not do under it. In *Dwarris*, Stat. 652, it is laid down 'that it is impossible to dissent from the doctrine of Lord Coke, that the acts of parliament ought to be so plainly and clearly, and not cunningly and darkly penned, especially in legal matters.' See also *United States v. Sharp*, Pet. C. C. 122; *The Enterprise*, 1 Paine, 34; Bishop, Stat. Crimes, § 41; Lieb. Herm. 156. In this the author quotes the law of the Chinese penal code, which reads as follows: 'Whoever is guilty of improper conduct, and of such as is contrary to the spirit of the laws, though not a breach of any specific part of it, shall be punished at least forty blows; and when the impropriety is of a serious nature, with eighty blows.' There is very little difference between such a statute and one which would make it a criminal offense to charge more than a reasonable rate. See another illustration in *Ex parte Jackson*, 45 Ark. 158."

Applying that doctrine to this case, and eliminating the idea that the through rate is a standard of comparison of the local rate, there is nothing to justify a verdict of guilty against the defendant.

Judgment will therefore be reversed, and the case remanded for further proceedings.

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF KANSAS.

UNITED STATES v. C. S. MELLEN ET AL.

(No. 3692.)

1. The fact that two carriers have established a joint tariff rate between two points will not, under the provisions of the long and the short haul clause of the Interstate Commerce Act, prevent each from charging its local rates upon shipments to and between intermediate points, although the combined local rates exceed the through rate for the longer haul.
2. Officers of an interstate railroad company may be indicted, under section 4 of the Interstate Commerce Act, for fixing and charging a local freight rate upon the same kind of merchandise under substantially similar circumstances and conditions greater in amount between two points on the main line than that fixed between one of them

and a point also on the main line lying in the same direction but farther away than the other.

3. The objection that an indictment under the long and short haul clause of the Interstate Commerce Act is an attempt by the government to interfere with the revenues of the railroad, contrary to the terms of the contract under which it was built, cannot be raised upon a motion to quash.
4. Collecting and receiving freight charges does not subject one who had nothing to do with fixing the rates to indictment under the long and short haul clause of the Interstate Commerce Act, although the rates are within the prohibitions of that Act.

Opinion by Foster, District Judge:

The defendants, C. S. Mellen, J. A. Monroe, J. G. Woodworth and W. S. Barr were indicted in this court on the 27th day of April, 1892, for violating the provisions of section 4 of the Interstate Commerce Act by charging more for a short than for a long haul, it being charged in the indictment that the four defendants first named were officers and persons acting for and employed by the Union Pacific Railway Company, and were the officers who had authority to make and establish

rates and charges for the transportation of property and freight over the lines of said company, and that W. S. Barr, the last named defendant, was the agent of said railway company at Salina, Kansas, a station on its line 186 miles west of Kansas City, Missouri. The case is before the court on a motion to quash.

The first count of the indictment charges that on the 20th of April, 1891, the Union Pacific Railway Company was a common carrier of passengers and property through and among and between the states and territories of the

United States, between the city of Ogden in the territory of Utah and the city of Kansas City, Missouri.

It is further alleged in the indictment that upon that day, to wit: the 20th of April, the Union Pacific Railway Company had entered into an agreement and arrangement with the Southern Pacific Railway Company, also a common carrier (both of which said companies were then and there subject to the provisions of the Act of Congress, entitled, "An Act to Regulate Commerce") establishing a certain joint tariff or rate for the shipment and transportation of refined sugar in carload lots by continuous line upon the railways of the Union Pacific and Southern Pacific from the city of San Francisco in the state of California, to the city of Kansas City, Missouri, and that this joint tariff and rate was in force on the 20th of April, 1891, and that at that time the said joint tariff and charge had been filed with the Interstate Commerce Commission created by the Act of Congress, approved on the 4th day of February, 1887; that the rate and price under said joint tariff was 65 cents for each 100 pounds of sugar in carload lots transported by the Union Pacific and Southern Pacific companies over their railroads by continuous line and route from San Francisco, California, to Kansas City, Missouri, and of the said rate of 65 cents per 100 pounds fixed by said joint rate for the transportation of sugar between the points last mentioned, the Union Pacific received the sum of 32.4 cents per 100 pounds and the Southern Pacific received 32.6 cents per 100 pounds.

It is further charged in the first count of the indictment that the city of Selina, in the district of Kansas, is a station upon the main line of the Union Pacific Railway Company in Kansas, and is located 186 miles west of Kansas City, Missouri, and is a shorter distance from San Francisco, California, by 186 miles than Kansas City, Missouri.

The indictment then proceeds to charge the defendants, Mellen, Monroe, Campbell and Woodworth (they being officers authorized to fix and establish rates for the Union Pacific) with willfully establishing a rate of 94 cents for each 100 pounds of refined sugar in carload lots transported over the lines of the Union Pacific and Southern Pacific railways from San Francisco, California, to the city of Salina, Kansas, notwithstanding they had fixed a rate of 65 cents per 100 pounds to the city of Kansas City, Missouri, which was a greater distance than the distance to Salina.

It is further alleged that a shipment was made from San Francisco to the H. D. Lee Mercantile Company of Salina, Kansas, for one carload of sugar consisting of 76 barrels, for which the rate of 94 cents per 100 pounds was charged, and that said shipment was made under substantially similar circumstances as the shipments made to Kansas City, Missouri, and that Barr, as the agent of the company demanded and collected the said rate which is alleged to be illegal and which had been fixed by the four defendants first above named.

The first count of the indictment charges that a joint rate was established of 65 cents from San Francisco, California, to Kansas

City, Missouri, said rate being established under an agreement or joint traffic arrangement with the Southern Pacific Company.

The question now to be determined is whether or not the fact that they charged a higher rate to Salina, which was a shorter distance, is a violation of section 4 of the Act to Regulate Commerce. The language of the section is: "It shall be unlawful for any common carrier subject to the provisions of this Act to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property under substantially similar circumstances and conditions for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." It will be noted from a careful examination of this section that it applies to each separate common carrier for its violation of the long and short haul clause on its own line.

In construing this section, *Mr. Justice Brewer*, in the case of the *Chicago & North Western R. Co. v. Osborne*, post, 257, said, "Where two companies owning two connecting lines of road unite in a joint tariff, they form for the connected roads practically a new and independent line. Neither company is bound to adjust its own local tariff to suit the other, nor compellable to make a joint tariff with it. It may insist upon charging its local rates for all transportation over its line. If, therefore, the two companies by agreement make a joint tariff over their lines or any part of their lines such joint tariff is not the basis by which the reasonableness of the local tariff of either line is determined. To illustrate, on the defendant's road the distance from Turner to Chicago is 80 miles. On the Lake Shore line from Chicago to Cleveland is 200 or 300 miles. Defendant company may charge 15 cents for transporting grain the 80 miles from Turner to Chicago, providing that it be in fact only a reasonable charge for the services, although the Lake Shore Company charges no more for transporting it from Chicago to Cleveland, and the fact that the rate on each line is 15 cents for the distance named, will not prevent the two companies from making a joint tariff for grain shipped from Turner to Cleveland of 12 cents; less than the local tariff of either. We do not mean to intimate that the two companies or a joint line can make a tariff from Turner to Cleveland higher than from Turner to Buffalo or for any other intermediate points between Cleveland and Buffalo for when the two companies by their joint tariff make a new and independent line, that new and independent line may become subject to the long and short haul clause. But what we mean to decide is that the through tariff on a joint line is not the standard by which the separate tariff of either company is to be measured or condemned."

There is no allegation in the first count of this indictment that the tariff and rate to Salina, Kansas, was a joint tariff made pursuant to agreement between the Union Pacific and Southern Pacific roads. The allegation is that they had a joint tariff to Kansas City, Missouri, which was in fact less although a longer distance, than the rate charged to Salina, Kansas. If the rate charged to Salina was the local rate

of each company, and the presumption is, in the absence of allegation that it was a joint rate, that it was the local rate and the fact that, they had a joint rate to Kansas City, which constituted a new line, would not furnish a basis upon which either company would be bound to adjust its own local tariff, but within the principal announced in the decision just quoted both might insist upon charging its local rates for all transportation over its lines to intermediate points.

The second count of the indictment charges the facts substantially as set forth in the first count alleging the joint rate between the Union Pacific and Southern Pacific railways to Kansas City, and then charging that, notwithstanding the joint rate to Kansas City, these defendants for and on behalf of the Union Pacific charged and received the price of 61.4 per 100 pounds for transporting the sugar from Ogden, Utah, to Salina, Kansas. The suggestions as to the first count are equally applicable to the second count. The joint rate is made the basis of discrimination, the allegation is, that they charged the local rate from Ogden to Salina, which was less than their part of the joint rate to Kansas City, although Salina was the shorter distance. This I think they may do for the reasons already suggested. The joint rate does not in any sense effect or govern the local rate to intermediate points. While, as stated by *Mr. Justice* Brewer, the two companies could not make a joint rate from San Francisco to Kansas City which was less than a joint rate from San Francisco to Salina, yet they may make a joint rate to Kansas City, Missouri, and that fact would not affect the local rate of either company to Salina.

The third count of the indictment charges the defendants with conspiring and agreeing together to commit an offense against the laws of the United States, in that they charged, collected and received a greater compensation in the aggregate for the transportation of refined sugar in carload lots under substantially similar circumstances and conditions for a shorter than for a longer distance.

It is alleged that they charged, collected and received a greater compensation for hauling sugar in carload lots under substantially similar circumstances and conditions from Ogden, Utah, to Salina, Kansas, than was charged and received for hauling sugar in carload lots from Ogden, Utah, to Kansas City, Missouri. In this count of the indictment there is no allegation of a joint rate to Kansas City, Missouri, and the joint rate is not made the basis by which the reasonableness of the local rate

is to be determined, hence does not come within the principle announced in the case of the *Chicago & N. W. R. Co. v. Osborne*, post, 257.

The fourth count of the indictment alleges a joint rate to Topeka, Kansas, which was less than the rate charged to Salina. This count is bad because of a typographical error in drafting it. In that portion of the count which alleges that the shipment was made under substantially similar circumstances, Kansas City is named as a point for the joint rate, whereas it should have been Topeka.

It was urged by counsel for the defendants that the prosecution of the defendants under this indictment was an effort on the part of the government to interfere with the revenues of the Union Pacific which could not be done until the revenue of that company should exceed 10 per cent upon the cost of the road.

I cannot concur in the views expressed by counsel, but even if their contention is true, I think the question would not arise upon a motion to quash. It is therefore unnecessary to discuss it here.

As to defendant Barr, the allegation is that he was the agent who collected and received the rates which had been fixed by the other defendants. There is no allegation that he had anything to do with making the rate, and indeed, the allegation as to the position he occupied would, I think, exclude that idea. I think so far as the case applies to him it comes within the principle announced in the case of the *United States v. Michigan Cent. R. Co.* 43 Fed. Rep. 26, and the motion to quash will be sustained as to the defendant Barr. The motion will also be sustained as to the other defendants to the first, second and fourth counts of the indictment, and will be denied as to the third count. If, however, upon the trial of the cause it should be made to appear by the evidence that the joint rate to Kansas City was made the basis of adjusting the local rates, charged in this count of the indictment, the defendants would be entitled to acquittal.

Indictment No. 8091 is against the four defendants first named, and for the reasons herein suggested in relation to the third count in indictment No. 8092, the motion to quash will be overruled as to the first count. The motion will be sustained as to the second count for the reason that the same typographical error of inserting Kansas City, Missouri, instead of Topeka, Kansas, which occurred in the fourth count of indictment No. 8092 occurs in the second count of this indictment.

UNITED STATES CIRCUIT COURT, DISTRICT OF OREGON.

OREGON SHORT LINE & UTAH NORTHERN R. CO.

v.

NORTHERN PACIFIC R. CO.

(See S. C. 51 Fed. Rep. 465.)

1. A railroad company is not, as a carrier of freight and passengers, under any obligation to
4 INTER S.

take freight from a connecting road in the cars of the latter and transport it in such cars while

- its own cars are not in use, in the absence of any controlling custom among railroads.
2. A railroad company which accepts freight in the cars of a connecting road, and transports it therein when it has cars of its own not in use, is not liable for mileage upon such cars, in the absence of an arrangement to that effect; but the existing custom that when a railroad takes the freight in the foreign cars because it has none of its own out of use, or because the freight would be injured by the transfer it shall pay certain mileage on the cars used, is reasonable and will be enforced.
 3. A railroad company receiving freight from a connecting road is under no obligation to advance to the latter the charges due it for transportation, although if it does so it has a lien for payment on the goods.
 4. A railroad company is under no obligation to honor tickets for passage over its line issued by another company, in the absence of an arrangement between them.
 5. No obligation to transport freight over its line in the cars of another company, when it has cars of its own not in use, to pay the charges thereon of the other company, or to honor tickets for passage over its line issued by the other company, is imposed upon a railroad company by the Interstate Commerce Act, § 3, providing that carriers shall give no undue or unreasonable preference, and shall afford all reasonable, proper, and equal facilities for the interchange of traffic.
 6. The provision of the charter of the Northern Pacific Railroad Company, that it shall permit any other railroad company to form running connections with it, imposes no obligation upon it to run the cars of another company over its road, except when the transfer of the freight contained therein would injure it.
 7. The "running connections" which the Northern Pacific Railroad Company is required by its charter to make with other railroads include only such arrangements as to the time of trains and as to stations, platforms and other facilities, as will enable companies desiring to connect to do so without detriment or serious inconvenience.

(Deady, J., dissents from propositions, 5-7.)

June 15, 1892.

SUIT to restrain defendant from discriminating against complainant in the facilities afforded for receiving and forwarding freight and passengers tendered to it for transportation. *Bill dismissed.*

Statement by Field, Circuit Justice:

The complainant is a corporation formed under the Act of Congress of August 2, 1882, entitled "An Act Creating the Oregon Short Line Railway Company, a Corporation in the Territories of Utah, Idaho, and Wyoming, and for Other Purposes," (22 Stat. at L. chap. 372, p. 185), and by the consolidation with it, under the authority of the general incorporation acts of those territories and of the state of Nevada, in force on the 27th of July, 1889, of the following corporations, namely: The Oregon Short Line Railway Company, the Utah & Northern Railway Company, the Utah Central Railway Company, the Ogden & Syracuse Railway Company, the Nevada Pacific Railway Company, the Idaho Central Railway Company, and the Salt Lake & Western Railway Company. The defendant, the Northern Pacific Railroad Company, is a corporation created under the Act of Congress of July 2, 1864, entitled "An Act Granting Lands to Aid in the Construction of a Railroad and Telegraph line from Lake Superior to Puget Sound, on the Pacific Coast, by the Northern Route," (13 Stat. at L. chap. 217, p. 365), and the various acts amending and supplementing the same. The complainant owns a line of railroad extending from Granger, in the former territory, now state of Wyoming, to the boundary line between the states of Idaho and Oregon, and is the lessee of the lines of the Oregon Railway & Navigation Company, a corporation organized and existing under the laws of Oregon, extending from that boundary line to the city of Portland, Or. Its railroad connects with the Union Pacific Railway at Granger, and forms a part of the Union Pacific system.

4 INTER S.

The lines of the Oregon Railway & Navigation Company and of the defendant are connected at Portland by the tracks of the Portland Terminal Company. The defendant owns a line of railroad extending northwardly from the tracks of the Terminal Company to Tacoma, Seattle, and other points on Puget sound, and thence eastwardly to Minneapolis, Minnesota Transfer, St. Paul, and other points. The lines of the two companies,—of the complainant and of the defendant,—connecting as stated at Portland, have been used as continuous lines for the carriage of a large amount of passenger and freight traffic. The complainant charges that the defendant has for some time past and still continues to unlawfully discriminate against it in the facilities afforded for receiving and forwarding freight and passengers tendered to it at that place. This suit is brought to enjoin the defendant from continuing in such alleged unlawful discrimination against the complainant. That discrimination consists in the difference of conditions under which the defendant will receive freight and passengers tendered to it at Portland by the complainant.

(1) The discrimination in receiving and forwarding freight is charged to be this: That it has at various times refused to transport freight tendered to it by the complainant, originating at points east of the ninety-seventh meridian, and destined to points on the lines of its railway north of Portland, when such freight was in cars other than those of its own, unless the complainant would assume to pay to the company owning such foreign cars the usual car mileage for their use, or transfer such freight from the foreign cars in which it was trans-

ported over its lines to cars owned by the defendant; and, in cases where the charges on such freight were not prepaid at the point of origin to destination, the defendant has refused to receive and transport such freight, unless the complainant would prepay the charges for transporting it from Portland to destination, and has refused to pay to the complainant, on receiving such freight, the charges due to it and connecting lines for transporting the same to Portland. The complainant alleges that such action on the part of the defendant is contrary to the custom and practice in force among railways generally, and contrary to the custom and practice in force between the complainant and defendant as to all traffic originating on lines of the complainant and connecting lines west of the ninety-seventh meridian. It also alleges that during the time of such action the defendant has, except in a few instances, received and transported, and at the present time professes to be willing to receive and transport, to points on the lines of the defendant and lines connecting therewith north of Portland, freight originating west of the ninety-seventh meridian on the lines of the complainant, or other lines connecting therewith, when tendered to the defendant by the complainant at Portland, and has paid car mileage for the use of foreign cars in the transportation, and transported the freight in such foreign cars; and in cases where the charges on the freight were not prepaid to destination has not demanded or received from the complainant the charges for transporting the same from Portland to destination, and has paid to the complainant back charges due to it and connecting lines for transporting the freight from the point of origin to Portland. The complaint also alleges that during the same time the defendant has received and transported for the Southern Pacific Railroad Company freight originating both east and west of the ninety-seventh meridian without making against the company the discriminations complained of by the complainant.

(2) The discrimination in receiving and forwarding passengers is charged to be this: That the defendant has refused to transport passengers destined to Puget sound and other points on its lines, and on lines connecting therewith, when they have presented through tickets issued by the complainant, or by other railway companies operating over its lines *via* Portland, issued at points east of the 105th meridian. The complaint alleges that during the time of such refusal the defendant has received and transported passengers destined to like points presenting through tickets issued at points west of the 105th meridian by the complainant or by lines connecting therewith passing over its lines *via* Portland, and that the defendant at the same time has received and honored tickets of all kinds issued by the Southern Pacific Railway Company, connecting with it at Portland, or by railways connecting with it at St. Paul. The complainant charges that the refusal of the defendant to receive and transport freight in the cars in which it is tendered and to honor tickets as mentioned is an unreasonable and unjust discrimination against complainant and against its traffic originating east of the 97th and 105th meridians, and destined to points

on Puget sound *via* Portland, and in favor of traffic originating east of the 97th and 105th meridians, and destined to points on Puget sound *via* Minnesota transfer, at which latter point complainant alleges that defendant furnishes better facilities to connecting lines for the interchange of traffic than at Portland; and that the discrimination is in violation of the Act of Congress of February 4, 1887, entitled "An Act to Regulate Commerce," commonly known as the "Interstate Commerce Act," (24 Stat. at L. chap. 104, p. 879) and is in violation of section 5 of the defendant's charter, namely, of the Act of Congress of July 2, 1864, (13 Stat. at L. 385) which requires it to permit any other railroad to form running connections with it on fair and equitable terms.

The answer of the defendant denies all the averments of the complaint, except the one that it has usually refused and continues to refuse, to transport, in the cars in which it is tendered by complainant at Portland, freight originating at points east of the 97th meridian, destined to points on Puget sound, unless complainant waives on its own cars, and assumes to pay on the cars of other companies, the current rate of mileage for the number of miles they are run over its road. It denies that the defendant has refused to receive and transport freight tendered by complainant to it at Portland for transportation to points on Puget sound without prepayment of freight charges to points of destination, except certain classes of freight which it is the custom of railroads to carry only upon prepayment of charges; and that the terms and conditions desired by complainant for the interchange of traffic at Portland are fair and equitable; or that they are as fair and equitable as the terms and conditions upon which the defendant interchanges traffic with other companies at Portland and at other points. As a further defense the defendant avers that the lines of the Oregon Railway & Navigation Company were, at all times mentioned in the bill of complaint, operated and controlled by the Union Pacific Railway Company as a part of its system; that the Union Pacific Railway Company and the Oregon Railway & Navigation Company, and the complainant and defendant, were at all times mentioned in the bill members of what is known as the "Transcontinental Association," and as members thereof they entered into an agreement and issued the necessary tariffs and instructions, under the terms of which the freight traffic originating east of the 97th meridian, and all passenger traffic originating east of the 105th meridian, destined to points on Puget sound, north of Portland, was to be routed *via* Minnesota Transfer and the Northern Pacific Railroad, and that in pursuance of that agreement the general freight agent of the Union Pacific system, including complainant's lines, issued the following circular:

"UNION PACIFIC RAILWAY COMPANY, GENERAL FREIGHT DEPARTMENT.

"Circular No. 685.

Omaha, January 16, 1889.

"To Agents of the Connections: Notice is hereby given that this company will not receive any freight for Puget sound points, or

points of the Northern Pacific Railroad north of Portland, when originating at or east of the Missouri river. All such freights shall be routed by way of Minnesota Transfer.

"J. A. Monroe, General Freight Agent."

And that by this agreement Portland was made a common terminal point, with points on Puget sound north thereof, and the complainant had not, at the time of filing its bill of complaint or at any other time, any arrangement or contract under which it was authorized to sell tickets to passengers from points east of the 105th meridian *via* Portland, and defendant's line to Puget sound points. The defendant avers that, notwithstanding these facts, the Union Pacific Railroad Company is soliciting business from points east of the 97th and 105th meridians for transportation to Puget sound points *via* complainant's and defendant's lines without authority from the defendant, and is representing that it can send freight and check baggage through without transfer, and has adopted the following system for sale of tickets from eastern points to Puget sound points *via* complainant's and defendant's lines: It sells and delivers to passengers tickets coming from such eastern points to the city of Portland, and delivers to the passengers an order on the exchange ticket agent of the Oregon Railway & Navigation Company at Portland, for a ticket over the defendant's road from the city of Portland to the city of Tacoma, or other points on said road in the territory, now the state, of Washington, and the passenger, upon his arrival at the city of Portland, is furnished by the agent with either tickets or a sum of money sufficient to transport him to destination; and the price the passenger pays for such transportation, including that over defendant's line, is complainant's rate from the eastern points to the city of Portland. And the defendant avers that at the dates in the bill of complaint mentioned the complainant was, and is now, discriminating in the way stated, in favor of passengers traveling over its lines from eastern points to points north of the city of Portland.

Issue being joined upon the answer, evidence was taken, and upon the pleadings and proofs the cause was argued in the circuit court for the district of Oregon in June last. During the argument it was stipulated that the annual report of the Union Pacific Railroad Company should be deemed admitted in evidence. Counsel for the defendant then asked leave to amend its answer by averring the insolvency of the complainant and of the Union Pacific Railroad Company. Whereupon the court directed that the answer should be considered as though such amendment was made. After argument, counsel for the complainant requested 60 days' time to prepare briefs in the cause, which was given, with a similar time to the defendant to answer such briefs. By mutual arrangement between counsel, time for the preparation and furnishing of the briefs was extended so that they were not presented to the judges of the court until after the commencement of the October term of the Supreme Court of the United States at Washington, and during the session of that court the presiding justice of the circuit court was constantly occupied, and was unable to take up the cause and give it proper consideration. This is the

reason for the long delay in disposing of the cause.

Messrs. W. W. Cotton and Zera Snow for complainant.

Messrs. Dolph, Bellinger, Mallory & Simon and James M. Naught for defendant.

Mr. Justice Field delivered the opinion of the court:

The oral arguments of counsel on the hearing of this case were extended and able, and their elaborate briefs since filed, covering 350 pages of printed matter in octavo form, touch upon nearly every question relating to the receipt, transfer, and forwarding of freight and passengers by connecting lines of railway, and the respective rights and liabilities of the parties. To give proper consideration to the questions thus brought forward would extend this opinion into a treatise on the subject, which we have neither the disposition, time, nor necessary information to undertake and adequately perform. We shall therefore confine what we have to say to the consideration of the main proposition of the complainant, deeming that its determination will be sufficient for the disposition of the case before us. Its chief contention is that the defendant, as a common carrier by railway of freight and passengers, is obliged (1) to receive freight tendered to it by the complainant at Portland, Or., that being a point where it connects with the road of the complainant, in the cars in which it is tendered, and transport the same to point of destination in such cars, over its roads, and pay to the company owning the cars the current rate of mileage for their use, and also pay the charges for transportation from point of origin to Portland; (2) to honor tickets or coupons for passage over its lines north of Portland, issued by the complainant. This obligation of the defendant is asserted on three grounds: (1) The alleged established custom between railroad companies operating connecting lines; (2) the 8d section of the Interstate Commerce Act; and (3) the 5th section of the defendants charter, that is, of the Act of Congress of July 2, 1864, creating the Northern Pacific Railroad Company.

1. The complaint avers that it is the custom of railroad companies operating connecting lines to receive and transport freight tendered to them in the cars in which it is tendered, and to pay the usual car mileage on such cars, and to advance the charges for the transportation of the freight from point of origin to the point of connection. This averment is denied by the answer, and numerous witnesses were examined on the subject, called both by the complainant and defendant, who had been or were connected with railroad companies as managers or superintendents, and who had had large experience in conducting traffic between connecting lines. Their testimony differs only in immaterial matters. It agrees in the main points, and is to this purport: That whether or not the freight received by one company shall be transported in the cars in which it is tendered, or be transferred to the cars of the receiving company, is, as a general rule, dependent upon contract be-

tween the connecting companies, and is not a matter in which there is any established custom applicable to all cases. Exceptions to the general rule arise when the cars of the receiving company are all in use; then the freight is usually received and transported in the cars in which it is tendered, that there may be no unnecessary delay in the transportation. Sometimes also the cars are received where the freight is of such a character that it may be injured by transfer from one car to another. There can be no usage founded in reason requiring the receiving company to transport the freight in the cars in which it is tendered, when its own cars are not in use. The receiving company is not under any obligation to allow its own cars to remain idle in order to transport those of another company; in such cases, that is, where it has sufficient cars for the purpose not in use, it may properly refuse to receive the freight unless it is transferred to them. The testimony establishes beyond controversy the position thus stated, namely, that, except where the cars of the receiving company are all in use, or engaged for the time of the desired transportation, or where the freight is of such a character that it will suffer by being transferred to other cars, the receiving and transporting of the freight in the cars in which it is tendered is a matter of conventional arrangement between the connecting companies. In determining which of these modes shall be adopted many circumstances are to be taken into consideration, such as the condition of the cars, the wear to which they have been subjected, their ability to stand the speed of the company's trains, their equipment with air brakes, proper couplings, and the like, and also the condition of the road over which they are to be transported, and the arrangements made for side-tracking the cars for the passage of meeting trains, in relation to which several matters no specific direction applicable to all cases can be given. The testimony shows that in some cases, where there is a large business at connecting points, nearly one half of the freight is transferred to the cars of the receiving company, and the remainder is taken in the cars in which the freight is tendered. The amount received in one way or the other constantly varies.

The receiver of the Minneapolis & St. Louis Railway Company, and president of the Minnesota Transfer Company, testified that from his experience and observation the question of transferring cars received by one railway company from a connecting line, containing freight for transportation from a receiving line, was determined more or less by the nature of the freight, and the question whether the receiving line has or not plenty of cars of its own in which to load and forward the freight; that in some cases companies decline to allow their cars to go beyond the terminal point on their own line, and in such cases the freight is, of course, transferred. One of the vice presidents of the Chicago, Milwaukee & St. Paul Railway Company testified that, when there is no agreement between the connecting companies on the subject, the question whether the freight tendered shall be transported to destination in the original cars, or be transferred into the cars of the receiving company,

rests with the latter company. The general manager of the Northern Pacific Railroad Company, in answer to the question, "What is the custom or method obtaining among railroads concerning the handling of cars?" testified as follows:

"The method of handling through business interchanged between railroads is controlled by various circumstances, in some cases by traffic contracts, which provide for cars going through without transfer or breaking bulk. In many cases it is controlled by conditions of what we might term the car market; that is, by the car supply. There are times when railroads east of St. Paul give orders at the transfer to permit none of their cars to go beyond St. Paul. There are times when they permit their cars to go through without breaking bulk. On the other hand, there are times when the railroads north and west of St. Paul do not take through cars, even when the roads tendering them are willing to have them go through, because they have sufficient of their own cars, and, under the general agreement and understanding between the railroads of the United States to pay a certain rate per mile on all cars of other railroad companies used over their lines, it would become a burden to take a foreign car, and permit its own car to lie idle, and pay a mileage rental for the foreign car. The receiving road determines for itself whether to take the cars of a connecting line or to transfer the freight to its own cars. This [said the witness] is the universal practice all over the country [meaning, of course, in the absence of special contract on the subject]."

It follows that the complainant has failed to show the existence of a controlling custom as to the manner of receiving and forwarding freight in the cars in which it is tendered. A controlling custom can only be established by long usage, and must be certain, reasonable, and uniform, to have the force of law.

As the receiving company is under no obligation to take the freight in the cars in which it is tendered, and transport it in such cars, when it has cars of its own, not in use, to transport it, there can be no custom that it shall pay the owner of such cars, should it receive them in such case, car mileage for their use. The car mileage in that case must be upon an arrangement between the parties. But when the receiving company takes the freight in the foreign cars because it has none of its own out of use to transport it, or because it would injure the freight to transfer it to its own cars, it is the general practice for the receiving company to pay the usual mileage on the cars taken and used, and such practice is a reasonable one, and should be enforced.

There is no law or custom requiring a railway company receiving freight from a connecting line to advance or assume the payment of the charges due thereon for the transportation from its point of origin to the connecting line. If it does thus advance or assume the payment of such charges, it can retain a lien upon the property transported for their payment as well as for the transportation rendered by itself. A railway company, like any other common carrier, has a right to demand that its charges for transporting goods shall be

paid in advance, and is under no obligation to receive the goods for transportation unless such charges are paid, if demanded. The general practice, it is true, is to collect the charges upon delivery of the goods transported to the consignee, and, where goods are received without the payment in advance being demanded, it becomes the duty of the railway company to complete the carriage. Its right to payment in advance is thus waived. It holds, however, a lien upon the goods for payment, and in case the goods are delivered previous to payment it can hold the consignee responsible. The same law applies where the goods are received from the original consignor or from an intermediate carrier. The railway company, in the absence of any contract on the subject, is under no obligation to take the carriage in the one instance, or to continue the carriage in the other, without prepayment of its charges, if demanded.

As to the alleged obligation of the defendant to honor tickets or coupons for passage over its lines north of Portland, issued by the complainant, it is sufficient to say there is no evidence in support of it. The practice of railway companies, operating connecting lines, to honor tickets or coupons for passage over their respective lines issued by a connecting company, which is very general, is founded entirely upon arrangements between the connecting companies. In the absence of such arrangements, there is no obligation on the part of either company to honor tickets issued by the other. All the witnesses examined on this point concur in their statements in this respect.

2. But it is also contended that the obligation alleged of the defendant to receive freight tendered to it by the complainant at Portland, and to transport it to the point of destination without breaking bulk, in the manner mentioned, and to pay the charges stated, and honor the tickets of connecting companies for passage over its road north of Portland, is imposed by the third section of the Interstate Commerce Act. 24 Stat. at L. chap. 104, p. 380. That section is as follows:

"That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. Every common carrier subject to the provisions of this Act, shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines, but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

The first subdivision of this section does not make all preferences or advantages which

may be given by a common carrier unlawful; only those which are undue or unreasonable are forbidden. The second subdivision is similarly guarded in its provisions. Common carriers are there only required, according to their respective powers, to afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and are forbidden to discriminate in their rates and charges between them. And even this provision is subject to the limitation that it shall not be construed as requiring any common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business. As justly said by the circuit court of the United States in the case of *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 102, 37 Fed. Rep. 824:

"No provision of the Interstate Commerce Act confers equal facilities upon connecting lines under dissimilar circumstances and conditions. On the contrary, even as to interstate commerce itself, the distinction is recognized throughout between discriminations and preferences which are just and reasonable and those which are unjust and unreasonable, according as they are made or given under similar or dissimilar circumstances and conditions. All discriminations and preferences are not forbidden or made unlawful, but only such as are unjust or undue or unreasonable are prohibited. In each and every case, therefore, the question whether a discrimination is unjust or a preference is undue or unreasonable, either as to the common carrier or the commerce it may transport, involves a consideration of the circumstances and conditions under which such discrimination or preference is made or given."

It does not appear from the testimony produced in this case that the defendant has, as against the complainant, made or claimed the right to give any undue or unreasonable preferences or advantages to any person, company, firm, or corporation, or locality, in receiving and transporting freight in the cars in which it is tendered. It has claimed the right in all cases to refuse to take freight and transport it in foreign cars, when it has cars of its own in which it can be carried, except only where the freight is of such a character that its transfer to another car would be injurious to it. The answer of the defendant impliedly admits that it has usually refused to transport freight in foreign cars, where the freight has originated east of the 97th meridian, unless the complainant waived on its own cars, and assumed to pay on the cars of other companies, the current rates of mileage for the distance run over defendant's road; but such refusal can in no respect be deemed an unreasonable discrimination against the complainant, if made when the defendant's own cars were not in use, but were free to be employed in the transportation desired, or was made when to transfer the freight would not have been injurious to it. Nothing of this kind being shown, there was no foundation for the allegation of any unjust or illegal discrimination in favor of other companies, as against the complainant, upon which this suit proceeds.

The alleged discrimination against freight originating east of the 97th and 105th meridi-

ans, in favor of freight originating west of those meridians, is not shown to have been made under conditions which rendered it unreasonable or a denial of equal facilities afforded to others. Proof to that effect must be produced to authorize a court to interfere with the conduct of a railroad company in the interchange of traffic with connecting lines, upon charges of giving undue or unreasonable preferences to some of them over others, and thus unlawfully discriminating between them. The provision in the second subdivision of the 3d section of the Interstate Commerce Act, that a common carrier shall not be required to give the use of its tracks and terminal facilities to another carrier engaged in like business, is a limitation upon or qualification of the duty [declared of] affording all reasonable, proper, and equal facilities for the interchange of traffic; and the receiving, forwarding, and delivering of passengers and property to and from the several lines and those connecting therewith. It was so expressly held in the case above cited of *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 102, 37 Fed. Rep. 571.

It follows from this, as it was decided in that case, that a common carrier is left free to enter into arrangements for the use of its tracks or terminal facilities with one or more connecting lines, without subjecting itself to the charge of giving undue or unreasonable preferences or advantages to such lines, or of unlawfully discriminating against other carriers. In making arrangements for such use by other companies, a common carrier will be governed by considerations of what is best for its own interests. The Act does not purport to divest the railway carrier of its exclusive right to control its own affairs, except in the specific particulars indicated. As said in the case of *Chicago & A. R. Co. v. Pennsylvania R. Co.* 1 Inters. Com. Rep. 357, 360, 1 I. C. C. Rep. 86, 95:

"The right of ownership of railroad property, with the power of control over employes and management of the property, is as absolute under the Act as before its passage. The regulation of commerce between the states, which is all that the Act contemplates, does not involve community of property or joint control of subordinates among the several companies that honor through tickets. The corporate powers of every company for all administrative and governing purposes within its prescribed sphere remain unimpaired. With the legitimate exercise of these powers another company has no concern and no right to intermeddle."

3. The 5th section of the defendant's charter, that is, of the Act of Congress of July 2, 1864, creating the Northern Pacific Railroad Company, making it the duty of that company to permit any other railroad company which should be authorized to be built by the United States, or by the legislature of any territory or state in which the same may be situated, to form running connections with it on fair and equitable terms, does not impose any obligation upon the company to carry freight in the cars in which it may be tendered by a connecting line when its own cars are not in use, except where the transfer of the freight

to another would be injurious to it. In all other cases the receipt and transport of the freight tendered in foreign cars is a matter of conventional arrangement between it and the connecting company. The running connections which must be permitted by the defendant are not, as contended by complainant's counsel, a running over its line, but only in connection with it; a provision intended to secure the transportation and exchange of freight between connecting lines, and not the use of each other's road by the cars of such companies. Whenever an intention has been manifested, in the creation of railway charters, that a connecting company shall have the power to run its cars over the line of another, or to require one company to haul over its line the cars of another, such intention has been expressed in unequivocal terms, such as is found in the constitutions or statutes of several of the states respecting railway companies, which is substantially in these terms: "And they shall receive and transport each other's passengers, tonnage, and cars, loaded or empty without delay or discrimination." In some of the English charters of railway companies it is provided that all companies and persons shall be entitled to use the railway with engines and carriages, properly constructed, subject to the provisions of the "act for the better regulation of railways and for the conveyance of troops, and regulations to be from time to time made by the company."

The terms "running connections," as used in the Act of July 2, 1864, in incorporating the defendant, apply to both passenger and freight connections and facilities, and yet they do not require the defendant to haul special cars of other companies, such as excursion cars, sleeping cars, or cars designed for accommodation in certain particulars, in the absence of specific contract to that effect. *Worcester Excursion Car Co. v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 793, 3 I. C. C. Rep. 581. Section 5 of its charter requires it to furnish the equipment to be used on its road. As justly observed by counsel, a running connection which should require the defendant to receive in its freight and passenger trains, composed of cars equipped with automatic couplers, air brakes, steel tires, and other improvements tending to facilitate the safe and economical operation of the train and lessen the probability of accidents, cars without such equipment, and not adapted to the service and facilities furnished by the defendant, cannot be regarded as fair and equitable. We are of opinion that a running connection of one road with another, within the meaning of the defendant's charter, only includes such arrangements as to the time of arrival and departure of trains, and as to stations, platforms, and other facilities, as will enable companies desiring to connect to do so without detriment or serious inconvenience.

We do not deem it essential to inquire into the arrangements alleged to have been made by the Transcontinental Association, and how far those arrangements should be regarded as binding upon the parties as to traffic in freight originating east of the 97th meridian, and in the passenger traffic originating east of the 105th meridian, as the material questions which must govern the interchange of freight and passen-

gers at points of connection in their respective lines, from whatever quarter they may come, are considered so far as there is any difference in the contention between the parties to this suit.

Upon a consideration of whatever we deem material in the controversy before us, and the proofs which have been produced as to the course of business pursued by the defendant, we do not perceive anything against which the complainant can make any valid objection. It is not shown that the defendant has, at any time, refused to make proper connections with the complainant seeking to send freight or passengers over its lines north of Portland, or has, in that respect, given any undue or unreasonable preferences or advantages to other companies over the complainant. It was under no obligation, by custom or law, to receive the freight of the complainant or of other companies in the cars in which it was tendered, and transport it over its own road in such cars, when its own cars were not in use, but were free to be employed in the transportation desired, unless it would be injurious to the freight to have it removed from one car to another. Nor is it shown that in any cases it has unlawfully discriminated in its charges against the complainant in the transportation of its freight in favor of other companies. It therefore follows, without further consideration of the numerous matters touched upon by counsel, that the bill cannot be sustained. It will therefore be dismissed, and the mandatory injunction heretofore issued be dissolved; and it is so ordered.

Deady, District Judge, dissenting:

I am sorry I am not able to concur in the foregoing opinion, and, although I do it with some hesitation, I think it proper to give briefly my reasons therefor. It is admitted by counsel for the defendant that the second clause of section 3 of the Act entitled "An Act to Regulate Commerce," (24 Stat. at L. 380) is new, and imposes obligations and restraints upon common carriers, "subject to the provisions of the Act," unknown to the common law; and this is apparent independent of such admission. The question is, what are these obligations and restraints? The plaintiff contends in this case, that the duty imposed upon defendant is at least that of hauling car loads of freight, without breaking bulk, when tendered it by the plaintiff, over its line, from Portland to points on the sound, charging therefor its local rates, and paying therefor, for the use of the car, the customary rate of one fourth of a cent per mile. The defendant denies this obligation, and contends it is only bound to carry freight in its own cars, and that the plaintiff must unload its cars at Portland, and tender the freight thus unloaded, to be railroaded on the defendant's cars as if it originated at that point. This much it was bound to do at common law,—to carry all freight tendered to it in the order in which it was received. But the section goes beyond the common law, and therefore it must impose a duty beyond that of merely receiving freight from the plaintiff when unloaded from its cars. The language of the second clause of the section in this respect is as follows:

"Every common carrier, subject to the pro-

visions of this Act, shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its track or terminal facilities to another carrier engaged in like business."

The carrier is to afford these "facilities" for what purpose? The Act says, "For the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith." To exchange freight in bulk, by car loads, is certainly a "reasonable and proper facility" for that purpose. It is a general custom, except in some special instance like this, where the carrier disobeys the injunction of the law for the purpose of injuring a competing line in its own interest. To exchange freight by the car load is a "reasonable and proper facility" for the interchange of traffic between these lines, and it is such a facility to enable them to receive and forward passengers and property to and from their respective lines and those connected with them. On the other hand, to require the plaintiff to unload its cars with freight destined for points on the sound, at Portland, and there reload the same on the defendant's cars as freight originating at the latter point, is to afford no facilities for such purpose at all. Such a construction of the statute renders it altogether nugatory, and leaves the matter as at common law. The proviso to the section strongly supports the plaintiff's contention. It was evidently inserted out of abundance of caution, lest the very general and unqualified language of the preceding clause might be "construed" to authorize or require one "carrier" to give the use of its tracks or terminal facilities to another. But, short of this, all facilities known to the railway business, whether the result of contract or custom, must be regarded as "reasonable and proper," in the interchange of traffic, or the receiving, forwarding, and delivering of passengers and property to and from connecting lines, such as those of the plaintiff and the defendant.

The cost of unloading freight from the plaintiff's cars to the defendant's, at this point, operates as a hindrance, if not a bar, to the transport of freight by the former, originating east of the 97th meridian, to be delivered at points on the sound. The defendant has no more natural right to a monopoly of this business than it has to that originating west of said meridian. To compel the plaintiff to submit to this exaction is to require it to build a competing road between Portland and the sound, when one is amply able to do all the business. The community is thereby taxed to support two roads, where one only is necessary. The defendant should be required to haul the plaintiff's cars, and also pay the back charges on the freight to this point, and collect the same from the consignee on the sound. This

is a "reasonable and proper facility" for the transaction of business, and is customary and usual as well. There may be exceptions to this rule, as in the case of perishable freight. But in all other cases the defendant takes no risk in paying such charges, because the freight is good for them. "All reasonable and proper facilities for the interchange of traffic," and "for the receiving, forwarding, and delivering of passengers and property," to and from connecting lines, includes, at least, such facilities as railways were accustomed to afford one another before the passage of the Act, whether as the result of usage or contract. Nothing less could have been in the mind of the legislature on the passage of the Act. And in my judgment the last clause of section 5 of the Act organizing the Northern Pacific Railway Company (18 Stat. at L. 369) also requires the defendant to afford the plaintiff the facilities in question. It reads:

"And it shall be the duty of the Northern Pacific Railway Company to permit any other railroad which shall be authorized to be built by the United States, or by the legislature of any territory or state in which the same may be situated, to form running connections with it, on fair and equitable terms."

This statute is mandatory. The matter is not left to the pleasure or judgment of the defendant. It shall be its "duty" to permit any other road to form "running connections with it on fair and equitable terms." What are "running connections" but the right to have car loads of freight hauled over the defendant's road, and that "on fair and equitable terms," which means, at least, such terms as are usual in such cases, whether established by custom or contract. Nothing more is asked by the plaintiff in this case, and, in my judgment, the injunction should be made perpetual.

UNITED STATES CIRCUIT COURT OF APPEALS (8th Circuit.)

CHICAGO & NORTHWESTERN R. CO., *Plff. in Err.*, v. JOHN OSBORNE.

SAME, *Plff. in Err.*, H. A. JUNOD.

(See 8. C. 53 Fed. Rep. 912.)

1. The joint through tariff rates established by two or more carriers over their lines or any parts thereof cannot be made the basis by which the reasonableness of the local rates on either line can be determined.
2. No violation of the long and short haul clause of the Interstate Commerce Act which will sustain an action for damages is shown by the mere fact that a larger tariff rate was collected for shipments between points on a carrier's road than the proportion of a joint through rate which such carrier received for hauling over its road similar commodities billed to points beyond its

road a longer distance, which included the shorter one.

3. That a shipper was not informed of the through tariff rates when making shipments between local points will not avail him as a basis for an action for violation of the long and short haul clause of the Interstate Commerce Act of 1887 where he made no inquiry and no false statements were made to him, and the shipping point was a non-competing one where no publication of the joint rate was required, under the order of the Commission made June 21, 1887.

October 17, 1892.

WRITS OF ERROR to the Circuit Court of the United States for the Southern District of Iowa to review judgments in favor of plaintiffs in actions brought to recover damages for alleged violations by defendant of the long and short haul clause of the Interstate Commerce Act. *Reversed.*

Statement by **Brewer, Circuit Justice:**

The defendant in error, plaintiff below, recovered a judgment in the Circuit Court of the United States for the Southern District of Iowa for the sum of \$225 for alleged overcharges on corn shipped from Scranton, Iowa, to Chicago. The action was brought under the Interstate Commerce Act of February 4, 1887 (24 Stat. at L. p. 379). The facts material to the inquiry are as follows:

The defendant owns and operates a railroad from Missouri Valley, a town on the western border of Iowa, to Chicago, Ill. Scranton is a town in Iowa on the line of this road, 88

miles east of Missouri Valley, and therefore so much nearer Chicago. The Fremont, Elkhorn & Missouri Valley Railroad Company owns a railroad running east and west through Nebraska, and connecting with the defendant's road at the town of Missouri Valley. Blair, Neb., is a point on that road, 13 miles west of Missouri Valley. While the Fremont, Elkhorn & Missouri Valley Railroad Company is an independent corporation, a majority of its stock belongs to the defendant company, and thus the defendant company controls its operations.

During the month of January, 1888, there

was in force a local tariff of rates charged on the defendant's road. This local tariff was duly published in Scranton. In accordance with it, the rate from Scranton to Chicago on corn was 18 cents per 100 pounds. All shippers shipping simply to Chicago paid that rate. The plaintiff, among others, made sundry shipments, and was charged and paid such sum. There was, so far as appears, absolute uniformity of rate as to all such local shipments. At the same time the tariff on corn shipped through from Blair, Neb., to New York city was 88½ cents; to Boston, Philadelphia and Baltimore, sums slightly above and below this figure. This through rate was made up in this way: By agreement between the defendant and eastern companies, corn was shipped through to New York from Turner and Rochelle, two small stations on the defendant's road, one 30 and the other 70 miles west of Chicago, for 27½ cents, 3¼ cents of which went to defendant, and the balance to the eastern companies; and by agreement between the defendant and the Fremont, Elkhorn & Missouri Valley Railroad Company, the rate from Blair to Turner and Rochelle, on corn shipped to New York, Boston, Philadelphia, or Baltimore, was 11 cents. In other words by these agreements of the several companies a through rate was fixed on corn shipped from Blair to New York and other eastern cities; and of that through rate the defendant company received, for carrying the whole line of its road, less than the local tariff of 18 cents, charged from Scranton to Chicago. This joint tariff was not published at Scranton, and no knowledge of it was given to or possessed by the plaintiff until February 24th; and until that time he made no application for shipment beyond Chicago. Thereafter he shipped to Boston, and received the benefit of the through tariff.

W. C. Goudy and N. M. Hubbard for plaintiff in error.

C. C. Nourse and C. L. Nourse for defendants in error.

Before Brewer, Circuit Justice, and Caldwell and Sanborn, Circuit Judges.

Brewer, Circuit Justice, delivered the opinion of the court:

This case must be determined exclusively by the provisions of the interstate commerce law, as it was originally passed and before any amendment. No question was submitted to the jury, and no evidence was offered, as to whether 18 cents was or was not in fact a reasonable rate for carrying corn from Scranton to Chicago. The theory of the plaintiff's case was that the defendant company had violated the fourth section of the Act, by charging more for a short than for a long haul; and, of course, if it had, it is liable to the plaintiff.

We do not care to enter into any extended discussion of the Interstate Commerce Act. It was the first effort of the general government to regulate the great transportation business of the country. That business, though of a quasi public nature, and therefore subject to governmental regulation, has, as a matter of fact, been carried on by private capital through corporations. The fact that it was a quasi public

business always prevented the owners of capital invested in it from charging, like owners of other property, any price they saw fit for its use. A reasonable compensation was all that they could exact, and he who felt aggrieved by a charge could always invoke the aid of the courts to protect himself against it. With him, however, lay the burden of proving the fact that the charge was unreasonable; a burden which all experience shows was onerous, and therefore seldom undertaken; the party aggrieved preferring to submit to the overcharge, rather than go to the expense and time of contesting it. Hence the efforts by state and nation to establish limits of charges, and means of evidence of easy and accurate ascertainment. While it is the duty of the courts to see that the provisions established by Congress are not frittered away on technical or trifling grounds, yet it is also equally their duty to see that such a legislation is not carried beyond its clear scope, and that the owners of private capital invested in the business of transportation be not deprived of their liberty of contract and right of control any further than the lawmaking power has intended that they should be.

With these preliminary observations, we remark:

First. That Congress has not attempted to require that the tariffs on all roads be uniform; nor has it attempted to place a limit in figures beyond which no company may go in its charges. The laws of business and of competition have, as yet, been deemed sufficient restraints in that direction. The Rock Island is, between Chicago and the Missouri river, a parallel and competing road with the defendant company; yet there is nothing in the commerce Act which compels either company to charge for through or local transportation the same as its competitor. Either company may reduce its rates as far as it pleases below what is reasonable and a fair compensation for the service without violating the Act; and such reduction compels no change by its competitor or any other company. This is obvious from a mere reading of the Act.

Secondly. That, where two companies owning connecting lines of road unite in a joint through tariff, they form for the connected roads practically a new and independent line. Neither company is bound to adjust its own local tariff to suit the other, nor compellable to make it joint tariff with it. It may insist upon charging its local rates for all transportation over its line. If, therefore, the two companies by agreement make a joint tariff over their lines, or any parts of their lines, such joint tariff is not the basis by which the reasonableness of the local tariff of either line is determined. To illustrate: On the defendant's road, the distance from Turner to Chicago is 30 miles; on the Lake Shore line, from Chicago to Cleveland it is two or three hundred miles. The defendant company may charge 15 cents for transporting grain the 30 miles from Turner to Chicago, providing that be in fact only a reasonable charge for the service, although the Lake Shore Company charges no more for transporting it from Chicago to Cleveland; and the fact that the rate on each line is 15 cents for the distance named will not

prevent the two companies from making a joint tariff for grain shipped from Turner to Cleveland of 12 cents; less than the local tariff of either. That we may not be misunderstood, we not mean to intimate that the two companies, with a joint line, can make a tariff from Turner to Cleveland higher than from Turner to Buffalo, or any other intermediate point between Cleveland and Buffalo; for when the two companies, by their joint tariff, make a new and independent line, that new and independent line may become subject to the long and short haul clause. But what we mean to decide is that a through tariff on a joint line is not the standard by which the separate tariff of either company is to be measured or condemned.

This proposition may not be as obvious as the former, and yet a careful study of the Act leaves no doubt of its correctness. In the first section a definition is given of the term "railroad," which, in addition to bridges and ferries includes "also all the road in use by any corporation operating a railroad, whether owned or operated under a contract, agreement, or lease." A joint tariff does not bind road to road in the sense that the two are used or operated by either corporation. There is neither unity of ownership nor unity of operation, but only a singleness of charge, and a continuity of transportation over connecting roads. Neither is there any mandate to connecting companies to surrender any control over their own roads, or to unite in a joint tariff. "Reasonable, proper and equal facilities for the interchange of traffic" are commanded by the third section; but with the proviso: "This shall not be construed as requiring any such common carrier to give the use of its track or terminal facilities to another carrier engaged in like business." No power existed at common law, and none is given by the Act to court or commission, to compel connecting companies to contract with each other, to abandon full control of their separate roads, or to unite in a joint tariff. *Memphis & L. R. R. Co. v. Southern Exp. Co.* ("Express Cases.") 117 U. S. 1, 29 L. ed. 791; *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 37 Fed. Rep. 567; *Little Rock & M. R. Co. v. St. Louis, I. M. & S. Ry. Co.* 2 Inters. Com. Rep. 768, 41 Fed. Rep. 559. The whole matter is left to the voluntary action of the companies; and, in forming by agreement any joint tariff the basis of division and the proportion of moneys each shall take is also a matter left to their determination.

The denunciation of the fourth section is against each separate common carrier, for its violation of the "long and short haul" clause on its own line. The language is:

"That it shall be unlawful for any common carrier, subject to the provisions of this Act, to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property, under substantially similar circumstances and conditions for a shorter than for a longer distance over the same line, in the same direction; the shorter being included within the longer distance."

The use of the word "line" is significant. Two carriers may use the same road, but each has its separate line. The defendant may lease

trackage rights to any other railroad company, but the joint use of the same track does not create the "same line," so as to compel either company to graduate its tariff by that of the other.

Further, by section 6, every common carrier is required to print and publish at every depot along its own road schedules showing its rates and fares and charges. There is a prohibition against advancing rates without giving notice, and, in case of a reduction, notice thereof must be immediately posted; whereas, in reference to joint tariffs, the requisition is simply that each common carrier furnish to the commission a copy of all contracts therefor, as well as copies of the joint tariffs; and power is given to the commission to determine the amount of publication that shall be required.

Again, at the time of the passage of this Act joint through tariffs were well known, as well as the fact that they were generally less than the sum of the local tariffs, and not distributed between the several companies making them according to the mere matter of mileage. In this Act joint tariffs are recognized; and if Congress had intended to make the local tariff subordinate to or measured by the joint tariff, its language would have been clear and specific.

It is worthy of note that in the debates which attended the passage of this bill through the two houses, and while this matter was under discussion, it was again and again said by those participating in the debates that the line formed under the joint tariff of connecting companies was one separate and independent from that of either of the connecting companies; and also worthy of note that in the actual administration of affairs by the Interstate Commerce Commission the same thing has been constantly recognized.

Applying these propositions to the case at bar, a conclusion is easily reached. There is no pretense that any shipper at Scranton, or other point on the defendant's line further from Chicago than that, was charged less for shipping grain to Chicago than the plaintiff. In other words, there was no violation of the "long and the short haul" clause by the defendant, in respect to its own line; nor did the defendant, acting with eastern companies, on the line made by its road in connection with theirs, charge or receive for grain shipped from Scranton or any point west, to any eastern point, less than the through tariff. In other words, the defendant did not, separately or in connection with other companies, violate section 4. It avails the plaintiff nothing that he was unaware of this through joint tariff at the time he made the shipments which are the basis of his cause of action. No false statement was made to him. He made no inquiry in respect to its existence. The matter of publication was by the Act, as it then stood, left to be determined by the Commission. The provision of the statute, section 6, is as follows:

"Such joint rates, fares, and charges on such continuous lines so filed as aforesaid shall be made public by such common carriers when directed by said Commission, in so far as may, in the judgment of the Commission, be deemed practicable; and said Commission shall, from time to time, prescribe the measure of publicity which shall be given to such rates, fares

and charges, or to such part of them as it may deem it practicable for such common carriers to publish, and the places in which they shall be published."

And the order of the commission made June 21, 1887, provided that—

"Such joint tariffs shall be so published by plainly printing the same in large type of at least the size of ordinary 'pica,' copies of which shall be kept for the use of the public in such places and in such form that they can be conveniently inspected, at every depot or station upon the line of the carriers uniting in such joint tariff, where any business is transacted in competition with the business of a carrier whose schedules are required by law to be made public as aforesaid."

Scranton was no competing point. No other line, so far as appears, touched the place; and hence no publication of the joint tariff was

there required. Of course the defendant was under no common law or statute obligation to advise the plaintiff where or how he had better ship his grain. It fulfilled its legal obligation when it published its local tariff, and advised him truthfully in respect to any rates in respect to which he made special inquiry.

For the reasons above stated, on the facts as they appeared in evidence, the jury should have been instructed to find a verdict for the defendant.

The judgment of the court below will be reversed, and the case remanded for further proceedings in accordance with this opinion.

Case No. 68. *Chicago & Northwestern Railway Company, Plaintiff in Error, v. H. A. Junod* and R. Y. Culbertson, Defendants in Error*, involves the same questions, and the same judgment of reversal will be entered.

*See S. C. 3 Inters. Com. Rep. 668.

TEXAS COURT OF CIVIL APPEALS.

BATEMAN BROS. *et al.*, *Appts.*, *v.* WESTERN STAR MILLING CO.

(.....Tex. App.)

A statute denying the right of a corporation of another state to bring an action within the state until it has filed its articles of incorporation therein is inoperative as to an action brought

for the purchase price of goods sold within the state by commercial agents or drummers, as this constitutes interstate commerce.

October 11, 1892.

A PPEAL by defendants from a judgment of the District Court for Tarrant County in favor of plaintiff in an action brought to enforce payment of certain acceptances. *Affirmed*. The facts are stated in the opinion.

Messrs. Greene & Humphreys for appellants.

Messrs. Camp & Camp and J. P. Hutchinson for appellee.

Tarleton, Ch. J., delivered the opinion of the court:

January 5, 1891, in the district court of Tarrant county, appellee, as plaintiff, brought this suit against appellants, as defendants, upon certain acceptances in the aggregate sum of \$1,422.82. From a judgment in behalf of appellee for this amount, rendered June 25, 1891, appellants prosecute this appeal. There is in the record an agreed statement of the facts proved. The terms of this agreement, with reference to the interstate character of the transaction involved and herein below referred to, are to some extent vague and indefinite. As interpreted by us, however, and by the parties in their briefs, the agreement shows substantially as follows: That at the date of the acceptances, and of the institution of this suit, and of the rendition of the judgment, the plaintiff was a foreign corporation for pecuniary profits, organized under the laws of the state of Kansas, and that at said dates it was, and had been, through its commercial agents and

otherwise, soliciting business in the state of Texas, and as such had sold goods to the defendants in this cause and to various other persons and firms in Texas; that it had no general office or special place of business in this state; that at said dates it had failed to file its articles of incorporation with the secretary of state of the state of Texas, for the purpose of procuring a permit under the provisions of the act of the legislature of the state of Texas, approved April 8, 1889; that the acceptances sued on were executed in consideration of certain goods and merchandise purchased by the defendants in Ft. Worth, Tex., from plaintiff, through its commercial agent or drummer; that, in pursuance of said purchase, the goods in question were shipped by the appellee in the state of Kansas, thence transported and delivered to the appellants in Ft. Worth, Tex. The act of the legislature referred to requires that corporations (save in certain specified cases) desiring to transact business in this state, or solicit business in this state, or establish a general or

special office in this state, shall file with the secretary of state a duly certified copy of their articles of incorporation. It further provides that, on failure to so file such articles of incorporation, no such corporation can maintain any suit or action, either legal or equitable, in any of the courts of this state upon any demand, etc. It further provides that in order to procure such permit such corporation shall pay a fee ranging from \$25 to \$200, according to the amount of its capital stock. The contention of appellants is that the failure of plaintiff to comply with the act of the legislature above referred to defeats its right to maintain this suit. The contention of appellee is that to it, as a foreign corporation engaged in interstate commerce, this statute is inapplicable, or, if sought to be applied, that it is unconstitutional and void; that it is repugnant to the "commerce clause" of the Federal Constitution. The principle is well established that it rests purely within the discretion of a state to recognize or to repudiate a foreign corporation; that it can, if such be its pleasure, exclude such a corporation entirely, or admit it conditionally. This principle, however, is not of universal application. A very emphatic and well fixed instance in which it does not obtain is where a foreign corporation is engaged in interstate or foreign commerce. *Horn Silver Min. Co. v. New York*, 4 Inters. Com. Rep. 57, 143 U. S. 314, 36 L. ed. 167. That provision of the Federal Constitution which provides that "Congress shall have power to regulate commerce with foreign nations, and among the several states," constitutes such regulation a domain of legislation peculiarly within Federal prerogative. The question then arises, was the corporation plaintiff in this case engaged in "interstate commerce," within the meaning of the Federal constitution? The record, as we understand it, discloses that plaintiff corporation shipped from its domicile in Kansas goods and merchandise to Ft. Worth, Tex., and there delivered them, or caused them to be delivered to appellants, for which the indebtedness sued on was contracted. Their goods were commodi-

ties of barter and sale,—the essence of commerce; and the business in which the corporation plaintiff was engaged consisted in transactions of this character. It must be held, therefore, that the sale, transportation, and delivery of merchandise under such circumstances, and in the transaction of such business, from one state to another, constituted an "interstate commercial transaction," within the meaning of the "commerce clause" in question, which applies as well to commerce carried on by corporations as to that carried on by individuals. *Paul v. Virginia*, 75 U. S. 8 Wall. 181, 19 L. ed. 360; *Robbins v. Shelby County Tazing Dist.* 120 U. S. 489, 30 L. ed. 694; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 29 L. ed. 158. See also opinion of Matthews and Blatchford, *Justices*, in *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 727, 28 L. ed. 1187; *Crutcher v. Kentucky*, 141 U. S. 47-62, 35 L. ed. 649, 654. We are constrained, therefore, to hold, by virtue of an unavoidable construction of the authorities cited, that the statute invoked, if applied to the corporation plaintiff in this case, and to its transactions would impose conditions and restraints upon interstate commerce; that it would regulate interstate commerce. So understood and so applied, it is in conflict with the constitutional provisions referred to and must be deemed inoperative and void. *Singer Mfg. Co. v. Hardee*, 4 New Mex. 175; *Ware v. Hamilton Brown Shoe Co.* 92 Ala. 145. The opinions in the cases last cited from the supreme courts of New Mexico and of Alabama, respectively, are peculiarly pertinent here. There are doubtless, however, cases in which the statute in question would be effective, and beneficially so; but it must be held not to be applicable in this case. Appellants addressed to the plaintiff's petition a special exception, the overruling of which they have assigned as error. We lay no stress upon this assignment, as, in the light of the facts subsequently fully developed, any error committed in reference to the special exception was rendered wholly immaterial.

The judgment is affirmed.

UNITED STATES CIRCUIT COURT, WESTERN DISTRICT OF TENNESSEE.

LITTLE ROCK & MEMPHIS R. CO.,

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO. *et al.*

(See S. C. 47 Fed. Rep. 771.)

1. Diversity of citizenship of the parties is not necessary to give jurisdiction to United States circuit courts of suits arising out of alleged violations of the Interstate Commerce Act.
2. That the remedies prescribed by the Interstate Commerce Act are not applicable to a particular case arising under its provisions does not deprive the United States circuit court of jurisdiction, since by the Judiciary Act such courts are given jurisdiction of all controversies arising under any Act of Congress.

4 INTER S.

3. No unlawful discrimination against a railroad is effected by the traffic arrangement of a rival road running parallel with it for a considerable distance from their common initial point by which through tickets are sold to points on the rival road beyond the point of divergence exclusively over the latter without granting the former any facilities for securing a share of the traffic to such points for the distance which it could carry it.
4. In making contracts for through transporta-

tion of passengers the initial carrier may lawfully prefer a road going through to the point of destination to one going only part of the way, an

arrangement with which would necessitate further arrangements to reach the desired point.

Decided September 16, 1891.

SUIT in equity to enjoin alleged discrimination against plaintiff in certain through traffic arrangements and rates which had been established by defendants. On demurrer to bill. *Demurrer sustained.*

Messrs. U. M. Rose and G. B. Rose, for plaintiff:

The complainant demands nothing unreasonable. It simply asks that it be put upon an equal footing with its adversary, and that every one be left free to choose between them. Owing to its shorter line and its better connections it has hitherto enjoyed the greater part of the business. Now it is sought to force the public to take a different route, a route which it does not willingly adopt, passage over which subjects them to annoying delays and failures of connections.

This question is one of life and death for the complainant. It is a short and a weak road. Its western outlets are all in the hands of its adversary, and if the system which is now sought to be put in force is to be allowed, it must perish. Will it be for the good of the public that it should do so? When it has been devoured will the public be better served? When the Iron Mountain has a monopoly will it consult the interest of the public? Will it improve its rolling stock and its track? Will its servants be more polite and considerate?

All the decisions that have been rendered since the passage of the Act enforce the construction for which we contend.

When the case now before the court was before the Interstate Commerce Commission that tribunal decided that the action of the defendant companies was clearly in contravention of the Act, but that the Commission was not invested with the power to remedy the grievance.

Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co. 2 Inters. Com. Rep. 458, 8 I. C. C. Rep. 10. See also *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.* 8 Inters. Com. Rep. 205.

Mr. W. G. Weatherford also for plaintiff.

Messrs. Morgan & McFarland, Poston & Poston and William M. Baxter for defendants.

Hammond, J., delivered the opinion of the court:

The Little Rock & Memphis Railroad extends from Memphis, Tenn., to Little Rock, Ark., where it has a physical connection with the St. Louis, Iron Mountain & Southern Railroad, extending from St. Louis, Mo., by way of Little Rock, to Texarkana, at the junction of the boundaries of the states of Texas, Arkansas and Louisiana, where it connects with other railroads running into Texas and across the continent. The East Tennessee, Virginia & Georgia Railroad, with its leased line of the Memphis & Charleston Railroad, extends east-

wardly from Memphis to the eastern boundary of the state of Tennessee, and with its connections runs into many states and to the seaboard. The Iron Mountain road has a branch of its road running from Bald Knob, Ark., to Memphis. At Memphis the eastern and western connections are made by rail through the streets of the city, and by railroad transfer ferries across the Mississippi river; but it is alleged in the bill that as to passengers the connection with the Iron Mountain road must be made by ordinary vehicles, through the streets, transferring them from one railway car to another from the stations of each road, while the connection with the Little Rock road may be made by rail through the city and across the river; wherefore the bill alleges the traveling public prefers the Little Rock & Memphis road, and would largely patronize it, but for the alleged discriminations against it which it is the purpose of the bill to remove. These discriminations consist, as appears from the averments of the bill, of a traffic arrangement made between the Iron Mountain road and the East Tennessee, Virginia & Georgia system, whereby through ticketing of passengers is made to points beyond Little Rock over the Bald Knob branch of the Iron Mountain road, which is refused to the Little Rock road, and, coming this way, the Iron Mountain refuses to sell through tickets over the Little Rock road to Memphis or beyond. This arrangement is carried out by the East Tennessee, Virginia & Georgia declining to sell through tickets over the Little Rock, and the Iron Mountain refusing to recognize such tickets on its road; and the bill states specifically the facts and figures which show how hardly this discrimination bears upon the Little Rock road, and deprives it of travel which, before the Bald Knob branch was built, it enjoyed as a monopoly, and would yet enjoy, the bill states, if the choice of the traveling public was allowed to operate in favor of its better facilities and shorter route. The bill avers that this discrimination is in violation of the Interstate Commerce Act of Congress, and prays for a mandatory injunction and other process to compel the defendant roads to sell and recognize through tickets over the plaintiff road, and for general relief.

It may be observed here that the bill does not complain of any discrimination to Little Rock or points on the plaintiff road between Little Rock and Memphis, and it is stated in the argument that the East Tennessee, Virginia & Georgia system still sells tickets over the plaintiff road to Little Rock, if desired, as well as over the Iron Mountain; but the trouble arises over points beyond Little Rock west, and beyond Memphis east. To this bill there has been a demurrer filed, because—*First*, there is no equity in it; *second*, there is no complaint cognizable under the Interstate Commerce Act, and no conduct is averred violating it; *third*, the matter complained of is not sub-

ject to legislative or judicial control, and can be reached only by mutual agreement; and, *fourth*, not coming within the Interstate Commerce Act, the court has no jurisdiction, a diversity of citizenship not being averred. The bill is based upon the plaintiff's construction of the third section of the Interstate Commerce Act, which reads as follows:

"Sec. 3. That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business." 24 Stat. at L. 890.

The questions made about the jurisdiction may be easily disposed of so far as they relate to the authority of the court to adjudicate the issues tendered by the bill. The subject-matter of the suit is one arising under an Act of Congress, and the court has jurisdiction without regard to any diversity of citizenship of the parties. *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 851, 2 L. R. A. 289, 37 Fed. Rep. 567, 615. The argument for the demurrer proceeds, however, upon the theory that the jurisdiction of the court here is limited by the provisions of the Interstate Commerce Act prescribing certain remedies which may be taken in this court for its enforcement. It is hardly necessary to decide that question; but, if it be, there can be but little doubt that the plenary jurisdiction of this court to entertain all controversies arising under an Act of Congress, either at law or equity, has not been abbreviated by this Act in relation to controversies arising under it, but the special remedies, so far as they are special, are merely supplementary to the ordinary remedies existing under the subsisting judiciary Act, which governs all our jurisdiction. This is fairly inferable, if not directly decided, from the decision of *Circuit Judge Jackson*, just cited; and in my judgment there can be no doubt of this, whether it has been so decided or not. Whatever jurisdiction a court of equity may entertain of this controversy may be entertained here, if not under the regulations of the Interstate Commerce Act, prescribing certain remedies, then under the Judiciary Act, giving us the powers of an equity court as to all cases and controversies arising under any Act of Congress.

But when we come to consider that branch of the demurrer which denies the equity of

this bill, as in all other demurrers of like kind, it presents for judgment the question whether the bill states an equitable right and asks an equitable remedy, taking the facts averred to be true as stated. It is not so much a question of jurisdiction, often, as it is a question of the sufficiency or merits of the bill; and, that being the case here, we proceed to consider it in that view. If this bill averred that the East Tennessee, Virginia & Georgia Railroad refused to give passengers going over the plaintiff road the same rates and facilities, including through tickets and traffic transfers, that it affords to the Iron Mountain road for passengers going to Little Rock or any other point in the plaintiff road, the court would not hesitate to say that it would be a violation of this section of the Interstate Commerce Act. Whether such violation could be remedied by a court of equity, and by a bill like this, or in a court of law, or could only be reached, as probably many violations only can, by resort to the remedies afforded for criminal prosecution by the Act, would be another matter. But it does not follow, because Congress has not gone far enough to construct the machinery to compel such connections and facilities in the one case as are given by contract in the other case, that it is not a violation of the Interstate Commerce Act; nor, because a court of equity or a court of law cannot redress the violation, as they are now authorized to proceed, that there has been no violation at all. Nor can this prohibition of undue or unreasonable discrimination be evaded by a contract any more than in any other way, if it be undue or unreasonable. It may be that whether the unlawful discrimination be made through the medium of a contract, whether of "through routing," as it is called, or otherwise, or by a refusal of the same rates and same facilities which are given by contract or without a contract, there is at present no redress by resort either to the administrative board which we know as the "Interstate Commerce Commission," or to the ordinary or special remedies prescribed for the courts of law or equity; yet it might possibly be redressed by the criminal courts under the Interstate Commerce Act, or without the criminal provisions of that Act, if the United States had any common law jurisprudence of crime (which it has not), by prosecution as for a misdemeanor. But this bill does not allege any such violation of the Act as that suggested, and it seems to be conceded that the East Tennessee, Virginia & Georgia road does not sell through tickets, and affords the same facilities over the plaintiff's road as over the Iron Mountain to Little Rock; the trouble being not there, but in the refusing to sell through tickets, and affords the same facilities to points beyond Little Rock and not on the plaintiff road, but on the road of the East Tennessee, Virginia & Georgia road's co-defendant, the Iron Mountain road.

Now, reversing the proposition just considered, and coming this way from the west, the court could have just as little hesitation in holding that it cannot be a violation of the Interstate Commerce Act, and it may be even doubtful if Congress could make it so, since it might be taking property for the public use, so to speak, without compensation, or depriving one of property without due process

of law, for the Iron Mountain road to prefer to travel passengers over its own road to Memphis to traveling them over the plaintiff's road, whether they come from Little Rock or beyond on the Iron Mountain road, or some other, and whether they be going only to Memphis or beyond to the eastward or elsewhere; and it cannot be either an undue or an unreasonable discrimination against the plaintiff to afford for passengers superior facilities, such as through tickets, shorter rates or the like, over its own road, in preference to that of its rival, running a road part of the way in the same direction. For illustration, if a passenger wishing to go from Texarkana or further on from some point in Texas to Memphis or beyond desires to travel over the Iron Mountain road, why should it not take him all the way to Memphis, and deliver him to the East Tennessee & Georgia, or some other road wishing to take him on easy terms as to rates, through tickets, and the like, rather than shunt him, at Little Rock, upon the plaintiff's road? It cannot be an unfair or an unreasonable discrimination against the plaintiff for the Iron Mountain to keep him on its own road by offering him superior facilities in the respects mentioned, however undue or unreasonable it might be in other roads to refuse the plaintiff the same facilities in transporting him that it affords the Iron Mountain. In other words, the Iron Mountain would not be violating the statutory prohibition in such a transaction, whatever may be said of other roads. It would be free of such imputation, because it has a line of its own, covering the same distance, and may prefer itself to others, as we all do in obedience to human nature. But even as to the East Tennessee, Virginia & Georgia road, why should it not take this passenger from the Iron Mountain at Memphis on through tickets, easy rates, and whatever terms may be agreed upon, without an imputation of discriminating against the plaintiff. It could only do that by refusing to take the plaintiff's passengers, brought to Memphis, on the same terms as it took the others; and this refusal is not alleged. It is no fault of the East Tennessee road that the plaintiff cannot induce the Iron Mountain to bring passengers over its road from Texas to Little Rock and deliver them for transportation to the plaintiff from Little Rock to Memphis; and we have seen that the Iron Mountain may lawfully refuse this, because it has a road of its own for that service.

Recurring to travel westward from points under the control of the East Tennessee, Virginia & Georgia Road, and we have precisely the same condition; in principle, however, it may seemingly be diverse, for, one desiring to travel from Knoxville, Tenn., let us say, to Texarkana, or beyond into Texas, reaches the Iron Mountain at Memphis, and while he may have a choice of two roads there it is for only a part of the way, and he must at last take the Iron Mountain at Little Rock, and go over that road beyond. It does not depend wholly upon equal or better facilities for transfer at Memphis, but also upon the capacity to transport the passenger to his destination beyond there. Is it not plain that the Iron Mountain may offer him the same facilities to take its road at Mem-

phis that it offered in the other case,—may prefer its own road if it chooses? That it may force him to do that thing by refusing to enter into any arrangement with the plaintiff for a joint transportation of the passenger is equally clear. It is again the right of one to prefer one's self to another, and that cannot be an undue or unreasonable discrimination, however hardly it may bear upon that other, as long as the other is not molested in its business by a refusal to transport its passengers upon the same terms granted to the passengers of other roads. It would be unlawful if the Iron Mountain refused the same rate from Little Rock onward that it offered to other roads feeding it at that point, or to other passengers taking its track there; but it cannot be unlawful to prefer to feed itself from Memphis rather than to have the plaintiff feed it. So the East Tennessee, Virginia & Georgia road, like the passenger we have in hand, may be compelled to route over the Iron Mountain road, rather than over the Little Rock road, by this exercise of its lawful right of preference of its own road by the Iron Mountain. The East Tennessee might violate the statute, if the plaintiff's road ran parallel with the Iron Mountain all the way our passenger is going, if it refused him a choice of routes on the same terms; but that is not this case, and the Iron Mountain has the advantage in reaching points not reached by the plaintiff, and which can only be reached over its own road. The sum of it is that the whole merit of this bill must be tested solely by the right of the Iron Mountain to prefer its own road to that of the plaintiff; and that right being lawfully exercised, there can be no wrong in other roads yielding a compulsory adjustment to it; and the plaintiff is without remedy, unless Congress adopts the suggestion of the Interstate Commerce Commission, and interferes to make rates and routes through some agency appropriate to the process, if Congress has the power in a case like this, which may be doubtful. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 2 Inters. Com. Rep. 458, 3 I. C. C. Rep. 10. In that case the Interstate Commerce Commission clearly declares that that which was complained of by this bill is in violation of the section of the Act which has been quoted, and refused relief only because Congress has not authorized the Commission, or the courts, or any other governmental agency to correct the violation by adjusting the rates and facilities to the situation; and, in the absence of such legislation, like that found in the English act to accomplish a similar purpose, the object can only be accomplished by agreement. It is alleged in the argument here that there is no power anywhere to coerce such an agreement until Congress enlarges the legislation. If this be so, then, indeed, a criminal prosecution would be the only remedy; but it is possible, if the court found the transactions complained of to be a violation of the Act, that at least partial relief might be afforded through this bill by mandamus, or injunction, or both, not to make a contract for the parties, or rates of carriage, or the like, but by forbidding and enjoining the execution of any contract which is unlawful until it be made lawful by conformity to a regulation of commerce established by

Congress under its authority. We do not quite agree that the courts would be powerless in such a case to redress the violation of an Act of Congress. But we are relieved here of any decision of that question by our conclusion that it is not a violation of the Interstate Commerce Act for a carrier to prefer its own road to that of its rival in a case like this, and for the reasons already stated. The Interstate Commerce Commission places its opinion upon the ground that, while there is an apparent justice in the view we have taken, it is subordinate to the public policy manifested in the Act, of facilitating the unrestricted flow of commerce between the states, and designed "to insure to the people every facility of equal choice which franchises granted in the public interest can by any combination of reasonable routes afford." This is true beyond question, but in exercising this, as every other governmental power, legislation is limited in this country, if not in England, where parliamentary power is in a measure supreme, by private right, oftentimes. No one is compelled to apply or to use his property for the public good without compensation. If the public takes it to itself this is clearly so, and, while the compulsory surrender of private right we are considering for a public benefit might not be a taking of property within the constitutional prohibition, it is so nearly akin to it in principle that, even were the power to compel it existing, the exercise of the power should not be implied except by necessity; and certainly it seems to us not from the language of this Act, so equivocal in its relation to the precise point of consideration presented by the facts of this case, however plain it may be in relation to other situations. Moreover, the prohibitions against impairing vested rights or depriving one of his property without due process of law and the like, found in a variety of forms in our American constitutions, state and Federal, may impose some limitation upon such legislation, or upon a construction of general language used in this legislation, to prevent the abrogation of this right in the manner suggested by the Interstate Commerce Commission; and possibly this accounts for the absence of the clauses of the English legislation referred to as wanting in our Act.

On the other hand, until an authoritative adjudication, we could not entirely agree that, by any contract for through routing between carriers, the prohibited discriminations of this Act may be made, or that they would be held to be not prohibited because of any common law right to make such contracts, or that it would be a proper test of the statutory prohibition as to the undue and unreasonable preference or advantage and reasonable, proper, and equal facilities, to apply the common law right of contracting for carriage beyond the carrier's own lines, thereby giving to a line composed of several independent carriers this benefit of the ownership of a continuous road, which we concede to the Iron Mountain in this case; for the common law right to contract, as between independent carriers, is not the same thing as a common and joint ownership, by any means; and the one may be the subject of regulation by Congress, while the other may not; and it is not quite clear why a given car-

rier may afford a preference to a thing carried by one road over that carried or which might be carried by another through the medium of a contract to carry jointly, when it could not do that thing outside of such a contract; nor why the fact of such a contract would make a given discrimination otherwise unlawful a lawful one under this Act. But in this case we have endeavored to show that the discrimination here does not arise at all out of the contract for through routing between the Iron Mountain and East Tennessee roads, but solely out of the right or advantage of ownership possessed by the Iron Mountain of a road parallel to plaintiff's road. If the East Tennessee road should sell the tickets demanded by plaintiff, it would do no good, unless the Iron Mountain would recognize them, which, because of this advantage of ownership, it is not compelled to do under this Act. *Circuit Judge Caldwell* decided this in the case of *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.*, 2 Inters. Com. Rep. 763, 41 Fed. Rep. 559, although he gives other reasons also for his judgment in that case, perhaps. It is quite true that the facts of that case are not precisely like this in some respects, for there the Hot Springs road, which was the co-defendant of the Iron Mountain, had no physical connection at all with the plaintiff road, as the East Tennessee road has here, and the only connection was over the Iron Mountain from Malvern to Little Rock. Yet that fact, in the view we have endeavored to present, becomes immaterial as a distinction in this case, because of this fundamental advantage of ownership all the way from both Malvern and Little Rock to Memphis, which advantage operates as well at Memphis in favor of the East Tennessee road as at Malvern in favor of the Hot Springs road; and the want of physical connection or the fact of physical connection with the plaintiff road does not enter into the question of the reasonableness of the discrimination in one's own favor over one's own road. In either case, as we have endeavored to show, the right of preference growing out of the ownership is paramount to any demand of the public for competing lines in determining the reasonableness of the discrimination made in a case like this. And, as *Judge Caldwell* well remarks, to overthrow this right of preference would be to discourage the building of competing lines, rather than to maintain them. The truth is, the plaintiff is a competing line over only a comparatively few miles with the Iron Mountain system, and to force that road to traffic with it would be to give the plaintiff a share of the profits of the capital invested in the whole Iron Mountain system, just as if it was a part of that road all the way through, instead of a rival road for a part of the distance. This would be an unreasonable discrimination in the plaintiff's favor. It does not seem just that a short road should thus be made equal to a long one in this matter of preserving the public benefit of competition. If the benefit be preserved for the local travel which covers the plaintiff's line, that is all it can justly ask; and it has not the right to become a branch of a trunk line under the pretense of competing for a through travel, which it cannot accommodate. It does not in fact compete for that travel, and cannot com-

plain of discriminations concerning it until it does,—that is, can afford equal facilities, not only for transferring at Memphis, and taking the traveler part of the way, but equal facilities with the Iron Mountain for taking him all of the way that road takes him. This statutory right of equal facilities is reciprocal, and one carrier must be able to furnish equal facilities with the other before it can complain of discrimination. The chief facility is a road reaching the same points with its rival about which the discrimination arises. If the Little Rock had this, I doubt if any combination by contract or otherwise would enable the East Tennessee road to discriminate against it lawfully, although there might be, under existing legislation, no remedy except a criminal prosecution; but, in the absence of this competition in fact for points beyond Little Rock, it cannot be necessary to decide that question.

It may be conceded to counsel for the plaintiff that neither the case of *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 667, 28 L. ed. 291, nor that of *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.*, 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 37 Fed. Rep. 567, 615, controls this. In each of those cases there was a want of physical connection at suitable and properly equipped stations or depots to invoke the requirement of an equal facility for exchange of traffic, which distinguishes it from this case. Moreover, in the Colorado case the supreme court interpreted the constitution of the state as declaring only the common law against discriminations to make it irrepealable, but *non constat* that this third section of the Interstate Commerce Act means no more than the Colorado constitution is interpreted to mean. The language is different, and the historical surroundings of the Act of Congress demonstrate that Congress was exercising its plenary power to regulate interstate commerce, and not declaring the common law to make it fundamental, for, doing only that, it had scarcely any reason to act at all, as the Colorado convention had. And in the Kentucky case it was particularly decided that the plaintiff corporation was not a common carrier at all within the Interstate Commerce Act; and this fact, and the want of reasonable transfer facilities, amply distinguish it from this case. As was said in the *Memphis & L. R. R. Co. v. Southern Exp. Co.* ("Express Cases") 117 U. S. 29, 29 L. ed. 803, the regulation of matters of this kind is legislative, and not judicial, and the courts can go no further than to enforce what Congress has in the exercise of its legislative power declared as a proper regulation of commerce. It has not declared, if it may do so, that a railroad reaching with its own tracks an outlet and inlet for traffic over its own road must share with a parallel road its through traffic to points not reached by its competitor by taking that road's through tickets over its own lines upon equal terms, as to rates or otherwise, with its own traffic. It may be compelled to take up the plaintiff's passengers at Little Rock, and carry them to the points not reached by the plaintiff's road, upon the same terms as other passengers taking its track at Little Rock, but not upon the same terms as passengers taking its track at Memphis for points on its line beyond Little Rock. The

4 INTER S.

two things are not equal to each other, and that reciprocity of equal facilities for equivalent services is wanting, and therefore the case does not fall within the statutory definitions of the discrimination which is forbidden; and, if the Iron Mountain road may lawfully decline the tickets which plaintiff would like to issue, the East Tennessee road is not bound to keep them on sale as an equal facility of commerce.

Neither does it seem to me that the case of *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.*, 3 Inters. Com. Rep. 305, cited by plaintiff's counsel, controls this case. I find some difficulty in this report of the case (and I am unable to find it elsewhere reported) in comprehending the facts, but I think the peculiarity of this case is not in that,—the ownership, namely, by the defendant road of a parallel track covering all the ground of the plaintiff, and extending beyond it to points about which the discrimination complained of has been made. It is true that *District Judge Deady* expresses very forcibly his opinion that the law is useless if through routing over an excluded road upon the same terms as the favored road cannot be compelled where the parties cannot agree about it, and if by an agreement for a continuous through freighting the discrimination against competitors thereby effected becomes reasonable simply because of a right so to contract at common law, which right Congress possibly intended to modify or regulate by this Act; and that which he says is reasonable and plausible indeed. Yet he does not hold this as applicable to roads situated towards each other as these are, if I understand the situation in that case.

Again, the case of *New York & N. R. Co. v. New York & N. E. R. Co.*, 4 Inters. Com. Rep. 116, 50 Fed. Rep. 867, seems very analogous to this case, and the judgment there seems somewhat inconsistent with that given by the Interstate Commerce Commission in this case when it was before that tribunal, notwithstanding an apparent struggle to distinguish them. But it is distinguished in both the opinions written in that case, though upon somewhat different grounds. The Interstate Commerce Commission in the former case dismissed a petition almost identical with the bill we have before us, because it had no power, and there was none elsewhere conferred by Congress, to make through rates and through routings where they were denied, as may be done under the English legislation, although the very conduct complained of in this case was there held to be a violation of the Act; but in the latter case, now under observation, in referring to the former it seems to concede that there was in this case no violation of the Act for the reasons stated by *Judge Caldwell*, which are quoted, and have been cited by us here. The opinion, however, further refers to the operation of the right of ownership, and in effect holds that, although the defendant companies in the *New York & N. R. Co. v. New York & N. E. R. Co.*, were jointly stockholders in the favored road, they did not own it. If they had owned it, I do not see that it could have been at all satisfactorily distinguished from this case; for, while it is true that there had formerly been a through rout-

ing between plaintiff and the defendant, and that fact was seized upon to relieve the Commission of the difficulty of making a through route and a through rate for the parties, as they had only to put the old contract "in force again," it is not quite clear how the commission (or the court) has any more power to impose upon an unwilling party an old and abrogated contract than it has to make a new one. Neither is it quite plain how the ownership of all the stock in the favored line by the two defendant companies jointly operating it for their joint benefit is not in the practical operation of the freighting business, the same thing as if they had owned the road, either or both of them, as a part of their corporate belongings, as in this case the Iron Mountain does, although the technical difference in the tenure (if we may use that term somewhat untechnically) is apparent. The truth is that in the careful investigation of the cases on this subject which I have endeavored to make I have been occasionally perplexed to reconcile some of the expressions of opinion and judgments with each other, and all the courts and judges seem to find much difficulty in interpreting and applying this Act of Congress, which is in all its parts a new and experimental chapter of legislation. I desire, therefore, most carefully to limit this judgment to the precise boundaries of the facts in this case. It would be undoubtedly a complete answer to this bill to hold, as counsel for the defendants so strenuously argue we must hold, that the Interstate Commerce Act has not at all interfered with the common-law right of contracting between connecting and independent carriers for a continuous through line, excluding all connecting competitors or rivals per force of the contract, just as if one owner absolutely owned the whole line. But this case does not require such a holding; nor do I think that technically there has been any adjudication to that effect, whatever may be said of expressions of opinion in that direction. It may be that it is a correct doctrine, but certainly that which we

hold here can be, whether the other be or not. That about which I have no doubt on the facts of this case is that the Iron Mountain road, being the owner of a road of its own between Little Rock & Memphis, may prefer itself even to the extent of "crushing out the life of the plaintiff"—to use the language of the bill and of counsel—by that which was done in this case; that, whether done by a contract with other roads or without, it may refuse to through route with the plaintiff to points on its own road not reached by the plaintiff's road, or to recognize tickets issued by the plaintiff or others over plaintiff's roads to such points; and that, having this power of ownership to protect it in doing this, other roads are not at fault in yielding to its refusal to recognize such tickets. It is a misnomer to call that which the Iron Mountain is doing "a discrimination" against the plaintiff under the Interstate Commerce Act, or any other careful use of that word. It is not the case of a road preferring unjustly, unduly, and unreasonably one of two other equally adequate carriers from a given point to a given point, but the case of a competitor or rival so conducting its business and using its powers of ownership as to divert travel from its rival to itself. This is the case as between the Little Rock & Memphis road and the Iron Mountain road. As between the Little Rock and East Tennessee roads the case is that of preferring a road with through facilities to one with only local facilities,—a road that goes all the way to one going only part of the way; and the Interstate Commerce Act does not forbid such a preference. Not having as long a track; the facilities offered by the plaintiff road for its through travel into Texas are not the same nor equal or equivalent to those offered by the Iron Mountain, and the discrimination it makes between the two cannot be, therefore, unjust, undue, or unreasonable in any proper sense, however disastrous to the plaintiff.

Demurrer sustained, and the bill dismissed at the cost of the plaintiff.

INTERSTATE COMMERCE COMMISSION.

THE GERKE BREWING COMPANY

v.

THE LOUISVILLE & NASHVILLE R. CO., THE KENTUCKY CENTRAL RAILWAY COMPANY, THE NORFOLK & WESTERN RAILROAD COMPANY.

1. The rule expressed by the fourth section that distance shall ordinarily limit the adjustment of rates is not rendered inoperative by the existence at one point of converging lines subject to the Act, for the law applies to each of these lines, and neither can put in rates to that point which are lower than shorter distance charges on its line until, upon a showing of special considerations grounded in justice to its patrons and itself, it obtains permission from the regulating authority so to do. This principle applies both to lines between the same points, and to lines reaching the same destination from different points of consignment.
2. Competition with carriers not subject to the statute is based upon natural causes and plain conditions, but the legitimate force of competition with carriers subject to the Act depends upon compliance with the law by each of the competitors and the special circumstances and primarily indefinite conditions in each particular case. *Trammell et al. Georgia Railroad Com. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324, cited and affirmed.
3. When rates from any cause are made greater for shorter than for longer distances the difference between such rates must in no instance be unreasonable.

Complaint filed August 1, 1891.—Joint Answer filed September 23, 1891.—Amended Complaint filed November 5, 1891.—Answers to Amended Complaint filed November 23 to December 1, 1891.—Heard at Cincinnati May 6, 1892.—Brief for Complainant filed May 28, 1892.—Decided February 23, 1893.

Messrs. E. P. Wilson and Louis Kraemer for Gerke Brewing Company.

Messrs. Ed. Baxter and Edward Colston for Louisville & Nashville Railroad Company and Kentucky Central Railway Co.

REPORT AND OPINION OF THE COMMISSION.

Veasey, Commissioner:

The complainant, a corporation, is engaged at Cincinnati, Ohio, in the manufacture and sale of beer. The original complaint was against the two carriers first above named, and the Norfolk & Western was brought in as a party defendant in the amended complaint filed November 5th, 1891.

The complaint alleges that the defendants, the Louisville & Nashville Railroad Co. (hereinafter called the Louisville Co.) and the Kentucky Central Railway Co. (hereinafter called the Kentucky Co.) demand, collect and receive for the transportation of beer in carloads from Cincinnati to Middlesborough, Ky., distance 233 miles, an unreasonable and unjust charge of 89 cents per hundred pounds, when compared with rates accepted by said defendants for similar service over other lines or parts of lines jointly or severally owned and controlled by them, and the following places, distances from Cincinnati and rates per hundred pounds on beer in car loads are named:

Knoxville, Tenn.	307 miles	25 cents.
Chattanooga, " "	336 " "	25 " "
Birmingham, Ala.	487 " "	25 " "
Nashville, Tenn.	295 " "	15 " "
Clarksville, " "	287 " "	23 " "
Decatur, Ala.	417 " "	29 " "
Montgomery, " "	600 " "	31 " "
Selma, " "	929 " "	31 " "

That said rate is also unjust and unreasonable when compared with rates on beer in carloads charged by other railroads to points more remote from Cincinnati than Middlesborough, namely:

Kanawha Falls, W. Va.	247 miles	18 cents.
Grafton, W. Va.	239 " "	23 " "
Dennison, Ohio	221 " "	13 " "
Pittsburgh, Pa.	313 " "	15 " "
Chicago, Ill.	305 " "	15 " "
Cleveland, O.	244 " "	13 " "
Kankakee, Ill.	249 " "	15 " "
Youngstown, O.	301 " "	13 " "

That said rate of 89 cents per hundred pounds, charged by the Louisville Co. and the Kentucky Co. for carrying beer in wood from Cincinnati, Ohio, to Middlesborough, Ky., is greater than they together with the other defendant, the Norfolk & Western Railroad Co. (hereinafter called the Norfolk Co.) charge for carrying beer in wood from Cincinnati over the

same line in the same direction through Middlesborough to points beyond in the state of Virginia, that is to say, to Pearisburg, 33 cents, New River, Christiansburg, or Shawville, 31 cents, Salem, Roanoke, or Lynchburg, 23 cents, and that such greater charge for the shorter distance to Middlesborough is in violation of the fourth section of the Act to Regulate Commerce.

The complaint further alleges that the Louisville and Kentucky companies in connection with other railroad companies are parties to through tariffs from Chicago to Middlesborough whereby, during the month of June, 1891, a rate on beer in wood of 59 cents per hundred pounds was lawfully in effect between those points, and that some time during that month the Louisville and Kentucky Companies through their agents did collect and receive as compensation for the transportation of beer in wood from Chicago to Middlesborough a less sum than 59 cents per hundred pounds, thereby violating section six of the Act to Regulate Commerce.

The joint answers of the Louisville and Kentucky companies deny that the rate complained of is an unjust or unreasonable charge for the service rendered. They deny also that the transportation from Cincinnati to Middlesborough is similar to the service rendered over other lines or parts of lines to the points named in the complaint and aver that no just comparison can be made of service rendered under so entirely dissimilar circumstances. They admit that the rates from Cincinnati to Knoxville, Chattanooga, Birmingham, Nashville, Clarksville, Decatur, Montgomery and Selma on beer in wood, in carloads, released, are as set forth in the complaint, but state in regard to those charges that the 25 cent rate to Knoxville, Chattanooga and Birmingham is a special rate made principally to meet the competition of local breweries at those points; that the Nashville rate is also made low for the same cause, and on the further ground of water competition from Cincinnati, Evansville and St. Louis, and that Clarksville rates

are based on rates in effect to Nashville; that at Decatur there is severe competition between Cincinnati, Evansville, St. Louis and Memphis breweries; that at Montgomery there is local brewery competition as well as competition for the carriage of beer to that point by boats on the Alabama river, and that Selma takes Montgomery rates. These defendants say that "in making rate reductions to meet local product, the rail lines have in no case unjustly antagonized the local interests. Their endeavor has been to so adjust rates from the principal brewing points in the west as to permit of reasonable competition."

These defendants state also that they are not engaged in traffic to points named in the complaint as situate in West Virginia, Pennsylvania, Ohio and Illinois, and insist that their rate to Middlesborough has no relation to rates from Cincinnati to points in those states.

They further state that the construction of the Cumberland Valley branch of the Louisville Co., which reaches Middlesborough, was begun in November, 1886; that said branch penetrates a region not previously supplied with rail transportation and practically not then supplied with any transportation facilities; that the road runs through a mountainous region, making its construction peculiarly difficult and exceedingly expensive, it having required three years to build the line of 45 miles from Corbin on the Knoxville division to Middlesborough; that Middlesborough, located at the foot of Cumberland Gap, has only been in existence for a period of about two years, and prior to the construction of the Cumberland Valley branch the section of the Cumberland mountain on the north side of the Gap was dependent for transportation from western points on a wagon haul of 50 or 60 miles from the nearest point on the Knoxville Division of the Louisville Company's system over mountain roads impassable for the greater portion of the year; that the nearest point of distribution on the south side of the mountain was Knoxville, about 75 miles distant, and transportation therefrom was conducted by horses, mules or oxen; that when the Louisville Company completed this branch it extended to a region previously devoid of transportation facilities the benefit of the same local tariff of rates which governs similar traffic in the old and thickly settled portions of Kentucky and Tennessee; that beer in wood in carloads released is put by defendants in class E, and that the rate for that class is not only reasonable in itself, but reasonable as compared with other rates from Cincinnati to Middlesborough, the rates on all classes between those points being:

1	2	3	4	5	6	A	B	C	D	E	H	(per bbl.) F	I	L	M	N
70	60	58	48	43	39	39	39	24	19	39	39	48	29	28	20	15

These defendants further claim that rates for 4 INTER S.

class E or any other classes are dependent upon and fixed with regard to rates received for the transportation of other articles taking other class rates, and that their local classification of ale and beer is in line generally with the classification of those articles throughout the country; and they state that these commodities are placed in the several classifications now in use throughout the country as follows:

ALE, BEER OR PORTER, IN WOOD, CARLOADS RELEASED.

"Official" Class 5	"Southern" E	"Western" 5
"Illinois" Class 5	"Georgia" E	"L. & N. Local" E

It is also averred by these defendants that in the transportation of beer special facilities are furnished by the carrier to the shipper; that it is a perishable product, subject to much risk in transportation, and therefore is given special attention to secure speedy and safe carriage; that they furnish for the shipment of this article refrigerator cars, specially constructed at great expense and weighing much more than the ordinary freight car, and make no freight charge for ice in the same car with ale or beer, in carloads, necessary to preserve it in transit; shippers being permitted to load as much as 4,000 lbs. of ice when necessary for such preservation.

In regard to the long and short haul feature of the complaint these defendants deny that they are under any common control or management with the Norfolk Company, admit they have agreed with that company upon certain through rates for the transportation of property wholly by railroad between Cincinnati and Lynchburg and other points in Virginia, but deny that they are under any arrangement with the Norfolk Co. for continuous carriage or shipment of property between those points. They further state that they carry beer from Cincinnati through Middlesborough to Norton, Va., their eastern terminus, and there deliver it to the Norfolk Co., which transports it to the Virginia points mentioned in the complaint; that it is true that said Virginia points are more remote from Cincinnati than Middlesborough, and also true that between Cincinnati and Middlesborough the transportation is over the same line in the same direction when the beer is destined for Middlesborough as when it is destined for said Virginia points, but they deny that the transportation to these points and to Middlesborough is conducted under substantially similar circumstances and conditions. In support of their claim that such circumstances and conditions are dissimilar these defendants state as follows:

"The line of the Louisville & Nashville Railroad was extended in 1890, from a point in Kentucky, through Middlesborough to Nor

ton, Virginia, where a junction was effected with the Norfolk & Western Railroad. Long prior to the time said junction was effected, certain through rates had been agreed upon by lines which competed with each other for the transportation of property between Cincinnati, Ohio, and Lynchburg, Petersburg, Richmond, and other Virginia cities; and when said junction was effected, respondents agreed to transport property over their lines to Norton, Virginia, for a certain proportion of said through rates. Said rates were not made by respondents. They were the result of active and long continued competition between powerful rival lines. Respondent's offense, if any, consisted exclusively in providing the public with an additional and more direct line of railway, without requiring the public to pay anything additional for the new transportation facility thus afforded."

"Respondents also agreed to transport over their lines to Norton, Virginia, property destined from Cincinnati, to local stations on the Norfolk & Western Railroad for a certain proportion of certain through rates, which were arrived at by adding to the rates in effect between Cincinnati and Lynchburg, the local rates fixed by the Norfolk & Western Railroad Company, to apply on traffic destined from Cincinnati to said local stations. In that way, said local stations also got the benefit of the additional facilities afforded by the extension of the Louisville & Nashville Railroad to Norton."

The answer of the Norfolk Co. admits that it and the other defendants have arrangements for the transportation of property which by reason of its point of origin or destination requires the use of a portion of the railways of each company, but that such arrangements impose no obligation or responsibility upon it when the carriage of the property is wholly upon either one or both of the other defendant roads.

This company admits that it participates in rates for the transportation of beer in wood from Cincinnati, O., to points upon its road, but avers that in the adjustment of said rates to local destinations on its road it is governed by circumstances and conditions dissimilar to those which fix the rates to common and competitive points in the state of Virginia, and it believes that its rates are made in strict accordance with the law.

At the hearing no proof was offered by complainant upon the question whether the rate to Middlesborough is reasonable in itself; neither was any evidence presented by it for the purpose of showing that undue preference or prejudice results from rates to Middlesborough and the other points mentioned in the complaint as not located upon the same line, or in support of the charge of unjust discrimination by defendants in collecting less than established rates on beer from Chicago to Middlesborough.

The small amount of material testimony taken was, on the part of the defendants, mainly a reiteration of their pleading; and it was definitely stated for complainant that it relied principally upon the admission of defendants that they charge more to Middlesborough than for the longer distance over the same line to points in Virginia, and was content to submit the case upon the complaint and answers on file.

There is therefore but a single question to be decided in this case, namely, Is the rate complained of in violation of the fourth section of the Act to Regulate Commerce?

The facts necessary to a decision on this point are as follows:

1. Each of the defendant companies is engaged in the transportation of property between points in different states. The roads of the Kentucky and Louisville companies are now parts of the same system (the Louisville & Nashville) and are operated under a common control or management. The Louisville and Norfolk companies are parties to and have established through rates for the transportation of property from Cincinnati, Ohio, to Lynchburg and other points in the state of Virginia, and under bills of lading issued by the Louisville Company and accepted by the Norfolk Company they carry, by such arrangement, property as a continuous shipment between these points at rates so established and over a line formed by roads which they respectively manage or control; and Middlesborough is an intermediate station on such line from Cincinnati to the Virginia points aforesaid.

The Louisville Co. has established rates for the transportation of property from Cincinnati to Middlesborough aforesaid, and, under bills of lading issued by it, carries property as a continuous shipment between those points at rates so established and over a line which it manages or controls; and said line is part of the above described line between Cincinnati and the Virginia points aforesaid.

2. Rates established and in force for the transportation of beer in wood in carloads, released, over said line from Cincinnati to the Virginia points aforesaid and to various intermediate stations, together with the distances of said points and stations from Cincinnati are as follows, to wit:

To	Rates per 100 lbs.	Distance from Cincinnati.
Livingston, Ky.....	30 cts.	155 miles.
Corbin, Ky.....	35 "	188 "
Barboursville, Ky.....	40 "	208 "
Pineville, Ky.....	40 "	217 "
Middlesborough, Ky.....	39 "	230 "
Shawnee, Tenn.....	39 "	237 "
Ewing, Va.....	45 "	257 "
Hubbard's Springs, Va.....	46 "	263 "
Big Stone Gap, Va.....	44 "	291 "
Norton, Va.....	44 "	305 "
Pearlsburg, Va.....	38 "	440 "
New River, Va.....	31 "	471 "
Christiansburg, Va.....	31 "	481 "
Shawville, Va.....	31 "	491 "
Salem, Va.....	28 "	507 "
Roanoke, Va.....	28 "	513 "
Lynchburg, Va.....	23 "	567 "

These rates apply to shipments of "Beer in wood, carloads, released." The traffic is transported in refrigerator cars and ice necessary for its preservation is carried free.

8. No competition by lines not subject to the Act to Regulate Commerce exists for through beer or any other traffic from Cincinnati or any other interstate point to the places above mentioned. There is competition by the Chesapeake & Ohio Railway, an interstate carrier, for traffic from Cincinnati to Lynchburg, the distance between these points by that route being 470 miles, and the line of this carrier to Lynchburg is shorter than that of the defendants by 97 miles.

All rail lines carry beer to Lynchburg from various brewing points in the east, such as Richmond, Baltimore, Washington, Alexandria, New York and Philadelphia, and from northern cities the traffic can also go as a through shipment by water and rail through Maryland or Virginia ports.

CONCLUSIONS.

The foregoing findings set forth facts sufficient for the disposition of this case.

The defendants transport beer in carloads from Cincinnati, Ohio, to Lynchburg and other points in Virginia, under a condition in the bills of lading releasing them from certain liability as carriers, and according to a common arrangement between them for continuous carriage and shipment within the meaning of the first section of the Act to Regulate Commerce. *Trammell et al. Georgia Railroad Co. v. Clyde* 88. Co. 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 824; *Boston Fruit & P. Exch. v. New York & N. E. R. Co.* 8 Inters. Com. Rep. 498, 4 I. C. C. Rep. 664; *Mattlingly v. Pennsylvania Co.* 2 Inters. Com. Rep. 806, 3 I. C. C. Rep. 592; *Richardson v. The Chouteau*, 87 Fed. Rep. 582; *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 37 Fed. Rep. 572; *Harp v. The Grand Era*, 1 Woods C. C. 184. Over a part of the all-rail line to Lynchburg and other points aforesaid, and under a like condition in bills of lading, two of the defendants transport beer in carloads from Cincinnati to Middlesborough, Ky., a shorter distance included within the longer distance to Lynchburg, Va., and over the same line in the same direction, and such transportation is conducted by said defendants under a common control or management within the meaning of the first section of the Act to Regulate Commerce. The defendants and the transportation by them to the interstate points mentioned in the complaint are therefore subject to the provisions of the Act to Regulate Commerce.

Under the construction of the fourth section by the Commission and the courts, as set forth in our decision in the Georgia Railroad Commission cases, 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 824, the defendants are not author-

ized by the statute to establish and charge lower rates to longer than to shorter distance points, mentioned in the complaint and findings, by the fact that other interstate railroads reach those or some of those longer distance points from Cincinnati or from other points of shipment. The rule expressed by the fourth section that distance shall ordinarily limit the adjustment of rates is not rendered inoperative by the existence at one point of converging lines subject to the Act, for the law applies to each of those lines, and neither can put in rates to that point which are lower than shorter distance charges on its line until, upon a showing of special considerations grounded in justice to its patrons and itself, it obtains permission from the regulating authority so to do. This principle applies both to lines between the same points and to lines reaching the same destination from different points of consignment.

It is true that situations frequently arise when one carrier is at an unjust disadvantage as compared with another in the business of carrying to a common point. But the situation at junction or common points is not *uniformly* so oppressive as to justify exceptional action by the carriers in disregard of the rights of places more favorably situated in point of distance.

The term competition as applied to rates is frequently a misnomer. Roads reaching a common point may at first compete by one and then the other giving lower rates to that point until finally they are compelled to combine in fixing a rate by which each will obtain a fair share of the business and derive a profit. Carriers not only determine upon rates between themselves, but rates to important junction or common points are also fixed at meetings of or through associations composed of carriers in common territory. These rates, fixed in the interests of all the carriers, and with reference of course to the general situation in the immediate territory, are intended to be profitable. While rates so made are still competitive in a narrowed sense, the force of natural and unrestricted competition between the carriers is materially modified by their combined action; and though traffic conditions may and usually do limit the amount of increase in charges, yet concerted action by the carriers commonly results in such rates as will yield fair compensation for the service rendered. The disadvantages from which some carriers subject to the statute might suffer under varying traffic situations are, in large measure, removed by agreements among themselves which greatly modify the oppressive force of free competition; and association or action in concert is freely resorted to by such carriers.

The theory sometimes advanced that the Act was intended to eliminate competition as a fac-

tor in transportation is not borne out by the provisions of the statute. Perhaps the ideal reasonable and just transportation charge should be unaffected by the element of competition; but the statute only applies to certain classes of carriers, prohibits only such preferences or discriminations as are undue or unjust and confers upon a regulating body power to relax in the interests of those carriers its general rule that rates shall ordinarily depend upon distance, and was evidently not framed in disregard of the competitive relations existing between common carriers throughout the country.

To preserve legitimate competition between public carriers, that is, competition which is not contrary to the public interest, and to prevent that competition which is illegitimate, or in other words, opposed to the public welfare, is precisely that which, among other things, the law undertakes to accomplish. The clauses prohibiting undue preferences and requiring reasonable, just and non-discriminating rates were designed to abolish the illegitimate practices indulged in by carriers before the Act was passed, and much of the favoritism given to persons and places was unquestionably the result of unfair competition between carriers by rail; besides, to further secure to persons and communities their advantages of location, the law in its fourth section directs that distance shall ordinarily limit the making of rates in the same direction. Conditioned upon faithful and mutual observance of those provisions, the right of carriers subject thereto to compete, not only in rates, but also, and with very much greater freedom, in facilities and accommodations, is clearly recognized in the statute. No qualifying phrases which may be found in such provisions can properly be held to refer to business strife between carriers subject thereto; but Congress did provide a relieving clause for the benefit of such carriers by adding to the distance rule in the fourth section a proviso giving the Commission power to authorize a carrier, upon application and after investigation, to charge less for longer than for shorter distances, and from time to time to prescribe the extent of such relief, that is, to limit the reduction of rates for longer distances. Any person at all familiar with transportation as conducted in this country is aware that the principal ground which a carrier subject to the Act can allege for such relief is competition; and that allegation was the one mainly relied on by carriers in their applications to the Commission for such relief immediately after the law went into effect. Before its enactment, competition between carriers subject to the statute had been shown to result in many illegitimate practices, but it was also apparent that within proper limits such competition is beneficial to the public and a privilege grounded in

fairness to the carriers; it therefore became necessary to provide for the ascertainment and continuance of legitimate competition between such carriers in an authoritative way, and the fourth section proviso was made a part of the law.

Transportation by water or by other agencies not subject to the law presents a wholly different question. As stated in the Georgia Railroad Commission cases, 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324, actual competition with carriers not subject to regulation under the Act to Regulate Commerce is, as a rule, potential in the extreme, for the law places no limitation upon such a carrier as to rates, service or facilities. So far as the statute is concerned such a carrier may charge unreasonable, unjustly discriminating and unduly prejudicial rates to any point, and adopt whatever regulations its private interest may demand. On the other hand, in the application of the law to carriers subject to its provisions their private rights are subordinate to those of the public, and competition between them is not always in the public interest. It is as a broad general rule, against the public interest that artificial circumstances, which at the will or caprice or for the self interest of any man or body of men (individual or corporate carriers) may be swept out of existence as lightly as they were perhaps created, should be permitted to interfere with the natural course of trade. *Liverpool Corn Trade Assn. v. London & N. W. R. Co.* L. R. 1 Q. B. Div. 120, 45 Am. & Eng. R. Cas. 216. If railroad competition should be considered as justifying the exceptional rate in every case where the term is applied, (and the degree or force of such competition is of great variety), any railroad might by its action absolve a competitor from its obligation under the law and be itself absolved in return. The legislature never intended this consequence; it did not intend that carriers subject to the law should at pleasure make the rule of the statute ineffectual. *Re Chicago, St. P. & K. C. R. Co.* 2 Inters. Com. Rep. 187, 2 I. C. C. Rep. 231. Besides, a shipper having a choice between competing carriers would only have to refuse to send his goods by one of them unless given exceptional rates to justify that one in making the discrimination in his favor on the ground of the necessity of the situation. *Interstate Commerce Commission v. Texas & P. R. Co.* 4 Inters. Com. Rep. 114. These principles are peculiarly applicable to carriers subject to the same general scheme of regulation; furthermore, it must be remembered that water lines were designedly left free from the operation of the law in order to preserve untrammelled the advantages of such communication to territory reached by "river, sea, canal or lake." The fact of the exclusion of this method of trans-

portation from the operation of the law is in itself a declaration that competition by water should not be confounded with competition by rail. And the same distinction applies to foreign and state railroads where they do not come under the prohibitive clauses of the law. Competition with carriers not subject to the statute is based upon natural causes and plain conditions, but the legitimate force of competition with carriers subject to the Act depends upon compliance with the law by each of the competitors and the special circumstances and primarily indefinite conditions in each particular case.

"The carrier has the right to judge in the first instance whether it is justified in making the *greater charge for the shorter distance* under the fourth section in all cases where the circumstances and conditions arise wholly upon its own line or through competition for the same traffic with carriers not subject to regulation under the Act to Regulate Commerce. In other cases under the fourth section the circumstances and conditions are not presumptively dissimilar, and carriers must not charge *less for the longer distance* except upon the order of this Commission."

Georgia Railroad Com. v. Clyde SS. Co.
4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324.

The construction of the law as laid down in the Georgia commission cases and here somewhat further discussed was not in any sense an arbitrary ruling; it was arrived at after patient and thorough examination of all the authorities upon the long and short haul question; and that it is clearly in harmony with the obvious intent of Congress, the decisions of Federal and English courts, and the basis of construction originally laid down by the Commission on the subject, is the best proof of its being the correct interpretation of the meaning of the fourth section.

The effect of market competition upon rates for longer distances under the fourth section is, so far as carriers are concerned, a collateral question with that of competition between carriers subject to the statute, and necessarily can only be determined by the same general rule.

"To determine the force and effect of such (market) competition involves consideration of commercial questions peculiar to the business of shippers, such as advantage of business location, comparative economy of production, comparative quality and market value of commodities, all of which are entirely disconnected from circumstances and conditions under which transportation is conducted. Carriers cannot create abnormal situations by making rates which equalize advantages and disadvantages of localities and thereupon claim justification for greater charges on shorter hauls on the ground that the lesser long haul charges which accomplish such equalization are necessary to secure increase in traffic over their lines."

4 INTER S.

Georgia Railroad Com. v. Clyde SS. Co.
4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324.

If the application of the theory set forth in the answer of the Louisville and Kentucky companies in this case, that rates on an article to a given point should be lower when the commodity carried is also manufactured at that point, operates to produce an undue preference or prejudice under the third section or a deviation from the rule of the fourth section, it cannot be sanctioned. But it is not important to discuss the general propriety of that theory with reference to the decision of this case, and our only reason for giving it any attention is the fact of its being involved in the general question of market competition.

Questions of market competition and railroad competition are susceptible of simple solution if carriers generally will do willingly that which, under the law, they must do perforce, namely, endeavor to bring about legitimate prosperity and advantage to themselves in conformity with, not in defiance of, the law's provisions. Willing conformity with the statute would necessarily result in narrowing the range of investigations and in eliminating therefrom rate questions which depend for solution upon the lawful action of other carriers. Let that position be taken, and much of the illegitimate force of such competition will have vanished; what remains can be dealt with mainly, under confined and simple situations, and most rapidly and effectively in cases under the proviso clause of the fourth section; while at the same time hardship can be authoritatively relieved.

One fact in this case may properly be noticed. The rate on beer of 28 cents from Cincinnati to Lynchburg, distance 587 miles, affords a rate per ton per mile of a little over 8 mills; but the rate of 39 cents from Cincinnati to Middlesborough, distance of 230 miles, yields a rate per ton per mile of over 3½ cents. We refrain from expressing any opinion as to the character of either of these rates considered by itself, but we do not hesitate to say that a rate per mile for a shorter haul which is more than four times the rate per mile for a longer distance is extortionate if the longer distance rate is remunerative. When rates from any cause are made greater for shorter than for longer distances the difference between such rates must in no instance be unreasonable.

In this case the burden was upon the defendants to show their right to make the greater short haul charge complained of without having first obtained from this Commission an order authorizing them to make the lesser long haul charge with which under the fourth section such greater charge is compared. This they have not done. It appears by the findings that rates from Cincinnati are greater for

shorter hauls to various points on the roads involved in this controversy, and the order will therefore be that the defendants cease and desist, on or before March 20, 1893, from charging for the transportation of beer or other property from Cincinnati to Middlesborough and other points on the same line as far as and including Lynchburg any greater aggregate compensation on similar shipments of like

kind of property for shorter than for longer distances; and that they be required to thenceforth abstain from making any less charge for the longer than for the shorter distances aforesaid except upon the filing by them of an application for relief from the operation of the fourth section and the issuance by this Commission of an order permitting such lesser charge.

JAMES & ABBOTT

THE CANADIAN PACIFIC RAILWAY COMPANY; THE MAINE CENTRAL R. Co.;
THE BOSTON & MAINE R. Co.

[No. 334.]

1. The statute provides that "no complaint shall at any time be dismissed because of the absence of direct damage to the complainant," and defendants are therefore not entitled to a dismissal of the complaint on the ground that the petitioners, being merely commission merchants, can sustain no direct or material damage under the rates in question.
2. When water competition is alleged to justify rates in any case under the statute the carrier must affirmatively show by proof which does more than create a presumption, and which clearly establishes that such competition is a controlling factor in the transportation of traffic important in amount from the point in question.
3. Manufacturing industries should not be deprived, through a carrier's adjustment of relative rates, of advantages resulting from their favorable location in respect of cost of raw material supplied from a common source, or of distance to the common market for the finished product.
4. A departure from equal mileage rates on different branches or divisions of a road is not conclusive that the rates are unlawful, but the burden is on the company making such departure to show its rates to be reasonable when disputed. Citing *Logan v. C. & N. W. R. Co.* 2 Inters. Com. Rep. 431, 2 I. C. C. Rep. 604.
5. When the reasonableness or relative reasonableness of charges is challenged, every material consideration which enters into the making of such charges, including the apportionment thereof to connecting roads in a through line, is pertinent to the inquiry.
6. The "drive" of shingle logs down rivers which flow past the place of cut in Maine to a seaport in Canada where shingle mills are located, and from which the product may go by sea to market ports, affects shingle traffic from competing mills located along these rivers at a place in Canada and a place in Maine, but operates with less force at the latter point. The rail rate from the Canadian mill to market being fixed with especial reference to the effect of the log drive to and water competition for shingle traffic from the seaport, the rate from the Maine mill should be made upon the same basis.
7. Defendants ordered to restore the relation of rates on shingles to Boston which they established after the filing of complaint herein but soon after discontinued, to wit, a rate from Fort Fairfield in Maine of not exceeding 6½ cents above the rate in force from Fredericton in Canada. Complainant's claim for reparation denied.

Complaint filed March 21, 1892.—Answers filed April 12 to May 6, 1892.—Testimony heard at Boston, September 8 & 9, 1892.—Briefs filed October 25 to November 23, 1892.—Decided March 11, 1893.

RELATIVE rates on shingles. See Complaint, *ante*, 45; Answer, *ante*, 110.

Mr. A. B. Paine, for Complainants.

Mr. A. C. Raymond, for Canadian Pacific Railway Company.

Mr. Sigourney Butler, for Boston & Maine Railroad Company.

REPORT AND OPINION OF THE COMMISSION.

Veasey, Commissioner:

It is alleged in the complaint that the defendants are engaged in the carriage of inter-

state commerce under joint traffic arrangements and are subject to the provisions of the Act to Regulate Commerce. That they charge

and receive 16½ cents per hundred pounds on lumber in carload lots and 81½ cents per hundred pounds on shingles in carload lots from Fort Fairfield, Stevens' Siding and Hurd's Siding in the state of Maine to Boston in the state of Massachusetts, a distance of about 484 miles, while they charge and receive only 14½ cents on lumber in carload lots and 16½ cents per hundred pounds on shingles in carload lots from Fredericton, Tracey and Russia-gornish in the province of New Brunswick to Boston aforesaid, a distance of about 438 miles; that said rate of 81½ cents per hundred pounds on shingles from Fort Fairfield, Stevens' Siding and Hurd's Siding is unreasonable and unjust, and that defendants discriminate against the petitioners by exacting from them a greater charge than they do from shippers at Fredericton, Tracey and Russia-gornish for what is practically a similar service.

The prayer of the petition is that the 81½ cent rate on shingles from Fort Fairfield, Stevens' Siding and Hurd's Siding be reduced to a rate that is reasonable and that defendants be ordered to repay all sums which they may have exacted subsequent to the date of the petition in excess of the rate which the Commission shall decide to be just and reasonable.

The answer of the defendant, the Canadian Pacific Railway Company, admits that it is under joint traffic arrangements with the other defendants and subject to the Act to Regulate Commerce; that at the date of the petition, the rates on lumber and shingles set forth therein were in force over the defendant lines, but that before the petition was filed the defendants had in contemplation a readjustment of the rates aforesaid; that the rates now in force are 15½ cents per hundred pounds on lumber in carload lots and 26½ cents per hundred pounds on shingles in carload lots from Fort Fairfield, Stevens' Siding and Hurd's Siding to Boston and 14½ cents per hundred pounds on lumber in carload lots and 20 cents per hundred pounds on shingles in carload lots from Fredericton, Tracey and Russia-gornish to Boston; that these rates of freight are just and reasonable and not in violation of the Act to Regulate Commerce, for the reason that the circumstances and conditions attending the traffic aforesaid from the two groups of places are substantially dissimilar as to value, volume and relation to other traffic over the same line of railway, as to manner and cost of obtaining logs, and as to water competition, which exercises a controlling effect on the rates of freight obtainable from Fredericton to Boston, but which does not exist from Fort Fairfield, Stevens' Siding and Hurd's Siding; that said last named stations are situated upon a branch line originally known as the Aroostook Railroad of Maine; that said line was built by the New Brunswick Railway Company of New Brunswick, Canada, which said

4 INTER 8.

last named road was in turn leased to the Canadian Pacific Railway Company; that the character and volume of the traffic upon said branch line and the cost of hauling such traffic on said branch line render the rates now in force unremunerative to the lessee, the Canadian Pacific Railway Company, and that any further reduction in said through rates would compel the defendant to operate the said branch line as a local line at local rates of freight to the point of junction with defendant's main line of railway; that the rates of freight from Tracey and Russia-gornish are substantially nominal for the reason that little or no lumber or shingles have been or are likely to be shipped from those points, and said rates are made equal to those from Fredericton to preserve the symmetry of the tariff sheet.

The answers of the other defendants are substantially similar to that of the Canadian Pacific Railway Company; but that of the Maine Central contains the additional averment that the low rates forced upon defendants by the water carriers from Fredericton are not remunerative in themselves, but by meeting rates and holding traffic to the rail which would otherwise seek the water route, a large amount of freight is secured for inland points from new business built up by shippers, the outgrowth of their exclusive patronage of the rail lines.

At the hearing for the purpose of taking testimony, the petitioners claimed that under the readjustment of rates since the petition was brought, the shingle rate from Fort Fairfield, Stevens' Siding and Hurd's Siding was still unjust and unreasonable, and in comparison with the rate from Fredericton subjected them to unjust discrimination; on motion, petitioners were granted leave to amend the complaint accordingly.

It also appeared at the hearing that the defendants had, since the filing of their answers, reduced the rate on shingles from Fredericton from 20 cents to 17½ cents per hundred pounds, and they claimed that the reduction was rendered necessary by the fact that water carriers from Fredericton were taking a considerable portion of the shingle traffic under the 20 cent rate. The defendants were also allowed to amend their answers herein.

At the close of petitioners' testimony, counsel for one of the defendants moved to dismiss the proceeding on the ground that it appears from their own testimony that the petitioners, being merely commission merchants, suffer no particular damage, and that their profits do not depend upon the rates, except to the amount of about one dollar per car.

The petitioners, who are lumber merchants in the city of Boston, sell shingles on commission for manufacturers at Fort Fairfield and other points in the state of Maine, and in order

to obtain the exclusive right to sell such shingles have paid to some manufacturers certain amounts of money in advance of sales. This course appears to have been followed by other lumber commission merchants in Boston because, in order to secure the business of one of the manufacturers at Fort Fairfield, the petitioners were obliged to discharge his liability to a rival commission firm for moneys paid in advance of sales on his account. The commission which petitioners obtain for selling shingles is, according to agreement, either upon the gross amount received for sales or upon the amount remaining after deducting cost of transportation and other items of expense which may attend the shipment of the shingles and delivery in Boston. The petitioners also appear in the light of shippers from Fort Fairfield, as shown by a schedule of shipments put in evidence.

The statute provides that "no complaint shall at any time be dismissed because of the absence of direct damage to the complainant." By advances of money to the shingle makers at Fort Fairfield they have substantial interest in shingle manufacture at that point; besides, while a reduction of rates may not materially increase their commission per carload, they have interest as commission merchants in whatever effect such reduction may have upon the number of carloads consigned to them. It also appears that some shingles in carloads have been sent by them as shippers from Fort Fairfield. The petitioners as commission merchants may be indirectly damaged by the freight rates in this case if found unlawful, and as shippers they in common with other shippers from the points in question have direct interest in such rates. The motion to dismiss must be denied.

The facts material to the decision of this case are as follows:

1. Fort Fairfield, Stevens' Siding and Hurd's Siding, all in the state of Maine, are situated near each other on the same line of railroad, take the same rate, and for the purposes of this report may be considered as one. Fort Fairfield is located upon the Aroostook branch of the New Brunswick Railway, which is operated under lease by the defendant, the Canadian Pacific Railway Company. The Aroostook branch extends from Presque Isle 83 miles to a junction with the New Brunswick Railway at Aroostook, N. B. Traffic from Fort Fairfield destined to Boston is routed from Fort Fairfield easterly to Aroostook, seven miles, thence southerly *via* Debec and McAdam Junctions, 112 miles to Vanceboro, the point of junction with the Maine Central Railroad, in all a distance of 119 miles; thence by the Maine Central Railroad to Portland, 251 miles, and by the Boston & Maine from Portland

land to Boston, 103 miles, the total mileage being 478 miles.

It appears from a statement put in evidence by the defendants that the Aroostook branch does not yield sufficient revenue to pay operating expenses and full interest on fixed charges, the deficit from interest account for the year ending June 30, 1891, being \$12,195.81, and for the 6 months following \$9,728.99. While this branch is operated at a loss to the Canadian Pacific, yet according to the testimony of one of its officers and its principal witness, that company is enabled to continue present rates from points on the branch road on account of the traffic which that road gives to the main line; in other words, the Aroostook road as a separate line does not pay, but as a feeder to the Canadian Pacific system its operation is not unprofitable to that company.

Shingle shipments constitute 29½ per cent of the entire traffic over the Aroostook road, and only 4½ per cent of the whole traffic is lumber, it being cheaper apparently to float logs down the Aroostook and St. John rivers to Fredericton or beyond than to saw them in the Aroostook region and ship by rail at even the comparatively low rates on lumber now in force. The other traffic consists mainly of potatoes, starch, hay, bark and live stock. There is not much return traffic to points on this branch.

The manufacture of lumber and shingles at Fort Fairfield and other points on the Aroostook branch is affected by and is in competition with the manufacture of lumber and shingles at Fredericton and other points on the St. John river. Timber cut on the Aroostook can be floated down that river to its junction with the St. John and thence to any point on that stream, at but little additional expense over the cost of logs at Fort Fairfield. Logs cut on the upper St. John are also driven down to Fredericton and other St. John towns. The points on the Aroostook branch have a population of about 11,000 inhabitants. The manufacture of shingles has been an established industry at those points for a considerable number of years.

2. Fredericton is situated on the St. John river, in the province of New Brunswick, Canada, and traffic by rail therefrom to Boston is routed over the Fredericton branch of the New Brunswick Railway to Fredericton Junction, 22 miles, thence easterly by the New Brunswick road to Vanceboro, 45 miles, in all 67 miles; and from Vanceboro, the route to Boston is the same as above stated for traffic from Fort Fairfield, making the distance from Fredericton to Boston 426 miles. The distance from Fort Fairfield to Boston is therefore 53 miles greater than that from Fredericton to Boston, and such difference arises wholly upon lines operated by the Canadian Pacific Rail.

way Company. There is water communication between Fredericton and Boston, but what, if any, vessels run regularly between these points does not appear. Not much, if any, lumber or shingles are shipped made from Tracy or Russia-gornish, the points which take the same rates as those from Fredericton.

Fredericton has a population of between six and seven thousand, and there is no place of much consequence between it and Vanceboro, Me. While shingle mills have been in operation at Fredericton for some years it did not become an important point for the manufacture of that article until a large shingle plant was established there about five years ago.

3. The defendants are parties to joint traffic arrangements for the transportation of shingles and lumber from Fort Fairfield, Fredericton and the other points mentioned in the complaint to Boston and points taking Boston rates. The rates now in force on shingles in carloads from Fort Fairfield and Fredericton to Boston are respectively 26½ and 17½ cents per hundred pounds. At the time the complaint was filed these rates were 31½ and 16½ cents per hundred pounds. Before the answers were filed the rates were changed to 26½ cents from Fort Fairfield and 20 cents from Fredericton, but between that time and the date of hearing the Fredericton rate was reduced to 17½ cents because, as defendants allege, and there is no evidence to the contrary, some traffic then went by vessel from Fredericton. Five small schooners were loaded with shingles while the 20 cent rate was in effect, but defendants failed to show where the water shipments were destined and complainants did show that they were not carried to Boston. The tonnage of vessels which can reach Fredericton does not appear. It is asserted in the testimony that buyers and dealers prefer to get shingles by rail because they can keep a better assortment of different grades by obtaining their supply in small carload quantities; but if the shipments are by the water-way they have ordinarily to replenish their stock by the cargo.

The rates to Boston on lumber from Fort Fairfield and Fredericton are, respectively, 15½ and 14½ cents per hundred pounds, and the lumber rate from Fort Fairfield is now 1 cent less than at the time the complaint was filed. Lumber and shingles are usually classified alike and take the same rates, but the reason for the difference in rates from Fort Fairfield is stated in the first finding. Not over a dozen cars of lumber are shipped from Fredericton during the year, most of the timber being floated to St. John. The rail rate on lumber and shingles from St. John to Boston, 44 miles farther, is 16½ cents per hundred, but the traffic goes by water. Since the 26½ cent rate

on shingles from Fort Fairfield went into effect an agent of the Canadian Pacific has obtained letters from shippers on the Aroostook branch expressing themselves satisfied with that rate.

4. For the year ending July 31, 1891, there were shipped by rail from Fredericton 284 cars of shingles, and during the year following 400 cars were shipped, making 684 cars for the two years. For the same period about 2,000 carloads were shipped from the Aroostook division; and 541 of these were loaded at Fort Fairfield. Allowing 22,000 pounds to the carload and 200 pounds to the thousand shingles, this gives 75,240,000 shingles from Fredericton, and 220,000,000 from the Aroostook, of which 59,510,000 were sent from Fort Fairfield.

The following rates per hundred pounds have been in effect on shingles in carloads from Fort Fairfield to Boston from 1883 to the present time:

1883 to 1887, 35 cents; 1887 to 1889, 34 cents; 1889 to April 21, 1892, 31½ cents; April 21, 1892 to date, 26½ cents.

There was an understanding between the railroad people and the parties who built the one important mill at Fredericton about 5 years ago that a rate of 16½ cents per hundred pounds would be established from Fredericton in order to protect it from St. John competition. This was done, and with little variation the rate has been maintained ever since, it now being 17½ cents. This rate is not raised during the season of closed navigation, but is uniform the year round.

5. Shingle rates from Fort Fairfield and Fredericton to Boston are divided between the carriers as follows:

Fort Fairfield rate, 26½ cents per 100 lbs. Canadian Pacific, 119 miles, 40 per cent. The balance, 60 per cent, is apportioned between the other lines on the basis of 70 per cent to the Maine Central, 251 miles, and 30 per cent to the Boston & Maine, 108 miles.

Fredericton rate, 17½ cents per 100 lbs. Canadian Pacific, 68 miles, an arbitrary of \$5.00 per car, and then 23 per cent of the remainder. After deducting the share of the Canadian Pacific, the Maine Central gets 69.9 per cent and the Boston & Maine 30.1 per cent of the balance.

These divisions do not bear out the statement of a witness for the Canadian Pacific that that company gets more revenue out of the rate from Fredericton than from the rate from points on the Aroostook branch. It was stated by the witness that this was on account of the \$5.00 per car arbitrary on Fredericton shipments and that the average carload of shingles from Fredericton weighs 25,000 lbs. as against 22,000 lbs. per car from Fort Fairfield; this difference in weight is claimed to exist because Fredericton shingles are thinner and more can

be loaded in a car. A carload from Fort Fairfield of 22,000 lbs. at 26½ cents amounts to \$58.30 of which the 40 per cent share of the Canadian Pacific is \$23.32. A carload from Fredericton of 25,000 lbs. at 17½ cents yields a total revenue of \$43.75 out of which the \$5.00 arbitrary and 23 per cent share of the Canadian Pacific is \$13.91. These divisions and differing carload weights do, however, produce a slightly higher rate per car per mile to the Canadian Pacific from Fredericton (20.76 cents) than from Fort Fairfield (19.60 cents).

The evidence does not clearly support this claim of heavier carloads from Fredericton. It is difficult to understand how one carload of thin shingles can weigh much more than a carload of shingles somewhat thicker in size, unless the shingles are less dry or there is a difference in the size of the cars. It was not contended that the Fredericton shingles are not of standard size, though admitted to be somewhat thinner than the Fort Fairfield article; or that they are shipped in a wetter state; or that any reason exists for furnishing larger cars to Fredericton shippers.

Figuring on an average carload of 22,000 lbs. the rate of 17½ cents from Fredericton yields a gross sum per car of \$38.50, out of which the \$5.00 arbitrary and 23 per cent of the remainder gives the Canadian Pacific for the haul of 67 miles to Vanceboro \$12.71, or 33 per cent of the rate, and 1 cent and 7 mills per ton per mile; while the rate from Fort Fairfield of 26½ cents yields that company, from its 40 per cent share, a rate per ton per mile of 1 cent 7.8 mills for the 119 miles to Vanceboro.

This \$5.00 per car arbitrary allowed to the Canadian Pacific dates back to the time when the Fredericton Junction Railway, being separately operated, received that sum for its share of the service, and it has been continued ever since.

The rate per car (22,000 lbs) per mile which the Canadian Pacific receives under present rates is about 19½ cents from Fort Fairfield and 19 cents from Fredericton.

The rate per car per mile for the whole distance to Boston is about 9 cents from Fredericton and a little over 13 cents from Fort Fairfield.

The rate per ton per mile (produced by the 26½ cent rate from Fort Fairfield to Boston 478 miles, is a little over 1 cent and 1 mill. The rate per ton per mile from Fredericton to Boston, 426 miles, rate 17½ cents, is about 8.2 mills.

6. A considerable portion of the shingle timber used at Fredericton is floated down the Aroostook, but much of it is believed to come from the upper St. John. It is claimed and not disputed, that practically no shingles are made at Fredericton from Canadian lumber. Shingles made at Fredericton from American timber are

admitted into the United States free of duty.

The average value of cedar shingles of all grades in the Boston market is about \$2.50 per thousand, or from 250 to 275 dollars per carload. At Fort Fairfield the value per car is stated to be about \$70.00 less, this sum representing cost of shipping, transportation, delivery, selling commissions, and similar expenses. The value of a carload of shingles at Fredericton is not shown. Assuming milling expenses to be similar at Fort Fairfield and Fredericton and that logs at the place of cut cost each the same, the greater value of a carload at Fredericton can be estimated by considering the difference in rates to Boston in favor of Fredericton less the excess cost of shingle timber at the Fredericton mills.

The following unverified statement was put in evidence by the defense as showing the cost per thousand feet of Aroostook shingle timber in the mill of the principal shingle manufacturer at Fredericton:

Estimate showing cost per M of logs delivered at Phoenix Mills, Fredericton, N. B.

Stumpage on Cedar Logs.....	\$2.50	per M
Hauling Logs to Bank of Stream & River.....	6.50	" "
Driving Logs to Madawaska Log Driving Co's Limits.....	1.00	" "
Tolls Madawaska Log Driving Co.....	19	" "
L. W. Pond's Sheer Boom Tolls.....	11	" "
Tolls St. John River Log Driving Co.....	35	" "
St. John Boom Co. Rafting Charges.....	2.00	" "
Freighting from Booms to Mill.....	42	" "
Total.....	\$13.07	" "

Complainants' principal shipper testified in regard to the cost of shingle logs in his mill at Fort Fairfield, but his testimony was somewhat indefinite as to some items and he was subsequently requested by the Commission to supplement it with an itemized and duly verified statement of such cost. The following items appear in the statement which was thereupon filed:

Statement showing cost of 1000 feet of Cedar Logs at H. Stevens & Co's Mill:

Stumpage—average for 1892.....	2.75
Scaling in woods.....	.08
Landing logs on bank of stream.....	6.50
Driving logs to H. S. & Co's Mill.....	1.65
L. W. Pond, boom fees.....	10
Rafting, sorting and other necessary expenses on logs at mill.....	1.25
Expense of keeping boom, piers and dam in repair.....	50
Total.....	\$12.88 per 1000 ft.

In the latter list the first item is \$3.75 for "Stumpage, average for 1892," and the second is 8 cents for "scaling in woods," while in the statement of the Fredericton shipper the cost of stumpage is put at \$2.50, and there is no charge for scaling. These two statements were made out at different times, the first in August, 1892, and the other in February, 1893, and it may well be that the average stumpage cost to the Fredericton shipper for 1893 was as much as the average stated by the Fort Fairfield manufacturer. The last item in the latter statement is 50 cents per thousand for "keep-

ing boom, piers and dam in repair," but no item in the Fredericton shipper's statement relates to such expense. The difference of 25 cents in cost of stumpage and the items of 8 cents for scaling and 50 cents for repairs, above mentioned, should not therefore be considered in comparing the two lists with a view of arriving at an estimate of the difference in the cost of logs in the respective mills. With those charges excluded the difference between the two statements is \$1.07 per thousand in favor of Fort Fairfield. It does appear, however, and it should be noted, that the river current at Fort Fairfield is much swifter than at Fredericton and that it is more difficult to handle logs and booms in the Aroostook region than at the latter point; that the Fort Fairfield shipper maintains from 16 to 20 piers in the river and also a boom every year, and he distinctly testifies that the expense of handling logs at that point is as much as the boom charge at Fredericton, taking all the expenses into account. Estimating the difference in cost of logs in the mills at the two places at \$1.00 per thousand feet in favor of Fort Fairfield, and as one thousand feet of timber will make an average of ten thousand shingles, each thousand being estimated to weigh 200 pounds, this gives Fort Fairfield the advantage in cost of about 5 cents per hundred pounds. But on the other hand Fredericton has an advantage in rates of 9 cents per hundred, and, therefore, this estimate would give it a net benefit in the matter of cost and rates of 4 cents per hundred pounds, 8 cents per thousand shingles, and (reckoning 22,000 lbs. to a car) \$8.80 per car-load.

Conclusions.

The important question presented for decision is whether rates charged by defendants for the transportation of shingles give undue preference or advantage to Fredericton, or subject Fort Fairfield to undue prejudice or disadvantage in its competition with Fredericton in the shingle industry, the shipment of that commodity, and its sale in the Boston market.

Fort Fairfield is more advantageously located than Fredericton with reference to the place where the timber is cut and the cost of driving logs to and getting them into the mills. On the other hand, Fredericton is more favorably situated as to facilities for the transportation of the manufactured article to the markets, for it is somewhat nearer in point of distance, and being located on the banks of a navigable stream, it can apparently, if pressed by high rail rates, send its traffic by vessel to market ports. We say that water transportation for shingle traffic *apparently* threatens the defendants at Fredericton, for the testimony does not present facts pertinent to this question sufficient to form the basis of a positive opinion.

We only know by the proof that a river runs past Fredericton to the sea, and that five small schooners were loaded with shingles during the short time after this complaint that a 20 cent rate was in effect on that commodity to Boston, and that they did *not* go to Boston. Where did those schooners go? Why was no Fredericton shipper called to testify in this case? Why is it that defendants failed to show the shipment of a single cargo of shingles from Fredericton to Boston or any other *named* point at any time? What draft vessels can navigate loaded from Fredericton, and what is the depth of the channel at different states of the tide? Is the statement incontrovertible which we find undisputed in this case that buyers and dealers prefer their shingles to come by rail because of quick transit, smaller shipments, and ability to keep greater assortment of different grades within the compass of a smaller stock than would be necessary if they received them by sea; and if true, is such preference strong enough to induce the great majority of consignees to pay a considerably higher rate of freight? Were those schooner loadings at a critical time after all nothing but a sharp practice of the Fredericton shingle shipper to induce a return to the old and favorable Fredericton rate? Indeed, for anything we know to the contrary, these schooners might have been destined no farther than St. John. Though answers to these interrogatories are material to a solution of the question "whether water competition of controlling force in respect to traffic important in amount" exists for shingle transportation from Fredericton, they are not answered by the evidence.

When water competition is alleged to justify rates in any case under the statute, the carrier must affirmatively show by proof which has more than the effect of presumption and which clearly establishes that such competition is a controlling factor in the transportation of traffic important in amount from the point in question.

Defendant's principal witness testified that the reason for making the 16½ cent Fredericton rate, when the one important mill was built there, was to protect Fredericton from the competition of St. John, located on the coast, 44 miles from Fredericton, and the eastern terminus of the Canadian Pacific line. At the time this complaint was brought the rail rate on shingles from St. John was 16½ cents, and that rate was also in force at Fredericton. That charge was and is insufficient to hold any shingles to the rail line at St. John, but at Fredericton it was controlling, and under that rate the roads took the traffic. Water transportation being a controlling and even a monopolizing competitor for shingle carriage from St. John, and Fredericton being situate but a short distance from St. John and upon a river which is claimed to

be open from Fredericton to navigation by sea-going vessels, why is it that the rail rate which cannot secure from the water carriers any traffic from St. John, can have such overpowering effect at the near by town of Fredericton as to hold traffic from that point to the rail line? The evidence does not answer this question. Moreover, the 16½ cent rate at Fredericton has, since this complaint was brought, been voluntarily increased by defendants to 17½ cents per hundred pounds, without apparent effect upon the volume of rail traffic from that place.

Although water competition may threaten rail carriage from Fredericton, the case, in our opinion, presents a broader standard of rate adjustment than that of possible water transportation from that point, and this is that which defendants themselves employ in fixing and maintaining the charge from Fredericton. We think that the facility with which Maine logs can be driven down the rivers to St. John, at comparatively slight additional cost above such cost to Fredericton, and the fact that water competition at St. John is so influential as to debar the roads from obtaining any shingle or lumber traffic at that point, are really the controlling reasons for the low Fredericton rate. The interests of Fredericton were identical with the interests of the carriers themselves, for, if putting the nominal St. John rate in force from Fredericton would enable the manufacturers at that point to profitably saw shingles and ship them over the more convenient and preferable rail route, it was not only good business policy on the part of the carriers, but a proper recognition of the shingle interests of Fredericton to establish a low but profitable rate at that point and "protect it from the competition of St. John."

Fort Fairfield shingle makers are likewise affected by the cheap log-drive, and are also active competitors of Fredericton and St. John sawyers for the sale of shingles in the large Boston market. Aroostook river shingle timber is driven down that stream past Fort Fairfield and thence down the St. John river past Fredericton to St. John and the sea. The same carrier serves St. John, Fredericton and Fort Fairfield, and if Fredericton is entitled to protection in its competition with St. John, then Fort Fairfield has also the right to demand, and the carriers have equal advantage in affording to that point, reasonable protection in its competition with Fredericton and St. John.

The defendants contend that the difference in rates is nothing more than the difference in cost of timber in the mills. Even if the evidence fully sustained that contention, it would not be a justification for the disparity in rates. Each locality is entitled to have and retain as against all other localities the benefits which naturally accrue to it by reason of its advantage

location. *Eau Claire Board of Trade v. Chicago, M. & St. P. R. Co.* 4 Inters. Com. Rep. 65, 5 I. C. C. Rep. 264; *Minneapolis Chamber of Commerce v. Great Northern R. Co.* 4 Inters. Com. Rep. 280, 5 I. C. C. Rep. —. This principle was surprisingly well expressed by a Fort Fairfield shingle manufacturer while testifying in this case. In answer to a question of defendants' counsel during cross-examination he said: "I can't see, if the Fredericton lumber costs 5 cents more a thousand, why you should charge me that extra 5 cents." The higher rate from Fort Fairfield must be justified on some other ground than that of greater cost of production at Fredericton or be reduced. Fort Fairfield, Fredericton and St. John are competing points; the Fredericton rate is fixed, not by relative cost of production, but with respect to the traffic conditions which prevail at St. John; and, according to its situation, Fort Fairfield rates should be made with like reference. Keeping these main points in view, what, under all the circumstances, is a relatively fair and reasonable rate from the latter point?

Fort Fairfield is located on a branch line of one division of the Canadian Pacific System. Fredericton is located on a branch line of a different division of that system. The two divisions join at McAdam Junction, a few miles from Vanceboro, where the Maine Central connects and takes the traffic; the distance of Fort Fairfield from Vanceboro is 119 miles, while that of Fredericton from Vanceboro is 67 miles. There is no definite proof in this case that it costs materially more *per mile* to operate the Vanceboro-Fort Fairfield line than to operate that which reaches Fredericton. We are asked to infer such greater cost from the interior situation of Fort Fairfield and the fact that the short Aroostook branch road does not pay full interest on its bonded indebtedness. There is no testimony showing the financial condition of the line through Vanceboro to St. John and that of the Fredericton branch, or that of the line running north from Vanceboro with which the Aroostook branch connects at Aroostook Junction; nor is there any testimony showing the character of grades or material variation in expense of operation. The Canadian Pacific does not make separate annual reports to this Commission for these different branches or divisions. A departure from equal mileage rates on different branches or divisions of a road is not conclusive that such rates are unlawful, but the burden is on the company making such departure to show its rates to be reasonable when disputed. *Logan v. Chicago & N. W. R. Co.* 2 Inters. Com. Rep. 431, 2 I. C. C. Rep. 604.

The answer of the Maine Central avers that the Fredericton rate is not remunerative in itself, but that it does afford some profit

above cost to the carriers by holding not only shingle but other traffic to the rail lines which would otherwise be encouraged to seek carriage by water; and that a large amount of freight is secured from new business built up by shippers, the outgrowth of their exclusive patronage of the rail lines. If this portion of the answer was directed to the 16½ cent shingle rate in force when complaint was made, the defendants have added to their profits by the advance of ½ of a cent above that rate; besides, we have seen that they have a nominal rate of 16½ cents in effect for 44 miles longer haul from St. John, and while they do not get business under that rate, they advertise that charge to the public as a rate for which they are *willing* to take shingles from St. John. In the absence of proof to the contrary we must accept the averment that the rate from Fredericton is profitable, if not in itself, then as a factor in developing business at and traffic to and from that point.

Shingles are low grade freight. The rate from Fredericton yields a through rate per ton per mile to Boston of 8.2 mills, and under the divisions between the carriers, a rate per ton per mile to the Canadian Pacific of 1 cent and 7 mills; that is to say, for 67 miles haul this company gets more than double the rate per ton per mile produced by the through rate for the whole distance. It is further observed that after deducting its share of the Fredericton charge, which the findings show amounts to about one third of the whole charge, the other two roads divide the balance in the proportion of 70 per cent to the Maine Central for 251 miles and 30 per cent to the Boston & Maine for 108 miles, and a slight calculation will demonstrate that this division is strictly upon a mileage basis, for 70 per cent of the added mileage is almost exactly 251 miles, and 30 per cent is then of course very nearly 108 miles.

Taking now the Fort Fairfield rate we find that the through rate per ton per mile to Boston is 1 cent and 1 mill, and that under the divisions between the carriers, the Canadian Pacific gets 1 cent 7.8 mills per ton per mile for its distance of 119 miles. This is 8 tenths of a mill more per ton per mile than it gets out of the Fredericton rate for 67 miles. The percentage share of this road out of the total charge is 40 per cent, the other roads dividing the remaining 60 per cent upon the mileage basis shown above. This analysis of the rates per ton per mile and divisions between the carriers shows that if the through rate from Fredericton is not particularly profitable, it is, nevertheless, under the basis of division, much more profitable to the Canadian Pacific than to its connecting roads, and that the basis on which both the Fort Fairfield and Fredericton rates is divided between the carriers is by arbi-

trary (either fixed or percentage) deduction of the Canadian Pacific share, and a pro-rating of the balance on a mileage basis; so that from Fort Fairfield that company for 25 per cent or one fourth of the distance gets 40 per cent or two fifths of the rate, and from Fredericton for about 16 per cent or a little over one sixth of the distance it gets 33 per cent or about one third of the rate.

The apportionment of a rate to different parts of a through line does not determine the charge to the public, but it may be significant on the question of a reasonable rate for the whole distance. *Brady v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 78, 2 I. C. C. Rep. 181. When the reasonableness or the relative reasonableness of charges is challenged every material consideration which enters into the making of such charges is pertinent to the inquiry.

From what has been said it is apparent that the Canadian Pacific receives an extremely liberal share of either through rate as compared with those accepted by the other carriers; and it is also clear that any reduction which may be ordered need not be chiefly borne by the other roads; but how such reduction should be accomplished is matter for the carriers to determine among themselves. *Boston Fruit & Produce Exch. v. Pennsylvania R. Co.* 8 Inters. Com. Rep. 604, 5 I. C. C. Rep. 7; *Georgia Railroad Com. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324. This brings us to a statement in the answers of the defendants that if any reduction of the Fort Fairfield rate should be required the Canadian Pacific would be forced to take shipments of shingles from points on the Aroostook branch only at local rates. That company may do this, but if the shipment or carriage is still continuous from Fort Fairfield to Boston, the mere circumstance that it insists on its local rate for its share of the through charge will not avail if the total charge is unreasonable, *Georgia Railroad Com. v. Clyde SS. Co. supra.* And whether such action would operate to give undue preference to other points from which it is a party to lower through rates or to an arrangement for continuous carriage or shipment is a matter to which it would doubtless feel obliged to give due consideration.

The essential question here is one of relatively reasonable rates; not whether either rate is reasonable in itself. It is the effect of the carriers' action at one point upon the legitimate business prosperity of another point, which is the vital point in this controversy. If the present Fredericton rate does not actually result in profit, the carriers should not seek to control or stimulate traffic from that point by making the rate so low; and if they carry for unusually small compensation from that place they do so under the plain injunction of the law that

their action must not inflict undue prejudice or disadvantage upon other communities or persons. When a carrier engages in transportation for which, by reason of competitive conditions or for purposes of its own, it receives less rates from some patrons and at some localities, it accepts the legal obligation to give impartial service to other patrons and at other localities that sustain similar relations to the traffic. *Manufacturers & Jobbers Union v. Minneapolis & St. L. R. Co.* 3 Inters. Com. Rep. 115, 4 I. C. C. Rep. 79.

Applying this principle to the situation here and considering that the controlling influence upon traffic in this case is shingle manufacture at and water competition from St. John, and that the effect of such competition at Fort Fairfield is only less in degree than at Fredericton, we must hold that a rate from Fort Fairfield, on such low grade freight as shingles, which is 50 per cent higher than the rate in force on that commodity from Fredericton, is not justified by the mere fact that Fort Fairfield is located 52 miles farther than Fredericton from the market and upon a branch road unremunerative as a separate line. That road is short in length and its operation is not unprofitable to the main line; it is regarded and worked as a "feeder" to the Canadian Pacific system.

While it is evident that Fort Fairfield is entitled to some reduction from the present rate of 26½ cents, just how much the rate should be reduced is difficult to determine. It might with some reason be held that a rate per ton per mile of 8.2 mills produced by the Fredericton rate of 17½ cents, though not very profitable from that point for the distance of 426 miles to the market, is a sufficient rate per ton per mile for the distance of 478 miles from a competing locality in the same territory to the same market; the rate per ton per mile rule being that while the aggregate charge should increase with distance the rate per ton per mile should decrease; but upon all the facts we believe that the proper relation of these rates is indicated by the defendants' own action soon after this proceeding was instituted. Immediately after the complaint was filed they reduced the Fort Fairfield rate to 26½ cents and raised the Fredericton rate to 20 cents, and they alleged as a reason for subsequently lowering the latter rate to 17½ cents that the traffic from Fredericton began to go by water. While the evidence is not sufficient upon this point we do not question that under the 20 cent rate *some traffic went somewhere by sea*; but we have seen that Fort Fairfield occupies a definite relation to the Fredericton shingle industry and to St. John water competition by reason of the facility of driving shingle logs down the river to the coast, and we think an adjustment which the defendants voluntarily established and attempted to continue cannot be unfair to them

4 INTER S.

and should be enforced by transferring the 2½ cent reduction to Fort Fairfield, unless they prefer to again put in the 20 cent rate at Fredericton; for it is the relation of rates which constitutes the question in this case, and defendants can at their option make that relation reasonable by raising the latter or lowering the former rate, provided neither rate is made unreasonable in itself. This, on the basis of 22,000 lbs. to the car-load, will amount to a difference of \$5.50 per car.

Our reason for not comparing lumber rates with shingle charges in this case will appear from the following statement of the conditions which govern lumber transportation from the points in question. Notwithstanding lumber rates are as low as 15½ cents from Fort Fairfield, and correspondingly low from other Aroostook branch points, shipments of lumber over that branch do not constitute more than 4½ per cent of its traffic, and at Fredericton, where the rate is only a cent lower, not over a dozen cars a year go by rail. The obvious conclusion is that the tendency of the timber traffic to seek the cheap means of the log drive to the coast, and thence by sea, either in the form of log or sawed into lumber, cannot be overcome by any rates the railroads can afford to make. Yet, despite this natural tendency, the evidence shows that under the relatively favorable rate from Aroostook points considerable lumber *does* go by rail, and that practically none is shipped from Fredericton, and this is a clear indication of recognition on the part of the rail carrier of the favorable situation of Aroostook branch points in respect of distance from the timber cut and cost of logs in the mills; and further, of the controlling force of the log drive upon lumber traffic and rates. The river drive operates with stronger force upon the lumber than upon the shingle trade. Why this is so the testimony does not show, though various reasons deducible from general knowledge might be stated; but it is idle to speculate as to the cause when the fact itself is sufficient for the purpose in view. The lumber rates have not been regarded as a standard by which to judge of the legality of shingle rates in this case, because it is shown that the river drive has materially different effect upon the manufacture and shipment of the two articles.

Before concluding this report we desire to say that the fact of Aroostook shingle shipments being considerable, under rates in force for the last two years, is not a sufficient answer to the charge of undue disadvantage which we find sustained; nor is such answer strengthened by the further fact that several shippers on the Aroostook have, willingly or otherwise, expressed themselves satisfied with present rates. Whether Aroostook shingle men have been prospering under adverse rates, or

whether some of them are content with present rates, does not determine the main question. The aim of this report is not to ascertain the measure of their prosperity, or how high rates their industries will stand; its purpose is to determine their rights.

There are some other facts which ought to be noticed. The timber from which shingles are made both at Fort Fairfield and Fredericton is grown in the state of Maine. No Canadian timber of any consequence is sawed at Fredericton. The shingle industry has greatly developed at this point since the year 1887, and one rate has, with little variation, been in effect from that point during all that time. It was originally 16½ cents; when this complaint was brought it was 16½ cents, and now it is 17½ cents. At Fort Fairfield the rate from 1887 to 1889 was 34 cents; from 1889 to April, 1892, it was 31½ cents; and following the institution of this proceeding it was made and now is 26½ cents. During the year ending July 31, 1891, Fredericton shipped 284 cars; and the year following its shingle shipments increased to 400 cars, a total of 684 cars for the two years. The hardship entailed upon Aroostook river points was so manifest that the defendants themselves, at the time of complaint, saw the necessity of a large reduction of the 31½ cent rate; and while that reduction was, as defendants' contend, a voluntary concession, yet, having followed shortly after the complaint, it can be regarded in no other light than as a concession which Fort Fairfield and other Aroostook points were entitled to as a matter of right. The present difference in rates of 9 cents a hundred against Fort Fairfield, amounting on, say, 250 cars a year, to nearly \$5,000, it seems to us is unduly prejudicial to

that point in favor of Fredericton, and a difference that would be nearly, if not quite, unbearable if it were not for the less cost of logs in the mills. The reduction to be ordered will reduce this amount by about \$1400. Whether this is all Fort Fairfield is entitled to we have some doubt; but considering the character of the lines, the sparsely populated country through which they pass, and the fact that neither of the present rates can be considered unreasonable in itself, that amount of reduction is as much as we feel called upon to require.

The claim for reparation in this case was for a refund of the excess over reasonable charges collected by defendants subsequent to complaint. The substantial reduction announced by the carriers soon after the proceeding was instituted was intended by them to satisfy the complaint, and we are not satisfied, because that reduction as finally fixed was accidentally insufficient, that the order for further reduction should have retroactive effect. The claim for reparation must be denied.

The substance of the order based upon the conclusions herein stated will be that defendants cease and desist from charging or receiving for the transportation of shingles in carloads from Fort Fairfield, Stevens' Siding, and Hurd's Siding in the state of Maine to Boston in the state of Massachusetts and points taking Boston rates, any greater aggregate rate per hundred pounds than is found and obtained by adding 6½ cents per hundred pounds to the rate contemporaneously in force over their roads for the transportation of shingles in carloads from Fredericton, in the province of New Brunswick and Dominion of Canada, to Boston and the Boston rate points aforesaid.

v.

THE PENNSYLVANIA RAILROAD COMPANY, THE PENNSYLVANIA CO., and THE PITTSBURGH, CINCINNATI & ST. LOUIS R. Co.

Application by defendants for rehearing.

Mr. James A. Logan, for Defendants, in support of application.

Mr. John Henry Keene, for Complainants, in opposition thereto.

MEMORANDUM.

By the Commission:

The original complaints and answers in these cases presented one and the same question substantially, and they were, by consent of parties, tried together. The complaints were filed November 28, 1887, and alleged that between April 27 and September 1, 1887, the defendants charged complainants 50 cents per barrel of 45 gallons of oil shipped from Washington, in Washington county, Pennsylvania, by way of Pittsburg, to Baltimore, Maryland, and that the said charge of 50 cents was unjust and unreasonable to the extent of 10 cents per barrel.

Complainants further alleged that at the time said alleged excessive charge of 50 cents was being made by defendants they were (and, as the proof shows, one of them, the Pennsylvania Railroad Company, was) carrying oil to Baltimore from Bradford, Clarendon, and points in the Bradford oil field, about the same distance from Baltimore as the Washington oil field, at 40 cents per barrel of 45 gallons, and that this difference of 10 cents per barrel in the transportation rates and charges from the Washington and from the Bradford oil fields "are not based upon any reasonable or just foundation whatsoever."

In their answer, the defendants averred "that said charge of 50 cents is just and reasonable considered by itself or compared with the rates from Bradford, Olean, and Clarendon" for the reason, as they further averred, that the traffic in passing through the city of Pittsburg was moved the length of two railroad yards, which movement was slow and expensive, and that "the hazard because of liability to ignition in passing through said city of Pittsburg was great to the company."

In their petition for rehearing, the respondents present several grounds for their application, but in the main their motion is based upon:

"First: That the superior quality of the oil produced in the Washington oil fields, as compared with the oils produced in the Bradford and Olean districts, justifying a larger charge for the former, although adverted to in the testimony, was not sufficiently developed in the evidence, and was not sufficiently considered by the Commission in determining the case.

"Second: The fact of adverse gradients on the line over which the Washington oil passed, and favoring gradients on the line over which the Bradford and Olean oils passed, although presented by the testimony, was not given weight by the Commission, inasmuch as the report says, 'The (defendants) did not call to their aid any alleged difference in grade, volume of business or other causes which affect the cost of transportation.'"

It is true that the superior quality of Washington oil was "adverted to in the testimony." The officers and agents of the defendant companies in their testimony went extensively into the nature of the traffic and the circumstances attending it, including the slightly greater value of Washington oil, the alleged risk of passing through the city of Pittsburg and the extensive yards of the Pennsylvania Railroad Company, the heavy grades passed over in going up the mountains, and the care necessary to be taken in going down. Except the alleged risk of passing through Pittsburg, these questions were not raised by the complaint or answer, but were taken into consideration in connection with all the facts by the Commission before the findings and order of the Commission were made.

The motion for rehearing is apparently based chiefly upon the following statement contained in the opinion, or conclusion, of the of the Commission.

"The defendants justify the fifty cent rate as reasonable on the alleged hazard and liability to accident in carrying oil through Pittsburg, and on this alone. They do not call to their aid any alleged difference in grades, volume of business, or other causes which affect the cost of transportation."

In the argument of counsel in support of the motion for rehearing the respondents insist that this statement shows that the question of gradients was not given weight by the Commission. This is an erroneous view of the matter. All that was meant or intended by this language used in the opinion was that the respondents by assigning the alleged slow movement and expense of passing through their Pittsburg yards and the hazard and risk of passing through Pittsburg city alone as reasons in justification of the 50 cent charge, relied upon these reasons alone, and did not deem any other to have any bearing on the subject. No other was set up in the answer, and no argument was made claiming any other. As shown by the opinion in facts found, the controversy and correspondence between complainants and defendants as to the oil rates from Washington had been going on for two or more years, and in that correspondence the superior quality and commercial value of the Washington oil was always assigned as the justification for the higher transportation charge on the Washington oil. In that correspondence neither the expense of passing the yards, nor the risk which was assigned in the answer as justification, nor the gradients, was mentioned or "was given weight" by the respondents themselves. It was by the testimony of the officers of the Pennsylvania Railroad Sys-

tem shown that the general cost of transportation is "getting down." The rate from Washington, Pa., to Baltimore was never higher than 50 cents, though it had been lower. The Commission was of opinion that it should be lowered to 40 cents, and so ordered, and is still of opinion that that is as high as the rate may reasonably be, and that the Commission correctly so found. The motion for a rehearing must, therefore, be denied.

[No. 187.]

1. Unreasonable or unjust classification of a commodity is not shown by evidence of lower classification for articles widely dissimilar in the elements of risk, weight, bulk, value, or general character. The proper method of comparison is the classification accorded by the carriers to analogous articles.
2. When an article moves in sufficient volume and the demands of commerce will be better served, it is reasonable to give a lower classification for carloads than that which is applied to less than carload quantities, but the difference in such classification should not be so wide as to be destructive to competition between large and small dealers. *Thurber v. New York Cent. & H. R. R. Co.* 2 Inters. Com. Rep. 742, 3 I. C. C. Rep. 473, cited and reaffirmed. The justice of the claim for a lower rating on carload lots can only be determined upon the facts in each case.
3. When on complaint of a carload shipper unjust discrimination is alleged to result from equal rates on carload and less than carload quantities of the same commodity, the burden of proof is upon the complainant.
4. Upon complaint alleging unjust discrimination against carload shippers of eggs in favor of shippers in less than carloads, it appeared that under the "official classification" eggs take second class rates for carload or less quantities; that the commodity is carried in refrigerator cars; that for carload shipments ice to the amount of 6,000 pounds is furnished by the carrier without extra charge; that less than carload shipments are taken from local stations in "pick-up" cars to distributing points and forwarded in carloads to New York and other large markets; that notwithstanding the special facilities afforded to small shipments by the carriers, the large dealers control 88 per cent of the traffic. Held, upon all the facts in the case, that no unjust discrimination results to the carload shipper from the equal rating of carload and less than carload lots and the special service rendered in gathering and forwarding small shipments, and the complaint should therefore be dismissed.
5. Power of concentrated business interests to force concessions in transportation rates which operate to the disadvantage of the general public discussed.

Complaint filed March 29, 1889.—Answer filed April 22, 1889.—Hearings at Toledo, Ohio, May 24, 1889.—Indianapolis, Ind., Sept. 17, 1889.—Case ordered re-opened May 24, 1890.—Additional testimony taken at Cincinnati, Ohio, May 3, 1892.—Petitions for leave to intervene filed February 6–10, 1892.—Briefs filed July 11, 1889, and May 25 to Oct. 5, 1892.—Decided April 1, 1893.

CLASSIFICATION of Eggs. See Complaint, 3 Inters. Com. Rep. 491.

Hon. J. B. Foraker, for Complainant.

Mr. H. L. Bond, for the Columbus & Cincinnati Midland R. R. Co. and The Baltimore & Ohio Railroad Company.

Mr. J. T. Brooks, for the Pittsburgh, Cincinnati & St. Louis Railway Company.

Mr. H. H. Poppleton, for the Cleveland, Cincinnati, Chicago & St. Louis Railway Company.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner :

This complaint was filed March 29, 1889. The case was partially heard at Toledo, Ohio, on the 24th day of May, 1889, and for the purpose of taking more testimony on the part of both complainant and defendant, the hearing was continued at Indianapolis, Indiana, on the 17th of September, 1889. At that point the complainant appeared in person, but the defendant was not represented. Amongst other things there done the complainant filed questions in writing which he wished to be submitted to the chairman of the Central Traffic Association for answer. The case was to have been submitted upon the receipt by the Commission of answers to the questions so filed, and such answers were filed on the 30th of September, 1889.

After examination of the record at that time, the Commission found that it was claimed that it would be for the advantage of ordinary producers of and local dealers in eggs to have carload lots transported at less rates than was charged for quantities in amount less than carload lots; and that they, with the larger dealers, preferred to have such less rates for carload lots, and there having been little or no testimony introduced upon which to base this claim; it being also claimed that many railroad officials agreed that there should be a less rate on full carload lots than for less than carload lots; and the case having been tried in a somewhat irregular manner whereby the petitioner might have been misled in the manner of putting in the evidence on his part, it was ordered that the case be re-opened for the purpose of enabling both parties to present further evidence bearing upon the above claims.

As a result of this order, the intervenors mentioned as intervening complainants filed what they styled petitions; and the issues being made up, the case came on for hearing at Cincinnati, Ohio, May 3, 1892.

The complaint is that the defendant, the Columbus & Cincinnati Midland Railroad Company refuses a carload rate on eggs when a car is shipped from one consignor to one consignee, while a carload rate is granted on sugar, coffee, starch, soap, oranges, celery, pumpkins and squashes, thereby discriminating against eggs; and that the rate on eggs in

carloads of 20,000 pounds weight from Washington Court House, Ohio, to New York, is \$107.00, and is unreasonably high and excessive when compared with carload freights to New York.

The original respondent, by its General Superintendent, answered April 15, 1889, admitting that eggs were carried at one rate, regardless of quantity, and alleging that the rate is in accordance with the classification of the Trunk Lines (over some one of which eggs must go from Washington C. H. to New York); denying that thereby any discrimination is worked, but alleging that the common rate to all persons, whether shipping by the carload or in less than carload lots, is in the line of public policy, treating all shippers alike; and denying that on 20,000 pounds, that being the weight of a carload of eggs, the rate from Washington Court House to New York, being 53½ cents per 100 lbs., or \$107.00, is unreasonable.

The several intervenors described as "large dealers in eggs, small dealers in eggs, and farmers or producers of eggs," filed petitions stating that they are of the opinion that it will be for the best interests of all of the producers and local dealers, and also the railroads, to have a different and reasonably lower classification on eggs shipped in proper carload lots than is now charged for eggs in less than carload lots, over the railway lines from such points as Washington C. H., Wilmington, London, Xenia, Greenfield, and other such points in Ohio and other western states, to New York and other cities in the east.

There are some things in the appearance of these intervening petitions that might indicate that the signers did not clearly apprehend the nature of the questions involved.

One of the signers under date of January 26, 1892, addressed the Interstate Commerce Commission saying that "he was asked a few days before to sign a petition for a lower classification on eggs than is now charged by the railroad companies. That he signed the petition thinking it called for a reduction in classification of eggs in a local way as well as in carloads. That he has discovered since that the petition is misleading in this respect and that it really asked for a lower rate in carload lots than is charged in a local way. If

such is the case, he states he is bitterly opposed to any such measure, as such an act would certainly as nearly monopolize the trade as anything that could be done."

Upon the order above mentioned being made, various railroad companies engaged in the service under consideration were notified of the order and the scope of the proposed hearing, and in consequence thereof, The Pittsburgh, Cincinnati & St. Louis Railway Company, The Cleveland, Cincinnati, Chicago & St. Louis Railway Company and The Baltimore & Ohio Railroad Company appeared and were made parties to the proceeding as intervenors and defendants.

The first question presented is whether the rate of 53½ cents per cwt. for eggs from Washington Court House to New York is unreasonable and excessive, as compared with other carload rates upon products mentioned in complainant's petition, so as to create an unjust discrimination against large dealers in eggs, and in favor of the small dealers. If the evidence fails to establish this proposition, the complainant, it would seem, must fail for both in the production of testimony and in his argument the complainant has sought to establish his contention by a comparison of the charge upon a car of eggs of 20,000 pounds weight with other carload rates on other articles. These rates as set forth in a table attached to Mr. Brownell's first statement are carload rates upon cranberries, peanuts, tobacco, dried corn, fish, fresh or frozen, biscuit, bread, yeast cake, ginger ale, condensed milk, cocoanuts, celery, cucumbers, coffee, starch, soap, kraut, hops, oranges, lemons, beeswax, mince-meat and dressed beef.

Complainant has also filed what is called a comparison between the Western and Official Classification, showing, as it is claimed, that almost every other farm product except eggs and dairy products has been awarded a classification by which it is granted a carload rate less than the rate charged to those who ship in less than carload quantities, and it is contended that eggs are unequally treated and improperly discriminated against by reason of not having a carload rate. With reference to the comparison sought to be made between eggs and such articles as cranberries, peanuts, tobacco, ginger ale, cocoanuts, celery, cucumbers, starch, soap, kraut, etc., it is difficult to see any particular similarity of the articles that would justify a comparison. Take, for instance, the article of cranberries. The nature of this product seems entirely different from that of eggs, the risk in shipment cannot be the same, neither can bulk or value be near the same; yet all these matters are, according to the testimony of experts, to be considered in determining upon the classification.

One of the expert witnesses, when testifying, says that weight; space occupied; value; ease

of handling; liability to accident or loss; value of the article in the event of accident or loss; frequency or infrequency of shipments; the necessity of providing cars of special construction; the necessity of special care of property such as furnishing ice, stoves, etc.; the speed with which the carriage must be made; the ability to load so that the cars may be filled to their fullest capacity; the liability of certain classes of freight to injure other freight by contact or in accidents, such as acids; the dangerous character of some freights, such as matches and powder; the character of packages such as wine in glass which is much more fragile than wine in wood; are all conditions to be considered in determining upon the proper classification of articles, yet with reference to any or all of these matters there is little if any testimony offered upon which an intelligent comparison can be based.

The evidence shows that in the western states, or upon the lines of railway which have adopted what is known as the Western Classification, eggs in carload lots are placed in a different class from eggs in less than carloads, and this fact is urged by counsel with much earnestness as indicating by the action of the railways themselves the propriety of a distinction in rates as prayed for. In connection with this it is urged, and there is some evidence to sustain the position, that many railway men are of the opinion that there should be a carload rate less than the rate charged for less than carload shipments, although the record seems to show that they contemplate a change by raising the rate on small shipments. It is also urged that most of the railroads engaged in carrying eggs would prefer a carload rate and a less than carload rate, but that the Pennsylvania road has constantly opposed such a distinction, and thus far has been successful in hindering its adoption by the carriers.

The evidence in the case shows that the cost of gathering eggs to the large dealers, who usually ship in carloads, is about 20 cents per 100 lbs.; and it is earnestly contended that if the small dealer has his goods taken up and carried to market at the same rate as the large dealer, necessarily there is a discrimination against the large dealer to the extent of his expense, 20 cents per 100 lbs., in gathering eggs.

As to all these arguments the defendants answer that for a great number of years there has been growing up a system by which the railroad carriers seek to reach the small dealers; that they have developed the present system of gathering eggs in the interest not only of the public, but in their own interests; that it is far better for them to deal with the small dealers than with a few large shippers, and that the real purpose or wish of the complain-

ant is to bring about a discrimination against shippers in small quantities; that the large shippers would, if the power was granted, concentrate the egg business in their own hands, and would then be in a situation to endeavor by throwing their business all to one road, to compel unfair concessions to them; and that it is for the interest of the railways and also for the interest of the public, so far as possible, that transportation transactions should be general, and directly with the smaller business men, rather than with a few parties who have monopolized the business, or would if further advantages were granted them, eventually succeed in doing so.

The facts found from the evidence are as follows:

(1) The original complainant, C. H. Brownell, residing and doing business at Washington C. H., Fayette county, Ohio, is a buyer of eggs and a shipper of the same in carload lots to the city of New York; and in making such shipments he incurs considerable expense in collecting from producers and small dealers such carloads, and in caring for and packing the same.

(2) While said complainant is a shipper in carloads, rated at 20,000 lbs., and upwards, each, he is allowed by defendants to ship a quantity greatly less than 20,000 lbs. as a carload,—a quantity varying from 6,000 lbs. upwards, the same being iced by defendants and sealed to its destination as a carload at the regular rate of 58½ cts. per 100 lbs., as second class freight, according to the Central or Official classification;—in other words, if complainant ships 10,000 lbs. in each of two cars, the 20,000 lbs. go through to destination, under seal and iced, in two cars for the same money as 20,000 in one car. Ice is not furnished the shipper in small lots, and the average amount necessary for this purpose is 6,000 lbs. to the car.

(3) The total cost to said complainant of collecting his shipments of eggs—including packing in cases and loading into the car, and not including cost of cases, is about 20 cts. per 100 lbs.

(4) The testimony shows that shipments of eggs in carload lots are attended with less damage by breakage and otherwise, than are shipments in less than carload lots.

(5) It appears that by prevailing custom and arrangements made, all producers of and dealers in eggs along the lines of defendants' roads are able to bring their product directly to the various depots and stations, put it into refrigerator cars and have it carried to its destination, to wit: the larger cities, generally on the seaboard,—Baltimore, Philadelphia, New York, etc.,—at a uniform rate per 100 lbs.; whether in large or small amounts, one hundred pounds being the unit as to eggs, and cer-

tain other kinds of freight, under the Central or Official Classification adopted by defendants.

(6) While this arrangement is open alike to all—producers and dealers, large and small—yet there are some producers who prefer to sell directly to the small dealers, others to the large dealers who ship in carloads; and, again, some of the small dealers prefer to sell to large dealers instead of shipping for themselves to the eastern market. Various reasons incident to locality, distance to market, motives of personal convenience, motives arising from neighborhood acquaintance and mutual confidence between the parties concerned, and the many influences governing the transactions of daily life cause this diversity of practice.

(7) The Union Line, the through freight department of the Pennsylvania Company, of which the Pittsburgh, Cincinnati & St. Louis Railway, defendant company, is a leased road, has provided such refrigerator cars for all producers, dealers and shippers (within the range of the country wherein complainants reside) who may desire to ship eggs from their several places of residence or business to eastern markets over the roads of defendants.

(8) Said Union Line has a system or method of collecting farm and dairy products, including eggs, by means of "pickup" cars running over said range of country and gathering the greater portion of such freight at Chicago where it is concentrated into carloads; and as a general rule, such freight arriving at Chicago in the morning goes out the following evening on through fast trains to its eastern destination. This system extends as far west as Dakota and Nebraska, and has various central points for collection or concentration,—Chicago being the principal point, and Columbus, O., another, at which latter point is concentrated a large portion of the egg product of the surrounding country, including Fayette county and Washington, C. H., complainant Brownell's place of business. Agents of said Union Line are assigned to such central points and they travel over the adjacent districts of country, and solicit consignments direct from shippers; and this system has been in use from ten to twenty years. The Central or Official Classification of farm and dairy products, including eggs, is in use from the Mississippi river eastward and over a territory within which the complainant in this case resides; and west of said river a different classification as to many of said products, including eggs,—known as the "Western" classification—prevails.

(9) The present cost of the refrigerator dairy product car, such as is used in carrying eggs, is about \$1000. The weight of the car is about 42,000 pounds. It is equipped with self-couplers and air brakes. The old box car in which eggs were formerly carried weighed

about 23,000 pounds and cost about \$450. The rate upon eggs Chicago to New York was as follows, at the periods named:

In 1865	\$1.55 per hundred pounds.
1866	1.25 per hundred pounds.
1874	1.10 per hundred pounds.
1876	.85 per hundred pounds.
1878	.70 per hundred pounds.

1887 and at the present time, 65 cents per hundred pounds.

Section 2 of the Act to Regulate Commerce, so far as it may be claimed to be applicable to the case under consideration, prohibits charging a greater compensation for any service rendered "than is charged any other person or persons for doing for him or them a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions."

It was specifically claimed by the complainants in the case of *Thurber v. New York Cent. & H. R. R. Co.* that carload rates upon certain articles, less in amount than the rate charged for smaller quantities of the same articles, were in violation of the second section of the Act. But the Commission held that "where the article moves in sufficient volume, and the demands of commerce are thereby better served, it is reasonable to give a carload classification and rate." 2 Inters. Com. Rep. 742, 752, 8 I. C. C. Rep. 478, 501. The Commission then proceeded to discuss and decide the specific questions involved as to rates for the carload and less than carload lots upon particular articles complained of, and held that the disparity between the rates shown to exist was not justified by the circumstances; that the differences made were unreasonable, and therefore their reduction within reasonable bounds was ordered. The propositions which seem to have been established by the decision were, that carload rates, as to some articles under proper conditions and circumstances, were reasonable and not forbidden by the statute, and that the difference between carload and less than carload rates should only be in proportion to the extra cost, or in the line of equalization. In the *Thurber* case the complaint was on account of a difference in rates between carload and less than carload rates. In this case the complaint is on account of an equality of rates.

The proposition of complainant in this case is, that carload rates being permitted in some cases, it is an unjust discrimination to extend the same rate on eggs to the smaller shipper as that given to the shipper by the carload. To maintain this proposition it would be necessary for the complainant to show that the different circumstances of the two kinds of service justify a different charge, and that in consequence of giving the small shipper the same rate as the carload shipper, an unjust discrimination has been brought about against

the large shipper. The evidence shows that no carload rate has been made upon eggs, but that equal rates by the 100 pounds have been granted to large and small shippers of that article.

To give the complainant the relief he seeks, upon the theory of the complaint, it will be necessary to order a carload rate at the figure now prevailing, and to order an increase of the rate to the small shipper. This course would be necessary because the complainant does not attack the present rate of \$107.00 on eggs per carload of 20,000 lbs. from Washington Court House to New York as excessive in itself. His contention is that it is excessive as compared with carload rates given to other articles. But it does not appear from the evidence that there is such a similarity of circumstances and conditions attending the carriage of the article cited by complainant, and the article in question, as to give a basis for fair comparison, and from which it may be determined that the difference in rates operates as an unjust discrimination.

A lower carload rate could only be required upon a showing that the circumstances and conditions of service to the large shipper were so dissimilar as to require, in the line of equal treatment, a less rate than is made for the small shipper. The evidence upon this point does not satisfy us that the Commission would be justified in making such an order in this case. Only a few points of difference have been established which might be deemed material to such an inquiry. They are the greater speed and saving of time in carload shipments from a single consignor to a single consignee, and a slightly lighter expense in the way of billing to one instead of several consignees. To counterbalance this, it appears that where carloads are sent they are iced by the carrier, while this is not done at all in the less than carload shipments. Undoubtedly something is gained in carload shipments in the receipt, hauling, delivery and unloading of the car; but, as we have seen, the evidence does not show that after due consideration of the differing conditions and circumstances surrounding the two shipments any unjust discrimination results from giving a common and equal rate. While the allegation is made that the rate is unreasonable and excessive, yet it is coupled with the proposition that it is excessive as compared with other carload rates, and the examination and trial has been conducted upon the theory that the grievance complained of is an unjust discrimination against the large shipper by reason of an equal rate to the small shipper.

While the complainant cites numerous articles, heretofore mentioned, as having a carload rate, and seeks to make a comparison between eggs and the articles named, and also cites the general concession of carload rates to agricult-

ural products, there is a dearth of evidence to enlighten the Commission as to the proper method of comparison, if any can be made, between eggs and the articles named by complainant. It is apparent, even to one not an expert, that there is no general resemblance between the articles mentioned by the complainant and the article in question. ¶ We are, therefore, driven to the conclusion that the complainant has failed to show by evidence any unjust discrimination against himself and other similar dealers in eggs by reason of the present rates.

If the relief asked by the complainant cannot be granted by ordering a lower carload classification and rate, a difference in rate between carload and other smaller shipments might be brought about by increasing the rate to the small shipper in less than carload lots. But the record shows that the complainant does not seek to raise the rate to the small shipper, although witnesses, who claimed common interest with the complainant, suggested that the less than carload rate might be increased; and there is some evidence which tends to show that railway freight managers, who were inclined to concede a carload rate, expected and wished that this should be accomplished by an increased rate to the small shipper. But the evidence fails to show that the rate to the small shipper is too low. In fact, the record as made by the complainant is against any such claim.

The table hereto attached shows the classification applied upon eggs packed in barrels or boxes in each of the various classifications now and formerly in use throughout the United States.

Statements showing classifications applied upon Eggs,*packed in barrels or boxes, in each of the various classifications now and formerly in use throughout the United States.

(Rates in Cents per Hundred Pounds)

*From Aug. 15, 1888 to Feb. 17, 1890, inclusive.

From this it will appear that in the year 1886 and earlier, carload and less than carload rates were given, but that they were soon abandoned, 4 INTER 8.

and since about the year 1886 with a single exception for a short period noted in the table the Trunk Lines have carried at a fixed rate per 100 lbs. The same seems to be true of the roads embraced in the Southern System, while the custom prevailing in the Western System seems always to have been to make a difference between carload and less than carload rates.

In classification, dairy products and poultry have usually been classified with eggs. If one article embraced in a class is entitled to a carload rate, shippers of analogous articles embraced in the same class might claim the same treatment. Evidence, therefore, was introduced tending to show the effect of making a carload and less than carload rate upon such articles as butter and cheese. Witnesses representing the dairy interests were heard upon this question, and they united in declaring that the establishment of a carload rate upon dairy products would result in very serious injury to the dairy business as it is now conducted in the western states. It is therefore urged with some degree of force that the interests, not alone of those who are shipping eggs, but of those who are shipping dairy products, should be considered.

The evidence tends to the conclusion that the method of conducting the butter and cheese business is of such a character that the extension of a uniform rate per 100 lbs. to the small dealers is of very great advantage to them, and that the establishment of a carload rate would work a serious injury to the small producers of butter and cheese.

The production of eggs is widely diffused among our population; indeed, it is perhaps safe to say that more persons are engaged in

there is striking similarity between eggs and the more delicate variety of small fruits, like peaches, and berries. In the nature of things, a producer of these commodities is seldom able to ship a carload at one time, though during a favorable season he will make frequent and often daily shipments to the market. So with eggs, the producer must be largely engaged indeed who can ship a carload quantity. The common custom of the railroads is the same with fruit and berries as with eggs; they are gathered in small lots at various stations and carried direct to the general market, and the value of this transportation facility to producers and small dealers can hardly be over estimated. The egg is a delicate and perishable commodity. Though methods adopted for its preservation retard the decomposition to which it is subject, they do not prevent the article from taking on that musty and strong flavor so often noticed in "stored eggs." While not as perishable as the small fruits mentioned, yet, considering the delay which is necessary in the accumulation of sufficient lots for sale or sending to market, its inherent liability to early decay, and the fact that "fresh eggs" are commonly held to be an indispensable food article in every household, it must be deemed sufficiently perishable to be classed with articles of that character. In the official classification eggs, any quantity, are classed as low as berries in carloads, fruit in carloads, not otherwise specified, and butter and cheese, in any quantity; and they are given a lower class than poultry, game, peaches, or oysters, not in the shell. These commodities, though diverse in character, are all perishable food products and particularly subject to deterioration after short lapses of time and under climatic influences. Considered as a perishable article eggs cannot be deemed to have an unfavorable classification; they are classed lower than some, and no higher than any, of the articles above mentioned. That less than carload lots of eggs can be shipped at the carload rate is, in our judgment, a concession to the less than carload shipper which, under its already low classification and the other circumstances surrounding the egg traffic, does not work unjust discrimination to the shipper of eggs in carloads.

The unit of quantity that carriers have universally employed for the purpose of rate making is the hundred pounds. The purpose of a classification is to group the various articles of commerce into general classes upon which the rate per hundred pounds shall apply. Classification of carloads in a lower class than is given to the same article in a less quantity was at first merely incidental to the business of transportation, and the practice has not yet become so general that a lower carload class must be given to every article which may

be offered in carload quantities. The justice of the demand depends upon the facts in each case; it cannot be determined by an inflexible general rule. It is a sound rule for carriers to adapt their classifications to the laws of trade, that is, as before stated, if an article moves in sufficient volume *and the demands of commerce will be better served*, it is reasonable to give it a carload classification. *Thurber's Case, supra.* The large dealers, who now control more than three fourths of the business of gathering and shipping eggs to the large cities, cannot be said to suffer material damage from the competition of small shipments under the same rate to the same market. Beyond giving a practical monopoly to the large dealers, it does not appear that any other portion of the public would be benefited by a lower class for carloads of eggs. If the railroads were not willing to gather the small lots of eggs and carry them direct to a general market, there might be some ground for holding that the volume of egg traffic, the demands of trade, and the interests of local dealers and producers, are such that a lower carload classification is desirable; but the special facilities furnished local shippers for putting their eggs in large markets in as fresh state as possible are, in our view, of greater benefit to producers, local dealers, city dealers, and consumers, than any other method of gathering and shipping which has yet been devised for this or any other perishable food product; and such advantage to the general public should not be interfered with or its continuance in any way discouraged unless a more satisfactory method of reaching the markets can be established in its stead.

In the Thurber case above cited, where the complaint was of too great difference between carload and less than carload rates, we held that "A difference in rates upon carloads and less than carloads of the same merchandise between the same points of carriage, so wide as to be destructive to competition between large and small dealers, especially upon articles of general and necessary use, is unjust and violates the provisions and principles of the Act." In this case, where a lower carload rating is sought, we think the same general rule is applicable. The business of the carload shippers is not diminishing, but it has increased, under equal rates, and in view of the fact that they now handle most of the traffic it is evident that less rates for carload quantities must result in giving them a practical monopoly, and that any difference in rates will be a difference "so wide as to destroy the competition between large and small dealers."

To avoid any misunderstanding it may be said here that the Commission is aware of and has in former utterances called attention to the manifest tendency towards the establishment of carload rates. Tariffs filed in this office

show a constant tendency to include more and more articles in a carload classification. If, at some future time, the carriers engaged in carrying butter, eggs, poultry and similar articles, should agree upon and establish carload and less than carload rates for such articles, reasonable in themselves, and maintaining a true relation between the two rates, giving no undue advantage to one kind of shippers over another, the Commission would probably decline to interfere.

The Commission believes that the law to regulate commerce was intended to secure to persons needing transportation service the nearest possible approximation to equal treatment, and that where there exists in the cost or conditions of the service sufficient reason therefor, the carriers may rightfully establish and maintain carload and less than carload rates, but where the carriers themselves make one uniform rate per hundred pounds, if such act on the part of the carrier is warranted by the conditions, a nearer approach is made to perfect equality than could be made in any other way and the Commission should interpose no objection. But when the conditions of the service are so marked and distinct as to bring about an unjust discrimination or a preference by the maintenance of such uniform rate, then there would be a departure from the equality of treatment which seems to be one of the principal results sought for by the law.

But the question here presented has necessarily been considered upon the evidence as introduced in the case, and upon the evidence before us the complainant has failed to establish his right to the relief prayed for.

The fact seems to be that so far as the gathering of eggs is concerned there is competition between the large dealers and the railways engaged in gathering. The evidence shows that the cost to the complainant of gathering eggs for shipment is about twenty cents per 100 lbs. The nature of the preparation made by the railways for the similar service on their part warrants the conclusion that the cost of gathering to them is probably not less than that amount, and it seems to be a cost or charge incident to the nature of the business, and may not be avoided by persons engaging therein, and whether incurred by railways or large dealers, can make no material difference to the producer. The gathering of eggs along the line of railways is clearly connected with and a part of the transportation service, and it does not appear that any benefit, but rather an injury would result to the small dealers and producers by the order asked for by the complainant and that it would have a tendency to concentrate the business in the hands of large operators. The evidence shows that at the present time 88 per cent of the business is controlled

by these large shippers, and it would seem that an order granted as prayed for by complainant would go far towards concentrating the whole business in their hands. The tendency of the times, deplored by all, is the concentration of the transportation business of the country in the hands of a few individuals who control large amounts of business. This interferes with competition, and works an injury to many who are almost as well equipped for the business as those who in the end succeed by a concentration of power in the hands of a few to rule out all below them. It is common testimony that large dealers have often, by throwing their business first upon one railway and then upon another, forced concessions which are secretly made; and being made to the few and not to the many, they are less easily detected, and work great injury to the general public.

It is, therefore, the order of the Commission that complainant's petition shall be dismissed.

Knapp, Commissioner:

I agree with Commissioner McDill that the complaint in this case should be dismissed, but prefer to state in my own way the general reasons which lead me to that conclusion.

The fundamental issue involved, as I view it, is independent of the question whether the particular carload rate complained of is excessive, and presents a much broader and more important inquiry. Can a violation of the Act to Regulate Commerce, under any circumstances, be predicated upon the fact that an interstate carrier maintains the same rate per hundred pounds for the transportation of a given article, whether shipments are made by the carload or in smaller quantities? This question, I am convinced, should be answered in the negative. If the carload rate is itself reasonable, by whatever standard it may be measured or tested, no legal discrimination results, or can result, from fixing the same basis of compensation for the carriage of smaller shipments. Theoretically at least, the charges for public transportation should be proportioned in each case to the weight of the commodity carried, that being at once the most convenient and most equitable method of determining the relative value of the carrier's services to different shippers of the same article. The wholesale and retail principle has no just application to the business or duty of providing the facilities of public conveyance. It is at variance with the spirit and purpose of the law which aims to secure equality of treatment to every person. That purpose is not fully accomplished when one scale of charges is adopted for shipments of large volume and a higher rate imposed for smaller quantities, even though all large shippers pay the same and all small shippers are charged

Like. The right of equal transportation is not perfectly secured unless the same rate is granted in every case whether the shipment be large or small.

It is quite true that in *Thurber v. New York Cent. & H. R. R. Co.*, 2 Inters. Com. Rep. 742, 3 I. C. C. Rep. 473, the Commission recognized the distinction somewhat commonly made by carriers between carload and less than carload rates, and, while condemning as too great the differences there complained of, virtually conceded the general right to maintain such a distinction. But the practice of granting the lower rate on carload shipments had grown up with the development of railroad commerce and antedated by many years the regulating Act of Congress. It was a common feature of tariff construction, and there are substantial reasons arising out of the ordinary methods of transportation by which the policy can be defended. Moreover, it does not appear as a rule that any serious injustice results to the smaller shippers, or that the suitable distribution of commercial products is impeded, by the maintenance of carload and less than carload rates on the same commodity. Unless the disparity between the two rates is unreasonable, which is another question, the fact that such a distinction is made will not ordinarily prove of much practical importance. In a great measure the business of the country is adjusted to this method of rate making, and its continuance is not likely to be injurious to public or private interests. In administering this remedial statute it is obviously unwise to interfere with established usages, unless they plainly offend its provisions and in a substantial degree abridge the rights which it was designed to protect. To attempt the enforcement of absolute uniformity by condemning the prevalent custom of granting lower rates on carload shipments would, under present conditions, be both injudicious in effort and impracticable in execution; nor does the chief purpose of the Act require such a general departure from existing practices.

But it does not follow that the adoption of a uniform rule, by which the same measure of compensation is applied whether the shipment be large or small, can sustain a complaint of unjust discrimination against the carrier whose charges are thus regulated. There is a wide margin between refusing to condemn an established and prevalent custom, and compelling its literal observance in a particular instance. It is one thing to concede the right to make a carload and a less than carload rate, it is quite another thing to require it. The single rate is not unlawful because differing rates would ordinarily be permitted. Even if the distinction here considered was the general practice in all parts of the country, which

is very far from being the case, I do not see how a uniform rate, though applied by but one carrier to a single commodity only, could operate as an illegal discrimination within the meaning and intent of the statute.

When it is conceded that a given carload rate can be criticised for no other reason than that the same rate is accepted for smaller shipments, that carload rate, I contend, is reasonable both in fact and in law, and the circumstance that the lesser quantity is carried at the same rate per hundred pounds affords no just ground of complaint by the carload shipper. How can the law be violated if the rate is reasonable and all shippers are treated alike? Long continued custom and the methods of transportation in actual use may justify in most cases a lower rate for carload shipments than for smaller quantities, but when a carrier sees fit to apply the same rule for fixing its compensation whether it carries a train load or a ton, what right of the larger shipper is infringed, and upon what principle can the action of the carrier be condemned?

Under ordinary conditions, of course, the larger the shipment the greater the profit per hundred pounds to the carrier. The carload undoubtedly pays better in proportion to the weight transported than the smaller quantity, when the same rate is applied to both. More than this, the work of loading and unloading is mainly done by the carrier when merchandise is shipped in small quantities, while in the case of carload shipments the loading is usually done by the consignor and the unloading by the consignee. The carrier can afford to take the greater shipment for a smaller rate of compensation. This is partly because the large shipper, for his own convenience or advantage performs part of the service which it is the carrier's duty to perform, and partly because the greater tonnage can be hauled and delivered at proportionally less expense. But the pecuniary advantage of the carrier is by no means the controlling consideration in determining the just relation of rates. The general public right to equal transportation must be recognized, and that right may be seriously invaded if charges are graduated according to the volume of business. Some of the largest shippers not only do their own loading and unloading, but also provide their own cars, side tracks, warehouses and other facilities for the easy and economical delivery to the carrier of their immense shipments, and thus make their patronage peculiarly desirable. Much the same argument which justifies a reduced rate to carload shippers would justify a still lower rate when shipments are made, as frequently happens, by the train load. But no reduction from carload rates in favor of train load shippers would be sanctioned by the Commission or permitted by the law making authority.

Such a concession would concentrate the commerce of the country in the hands of a few great capitalists, and would be an obvious and intolerable encroachment upon the rights of the vast majority of shippers. If the system of lower rates for carload quantities had not been in vogue when government regulation was first undertaken, if the general practice prior to that time had been to charge in all cases by the hundred pounds, I apprehend that permission to establish a lower carload rate, on the ground that the railroads could afford to grant it, would have been unhesitatingly denied, and that a complaint of unjust discrimination, because the same rate was given to all, would have been summarily dismissed. The equitable basis of transportation charges is the weight of the shipment; the just rate of the carrier's compensation should not be affected, as between different shippers, by the volume of their business.

I assume that the carload rate under consideration is not shown to be unreasonable for carload shipments, and that conclusion appears to be required by the investigation made. So far as the complaint is based upon the theory that smaller shipments should be subjected to higher charges, and that seems to be the main contention, no case for relief is established, and on that theory the proceeding should be dismissed. Such a decision, however, should not preclude the Commission from entertaining another complaint against the rate in question, based on other grounds and measured by other standards.

Commissioner Morrison, dissenting:

The complainant in this proceeding insists

upon the right to a lower rate on the hundred pounds of eggs shipped in full carloads than is paid on the hundred pounds carried in small quantities from Washington Court House, Ohio, to New York City. Many roads now concede this right in territory west of Chicago.

The practice of carrying the great mass of products at lower rates when shipped in carloads than in less than carloads was when the Act to Regulate Commerce was passed and still is in very general use, and the legality of this practice has been justified and upheld by this Commission under said Act. It has been so justified and upheld because, among other reasons, the shipper loads and the receiver or consignee unloads carload shipments, while the carrier loads and unloads articles shipped in small quantities. Carloads require but one billing and one delivery; less than carloads necessitate the making of many bills and as many separate deliveries. In receiving, transporting and delivering goods by the carload carriers are relieved from a considerable part of the labor and expense necessarily done and incurred by them when articles are shipped in small parcels or quantities. So long as such general practice prevails I see no good reason why eggs should be made an exception. The reasons upon which lower rates on goods in carloads are based are as applicable to eggs as they are to other articles, and the shippers of eggs in carloads should have the same equal treatment as shippers of other products who are accorded lower rates on carload shipments than are given to shippers of the same products in less than carloads.

NORTH CAROLINA SUPREME COURT.

ATLANTIC EXPRESS CO., *Appt.*,

v.

WILMINGTON & WELDON R. CO. *et al.*

(.....N. C.....)

1. Investing a railroad commission with authority to make just and reasonable rules and regulations to prevent excessive charges and unjust discriminations and preferences by carriers, the reasonableness and legality of which is reviewable by the

courts, is not unconstitutional as a delegation of legislative power.

2. Authority is given to the railroad commission to hear and determine complaints of unjust discriminations and preferences under the North

NOTE.—The conflict of decisions on the question of a railroad company's obligation to give equal facilities for transportation to express companies makes any new decision on that question important. The North Carolina court adopts the decision of the Supreme Court of the United States in

Memphis & L. R. Co. v. Southern Exp. Co. 117 U. S. 1, 29 L. ed. 791.

But the great weight of that decision is lessened by the fact that it was made against the dissent of

Carolina Railroad Commission Act which expressly provides that if a railroad company is guilty of a violation of the rules of the commission and after due notice of such violation does not make full recompense for the wrong or injury done, it shall incur a penalty, and also constitutes such commission a court of record.

3. The details of practice and pleading may be supplied by a railroad commission which is constituted a court of record under the inherent power of every court of record to make such rules not inconsistent with the law as are necessary to the exercise of the powers conferred upon it.

4. A statute making it unlawful for any common carrier to give undue or unreasonable preference to any person, company, firm, corporation or locality does not require equal facilities to be given to express companies for carrying on business over a railroad unless it holds itself out as a common carrier of such companies.

5. A railroad company is not under obligation to furnish an express company with facilities for doing an express business upon its road such as it provides for itself or some other express company, unless it holds itself out as a common carrier of express companies.

Decided December 13, 1892.

A PPEAL by complainant from a judgment of the Superior Court for Wake County dismissing the complaint in an action brought to compel defendants to afford plaintiff proper facilities for carrying on its business. *Affirmed.*

The facts are stated in the opinion.

Messrs. W. W. Clark and O. H. Guion for appellant.

Messrs. Haywood & Haywood, for appellees:

The law applies to the persons—the public—for whom transportation services are rendered, and not to the instruments; be they persons or corporations, through or by which the services are performed.

Memphis & L. R. R. Co. v. Southern Exp. Co. 117 U. S. 1, 29 L. ed. 791.

Railroad companies are not required to furnish express facilities to all alike who demand them.

Pfister v. Central Pac. R. Co. 70 Cal. 169, 27 Am. & Eng. R. R. Cas. 346. See also *Sargent v. Boston & L. R. Co.* 115 Mass. 416; *Camblos v. Philadelphia & R. R. Co.* 4 Brewst. 563; *Jencks v. Coleman*, 2 Sumn. 224; *New Jersey Steam Nav. Co. v. Merchants Bank*, 47 U. S. 6 How. 344, 12 L. ed. 465; *Barney v. Oyster Bay Co.* 67 N. Y. 801; *The D. R. Martin*, 11 Blatchf. 238.

Express companies are not subject to provisions of the Interstate Commerce Act.

United States v. Moreman, 42 Fed. Rep. 448; *Re Express Companies*, 1 Inters. Com. Rep. 677, 32 Am. & Eng. R. R. Cas. 567.

The cases relied upon to establish that the defendants can be compelled to extend equal facilities to all express companies applying for the same, viz: *New England Exp. Co. v. Maine*

Cent. R. Co. 57 Me. 188, 2 Am. Rep. 31; *Buffalo East Side R. Co. v. Buffalo Street R. Co.* 2 L. R. A. 384, 111 N. Y. 132; *People v. Hawley*, 8 Mich. 330; *Chicago, B. & Q. R. Co. v. Cutts*, 94 U. S. 155, 24 L. ed. 94,—are not applicable to this case.

The "Granger Cases" have been materially modified by subsequent decisions of the United States Supreme Court.

See *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 80 L. ed. 244; *Chicago, M. & St. P. R. Co. v. Minnesota*, 184 U. S. 418, 33 L. ed. 971; *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 30 L. ed. 694; *Philadelphia & S. Mail S. S. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200; *Asher v. Texas*, 128 U. S. 129, 32 L. ed. 868; *Bonman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 701; *Fargo v. Stevens*, 121 U. S. 230, 30 L. ed. 888; *Leloup v. Mobile*, 127 U. S. 640, 32 L. ed. 811; *McDuffee v. Portland & R. R. Co.* 52 N. H. 480, 18 Am. Rep. 72; *Sandford v. Catawissa, W. & E. R. Co.* 24 Pa. 378, 64 Am. Dec. 667.

The legislature has no power to pass a law impairing the obligation of a contract made between the defendants and the Southern Express Company before the passage of the Railroad Commission Act.

Sinking Fund Cases, 90 U. S. 700, 25 L. ed. 496; *Tomlinson v. Jessup*, 82 U. S. 15 Wall. 454, 21 L. ed. 204; *Spring Valley Water Works v. Schottler*, 110 U. S. 347, 28 L. ed. 178; *New Jersey v. Yard*, 95 U. S. 104, 24 L. ed. 852; *Hoboken Water Power Co. v. Lyman*, 83 U. S. 15 Wall. 500, 21 L. ed. 188; *Stone v. Mississippi*, 101 U. S. 814, 25 L. ed. 1079; *Chicago, B. & Q. R. Co. v. Cutts*, 94 U. S. 155-161, 24 L. ed. 94, 95; *Dartmouth College Trustees v. Woodward*, 17 U. S. 4 Wheat. 518, 4 L. ed.

two justices, and was contrary not only to the decisions of lower Federal courts in *Wells, Fargo & Co. v. Oregon R. & Nav. Co. (Or.)* 16 Am. & Eng. R. R. Cas. 87, 8 Sawy. 600; *Dinsmore v. Louisville, C. & L. R. Co. (Ky.)* 2 Fed. Rep. 465; *Southern Exp. Co. v. Louisville & N. R. Co. (Tenn.)* 4 Fed. Rep. 481; *Southern Exp. Co. v. Memphis & L. R. Co. (Ark.)* 8 Fed. Rep. 799, which it reversed or overruled, but also to several carefully considered decisions of eminent state courts in *McDuffee v. Portland & R. R. Co.* 52 N. H. 480, 18 Am. Rep. 72; *Sandford v. Catawissa, W. & E. R. Co.* 24 Pa. 378, 64 Am. Dec. 667; *New England Exp. Co. v. Maine Cent. R. Co.* 57 Me. 188, 2 Am. Rep. 31.

Since the question is not one on which the decision of the Supreme Court of the United States is binding on state courts, the question must be re-

garded as unsettled except in those few jurisdictions in which it has already been decided.

In respect to the necessity of a railroad company's holding itself out as a common carrier of expressmen in order to make it liable for discrimination between them, it is expressly held in *McDuffee v. Portland & R. R. Co.*, *supra*, that it does so hold itself out when it accepts the business of one express company.

For note on the general subject of compulsory service by party whose business it is to serve the public, see further, *Rushville v. Rushville Nat. Gas Co. (Ind.)* 15 L. R. A. 821.

For note on the right of a carrier at common law to discriminate between its patrons generally, see *Louisville, E. & St. L. Consol. R. Co. v. Wilson (Ind.)* 18 L. R. A. 105.

629; 1 Morawetz, Priv. Corp. §§ 1-8; *Siebert v. United States*, 122 U. S. 284, 30 L. ed. 1161; U. S. Const. art. 1, § 10; Ang. & A. Priv. Corp. § 787; *Edwards v. Kearney*, 96 U. S. 595, 24 L. ed. 793.

To destroy the ability of a party to perform his contract, is to impair its obligation within the meaning of the Constitution.

Pumpelly v. Green Bay & M. Canal Co. 80 U. S. 18 Wall. 166, 20 L. ed. 557; *St. Tammany W. W. Co. v. New Orleans W. W. Co.* 120 U. S. 64, 30 L. ed. 563; *Shields v. Ohio*, 95 U. S. 819, 24 L. ed. 857; *Sinking Fund Cases*, 99 U. S. 700, 721, 740, 742, 748, 749, 757, 758, 25 L. ed. 496, 502, 509, 510, 512, 515; *New Orleans Gas Light Co. v. Louisiana L. & H. P. & Mfg. Co.* 115 U. S. 650, 660, 672, 674, 29 L. ed. 516, 520, 524, 525; *Louisville Gas Co. v. Citizens Gas Light Co.* 115 U. S. 638, 29 L. ed. 510; *Morawetz, Priv. Corp.* §§ 473, 474, 478.

The reservation of legislative control over the corporate power of the defendant acts only upon the relations between the state and corporation, and not upon what is done between the corporation and those with whom it deals.

New Orleans Gas Light Co. v. Louisiana L. & H. P. & Mfg. Co. supra; *Railroad Commission Cases*, 116 U. S. 807-829, 29 L. ed. 636-643; *Tomlinson v. Jessup*, 82 U. S. 15 Wall. 459, 21 L. ed. 204; *Sinking Fund Cases*, 99 U. S. 721, 759, 25 L. ed. 501, 515; *Miller v. State*, 82 U. S. 15 Wall. 499, 21 L. ed. 104; *Chicago v. Sheldon*, 76 U. S. 9 Wall. 50-55, 19 L. ed. 594, 597.

Mr. F. H. Busbee also for appellees.

Shepherd, Ch. J., delivered the opinion of the court:

Although we are of the opinion, for the reasons hereinafter stated, that the particular relief asked for in this proceeding is not authorized by the provisions of what is known as the "Railroad Commission Act," still we do not feel at liberty to ignore the important question of jurisdiction suggested in the answers of the defendants and the arguments of counsel. The question is a serious one, and involves in a great measure the efficiency of the legislation designed for the "supervision" of railroad companies and other common carriers in respect to the fixing of reasonable freight and passenger tariffs, the prevention of unjust discriminations and preferences, and the regulation of other matters pertaining to transportation within the state, in which the public is deeply interested. That the legislature has the authority to provide reasonable rules and regulations for the effectuating of such purposes is too well settled to admit of discussion (*Durham & N. R. Co. v. Richmond & D. R. Co.* 104 N. C. 673; *Chicago, B. & Q. R. Co. v. Iowa*, 94 U. S. 155, 24 L. ed. 94; *Dubuque & R. C. R. Co. v. Richmond*, 86 U. S. 19 Wall. 584, 22 L. ed. 173;) and it is equally well settled that, in delegating such authority to a commission, it does not transcend its constitutional powers. *Stone v. Farmers Loan & Trust Co.* 116 U. S. 307, 29 L. ed. 636; 19 Am. & Eng. Enc. Law, 686, and the numerous authorities cited in the notes.

"The difference between the power to pass
4 INTER S.

a law and the power to adopt rules and regulations to carry into effect a law already passed is apparent and great; and this we understand to be the distinction recognized strikingly by all the courts as the true rule in determining whether or not, in such cases, a legislative power is granted. The former would be unconstitutional, whilst the latter would not." *Georgia R. & Bkg. Co. v. Smith*, 70 Ga. 694, 9 Am. & Eng. R. R. Cas. 385. A careful scrutiny of the act of assembly constituting a "railroad commission" (Acts 1891, chap. 320) fails to disclose a purpose to confer upon that body anything in the nature of legislative power. The act, among other things, denounces excessive charges, unjust discriminations and preferences, as unlawful, and invests the commission with authority to "make such just and reasonable rules and regulations as may be necessary for preventing" the same; the reasonableness and legality of such rules and regulations being reviewable by the courts. This power, as we have just seen, may be delegated to a commission, and any objection on that ground is therefore untenable.

It is insisted, however, that the commission has no jurisdiction to entertain and pass upon complaints made in respect to the violation of the provisions of section 4, and perhaps other sections, of the said act. That section declares that all unjust discriminations and preferences shall be unlawful, and it is urged that the only remedy provided against its infraction is by indictment, to be prosecuted in a court of competent jurisdiction. It is very plain to us that the contention is without foundation, as in section 5 the authority of the commission to make rules and regulations for the prevention of these very acts is expressly conferred. The subjects embraced in section 4 are perhaps the most important that are confided to the regulation of the commission; and, without reference to the plain language of the act, it is hardly to be supposed that the legislature intended to insert therein a merely penal provision, entirely independent of and unconnected with the duties imposed upon that body. Neither is there any force in the argument that the legislature cannot confer judicial powers upon the commission, as the constitution (art. 4, § 2) expressly authorizes the establishment of such courts inferior to the supreme court as the legislature may deem proper; and it is to be observed that the commission has been "created and constituted a court of record," with all the "powers and jurisdiction of a court of general jurisdiction as to all subjects embraced in the act creating" the same. Acts 1891, chap. 498. Whether a court having no power to enforce its judgments fulfills the definition of a court of record and of general jurisdiction is unnecessary to be considered. It is sufficient to say that the legislature has the authority to establish courts inferior to the supreme court, and to "allot and distribute" its jurisdiction "as it may deem proper." Const. art. 4, § 12. The question, then, is simply whether the power to hear and determine complaints of this character has been conferred, and this is easily solved by a perusal

of section 10 of the said act, which is as follows: "That if any railroad company doing business in this state, by its agent or employées, shall be guilty of a violation of the rules and regulations provided and prescribed by said commissioners, and if, after due notice of such violation, given to the principal officer thereof, . . . ample and full recompense for the wrong or injury done thereby to any person or corporation, as may be directed by said commissioners, shall not be made within thirty days from the time of such notice, such company shall incur a penalty for each offense of not less than fifty dollars nor more than five thousand dollars, to be fixed by the judge of the court in which such action shall be tried. An action for the recovery of such penalties shall lie in any county of the state where such violation has occurred or wrong has been perpetrated, and shall be in the name of the state of North Carolina. The commissioners shall institute such action through the attorney-general or solicitor of the judicial district in which the violation has occurred," etc.

It must be noted that the present proceeding is not an action instituted by the commissioners for the enforcement of penalties; nor is it, as suggested, an ordinary civil action for the recovery of damages, as is provided in section 11 of the act. It is brought for the purpose of seeking "ample and full recompense" for the alleged "wrong and injury" done the complainant. The act looks beyond the mere infliction of a penalty for the violation of a rule or regulation, and evidently provides for specific redress in the premises. This redress is to be "directed by said commissioners" upon due notice to the party complained of; and it is difficult to understand how the proper measure of relief can be ascertained except by the examination of testimony. The necessary conclusion, therefore, must be that the commission has the authority to hear and determine all matters that are embraced within that part of the said section to which we have referred.

No summons was issued in the present proceeding, as in civil actions, but, upon a complaint being filed, the defendants were notified to "satisfy the complaint or answer the same" within thirty days. After hearing the testimony, the commission declared, in effect, that the rule and regulation made pursuant to the law had been violated, and that "ample and full recompense" should be made by providing the complainant with the facilities mentioned in the order. It is insisted that, as no procedure is provided, the commission has no authority to make an order of this character. It is true that no particular rules of practice are prescribed; but the power to hear and determine, upon notice, is, as we have seen, expressly given, and all necessary means are provided for the conducting of any inquiry which it is the duty of the commission to make. Provision is made for the service of notices the attendance of witnesses, and the punishment of contempts; and the rules of evidence are declared to be the same as in civil actions. It is also provided that there may be an appeal, "as in other cases of appeal," from

4 INTER 8.

"all decisions or determinations arising under the operation or enforcement" of the act. We cannot hold that, with all of these facilities provided by law, a power expressly granted to hear and determine is to be denied because the particular form of the complaint, or the manner in which the proceeding is to be entitled, or some other immaterial matter of detail, is not particularly prescribed. Besides, such details may well be supplied by the commission under the inherent power of every court of record to make such rules, not inconsistent with the law, as are necessary to the exercise of the powers conferred upon them. 4 Am. & Eng. Enc. Law, 450, and the cases cited. It must be admitted, however, that in many respects the act is singularly obscure and confused. It bears the impress of hasty legislation, and seems to be composed of parts of other acts of a similar character, united with but little regard to order or perspicuity. Its amendment, in many particulars, may well be considered by the lawmakers. Among its defects we find the strange omission of any provision in section 10 as to the effect to be given to the determination of the commissioners in an action brought in the superior court for the enforcement of the penalties prescribed. Whether, in the absence of an appeal, such a determination is conclusive, or whether it simply amounts to a prima facie case, are questions left in very great doubt. This, however, cannot affect the right to hear and determine what recompense shall be made to an injured party. The power is expressly conferred, and it is the duty of the commission, in all proper cases, to exercise it. The effect of such a determination, when brought before the courts, is quite another thing. We are therefore of the opinion that the commission has ample authority to entertain and pass upon complaints for a violation of any rule or regulation respecting the matters embraced within section 4 of the said act.

Having disposed of the question of jurisdiction, we will now inquire whether the present complainant is entitled to the particular relief which it seeks in this proceeding. It must be borne in mind, in considering this case, that there is no complaint that the demands of the public—that is, the demands of persons who desire to ship express freight—are not fully met and supplied. The controversy is solely between the respective corporations, and the real question is not whether the defendant railroad companies are authorized to do an express business for themselves, nor whether they must carry express matter for the public on their passenger trains, in the immediate charge of some person specially appointed for that purpose, nor whether they shall carry express freight for the complainant company as they carry like freight for the general public, but whether it is their duty to furnish the complainant with facilities for doing an express business upon their roads, the same in all respects as those they provide for themselves or afford to any other express company. That this is a proper statement of the question is apparent from

the application of the complainant and the findings of the commission. It distinctly appears that the complainant made no actual tender of any article of freight to be transported by the defendants, but that it demanded "rates and facilities for conducting an express business over their roads in this state," and that each of the defendants "should furnish it with a car or carriage over its respective lines, and rates of transportation, as well within as without the limits of the state, for shipment of goods within the scope of its organization." It is not insisted that the defendants have ever held themselves out as common carriers of express companies, "that is to say, as common carriers of common carriers" (*Express Cases*, 117 U. S. 1, 29 L. ed. 791) and the chief point to be determined is whether, in the absence of such a usage, the law imposes a duty of that character upon them. It is contended that such a duty is imposed by the following provision of section 4 of the act constituting the commission: "That it shall be lawful for any common carrier, subject to the provisions of this act, to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage, in any respect whatsoever." We are of the opinion that the foregoing provision does not change or enlarge the common law duty which the defendants owe the complainant. That constitutional provisions in almost the same language have been construed as but declaratory of the common law is shown by various authorities. The constitution of Colorado declares "that all individuals, associations, etc., shall have equal rights to have persons and property transported over any railroad in this state, and no undue or unreasonable discrimination shall be made in charges or facilities for transportation of freight or passengers within the state." The constitution of Kansas provides "that no discrimination in charges or facilities in transportation shall be made between transportation companies and individuals, and no railroad company shall make any discrimination or preference in furnishing cars or motive power." The constitution of Arkansas provides "that all individuals and corporations shall have equal rights to have persons and property transported over railroads, . . . and no undue or unreasonable discrimination shall be made in charges or facilities in transportation." The constitution of Missouri provides "that no discrimination in charges or facilities in transportation shall be made between transportation companies and individuals, or in favor of either, by abatement, drawback, or otherwise, and no railroad company . . . shall make any preference in furnishing cars or motive power." In speaking of these constitutional provisions, Waite, *Ch. J.*, says: "These provisions impose no greater

4 INTER S.

obligations than the common law would have imposed without them." *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 667, 28 L. ed. 291. This high authority settles the question that our Railroad Commission Act does not extend the common-law duty; and it therefore becomes material to inquire whether, at common law, the defendants owed the complainant the duty sought to be imposed in this proceeding. The Supreme Court of the United States, in the *Express Cases*, *supra*, has answered the question. It declares that "in the absence of some special statute, there is no law which requires railroads to furnish express facilities to all express companies which may demand them." It must be noted that these cases came from the states of Colorado, Kansas, Arkansas, and Missouri; and it is in the light of the constitutional provisions above quoted that this and the following language of the chief justice is used: "The railroad company performs its whole duty to the public at large, and to each individual, when it affords the public all reasonable express accommodations. If this is done, the railroad company owes no duty to the public, as to the particular agencies it shall select for that purpose. The public require the carriage, but the company may choose its own appropriate means of carriage, always provided they are such as to insure reasonable promptness and security. . . . The constitutions and the laws of the states in which the roads are situated place the companies that own and operate them on the footing of common carriers, but there is nothing which, in positive terms, requires a railroad company to carry all the express companies in the way that, under some circumstances, they may be able, without inconvenience, to carry one company. . . . In some of the states, statutes have been passed which, either in express terms or by judicial interpretation, require railroad companies to furnish equal facilities to all express companies (as in Maine and New Hampshire) . . . but these are of comparative recent origin, and thus far seem not to have been generally adopted."

In view of the foregoing authorities, we are of the opinion that so much of the order of the commission as determines that "the refusal of the defendants to grant to the plaintiff facilities for conducting an express business was a violation of the terms of said act" is not warranted by the statute under consideration. The judgment of the commission, however, also declares that the defendants have violated rule 8 of the "Regulations Concerning Freight Rates." The rule is as follows: "No railroad company shall, by reason of any contract with any express or other company, decline or refuse to act as a common carrier to transport any articles proper for transportation by the train for which it is offered." We are unable to see that, in view of the facts found, there has been any violation of this rule. No duty is imposed by the rule upon any railroad company, but it merely prohibits the refusal to perform a duty by reason of any contract with an express or other com-

pamy. We have seen that the defendants did not owe any duty to act as a "common carrier of express companies." Had they owed such a duty, we are very sure that they could not have avoided its performance because of their having made an exclusive contract with the Southern Express Company. We do not think, however, that the rule applies to this case. The defendants have not refused to act as a common carrier, or to transport any article tendered by the complainant. They have refused to afford it facilities for carrying on an express business upon their roads, and this we have seen they had a right to do. In this refusal, they were not guilty of making any discrimination or preference within the act of the legislature. As we have seen, the Supreme Court of the United States has said that they are under no obligation to carry another company; and the mere fact that they are carrying another company does not amount to an unjust or unreasonable preference. It is the duty of the defendants to carry express matter, but they may carry it themselves, or employ competent agencies for that purpose. *Express Cases*, 117 U. S. 3, 29 L. ed. 791, 28 Am. & Eng. R. Cas. 545, and the authorities cited in the notes. The Supreme Court of the United States, in deciding the cases just referred to, stated that "railroad companies are by law carriers of both persons and property. Passenger trains have from the beginning been provided for the transportation primarily of passengers and their baggage. This must be done with reasonable promptness, dispatch, and comfort to the passengers. The express business on passenger trains is in a degree subordinate to the passenger business; and it is consequently the duty of a railroad company, in arranging for the express, to see that there is as little interference as possible with the wants of the passengers. This implies a special understanding and agreement as to the amount of car space that will be afforded, and the con-

dition on which it will be occupied. The space that can be given to the express business on a passenger train is to a certain extent limited. . . . If the general public were complaining that the railroad companies refused to carry express matter themselves on their passenger trains, or to allow it to be carried by others, different questions would be presented." The same remark is applicable if the agencies adopted by the railroads (in this case the Southern Express Company) are not affording the public sufficient facilities. It is further to be observed that the power to fix rates and tariffs for such agencies is conferred upon the commission by section 13 of the act. We will also observe that, if the defendants had held themselves out as common carriers of express companies, they would have been guilty in this case of discrimination or the giving of a preference, and therefore subject to the regulation of the commission, had that body declared such discrimination or preference, under the circumstances, to have been "unjust" or "unreasonable."

In view of the facts found by the commission, and of the high authority we have cited, we are of the opinion that the defendants have violated no duty imposed by the law. If other duties are to be imposed, it must be by further legislation, and not by the courts. "To what extent it must come, if it comes at all from Congress, and to what extent it may come from the states, are questions we do not now undertake to decide; but that it must come, when it does come, from some source of legislative power, we do not doubt. The legislature may impose a duty, and, when imposed, it will, if necessary, be enforced by the courts; but unless a duty has been created, either by usage or by contract or by statute, the court cannot be called upon to give it effect." Waite, *Ch. J.*, *Express Cases*, *supra*.

The judgment below is affirmed.

KANSAS SUPREME COURT.

STATE of Kansas

v.

WILLIAM C. PHIPPS *et al.*, *Appls.*

(..... Kan.)

1. The word "trade," as defined by this court in the case of *Re Pinney*, 47 Kan. 82, does not mean interstate commerce, nor was such a meaning within the contemplation of the court at the time the decision was rendered.

2. The business of insurance, as ordinarily conducted in this state by insurance companies organized under the legislation of other states, is not interstate commerce.

3. Foreign insurance companies doing business in this state, that combine to control and increase the rates of insurance on property within a city

*Headnotes by SIMPSON, C.

NOTE.—An important case applying an "Anti Trust Law" to a combination fixing rates of insurance in which corporations of other states are involved is above reported. The claim that insur-

ance by such companies constitutes interstate commerce is, in view of prior decisions, interesting chiefly by reason of its forcible and elaborate presentation by counsel. On the general subject

4 INTER S.

in this state, violate the provision of chapter 257 of the Laws of 1889, being "An Act to Declare Unlawful Trusts and Combinations in Restraint of Trade and Products, and to Provide Penalties therefor;" and their local agents who attempt to, and do, enforce such combined rates, are subject to prosecution under the provisions of said act.

4. The legislature of this state has the power to prescribe the conditions upon which an insurance company organized under and by virtue of the laws of another state can do business within the limits of the state of Kansas.

Decided January 7, 1898.

A PPEAL by defendants from a judgment of the District Court for Labette County convicting them for violating chapter 257 of the Laws of 1889 prohibiting unlawful trusts and combinations in restraint of trade. *Affirmed.*

The facts are stated in the commissioner's opinion.

Mr. E. F. Ware, for appellants:

The Anti Trust Law of Kansas was passed in 1889, chap. 257. Its title is: "An Act to Declare Unlawful Trusts and Combinations in Restraint of Trade and Products, and to Provide Penalties therefor."

The said law, when read parenthetically, as pertains to insurance, is as follows:

Section 1. "All arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed or which tend to control the cost or rate of insurance are hereby declared to be against public policy, unlawful, and void."

Section 8. "Any person who shall attempt to carry out or act under any such arrangement, contract, agreement, trust, or combination, either on his own account or as agent of any corporation, or in any capacity whatever, shall be guilty of a misdemeanor."

The constitution of the state of Kansas provides, art. 2, § 16: "No bill shall contain more than one subject, which shall be clearly expressed in its title."

The supreme court of Kansas has decided (*Re Pinkney*, 47 Kan. 89), that the said act of 1889 was constitutional in that the subject of the act was clearly expressed in the title. Therefore insurance is trade.

That decision finally settled the status of insurance companies in Kansas.

The Federal law of July, 1890, concerning trusts, when read parenthetically as regards the case at bar, is as follows (26 U. S. Stat. at L. 209):

Section 1. "Every contract or conspiracy in restraint of trade among the several states is hereby declared to be illegal." Every person, on conviction thereof, shall be punished by a fine not exceeding \$5,000.

Section 2. "Every person who shall com-

bine to monopolize any part of the trade among the several states shall be guilty of a misdemeanor."

Section 4. "The several circuit courts of the United States are hereby vested with jurisdiction."

The Federal law is exclusive of the state law; the state law is inoperative, and the defendants must be discharged.

Walling v. Michigan, 116 U. S. 456, 29 L. ed. 694.

Commerce is intercourse, and the term "interstate commerce" means intercourse between people of different states.

If insurance is trade, then insurance policies and insurance agents are instruments of trade, and the power to regulate commerce embraces all the instruments by which trade may be carried on.

"It extends to the persons who conduct it as well as to the instruments used."

Cooley v. Philadelphia, 53 U. S. 12 How. 299, 18 L. ed. 996.

Communication by telegraph is a part of commerce.

Western U. Tele. Co. v. Atlantic & Pacific States Tele. Co. 5 Nev. 102; *Pensacola Tele. Co. v. Western U. Tele. Co.* 2 Woods, C. C. 643; *Pensacola Tele. Co. v. Western U. Tele. Co.* 96 U. S. 1, 24 L. ed. 708; *Western U. Tele. Co. v. Texas*, 105 U. S. 460, 28 L. ed. 1067; *Western U. Tele. Co. v. Pendleton*, 122 U. S. 347, 30 L. ed. 1187; *Ratterman v. Western U. Tele. Co.* 127 U. S. 411, 32 L. ed. 229.

If the recital over the wire of an unfortunate and uninteresting piece of ancient personal history is interstate commerce, then the only definition of interstate commerce is "intercourse."

Commerce among the several states means, "intercourse between the citizens of different states."

"Power to regulate commerce" including navigation and commercial intercourse was one of the primary objects for which the United States Constitution was adopted.

2 Story, Const. (3d ed.) 4.

Commerce includes the fact of intercourse,

of combinations to prevent competition and creating monopolies, see notes to *Lealie v. Lorillard* (N. Y.) 1 L. R. A. 456; *People v. North River Sugar Ref. Co.* (N. Y.) 2 L. R. A. 33; *Carroll v. Giles* (S. C.) 4 L. R. A. 154; *Richardson v. Buhl* (Mich.) 6 L. R. A. 457; *Herreshoff v. Boutineau* (R. I.) 8 L. R. A. 469; *National Ben. Co. v. Union Hospital Co.* (Minn.) 11 L. R. A. 487; *Lovejoy v. Michels* (Mich.) 13 L. R. A. 770.

See also, on the same subject, *Texas Standard Cotton Oil Co. v. Adoue*, 15 L. R. A. 568, 83 Tex. 650; *Leonard v. Poole*, 4 L. R. A. 728, 114 N. Y. 371; *People v. North River Sugar Ref. Co.* 9 L. R. A. 33, 121 N. Y. 582; *State v. Standard Oil Co.* (Ohio) 15 L. R. A. 145; *More v. Bennett*, 15 L. R. A. 361, 140 Ill. 69.

For a decision under the Act of Congress similar

to the Kansas act above involved, making combinations or conspiracies in restraint of trade criminally punishable, see *United States v. Jellico Mountain Coke & Coal Co.* 12 L. R. A. 753, 46 Fed. Rep. 432.

Another case just decided by the Circuit Court of the United States for the District of Massachusetts decides that an indictment under that Act must allege that there was a conspiracy in restraint of trade by engrossing or monopolizing or grasping the market, and that it is not sufficient to allege a purpose to drive certain competitors out of the field by violence, annoyance, intimidation or otherwise. *United States v. Patterson* (C. C. D. Mass.) March, 1898.

and of traffic, and the subject-matter of intercourse and of traffic. The fact of intercourse and traffic again embraces all the means, instruments, and places by and in which intercourse and traffic are carried on, and further still, comprehends the act of carrying them on at these places and by and with these means.

Pom. Const. Law, § 378.

It also means intercourse and navigation.

Fuller v. Chicago & N. W. R. Co. 31 Iowa, 207; *People v. Raymond*, 34 Cal. 492.

Free intercourse and trade between the states and with foreign countries can be safely regulated only by that jurisdiction that looks to the general interests of the nation as a whole rather than the special advantages of a particular locality.

State v. Pratt, 59 Vt. 590.

Congress has power to legislate over intercourse as well as traffic.

King v. American Transp. Co. 1 Flipp. 6; *United States v. The James Morrison*, Newb. Adm. Rep. 244; *People v. Brooks*, 4 Denio, 469; *Be Wong Yung Quay*, 6 Sawy. 447; *Sweatt v. Boston, H. & E. R. Co.* 5 Cliff. 348; *United States v. Cisna*, 1 McLean, 260; *Western U. Teleg. Co. v. Atlantic & Pacific States Teleg. Co.* 5 Nev. 109; *Norfolk & W. R. Co. v. Com.* 13 L. R. A. 107, 88 Va. 95; *State v. Delaware, L. & W. R. Co.* 30 N. J. L. 478; *Corfield v. Coryell*, 4 Wash. C. C. 371; *Moor v. Veazie*, 81 Me. 360; *Pennacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708; *Worcester v. Georgia*, 31 U. S. 6 Pet. 561, 8 L. ed. 501; *State Tonnage Tax Cases*, 79 U. S. 12 Wall. 214, 20 L. ed. 373; *Hall v. De Cuir*, 95 U. S. 491, 24 L. ed. 549; *Trade Mark Cases*, 100 U. S. 86, 25 L. ed. 550; *Welton v. Missouri*, 91 U. S. 290, 23 L. ed. 349; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23.

There are now, as shown by the report of the commissioner of insurance, thousands of insurance agents in the state, regularly licensed to issue policies.

The business is done in the name of the foreign company, and not in the name of the agent.

When a policy is written, a report thereof is sent out of the state to the home office of the company, and the company accepts or rejects the risk.

The money that is received for the premium is promptly remitted to the foreign company, and the company pays the agent, for the agent is not doing business for himself or in his own name.

If a building is burned and the company so elect, it can build another building in place of the one burned down, thereby trading one building for another; or the company from its treasury abroad can send into the state its money to pay the loss. If articles of property are damaged, the company reserves the right to buy them. This is intercourse.

The very genius of the business makes it interstate. It is the only known business that is naturally interstate.

During all this time the foreign corporation is not a citizen, or a resident, or an inhabitant of the state of Kansas. It is at all times foreign.

Purcell v. British Land & Mortg. Co. 42 Fed. Rep. 465; *Henning v. Western U. Teleg.* 4 INTER S.

Co. 48 Fed. Rep. 97; *Myers v. Murray & Co.* 11 L. R. A. 216, 43 Fed. Rep. 695; *Conn v. Chicago, B. & Q. R. Co.* 48 Fed. Rep. 177.

And the corporation is not only not domesticated, but it cannot be held to an agreement that it is domesticated, because the law says that such agreement is invalid.

Home Ins. Co. v. Morse, 87 U. S. 20 Wall. 415, 22 L. ed. 365.

The reasoning of the United States Supreme Court in *Paul v. Virginia*, 75 U. S. 8 Wall. 183, 19 L. ed. 361, is incomprehensible so far as it relates to the insurance part of the case.

If a New York insurance company sends an agent to Virginia to make a contract of indemnity to be paid by the New York party, it makes no difference whether the contract is delivered in Virginia or Quebec, so far as its interstate feature is concerned. It is still an interstate contract.

The first mistake to be noticed is that the supreme court fails to distinguish between an executed contract and an executory contract. A policy of insurance is not an executed contract.

The second mistake to be noticed is that insurance cannot be likened to a New York man who goes into Virginia and buys something. It should be likened to a New York man who goes into Virginia and sells something (indemnity) to be delivered in the future from the home office in New York. If, instead of "indemnity," we read "stoves," we find the case already decided in *Wrought Iron Range Co. v. Johnson*, 8 L. R. A. 278, 84 Ga. 754.

See also *McCall v. California*, 136 U. S. 104, 34 L. ed. 392.

It is easily possible for the insurance companies of the United States to send a committee of experts to Kansas, who would revise and prepare fire maps for the state showing every building. Then the business could be run from the home or department office. If, after the report of the committee upon maps and rates, the companies should see proper to combine, and adopt the maps and rates, then the local agent would know nothing of it, and the companies violating the laws of Kansas would have innocent local agents in Kansas carrying out the combine.

If the local agent be not guilty, and cannot be punished, and if all the other persons connected with the violation of law live outside of the state, then what is the status of the actors?

If a person outside of the state commits, by reason of an innocent agent, a crime within the state, he is guilty of committing a crime within the state.

Bishop, Crim. Proc. § 53.

Suppose a misdemeanor is committed in Kansas by a man who was never in the state, and that the man remains outside of Kansas, can he be extradited and tried in the state?

Only "fugitives from justice" can be extradited.

The most liberal opinion on that subject is *Roberts v. Reilly*, 116 U. S. 80, 29 L. ed. 544, and that case requires the prisoner to be in the state when the crime was committed.

Tennessee v. Jackson, 36 Fed. Rep. 258.

Courts of equity do not generally enjoin the commission of crime. But if it should, the re-

sult of such action inside the state of Kansas by the state against foreign companies would be wholly fruitless.

Kansas cannot go into the foreign Federal courts and enjoin the insurance companies at their homes from violating the laws of Kansas.

A suit brought by a state outside of its own territory, in the courts of the United States, against the citizen of another state, must be an action in which a money judgment can be rendered, and it must be a "civil suit" as to its origin.

An injunction suit by Kansas in a Federal court, as suggested, would be a suit to enforce the penal laws of Kansas. No country or state will execute the penal laws of another.

Wisconsin v. Pelican Ins. Co. of New Orleans, 127 U. S. 265, 32 L. ed. 239; *Dey v. Chicago, M. & St. P. R. Co.* 45 Fed. Rep. 82.

Outside of the commerce clause of the Constitution, it would seem that there had been given inherent power to Congress to legislate concerning the relations of states with citizens (and insurance companies) of other states.

Kan. Const. art. 3, § 2, art. 1, § 8.

There is no common law as to insurance.

When the United States Constitution was formed fire insurance was not a science; it was hardly a business.

What, then, is to be the construction of the Constitution of the United States as to matters of which the framers could not have foreseen the importance?

What is to be the construction as to matters that are both new and important and which can be included or excluded in the interpretation of the Constitution?

Ought we to say: What would the framers of the Constitution have done if the matter had been presented to them in its then condition?

Ought we to say: What do the American people want now?

Obviously the latter.

Dartmouth College Trustees v. Woodward, 17 U. S. 4 Wheat. 644, 4 L. ed. 661; *Tiedeman*, *The Unwritten Constitution*, p. 144.

When Kansas says that insurance is trade, the Federal courts are bound to accept and follow that ruling as part of the settled policy of the state.

McKeen v. DeLancy, 9 U. S. 5 Cranch, 22, 3 L. ed. 26; *Green v. Neal*, 81 U. S. 6 Pet. 291, 8 L. ed. 402.

The United States Supreme Court is therefore at liberty to overrule *Paul v. Virginia*, 75 U. S. 8 Wall. 183, 19 L. ed. 361, and follow *Re Pinkney*, 47 Kan. 89.

The Supreme Court of the United States will follow and carry to their ultimate logical conclusions the decisions that the state courts give to state statutes, if valid.

Louisville, N. O. & T. R. Co. v. Mississippi, 133 U. S. 587, 33 L. ed. 784; *Wabash, St. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244.

If trusts are an evil, if the combinations of citizens of various states to violate the laws of other states are contrary to public policy and deserve restraint, has not Congress an implied power to recognize and control such a condition of things?

See *Council Bluffs v. Kansas City, St. J. & 4 INTER 8*.

C. B. R. Co. 45 Iowa, 351, 24 Am. Rep. 773; *Crandall v. Nevada*, 78 U. S. 6 Wall. 85, 18 L. ed. 745.

Whenever those subjects are of a national character over which the power of Congress to regulate commerce is asserted, or of a national concern, or whenever such subjects admit of a uniform interstate system of regulation, then their nature is such that Congress may by appropriate legislation regulate them exclusively.

Bowman v. Chicago & N. W. R. Co. 125 U. S. 465, 31 L. ed. 700; *Hall v. DeCuir*, 95 U. S. 495, 24 L. ed. 550; *Crandall v. Nevada*, 78 U. S. 6 Wall. 42, 18 L. ed. 746; *Cooley v. Philadelphia Port Wardens*, 53 U. S. 12 How. 299, 13 L. ed. 996; *Pensacola Tele. Co. v. Western U. Tele. Co.* 96 U. S. 1, 24 L. ed. 708; *Munn v. Illinois*, 94 U. S. 113, 84 L. ed. 77.

Messrs. J. N. Ives, Atty. Gen., and J. R. Hill, with *Mr. F. H. Atchinson, Co. Atty.*, for the state.

Simpson, C., filed the following opinion: W. C. Phipps and Theo. Gardner, with four others, were complained against, by information, in the district court of Labette county, upon a charge of having violated chapter 257, Laws 1889, being "An Act to Declare Unlawful Trusts and Combinations in Restraint of Trade and Products, and to Provide Penalties therefor." It seems from the record that only Phipps, Gardner, Neely, and McClure were arrested. The other two defendants were not served with process. At the trial the defendants Phipps and Gardner were found guilty, while the defendants James L. McClure and George A. Neely were found not guilty. Each of the appellants was fined \$100 and costs. The specific charge was that the accused were agents of various insurance companies organized under the laws of the states of New York, Colorado, Minnesota, and Connecticut; that they were doing business in this state, and that said insurance companies had combined to control the price and rate of insurance in the city of Oswego, Labette county, Kan.; that by agreement they had established certain rates, larger than those existing before said combination; and that the accused, as agents and adjusters of said companies, were engaged in compelling local agents to observe such combination rates, so established by said companies. The defendants Phipps and Gardner appeal to this court.

The counsel for the appellants contends, to state his proposition in general terms, that chapter 257, Sess. Laws 1889, so far as it affects foreign insurance companies or their agents, is in conflict with the power of Congress to regulate commerce among the several states, and for that reason void; or, that the federal Anti Trust Law of July 2, 1890 (26 U. S. Stat. at L. p. 209) is exclusive of the state law, and that all prosecutions for such offenses as are charged in this information must be commenced in the Federal courts, and hence these appellants must be discharged. The counsel has filed an elaborate brief, and made a long oral argument, discussing the Anti Trust Law of this state and of the United States; the commerce clause of the Federal Constitution and the power of

Congress to legislate on that subject; as well as other branches of inquiry that may be involved in the proper discussion of this appeal.

The major premise of the argument in favor of the discharge of the appellants is that this court has decided in a recent case that insurance is "trade," within the meaning of the provisions of the Anti Trust Law of this state, under which these appellants were prosecuted and convicted. The exact question in the case of *Re Pinkney*, 47 Kan. 89, was whether the word "trade," in the title to the Anti Trust Law (being chapter 257, Laws 1890) so far as it relates to the business of insurance contained in the first section of the act, was broad enough to fairly indicate that such a provision with respect to insurance was a part of the act; and the court held the act valid so far as it related to the business of insurance, that being covered by the title of the act. This is what the court did say: "The question presented is, Does the word 'trade,' used in the title, fairly indicate and include the provisions of the act with reference to insurance? It is argued that the usual meaning of the word should govern, and in that sense it has reference to the business of selling or exchanging some tangible substance or commodity for money, or the business of dealing by way of sale or exchange in commodities; and it is said that the use of the word in connection with that of 'products,' in the title, qualifies the meaning of 'trade,' and makes it all the more apparent that the construction contended for is the correct one. This is the commercial sense of the word, and possibly may be the most common signification which is given to it, but it is not the only one, nor the most comprehensive meaning in which the word is properly used. In the broader sense, it is any occupation or business carried on for subsistence or profit. . . . The broader signification given to the word by most of the lexicographers would fairly embrace and cover the provision of the act with reference to the business of insurance. The title prefixed to an act may be broad and general, or it may be narrow and restricted, but in either event it must be a fair index of the provisions of the act. . . . That the broader meaning of the word 'trade' was the one intended by the legislature is manifest from the incorporation of the insurance provision in the body of the act. . . . How can it be said that the business of insurance is foreign to the title of the act, when the subject expressed in the title, taken in its broadest sense, and the one intended by the legislature, would embrace such business?" So it may be fairly said, as it is in the printed brief of counsel for appellants, that a legislative and a judicial definition of insurance is that it is "trade," within the meaning of the Anti Trust Law of this state.

The minor premise of counsel is that "trade," as defined by this court in the case of *Re Pinkney*, *supra*, means interstate commerce. This is an assumption, rather than a fair and logical deduction from the language used in the opinion. Trade between citizens of this state is not interstate com-

merce. Trade between a citizen of this state and a citizen of another state temporarily in this state is not interstate commerce. In fact, at the time the opinion in the case of *Re Pinkney* was written, there were no facts in the case that would suggest to the mind of the writer any question as to interstate commerce, because nowhere in the complaint, proceedings, or record of that case is it hinted that the unlawful combination intended and designed to control the cost of insurance was made or attempted by other persons than residents of the state of Kansas. So that it can be positively asserted that the word "trade," as used in that decision, meant then, and means now, trade between citizens of this state,—domestic trade, if you please,—and not trade or commerce between citizens of different states, or interstate commerce. It is a conclusive presumption of the law that this court knew that the legislature of this state had no power to regulate interstate commerce, and the presumption is equally strong and conclusive that by the use of the word "trade" the intercourse between citizens of different states that constitutes interstate commerce was not in contemplation. It has been judicially determined, time and time again, by the highest judicial authority in the land, that issuing a policy of insurance is not a transaction of commerce. The Supreme Court of the United States, in the case of *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357, in an elaborate opinion by Mr. Justice Field, says: "The policies are simple contracts of indemnity against loss by fire, entered into between the corporations and the assured, for a consideration paid by the latter. These contracts are not articles of commerce in any proper meaning of the word. They are not subjects of trade and barter offered in the market as something having an existence and value independent of the parties to them. They are not commodities to be shipped or forwarded from one state to another, and then put up for sale. They are like other personal contracts between parties which are completed by their signature and the transfer of the consideration. Such contracts are not interstate transactions, though the parties may be domiciled in different states. The policies do not take effect—are not executed contracts—until delivered by the agent in Virginia. They are, then, local transactions, and are governed by the local law. They do not constitute a part of the commerce between the states any more than a contract for the purchase and sale of goods in Virginia by a citizen of New York whilst in Virginia would constitute a portion of such commerce. In *Nathan v. Louisiana*, 49 U. S. 8 How. 73, 12 L. ed. 993, this court held that a law of that state imposing a tax on money and exchange brokers who dealt entirely in the purchase and sale of foreign bills of exchange was not in conflict with the constitutional power of Congress to regulate commerce. The individual thus using his money and credit, said the court, 'is not engaged in commerce, but in supplying an instrument of commerce. He is less connected with it than the shipbuilder, without whose labor foreign commerce could not

be carried on.' And the opinion shows that, although instruments of commerce, they are the subjects of state regulation and, inferentially, that they may be subjects of direct state taxation. 'In determining,' said the court, 'on the nature and effect of a contract, we look to the *lex loci* where it was made or where it was to be performed. And bills of exchange, foreign or domestic, constitute, it would seem, no exception to this rule. Some of the states have adopted the law-merchant, others have not. The time within which a demand must be made on a bill, a protest entered, and notice given, and the damages to be recovered, vary with the usages and legal enactments of the different states. These laws, in various forms and in numerous cases, have been sanctioned by this court.' And again: 'For the purposes of revenue the Federal government has taxed bills of exchange, foreign and domestic, and promissory notes, whether issued by individuals or banks. Now, the Federal government can no more regulate the commerce of a state than a state can regulate the commerce of the Federal government, and domestic bills or promissory notes are as necessary to the commerce of a state as foreign bills to the commerce of the Union. And if a tax on an exchange broker who deals in foreign bills be a regulation of foreign commerce, or commerce among the states, much more would a tax upon state paper, by Congress, be a tax on the commerce of a state.' If foreign bills of exchange may thus be the subject of state regulation, much more so may contracts of insurance against loss by fire." The doctrine of this case was distinctly affirmed by the supreme court in the case of *Liverpool & L. L. & F. Ins. Co. v. Massachusetts*, 77 U. S. 10 Wall. 566, 19 L. ed. 1029, in which *Mr. Justice Miller* says: "The case of *Paul v. Virginia* decided that the business of insurance, as ordinarily conducted, was not commerce, and that a corporation having an agency by which it conducted business in another state was not engaged in commerce between the states." The case of *Paul v. Virginia*, *supra*, was distinctly affirmed in the cases of *Doyle v. Continental Ins. Co.*, 94 U. S. 535, 24 L. ed. 148, and *Philadelphia Fire Asso. v. New York*, 119 U. S. 110, 30 L. ed. 342, and has been cited approvingly in many other Federal and numerous state decisions. It must now be regarded as the law of the land, in spite of the facetious criticisms of counsel for appellants. In *Paul v. Virginia*, *supra*, a statute of that state required that every insurance company not incorporated by Virginia should, as a condition of carrying on business in Virginia, deposit securities with the state treasurer, and obtain a license; and another statute made it a penal offense for a person to act in Virginia as agent for an insurance company not incorporated by Virginia without such license. *Paul*, having acted as such agent without a license, was convicted and fined under the statute. So that case arose out of an attempt on the part of the state of Virginia to enforce its penal laws for the regulation of the business of insurance within its bor-

4 INTER 8.

ders; and in this respect it is very similar to the case we are now discussing.

In the case of *Leavenworth v. Booth*, 15 Kan. 628, which was the prosecution of a local agent of a foreign insurance company for a violation of a city ordinance that required foreign insurance companies to pay certain license taxes for the privilege of doing business in said city, this court, by *Mr. Justice Valentine*, said: "It must be remembered that the insurance company involved in this controversy is a foreign insurance company, having no rights in this state except such as the state may see fit to confer upon it. It has no power to do business in Kansas by virtue of its organization in Wisconsin. It has no power to do business in Kansas by virtue of the laws of Wisconsin, or by virtue of the Constitution or laws of the United States, or by virtue of all combined. *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357; *Ducat v. Chicago*, 77 U. S. 10 Wall. 410, 19 L. ed. 972; *Liverpool & L. L. & F. Ins. Co. v. Massachusetts*, 77 U. S. 10 Wall. 566, 19 L. ed. 1029. It can do business in Kansas only under the laws of Kansas, and by permission from the state of Kansas. This state might absolutely exclude it, or might require that it do business only under a license, and might require that it not only get a license from the state, but also that it get a license from every city, county, or village in which it should attempt to do business. The state may permit such insurance company to come into the state under such just restraints and regulations as the state may choose. Hence the state is not bound to permit said insurance company to come to this state, as individual citizens of other states have a right to do, and then, for the purpose of raising revenue, resort only to the ordinary modes of taxation. On the contrary, the state, without resorting to taxation at all, may require that such insurance company shall pay for the privilege of coming into the state, and of doing business therein, and may require that it shall not only pay a sum to the state for the privilege of doing business therein, but that it shall also pay a sum to every municipal corporation in the state in which it shall attempt to do business. And all this the state may do without violating any provision of its own Constitution." This case asserts in the strongest possible language the right of this state to regulate the business of insurance within its borders, not only with reference to those insurance companies that may be organized under our laws, but especially with regard to insurance companies organized under the laws of sister states, doing or desiring to do business in this state.

At this writing it is probable that every state in the Union has passed laws upon this subject, until it may be said that the right of state regulation of the business of insurance is universally recognized and upheld. So it can be confidently said that this court, when it held in *Re Pinkney* that insurance was "trade," did not contemplate that the term used could be tortured into interstate commerce; and it can be said with equal

confidence that the settled law of this country is that the issuing of a policy of insurance is not a transaction of commerce. As we have seen, neither the major nor minor premise of the argument of counsel for the appellants is sound, and that the inevitable conclusion—that Congress alone has power to regulate interstate commerce, and to provide penalties against insurance trusts and combinations—does not follow. The court did not mean "trade," as synonymous with interstate commerce. The business of insurance is not interstate commerce. The state has power to regulate and control—and to provide penalties for the transgression of its regulating and controlling statutes—the business of a foreign insurance company within its boundaries. If the theory of the counsel for the appellants ever ripens into authoritative judicial decision, the power of the state to regulate and control the business of insurance within its limits is gone. The insurance department, and every act upon the statute books for the protection of the policy holders, and every line looking to the punishment of the violators of its public policy in this respect, goes with it, except, possibly, as to such companies as may be organized and operated under the laws of this state.

We recommend that the judgment of conviction be affirmed.

Per Curiam:

It is so ordered.

Johnston, J., concurs.

Horton, Ch. J.:

I dissent from the judgment ordered, not, however, upon the ground of the interstate character of insurance, as urged by the attorney for the appellants, but because of my reasons for my dissent in the case of *Re Pinkney*, 47 Kan. 89. The subject of an act must be clearly expressed in its title. Chapter 257 is penal in its nature. The title thereof should not be extended by construction. Common or popular words are to be understood in a popular sense. In the construction of statutes, a word which has two significations should ordinarily receive that meaning which is generally given to it.

Considering the provisions of the constitution concerning titles to bills or acts, and the foregoing cardinal rules of construction, I do not think the word "trade," used in the title of said chapter 257, Sess. Laws 1889, indicates or includes, in any public sense, or as generally understood, lawyers, doctors, insurance agents, or insurance companies. When I speak of the profession or business of a lawyer, a doctor, or an insurance agent, I do not say he is a trader or tradesman, or is in trade, nor that he is carrying on a trade, or doing well in his trade. I have never heard any person, in referring to the success of a lawyer, a doctor, or an insurance agent, say of either that he is prosperous in his trade, or that he is doing well in carrying on his trade, or that he is an energetic trader. Indeed, I never have heard insurance agents spoken of as "in trade." I think the decisions referred to in the foregoing opinion except the one of this court 47 Kan. 89, all tend to show that insurance is not "trade." The Supreme Court of the United States, in the case *Paul v. Virginia*, cited, say insurance policies "are not subjects of trade and barter, offered in the market as something having an existence and value independent of the parties to them. They are not commodities to be shipped or forwarded from one state to another, and then put up for sale." 75 U. S. 8 Wall. 168, 19 L. ed. 357.

Valentine, J.:

I concur in the decision of this case, and in affirming the judgment of the court below. It is evident from the body of the act (chapter 257, Laws 1889) that the legislature, in using the word "trade" in the title to the act intended to include insurance, but did not intend to include interstate commerce; and it is the duty of the courts to carry out the will and intention of the legislature, when enacted into law, and when the same can be fairly ascertained, and not to defeat the same, although the legislature may not have used the most appropriate language in expressing its will and intention. There is nothing in this case with reference to lawyers or doctors, or their business or profession. Hence it is wholly unnecessary to say anything with reference thereto.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF NORTH CAROLINA.

Re SIMON W. SANDERS.

(See 18 L. R. A. 549.)

A state statute prohibiting the sale of seed unless the year in which it is grown is plainly marked on each package except on a sale of seed in open

bulk by farmers to other farmers or gardeners is void as to seed brought from another state and sold in original packages.

Decided November 14, 1892.

NOTE.—The law of interstate commerce as applied to sales by drummers or peddlers is shown by a note to *Re Spain* (N. C.) 14 L. R. A. 97, and by the later cases of *Titosville v. Brennan*, 14 L. R. A. 100; 123 Pa. 642, 24 Am. St. Rep. 590; *Gunn v. White Sewing Mach. Co.* (Ark.) 18 L. R. A. 306.

For the law of interstate commerce as affecting sales of intoxicating liquors, see *State v. Winters*, 10 L. R. A. 616, and note, 44 Kan. 723; *Com. v. Zeit*, 11 L. R. A. 602, 128 Pa. 615.

For the effect of such law upon the similar subject of sales of oleomargarine, see *Re Gooch*, 10 L.

PETITION of Simon W. Sanders for a writ of habeas corpus to obtain his discharge from the custody of the sheriff of New Hanover county. *Discharge granted.*

The facts are stated in the opinion.

Messrs. Alfred Russell and D. L. Russell for petitioner.

Mr. John D. Bellamy, Jr., for the state: The act is an exercise by the state of the police power to protect its citizens from fraud.

That the power to establish police regulations, in the American constitutional system, has been left with the individual states cannot be disputed.

Cooley, Const. Lim. p. 706; *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 28; *Licence Cases*, 46 U. S. 5 How. 504, 12 L. ed. 256; *United States v. Dewitt*, 76 U. S. 9 Wall. 41, 19 L. ed. 598; *Henderson v. New York*, 98 U. S. 259, 28 L. ed. 548.

What is this power? It is the power vested in the legislature, to make, ordain, and establish all manner of wholesome and reasonable laws, statutes, and ordinances, either with penalties or without, not repugnant to the Constitution, as they shall judge to be for the good and welfare of the commonwealth and of the subjects of the same.

Cooley, Const. Lim. p. 705.

The power is located in the states and all that the Federal authority can do is to see that the states do not, under cover of this power, obstruct the exercise of the power confided to the nation.

Cooley, Const. Lim. p. 706.

If the act complained of affects commerce, but does not regulate it, it is valid.

Licence Cases, 46 U. S. 5 How. 615, 12 L. ed. 306; *Hannibal & St. J. R. Co. v. Huen*, 95 U. S. 465, 24 L. ed. 527; Cooley, Const. Lim. p. 707; *Patterson v. Kentucky*, 97 U. S. 501, 24 L. ed. 1115.

It is a reasonable exercise of the police power of the state for a legislative act of Kentucky to require all illuminating oils to be inspected and to have branded on the casks "Standard Oil" or "unsafe for illuminating purposes."

Patterson v. Kentucky, *supra*.

The court held in *Turner v. Maryland*, 107 U. S. 38, 27 L. ed. 370, that a statute of Maryland forbidding the exportation of tobacco except in hogshead inspected and passed as required by the act, is valid.

The state has power to pass laws making it penal to introduce paupers and criminals within its borders.

Moore v. Illinois, 55 U. S. 14 How. 18, 14 L. ed. 306. See also *Powell v. Pennsylvania*, 127 U. S. 678, 32 L. ed. 253; *State v. Newton*, 50 N. J. L. 584; *Stole v. Thompson*, 44 Minn. 271; *Steiner v. Ray*, 84 Ala. 93, 5 Am. St. Rep. 382; *State v. Marshall*, 1 L. R. A. 51, 64 N. H. 549.

R. A. 880, 3 Inters. Com. Rep. 530, 44 Fed. Rep. 276; Com. v. Huntley (Mass.) 15 L. R. A. 839.

For other sales within the scope of interstate commerce as affected by state legislation, see *American Fertilizing Co. v. North Carolina Board of Agri.* 11 L. R. A. 179, 3 Inters. Com. Rep. 532.

On the question whether shipments between
4 INTER S,

Every possible presumption is in favor of the validity of a statute, and this continues beyond a rational doubt.

Goff, Circuit Judge, delivered the following opinion:

Simon W. Sanders presents his application for the writ of habeas corpus. In substance, it alleges that petitioner is restrained of his liberty by the sheriff of New Hanover county, North Carolina, who detains petitioner by reason of a certain *mittimus* or warrant issued by a justice of the peace in and for said county and state, founded upon a judgment of conviction rendered by the justice for the violation of a certain statute of the state of North Carolina, passed by the General Assembly of that state on the 5th day of March, 1891, entitled "An Act to Protect Seed Buyers in North Carolina," being chapter 381 of the Acts of the General Assembly of North Carolina for the year 1891, in this: that petitioner, as the agent of D. M. Ferry & Co., a firm composed of citizens of the state of Michigan, and doing business in that state, exposed to sale and sold at Wilmington, in North Carolina, certain seeds, which were shipped to petitioner from the state of Michigan by said firm of D. M. Ferry & Co., to be sold by him as their agent. It also alleges that the seeds so sold by petitioner were in the original packages as received from the state of Michigan, and it admits that the packages were not marked as required by the statute alluded to. Petitioner claims that the act of the general assembly of North Carolina, by virtue of which he was convicted, in so far as it applies to the act done by him, is in violation of the Constitution of the United States, and that, therefore, no lawful conviction is possible under it, and that consequently he is restrained of his liberty wrongfully. The writ, as prayed for, was issued on the 8th day of March, 1892. The sheriff made return to the writ on the 24th day of March, 1892, admitting that he had petitioner in his custody, and that he held him in accordance with the terms of a warrant of commitment from a justice of the peace for the state and county mentioned. With his return the sheriff files a certified transcript of the record of the court of the justice, showing the trial, conviction, and commitment of the petitioner, from which it appears that the facts relative to the sale of the seed are correctly set forth in the petition filed in this manner. The sheriff, at the time he filed his return to the writ, produced before the court the petitioner, who was represented by counsel, and, there being

points in the same state lose their character of domestic commerce by passing out of the state during transportation, see note to *Campbell v. Chicago, M. & St. P. R. Co.* (Iowa) 17 L. R. A. 448.

As to shipments within a state as part of interstate or foreign transportation, see note to *Missouri Pac. R. Co. v. Sherwood* (Tex.) 17 L. R. A. 642.

no appearance for the sheriff nor for the state of North Carolina by counsel, the court ordered that the hearing of the matter involved in this proceeding be postponed until the next term of the circuit court of the United States at Wilmington, N. C., and committed the petitioner to the custody of the marshal of that district. At the spring term, 1892, of the circuit court at Wilmington the matters arising on the writ and return were argued by counsel for petitioner, for the sheriff, and the state of North Carolina, and submitted to the court.

The petitioner, as a member of the firm of S. W. Sanders & Co., of Wilmington, N. C., contracted with D. M. Ferry & Co., of Detroit, Mich., to sell for them garden, flower, and field seeds on certain terms and conditions set forth in a contract dated October 30, 1891. The seeds ordered were duly shipped by D. M. Ferry & Co., from Detroit, received by S. W. Sanders & Co., at Wilmington, and portions of them sold by petitioner. On the 5th day of March, 1891, the general assembly of North Carolina passed an act of which the following is a copy:

"An Act to Protect Seed Buyers in North Carolina. The General Assembly of North Carolina do enact: Section 1. That any person or persons doing business in the state, who shall sell seed, or offer for sale any vegetable or garden seed, that are not plainly marked upon each package or bag containing such seed the year in which said seed were grown, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than ten dollars or more than fifty dollars, or imprisoned not more than thirty days, for each and every offense; provided, that the provisions of the act shall not apply to farmers selling seed in open bulk to other farmers or gardeners. Sec. 2. That any person or persons who shall, with intention to deceive, wrongfully mark or label, as to date, any package or bag containing garden or vegetable seed, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than ten or more than fifty dollars, or imprisoned not less than ten or more than thirty days. Sec. 3. That this act shall be in force from and after the 1st day of September, 1891. Ratified this, the 5th day of March, 1891."

The seeds so sent by D. M. Ferry & Co., were in packages which were not marked with the year when the seeds were grown, as was required by this statute, and the sales made by the petitioner were in the original packages received from Michigan. Petitioner claims that this statute is a regulation of commerce among the states, the power to make which is not possessed by the legislature of a state, but is, by article 1, § 8, cl. 3, of the Constitution of the United States, vested exclusively in the Congress provided for by that instrument. Counsel for the state of North Carolina contends that the act mentioned, while it may affect commerce, is not a regulation thereof, but is simply the exercise by the state of its police power to protect its citizens from fraud. The clause of the Constitution above cited reads as follows: "The Congress shall have power to regulate

commerce with foreign nations and among the several states and with the Indian tribes." The need of a national regulation of commerce among the states was one of the most influential causes leading to the formation of the Constitution of the United States, the desire being to secure uniformity of the commercial regulations against discriminating or burdensome state legislation. It is now well established that Congress has the exclusive right to regulate commerce, and that the grant to Congress in the Constitution relating to that subject carried with it the whole matter, leaving nothing for the state to act upon in cases where the subject is national in character. *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23; *Cook v. Pennsylvania*, 97 U. S. 566, 24 L. ed. 1015; *Chicago & N. W. R. Co. v. Fuller*, 84 U. S. 17 Wall. 560, 21 L. ed. 710; *Henderson v. Wickham*, 92 U. S. 259, 23 L. ed. 543; *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527; *Leisy v. Hardin*, 135 U. S. 106, 34 L. ed. 132.

Is this act of the general assembly of North Carolina, as applied to the sale in question, a regulation of interstate commerce? If so, it is void. The fact that Congress has not legislated on this particular subject—has not especially regulated this character of commerce—does not authorize the state legislature to regulate it, but shows that Congress intends such sales to be free in all the states, and not to be restricted or burdened by any state statute. *Philadelphia & S. M. S. S. Co. v. Pennsylvania*, 123 U. S. 336, 30 L. ed. 120; *Bourman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 700.

In *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 30 L. ed. 694, the court says: "The power granted to Congress to regulate commerce among the states being exclusive when the subjects are national in their character, or admit only of one uniform system of regulation, the failure of Congress to exercise that power in any case is an expression of its will that the subject shall be left free from restrictions or impositions upon it by the several states."

The meaning of the decisions of the Supreme Court on this question is expressed by William Draper Lewis in his recent instructive work entitled "The Federal Power over Commerce, and Its Effect on State Action," (page 123):

"Whenever the subject effected by state laws is in its nature national, or requires one uniform rule or plan of regulation, then the inaction of Congress is evidence to the court of its intention that the commerce in this respect shall be free and untrammelled; but when the subject, from its local nature, does not seem to require a uniform rule of regulation, the inaction of Congress is evidence to the court that that body is willing that the states can effect such subjects in the legitimate exercise of their reserved powers."

In one of the early cases in which this clause of the Constitution received careful consideration (*Brown v. Maryland*, 25 U. S. 19 Wheat. 447, 6 L. ed. 688) Chief Justice Marshall, in delivering the opinion of the court, used this language: "What, then, is the just extent of a power to regulate com-

merce with foreign nations and among the several states? This question was considered in the case of *Gibbons v. Ogden*, 22 U. S. 9 Wheat. 1, 6 L. ed. 23, in which it was declared to be complete in itself, and to acknowledge no limitations other than are prescribed by the Constitution. The power is coextensive with the subject on which it acts, and cannot be stopped at the external boundary of a state, but must enter its interior.

... If this power reaches the interior of a state, and may be there exercised, it must be capable of authorizing the sale of those articles which it introduces. Commerce is intercourse. One of its most ordinary ingredients is traffic. It is inconceivable that the power to authorize this traffic, when given in the most comprehensive terms, with the intent that its efficacy should be complete, should cease at the point when its continuance is indispensable to its value. To what purpose should the power to allow importation be given, unaccompanied with the power to authorize a sale of the thing imported? Sale is the object of importation, and is an essential ingredient of that intercourse of which importation constitutes a part. It is as essential an ingredient, as indispensable to the existence of the entire thing, then, as importation itself. It must be considered as a component part of the power to regulate commerce. Congress has a right, not only to authorize importation, but to authorize the importer to sell."

If Congress should pass an Act requiring all seed sold in packages to be marked with the year in which the same were grown, and prohibiting the sale unless so marked, regardless of the country where grown, including imported and domestic seeds, as this act does, it would be the exercise by Congress of the power granted by the Constitution, and a regulation of commerce among the states. The difficulty of honestly complying with such legislation would be presented to the consideration of that body as a reason why the statute should be amended or repealed. If this be true (and can it be doubted that Congress has the constitutional right to legislate on this subject?) and if the conclusion I reach is correct, that Congress has exclusive jurisdiction of such regulation, does it not follow that this legislation by the general assembly of North Carolina is unconstitutional and void? If the states can legislate, as to the matter of the North Carolina statute, because of the absence of legislation by Congress on the subject, as was claimed by counsel in the argument, would not the provisions of that Act be held to be so unreasonable, such a burden on the business of the country, and so interfere with the rights and privileges of the citizens thereof, as to render it void? It virtually prohibits the sale in North Carolina of seed imported from foreign countries, for the packages would not be marked, and our dealers could not truthfully mark them as required by that statute. It prevents the sale in North Carolina of seed lawfully carried into that state in the mails of the United States, sent by dealers residing and doing business in other states, who pay to the gov-

ernment of the United States, the postage or freight for the transportation of the same, under laws passed by Congress. It favors the grower and dealer in seeds doing business in North Carolina to the detriment of the growers and dealers of all the other states, for the farmers of North Carolina are, in effect, regarded as growers and dealers in seeds, and exempted from the requirements of the law, and it would follow that all persons desiring to purchase from them would be "farmers or gardeners." It would thereby permit a certain portion of the citizens of that state to engage in that business, and prohibit all the rest from so doing. Why should the farmers of North Carolina be permitted to sell seed in open bulk to other farmers or gardeners, and the petitioner, or D. M. Ferry & Co., or any citizen who desires to engage in that traffic, be prohibited from so doing? How does this protect seed buyers? What is meant by "open bulk?" The natural meaning of the words is, "in the mass; exposed to view; not tied or sealed up." Used in the connection they are in this act, they do not relate to the quantity that may be sold, nor does the statute restrict it to an ounce or less, or require a bushel or more to be sold. Any quantity of any garden or vegetable seed, not in a package or bag, but in open bulk, may be sold by a farmer to other farmers or gardeners, without the mark relating to the year when grown. The effect of this is that all dealers must sell their seeds through farmers, or be excluded from the market. The farmer may sell seeds, free from any restrictions or marks, but any one else selling the same kind of seeds, even if from the same original mass or bulk, if the same be in packages or bags, must have plainly marked upon them the year when grown,—the words that give purity to the contents, and eliminate all fraud from the sale. This statute virtually prevents the importation into the state of North Carolina of all garden and vegetable seeds in paper packages or bags, for sale in the packages in which imported, and destroys that extensive and useful trade, so far as that state is concerned. If one state can do this, all can. If North Carolina can impose this burden, other states can and will impose similar or heavier ones, to the great damage of a commerce in which not only this petitioner and D. M. Ferry & Co. are interested, but in which many citizens of many of the states have invested their means, and to which they have devoted their time and energies. In *Ex parte Kieffer*, 40 Fed. Rep. 399, Mr. Justice Brewer says: "The moment you find any act of the legislature or any ordinance of a city which prevents the free exchange of lawful articles of commerce between the states, you find an act or ordinance which contravenes the commercial clause of the United States Constitution."

It was argued that the statute in question is but the legitimate exercise of the police power of the state. What is the "police power," conceded to and proper to be exercised by the state? About this eminent jurists have differed, and have found it difficult to draw the line between it and the

powers granted to the general government. *Mr. Justice Strong*, in delivering the opinion of the court in *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527, said on this subject: "It is generally said to extend to making regulations promotive of domestic order, morals, health, and safety. As was said in *Thorpe v. Rutland & B. R. Co.* 27 Vt. 149: 'It extends to the protection of the lives, limbs, health, comfort, and quiet of all persons, and the protection of all property, within the state, according to *sic utere tuo ut alienum non laedas* which being of universal application, it must of course be within the range of legislative action to define the mode and manner in which every one may so use his own as not to injure others.' It was further said that by the general police power of a state persons and property are subjected to all kinds of restraint and burdens in order to secure the general comfort, health, and prosperity of the state, of the perfect right of the legislature to do which no question ever was, or, upon acknowledged general principles, ever can be, made so far as national persons are concerned."

It may also be admitted that the police power of a state justifies the adoption of precautionary measures against social evils. Under it a state may legislate to prevent the spread of crime, or pauperism, or disturbance of the peace. It may exclude from its limits convicts, paupers, idiots, and lunatics, and persons likely to become a public charge, as well as persons afflicted with contagious or infectious diseases; a right founded, as intimated in the *Passenger Cases*, 48 U. S. 7 How. 283, 12 L. ed. 702, by *Mr. Justice Grier*, in the sacred law of self-defense. The same principle, it may also be conceded, would justify the exclusion of property dangerous to the property of citizens of the state; for example, animals having contagious and infectious diseases. All these exertions of power are in immediate connection with the protection of persons and property against noxious acts of other persons, or such a use of property as is injurious to the property of others. They are

self-defensive. I do not deem it necessary to review the cases on this subject. It was really disposed of in *Gibbons v. Ogden*, the reasoning of *Chief Justice Marshall* being, to my mind, conclusive, and, as expressed in said case, never having been departed from in matters where exclusive jurisdiction is given to Congress. As he well says: "The nullity of an Act inconsistent with the Constitution is produced by the declaration that the Constitution is supreme."

Mr. Justice Miller, in *Henderson v. Wickham*, 92 U. S. 529, 23 L. ed. 543, on this question says: "It is clear, from the nature of our complex form of government, that whenever the statute of a state invades the domain of legislation which belongs exclusively to the Congress of the United States, it is void, no matter under what class of powers it may fall, or how closely allied to powers conceded to belong to the states."

I conclude that the police power of a state cannot be held to embrace a subject confided exclusively to Congress by the Constitution of the United States. If the subject-matter of state legislation is included in the exclusive grant of commercial power to Congress, then the state enactment is void, even if it passed in the exercise of the police power of the state. The authorities in support of this are numerous, and from them I cite *Hannibal & St. J. R. Co. v. Husen*, 95 U. S. 465, 24 L. ed. 527; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649; *Leisy v. Hardin*, 135 U. S. 108, 34 L. ed. 182.

Other questions are submitted by counsel for petitioner, but holding as I do on the matters I have mentioned, I do not find it necessary to pass upon them.

For the reasons that I have given I conclude that the act of the general assembly of the state of North Carolina entitled "An Act to Protect Seed Buyers in North Carolina," being chapter 381 of the acts for the year 1891, is inoperative and void, and that the petitioner is in custody in violation of the Constitution of the United States.

I therefore order that he be discharged from custody.

ARKANSAS SUPREME COURT.

N. H. GUNN, *Appt.*,

v.

WHITE SEWING MACHINE CO.

(See 18 L. R. A. 208.)

A contract by which a resident of a state agrees with a foreign corporation to canvass certain territory for the sale of its sewing machines, which the corporation thereby agrees to sell to him on credit and a bond given to secure payment to the corporation of any sum that may become due under such contract, constitutes a part of the interstate commerce carried on by the sale of such

sewing machines in accordance with said contract, and therefore cannot be affected by a state statute prohibiting business within the state by a foreign corporation which has not complied with certain requirements, such as filing a certificate to designate an agent on whom process may be served.

(*Cochran*, Ch. J., and *Manaford*, J., dissent.)

Decided December 3, 1892.

NOTE.—For note on peddlers and drummers as related to interstate commerce, see *Re Spain* (N. C.) 14 L. R. A. 97.

4 INTER S.

A PPEAL by defendant from a judgment of the Circuit Court for Faulkner County in favor of plaintiff in an action brought to enforce the liability of defendant as surety upon a bond which had been given to plaintiff by one, Julian, in connection with a contract for the sale of plaintiff's machines. *Affirmed.*

The facts are stated in the opinion.

Messrs. J. H. Harrod and E. A. Bolton, for appellant.

The legislation of a state will only be restrained when the exercise of the right conflicts with the perfect execution of a sovereign power delegated to the United States.

Dobbins v. Eris County, 41 U. S. 16 Pet. 485, 10 L. ed. 1023.

Even if a state were bound to accord to a company the right of acting in a corporate capacity within its limits, the state would undoubtedly retain the power of making reasonable regulations for the government of the company, and prescribing conditions to be complied with before the right may be claimed.

2 Morawetz, Priv. Corp. § 974.

Messrs. Sanders & Watkins for appellee.

Battle, J., delivered the opinion of the court:

The White Sewing Machine Company was a corporation organized and doing business under the laws of the state of Ohio, and was engaged in the selling of sewing machines and other goods at Cleveland, in that state. A. I. Julian and N. H. Gunn were citizens of Faulkner county, in this state. On or about the 6th day of August, 1888, the sewing machine company entered into a contract with Julian, by which the company undertook and bound itself to sell sewing machines, and the component parts thereof, to Julian, at stipulated prices, on a credit, and Julian agreed to canvass Faulkner county, or cause it to be canvassed, "with horse and wagon, exclusively for the sale of the White sewing machines." Julian was to order the machines, or the component parts of the same, when he desired them to be sent to him. At the same time Julian, as principal, and Gunn, as surety, executed a bond to the sewing machine company, conditioned, among other things, that Julian would pay all sums of money that he would be owing to the company for sewing machines or otherwise. After this the company, pursuant to the terms of its contract, and on the faith of the bond executed to it, sold and shipped to Julian a large number of sewing machines and other property, and Julian became indebted to it on account thereof in a large sum of money. Julian failing to pay, the company brought this action on the bond against Gunn to recover the same, or a part thereof.

The only defense made by Gunn was the company had not, at the time the bond was executed, filed any certificate in the office of the secretary of the state of Arkansas, designating an agent upon whom process could be served, and its principal place of business in this state.

Evidence was, however, adduced at the trial tending to prove, among other things,

the facts before stated, and that the machines and other property were sold by the company in Ohio, and shipped to Julian in this state. The court below held that these transactions were a part of the interstate commerce of the United States, and were not affected by the laws of this state, and rendered judgment in favor of plaintiff against the defendant, and he appealed.

Appellant contends that the bond sued on is void under the Act of the General Assembly of April 4, 1887. That Act declares that before any foreign corporation shall begin to carry on business in this state it shall, by a certificate under the hand of the president and seal of such company, filed in the office of the secretary of state, designate an agent, who shall be a citizen of the state, upon whom process may be served, and also state therein its principal place of business in this state; and provided that, if any such corporation shall fail to file such certificate, all its contracts with citizens of this state shall be void as to the corporation, and shall not be enforced in any of the courts of this state in favor of the corporation.

It is conceded that the certificate required by that Act was not filed by the appellee until after the debt sued on matured. Was the bond void?

In *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357, the court, speaking of a foreign corporation, said: "The recognition of its existence, even by other states, and the enforcement of its contracts made therein, depend purely upon the comity of those states,—a comity which is never extended where the existence of the corporation or the exercise of its powers is prejudicial to their interests, or repugnant to their policy. Having no absolute right of recognition in other states, but depending for such recognition and the enforcement of its contracts upon their assent, it follows as a matter of course that such assent may be granted upon such terms and conditions as those states may think proper to impose. They may exclude the foreign corporation entirely, they may restrict its business to particular localities, or they may exact such security for the performance of its contracts with their citizens as in their judgment will best promote the public interests. The whole matter rests in their discretion."

But this right of the state cannot be so exercised as to interfere with the power of Congress to regulate interstate commerce. In *Paul v. Virginia* the corporation involved in litigation was an insurance company, and was not engaged in interstate commerce. In speaking of the power to regulate commerce, in that case, the court further said: "It is undoubtedly true, as stated by counsel, that the power conferred upon Congress to regulate commerce includes as well commerce carried on by corporations as commerce carried on by individuals."

This state of facts forbids the supposition that it was intended in the grant of power to Congress to exclude from its control the commerce of corporations. The language of the grant makes no reference to the instrumentalities by which commerce may be car-

ried on. It is general, and includes a like commerce by individuals, partnerships, associations, and corporations."

In *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 29 L. ed. 158, 1 Inters. Com. Rep. 382, the court, speaking of interstate commerce, said: "The power to regulate that commerce, as well as commerce with foreign nations, vested in Congress, is the power to prescribe the rules by which it shall be governed; that is, the conditions upon which it shall be conducted, to determine when it shall be free, and when subject to duties or other exactions. The power also embraces within its control all the instrumentalities by which that commerce may be carried on, and the means by which it may be aided and encouraged. The subjects, therefore, upon which the power may be exerted are of infinite variety. While, with reference to some of them, which are local and limited in their nature or sphere of operation, the states may prescribe regulations until Congress intervenes and assumes control of them, yet, when they are national in their character, and require uniformity of regulation, affecting alike all the states, the power of Congress is exclusive. . . . Nor does it make any difference whether such commerce is carried on by individuals or by corporations."

In *Pembina Consol. S. Min. & M. Co. v. Pennsylvania*, 125 U. S. 181, 31 L. ed. 650, the court, after discussing this power at length, said: "The only limitation upon this power of the state to exclude a foreign corporation from doing business within its limits, or hiring offices for that purpose, or to exact conditions for allowing the corporation to do business or hire offices there, arises where the corporation is in the employ of the Federal government, or where its business is strictly commerce, interstate or foreign. The control of such commerce, being in the Federal government, is not to be restricted by state authority." *Pensacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708; *Cooper Mfg. Co. v. Ferguson*, 113 U. S. 727, 28 L. ed. 1187.

In *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 30 L. ed. 694, the court said: "Certain principles have been already established by the decisions of this court which will conduct us to a satisfactory decision. Among those principles are the following: (1) The Constitution of the United States having given to Congress the power to regulate commerce, not only with foreign nations, but among the several states, that power is necessarily exclusive whenever the subjects of it are national in their character, or admit only of one uniform system or plan of regulation. . . . (2) Another established doctrine of this court is that, where the power of Congress to regulate is exclusive, the failure of Congress to make express regulations indicates its will that the subject shall be left free from any restrictions or impositions; and any regulation of the subject by the states, except in matters of local concern only, as hereinafter mentioned, is repugnant to such freedom."

"Of the former class may be mentioned all

that portion of commerce with foreign countries or between the states which consist in the transportation, purchase, sale, and exchange of commodities. Here there can of necessity be only one system or plan of regulations, and that Congress alone can prescribe." *Mobile County v. Kimball*, 102 U. S. 691, 26 L. ed. 238; *Escañaba & L. M. Transp. Co. v. Chicago*, 107 U. S. 678, 27 L. ed. 442.

"Of the class of subjects local in their nature or intended as mere aids to commerce," on which it has been held that the authority of the states may be exerted for their regulation and management until Congress interferes and supercedes it, "may be mentioned harbor pilotage, buoys, beacons to guide mariners to the proper channels in which to direct their vessels," bridges over navigable streams, wharves, wharfage and quarantine. "State action upon such subjects," said the court in *Mobile County v. Kimball*, *supra*, "can constitute no interference with the commercial power of Congress, for, when that acts, the state authority is superseded. Inaction of Congress upon these subjects of local nature or operation, unlike its inaction upon matters affecting all the states, and requiring uniformity of regulation, is not to be taken as a declaration that nothing shall be done in respect to them, but is rather to be deemed a declaration that for the time being, and until it sees fit to act, they may be regulated by state authority."

A few cases will serve to show the character of some of the statutes which have been held by the court to be unconstitutional because they interfere with the exclusive power of Congress to regulate interstate commerce, and thereby what constitutes, in part, the commerce over which such power extends. In *Hall v. DeCuir*, 95 U. S. 485, 24 L. ed. 547, a statute of the state of Louisiana which attempted to regulate the carriage of passengers upon railroads, steamboats, and other public conveyances, and which provided that no regulation of any companies engaged in that business should make any discrimination on account of race or color, was considered. "The case presented under the statute was that of a person of color, who took passage from New Orleans for Hermitage, both places being within the limits of the state of Louisiana, and was refused accommodations in the general cabin on account of color. In regard to this the court declared that, for the purposes of this case, we must treat the Act of Louisiana of February 23, 1869, as requiring those engaged in interstate commerce to give all persons traveling in that state, upon public conveyances employed in such business, equal rights and privileges in all parts of the conveyance, without distinction or discrimination on account of race or color."

We have nothing whatever to do with it as a regulation of internal commerce, or as affecting anything else than commerce among the states." And, speaking in reference to the right of the states, in certain classes of interstate commerce, to pass laws regulating them, the court said: "The line which separates the powers of the states from this exclusive power of Congress is not al-

ways distinctly marked, and oftentimes it is not easy to determine on which side a particular case belongs. . . . But we think it may safely be said that state legislation which seeks to impose a direct burden upon interstate commerce, or to interfere directly with its freedom, does encroach upon the exclusive power of Congress. The statute now under consideration, in our opinion, occupies that position. It does not act upon the business through the local instruments to be employed after coming within the state, but directly upon the business as it comes into the state from without, or goes out from within. While it purports only to control the carrier when engaged within the state, it must necessarily influence his conduct to some extent in the management of his business throughout his entire voyage."

In *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 80 L. ed. 604, the taxing district of Shelby county, Tenn., which includes the city of Memphis, acting under the authority of a statute of that state attempted to impose a license tax upon a drummer for soliciting, within that district, the sale of goods for a firm in Cincinnati, which he represented; but the court decided that such a soliciting of business constituted a part of interstate commerce, and that the statute of Tennessee imposing a tax upon such business was in conflict with the commerce clause of the Constitution of the United States, and was therefore void.

In *McCall v. California*, 136 U. S. 104, 34 L. ed. 392, the plaintiff in error was convicted of violating an order of the city and county of San Francisco, in the state of California, which made it a misdemeanor for any one to act as an agent of a railroad company without having first paid the sum of \$35 as a license fee. He was an agent in said city and county for the New York, Lake Erie & Western Railroad Company, a corporation having its principal place of business in the city of Chicago, and which operated a continuous line of road between Chicago and New York. As such agent his duties consisted in soliciting passenger traffic in that city and county over the road he represented. He did not sell tickets for his company; neither did he receive nor pay out money on account of it. His sole offense consisted in soliciting passengers to go over his company's road, without having paid the license tax imposed upon him by said order as a condition precedent to his right to act as such agent in said county. The court held that the license fee as to such agency was a tax upon interstate commerce, and in that respect was unconstitutional. The court, speaking of the agency and tax, said: "The object and effect of his soliciting agency were to swell the volume of the business of the road. It was one of the means by which the company sought to increase, and doubtless did increase, its interstate passenger traffic. It was not incidentally or remotely connected with the business of the road, but was a direct method of increasing that business. The tax upon it, therefore, was, according to the principles established by the decisions of this court, a tax upon a

means or an occupation of carrying on interstate commerce, pure and simple."

In this case the contract between the corporation and Julian, and the bond sued on, were executed in this state, and were business transacted in Arkansas. But no sales or indebtedness were created by them. The contract was only an agreement to sell, and the bond was a condition upon which the corporation agreed to sell and a means adopted to secure the indebtedness to be contracted by sales, and both constituted a contract. They were made a foundation of a future trade between a corporation of one state and a citizen of another, and were a direct method devised to increase the business of the former, and, as to them, served as a basis of interstate commerce. Relying on them, the corporation sold the machines and other property, and shipped them from the state of Ohio, its place of manufacture and business, to Julian, in Arkansas; the place of sales being in Ohio. Until they ceased, according to their terms or by agreement of the parties to be of any force, they were an inducement to, and entered into, every sale, and formed a part of it. According to the principles firmly established by numerous decisions of the Supreme Court of the United States, they (the bond and contract) and the sales and shipment of the machinery and other property, were a part of the interstate commerce of the United States, which Congress has the exclusive right to regulate, and were and could not be affected by the Act of April 4, 1887.

Judgment affirmed.

Cockrill, Ch. J., dissenting:

A corporation created under the laws of one state has no right to recognition in another state. It is a privilege to be enjoyed only through comity. Having the absolute power of excluding it from its jurisdiction, the state may, of course, impose such conditions upon the privilege of doing business in its limits as it may think expedient. This doctrine went without qualification for more than three fourths of a century after the adoption of the Constitution of the United States, when the Supreme Court of the United States ingrafted upon it an exception in favor of foreign corporations which were agencies of commerce. The exception was first adverted to in *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357. But that was confessedly *obiter*, and established nothing. It has been said by judges delivering the opinions of the court that the exception was first established in *Pennacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708, in 1877. See *Horn Silver Min. Co. v. New York*, 143 U. S. 805, 314, 86 L. ed. 164, 167; *Pembina Consol. S. Min. & M. Co. v. Pennsylvania*, 125 U. S. 181, 185, 31 L. ed. 650, 652. But Chief Justice Waite, who delivered the opinion in that case, seems not to have been aware that he was deciding the question, for, after quoting the *obiter* in *Paul v. Virginia* above mentioned, he says, "the questions thus suggested need not be considered now," and gives as a reason for it the fact that the court had

placed the invalidity of the state statute under consideration upon the ground that it conflicted with the legislation of Congress. The question has since been adjudicated in several cases. I am aware of no case in which it has been ruled that the exception applies to a foreign corporation which is not itself an agency of commerce. There are *dicta* which may go further, but there are also expressions of the courts so pointed as to indicate that the exception is limited to such corporations as are agencies of commerce,—as carriers of freight, passengers, or communications. Thus, in *Pembina Consol. S. Min. & M. Co. v. Pennsylvania*, *supra*, Judge Field, who first gave expression to the exception, in speaking of the case of *Pensacola Teleg. Co. v. Western U. Teleg. Co.* *supra*, said it was there held that the telegraph, as an agency of commerce and intercommunication, came under the controlling power of Congress and could not be excluded by a state from transacting its business within its limits. And again, in the same case, he says the exception extends only to a foreign corporation in the employ of the Federal government, "or where its business is strictly commerce." The same language is quoted with approval through Judge Lamar in *McCall v. California*, 136 U. S. 112, 34 L. ed. 398. In *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649, Judge Bradley, after saying that a state could not restrict the right of a foreign corporation where "the principal object of its organization" was "the business of carrying on interstate commerce," said: "The case is entirely different from that of . . . manufacturing corporations, and all other corporations whose business is of a local and domestic nature."

Conceding that the extreme doctrine of *Robbins v. Shelby County Tax Dist.* 120 U. S. 489, 30 L. ed. 694, must be extended to foreign corporations, the conclusion does not follow that such a corporation, engaged in interstate trade,—as selling merchandise,—can gain a domicile in a state in violation of its statutes, merely to gain a vantage ground for the sale of its goods. A manufacturing corporation is connected with commerce, for if it cannot sell, its output is worthless. Many manufacturing corporations would suspend operations if their sales were limited to the state creating them. They are, then, in a measure connected with interstate commerce. But the business connection with commerce must be direct in order to work an inhibition of state action. It is not sufficient that the business is remotely or incidentally connected with interstate or foreign commerce. State legislation which operates upon natural persons and corporate agencies of commerce is not invalidated by the commerce clause of the Constitution, unless it directly affects commerce. *Sherlock v. Alling*, 98 U. S. 99, 102, 23 L. ed. 819, 820; *Smith v. Alabama*, 124 U. S. 474, 31 L. ed. 511. The rule as to corporate business cannot be more rigid against the state's right of regulation or prohibition. In *Pembina Consol. S. Min. & M. Co. v. Pennsylvania*, *supra*, state legislation was upheld restricting the privilege of a foreign mining company from maintain-

ing an office in Pennsylvania notwithstanding the maintenance of the office in that state afforded the corporation the opportunity for the sale of its foreign products. So in *Horn Silver Min. Co. v. New York*, 143 U. S. 905, 36 L. ed. 164.

Following the decisions of the Supreme Court of the United States, the only question in this case open to serious consideration, in my judgment, is, Did the White Sewing Machine Company do business in this state? Or, to put the question as Judge Field does in the case of *Horn Silver Min. Co. v. New York*, *supra*, Did the company do business as a corporation in this state? If so, it must submit to any condition the state sees fit to impose upon it. Any other rule would bind the hands of the state authorities, only to subject the public to all the corporate abuses now known or hereafter to be devised. The statement of such a doctrine is startling. This case does not stand upon a single casual transaction in Arkansas followed by contracts for sales of merchandise which were consummated in Ohio. Nor was the contract which the corporation entered into with Julian, for whom the appellant was surety, simply an agreement to sell merchandise. If those were the only facts in the case, it might be gravely doubted whether the corporation had done business in Arkansas, within the meaning of our Constitution and statute. It has been ruled by the Supreme Court of the United States that a foreign corporation does not, by doing a single act of business in one state, with no purpose of doing other acts there, come within the prohibition of a constitution and statute which are substantially like our own. *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 727, 28 L. ed. 1187. See *Scruggs v. Scottish-American Mortg. Co.* 54 Ark. 566. And a merchant in Ohio who fills orders for merchandise received from a customer in Arkansas, cannot be said to be doing business in the latter state. If neither one nor the other constitutes carrying on business in Arkansas, it is difficult to see how the two together could make out the case. If they do not no question under the commerce clause of the Constitution is presented, and the discussion of it by the court is *obiter*. But the record shows the following state of facts in this case: The White Sewing Machine Company, an Ohio corporation, maintained a resident agent at Little Rock, in this state. The proof does not show that the agent held or sold any machines or other merchandise for the company. He traveled over the state, and in the name of the company sold to individuals the exclusive right to vend its merchandise in a limited territory. The consideration for this exclusive privilege was a contract on the part of the vendee, binding himself to sell no other sewing machine, and to canvass the territory assigned to him in the interest of the White machine. The company also bound itself to sell the vendee White sewing machines upon terms fixed by the contract. As a part of this contract, the vendee was also required to enter into bond to the company, with a surety, for the faithful payment of whatever indebtedness might be incurred by them to the corporation under

the contract named, or by any other means, whether the same should arise out of the purchase and sale or lease of sewing machines, or the consignment of property or merchandise, or the failure to redeliver or account for the same to the corporation, or for indebtedness arising in any manner whatever. A great number of such contracts were entered into before the corporation complied with the statute. After the one in suit was executed, the corporation complied with the law by filing a certificate designating the agent before mentioned as the person upon whom service might be had, and Little Rock as its principal place of business in Arkansas. The business continued as before. Julian signed one of these contracts and bond, with the appellant as surety, and purchased machines, as set out in my brother Battle's opinion. The suit is to recover upon the bond thus executed. I understand that it is upon the uncontroverted facts above stated that the court concludes that the corporation carried on business in Arkansas. The ruling that it carried on business, within the meaning of the statute, is expressly announced. The evidence does not show simply the case of a drummer soliciting contracts for purchase of merchandise, to be consummated in Ohio, as was the case of *Robbins v. Shelby County Tax. Dist.* 120 U. S. 489, 30 L. ed. 694. It shows that the intention of the foreign corporation to gain a domicile in Arkansas, and to carry on its business of selling, leasing, and consigning machines there through local agents, as it was authorized to do in the state of Ohio. To ascertain whether the corporation did business in Arkansas, we are not required to limit our inquiry to the transaction with which the defendant alone is concerned. If it was carrying on a business in Arkansas before and after the transaction with the defendant, it was competent for him to show that his transaction was of the general class; and when it is proved that the corporation has done acts here manifesting the intent to gain a domicile for the purpose of transacting its business, that is the beginning of its business here, and the contracts which manifest that intention are avoided by the statute. The instant the business is entered upon, the prohibition of the statute attaches, without waiting to see what the corporation will do next. Suppose the corporation had entered into a contract to hire an office in Arkansas, with the avowed purpose of establishing a domicile here. That would be sufficient proof of the beginning of business here, and, as the statute prohibits it from beginning business here until it complies with the law, it could not enforce the contract. The fact that the transaction in suit, if isolated from the others, would show one connected transaction of interstate commerce, and nothing more, will not take the case out of the statute, for when it is once established that the corporation is exercising its functions in a foreign state, as distinguished from the performance of mere commercial acts to be consummated in another state, it becomes subject to state regulation. *Horn Silver Min. Co. v. New York, supra*; *Baker v. State*, 44 Ark. 134. That the acts of the corporation in this case

are not mere commercial transactions of the character indicated, seems apparent. The sales by the corporation of exclusive territory within which the vendees might sell White sewing machines, and the covenant on their part that they would sell none other, are contracts executed and to be performed in Arkansas, and, if connected with interstate commerce, it is remotely. The terms of the contracts show that they relate not only to domestic commerce, but to transactions having no connection with commerce at all; and the contract of suretyship, like the contract of insurance and indemnity, is not the subject of commerce. These matters were not transactions of interstate commerce, but were business transacted in the state independently of commerce. According to the decisions above cited, they rendered the corporation amenable to state regulation.

The defendant's cause might be rested here, but I think it may be fortified still further. If the foreign corporation were strictly an agency of commerce, entering the state for the purpose of carrying on the business of interstate commerce, I think it should be held that the regulation is not a restriction upon commerce. What is the regulation? It is that the foreign corporation doing business in this state shall make known its place of business here, and designate the agent upon whom service shall be had. No license fee or tax is demanded of the corporation. Not even a fee for defraying the expenses of the regulation is required. The regulation, then, is nothing more than that the corporation doing business here shall consent to be found here, and shall designate the officer upon whom service shall be had, and where he may be found. In theory the domicile of a corporation is only in the state where it is created, and the general rule, in the absence of legislation, is that it can be found nowhere else. But when it sends its agents into a foreign state to transact its business it is really as much represented by them there as in the state of its creation. It is competent for the legislature of the foreign state to enact that personal service may be had on the corporation by service on agents in its borders who transact the company's business there. The corporation doing business thereafter in the foreign state is presumed to assent to that rule. *American Casualty Ins. Co. v. Lea*, 56 Ark. 539. But it was found often inconvenient for the creditor of the corporation to prove the agency, and so, to make the matter simpler, some of the states enacted that some particular state official should be authorized to receive service for the corporation. That is the law in this state as to insurance companies. As to others, it requires the corporation to designate a person who shall be its agent to receive service. That is fairer to the corporation than to compel it to run the risk of having judgment rendered against it by service on some one of a number of persons transacting business for it, who may not have the interest of the corporation at heart enough to notify it of the pendency of the suit. It is better for the creditor, because he is relieved of doubt as to the proper person upon whom to get serv-

ice. To enforce the regulation, the penalty of avoiding the contract for its violation is imposed. That the regulation is reasonable, and within the power of the state, has never been doubted. *St. Clair v. Cox*, 106 U. S. 350, 27 L. ed. 222; *Cooper Mfg. Co. v. Ferguson*, *supra*. "Legislation in a great variety of ways may affect commerce and persons engaged in it, without constituting a regulation of it within the meaning of the Constitution; and it may be said generally that the legislation of a state, not directly against commerce or any of its regulations, but relating to the rights, duties, and liabilities of citizens, and only indirectly and remotely affecting the operation of commerce, is of obligatory force upon citizens within its territorial jurisdiction whether on land or water, or engaged in commerce, foreign or interstate." *Sherlock v. Alling*, 93 U. S. 99, 23 L. ed. 819; *Nashville, C. & St. L. R. Co. v. Alabama*, 128 U. S. 96, 30 L. ed. 852; *Little Rock & Ft. S. R. Co. v. Hanniford*, 49 Ark. 291. This legislation is not directed against commerce or any of its regulations, but re-

lates only to the right of the citizen to sue in the jurisdiction where the cause of action arises, and imposes upon the corporation only the duty of submitting to that jurisdiction. The domestic corporation is required to show by record where its principal place of business is, and the law specifies that service may be had on its officers. "It does not lie in any foreign corporation to complain that it is subjected to the same law as the domestic corporation." *Horn Silver Min. Co. v. New York*, *supra*. When a state no longer possesses the power to compel every corporation doing business within its jurisdiction, whether exclusively engaged in interstate or foreign commerce or not, to give publicity to its affairs in so simple a matter as making known its officers and place of business there will remain but little of value in its reserved rights. I think the judgment should be reversed, and the complaint dismissed.

Mansfield, J.:

I concur with the chief justice in dissenting to the grounds stated in his opinion.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF ILLINOIS.

Re Application of the INTERSTATE COMMERCE COMMISSION for an Order upon
W. G. BRIMSON *et al.* to Answer Questions.

The process of a Federal court cannot be exercised in aid of an investigation before the Interstate Commerce Commission as that is an administrative and not a judicial body as a proceeding be-

fore an administrative body is not a "case" or "controversy" within the constitutional powers of the Federal courts.

(December 7, 1892.)

APPPLICATION by the Interstate Commerce Commission to the United States Circuit Court for the Northern District of Illinois for an order to compel the alleged agents of certain railroad companies to produce certain books and papers before the Commission, and answer questions which had been propounded to them. *Application dismissed.*

The facts are stated in the opinion.

Mr. Walter D. Dabney, with *Messrs. Thomas E. Milchrist*, U. S. Dist. Atty., and *John P. Hand*, Asst. Dist. Atty., for the Commission.

Messrs. Lyman Trumbull, *John P. Wilson*, and *James C. Hutchins*, with *Messrs. Williams, Holt & Wheeler*, for the railroad companies, and incidentally for the witnesses:

This investigation is in its nature judicial, and authority to make it could not lawfully be conferred by Congress upon the Interstate Commerce Commission, which is, in its nature, a legislative or administrative, and not a judicial body.

The Federal government is one of delegated and divided powers.

4 INTER S.

When we find in the Federal Constitution the provision "the judicial power of the United States shall be vested in one Supreme Court, and such inferior courts as Congress may, from time to time, ordain and establish," we have the most express limitation upon the right of Congress to place any judicial power in any other body whatsoever.

1 Kent, Com. 804; *United States v. Ferreira*, 54 U. S. 18 How. 52, 14 L. ed. 47, note.

These alleged violations of law are, if anything, crimes, punishable by heavy penalties of fine and imprisonment, and the investigation of the question whether crime has been committed is not a "legitimate governmental (i. e., administrative) purpose."

Cooley, Const. Lim. (5th ed.) 109, 110; *Com. v. Jones*, 10 Bush, 725; *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 87 Fed. Rep. 618; *United States v. Ferreira*, 54 U. S. 18 How. 45, 14 L. ed. 44, and note.

The so-called "visitorial power" of the government can have no application to railroad companies at all.

2 Kent, Com. (18th ed.) 800; *Waterman*,

Corp. 668; *Atty. Gen. v. Utica Ins. Co.* 2 Johns. Ch. 871; *Re Pacific Railway Commission*, 32 Fed. Rep. 251; *Kilbourn v. Thompson*, 108 U. S. 168, 26 L. ed. 877.

Even if Congress could empower the Commission to make this investigation, still it could not empower this court to grant the order applied for; because whether the character of the inquiry is judicial or nonjudicial, the question does not here arise in a case or controversy as required by the Constitution.

Re Pacific Railway Commission, 32 Fed. Rep. 251; citing *Chisholm v. Georgia*, 2 U. S. 2 Dall. 432, 1 L. ed. 445; *Osborn v. Bank of United States*, 22 U. S. 9 Wheat. 745, 6 L. ed. 205; *Smith v. Adams*, 180 U. S. 173, 32 L. ed. 397; *Hayburn's Case*, 2 U. S. 2 Dall. 409, 1 L. ed. 486; *United States v. Todd*, 54 U. S. 13 How. 52, 14 L. ed. 47, note; *United States v. Ferreira*, 54 U. S. 13 How. 45, 14 L. ed. 44; *Re McLean*, 37 Fed. Rep. 648; *Story*, Const. § 1646.

The court will look at the nature of the right, and not merely at the form in which it is asserted, to determine whether there is or is not a "case" for judicial consideration.

Murray v. Hoboken Land & Imp. Co. 59 U. S. 18 How. 282, 15 L. ed. 876; *United States v. Ferreira*, 54 U. S. 13 How. 45, 14 L. ed. 44.

The courts have uniformly and repeatedly refused to recognize as "cases or controversies" questions arising at a preliminary stage before the judicial power is called into exercise, or subject to revision by another department after the courts have done with them.

United States v. Ritchie, 53 U. S. 17 How. 525, 15 L. ed. 236; *Hayburn's Case*, and *United States v. Ferreira*, *supra*; *Re Election Suprs.* 114 Mass. 247.

Gresham, Circuit Judge, delivered the opinion of the court:

June 18, 1892, the Interstate Commerce Commission made an order at Washington, requiring the Calumet & Blue Island Railway Company, the Joliet & Blue Island Railway Company, the Chicago & Southeastern Railway Company, the Chicago & Kenosha Railway Company, and the Milwaukee, Bay View & Chicago Railway Company, and certain other railway companies, to appear at Chicago on July 18th, to answer an informal complaint, made by unknown persons, charging that the Illinois Steel Company had caused the four first named companies to be organized for the purpose of operating their switches and side tracks at or near Chicago, and engaging in traffic by continuous shipment from places without the state of Illinois to places within that state, in connection with other named carriers, and had caused the last named company to be organized for the like purpose in Wisconsin; that the steel company owned the five companies, and for six months had operated them, in connection with other named railroad companies, as a convenient device for evading the provisions of the Interstate Commerce Act, and obtaining unjust preferences and illegal rates on interstate business. The five companies were particularly required to answer the following questions under oath:

"(1) Does any traffic contract, agreement or arrangement, in writing or otherwise, exist be-

tween the companies above alleged to be under the control and operated by said Illinois Steel Company and any of the other companies with reference to interstate traffic? If so, state contract, agreement or arrangement.

"(2) Are any tariffs of rates and charges for the transportation of interstate property in effect between said companies above alleged to be under the control of and operated by said Illinois Steel Company and said other railroad companies? If so, what are they, and what are the divisions thereof between the several carriers?

"(3) Have the companies alleged to be under the control of and operated by the Illinois Steel Company received interstate traffic from any of the other carriers above mentioned during the six months last past, or have they delivered any of said traffic to such other carriers during that time for any person, firm or company other than the Illinois Steel Company? and, if so, to what extent?"

The commission met at the time and place appointed, and the companies alleged to be owned and controlled by the steel company, except the Calumet & Blue Island, appeared, and in writing, under oath, answered the three questions in the negative, and denied that during the six months previous to the entry of the order for the investigation they had engaged in interstate commerce. The other company, the Calumet & Blue Island, filed a verified answer, averring that it had not engaged in interstate traffic for six months before the filing of the alleged complaint; that no traffic agreement or arrangement existed between it and any of the alleged connecting companies; that no schedule of charges for the transportation of property from one state to another state was in effect between it and other connecting roads other than this; that on June 13, 1892, it united with the Pennsylvania Railroad Company in a tariff of \$2.75 per net ton on car lots of coal from points on the Southwestern Pennsylvania Railroad and the Youghiogheny Northern Railroad to Joliet, by way of Chicago, of which it received 40 cents per net ton, that amount having long been the proportion of the through rate allowed to other carriers for the same haul between Chicago and Joliet; that on July 6, 1892, it entered into a similar contract with the Lake Shore & Michigan Southern Railway Company and the Pittsburgh & Lake Erie Railway Company. The answer denied that the company's road was operated as a device to evade the provisions of the Act; denied that its operation resulted in giving the steel company illegal rates, or in affording it any kind of advantage or preference; and denied that it had neglected to file with the commission copies of any agreements or tariffs as required by the Act.

Certain officers of the five railroad companies and an officer of the steel company appeared before the commission as witnesses in obedience to its subpoena, and, having failed to elicit any facts from them which materially tended to support the charge of unlawful discrimination in favor of the latter company, the commission demanded the stock books of the steel company and the stock books of the five railroad companies for inspection, and in that connection inquired of the witnesses whether

they knew who owned the five companies, and especially whether the steel company owned them, or a majority of their stock. On the advice of counsel, the witnesses refused to produce the books or answer the questions, and the commission applied to this court for an order to compel them to do both.

The application is based upon the 12th section of the Act, which declares that the commission shall have authority to inquire into the management and business of all carriers engaged in commerce between the states; that it shall keep itself informed as to the manner and method in which such business is conducted, and have the right to obtain from such carriers full and complete information necessary to enable it to perform its duties and accomplish the objects for which it was created; that it shall execute and enforce the provisions of the Act; that upon its request it shall be the duty of any district attorney of the United States to institute in the proper court, and prosecute under the direction of the attorney general, all necessary proceedings for the enforcement of the Act and for the punishment of all violations thereof; that it shall have power to require by subpoena the attendance and testimony of witnesses and the production of all books, papers, tariffs, contracts, agreements and documents relating to any matter under investigation from any place in the United States at any designated place of hearing. The section further declares that, "in case of disobedience to a subpoena, the commission, or any party to a proceeding before the commission, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents, under the provisions of this section. And any of the circuit courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any common carrier subject to the provisions of this Act, or other person, issue an order requiring such carrier or other person to appear before said commission (and produce books and papers, if so ordered) and give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof."

The Interstate Commerce Commission is an administrative, and not a judicial, body (*Kentucky Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 299, 87 Fed. Rep. 612) and the important question for decision is, can the process of this court be exercised in aid of an investigation before such a tribunal? The jurisdiction of the courts of the United States is limited, and it is not competent for Congress to confer upon them authority which is not strictly judicial, and clearly within the grant found in the 3d article of the Constitution. The first section of that article declares that the judicial power of the United States shall be vested in one supreme court and such inferior courts as Congress may from time to time establish; and the second section declares that the judicial power shall extend to all cases in law and equity arising under the Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority, to all cases affect-

ing ambassadors, other public ministers and consuls, to all cases of admiralty and maritime jurisdiction, to controversies to which the United States shall be a party, etc. This grant of power was discussed in *Osborne v. Bank of United States*, 22 U. S. 9 Wheat. 788, 6 L. ed. 204, and in delivering the opinion of the court Chief Justice Marshall said:

"This clause enables the judicial department to receive jurisdiction to the full extent of the Constitution, laws, and treaties of the United States, when any question respecting them shall assume such a form that the judicial power is capable of acting upon it. That power is capable of acting only when the subject is submitted to it by a party who asserts his rights in the form prescribed by law. It then becomes a case."

In *Smith v. Adams*, 130 U. S. 167, 32 L. ed. 895, this section was again considered, and in interpreting it the court said:

"By those terms are intended the claims or contentions of litigants brought before the courts for adjudication by regular proceedings established for the protection or enforcement of rights, or the prevention, redress, or punishment of wrongs. Whenever the claim or contention of a party takes such a form that the judicial power is capable of acting upon it, then it has become a case or controversy."

"The functions of the judges of the courts of the United States," said Judge Story, "are strictly and exclusively judicial. They cannot, therefore, be called upon to advise the president in any interpretation of law, or act as commissioners in case of pensions or other like proceedings." 2 Story, Const. § 1777.

The application of an administrative body (and we are now considering such an application) to a judicial tribunal for the exercise of its functions in aid of the execution of non-judicial duties does not make a "case" or "controversy" upon which the judicial power can be brought to bear. It is not a contention between litigants, "brought before a court by regular proceedings for the protection or enforcement of rights, or the prevention, redress, or punishment of wrongs." The commission was engaged in investigating charges of unlawful discrimination against certain railroad companies, and this court is simply asked to aid that body in obtaining evidence which, it is claimed, will tend to support the charges. The subject of the inquiry is not brought here for adjudication, and this court can exercise no discretion beyond deciding whether the evidence demanded is pertinent to the charges, and within the general scope of the 12th section. Congress cannot make the judicial department the mere adjunct or instrument of either of the other departments of government. *Hayburn's Case*, 2 U. S. 2 Dall. 409, 1 L. ed. 436; *United States v. Ferreira*, 54 U. S. 18 How. 45, 14 L. ed. 44; *Re McLean*, 37 Fed. Rep. 648.

By an Act of Congress passed in 1887 the president was authorized to appoint three commissioners to examine the books, papers, and method of business of all railroad companies which had received aid from the United States, for the purpose of ascertaining whether they had observed the obligations imposed upon them by law. The Act gave the commissioners power to require the attendance and testimony

of witnesses and the production of books, papers, and documents relating to any matter under investigation. It also provided "that any of the circuit or district courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any person, issue an order requiring any such person to appear before said commissioners, or either of them, as the case may be, and to produce books and papers, if so ordered, and give evidence touching the matter in question; and any failure to obey such order of the court may be punished by said court as a contempt thereof." Three commissioners were accordingly appointed, and they cited before them Leland Stanford, president of the Central Pacific Railroad Company, one of the corporations which had received government aid, and propounded questions to him touching the administration of the affairs of his company, and the alleged dishonest disbursement of some of its moneys, which he refused to answer. He was also required to produce the books of his company, which he declined to do. The Circuit Court for the Northern District of California was thereupon applied to for an order upon Stanford, to show cause why he should not be required to comply with the demands of the commissioners. *Mr. Justice Field, Judge Sawyer, and Judge Sabin* constituted the court which heard the motion, and they concurred in holding that it was not a case or controversy within the meaning of the Constitution, and that the Act under which the commissioners were appointed was unauthorized and void. In a carefully prepared opinion on the motion, *Mr. Justice Field* said:

"The court is made the ministerial agent of the commission to perform its behests whenever a witness refuses to respond to a question or produce papers within the range of the authority attempted to be given by the statute. The judicial department of government is simply made, by this Act, an adjunct to the legislative department in the exercise of its political and legislative functions and powers, to execute its demands, and that, too, in a matter into which Congress, under the decision cited, has no jurisdiction whatever to inquire. I know of no power in Congress to thus render the judicial department subordinate or auxiliary to the legislative and executive departments of the government, or to either of them. If there is any one proposition immutably established I had supposed it to be that the judiciary de-

partment is absolutely independent of the other departments of the government, and that it cannot be called upon to act a part subordinate to any other department of the government." *Re Pacific Railway Comrs.* 82 Fed. Rep. 351.

Undoubtedly Congress may confer upon a nonjudicial body authority to obtain information necessary for legitimate governmental purposes, and make refusal to appear and testify before it touching matters pertinent to any authorized inquiry an offense punishable by the courts, subject, however, to the privilege of witness to refuse to make disclosure which might tend to criminate them, or subject them to penalties or forfeitures. A prosecution or an action for violation of such a statute would clearly be an original suit or controversy between parties within the meaning of the Constitution, and not a mere application, like the present one, for the exercise of the judicial power in aid of a nonjudicial body. So much of section 12 as authorizes or requires the courts to use their process in aid of inquiries before the Interstate Commerce Commission is unconstitutional and void, and the application is dismissed.

In *Re* INTERSTATE COMMERCE COMMISSION.

Similar application to that made in the foregoing case for an order to compel Summer Hopkins and Henry Walker to answer certain questions. *Dismissed.*

The same counsel appeared for the commission as in the preceding case.

Messrs. Rogers, Locke & Milburn for Hopkins and Walker.

Gresham, Circuit Judge:

The commission of its own motion, instituted an inquiry to ascertain whether certain railroad companies engaged in the transportation of passengers and property from Chicago to eastern seaboard points had violated the provisions of the Commerce Act. The inquiry seems to have been chiefly directed against the Wabash Company, and the questions which Summer Hopkins and Henry Walker refused to answer relate to the business and management of that company. The application for an order to compel those witnesses to testify before the commission as demanded is dismissed for the reasons given in disposing of the application for a similar order against W. G. Brimson and others. 58 Fed. Rep. 476.

INTERSTATE COMMERCE COMMISSION.

THE TECUMSEH CELERY COMPANY

v.

THE CINCINNATI, JACKSON & MACKINAW RAILWAY COMPANY and The WABASH RAILROAD COMPANY.

1. When a carrier fails to answer a complaint filed under section 18 of the Act to Regulate Commerce, the Commission will take such proof of the facts as may be deemed proper
2. For that portion of its line over which the

4 INTER 8.

Western Classification is in force the Wash road should class celery with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and other vegetables enumerated in Class C of that Classification, rather than with berries, peaches, grapes, and other fruits specified in Class III. thereof, and the defendants should transport celery from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity

of any of said other vegetables named in Class C aforesaid; and mixed carloads of celery and cauliflower or other vegetables specified in said Class C of the Western Classification should be transported by defendants from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity of either of said vegetable articles embraced in that class.

Complaint filed February 1, 1892.—Answer of Cincinnati, Jackson & Mackinaw Railway Company filed February 23, 1892.—Depositions in behalf of complainant filed May 6, 1892.—Statement of facts filed by complainant May 16, 1892.—Hearing at Detroit, Michigan, May 2, 1893.—Decided June 15, 1893.

CLASSIFICATION of Celery.

Mr. W. C. Burridge for complainant.

Messrs. Swayne, Swayne & Hayes for Cincinnati, Jackson & Mackinaw Railway Company.

REPORT AND OPINION OF THE COMMISSION.

Veasey, Commissioner:

The petition in this case is as follows:

"I. That the complainant is a company incorporated under the laws of the state of Michigan, and has, since about the month of August, 1887, been engaged in growing vegetables near the town of Tecumseh in said state, and shipping the same over the railroads of the defendants and other carriers for sale in various markets.

"II. That the defendants above-named are common carriers and under a common control, management, or arrangement for continuous carriage or shipment, are engaged in the transportation of property wholly by railroad between Tecumseh, in the state of Michigan, and Kansas City, in the state of Missouri, and as such common carriers are subject to the Act to Regulate Commerce.

"III. That the rate of fifty-one cents per hundred pounds now charged by defendants to the complainant for the transportation of celery in carload lots of not less than twenty thousand pounds, released, from Tecumseh, Michigan, to Kansas City, Missouri, is unjust and unreasonable, in violation of the Act to Regulate Commerce.

"IV. That defendants by charging more for the transportation of celery in carloads from Tecumseh, aforesaid, to Kansas City, aforesaid, than they charge for the transportation in carloads of cauliflower and other vegetables, similar to celery in bulk, weight, and value, unjustly discriminate against complainant and subject it to undue and unreason-

able prejudice and disadvantage in violation of the Act to Regulate Commerce.

"V. That defendants by refusing to transport celery and other vegetables, of similar bulk and value, together in what is known as mixed carload lots from Tecumseh aforesaid to Kansas City aforesaid, at the higher carload rate and minimum carload weight specified for celery, and by insisting upon charging the carload rate on minimum carload weight of twenty thousand pounds of celery when only, for example, seventeen thousand pounds thereof is loaded in a car, and also insisting upon charging the less than carload rates upon, for example, three thousand pounds of cauliflower loaded in the same car, exact an unlawful and unjust charge for such mixed carloads, unjustly discriminate against complainant and subject it to undue and unreasonable prejudice and disadvantage, in violation of the Act to Regulate Commerce.

"By way of specification under the foregoing allegations the complainant avers and sets forth that the transportation of celery in carloads over defendants' lines from Tecumseh, aforesaid, to Kansas City, aforesaid, is conducted under two classifications and a combination rate, namely, Official Classification, Class IV., nineteen cents per hundred pounds, Tecumseh to St. Louis or Hannibal, distance about four hundred and forty miles; and Western Classification, Class III., thirty-two cents per hundred pounds, St. Louis or Hannibal to Kansas City. That shipments are made released; and the form of release in use is as per

copy thereof attached hereto, and marked Exhibit A. That the commodity is loaded in refrigerator cars employed by defendant in the transportation of dressed beef and similar traffic from Kansas City to eastern points, and complainant's celery furnishes return loads for these cars, which they would not have if the traffic were carried in other cars or shipped to points in other directions. That the cost of refrigeration is not included in the rate charged, but on the contrary, the ice used for refrigerating purposes, when complainant's celery is transported in such cars, is furnished by complainant, and the cost thereof is a charge upon the transportation in addition to the rate which is complained of as unlawful. That the rate on celery between the points mentioned was twenty-five cents per hundred pounds in 1887, and complainant's business was established and built up during the time it continued in force. That in or about the month of September, 1889, the rate on celery from Mississippi river points to Kansas City, was raised by a change in the Western Classification, and that commodity was taken out of Class C, which embraces cauliflower and many other vegetables, and placed in Class III. of said Western Classification. That the market price of celery had declined before the increase in rate and has since that time further declined. That celery comes in competition in the Kansas City market with celery shipped by various methods from several localities, and it also competes for sale in that and other markets of the World with other vegetables, such as cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and the finer kinds of vegetables generally, which in value equal or exceed the value of celery. That Class III. of said Western Classification, in which celery is now placed, also includes berries, peaches, grapes, and green fruits, with which celery cannot successfully compete for sale to the average consumer. That the sale of the complainant's celery is injuriously affected by the defendants' excessive rate to Kansas City as compared with their lower charges on such competitive vegetable articles. That to be reasonable the rate on celery in carloads should not exceed the rate charged on other vegetables with which it competes for sale and which are embraced in Class C of said Western Classification. That complainant while complaining of the whole rate of fifty-one cents per hundred pounds as unreasonable, desires to call particular attention to the fact that it is so mainly because of the greatly disproportionate charge for the haul to Kansas City from points on the Mississippi river. That under the Official Classification mixed carloads of commodities differently classed may be shipped at the carload rate and minimum weight per carload specified for the article belonging to the highest class,

4 INTER 8.

but this is not allowed by the Western Classification. Complainant makes no claim for any reparation to which it may be entitled by reason of injuries sustained under the unlawful rate aforesaid.

"The complainant prays that the defendants may be required to answer the charges herein, and that after due hearing and investigation an order be made commanding the defendants to cease and desist from said violations of the Act to Regulate Commerce, and for such other and further order as the Commission may deem necessary in the premises."

The defendant, the Cincinnati, Jackson & Mackinaw Railway admits that its road and that of its co-defendant, the Wabash Railroad Company, forms a line of railroad from Tecumseh, Michigan, *via* Britton, Michigan, to Kansas City, Missouri, for the transportation of freight, and also admits that the rates are as set out in the complaint. The answer of this defendant also avers that the rates from Tecumseh to East St. Louis, of which no complaint is made, and which alone are pro-ratable, are uniform, reasonable and just; that the rates charged from East St. Louis to Kansas City, which form the basis for the complaint are promulgated and exacted by the different railroads comprising the Western Freight Association, over which the Cincinnati, Jackson & Mackinaw Railway has no control, and for which it should not be held responsible; that the claim of petitioner, that the celery is loaded in refrigerator cars employed by the defendants in the transportation of dressed beef and similar traffic from Kansas city to eastern points, and that complainant's celery furnishes return loads for these cars is not applicable, so far as this defendant is interested, as this defendant has been compelled to haul the empty cars to Tecumseh for loading, from its junction with the Wabash Railroad.

Practically no defense has been made to the complaint in this case. The complaint expressly disclaims any attack upon the rates charged to the Mississippi river, and the Cincinnati, Jackson & Mackinaw Railway Company, which delivers the traffic to the Wabash at Britton, only six miles from Tecumseh, is a necessary party merely on account of being one of the connecting carriers in the through line over which the traffic must pass. The burden of defending the rates complained of was therefore upon the Wabash Railroad Company, which has failed to answer or take any part in the proceeding.

Rule XI. of the Rules of Practice before the Commission, provides in the second paragraph that "in case of failure to answer, the Commission will take such proof of the facts as may be deemed proper and reasonable, and make such order thereon as the circumstances of the case appear to require." On

April 19, 1892, complainant took the testimony of P. W. A. Fitzsimmons, C. M. Woodward, and E. J. Hollister by deposition, having theretofore duly mailed reasonable notice thereof to each of the defendant corporations. Neither of the defendants participated in the taking of such depositions, nor was either of them represented at the hearing before the Commission in Detroit on May 2d, 1898, although due and timely notice of such hearing was given. At the hearing in Detroit, the complainant was represented by counsel and its manager, Mr. E. J. Hollister, the depositions above referred to were read and put in evidence, and Mr. Hollister was also sworn and examined.

This traffic from Tecumseh for Kansas City, Missouri, is taken in Wabash cars to East St. Louis, Illinois, under the Official Classification and joint through rate of the defendant carriers, and from East St. Louis the carriage is continued in the same cars to Kansas City under the Western Classification and the tariff rate of the Wabash road, but the carriage is continuous and there is but one through shipment and one through charge from Tecumseh to the point of destination. The carload rate from Tecumseh, Mich., to East St. Louis, Ill., on Celery, Cauliflower, Asparagus, String Beans, Green Peas, Lettuce, Oyster Plant, Egg Plant, etc., in either straight or mixed carloads is the same, 19 cents per 100 lbs. From East St. Louis to Kansas City, the above articles, *except celery*, take the Class C rate of 15 cents per 100 lbs. in either straight or mixed carloads, while celery, in straight carloads only, is charged the Class 8 rate of 32 cents per 100 lbs. The through rate from Tecumseh to Kansas City on celery in carloads is 51 cents per 100 lbs.; and that on the other articles mentioned, in either straight or

mixed carloads, is 84 cents per 100 lbs.; and the difference is wholly caused by the higher classification of celery in the Western Classification, which is applied by the Wabash to that portion of its line extending from East St. Louis to Kansas City. It is matter of general knowledge that during recent years, and especially since the change in classification mentioned in the complaint, celery has come into much more common use. Its production has greatly increased and its market value has declined. It certainly is no more a table luxury than some of the vegetables which have a lower class in the Western Classification. As varied or qualified by the foregoing, the facts stated in the petition are found to be true, and we hold that the complainant is entitled to the relief claimed.

For that portion of its line over which the Western Classification is in force the Wabash road should class celery with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and other vegetables enumerated in Class C of that Classification, rather than with berries, peaches, grapes, and other fruits specified in Class III. thereof, and the defendants should transport celery from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity of any of said other vegetables named in Class C aforesaid; and mixed carloads of celery and cauliflower or other vegetables specified in said Class C of the Western Classification should be transported by defendants from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity of either of said vegetable articles embraced in that class. Order will be entered accordingly.

GEORGE RICE

v.

THE ST. LOUIS SOUTHWESTERN RAILWAY COMPANY and THE ST. LOUIS SOUTHWESTERN RAILWAY COMPANY OF TEXAS.

GEORGE RICE

v.

THE BALTIMORE & OHIO SOUTHWESTERN RAILROAD COMPANY and THE COLUMBUS, HOCKING VALLEY & TOLEDO RAILWAY COMPANY.

Some of the grievances alleged in the complaint were subsequently removed by defendants as a result of the Commission's order in other cases. The other charges were denied by the defendants in their verified answers, and that denial was fortified by the positive testimony of witnesses. The

petitioner did not appear at the hearing, though duly notified thereof, and offered no proof in support of the information and belief upon which his allegations were made. Held, that as to these charges the complaint must be dismissed.

Complaints filed November 5, 1891.—Answers filed November 23, 1891, to January 2, 1892.—Heard and Submitted at Washington, D. C., March 28, 1893.—Decided May 18, 1893.

CLASSIFICATION of Eggs. See complaint 3 Inters. Com. Rep. 724.

Mr. Roger W. Cull, for St. Louis Southwestern R. Co. and St. Louis Southwestern R. Co. of Texas.

Mr. E. W. Strong, for Baltimore & Ohio S. W. R. Co. and Columbus, Hocking Valley & Toledo R. Co.

REPORT AND OPINION OF THE COMMISSION.

Knapp, Commissioner:

The complaints in these cases are directed against different lines of railway carriers, but are otherwise substantially alike. They were investigated together and may be properly disposed of in one report.

The rates and practices alleged by the petitioner to be unlawful relate to the transportation of refined oil and other products of petroleum from Marietta, Ohio, to various points in other states reached by the defendant lines. He asserts that these rates and practices discriminate against him, as a shipper of these commodities in barrels, in favor of certain tank shippers which belong to or are affiliated with what is called "The Standard Oil Trust." Three grounds of complaint are stated.

1. That in fixing the basis of transportation charges on petroleum products, the defendants allow an arbitrary deduction of 43 gallons from the shell capacity of a tank, while no corresponding allowance is made when these articles are shipped in barrels.

2. That such charges are based on an assumed weight of 6.8 pounds per gallon when shipments are made in tanks, while barrel shipments are carried on an estimated weight of 400 pounds per barrel, which is relatively unjust to the barrel shipper.

3. That certain favored shippers are permitted to stop their cars at stations between the points of shipment and destination and remove a portion of the contents therefrom, thereby in effect securing the lower carload rates on less than carload shipments; that such favored shippers are also permitted to ship their products at through rates, which are proportionately less than local rates, and then stop their cars at intermediate stations and remove a portion of the contents therefrom, thereby in effect securing through rates on shipments essentially local; and that these privileges are denied to the complainant.

The first two of these grievances undoubtedly existed at the time these complaints were filed, for the methods then used by the defendants and other carriers in estimating the weights of petroleum shipments were relatively unjust to barrel shippers. This subject was quite fully considered in a series of proceedings instituted by this complainant, which were decided by the Commission in April, 1892.

4 INTER S

Rice v. Cincinnati, Washington & Baltimore Railroad Co. 3 Inters. Com. Rep. 841, 5 I. C. C. Rep. 193.

After that decision was rendered, the rail carriers generally which engage in the transportation of petroleum products, including these defendants, fixed the minimum tank carload at the shell capacity of the tank in each case, and abandoned the practice of making any deduction therefrom. They also raised the estimated weight of these commodities, when carried in tanks, to 6.4 pounds per gallon, and are now regulating their charges according to that basis. We do not find that the application of this rule for ascertaining the weight of oil shipments in tanks, compared with the estimated weight of 400 pounds per barrel, when the same article is shipped in that form, operates to the prejudice of the barrel shipper. The rates per hundred pounds are the same whether carried in tanks or barrels; no charge is made for tanks but barrels pay the same as their contents. In view of the facts found and conclusions reached in the cases above mentioned, we must regard the subsequent action of the carriers as a substantial compliance with the requirements then made by the Commission in the respects here referred to, and therefore find no occasion for further directions in these proceedings. The question of the free carriage of barrels is not presented by the complaints now under consideration, and is designedly left open for such determination as the facts and circumstances of particular cases may hereafter seem to require.

The third ground of complaint appears to be wholly unfounded. There is no evidence that "favored" shippers have secured carload rates on less than carload shipments, or through rates on local shipments, by being permitted to remove portions of the contents of cars at intermediate stations between the points of shipment and of destination. The verified answers of the defendants explicitly deny that any such discriminations have occurred, and that denial is fortified by the positive testimony of their witnesses. The petitioner did not appear at the hearing, though duly notified thereof, and has offered no proof in support of the information and belief upon which his allegations were made. As to these charges the complaint must be dismissed.

U. S. CIRCUIT COURT SOUTHERN DISTRICT OF CALIFORNIA.

INTERSTATE COMMERCE COMMISSION.

v.
ATCHISON, TOPEKA & SANTA FÉ R. Co. *et al.*

1. Authority from the Interstate Commerce Commission is not necessary, where the circumstances and conditions are substantially different, to enable a carrier lawfully to charge more for a shorter than for a longer distance over the same line, under the Interstate Commerce Act, § 4 (24 Stat. at L. 379) providing that, it shall be unlawful to make such charge for transportation of passengers or like kind of property under substantially similar circumstances and conditions, but that the Commission may, after investigation, authorize a less charge for longer than shorter distances.

2. The provision of the Interstate Commerce Act, that the findings of fact of the Commission shall

be prima facie evidence of the matters therein stated, does not make them conclusive in proceedings before the court to enforce the order of the Commission; but the court must consider all evidence submitted, and base its judgment thereon.

3. Active competition by water and other railroads at a terminal point, for the transportation of certain goods, renders the circumstances and conditions substantially dissimilar, and justifies a railroad company in charging a less rate to former than to the latter point from those affecting an intermediate noncompeting point, when necessary to meet such competition.

April 25, 1892.

PETITION to enforce an order requiring defendants to desist from charging greater rates for a longer than for a shorter haul of freight under substantially similar circumstances. *Dismissed.* See 8 Inters. Com. Rep. 188, 571.

The facts are fully stated in the opinion.

Messrs. M. T. Allen, U. S. Atty., and Harris & Gregg for petitioner.

Messrs. A. Brunson and C. N. Sterry for defendants.

Ross, District Judge, delivered the opinion of the court:

This proceeding was instituted by virtue of the sixteenth section of the Act of Congress entitled "An Act to Regulate Commerce," as amended March 2, 1889 (25 Stat. at L. 855) to enforce an order made by the Interstate Commerce Commission on the 19th day of July, 1890, directing that, from and after September 1, 1890, the defendants, the Atchison, Topeka & Santa Fé Railroad Company, the Atlantic & Pacific Railroad Company, the Burlington & Missouri River Railroad Company, the California Central Railway Company, the California Southern Railroad Company, the Chicago, Kansas & Nebraska Railway Company, the Missouri Pacific Railway Company, and the St. Louis & San Francisco Railway Company, cease and desist from charging or receiving any greater compensation, in the aggregate, for the transportation in carload lots of certain enumerated commodities over their several lines or the routes formed by them, from Kansas City, St. Louis, Detroit, Cincinnati, or New York, or from corresponding points, for the shorter distance to San Bernardino, in the state of California, than for the longer distance over the same line, in the same direction, to Los Angeles, in the state of California. The order of the commission here sought to be enforced was made in a proceeding instituted before that body by a complaint on the part of the San Bernardino

Board of Trade, setting forth that the railroad companies above mentioned were charging and receiving higher rates for each carload of reapers, mowers, harvesters, hay presses, plows, horse rakes, seed drills, corn planters, forks, (hay or manure) hoes, hand rakes, shovels, spades, bags, burlap and gunny, compressed in bales, beer in glasses or stone, packed bottles, wine or beer in bulk, coffee in sacks, crockery, common china and white ware, packed, chairs, common wooden seated, cane seated, perforated, worth not more than nine dollars a dozen, school furniture, iron, bar or rod, fruit and jelly glasses, pumps, steam or hydraulic, sewing machines, soap, Castile, imitation Castile, common balls, and laundry, stoves, ranges, registers, radiators, black iron stove furniture and hollow ware, sugar, buggies and carriages, and farm wagons without springs, from the Missouri river, St. Louis, Chicago, Cincinnati, Detroit, and New York, over the same line, in the same direction, to San Bernardino, than to Los Angeles, San Bernardino being the shorter and Los Angeles the longer distance; thereby giving Los Angeles an unlawful preference over San Bernardino. To this complaint a demurrer was interposed by the Burlington & Missouri River Railroad Company, and answers were filed by the other defendant companies. The Commission held that the complaint was sufficient to put the carriers to proof that the services were rendered under such dissimilar

circumstances as to justify the greater charge for the shorter haul; and, after hearing evidence, found certain facts, which are set out in its report and opinion. Holding that the greater charge for the shorter haul was not justified by the facts found, the order was entered which this court is now asked to enforce.

The petition of the Commission for such enforcement sets forth, among other things, that, subsequent to the filing of the complaint of the San Bernardino Board of Trade before the Commission, the California Central Railway Company and the California Southern Railroad Company were consolidated, and constituted into a new corporation, under and by virtue of the laws of California, called the "Southern California Railway Company," which last mentioned corporation claims to have some interest in the subject-matter of this suit, and accordingly it is also made a defendant herein.

To the petition all of the defendant companies, except the Chicago, Kansas & Nebraska Railway Company, filed an answer, admitting the allegations of the petition respecting the corporate existence of the defendant companies, and the location of their principal places of business; also the consolidation of the California Central Railway Company and the California Southern Railroad Company, forming the Southern California Railway Company; but alleging that, in addition to the California Central Railway Company and the California Southern Railroad Company, the Redondo Beach Railway Company, at the time being a corporation duly incorporated under the laws of California, having its principal place of business in the city of Los Angeles, was duly consolidated with the aforesaid two companies, under the name of Southern California Railway Company; that the Redondo Beach Railway Company, at the time of such consolidation, owned and operated a line of road running from Los Angeles city, and there connecting with the California Central Railway Company, westerly to Redondo Beach, a point immediately upon the shore of the Pacific ocean, which road is now a part of the line owned and operated by the Southern California Railway Company. The defendants, answering, also admit that all of the aforesaid corporations, except the Southern California Railway Company, and its component corporations, were at the times mentioned in the petition, and still are, common carriers, engaged in the transportation of persons and property by their railroads extending through several of the United States, under a common control, management, or arrangement for a continuous carriage, and were then engaged in such business from the Missouri river, St. Louis, Chicago, Cincinnati, Detroit and New York to Barstow, in the county of San Bernardino, state of California. But the defendants, answering, deny that they are interstate common carriers between Barstow and Los Angeles or San Bernardino, and allege that the defendant companies, other than the Southern California Railway Company, carry only from the eastern points named to Barstow, where all goods

and merchandise shipped and hauled by them as common carriers are turned over and delivered to the Southern California Railway Company; that said Southern California Railway Company is a corporation organized and existing under the laws of California, having its principal place of business in the city of Los Angeles, and neither owns nor operates any line of railroad outside of the state of California, and is not subject to the provisions of the Interstate Commerce Act. The answer admits the proceedings before the Interstate Commerce Commission as stated in the petition, but alleges that neither the Redondo Beach Railway Company nor the Southern California Railway Company was a party thereto, and that neither of them had a hearing before the Commission upon any of the matters in question. The defendants, answering further, allege, among other things, as reasons why the order of the Commission should not be enforced, that the true and existing state of facts as to ocean competition existing at the time of the filing of the petition by the San Bernardino Board of Trade, and of the answers of the respective defendants therein, were not fully proven and established before the Commission; but that when the petition was filed, and when those answers were made, and when the hearing thereon was had, there did actually exist such water competition as to take the rates upon freight to Los Angeles out of the operation of the Interstate Commerce Act, and that the carrying and transportation of the freight in question to Los Angeles and San Bernardino was not under substantially similar circumstances and conditions, but was made wholly dissimilar by reason of water competition actually existing; and, further, that, since the making of the order here sought to be enforced, there has grown up and now exists a new, substantial, and continuous competition, by ocean carriers, between all of the points east of the Missouri river named in the pleadings herein and the Pacific ports, including the ports of San Francisco, Redondo Beach, and San Pedro, and that there is now being carried by such ocean transportation large quantities of merchandise and general freight, including the commodities mentioned in the petition filed by the San Bernardino Board of Trade before the Interstate Commerce Commission, to the ports aforesaid, in rivalry with and in competition to the overland carrying by the defendant companies, and that such competition is actual and present and is increasing; and that the defendant companies, by reason of such competition, have been compelled to make special rates to terminal points upon the Pacific coast, including among the number the city of Los Angeles; that the Redondo Beach Railway Company, now forming part of the Southern California Railway Company, by reason of its aforesaid consolidation, creates a continuous line through to the ocean at Redondo Beach, through which point, directly from the east and from the shipping points named in the petition of the San Bernardino Board of Trade, large quantities of freight are now being consigned and shipped directly to Los Angeles, and to the port of San Fran-

cisco, by steam and sailing vessels, and from Redondo Beach and San Pedro for Los Angeles. The defendants, answering further, allege that there are now four transcontinental lines of railroad from the east to the Pacific ocean, other than that formed by the defendant companies, namely: The Southern Pacific Railroad Company, operating its line of road from the city of San Francisco to Galveston, Tex., and other points east, running through the city of Los Angeles, and passing (three miles) south of San Bernardino; the transcontinental line composed of the Central Pacific and Union Pacific Railroad Companies, operating a line from San Francisco to Omaha, and there connecting with other roads to the eastern markets; the Northern Pacific Railroad Company, operating a line of road between Portland, Or., and Duluth, Minn., and other eastern points; the Canadian Pacific Railroad Company, operating a line of road through the British possessions from ocean to ocean. That all of these roads, other than that of the defendant companies, are engaged as common carriers in the transportation of freight from all of the eastern points named in the petition herein to the Pacific ocean, and thence down the Pacific coast, both by water and rail, to Los Angeles, from which point distribution is made to other points inland; that over all of said lines, other than that of the defendant companies, Los Angeles, though an intermediate, is recognized as a terminal, point; that neither of said companies, other than the defendants, was mentioned in the complaint filed by the San Bernardino Board of Trade before the Interstate Commerce Commission, and that neither of them is bound by its order, the enforcement of which against the defendant companies would be to subject them to an undue and unreasonable disadvantage in the carrying of freight, by reason of the other transcontinental lines not being subject to the same order, and the same charges for transportation to like common points.

Much time was consumed in the taking of testimony on behalf of the respective parties and the case has been but recently submitted. For the commission, it is contended, in the first place, that under no circumstances can any carrier, subject to the provisions of the Interstate Commerce Act, charge or receive for transportation of freight a greater compensation for a shorter than for a longer haul over the same line, in the same direction, unless upon application to the Commission such carrier be, in the particular case, authorized to charge less for the longer than for the shorter distance. If this be the true construction of the Act in question, the case is, of course, ended here; for not only was no such authority given in this case, but the order which it is sought to enforce expressly directed that the defendant companies should not charge or receive any greater compensation for the shorter haul to San Bernardino than for the longer haul to Los Angeles. In support of the construction thus contended for, it is said that "the law points out but one method of escape from the universal application of the prohibitory features of the 4 INTER S.

fourth section of the Act, and that is through an application to the commissioners, who alone are given in the exercise of a sound discretion, the right to suspend the provision in particular cases, and their findings are not reviewable by any other tribunal, because the law has confided to the commissioners, as a special tribunal, the authority to hear and determine the question." But the fundamental difficulty in the way of adopting the construction now and thus contended for by the commission is that the Act in question does not make it unlawful to charge or receive more for the shorter than the longer haul, under all circumstances, but only where the circumstances and conditions are substantially similar. By the first section of the Act (24 Stat. at L. 879) it is declared that all charges made for any service rendered or to be rendered, in the transportation of passengers or property by any carrier subject to its provisions, shall be reasonable and just; and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful. By the second section, every unjust discrimination, as between persons for doing a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions, is prohibited and declared unlawful. By the third section it is declared to be unlawful "for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever;" and then follows section 4,—the sections particularly applicable to the present question,—which reads:

"That it shall be unlawful for any common carrier subject to the provisions of this Act to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance over the same line, in the same direction, the shorter being included within the longer distance; but this shall not be construed as authorizing any common carrier within the terms of this Act to charge and receive as great compensation for a shorter as for a longer distance: provided, however, that, upon application to the Commission appointed under the provisions of this Act, such common carrier may, in special cases, after investigation by the Commission, be authorized to charge less for longer than for shorter distances for the transportation of passengers or property; and the Commission may from time to time prescribe the extent to which such designated common carrier may be relieved from the operation of this section of this Act."

It is obvious that the authority and power conferred upon the Commission by the proviso contained in section 4 is limited to cases that fall within the enacting clause of that

section, for its purpose manifestly is to enable the Commission to relieve carriers from its operation in cases where it deems such action proper. Such purpose is also expressly declared in the concluding clause of the proviso. And the power thus conferred is exclusive, and its exercise conclusive, in all cases that fall within the prohibition of the enacting clause of the section to which the proviso is appended; that is to say, to every case where the carrier charges or receives greater compensation in the aggregate for the transportation of passengers, or of like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance over the same line, in the same direction, the shorter being included within the longer distance. In all such cases, a greater charge for the shorter than for the longer haul is absolutely prohibited, unless the Commission, for good cause, sees proper to relieve a particular carrier from its operation. But, if the circumstances and conditions are not substantially similar, the prohibition imposed by the statute does not apply at all. This question the court must determine. If it finds that the circumstances and conditions under which the greater charge was made for the shorter than for the longer haul in question were substantially similar, the inquiry ends, and the order of the Commission must be enforced; for in such case it was the exclusive province of the Commission to determine whether or not there existed such other circumstances as would make it proper to authorize the defendant companies to charge and receive greater compensation for the shorter than for the longer haul. But, if the case shows that the greater charge for the shorter than for the longer haul was made under substantially dissimilar circumstances and conditions (there being no claim that the compensation charged and received for the shorter haul was otherwise unjust or unreasonable) then, and in that event, it is manifest that the case does not fall within the prohibition of the Interstate Commerce Act at all. This construction of the statute is in accord with that adopted by the Interstate Commerce Commission itself in *Re Southern R. & SS. Assn.* 1 Inters. Com. Rep. 280, where the Commission, speaking through Judge Cooley, after quoting the prohibitory clause of section 4, said:

"Here we have clearly stated what is unlawful and forbidden, and for doing the unlawful and forbidden act penalties are then provided. But that which the Act does not declare unlawful must remain lawful if it was so before, and that which it fails to forbid the carrier is left at liberty to do without permission of any one. The charging or receiving the greater compensation for the shorter than for the longer haul is seen to be forbidden only when both are under substantially similar circumstances and conditions and therefore if in any case the carrier, without first obtaining an order of relief, shall depart from the general rule, its so doing will not alone convict it of illegality, since, if the circumstances and conditions of the two hauls are dissimilar, the statute is not violated. Should an interested party dispute

that the action of the carrier was warranted, an issue would be presented for adjudication, and the risks of that adjudication the carrier would necessarily assume. The later clause in this same section, which empowers the Commission to make orders for relief in its discretion, does not in doing so restrict it to a finding of circumstances and conditions strictly dissimilar, but seems intended to give a discretionary authority for cases that could not well be indicated in advance by general designation, while the cases which upon their facts should be acted upon as clearly exceptional would be left for adjudication when the action of the carrier was challenged. The statute becomes, on this construction, practical, and this section may be enforced without serious embarrassment. From the recital of the history of the framing of this section (which is given further on) it appears, among other things, that the proviso respecting orders for relief was devised by the senate committee which originally drafted the section, and that it was an essential part of it as first proposed; the prohibitory part of the section being then quite stringent, but a discretion being conferred upon the Commission to relieve against its operation. Afterwards the words, 'under substantially similar circumstances and conditions,' were inserted in the first sentence of the section. The proviso was perfectly intelligible, so long as the leading clause contained a hard and fast rule against charging more for the shorter than for the longer haul. It was then obvious that a discretion was left to the Commission in the matter of relaxing the rule when different circumstances and conditions rendered such relaxation, in its judgment, proper. Had the section passed as it then stood, the exercise of such a discretion might have been entered upon by the Commission with a distinct understanding of the task imposed, even though its adequate performance might have been out of the question; but, modified as it now stands, the necessity for a relieving order is greatly narrowed, it being obvious that no order is needed to relieve against the operation of the statute, when nothing is done or proposed which it makes unlawful.

"If any serious doubt of the proper construction of the clause of the statute now under review should, after careful consideration of its terms, still remain, it would seem that it must be removed when section 2, in which the same controlling word is made use of, is examined in connection. That section provides 'that if any common carrier subject to the provisions of this Act shall, directly or indirectly, by any special rate, rebate, drawback, or other device, charge, demand, collect, or receive, from any person or persons, a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property, subject to the provisions of this Act, than it charges, demands, collects, or receives from any other person or persons for doing for him or them a like and contemporaneous service, in the transportation of a like kind of traffic, under substantially similar circumstances and conditions, such common carrier shall

be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be unlawful.' Here it will be observed that the phrase is precisely the same, and there can be no doubt that the words were carefully chosen, probably because they were believed to express more accurately and precisely than would any others the exact thought which was in the legislative mind; and in this section, as well as in section 4, the phrase is employed to mark the limit of the carrier's privilege,—its privilege, too, in respect to the very subject-matter with which section 4, where it is employed, has to do,—namely, the charges for transportation service. It is not at all likely that Congress would deliberately, in the same Act and when dealing with the same general subject, make use of a phrase which was not only carefully chosen and peculiar, but also controlling, in such different senses that its effect, as used in one place, upon the conduct of the parties who were to be regulated and controlled by it would be essentially different from what it was as used in another. But, beyond question, the carrier must judge for itself what are the 'substantially similar circumstances and conditions' which preclude the special rate, rebate, or drawback, which is made unlawful by the second section, since no tribunal is empowered to judge for it until after the carrier has acted, and then only for the purpose of determining whether its action constitutes a violation of law. The carrier judges on peril of the consequences; but the special rate, rebate, or drawback which it grants is not illegal when it turns out that the circumstances and conditions were not such as to forbid it; and, as Congress clearly intended this, it must also, when using the same words in the fourth section, have intended that the carrier whose privilege was in the same way limited by them, should in the same way act upon its judgment of the limiting circumstances and conditions."

For the reasons above assigned, it seems to me to be clear that the court must determine the question whether or not the greater compensation charged and received by the defendant companies for the transportation of the commodities in question, for the shorter haul to San Bernardino than for the longer haul to Los Angeles, was under substantially similar circumstances and conditions; and in doing so it must be guided by the powers conferred and the duties imposed upon it by the 16th section of the Act, as amended March 2, 1889, which reads as follows:

"Sec. 16. That whenever any common carrier, as defined in and subject to the provisions of this Act, shall violate, or refuse or neglect to obey or perform, any lawful order or requirement of the Commission created by this Act, not founded upon a controversy requiring a trial by jury, as provided by the 7th Amendment to the Constitution of the United States, it shall be lawful for the Commission, or for any company or person interested in such order or requirement, to apply in a summary way, by petition, to the circuit court of the United States, sitting in equity, in the judicial district in which the common

carrier complained of has its principal office, or in which the violation or disobedience of such order or requirement shall happen, alleging such violation or disobedience, as the case may be; and the said court shall have power to hear and determine the matter, on such short notice to the common carrier complained of as the court shall deem reasonable; and such notice may be served on such common carrier, his or its officers, agents, or servants, in such manner as the court shall direct; and said court shall proceed to hear and determine the matter speedily, as a court of equity, and without the formal pleadings and proceedings applicable to ordinary suits in equity, but in such manner as to do justice in the premises; and to this end such court shall have power, if it think fit, to direct and prosecute in such mode, and by such persons as it may appoint, all such inquiries as the court may think needful to enable it to form a just judgment in the matter of such petition; and on such hearing the findings of fact in the report of said Commission shall be prima facie evidence of the matters therein stated; and if it be made to appear to such court, on such hearing or on report of any such person or persons, that the lawful order or requirement of said Commission drawn in question has been violated or disobeyed, it shall be lawful for such court to issue a writ of injunction or other proper process, mandatory or otherwise, to restrain such common carrier from further continuing such violation or disobedience of such order or requirement of said Commission, and enjoining obedience to the same; and in case of any disobedience of any such writ of injunction or other proper process, mandatory or otherwise, it shall be lawful for such court to issue writs of attachment, or any other process of said court incident or applicable to writs of injunction or other proper process, mandatory or otherwise, against such common carrier, and, if a corporation, against one or more of the directors, officers, or agents of the same, or against any owner, lessee, trustee, receiver, or other person failing to obey such writ of injunction or other proper process, mandatory or otherwise; and said court may, if it shall think fit, make an order directing such common carrier or other person, so disobeying such writ of injunction or other proper process, mandatory or otherwise, to pay such sum of money, not exceeding for each carrier or person in default the sum of five hundred dollars for every day, after a day to be named in the order, that such carrier or other persons shall fail to obey such injunction or other proper process, mandatory or otherwise; and such moneys shall be payable as the court shall direct, either to the party complaining or into court, to abide the ultimate decision of the court, or into the treasury; and payment thereof may, without prejudice to any other mode of recovering the same, be enforced by attachment, or order in the nature of a writ of execution, in like manner as if the same had been recovered by a final decree *in personam* in such court. When the subject in dispute shall be of the value of two thousand dollars or more, either party to such proceeding

before said court may appeal to the Supreme Court of the United States, under the same regulations now provided by law in respect of security for such appeal; but such appeal shall not operate to stay or supersede the order of the court or the execution of any writ or process thereon; and such court may, in every such matter, order the payment of such costs and counsel fees as shall be deemed reasonable. Whenever any such petition shall be filed or presented by the Commission, it shall be the duty of the district attorney, under the direction of the Attorney General of the United States, to prosecute the same; and the costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States. If the matters involved in any such order or requirement of said Commission are founded upon a controversy requiring a trial by jury, as provided by the 7th Amendment to the Constitution of the United States, and any such common carrier shall violate or refuse or neglect to obey or perform the same, after notice given by said Commission as provided in the 15th section of this Act, it shall be lawful for any company or person interested in such order or requirement to apply in a summary way, by petition, to the circuit court of the United States sitting as a court of law in the judicial district in which the carrier complained of has its principal office, or in which the violation or disobedience of such order or requirement shall happen, alleging such violation or disobedience, as the case may be; and said court shall by its order then fix a time and place for the trial of said cause, which shall not be less than twenty nor more than forty days from the time said order is made; and it shall be the duty of the marshal of the district in which said proceeding is pending to forthwith serve a copy of said petition, and of said order, upon each of the defendants; and it shall be the duty of the defendants to file their answers to said petition within ten days after the service of the same upon them as aforesaid. At the trial of the findings of fact of said Commission, as set forth in its report, shall be prima facie evidence of the matters therein stated; and if either party shall demand a jury, or shall omit to waive a jury, the court shall, by its order, direct the marshal forthwith to summon a jury to try the cause; but, if all the parties shall waive a jury in writing then the court shall try the issue in said cause, and render its judgment thereon. If the subject in dispute shall be of the value of two thousand dollars or more, either party may appeal to the Supreme Court of the United States, under the same regulations now provided by law in respect to security for such appeal; but such appeal must be taken within twenty days from the day of the rendition of the judgment of said circuit court. If the judgment of the circuit court shall be in favor of the party complaining, he or they shall be entitled to recover a reasonable counsel or attorney's fee, to be fixed by the court, which shall be collected as part of the costs in the case. For the purposes of this Act, excepting its penal provisions, the circuit courts

of the United States shall be deemed to be always in session."

On the part of the Commission it is contended that the facts found by it and set out in its report are conclusive upon the court. It is impossible so to construe the language of the statute conferring jurisdiction upon the court to enforce the lawful orders and requirements of the Commission. Not only does the provision of the statute that the findings of fact contained in the report of the Commission shall be taken as prima facie evidence of the matters therein stated preclude the idea that such finding shall be deemed conclusive evidence thereof, but such a construction would, in effect, be to convert the court from a judicial tribunal into an executive organ to carry out the orders of the Commission. Courts are instituted to hear and determine causes; and to hear is to hear not one only, but both, sides to the controversy. And so Congress, in the Act under consideration, in conferring upon the circuit courts, sitting in equity, jurisdiction to hear petitions for the enforcement of the orders and requirements of the Commission, has provided that such courts shall proceed to hear and determine such matters speedily, as a court of equity, without the formal pleadings and proceedings applicable to ordinary suits in equity, but in such manner as to do justice in the premises; and to this end "such court shall have power, if it think fit, to direct and prescribe, in such mode and by such persons as it may appoint, all such inquiries as the court may think needful to enable it to form a just judgment in the matter of such petition; and on such hearing the findings of fact in the report of said Commission shall be prima facie evidence of the matters therein stated." It is, I think, very clear from this language that while Congress, prescribing, as it lawfully might, a rule of evidence, made the findings of fact of the Commission, as set forth in its report, prima facie evidence of the matters therein stated, they are not conclusive evidence of such matters; and that it is the duty of the court to examine the entire evidence submitted, and base its judgment upon the case as here established. This conclusion is in harmony with that of the court in *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 87 Fed. Rep. 567, and *Interstate Commerce Com. v. Lehigh Valley R. Co.* 3 Inters. Com. Rep. 796, 49 Fed. Rep. 177.

The real question, therefore, for the decision of the court, is whether or not the case shows that the circumstances and conditions existing at Los Angeles and San Bernardino, respecting the transportation of the commodities in question, are substantially dissimilar; and this is a mixed question law and fact. It is said for the defendant companies that the facts in regard to that question were not fully presented to the Interstate Commerce Commission when the matter was there considered; and attention is called to the fact that the Commission itself has since held, in the case of *Rice v. Atchison, T. & S. F. R. Co.*, 3 Inters. Com. Rep. 263, that Los Angeles is a terminal and competitive point in

respect to petroleum and its products,—the traffic there involved,—and that the Atchison, Topeka & Santa Fé Railroad Company was justified, by the existence of substantially dissimilar circumstances and conditions, in making lower rates on that traffic to Los Angeles than to intermediate points. Referring to the difference in situation between Los Angeles and San Francisco, Sacramento, Stockton, Marysville, Oakland, and San Diego, the Commission there say:

“With reference to this traffic, the city of Los Angeles occupies a different position to that of the water terminals named. It appears that this city receives petroleum and its products, important in amount, by the water lines to San Francisco or San Diego, as the case may be, and which is afterwards brought down the coast by the rail lines of the Southern Pacific Company or the Atchison, Topeka & Santa Fé Railroad Company, as the case may be, to Los Angeles. It does not appear whether it is brought to Los Angeles on through bills of lading, or only on bills of lading from San Francisco or San Diego, as the case may be, and afterwards, on a separate bill, to Los Angeles; but this is not important, as, in either event, the practical result would be the same. It may be brought to Los Angeles each way. If it is a separate carriage by a water line to San Francisco or San Diego, and no further, then the rate that is thus made for its carriage is one that is not subject to the regulation provided by the Act to Regulate Commerce, and if from San Francisco or San Diego, as the case may be, it is a separate carriage by a rail carrier to Los Angeles, then it is a service beginning and ending in the state of California, and, as such, not subject to the regulation provided by the Act to Regulate Commerce. The dealer in these products at Los Angeles has a right to demand that the rail carrier shall take these articles brought by the water lines to San Francisco or San Diego, as the case may be, and bring them to him at Los Angeles at reasonable rates; and these rates might be reasonable and be less in amount than the difference, for example, between the amount of the water rate to San Francisco or San Diego and the amount of the all-rail rates to these points. Such a state of facts creates a substantial dissimilarity of circumstances and conditions in reference to the transportation of this traffic to Los Angeles that prevents the lower all-rail rate to that city upon these products from being a violation of section 4 of the Act to Regulate Commerce. These circumstances and conditions are strongly competitive, and on one side they are subject to the regulation provided by the Act to Regulate Commerce, while on the other they are not. They fairly warrant the all-rail carriers, who are subject to the Act to Regulate Commerce, in making such just and reasonable rates on this traffic as well enable them to meet at Los Angeles the rates of carriers not subject to the Act to Regulate Commerce, even though in doing so they charge lower rates than at intermediate stations, where no such circumstances and conditions exist. On the other hand, if this traffic is brought from New York, for example, by water lines to

San Francisco or San Diego, and from the one or the other of these two last named sea ports, as the case may be, to Los Angeles, under a through bill of lading, then it is manifest, up on the evidence in this proceeding, that it would be so brought from New York to Los Angeles at as low, if not a lower, rate than the all-rail rate from points east of the ninety-seventh meridian of longitude to Los Angeles; and being, as we have already seen, important in amount, would also be in actual competition with the all-rail rate, so that the rail carriers would be justified in meeting it by the all-rail rate.”

Freight carried to or from a competitive point, said *Judge Deady* in *Ex parte Koehler*, 1 Inters. Com. Rep. 819—

“Is always carried under ‘substantially dissimilar circumstances and conditions’ from that carried to or from noncompetitive points. In the latter case the railway makes its own rates, and there is no good reason why it should be allowed to charge less for a long haul than a short one. When each haul is made from or to a noncompetitive point, the effect of such discrimination is to build up one place at the expense of the other. Such action is willfully unjust, and has no justification or excuse in the exigencies or conditions of the business of the corporation. In the former case the circumstances are altogether different. The power of the corporation to make a rate is limited by the necessities of the situation. Competition controls the charge. It must take what it can get, or, as was said in *Ex parte Koehler*, 28 Fed. Rep. 538, ‘abandon the field, and let its road go to rust.’ Competition may not be the only circumstance that makes the condition under which a long and a short haul are performed substantially dissimilar. But certainly it is the most obvious and effective one, and must have been in the contemplation of Congress in the passage of the Act.”

The common carrier cannot be required to ignore or overcome existing differences in the transportation facilities of different localities, created, not by its own arbitrary action, but by nature or by enterprises beyond its control. San Bernardino is situated in one of the most fertile and productive valleys in the world, and is a thriving and prosperous city, but it has not the transportation facilities that Los Angeles has. It is about 60 miles distant, and further inland. By reason of its nearness to Los Angeles, it receives the benefit of the competitive rates to that terminal in proportion to its proximity thereto. But, not being a competitive point, it does not get terminal rates. The proof shows, what is also a matter of common knowledge, that railroad companies do not make terminal rates, unless compelled to do so by competition. Wherever and whenever actual competition exists, the question the carrier has to deal with is not so much what is fair rate for the service, or what the traffic will bear, but what rate can be got for the service as against the rate offered by the competitor. Especially is this true when the competitor is a carrier by water, because that is the cheapest known kind of transporta-

tion, and is unrestricted by law. If, therefore, Los Angeles can be justly regarded as a competitive point in respect to the transportation of the commodities here in question, there is such dissimilarity of circumstances and conditions between it and the intermediate point of San Bernardino as to make the long and short haul clause of the Interstate Commerce Act inapplicable.

The facts in respect to this question, as shown by the evidence submitted to the court, are widely different from those set out in the report of the Commission, and upon which its order here sought to be enforced was based. In its report and opinion the commission say:

"Between San Francisco and the southern border of California, a distance of six hundred miles, San Jose, Los Angeles, and San Diego are the only points designated Pacific coast terminals by said transcontinental association, and to which rates from the Missouri river and more eastern points are the same as to San Francisco. San Jose is an interior city, within 50 miles of San Francisco. Los Angeles is also an interior city, 25 miles from San Pedro, its nearest harbor. The rates between Los Angeles and San Pedro are from 9 to 12½ cents per 100 pounds on goods similar to those named in the complaint. Los Angeles and San Diego are the principal commercial centers of southern California. San Pedro is a seaport through which importations of coal, lumber, and other commodities from the neighboring islands and British America are brought in, and vessels come in ballast from San Francisco to San Pedro, to be loaded with grain, but its commerce is very small. None of the articles named in the complaint shipped from the Missouri river, or places further east, have reached Los Angeles through San Pedro for many years. Seven or eight years ago some agricultural implements were shipped around Cape Horn to San Francisco. The time when shipment of any of the articles named in the complaint was made from the east directly through San Pedro or other Pacific coast port to Los Angeles was not within the recollection of any witness testifying. Some goods are shipped from New York by water to New Orleans; thence by rail to California and intermediate places. Practically, there is no such thing as water competition or a water route from the Missouri and Mississippi rivers and interior cities to the Pacific coast in the carriage of the articles named. Many of them, such as stoves, ranges, black hollow ware, when carried over a water route, are liable to injury from rust. It is possible to ship most of the articles named in the complaint from Atlantic ports and cities around Cape Horn to ports and cities on the Pacific coast. None are so shipped to or through San Diego or San Pedro, Cal. To what extent they are so shipped to San Francisco, or through it to Los Angeles, if at all, has not been disclosed by the testimony or otherwise ascertained in this investigation."

And again:

"The agent of one of the defendant roads testified that seven or eight years ago some

INTER S.

agricultural machinery was carried around Cape Horn to San Francisco, and on this testimony alone rests the claim of water competition to Los Angeles, nearly five hundred miles from San Francisco. That the merchandise named in the complaint is not carried by sea from New York, or by sea and rail from Cincinnati and interior points, to Los Angeles, through San Pedro, appears from the evidence, and is confirmed by the fact that the rail rates are higher to San Pedro than to Los Angeles. If they were so carried through San Diego they would necessarily go at the same rate to San Bernardino, which is a trifle nearer than Los Angeles by rail to San Diego. Possible competition by water is not sufficient to justify a greater charge for the shorter distance. Upon the provision of the 4th section of the Act to Regulate Commerce, the competition must be actual and so counteracting as to take the freight if the lower charge for the longer distance was not maintained. Such competition to Los Angeles is not established by the fact that some of the articles named in the complaint were carried by sea to San Francisco seven or eight years ago."

Reference has already been made to the subsequent case of *Rice v. Atchison, T. & S. F. R. Co.*, 8 Inters. Com. Rep. 268, where the facts were by the Commission held to be such as to establish the claim of the defendant that Los Angeles is such competitive point in respect to the transportation of petroleum and its products as to justify a less charge for the longer haul to that city than for a shorter haul to intermediate points. When the present case was before the commission, one port (Redondo) through which the evidence shows large quantities of freight of various kinds are almost daily received at Los Angeles, was not shown to have existed at all. This port is distant about 18 miles from Los Angeles, and is connected therewith by two railroads,—one formerly known as the "Redondo Beach Railway Company" and the other as the "California Southern Railroad Company." Through the port of San Pedro, also, which is distant from Los Angeles about 22 miles, and connected therewith by rail, large quantities of freight, of almost all kinds and classes, are almost constantly received. All of the freight thus brought to Redondo and San Pedro for Los Angeles is brought by steamer or sailing vessel, much of it in original packages, from New York to San Francisco, and from there transhipped to Los Angeles by way of Redondo or San Pedro; some of it by the Canadian Pacific Railroad to Vancouver, and thence by the Pacific Coast Steamship Company's ships to Redondo or San Pedro. Some freight is also brought by water to San Francisco and San Diego, and thence down or up the coast, as the case may be, by rail to Los Angeles. The evidence shows that in addition to the five overland railroads, to wit, the Canadian Pacific, the Northern Pacific, the Central Pacific, the Atchison, Topeka & Santa Fé, and the Southern Pacific, with their various connections, by which freight is transported from the eastern and middle

states to California, there is what is called the Dearborn line of sailing vessels between New York and San Francisco, the Sutton line of sailing vessels between New York and San Francisco and Portland, the Pacific Mail Steamship Company's line of vessels from New York to Aspinwall, connecting there with the Panama Railroad running to Panama, and at that place with the company's line of steamers to San Francisco, and that recently there has been established a line of steamships between New York and San Francisco by way of the straits of Magellan, on some of which, at the time of the taking of the testimony herein, there was afloat a large amount of freight of various kinds and classes for some of the Los Angeles merchants. Los Angeles is a city of about 60,000 people, and because of its location in respect to transportation facilities, and because it is the most important point in southern California, it was made one of the terminal points of the Pacific coast by the transportation companies. The evidence shows that a number of the large mercantile firms of San Francisco, dealing in some or all of the commodities mentioned in the petition, have branch houses there, some have agents, and that some of the local firms do business to the amount of \$3,000,000 per annum. It is not strange, therefore, that there should be active competition between the carriers for the transportation of its freight. The witness A. M. Sutton testified, among other things, that he represents in San Francisco the line of clipper ships which are and have been for years running from New York and Philadelphia around Cape Horn to San Francisco; that they carry almost every kind and class of freight, including the commodities mentioned in the petition; that they charter and load from 80 to 85 ships a year, have no fixed rates, but make rates so as to compete with the other water carriers, and with the overland railroads, and so as to get the business; that they solicit business as far west as Kansas City, St. Paul, Milwaukee, Pittsburgh, and Chicago; that they solicit freight for all parts of California, Oregon, and Washington; that they carry freight constantly to Southern California, chiefly to Los Angeles; that their ships take all California freight to San Francisco, and, if billed to Los Angeles, it is reshipped to San Pedro or Redondo in original packages, and then by rail to Los Angeles. The witness Edwin Goodall testified, among other things, that he represents in San Francisco the Pacific Coast Steamship Company; that their ships go to San Pedro and Redondo, to which ports within the last two years freights from San Francisco have been as low as one dollar a ton by reason of competition with other water carriers and the railroads; that they are engaged in the transportation of all kinds and character of merchandise; that goods shipped in New York by steamers or clippers for Los Angeles and San Bernardino are constantly reshipped at San Francisco in original packages to San Pedro and Redondo, from which they are taken by rail; that they sometimes run two or three freight steamers a week to those ports, and including their passenger

steamers, which also carry freight, they would probably average one every other day; that they endeavor to fix their rate also as to successfully compete with whatever opposition they may have, whether from carriers by water or rail.

In the report and opinion of the Commission, in finding, as it did, from the evidence before it, that practically there was no such thing as water competition or a water route from the Missouri and Mississippi rivers and interior cities to the Pacific coast in the carriage of the articles named, it is said: "Many of them, such as stoves, ranges, black hollow ware, when carried over a water route, are liable to injury from rust." In the case here, A. A. Watkins, a member of the firm of W. W. Montague & Co., whose principal place of business is in the city of San Francisco, with a branch house in Los Angeles, testified that his firm deals largely in stoves, ranges, registers, radiators, black iron stove furniture, and hollow ware, and that of those commodities they ship what would probably amount to about 75 carloads a year, and that about 75 per cent of them they ship by water to San Francisco, and from there reship by steamer to Redondo or San Pedro what is intended for Los Angeles and vicinity; that they ship by water because it is cheaper to do so than by rail, after deducting their estimate of 8 per cent for loss by rust; and that any increase in the rail tariff would result in their shipping still more largely by water. The testimony in the case is altogether too voluminous to refer to in detail, but I think it is safe to say, generally, that it shows that the water carriers mentioned are now, and that some of them for years past have been, competing with the overland railroads for the carriage of general freight, including the commodities mentioned in the petition, from the cities and country east of the Missouri river to the Pacific coast, including the city of Los Angeles; that they are and have been actively engaged in such transportation, soliciting the freight, and carrying what they can get; and that they actually do carry an important part of many of the commodities mentioned in the petition. The fact that such means of transportation actually exists, and is actually and actively seeking the traffic, constitutes competition, and was doubtless one of the most important factors in making Los Angeles a terminal point. Not only does the evidence show that such water competition exists, but it shows that the shipments by water are increasing; and a number of the witnesses testify that, in the event the all-rail rates should be increased from what they are now, it would result in much larger shipments by water, both in quantity and kind. For the reasons stated I am of the opinion that the circumstances and conditions attending the transportation of the commodities in question to Los Angeles and San Bernardino are essentially dissimilar, and therefore that the long and short haul clause of the Interstate Commerce Act does not apply to the case. As has been said, it is not claimed that the rates to San Bernardino are otherwise unjust or unreasonable. If they are, other provisions

of the Act will afford relief. It results from these views that petitioner is not entitled to the relief it seeks in this court. It is accordingly ordered that the petition be dismissed, at its cost.

IN THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF GEORGIA.

THE INTERSTATE COMMERCE COMMISSION

THE CINCINNATI, NEW ORLEANS & TEXAS PACIFIC R. Co., The Western & Atlantic R. Co., The Georgia R. Co.

*1. A suit brought by the Interstate Commerce Commission in the United States circuit court to enforce an order of the Commission, is an original and independent proceeding. The court is not confined to a mere re-examination of the case as heard and reported by the Commission; but the court hears and determines the cause *de novo* upon proper pleadings and proof.

The Commission's report is *prima facie* evidence of the matters of fact therein reported; but the court will hear all such other, and further testimony as either party may introduce, bearing upon the matters in controversy; and will permit such pleadings as will bring before the court clearly, and in legal form, such matters as may be pertinent and proper in view of the issues raised.

CASES CITED: 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 87 Fed. Rep. 567, *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.*; 3 Inters. Com. Rep. 796, 49 Fed. Rep. 177, *Interstate Commerce Com. v. Lehigh Valley R. Co.*; 50 Fed. Rep. 206, *Interstate Commerce Com. v. Atchison, T. & S. F. R. Co.*

2. The 1st section of the Act to Regulate Commerce provides that it "shall apply to any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water where both are used under a common control, management, or arrangement, for a continuous carriage or shipment, etc."

The Georgia Railroad extends from Atlanta to Augusta. The Georgia Railroad Co. requested its connections, that in issuing bills of lading to its local stations, no rates be inserted east of Atlanta. There is no agreement on the part of said Company for any such joint tariff, as implies a reduced rate from Cincinnati, Ohio, to its local stations. On the contrary, that company collects and retains its entire local rates on all freight shipped from Cincinnati to its local stations. *Held*: That there is no such "arrangement for a continuous carriage or shipment" existing between said company and its connections, as to bring the rates which are charged to said local stations, within the first section of the Act to Regulate Commerce.

CASE CITED: 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*.

3. When goods are shipped through from Cincinnati, Ohio, to local stations on the Georgia Railroad, the initial carrier at Cincinnati issues through bills of lading, and quotes through rates. Said rates, however, are arrived at by adding to the rates from Cincinnati to Atlanta, the full local rates of the Georgia Railroad from Atlanta to said local stations. The Georgia R. Co. receives

the goods at Atlanta, and transports them continuously to its local stations; but it demands and collects its full local rates from Atlanta to said local stations. *Held*: That the mere reception, and continuous transportation, by the Georgia R. Co., of freight which comes to it over other lines of railroads, destined to its local stations, for which the initial carrier has issued through bills of lading, and quoted through rates, does not constitute such an "arrangement" as is contemplated by the first section of the Act to Regulate Commerce, where the through rates, so quoted, allow to that company its full local rates.

4. The 4th section of the Act to Regulate Commerce provides, that it "shall be unlawful for any common carrier, subject to the provisions of this Act, to charge or receive any greater compensation, in the aggregate, for the transportation of passengers, or of like kind of property under substantially similar circumstances and conditions, for a shorter, than for a longer distance, over the same line, in the same direction, the shorter being included within the longer distance."

There is a clear distinction between the term "railroad" as used in the other parts of the Act, and the term "line" as used in the 4th section.

The use of the word "line" is significant. Two carriers may use the same "road," but each has its separate "line."

One railroad company may lease trackage rights to another; but the joint use of the same track does not create the same "line," so as to compel either company to graduate its tariff by that of the other.

CASE CITED: 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*.

5. There must be a "common arrangement" between connecting companies, such as the making of a joint tariff, before a "new line" can be formed; and the "line" so formed under the joint tariff of connecting companies is one which is separate and independent from that of either of the connecting companies.

CASE CITED: 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*.

6. "No power exists at common law, and none is given by the Act to Regulate Commerce, to compel connecting railroad companies to unite in a joint tariff, or to enter into a through rate arrangement for transportation, unless they desire to do so. They cannot be compelled to abandon the full control of their separate roads; and neither of them is bound to adjust its own local tariff to suit the other."

CASE QUOTED: 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*.

See also 2 Inters. Com. Rep. 386, 2 L. R. A. 325, 37 Fed. Rep. 680, *Kentucky & I. Bridge Co. v. Louis-*

*Headnotes prepared under direction of the court.

4 INTER S.

v. N. R. Co.; 2 Inters. Com. Rep. 765, 41 Fed. Rep. 583, *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.*

7. There is no "common arrangement," or "joint tariff," between the Georgia Railroad Company and its connections, as to traffic to its local stations. On the contrary, there is an express refusal by that company to make any "common arrangement" whatever, in regard to that traffic.

The Georgia Railroad Company demands and collects its full local rates on all shipments to its local stations. Whether shipments come from points west of Atlanta, or originate at Atlanta, the rate is precisely the same; and, as to the Georgia Railroad, the carriage is the same.

8. The Cincinnati, New Orleans & Texas Pacific Railway Company, the Western & Atlantic Railroad Company, and the Georgia Railroad Company have formed "a new and independent line," by the adoption of a joint through tariff from Cincinnati to Augusta; but such "new line" is distinct and separate from that of either of the railroads named.

CASE CITED: 4 Inters. Com. Rep. 257, 53 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*.

9. Social Circle is a local station on the Georgia Railroad, 53 miles east of Atlanta, and 119 miles west of Augusta.

The Georgia Railroad Company refuses to adopt a joint through tariff from Cincinnati to Social Circle; and charges its full local rate from Atlanta to Social Circle.

The rate from Cincinnati to Social Circle is a combination rate; and it is arrived at by adding to the rate from Cincinnati to Atlanta, the full local rate of the Georgia Railroad from Atlanta to Social Circle. The rate thus made from Cincinnati to Social Circle is greater than the joint through tariff rate from Cincinnati to Augusta; but that fact constitutes no violation of the "long and short haul" clause of the Act to Regulate Commerce; because the two rates are not made "over the same line."

The rate to Augusta is made by the "line" formed by a "common arrangement" between said three companies for a joint tariff between those points.

The rate to Social Circle is made greater than the rate to Augusta, by the Georgia Railroad Company demanding its full local rate on its own road; which road is separate and independent from the "line" made by said three companies.

CASES CITED: 4 Inters. Com. Rep. 257, 53 Fed. Rep. 912, *Chicago & N. W. R. Co. v. Osborne*; 4 Inters. Com. Rep. 247, 53 Fed. Rep. 229, *United States v. Mellen*.

10. "Freight carried to, or from, a competitive point, is always carried under substantially dissimilar circumstances, and conditions, from that carried to, or from, non-competitive points. In the latter case, the railway makes its own rates, and there is no good reason why it should be allowed to charge less for a long haul than a short one. When each haul is made to, or from, a non-competitive point, the effect of such discrimination is to build up one place, at the expense of the other. Such action is willfully unjust, and has no justification, or excuse, in the exigencies, or conditions of the business of the corporation. In the former case, the circumstances are altogether different. The power of a corporation to make a rate is limited by the necessities of the situation. Competition controls the charge. It must take what it can get, or abandon the field, and let its road go to rust."

"Competition may not be the only circumstance that makes the condition under which a long and short haul are performed substantially dissimilar,

4 INTER S.

but certainly it is the most obvious and effective one, and must have been in contemplation of Congress in the passage of the Act to Regulate Commerce."

CASE QUOTED: 1 Inters. Com. Rep. 517, 31 Fed. Rep. 315, 319, *Ex parte Koehler*.

11. "That competition, the life of trade, cuts an important figure in the condition and circumstances attendant upon transportation of passengers and property, cannot be well overlooked nor denied. Nor can it be well denied that, as between the short and long haul, competition may exist to that extent, that what would otherwise be similar circumstances, and conditions, will be dissimilar circumstances, and conditions."

CASE QUOTED: 31 Fed. Rep. 862, *Missouri Pac. R. Co. v. Texas & P. R. Co.*

12. "A common carrier cannot be required to ignore or overcome existing differences in the transportation facilities of different localities created not by its own arbitrary action, but by nature, or by enterprise beyond its control. . . . Wherever, and whenever, actual competition exists, the question the carrier has to deal with is, not so much what is a fair rate for the service, or what the traffic will bear, but what rate can be got for the service, as against the rate offered by the competitor."

CASE QUOTED: ante, p. 323, *Interstate Commerce Com. v. Atchison, T. & S. F. R. Co.*

13. "It is not necessary for a carrier to apply to the Interstate Commerce Commission for relief from "the long and short haul" clause of the Act to Regulate Commerce, when the circumstances and conditions are substantially dissimilar, since the carrier, in acting upon them, would commit no breach of the law, though it would be responsible in case it were found that the circumstances and conditions were misconceived, or misjudged."

CASE QUOTED: 1 Inters. Com. Rep. 278, *Re Louisville & N. R. Co.*

14. The Interstate Commerce Commission holds that where railroads, which are subject to the Act to Regulate Commerce, compete with Canadian, or other railroads, which are not subject to the Act, such competition constitutes dissimilar circumstances and conditions; but that competition between two railroads, both of which are subject to the Act, does not constitute dissimilar circumstances and conditions.

The Commission, however, also holds that it has no authority to raise railroad rates. If a railroad, which is subject to the Act, is met with competition from other railroads, which are also subject to the Act, and the commission has no authority to require such other railroads to increase their rates, even when the competition is ruinous, there is no practical difference between such a case, and the case of competition with railroads, not subject to the Act. If the general conclusion is correct, that competition will constitute dissimilar circumstances, and conditions, in the sense in which that term is used in the Act, there is no good reason for drawing the line where it has been drawn by the Commission; on the contrary, competition of carrier with carrier both subject to the Act, is as such within the terms of section 4, as competition with a carrier not subject to the Act.

15. Competition of market with market may not be so direct in its effect, as competition of carrier with carrier; but when it does exist, it is influential, and perhaps as effective and controlling, with carriers, as to their rates, as other competition. It may, therefore, constitute a part of the circumstances and conditions which a carrier can

consider in fixing rates for the transportation of goods.

16. The fact that the rate from Cincinnati to Social Circle is greater than the joint tariff rate from Cincinnati to Augusta, constitutes no "undue or unreasonable prejudice or disadvantage" against Social Circle, and no "undue or unreasonable preference or advantage" in favor of Augusta. Railway companies are only bound to give the same terms, to all persons alike, under the same conditions and circumstances; and any fact which produces an inequality of condition, and a change of circumstances, justifies an inequality of charge. Augusta and Social Circle are not "under the same conditions and circumstances."

CASE CITED: 4 Inters. Com. Rep. 92, 145 U. S. 263, 26 L. ed. 669, *Interstate Commerce Com. v. Baltimore & O. R. Co.*

17. Several lines of railway compete for the business between Cincinnati and Augusta; and there is active and influential competition by Baltimore, and other eastern cities, against Cincinnati, for the trade of Augusta.
18. Nearly all of the railroads south of the Ohio river, and east of the Mississippi, including the three railroad defendants in this case, are members of an association known as the Southern Railway & Steamship Association. Said association, in making rates, is governed by competition. The same influences control in the association, in making rates, as would control without it; and while the influences may not go to the same extent, and there may be produced by the association more harmonious relations between its members, competition influences, and, to a large extent, controls, the rates agreed upon by the association.

19. It appears that the rate charged on first class goods, in less than carload lots, from Cincinnati to Atlanta, in 1879, was \$1.39 per 100 lbs; that afterwards it was \$1.10; and subsequently \$1.07; except for a short time, when it was \$1.01. The only testimony offered to, or heard by the Commission, as to the reasonableness of the rate, was that of the Vice President of the C. N. O. & T. P. R. Co., that he considered a rate of \$1.01 reasonable. Upon that testimony, and upon the fact that the rate from Cincinnati to Birmingham is 89 cents, as compared with \$1.07 to Atlanta, the distances being substantially the same, the Commission ordered that the defendants should not charge more than \$1.00 from Cincinnati to Atlanta.

In this court, a number of railroad experts testified that the present rate of \$1.07 is reasonable.

As to the rate to Birmingham, there was evidence before this court, which was not before the Commission; viz: That the rate from Cincinnati to Birmingham, which was previously \$1.08, was forced down to 89 cents, by the building of a new road, known as the K. C. M. & B. R. R.

Held: That the existence of a lower rate from Cincinnati to Birmingham furnished no sufficient reason to determine that the rate from Cincinnati to Atlanta is unreasonable, when such lower rate is caused by conditions at Birmingham which do not exist at Atlanta.

Held, further: That the evidence offered in this court is sufficient to overcome the prima facie case made by the findings of the Commission. On the whole testimony, as now before this court, it is not believed that the Commission would have found the rate in question to be unreasonable. Certainly this court cannot so determine.

UPON petition by the Interstate Commerce Commission to enforce an order made by the plaintiff in a case brought before it by The James & Mayer Buggy Company against the above defendants for alleged violations of the Act to Regulate Commerce.

Facts are stated in opinion. See Inters. Com. Rep. 682.

Messrs. S. A. Darnell, A. G. Safford, R. L. Bernard solicitors for the Interstate Commerce Commission.

Mr. Edward Colston for the Cincinnati, N. O. & T. P. R. Co.

Messrs. Payne & Tye solicitors for the Western & Atlantic R. Co.

Messrs. J. B. Cumming and Ed. Baxter, solicitors for the Georgia R. Co.

Mr. Justice Newman delivered the opinion of the court:

This is an application by the Interstate Commerce Commission to this court, to enforce an order passed by the Commission, in the case of the James & Mayer Buggy Company v. The Cincinnati, New Orleans & Texas Pacific Railway Company, the Western & Atlantic Railroad Company, and the Georgia Railroad Company.

The petition of the James & Mayer Buggy Company to the Interstate Commerce Commission was as follows:

"The petition of the above named complainant respectfully shows:

1st. "That the James & Mayer Buggy Company manufacture buggies, carriages, etc., in the city of Cincinnati, state of Ohio.

"2d. That the defendants above named are common carriers, and, under a common control, management, or arrangement, for continuous carriage or shipment, are engaged in the transportation of passengers and property, wholly by railroad, between Cincinnati, in

the state of Ohio, and Chattanooga, in the state of Tennessee; and between Chattanooga, in the state of Tennessee, and Atlanta, in the state of Georgia; and between Atlanta, in the state of Georgia, and Augusta, in the state of Georgia; and, as such common carriers, are subject to the Act to Regulate Commerce.

"3d. That the first class rate of freight, as published in the tariff of the C. N. O. & T. P. R. R. Co., from Cincinnati, Ohio, to Atlanta, Georgia, the distance being about 477 miles (more or less) is \$1.01 per hundred lbs.

"4th. That the first-class rate of freight from Cincinnati, Ohio, to Augusta, Georgia, over the same lines of railroad, the distance being about 648 miles (more or less) is also \$1.01 per hundred lbs.

"5th. That the first class rate of freight from Cincinnati, Ohio, to Social Circle, Georgia, over the same lines, the distance being about 525 miles (more or less) is \$1.31 per hundred lbs.

"6th. That the complainant above named, shipping vehicles to Atlanta, Georgia, ought not to be compelled to pay the same rate of freight as when shipping to Augusta, Georgia, a point 171 miles further distant on the same lines.

"7th. That the complainant above named, in shipping vehicles to Social Circle, Georgia, ought not to be compelled to pay a rate of freight which is 80 cents per hundred lbs. higher than when shipping to Augusta, Georgia, a point 120 miles (more or less) further distant along the same lines.

"8th. That the above named defendants are violating section 4 of the Act to Regulate Commerce, in charging a greater sum for a shorter distance, than for a longer distance, in the same direction, over the same lines."

The above petition prayed that an order be made commanding the defendant to cease and desist from the violation complained of, and was signed and sworn to be a representative of the James & Mayer Buggy Company.

The answer of the Western & Atlantic Railroad Company was as follows:

"The Interstate Commerce Commission, Washington, D. C.—Gentlemen: I have before me your favor of October 22d, enclosing a copy of petition filed against our company, embracing a statement of charges made by the James & Mayer Buggy Company.

"In reply, I will state that there is nothing in the interstate commerce law, so far as we read it, which requires that we should make from Cincinnati to Atlanta, a less rate than from Cincinnati to Augusta. Therefore, we do not consider that that portion of the complaint filed by the petitioners has any force."

"Regarding the rate of freight from Cincinnati to Social Circle, Georgia, I will state that Social Circle is a local point on the Georgia Railroad, and that company has not furnished us with any basis for working business to its local points, other than taking the rate, as in this instance, from Cincinnati to Atlanta, and adding their local. This company, on this business, has charged no more than if the freight had stopped at Atlanta, or than it would receive going to any point within the same radius from Atlanta as that in which Social Circle is located.

"Further, as the rates to Augusta are brought down by water competition, we do not consider that we have violated the Interstate Commerce law. The rate within itself is not unreasonable; and we cannot see that there is any discrimination against the parties at Social Circle; and this company, furthermore, is unable to control the local rates of any of its connections."

The answer of the Georgia Railroad Company was as follows:

"This respondent answering says:

1. "It is informed, and believes that the James & Mayer Buggy Company manufacture buggies, carriages, etc., in the city of Cincinnati, state of Ohio.

2. "This defendant, and the defendants above named are common carriers, and, under a common arrangement for continuous carriage or shipment, are engaged in the transportation of passengers and property, wholly

by rail, between Cincinnati, in the state of Ohio, and Chattanooga, in the state of Tennessee; and between Chattanooga, in the state of Tennessee, and Atlanta, in the state of Georgia, and Augusta, in the state of Georgia.

3. "The rate of freight on buggies, carriages, etc., from Cincinnati, Ohio, to Atlanta, Georgia, the distance being about 478 miles, was, at the date named, one dollar and one cent, per hundred pounds, in less than carload lots, knocked down, boxed or crated, and released. This was an unauthorized rate. The proper rate Cincinnati to Atlanta should have been one dollar and seven cents, per hundred pounds."

4. "The rate of freight on buggies, carriages, etc., from Cincinnati, Ohio, to Augusta, Georgia, over the same lines of railroad, and the railroad of this respondent, the distance being about 645 miles, is also one dollar and seven cents, per hundred pounds."

5. "This respondent says that it has no arrangement with the roads between Atlanta, the western terminus of respondent's railroad, and Cincinnati, for through rates from Cincinnati to any station on the Georgia Railroad, other than Milledgeville—where respondent competes with the Central Railroad of Georgia—and the terminal stations of Augusta, Athens, and Washington; that if a through bill of lading is issued at Cincinnati, for freight from that point to Social Circle, a station on respondent's railroad, the rate is made as follows, to wit, by adding to the rate from Cincinnati to Atlanta, respondent's local rate from Atlanta to Social Circle. Thus, the rate from Cincinnati to Atlanta, as given above, is \$1.07 per hundred pounds, to which is added respondent's local rate from Atlanta to Social Circle, to wit, 80 cents per hundred pounds, making a through rate from Cincinnati to Social Circle of \$1.87 per hundred pounds. Respondent does not quote any through rate from Cincinnati to any stations on its railroad, except Milledgeville, and the terminal stations above named; but of course its local tariff, as fixed by the Georgia Railroad Commission, is known to the initial road at Cincinnati."

6. "Respondent says that the rate from Atlanta to Social Circle is just and reasonable; also that the rate from Cincinnati to Social Circle is just and reasonable, and not obnoxious to any provision of the Interstate Commerce Act, by reason of not being just and reasonable.

7. "Respondent further says that the through rate from Cincinnati to Augusta, though the same as from Cincinnati to Atlanta, is not unlawful under section 4 of the Interstate Commerce Act, because said rates are charged not under substantially similar circumstances and conditions."

"In explanation of this statement, respondent says that at Baltimore, Maryland, and other eastern cities, large manufactories of buggies, carriages, etc., exist, and that the product of these factories is transported from said places to Augusta at such rates, that if this respondent and its connections between Atlanta and Cincinnati charge a higher rate than one dollar and seven cents,

per hundred pounds, from Cincinnati to Augusta, no freight of this character would come over the Georgia Railroad; for the product of the Eastern factories would be delivered in Augusta, at a rate which would exclude the Cincinnati product from the Augusta market."

8. "This respondent says, that while no arrangement exists, as above stated, for a through bill of lading from Cincinnati to Social Circle, as a matter of fact the shipment from Cincinnati to Social Circle by the petitioner was made on a through bill of lading, the rate of which was fixed, as heretofore stated, by adding this respondent's local rate from Atlanta to Social Circle, to the through rate from Cincinnati to Atlanta."

The answer of the Cincinnati, New Orleans & Texas Pacific Railway Company, in the case before the Commission, was as follows:

"The Cincinnati, New Orleans & Texas Pacific Railway Company for answer to the petition of complainant herein, says:

1. "It admits that the James & Mayer Buggy Company manufactures buggies, carriages, etc., in the city of Cincinnati, state of Ohio."

2. "That the above named defendants are common carriers, engaged in the transportation of passengers and property, wholly by railroad between Cincinnati, Ohio, and Atlanta, Georgia; and between Cincinnati, Ohio, and Augusta, Georgia; but it says that said defendants are not under a common control, management, or arrangement, for continuous carriage or shipment; but, that on the contrary, the connection of this defendant with such carriage or shipment begins at Cincinnati, Ohio, and ends at Chattanooga, Tennessee; that of the Western & Atlantic Railroad Company begins at Chattanooga, Tennessee, and ends at Atlanta, Georgia; and that of the Georgia Railroad begins at Atlanta, and ends at Augusta, in the state of Georgia."

3. "It admits that the first class rate of freight published in the tariff of this defendant, from Cincinnati, Ohio, to Atlanta, Georgia, a distance of about 477 miles, is \$1.01 per 100 pounds."

4. "It admits that the first class rate of freight from Cincinnati, Ohio, to Augusta, Georgia, a distance of about 648 miles, is also \$1.01 per 100 pounds."

5. "It admits that the first class rate of freight from Cincinnati, Ohio, to Social Circle, Georgia, over the same line, the distance being about 525 miles (more or less) is \$1.81 per 100 pounds."

"It says that the power of this defendant over said rates of freight, and the division thereof, only extends to securing a reasonable compensation for the services performed in transporting merchandise from Cincinnati, Ohio, the northern, to Chattanooga, Tennessee, the southern terminus of its line; that its proportion of the rate of \$1.01 to Atlanta, Georgia, is 71 $\frac{1}{2}$ cents, and that of the Western & Atlantic Railroad Company is 29 $\frac{1}{2}$ cents per 100 pounds; that its proportion of the rate to Augusta, Georgia, from Cincinnati, Ohio, is 52 $\frac{1}{2}$ cents; that of

the Western & Atlantic 21 $\frac{1}{2}$ cents, and that of the Georgia Railroad is 26 $\frac{1}{2}$ cents; that said rate to Atlanta is reasonable and just, and a reasonable compensation for the services performed; that the rate to Augusta is the same as to Atlanta, for the reason that such rate is governed by the rate from Baltimore and New York to Augusta, and made on a lower basis than the rate to Atlanta, on account of water competition *via* Charleston, S. C., and Savannah, Ga., which operates to lower such rate to Augusta. The relative distance hauled, and the proportionate amount of services performed by this defendant, in carrying said goods to Augusta, being less than the distance and service to Atlanta, the compensation of this defendant is relatively less."

"As to the rate to Social Circle, Georgia, defendant says that such rate can only be made by this defendant, by consent and permission of the Georgia Railroad Company, co-defendant herein; that the transportation to said Social Circle can only be effected by the co-operation of the said Georgia Railroad, said Social Circle being a station on its line, and the said Georgia Railroad stipulating, and insisting that the said rate shall be 80 cents greater than the rate to Augusta and Atlanta. This defendant receives no part of, or allowance on account of, the 80 cents additional charged to Social Circle; the same being purely a local rate charged by the Georgia Railroad, for transportation over its line from Atlanta to Social Circle."

There seems to have been very little evidence in the case before the Commission; as it appears from the report of the case, only one witness was introduced, who was an officer of one of defendant companies. The facts were principally ascertained by the admission of the parties, and from the records, and, presumably, from the tariffs of rates, etc., filed with, and in the possession of the Commission.

The serious question presented to the Commission in this case was the right of the defendant railroad companies to charge more for shipments of first class freight from Cincinnati to Social Circle, than from Cincinnati to Augusta.

The Cincinnati, New Orleans & Texas Pacific Railway runs from Cincinnati, in the state of Ohio, to Chattanooga, in the state of Tennessee, a distance of 886 miles; the Western & Atlantic Railroad runs from Chattanooga, in the state of Tennessee, to Atlanta, in the state of Georgia, a distance of 188 miles; the Georgia Railroad runs from Atlanta to Augusta, Georgia, a distance of 171 miles. Social Circle is a town on the line of the Georgia Railroad, 52 miles east of Atlanta, and 119 miles west of Augusta, Georgia; and consequently a shorter distance by the last named number of miles from Cincinnati, than is Augusta.

The contention was that the charge of \$1.81, from Cincinnati to Social Circle, per 100 pounds, on first class freight, when only \$1.01 per 100 pounds on similar freight was charged from Cincinnati to Augusta, was in violation of the long and short haul clause, in section 4, of the Act to Regulate Commerce,

approved February 4, 1887, and known as the Interstate Commerce Act.

The order of the Commission in the case is given in full, and is as follows:

"It is ordered and adjudged:—That the defendants, the Cincinnati, New Orleans & Texas Pacific Railway Company, the Western & Atlantic Railroad Company, and the Georgia Railroad Company, do, from and after the 20th day of July, 1891, wholly cease and desist from charging, or receiving any greater compensation, in the aggregate, for the transportation, in less than carloads, of buggies, carriages, and other articles classified by them as freight of first class, for the shorter distance over the line formed by their several railroads from Cincinnati, in the state of Ohio, to Social Circle, in the state of Georgia, than they charge, or receive for the transportation of said articles, in less than carloads, for the longer distance over the same line from Cincinnati aforesaid, to Augusta in the state of Georgia; and that said defendants, the Cincinnati, New Orleans & Texas Pacific Railway Company, and the Western & Atlantic Railroad Company, do also, from and after the 20th day of July, 1891, wholly cease, and desist from charging, or receiving any greater aggregate compensation for the transportation of buggies, carriages, and said other first class articles, in less than carloads, from Cincinnati aforesaid, to Atlanta, in the state of Georgia, than one dollar (\$1.00) per 100 pounds."

In the case before this court, each and all of the defendants filed answers, which, in addition to the matter set up in their answers in the case before the Commission, are substantially as follows:

The defendant, Georgia Railroad Company, admit that the proceedings before the Interstate Commerce Commission were as stated in the petition here, but they deny that it was made to appear that the provisions of the Act to Regulate Commerce had been violated by them, in the respects charged in the petition before the Commission, or that the matters in controversy had been legally determined by the Commission; and they deny the legal or binding effect of the order passed by the Commission.

The answer of the Cincinnati, New Orleans & Texas Pacific Railway Company is substantially the same as that of the Georgia Railroad Company.

The answer of the Western & Atlantic Railroad Company contains the following: "That on the 27th of December, 1890, it became a body corporate, under the name and style of the Western & Atlantic Railroad Company, under an act of the legislature of Georgia, approved November 12, 1889, which provided for the lease of certain property of the state of Georgia, known as the Western & Atlantic Railroad, and that prior to said 27th day of December, 1890, this respondent was not in existence, and therefore had no notice of the proceedings before the Interstate Commerce Commission, in the matter of the petition of the James & Mayer Buggy Company, and had no connection with the matters therein complained of."

[Subsequently, by agreement, the present

Western & Atlantic Railroad Company was made party defendant in lieu of the old company.]

So that the matters for determination here, as will be perceived, are:

1. Whether or not the charge of a greater rate for transporting first class freight, in less than carload lots, per 100 pounds, from Cincinnati, Ohio, to Social Circle, Georgia, than is charged for transporting the same class of freight to Augusta, Georgia, a point 171 miles beyond, over the same line, and in the same direction, is a violation of the fourth section of the Interstate Commerce Act.

2. Whether or not the charge of \$1.07 on first class freight, per 100 pounds, in less than carload lots, from Cincinnati to Atlanta, Georgia, is unreasonably high: and a violation, for that reason, of the Act to Regulate Commerce.

I. The Commission, in the beginning, denies the power of this court to hear the case upon any other issues, pleadings, or facts, than those presented to the Commission. It is claimed that the case is to be determined with reference to what the Interstate Commerce Commission had before it, and that no additional issues, or questions should be raised, or other evidence taken.

The language of the Act of Congress does not support this contention. Section 16, which provides for the enforcement of the orders of the Commission by and through the courts, is in these words: "And said court shall proceed to hear and determine the matter speedily, as a court of equity, and without the formal pleadings and proceedings applicable to ordinary suits in equity, but in such manner as to do justice in the premises; and to this end such court shall have power, if it think fit, to direct and prosecute in such mode, and by such persons, as it may appoint, all such inquiries as the court may think needful to enable it to form a just judgment in the matter of such petition; and on such hearings, the findings of fact in the report of said Commission shall be prima facie evidence of the matters therein stated."

It is impossible to believe that under this language of the Act, the powers of the court in the premises are restricted, as contended for by the Commission. The provision, "If it think fit, to direct and prosecute in such mode, and by such persons, as it may appoint, all such inquiries as the court may think needful, etc.," must necessarily authorize the court to provide for the taking and hearing of such additional evidence as may be proper. And the power is equally clear to permit such pleadings as will bring before the court, clearly, and in legal form, such matters as may be pertinent and proper, in view of the issues raised.

In the case of the *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.*, 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 87 Fed. Rep. 567, Judge Jackson, discussing this question, uses this language: "The suit in this court is, under the provisions of the Act, an original and independent proceeding, in which the Commission's report is made prima facie evidence of the matters of facts therein stated. It is clear that this court is not confined to

a mere re-examination of the case as heard and reported by the Commission, but hears and determines the cause *de novo*, upon proper pleadings and proofs, the latter including not only the *prima facie* facts reported by the Commission, but all such other and further testimony, as either party may introduce, bearing upon the matters in controversy." See also *Interstate Commerce Com. v. Lehigh Valley R. Co.*, 3 Inters. Com. Rep. 796, 49 Fed. Rep. 177, and *Interstate Commerce Com. v. Atchison, T. & S. F. R. Co.*, 50 Fed. Rep. 295. In the latter case, the court holds: "On the proceedings in the circuit court, under section 16, to enforce an order of the Commission directing certain carriers to desist from charging greater rates for the shorter than the longer haul, the facts found by the Commission are not conclusive, but merely *prima facie*, etc." This question may be considered, therefore, as settled, not only by the language of the Act of Congress, but by authority, against the position assumed by counsel for the Commission.

II. The next question raised here, is as to whether the carriage of freight in the case now before the court by the Georgia Railroad, was such a carriage as to bring the shipment from Cincinnati to Social Circle within that part of the first section of the Act to Regulate Commerce, which is as follows: "That the provisions of this Act shall apply to any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used under a common control, management, or arrangement, for a continuous carriage or shipment."

The position assumed is that there is no such arrangement for the "continuous carriage or shipment" between the Georgia Railroad Company, the Western & Atlantic Railroad Company, and the Cincinnati, New Orleans & Texas Pacific Railway Company, as to bring the Georgia Railroad Company within the terms of the Act.

The facts appear to be that goods were shipped from Cincinnati to Social Circle, on through bills of lading, issued by the Cincinnati, New Orleans & Texas Pacific Railway Company, and were carried over the Cincinnati, New Orleans & Texas Pacific Railway, the Western & Atlantic Railroad, and the Georgia Railroad, to Social Circle. The rate charged on first class goods, such as were involved in this controversy, is \$1.07, being the through rate from Cincinnati to Atlanta, with the local rate of 30 cents, per 100, from Atlanta to Social Circle, over the Georgia Railroad, added thereto, making \$1.37. The rate charged from Atlanta to Social Circle is the rate authorized by the Railroad Commission of Georgia, and is the regular rate for local freight between those two points. When the freight is collected, the Georgia Railroad retains its entire local rate, and the remainder of the \$1.07 is divided between the other two roads, in proper proportion, according to an agreement between them.

The decision and order of the Commission, in this case, was made on the 29th day of June, 1891. On the 3d day of July, the following circular was issued by the Georgia Railroad:

"Augusta, Ga., July 3d, 1891.

["Circular No. 106, New Series.]

"To Connections:

"Dear Sir:—Lately we have had some complications, arising from connecting lines and their connections issuing through bills of lading, quoting rates to our local stations; and, to avoid such complications in the future, we earnestly request that hereafter, in issuing bills of lading to our local stations, no rates be inserted east of Atlanta. This, of course, does not apply to business to Athens, Gainesville, Washington, Milledgeville, Augusta, or points beyond. Please issue instructions to your Agents that this rule will be effective at once, and advise me if you will comply with this request.

"Yours truly,

"E. R. Dorsey,

"General Freight Agent."

In addition to this, it is entirely clear from other evidence, that the Georgia Railroad insists on its local rate from Atlanta, to points on its line between Atlanta and Augusta, on all freight shipped from Cincinnati. According to all the evidence, there is no agreement on the part of the Georgia Railroad for any such joint tariff, as implies a reduced rate from points in the west to points on its line, except to Augusta. The contention for this company, therefore, is, and in effect, in behalf of all the defendants, that there is no such arrangement for a continuous shipment, as brings the freight charge in this case, to Social Circle, within the language of the first section of the Act to Regulate Commerce, above quoted, and which controls the character of transportation to which the Act applies.

In this connection, the case of *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, is interesting, and applicable. The decision in that case is by the Circuit Court of Appeals for the Eighth Circuit, Justice Brewer delivering the opinion of the court. The action, in the court below, was to recover damages for violation of the "long and short haul" clause of the Interstate Commerce Act. The facts, as stated by Justice Brewer, in that case, are as follows:

"The defendant owns and operates a railroad from Missouri Valley, a town on the western border of Iowa, to Chicago, Illinois. Scranton is a town in Iowa, on the line of this road, eighty-eight miles east of Missouri Valley, and therefore so much nearer Chicago. The Fremont, Elkhorn & Missouri Valley Railroad Company owns a railroad running east and west through Nebraska, and connecting with the defendant's road at the town of Missouri Valley. Blair, Nebraska, is a point on that road, thirteen miles west of Missouri Valley. While the Fremont, Elkhorn & Missouri Valley Railroad Company is an independent corporation, a majority of its stock belongs to the defendant company, and thus the defendant company controls its operations."

"During the month of January, 1888, there was in force a local tariff of rate charged on.

the defendant's road. This local tariff was duly published in Scranton. In accordance with it, the rate from Scranton to Chicago, on corn, was 18 cents per 100 pounds. All shippers shipping simply to Chicago, paid that rate. The plaintiff, among others, made sundry shipments, and was charged and paid such sum. There was, so far as appears, absolute uniformity of rate as to all such local shipments. At the same time, the tariff on corn shipped through from Blair, Nebraska, to New York City was 88½ cents; to Boston, Philadelphia, and Baltimore, sums slightly above, and below this figure. This through rate was made up in this way: By agreement between the defendant and eastern companies, corn was shipped through to New York, from Turner and Rochelle, two small stations on the defendants' road, one 30 and the other 70 miles west of Chicago, for 27½ cents; 8½ cents of which went to defendant, and the balance to the eastern companies; and by agreement between the defendant and the Fremont, Elkhorn & Missouri Valley Railroad Company, the rate from Blair, to Turner and Rochelle, on corn, shipped to New York, Boston, Philadelphia, or Baltimore, was 11 cents. In other words, by these agreements of the several companies, a through rate was fixed on corn shipped from Blair, to New York, and other eastern cities; and of that through rate, the defendant company received, for carrying the whole line of its road, less than the local tariff of 18 cents, charged from Scranton, to Chicago. This joint tariff was not published at Scranton, and no knowledge of it was given to, or possessed by the plaintiff, until February 24th; and, until that time, he made no application for shipment beyond Chicago. Thereafter he shipped to Boston, and received the benefit of a through tariff."

According to the decision in that case, upon the statement of facts just quoted, it is entirely clear that by the joint arrangement of the Cincinnati, New Orleans & Texas Pacific Railway Company, the Western & Atlantic Railroad Company, and the Georgia Railroad, a new and independent "line" was formed, by the adoption of a joint through tariff from Cincinnati to Augusta; and that this line was distinct and separate, viewed in the light of the "long and short haul clause," from that of either of the railroads named. The court, in that case, distinguished clearly, and satisfactorily, between the term "railroad" as used in the other parts of the Act, and the term "line" as used in the fourth section. The language of the court on this subject, on page 915, 916, is as follows:

"The denunciation of the fourth section is against each separate common carrier, for its violation of the 'long and short haul' clause, on its own line. The language is: 'that it shall be unlawful for any common carrier, subject to the provisions of this Act, to charge or receive any greater compensation, in the aggregate, for the transportation of passengers, or of the like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance, over the same line, in the same direct-

ion, the shorter being included within the the longer distance.'

"The use of the word 'line' is significant. Two carriers may use the same road, but each has its separate line. The defendant may lease trackage rights to any other railroad company, but the joint use of the same track does not create the 'same line,' so as to compel either company to graduate its tariff by that of the other.

"Further, by section 6, every common carrier is required to print, and publish at every depot along its own road, schedules, showing its rates and fares and charges. There is a prohibition against advancing rates without giving notice, and, in case of a reduction, notice thereof must be immediately posted; whereas, in reference to joint tariffs, the requisition is simply that each common carrier furnish to the Commission a copy of all contracts therefor, as well as copies of the joint tariffs; and power is given to the Commission, to determine the amount of publication that shall be required.

"Again, at the time of the passage of this Act, joint through tariffs were well known, as well as the fact that they were generally less than the sum of the local tariffs, and not distributed between the several companies making them, according to the mere matter of mileage. In this Act, joint tariffs are recognized; and if Congress had intended to make the local tariffs subordinate to, or measured by the joint tariff, its language would have been clear, and specific.

"It is worthy of note, that in the debates which attended the passage of this bill through the two houses, and while this matter was under discussion, it was again and again said by those participating in the debates, that the line formed under the joint tariff of connecting companies, was one separate and independent from that of either of the connecting companies; and also worthy of note, that in the actual administration of affairs by the Interstate Commerce Commission, the same thing has been constantly recognized."

The question then is, does the fact that goods are shipped through from Cincinnati to Social Circle, that a through rate of freight is given by the initial carrier, that the goods are continuously transported over the three roads until they arrive at Social Circle, make its transportation subject to the fourth section of the Interstate Commerce Act, notwithstanding the fact that the Georgia Railroad insists upon, and receives its local rate, and has no arrangement for a joint tariff from Cincinnati to Social Circle, except that it allows the initial road (Cincinnati, New Orleans & Texas Pacific Railway) to make the rate as has been indicated, and in which it acquiesces, by receiving the goods, and delivering them at Social Circle? In *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, it is said:

"Neither company is bound to adjust its own local tariff to suit the other, nor compellable to make a joint tariff with it. It may insist upon charging its local rates for all transportation over its line."

Further on, this language is used:

"No power exists at common law, and none is given by the Act, to court, or Commission, to compel connecting companies to contract with each other, to abandon full control of their separate roads, or to unite in a joint tariff."

This correctly states the Act of Congress; and no railroad is compelled to enter into a through rate arrangement for transportation, unless it desires to do so. The fact runs through all the evidence in this case, appearing sometimes in the direct, and sometimes brought out by cross-examination, that the rate from Cincinnati to Social Circle is a combination of a through rate from Cincinnati to Atlanta, and the local rate of the Georgia Railroad from Atlanta to Social Circle. There is no difference as to shipments over the Georgia Railroad, to local stations, whether the goods come from Cincinnati, or whether the shipments originate in Atlanta; the rate is precisely the same, and as to the Georgia Railroad, so far as appears, the carriage is the same. A joint tariff for through traffic, such as will make a "new," or "independent line," under the decision in the Osborne case, *supra*, would seem to be charges made on a different basis, and usually, perhaps invariably, at a less rate than that of the sum of the local rates of the lines entering into the joint arrangement. If this be true, then the rate from Cincinnati to Social Circle would not be such a joint rate, or joint tariff, as makes a "new line," as indicated in the decision named. There must be a "common arrangement" between the roads making the "new line," and there is no such "common arrangement" by the Georgia Railroad, as to traffic to its local stations. There is express refusal to make any "common arrangement," if evidence is to have any weight. The evidence shows no express agreement, and none can be fairly implied from the facts.

Justice Brewer, in the Osborne case, makes this qualification:

"That we may not be misunderstood, we do not mean to intimate that the two companies with a joint line, can make a tariff from Turner to Cleveland, higher than from Turner to Buffalo, or to any intermediate station between Cleveland and Buffalo; for when the two companies, by their joint tariff, make a new, and independent line, that new, and independent line may become subject to the long and short haul clause; but what we mean to decide is, that a through tariff on a joint line is not the standard by which the separate tariffs of either company is to be measured or condemned."

It is contended in the argument here, that the effect of this restrictive language as applied to this case, is, that when the three railroads formed a line from Cincinnati to Augusta, by entering into a joint tariff for the transportation of goods between those points, no more could be charged for a haul from Cincinnati to any point between Atlanta and Augusta, than was charged from Cincinnati to Augusta; and that no more could be charged from Cincinnati to any point between Chattanooga and Atlanta, than was charged from Cincinnati to Atlanta. But

applying the Osborne case here: The Lake Shore Railroad runs from Chicago to Buffalo; and Cleveland, although a large city, is an intermediate station on that road. The joint rate in the Osborne case was made to Cleveland, the intermediate station; and that decision holds that where a railroad made a reduced joint rate to an intermediate station on its line of road, it could not charge less to any point beyond. The Lake Shore road had become part of a "new, and independent line," although the "new, and independent line," so far as the Osborne case is concerned, was to Cleveland. The facts in that case are, therefore, entirely different from the facts in this case; and the qualifying language of Justice Brewer does not seem to have any application here. The decision in the Osborne case has been quoted and applied, however, in one of the district courts since it was rendered.

The case of the *United States v. Mellen*, 4 Inters. Com. Rep. 247, 53 Fed. Rep. 229, decided by Judge Riner, in the district court for Kansas, November 28, 1892, was an indictment against Mellen and others for a violation of the long and short haul clause of the Interstate Commerce Act, and the decision of the court there, so far as applicable here, may be gathered from the first two head notes, which are as follows:

1. "The long and short haul clause of the Interstate Commerce Act (§ 4) does not apply to a case where the short haul rate is the combined local rates of two connecting lines, and the long haul rate is a joint rate made by the two lines, acting together; and an indictment alleging such rates is bad.

"*Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, followed.

2. "An indictment alleging that the share of the joint rate taken by one company is less than its local rate for a shorter haul, etc., is bad.

"*Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912."

In the Mellen case the indictment alleged substantially, taking all the counts together, that the defendants were agents of the the Union Pacific Railway Company, and officers who had authority to establish rates of freight on the lines of said Company, and that on the 20th April, 1891, the Union Pacific Railway Company had entered into an arrangement with the Southern Pacific Railroad Company, also a common carrier, both being subject to the Act to Regulate Commerce, and established a rate, or joint tariff, for the transportation of refined sugar, by the two lines of railroad named, from San Francisco, Cal., to Kansas City, Mo.; that the rate under this joint tariff is 45 cents per 100 pounds, from San Francisco to Kansas City, and that of this, the Union Pacific received 32.4 cents, and the Southern Pacific 32.6 cents. It is further charged that the city of Salina is a station on the main line of the Union Pacific Railway Company, in Kansas, and is located 186 miles west of Kansas City, Missouri, and a shorter distance from San Francisco, by 186 miles. The indictment then charges the defendant with willfully

establishing a rate of 94 cents for each 100 pounds of refined sugar, in carload lots, transported or carried over the Union Pacific, and the Southern Pacific, from San Francisco, California, to Salina, Kansas, notwithstanding the rate of 65 cents per 100 pounds to Kansas City, Missouri. Then the charge is made that these shipments were "made under similar circumstances and conditions" to each place. The court sustained a motion to quash the indictment on all the counts in the indictment except one; and the count sustained alleged a shipment from Ogden, at a greater charge, in the aggregate, for the shipment from Ogden to Salina, than was charged from Ogden to Kansas City. Of that, the court says:

"In this count of the indictment there is no allegation of a joint rate to Kansas City, Missouri; and a joint rate is not made the basis by which the reasonableness of the local rate is to be determined, hence does not come within the principle announced in the case of *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912."

Afterwards, in the opinion, the court, in speaking of the count which is sustained, says:

"If, however, upon the trial of the cause it should be made to appear by the evidence that the joint rate to Kansas City was made the basis of adjusting the local rates, charged in this count of the indictment, the defendant would be entitled to acquittal."

That case is exactly in point here; except that there were only two roads involved there, while there are three here. The facts there were that the goods were received for shipment by the Southern Pacific, and were carried over its line from San Francisco to Ogden, and from Ogden, over the Union Pacific, to Kansas City. The rate from San Francisco, over the entire distance, to Kansas City, was 65 cents, while the rate from San Francisco to Salina, a station intermediate between Kansas City and Ogden, was 94 cents. It will be seen, therefore, that for the purpose of applying the principle ruled in the *Osborne* case, the case of *Mellen* and others, and the case here, are exactly alike. Judge Riner, in the *Mellen* case, says in the opinion:

"The allegation is that they charged the local rate from Ogden to Salina, which was less than their part of the joint rate to Kansas City, although Salina was a shorter distance. This, I think, they may do, for the reason already suggested. The joint rate does not, in any sense, effect, or govern the local rates to intermediate points. While, as stated by Mr. Justice Brewer, the two companies could not make a joint rate from San Francisco to Kansas City, which was less than a joint rate from San Francisco to Salina, yet they may make a joint rate to Kansas City, Mo., and that fact would not affect the local rate of either company to Salina."

[The word "less," italicized in the quotation, should evidently have been "more," as the report of the case shows that the rate from Ogden to Salina was 61 cents, which was more than the Union Pacific's part of the

joint rate of 65 cents from San Francisco to Kansas City.]

The foregoing decisions, which seem to properly construe the Interstate Commerce law, are conclusive of the matter now being considered, viz: whether the rate from Cincinnati to Social Circle, as shown in this case, can be compared with the rate from Cincinnati to Augusta, for the purpose of making the question presented under the "long and short haul clause" of the Act to Regulate Commerce.

The conclusions of the court, therefore, are:

1. That the traffic from Cincinnati to Social Circle in issue here, as to the Georgia Railroad Company, is local, and that Company is not, on the facts presented, made a party to a joint, or common arrangement, such as makes the traffic to Social Circle subject to the control of the Interstate Commerce Commission.

2. That the arrangement for a through rate—for there is unquestionably a joint tariff from Cincinnati to Augusta—constitutes a "new line" between Cincinnati and Augusta; and following *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 52 Fed. Rep. 912, and *United States v. Mellen*, 4 Inters. Com. Rep. 247, 53 Fed. Rep. 229, traffic to a local point on the Georgia Railroad, at strictly local rates, cannot be compared with traffic over the "new line" from Cincinnati to Augusta, for the purpose of raising the question under the long and short haul clause of the Interstate Commerce Act.

If this be not true, then a railroad must refuse to receive freight which comes over other lines of railroad and destined to local points on its road, for which the initial carrier has issued a through bill of lading, or, by receiving it, it must become a party to a joint arrangement. This result could not have been in contemplation by Congress in passing this Act, and no fair interpretation of its terms, or view of its intent, can lead to such a conclusion.

III. If the foregoing views are correct, it is unnecessary to go at any great length into the question so elaborately, and so ably argued in this case, as to the meaning of the words "under substantially similar circumstances and conditions," contained in the fourth section of the Act to Regulate Commerce, and its application to the facts of this case, namely, the charge of \$1.37 to Social Circle, and the less charge of \$1.07 to Augusta, the more distant point. Since the passage of this Act, and indeed before the bill which resulted in the Act became a law, there has been much discussion as to the meaning of this phrase. Widely different views have been entertained since the passage of the Act certainly, as to its meaning.

Taking the prohibitory part of the section in connection with the proviso, it has been insisted on the one hand, that the phrase "under substantially similar circumstances and conditions," referred to such conditions and circumstances as were connected immediately with the transportation of the goods,—connected with their carriage over any lines of roads, and that if extrinsic cir-

circumstances or conditions would justify the greater charge for the shorter than for the longer haul, in any case, the right to make it could only be obtained by first applying to the Commission for its approval.

The other view has been that this phrase included other circumstances and conditions than those connected with the carriage of the goods; and, that embraced in such circumstances and conditions, was competition.

A further contention is, that the court should give effect to this entire section, and that not only the main, or prohibitory part of the section should be considered, but also the proviso, and that the court must attribute to Congress an intent to give meaning to every part. The rule of construction claimed is undoubtedly correct. A part of the recognized history of this Act, however, is, that the proviso formed part of the bill before the words "like kind of property, under substantially similar circumstances and conditions" were inserted therein. If the section had been left without these last mentioned words, thereby establishing a hard and fast rule as to the long and short haul, the proviso would have clothed the Commission with great power over the subject-matter of the section. But after the introduction of the phrase, "under substantially similar circumstances and conditions," the authority of the Commission was undoubtedly very greatly restricted, and much more was left to the judgment and determination of the carrier in the first instance. But even after the insertion of the qualifying clause named, it was doubtless considered that the retention of the proviso was necessary, as special cases would arise requiring relief from the operation of the rule, even where the circumstances and conditions were substantially similar.

Judge Cooley, speaking for the Interstate Commerce Commission in *Re Louisville & N. R. Co.*, 1 Inters. Com. Rep. 278, 1, I. C. C. Rep. 53, states the question, and the general view the Commission entertained as early as June, 1887, in this way:

"The Louisville & Nashville Railroad Company was one of the first to apply for relief under the fourth section of the Act to Regulate Commerce, which, after declaring the general rule that more shall not be charged, or received, in the aggregate, by a common carrier subject to the law, for the transportation of passengers, or of the like kind of property, under substantially similar circumstances and conditions, for a shorter than for a longer distance, over the same line in the same direction, the shorter being included in the longer, proceeds then to authorize exceptions, and confers upon the Commission certain powers in respect thereto. From the first there have been two opinions regarding the proper construction of this provision for exceptions, one view being that no exception can be lawful unless made with the sanction of the Commission; and the other, apparently better supported on the words of the statute, that an order of relief is not required when the circumstances and conditions are substantially dissimilar, since the carrier, in acting upon them, would commit no breach of law, though it would be

responsible in case it were found that the circumstances and conditions were misconceived, or misjudged. Under this last view the order for relief would be needful only when the case was not one of plainly dissimilar circumstances and conditions, but in which, nevertheless, there might be reasons and equities that would sanction such greater charge."

Afterwards, in that opinion, the Commission restricted the class of competition which would constitute dissimilar circumstances and conditions, to competition with Canadian railroads, with water lines of transportation, and with some qualifications (which were afterwards removed) to competition with railroads wholly within a state. It was also held, in that opinion, that competition with other lines of railroad, subject to the Act, would not, as a general thing, constitute such competition as would create dissimilar circumstances and conditions, but that there might be "rare and peculiar cases," which would do so. As to these four classes of competition, namely, competition with Canadian roads, with water lines, with roads wholly within a state, and in "rare and peculiar cases," with railroad lines subject to the Commission, the carrier might, each for itself, treat them as constituting dissimilar circumstances and conditions, and make the greater charge for the shorter haul, without first obtaining the consent of the Commission; as to other cases, the consent of the Commission was deemed necessary.

In the case of the *Georgia Railroad Com. v. Clyde SS. Co.*, 4 Inters. Com. Rep. 120, the Commission overruled so much of the decision in *Re Louisville & N. R. Co.*, 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 53, as allowed the carrier to judge in the first instance of the "rare and peculiar cases" of competition with railroads subject to the Act, and thereby justify itself in the charge of a greater rate for the shorter, than for the longer haul.

The general construction of this clause, which admits competition as constituting dissimilar circumstances and conditions, is fully sustained by decisions of the circuit courts, in cases which will be referred to, and which decisions are more comprehensive than the decisions of the Commission. It appears to be settled, so far as decisions have been rendered, and construction given this clause, that the broader of the two opposing views above referred to must be taken of the phrase "under substantially similar circumstances and conditions," and that competition, generally speaking, must be considered in applying this phrase in any given case.

The question which has been argued so extensively here, is whether competition of carrier with carrier, both subject to the terms of the Act, and competition of market with market, is such competition as will constitute dissimilar circumstances and conditions. The substance of the expressed views of the Commission on this subject is, that competition between two carriers, both subject to the Act, will not of itself constitute dissimilar circumstances and conditions—that it will not, presumptively, at least. The

opinion of the Commission seems to be, that where a carrier claims that competition with another carrier, both being subject to the Act, is such as to justify it in making a greater charge for the shorter than for the longer haul, the Commission can do much, by the exercise of its general powers of supervision over rates, in relieving the complaining carrier of such competition. At all events, it is clearly held that competition between carriers subject to the Act, will not be presumed to justify a less charge for the longer haul than for the shorter haul, by the carrier of its own motion; but that the right to do so must be granted by the Commission.

The Commission has decided that it has no authority to raise rates. It holds that it was not the intention of Congress to grant any such power; and the Commission so determined, in *Re Chicago, St. P. & K. C. R. Co.*, 2 Inters. Com. Rep. 187, 2 I. C. C. Rep. 281. If the carrier, subject to the Act, is met with competition from other carriers, also subject to the Act, and the Commission has no authority to require such other carriers to increase their rates, even when the competition is ruinous, where is the practical difference between such a case, and the case of competition with carriers not subject to the Act? If a line of railroad running along the Northern boundary of our country, is met with competition from Canadian railroads running parallel with it, the American railroad can treat such competition as a circumstance and condition justifying a less charge for the longer haul to a competitive point, than it makes for the shorter haul to a non-competitive point; but a line of railroad running through the interior of our country, and interstate, which meets with competition from another line of railroad running parallel with it, and interstate also, may not treat such competition as a circumstance and condition justifying a less charge for the longer haul, to a competitive point, than for the shorter haul to a non-competitive point on its line, notwithstanding the fact that it can have no direct relief from such competition. In the first named case, that is, competition with the Canadian road, the American road may, of its own motion, treat such competition as a dissimilar circumstance and condition; while the line of road running into the interior must await the action of the Commission, until it can ascertain whether, by examination and revision of rates of the line of which complaint is made, any relief can be afforded to the complaining line. Such condition of affairs could hardly have been contemplated by Congress in the passage of this Act. If the general conclusion is correct, that competition will constitute dissimilar circumstances and conditions, in the sense in which that term is used in the Act, there seems to be no good reason for drawing the line where it has been drawn by the Commission; but, on the contrary, it does seem that competition of carrier with carrier, both subject to the Act, is as much within the terms of section four, as competition with the carrier, not subject to the Act.

This section, and especially this clause, was before Judge Deady, in the United States

Circuit Court for Oregon, *Ex parte Koehler*, 1 Inters. Com. Rep. 317, 81 Fed. Rep. 315. The decision was on the petition of a receiver, for instructions as to his duty under the Act, and under this clause in section 4. Judge Deady, in holding that competition must be considered, uses this language:

"The judgment of the court is authority, then, for this proposition: Two or more corporations, in order to meet competition, may form a through line, and charge through rates for transportation thereon, which may be less than the sum of the local rates of the several roads constituting the line; and the portion of the through rate received by each corporation may be less than the local rate charged by said corporation for carrying freight over the whole length of its road."

"The Interstate Commerce Act is intended, among other things, to prevent discrimination between long and short hauls, except where they are made under substantially dissimilar circumstances and conditions. In my judgment, Congress, in limiting the prohibition contained in section 4 of the Act against discriminating charges between long and short hauls, to cases where such hauls are made 'under substantially similar circumstances and conditions,' has recognized the rule laid down in *Ex parte Koehler*, 28 Fed. Rep. 538, as a proper one. Freight carried to, or from, a competitive point, is always carried under 'substantially dissimilar circumstances and conditions,' from that carried to, or from, non-competitive points. In the latter case, the railway makes its own rates, and there is no good reason why it should be allowed to charge less for a long haul than for a short one. When each haul is made to, or from, a non-competitive point, the effect of such discrimination is to build up one place, at the expense of the other. Such action is willfully unjust, and has no justification or excuse in the exigencies, or conditions of the business of the corporation. In the former case, the circumstances are altogether different. The power of a corporation to make a rate is limited by the necessities of the situation. Competition controls the charge. It must take what it can get, or, as was said in *Ex parte Koehler*, 'abandon the field, and let its road go to rust.'

"Competition may not be the only circumstance that makes the condition under which a long and short haul are performed substantially dissimilar; but certainly it is the most obvious and effective one, and must have been in contemplation of Congress in the passage of the Act."

In the case of *Missouri Pac. R. Co. v. Texas & P. R. Co.*, 31 Fed. Rep. 862, which was also on the application of a receiver for instructions, Judge Pardee ruled as follows:

"Under section 4 of the Interstate Commerce Law, relating to the charges for long and short haul, it seems that where the circumstances and conditions are dissimilar, there is no prohibition; where the circumstances and conditions are similar, the prohibition attaches; and that where it is difficult to point out clearly the circumstances or conditions which produce the dissimilar-

ity, the doubt should go in favor of the object of the law, and the circumstances and conditions should be taken as substantially similar. Where the circumstances and conditions are similar, or substantially similar, and the result to the carrier is injurious, relief can be had only through the Commission."

"The bulk of the petition presented, of the evidence, and of the Master's report, is an argument against the Interstate Commerce Act, and a rather vivid showing of the disastrous effects of an enforcement of the Act, with the popular construction given to the long and short haul clause, so far as the lines of the Texas & Pacific Railway are concerned; and if any specific question is presented for the answer of the court, it is whether competition between carriers is a circumstance or condition of the carriage, in the sense in which those words are used in the fourth section of said law.

"The effect of the enforcement of the law upon the particular property in the hands of the receiver need not be considered, when the whole question is one of how to comply with the law. That competition, the life of trade, cuts an important figure in the conditions and circumstances attendant upon the transportation of passengers and property cannot be well overlooked nor denied. Nor can it well be denied that, as between the long and short haul, competition may exist to that extent, that what would otherwise be similar circumstances, and conditions will be dissimilar circumstances, and conditions. Whether in any particular case, there is that competition on the long haul, that will justify a lower charge for the long haul, than is charged for the short haul, under otherwise similar circumstances, and conditions, must be determined on the facts of the particular case, keeping in mind that, where the matter is not clear, the object, and policy of the law should prevail.

"As to competition, and its effects, and generally as to the question under the said Interstate Commerce Act, the receivers are referred to the late decision of the Commission upon the petition of the Louisville & Nashville and other railroads, delivered June 16th inst. This decision is elaborate, and well considered, and answers all the points made by receiver's petition herein, as specifically as their general nature will permit.

"The lights furnished by the Commission, with a disposition to enforce the law (giving the same an enlightened and liberal construction, to the end that the mischiefs at which the law is aimed may be prevented, without unnecessary injury to any species of property), ought to be sufficient to guide any railroad traffic manager, and to enable him to protect himself, and his company, against any serious complaint of unjust discrimination, or unlawful conduct."

In the case of *Interstate Commerce Com. v. Atchison, T. & S. F. R. Co.*, 50 Fed. Rep. 806, Judge Ross, in the opinion, uses this language:

"The common carrier cannot be required to ignore, or overcome existing differences in the transportation facilities of different

localities, created not by its own arbitrary action, but by nature, or by enterprise beyond its control. San Bernardino is situated in one of the most fertile and productive valleys in the world, and is a thriving and prosperous city, but it has not the transportation facilities that Los Angeles has. It is about 60 miles distant, and further inland. By reason of its nearness to Los Angeles, it receives the benefit of the competitive rates to that terminal, in proportion to its proximity thereto. But, not being a competitive point, it does not get the terminal rates. The proof shows, what is also a matter of common knowledge, that railroad companies do not make terminal rates, unless compelled to do so by competition. Wherever, and whenever, actual competition exists, the question the carrier has to deal with is, not so much what is a fair rate for the service, or what the traffic will bear, but what rate can be got for the service, as against the rate offered by the competitor. Especially is this true, when the competitor is a carrier by water, because that is the cheapest known kind of transportation, and is unrestricted by law. If, therefore, Los Angeles can be justly regarded as a competitive point in respect to the transportation of the commodities here in question, there is such dissimilarity of circumstances and conditions between it and the intermediate point of San Bernardino, as to make the long and short haul clause of the Interstate Commerce Act inapplicable."

Judge Shiras took a different view of this clause, in *Osborne v. Chicago & N. W. R. Co.*, 48 Fed. Rep. 54, when it was tried before him. His view of its meaning will appear from this quotation from his charge to the jury:

"Whether the railway company was justified by a cut rate, in making what was called in argument, 'illegitimate competition,' and circumstances of that kind, which grew out of the handling and management of the railroad business of the country by other competing lines, and its effect upon the business of the defendant company, in the judgment of the court, is a question that cannot be submitted to you. Questions of that kind are for the judgment and determination of the Board of Commissioners appointed under this Act, and the courts and juries when they are called to act upon particular cases arising under this Act, where it is claimed that the law has been violated, are only authorized to determine the question, whether in the service rendered, the character of the property, its conveyance and other facts which inhere in the carrying of the freight upon the particular line which is charged with the wrong doing, there existed dissimilar circumstances and conditions relieving the company from the charge of collecting a larger rate for the shorter haul over the same line, in the same direction, and under otherwise substantially similar circumstances, and conditions."

The case was reversed in the circuit court of appeals, Justice Brewer delivering the opinion; but the reversal was on the question of what constituted the "same line," and not because of any error in the charge of

Judge Shiras on this ground. There is no discussion whatever of the phrase, "under substantially similar circumstances and conditions," in the opinion by Justice Brewer for the appellate court. If the question was raised at all, it appears to have been passed without any decision.

It is contended, on behalf of the Commission, that the case of *Ex parte Kochler*, 1 Inters. Com. Rep. 317, 31 Fed. Rep. 315, and the San Bernardino case, were decided solely with reference to water competition; but by an examination of the facts of those cases, and of the views of the court as expressed in the opinions, it will be found that this contention is not justified. Both cases, as is true also of the case of *Missouri Pac. R. Co. v. Texas & P. R. Co.*, 31 Fed. Rep. 862, appear to treat competition generally as embraced within the term "similar circumstances, and conditions," and do not restrict this competition to competition with water lines.

IV. The question of competition of market with market, as constituting dissimilar circumstances, and conditions, has been considerably discussed in this case. In the opinion by Morrison, *Commissioner*, in this case (*James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co.* 3 Inters. Com. Rep. 682, 4 I. C. C. Rep. 744) the Commission alludes to competition of market with market, in this way:

"If the contention of the defendants is justified by the statute, and they can avail themselves of its exceptional provisions, and charge more for the shorter distance, for the purpose of equalizing commercial conditions, and adjusting trade relations, between the cities of Cincinnati, and Baltimore, in the Augusta market, the same thing may be done to place Cincinnati carriage makers on an equal footing with those of the Augusta market, or to relieve any city from any disadvantage in markets of other cities, or to deprive all cities, or places of production, of any advantage resulting from their location. Such an interpretation would make the fourth section of the Act practically inoperative, and with such license in rate making, carriers might give advantage to, build, or destroy the carriage, or other business, of any other city, or locality."

It is certainly true that competition of this character is more uncertain in its effect, and more difficult to ascertain in character and extent, than competition of carrier with carrier. In the case of competition of market with market, many questions of commercial facilities, and advantages of competing points, would have to be considered, and it is not perhaps as direct in its effect as competition of carrier with carrier. Still, illustrations have been given, by witnesses in this case, of competition of market with market, which would seem to be absolutely controlling with the railroads in rate making. In this case, it is contended that competition with the Baltimore market for the sale of buggies, is an element to be considered in making the rate from Cincinnati to Augusta; it is contended that if the rates were higher, the Cincinnati manufacturer would be de-

prived entirely of the trade with Augusta. And it is urged that this is true of other eastern cities, having communication by the ocean lines with southern seaboard, and thence by rail to Augusta. Competition of this character may not be so direct, in its effect, as competition of carrier with carrier; but it seems to be, when it does exist, influential, and perhaps as effective and controlling with the carriers, as to their rates, as other competition; and may constitute a part of the circumstances and conditions which a carrier can consider in fixing rates for transportation of goods.

V. As to the question of undue preference, under section 3 of the Act to Regulate Commerce, it may be stated that unless the traffic involved here is obnoxious to the fourth clause of the Act, it can hardly be said to be an undue preference in favor of Augusta, or an undue prejudice or disadvantage against Social Circle. In the party rate case, *Interstate Commerce Com. v. Baltimore & O. R. Co.*, 4 Inters. Com. Rep. 92, 145 U. S. 263, 36 L. ed. 699, the Supreme Court says: "But so far as relates to the question of 'undue preference,' it may be presumed that Congress, in adopting the language of the English Act, had in mind the constructions given to these words by the English courts, and intended to incorporate them into the statute."

In short, the substance of all these decisions is that railway companies are only bound to give the same terms, to all persons alike, under the same conditions and circumstances, and that any fact which produces an inequality of condition, and a change of circumstances, justifies an inequality of charge." So that, unless the rates complained of, as compared with each other, violate the fourth section of the Act, there seems to be very little ground for claiming that they violate the "undue preference" provision of the third section.

VI. It appears, from the evidence in this case, that nearly all the railroads south of the Ohio river and east of the Mississippi, including the three railroads, defendants here, are members of an association known as the Southern Railway & Steamship Association. The purpose of this association is claimed by counsel for the railroads to be to prevent ruinous and disastrous competition, and to keep the rates at a point where the railroads can be successfully operated. On the other hand, it is contended that the claim of the advocates of the association that the purpose of the railroads entering into it is self-preservation, is not correct, but that it is rather a combination to keep up rates. Whatever may be the fact about this (and discussion of that question is deemed unnecessary now) it seems unquestionably true, that the association, in making rates, is governed by competition. The same influences seem to control in the association, in making rates, as would control without it; and while the influences may not go to the same extent, and there may be produced by it more harmonious relations and understanding, still, it seems to be a fact that competition influences, and, to a large extent, controls, the rates agreed upon by the association.

VII. The evidence in this case shows several lines of railroads competing for the business between Cincinnati and Augusta, in this way; there are two direct lines between Cincinnati and Atlanta—one over the Louisville & Nashville and Western & Atlantic roads, the other over the Cincinnati, New Orleans & Texas Pacific Railway and the East Tennessee, Virginia & Georgia Railroad. Then there are other lines which could compete, but over which, as a matter of fact, there does not appear to be real competition between Cincinnati and Atlanta, as they are indirect routes, and are probably at a disadvantage as against the two more direct routes just named. All these different lines, however, from Cincinnati to Augusta, converge at Atlanta, and go thence over the Georgia Railroad to Augusta. This is competition of carrier with carrier, which is said to constitute dissimilar circumstances and conditions.

There is competition of Baltimore and other eastern cities with Cincinnati for the trade of Augusta—and that it is active and influential is quite clearly shown by the evidence. Indeed, it is much more satisfactorily shown than is the competition of carrier with carrier, from the point of shipment to the point of destination.

VIII. In view of the opinion expressed, that the carriage from Cincinnati to Augusta is not over the same line, in contemplation of the statute, as the carriage to Social Circle, a determination of the extent and effectiveness of the competition at Augusta, as constituting dissimilar circumstances and conditions, under the fourth section, is unnecessary. It may be added, that the competition from Cincinnati by way of the trunk lines to the seaboard, thence by water to Charleston and Savannah, and thence by rail or water to Augusta, seems hardly sufficient to justify its recognition in this connection. The same may be said of all water routes from eastern markets by the ocean and by the Savannah river to Augusta. The evidence fails to show any such amount of shipments, either way, as could at all affect the justice of the rates in this case.

IX. The only remaining matter to be disposed of is that of the reasonableness of the rate charged on first class goods, in less than carload lots, from Cincinnati to Atlanta.

This is a through rate, and it is interstate commerce subject to the control of the Commission. The Commission determined that the rate should be \$1.00, and ordered that the roads interested should not charge more than \$1.00. The following language is used on this subject by the Commission, in its report and opinion:

"The only testimony offered, or heard as to the reasonableness of the rate to Atlanta in question, was that of the Vice President of the Cincinnati, New Orleans & Texas Pacific Company, whose deposition was taken at the instance of said company."

"The witness testified that he had been in the railroad service about twenty-six years, and had much to do with rates during all that time, and that he considered \$1.01 per 100 pounds, in less than carloads, a reason-

able rate on first class freight from Cincinnati, Ohio, to Atlanta, Georgia.

"This statement, or estimate, of the rate from Cincinnati to Atlanta, we believe, is fully as high as it may reasonably be, if not higher than it should be, but without more thorough investigation than it is now practicable to make, we do not feel justified in determining upon a more moderate rate than \$1.00 per 100 pounds of first class freight, in less than carloads.

"The rate on this freight from Cincinnati to Birmingham, Alabama, is 89 cents, as compared with \$1.07 to Atlanta, the distances being substantially the same. There is apparently nothing in the nature and character of the service to justify such difference, or, in fact, to warrant substantial variance in the Atlanta and Birmingham rates from Cincinnati."

It will be perceived that the only finding of fact was the testimony of one witness, that the rate of \$1.01 was reasonable, and the comparative rate to Birmingham, on which the Commission seems to lay stress. It seems, that for a short time at least, a rate of \$1.01 was in force from Cincinnati to Atlanta, and that it was as to this rate, that the testimony of one witness before the Commission was taken. It appears in evidence here, that the rate from Cincinnati to Atlanta, in 1879, was \$1.89, and that afterwards it was \$1.10, and subsequently \$1.07, except, perhaps, as stated it was for a short time \$1.01. As to the rate to Birmingham, there is evidence before the court, which was evidently not before the Commission, namely: that the rate from Cincinnati to Birmingham, which seems previously to have been \$1.08, was forced down to 89 cents, by the building of the Kansas City, Memphis & Birmingham Railroad, which new road caused the establishment of a rate of 75 cents from Memphis to Birmingham, and by reason of water routes to the Northwest, such competition was brought about that the present rate of 89 cents from Cincinnati to Birmingham was the result. It seems to be no sufficient reason to determine the rate from Cincinnati to Atlanta unreasonable, because of the lower rate to Birmingham, when such lower rate is caused by conditions which do not operate as to Atlanta.

So far as the action of the Commission, in ordering a reduction of the rate from Cincinnati to Atlanta, is based on the fact that the same rate is charged to Augusta, that has perhaps been sufficiently discussed, in what has hereinbefore been said, with reference to the long and short haul clause. The rate to Augusta is caused by conditions which have been stated. No data is given the court from which it can judge whether the rate from Cincinnati to Atlanta on first class freight, taken in connection with the rates which can be charged, and are charged on other and lower classes of freight, gives more than a fair return to the railroads composing the lines, and the court is left to the findings of the Commission, and to the testimony of a number of railroad experts, who testified that the rate of \$1.07 is reasonable.

There is some difficulty in determining

what the duty of the court is, in a matter of this kind, under the Interstate Commerce Act. If the *conclusion* of the Commission that the rate is unreasonable is *prima facie* correct, under the language used that, "the findings of fact in the report of said Commission shall be *prima facie* evidence of the matters therein stated," then the report of the Commission would have greater weight with the court, than if only *facts found*, strictly speaking, are to be deemed *prima facie* correct. But in either event, if this is, as has been held, a *de novo* investigation, and inquiry is to be instituted here, under new pleadings, and new evidence, the court must be satisfied on the whole case before it, that the rate of \$1.07 is unreasonable.

In the case of *Interstate Commerce Com. v. Lehigh Valley R. Co.*, 3 Inters. Com. Rep. 796, 49 Fed. Rep. 177, the court used this language:

"But then again, upon an analysis of the above quoted provisions of section 16, it is demonstrable that, in such a case as this, it is the duty of the court to investigate the merits of the whole controversy, and form an independent judgment. The court, upon a petition alleging the violation of a 'lawful' order, is to proceed to 'hear and determine the matter, as a court of equity, in such manner as to do justice in the premises,' and to this end, it may prosecute in such mode, and by such persons, as it may appoint, all 'needful inquiries' to enable it to 'form a just judgment,' in the matter of the petition; and finally, 'on such hearing, the findings of fact in the report of said Commission shall be *prima facie* evidence of the matter therein stated.' Nothing can be clearer than that the findings by the Commission are not here decisive of the questions of fact. We have only to add that our conclusion is in harmony with that of the circuit court, in the case of *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 37 Fed. Rep. 567."

The court is to "investigate the merits of the whole controversy, and form an independent judgment," according to this last de-

cision, and according to *Judge Jackson* in the above case of *Kentucky & I. Bridge Co.* the "court is not confined to a mere re-examination of the case as heard, and reported by the Commission, but hears and determines the case *de novo*, upon proper pleadings and proof; the latter including not only the *prima facie* facts reported by the Commission, but all such other, and further testimony, as either party may introduce, bearing upon the matters in controversy."

The conclusion of the Commission should undoubtedly be considered in connection with the facts on which that conclusion was based; and the principal fact which seems to have been in the mind of the Commission is satisfactorily explained here, as has been indicated. The evidence offered here on behalf of the railroads is, in the opinion of the court, sufficient to overcome any *prima facie* case that may have been made by the findings of the Commission. On the whole testimony, as now before the court, it is not believed that the Commission would have found the rate in question to be unreasonable. Certainly the court cannot so determine.

It has been earnestly insisted that the action of the Commission, as to the rate from Cincinnati to Atlanta, is, in effect, making or fixing a rate, and that the order of the Commission is, for that reason, beyond the authority granted it by the Act of Congress. In view of what has just been said, and the opinion of the court before expressed as to this rate, it is deemed unnecessary to go into a discussion of this subject. The conclusion is, that the court would not be justified in granting the order prayed for by the Commission, requiring the defendant corporations to desist from charging a greater rate than \$1 per 100 pounds, on first class freight, in less than carload lots, from Cincinnati to Atlanta. The court being of the opinion, therefore, that the complainants are not entitled to a decree enforcing either the order as to the Social Circle rate, or the rate from Cincinnati to Atlanta, and that being the only relief prayed for, a decree must be entered dismissing the bill.

UNITED STATES SUPREME COURT.

INTERSTATE COMMERCE COMMISSION, *Appt.*,

v.

THE ATCHISON, TOPEKA & SANTA FE RAILROAD COMPANY; THE ATLANTIC & PACIFIC RAILROAD COMPANY; THE BURLINGTON & MISSOURI RIVER RAILROAD COMPANY; THE CALIFORNIA CENTRAL RAILWAY COMPANY; THE CALIFORNIA SOUTHERN RAILROAD COMPANY; THE CHICAGO, KANSAS & NEBRASKA RAILWAY COMPANY; THE MISSOURI PACIFIC RAILWAY COMPANY; THE ST. LOUIS & SAN FRANCISCO RAILWAY COMPANY, and THE SOUTHERN CALIFORNIA RAILROAD COMPANY.

[No. 1275.]

(See S. C. 149 U. S. 264, 285, 37 L. ed. 727.)

• The Act of March 3, 1891, establishing United States circuit courts of appeals, repealed those clauses of the Act to Regulate Commerce which

relate to appeals from the circuit court of the United States in cases prosecuted under the Interstate Commerce Act.

APPPEAL from a decree of the Circuit Court of the United States for the Southern District of California, in a proceeding to enforce obedience to an order of the Interstate Commerce Commission, requiring the appellees to change and modify their freight rates which discriminated against San Bernardino, in violation of the Act of February 4, 1887, to regulate commerce.

On motion to dismiss. Dismissed.

See same case below, 50 Fed. Rep. 205.

STATEMENT: (From brief of appellees.) May 22, 1889, complaint was filed before the Interstate Commerce Commission against the appellees by the Board of Trade of San Bernardino, California, alleging said companies' maintenance of freight rates discriminative against San Bernardino, and in violation of the Act of February 4, 1887, to regulate commerce (24 Stat. at L. 879).

Upon hearing, order was entered by the Commission on July 19, 1890, requiring the appellees to change and modify such rates. The appellees failed to obey such order, whereupon the Interstate Commerce Commission commenced this proceeding to enforce such obedience in the United States Circuit Court for the

Southern District of California, on May 1, 1891, pursuant to section 16 of the Interstate Commerce Act (amended Act of March 3, 1889, 25 Stat. at L. 859). That court decreed in favor of the appellees on April 25, 1892, on the sole ground that upon the proof presented the alleged unlawful discrimination in rates did not exist (50 Fed. Rep. 295) and thereupon, on May 14, 1892, the commission appealed to this court.

Such decision was rendered and this appeal was taken after the creation of the circuit courts of appeals. The question is whether such direct appeal lies to this court.

Messrs. Geo. R. Peck, A. T. Britton, and A. B. Browne, for appellees, in favor of motion.

Mr. W. A. Day, for appellant, in opposition.

The Chief Justice: The motion to dismiss is granted. *McLish v. Roff*, 141 U. S. 661 [35: 893]; *Lau Ow Bie v. United States*, 144 U. S. 47 [36: 340]; *Hubbard v. Soby*, 146 U. S. 56 [36: 886]; *Chicago & N. W. R. Co. v. Osborne*, 146 U. S. 354 [36: 1002].

Appeal dismissed.

INTERSTATE COMMERCE COMMISSION.

THE BOARD OF TRADE OF TROY, ALABAMA,

v.

THE ALABAMA MIDLAND R. CO., THE CENTRAL RAILROAD & BANKING COMPANY OF GEORGIA AND H. M. COMER AND OTHERS, THE RECEIVERS THEREOF; THE SAVANNAH, FLORIDA & WESTERN RAILWAY COMPANY; THE KANSAS CITY, FORT SCOTT & GULF RAILROAD COMPANY; THE KANSAS CITY, MEMPHIS & BIRMINGHAM RAILROAD COMPANY; THE LOUISVILLE & NASHVILLE RAILROAD COMPANY; THE MOBILE & OHIO RAILROAD COMPANY; THE EAST TENNESSEE, VIRGINIA & GEORGIA RAILWAY COMPANY; THE WESTERN RAILWAY OF ALABAMA; THE MISSOURI PACIFIC RAILWAY COMPANY; THE WABASH RAILROAD COMPANY; THE SIOUX CITY & PACIFIC RAILROAD COMPANY; THE CINCINNATI, NEW ORLEANS & TEXAS PACIFIC RAILWAY COMPANY; THE ILLINOIS CENTRAL RAILROAD COMPANY; THE EVANSVILLE & TERRE HAUTE RAILROAD COMPANY; THE JEFFERSONVILLE, MADISON & INDIANAPOLIS RAILROAD COMPANY; THE LOUISVILLE, NEW ALBANY & CHICAGO RAILWAY COMPANY; THE CLYDE STEAMSHIP COMPANY; THE OCEAN STEAMSHIP COMPANY OF SAVANNAH; THE PROVIDENCE & STONINGTON STEAMSHIP COMPANY; THE NEW YORK & TEXAS STEAMSHIP COMPANY; THE METROPOLITAN STEAMSHIP COMPANY; THE CITIZENS' STEAMBOAT COMPANY; THE HARTFORD AND NEW YORK TRANSPORTATION COMPANY; THE GRAND TRUNK RAILWAY COMPANY OF CANADA; THE NEW HAVEN STEAMBOAT COMPANY; THE PEOPLE'S LINE STEAMERS; THE MAINE STEAMSHIP COMPANY; THE NEW YORK CENTRAL & HUDSON RIVER RAILROAD COMPANY; THE CENTRAL VERMONT RAILROAD COMPANY; THE BRIDGEPORT STEAMBOAT COMPANY; THE NORWICH & NEW YORK TRANSPORTATION COMPANY; THE CANADIAN PACIFIC RAILWAY COMPANY; THE MINNEAPOLIS, ST. PAUL & SAULT STE MARIE RAILWAY COMPANY; THE HOUSATONIC RAILROAD COMPANY; THE CENTRAL RAILROAD COMPANY OF NEW JERSEY; THE BOSTON & ALBANY RAILROAD COMPANY; THE BOSTON & MAINE RAILROAD COMPANY; THE NEW YORK & NEW ENGLAND RAILROAD COMPANY; THE OLD COLONY RAILROAD COMPANY; THE FITCHBURG RAILROAD COMPANY; THE MAINE CENTRAL RAILROAD COMPANY; THE CONNECTICUT RIVER RAILROAD COMPANY; THE PENNSYLVANIA RAILROAD COMPANY; THE PHILADELPHIA & READING RAILROAD COMPANY; THE BALTIMORE & OHIO RAILROAD COMPANY; THE PROVIDENCE & SPRINGFIELD RAILROAD COMPANY; THE CHESTER RAILROAD COMPANY; THE CONCORD & MONTREAL RAILROAD COMPANY.

1. The fact, that the property and affairs of a carrier have been placed by a United States court in the hands of a receiver, does not affect the jurisdiction of this Commission under a complaint charging such carrier with violations of the Act to Regulate Commerce.
2. The continuity of the carriage of freight over a line formed by two or more roads, is not broken *in fact* and cannot be broken in law by the charge of a local rate by one (or more) of such roads as its proportion of the through rate.
3. The successive receipt and forwarding in

ordinary course of business by two or more carriers of interstate traffic shipped under through bills for continuous carriage over their lines, is assent to a "common arrangement" for such carriage within the meaning of the Act to Regulate Commerce without previous express agreement between them, and the obligations imposed by the statute cannot be evaded by the demand of the local charge for the haul over its own road by one or more of such carriers or by the declaration on the part of one or more of said carriers that as to the transportation over its road it is a local and not a through carrier. (Re-affirming the doctrine laid down in *Georgia R. Com. v. Clyde SS. Co.* 4 Inters. Com. Rep. 120.)

4. A local rate, which presumably is adopted as covering both the initial and final expense of a local haul, is *prima facie* excessive as part of a through rate over a through line composed of two or more carriers.
5. Where a proportion of a through rate for part of a through haul is greatly disproportionate to the balance of the through rate,

the knowledge of the circumstances and conditions (if any) justifying such disproportionate rate being peculiarly in the possession of the carrier, the burden is on the carrier to make proof of such justifying circumstances and conditions.

6. The facts, that one city is much larger and has more important and extensive business interests than another and has been treated by the carriers in making rates to surrounding points as a "trade center," is no justification for a continuation of discriminatory rates in favor of such city. The object of the Act to Regulate Commerce was to eradicate the existing system of rebates and unjust discriminations in favor of particular localities, special enterprises and favored individuals.
7. Unjust discrimination as between localities or individuals cannot in the nature of things be essential to the business prosperity of the carrier, and it is no valid objection to the correction of unlawful rates to one point that it involves a like correction as to other points.

Complaint filed June 29, 1892.—Answers filed July 15 to August 31, 1892.—Heard at Troy, Ala., Nov. 11, 1892.—Briefs filed March 7 to May 1, 1893.—Decided August 15, 1893.

GREATER charge for shorter distances. Unjust discrimination and undue preference against localities.

Mr. W. C. Oates, for complainant.

Mr. A. A. Wiley, for the Alabama Midland Railway Company and the Savannah, Florida & Western Railway Company.

Mr. E. L. Russell, for the Mobile & Ohio Railroad Company.

REPORT AND OPINION OF THE COMMISSION.

Clements, Commissioner :

The complainant, the "Board of Trade of Troy," is an association of citizens of Troy, Alabama, organized for the promotion of the business interests of that city. The defendants (hereinafter named) form several through lines between the points mentioned in the complaint, and, as members of such lines, are engaged in interstate commerce, wholly by rail or partly by rail and partly by water. The Alabama Midland Railway Company and the Central Railroad & Banking Company of Georgia reach Troy directly and are the initial carriers in all the lines from that point. These two roads for brevity are hereafter designated, respectively, as the Alabama Midland and the Georgia Central.

The general ground of complaint is, in substance, that, Troy, being in active competition for business with Montgomery and Columbus, the lines of defendants to Troy and those cities unjustly discriminate in their rates against the former and give the latter an undue preference or advantage in respect to certain commodities and classes of traffic. The specific charges, in-

sisted on at the hearing and to which the testimony relates, are:

1. That the Alabama Midland and the defendant roads connecting and forming lines with it from Baltimore, New York and the east to Troy and Montgomery charge and collect a higher rate on shipments of class goods from those cities to Troy than on such shipments through Troy to Montgomery, the latter being the longer distance point by 52 miles.

2. That the "Alabama Midland and the Georgia Central and their connections unjustly discriminate against Troy and in favor of Montgomery" in charging and collecting \$3.22 per ton to Troy on phosphate rock shipped from the South Carolina and Florida fields and only \$3.00 per ton on such shipments to Montgomery, the longer distance point by both said roads, and that all phosphate rock carried from said fields to Montgomery over the road of the Alabama Midland has to be hauled through Troy.

3. That the rates on cotton established by said two roads and their connections on ship-

ments to the Atlantic seaports, Brunswick, Savannah and Charleston, unjustly discriminate against Troy and in favor of Montgomery, in that the rate per hundred pounds from Troy is 47 cts. and that from Montgomery, the longer distance point, is only 40 cts., and that such shipments from Montgomery over the road of the Alabama Midland have to pass through Troy.

4. That on shipments for *export* from Montgomery and other points within what is termed in the complaint "the jurisdiction" of the Southern Railway & Steamship Association, to the Atlantic seaports, Brunswick, Savannah, Charleston, West Point and Norfolk, a lower rate is charged than the regular published tariff rate to such seaports, in that Montgomery and such other points are allowed by the rules of said Association to ship through to Liverpool *via* any of those seaports at the lowest through rate *via* any one of them on the day of shipment, which may be much less than the sum of the regular published rail rate and the ocean rate *via* the port of shipment; that this reduction is taken from the published tariff rail rate to the port of shipment; and that, this privilege being denied to Troy, is an unjust discrimination against Troy in favor of Montgomery and such other favored cities and that it is, also, a discrimination against shipments which terminate at such seaport in favor of shipments for *export*.

5. That Troy is unjustly discriminated against in being charged on shipments of cotton *via* Montgomery to New Orleans the full local rate to Montgomery by both the Alabama Midland and the Georgia Central.

6. That the rates on "class" goods from western and northwestern points established by the defendants forming lines from those points to Troy are relatively unjust and discriminatory as against Troy when compared with the rates over such lines to Montgomery and Columbus.

Answers to the complaint have been filed in behalf of the Alabama Midland; the Georgia Central; the Louisville & Nashville Railroad Company; the Savannah, Florida & Western Railway Company; the Western Railway of Alabama; the Louisville, New Albany & Chicago Railway Company; the Illinois Central Railroad Company; the Mobile & Ohio Railroad Company; the Kansas City, Memphis & Birmingham Railroad Company; the Kansas City, Fort Scott & Memphis Railroad Company; the Pennsylvania Railroad Company; the Philadelphia & Reading Railroad Company; the New York & New England Railroad Company; the Providence & Springfield Railroad Company; the Central Railroad Company of New Jersey; the Maine Central Railroad Company; the Boston & Maine Railroad Company; the Metropolitan Steamship Company; 4 INTER S.

the Connecticut River Railroad Company; the Providence & Stonington Steamship Company; the Fitchburg Railroad Company; the Concord & Montreal Railroad Company; and the Canadian Pacific Railway Company.

A few of the respondents deny all participation in traffic or through rates from or to Troy; some allege that their proportion of any charge over their own roads or a fixed amount, which remains the same no matter what may be the point of origin or destination of the traffic, and hence that they cannot be guilty of discrimination as against Troy or any other locality; and others contend, that although they receive a proportion of through rates on through shipments over their roads between the points named in the complaint, yet they are not "under a common control, management or arrangement for continuous carriage" with the other members of the through lines. These matters of defense may be disposed of before entering upon the discussion of the other and more material issues raised by the pleadings. Those of the defendants, who, it may appear, do not participate in the traffic or rates in question, are not amenable to, and cannot be affected by, any order which the Commission may make in this case. The fact, that a carrier's proportion of a through rate is its local for the haul over its own road or is a fixed amount, which remains the same for all points of origin or destination of traffic reached by the through line, cannot relieve it from joint responsibility as a component of the through line, if the entire rate be violative of the law. In the case of the *Georgia R. Co. v. Clyde SS. Co.*, 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 324, it is said, "The total rate or charge for through carriage over two or more lines, whether made by the addition of established locals, or of through and local rates, or upon a less proportionate basis, is the through rate that is subject to scrutiny by the regulating authority; how the rate or charge is made is only material as bearing upon the legality of the aggregate charge, and how any reduction ordered may be accomplished, whether by lowering locals or proportions, is matter for the carriers to determine among themselves;" and again, "where two or more roads forming a continuous connecting line between points in different states bill and carry interstate traffic through to certain stations on the last road forming such line, neither the roads together nor any one of them can evade the obligations of the Act to Regulate Commerce by declaring that as to such traffic it is a local carrier." See also *James & Mayer Buggy Co. v. Cincinnati, N. O. & T. P. Ry. Co.*, 3 Inters. Com. Rep. 683, 4 I. C. C. Rep. 744. Goods cease to be a part of the general mass of property in a state when they have been shipped or entered with a common

carrier for transportation to another state. *Coe v. Errol*, 116 U. S. 517, 29 L. ed. 715; *Kidd v. Pearson*, 128 U. S. 1, 32 L. ed. 346. From that time until they reach their destination and "become incorporated add mixed up with the mass of property" in the state where delivered, they are subjects of interstate commerce, *Leisy v. Hardin*, 185 U. S. 110, 34 L. ed. 133, and the rates charged for their carriage are within the regulating power of this Commission under the Interstate Commerce Law. By sec. 7 of that law, it is made unlawful for carriers subject to that Act "to enter into any combination, contract, or agreement, express or implied, to prevent, by change of time schedule, carriage in different cars, or by other means or devices, the carriage of freights from being continuous from the place of shipment to the place of destination," and that "no break of bulk, stoppage, or interruption made by such common carrier shall prevent the carriage of freights from being and being treated as one continuous carriage from the place of shipment to the place of destination, unless such break, stoppage or interruption was made in good faith for some necessary purpose, and without any intention to avoid or unnecessarily interrupt such continuous carriage or to evade any of the provisions of this Act." The continuity of the haul is not broken in fact and cannot be broken in law by one or more carriers, members of a through line, charging local rates as their proportion of a through rate. If the continuity of the carriage may not be thus interrupted, can the exaction of local rates exempt the carrier from liability under the law by placing him in the attitude of a strictly local carrier, operating under no "common control, management or arrangement" with the other carriers participating in the through haul? If this be conceded, the most vital provisions of the law may be readily evaded and nullified. For instance, a terminal carrier, part of a continuous through line, could elect to charge on through traffic its local to one or any number of stations beyond, and no violation of law could be alleged because as to the short haul the carrier would not be subject to the Act. The charge of a local rate and declaration by a carrier that as to through transportation to certain points on its road it is a local carrier, *cannot alter the fact*. The law regards the substance of things, and a palpable device for evasion of the law will not be allowed to accomplish its purpose. The facts, that the carriage is continuous, that the traffic is through interstate traffic and that the carrier in due and ordinary course of business accepts and forwards it, are sufficient to establish responsibility under the law. As is said in the case of the *Georgia R. Com. v. Clyde SS. Co.*, 4 Inters. Com. Rep. 120, 5 I. C. C. Rep. 824: "The receipt

successively by two or more carriers for transportation of traffic shipped under through bills for continuous carriage over their lines is assent to a common arrangement for such continuous carriage or shipment, and *previous formal arrangement between them is not necessary to bring such transportation under the terms of the law.*"

The answer of the Georgia Central sets forth, among other things, that it is in the hands of a receiver, H. M. Comer, appointed "by order of the United States Court for the Eastern Division of the Southern District of Georgia," and that the receiver, "being an officer of the United States court, and subject only to its order, is not subject to the jurisdiction of this Commission in the premises." The main purpose of a receivership is, to preserve property in controversy *pendente lite*, and this devolves upon the court appointing the receiver the duty of protecting the possession of the property in his hands. It is a general rule, therefore, that before suit is brought against a receiver, leave of the court by which he was appointed must be obtained. "This rule is necessary to prevent one creditor from obtaining undue advantage over others in the enforcement of his claim; otherwise courts outside the jurisdiction of the court which appointed the receiver might proceed to judgment and sell the property within their reach under execution, and the appointing court would be powerless to prevent the injustice." Beach, *Receivers*, §§ 652, 655; *Barton v. Barbour*, 104 U. S. 126, 26 L. ed. 672. Complaints before this Commission do not fall within the reason of the rule requiring consent of the court appointing a receiver to be obtained before bringing suit. The main object of such complaints is the regulation or readjustment of rates alleged to be illegal because unjustly discriminative or unreasonable in themselves, and reparation for injury sustained by reason of such illegality; and the order of the Commission for reparation or other relief, if not voluntarily obeyed by the carriers, can only be enforced by suit in the proper court. The Commission renders no judgment upon which execution can issue and be levied on property in the hands of a receiver. The question whether property in the possession of a receiver can be made subject to an order of reparation issued by us would arise on proceedings in the courts for the enforcement of such order. *Loud v. South Carolina R. Co.* 4 Inters. Com. Rep. 205, 5 I. C. C. Rep. 529. No order of reparation is asked in the present case. It appears, moreover, that by Act of Congress of March 3, 1867 (U. S. Stat. 1836-87, p. 552) receivers appointed by United States Courts may be sued "without the previous leave of the court in which such receiver was appointed."

The answers of the defendants who admit participation in and responsibility for the rates

complained of, deny that those rates are unlawful or violative of any of the provisions of the Act to Regulate Commerce, the main ground upon which they are sought to be justified being that the circumstances and conditions attending transportation to Troy are not substantially similar to those attending transportation to Montgomery and Columbus because of water and rail competition at the latter points.

Facts and Conclusions.

Troy is situated at the intersection of the roads of the Alabama Midland and the Georgia Central companies. Montgomery is at the terminus of the Alabama Midland, fifty two miles north west from Troy, and shipments to Montgomery over that road from New York, Baltimore and northeastern cities, and from the Atlantic seaports, Brunswick, Savannah, Charleston, West Point and Norfolk, and from Port Royal, So. Ca. and Gainesville, Ocala and Tampa, Florida, pass through Troy.

The Savannah, Florida & Western Railway and the Ocean Steamship Company, and the Savannah, Florida & Western Railway and Merchants & Miners Transportation Company, form with the Alabama Midland Railway two through lines, the former from New York and the latter from Baltimore, over which traffic is carried on through rates and through bills of lading to Troy and through Troy to Montgomery. The Georgia Central forms through lines in connection with the Ocean Steamship Company and Merchants & Miners Transportation Company to Troy and Montgomery from New York and Baltimore. The class rates in cents per hundred pounds, except Class F, which is per bbl., over the above lines (sea and rail) from New York and Baltimore to Troy and Montgomery, respectively, are, as follows:

SEA & RAIL.

From New York.			From Baltimore.	
Class	To Montgomery	To Troy	To Montgomery	To Troy
1	114	136	106	129
2	96	117	90	111
3	86	108	83	98
4	73	89	70	84
5	60	74	57	70
6	49	61	46	58
A.	36	—	33	—
B.	48	—	45	—
C.	40	—	37	—
D.	39	—	36	—
E.	58	—	55	—
H.	68	—	72	—
F.(per bbl.)	78	—	65	—

There are also published "all rail" rates *via* the "Great Southern Despatch" line, from New York and Baltimore to Troy and Montgomery. On this line traffic is carried from New York to Harrisburg over the Pennsylvania road, from Harrisburg to Hagerstown over the Cumberland Valley road, from Hagerstown to

Bristol over the Norfolk & Western, and from Bristol to Chattanooga over the East Tennessee, Virginia & Georgia road. From Chattanooga the principal routes or lines to Troy and Montgomery appear to be, (1) to Atlanta over the East Tennessee, Virginia & Georgia road, from Atlanta to Montgomery over the Western Railway of Alabama, and from Montgomery to Troy over either the Alabama Midland or the Georgia Central; (2) to Birmingham over the Alabama Great Southern road, from Birmingham to Montgomery over the Louisville & Nashville road, and from Montgomery to Troy over the two roads named in route 1 above; (3) to Calera over the East Tennessee, Virginia & Georgia road, from Calera to Montgomery over the Louisville & Nashville road, and from Montgomery to Troy over the two roads named in route 1 above; and (4) over the line of the Georgia Central *via* Macon and Columbus to Troy and Montgomery.

The class rates in cents per hundred pounds (except Class F, which is per bbl.) over the above described "all rail" lines to Troy and Montgomery from New York and Baltimore, are as follows:

ALL RAIL.

From New York.			From Baltimore.	
Class	To Montgomery	To Troy	To Montgomery	To Troy
1	114	144	106	138
2	96	123	90	115
3	86	108	83	105

D.	39	—	36	—
E.	58	—	55	—
H.	68	—	65	—
F.(per bbl.)	78	—	72	—

It appears that shipments of phosphate rock are made *via* the Alabama Midland, as the terminal road, to Troy and through Troy to Montgomery from Charleston and Port Royal, South Carolina, and from Gainesville and other points in Florida. The roads which connect, and constitute through lines, with the Alabama Midland, from those cities to Troy and Montgomery, are the following: from Charleston, the Savannah, Florida & Western and the Charleston & Savannah Railway; from Port Royal, the above two roads, and the Port Royal & Augusta (Cent. R. R. of Ga.); from Gainesville, the Savannah, Florida & Western Railway. The Georgia Central has a line from Troy and from Montgomery to Port Royal; it also forms lines in connection with the Charleston & Savannah Railway, or the Georgia Railroad and South Carolina Railroad, from those

points to Charleston, and with the Savannah, Florida & Western Railway, to Gainesville.

The rates in cents per ton on phosphate rock from Port Royal, Charleston and Gainesville, to Troy and Montgomery, respectively, are, as follows:

From	Port Royal	Charleston	Gainesville
To			
Troy	322	322	322
Montgomery	300	300	300

The following roads constitute through routes or lines in connection with Alabama Midland to the Atlantic sea-ports, Brunswick, Savannah, Charleston, West Point and Norfolk; to wit, to Brunswick, the Savannah, Florida & Western and the Brunswick and Western railways; to Savannah, the Savannah, Florida and Western Railway; to Charleston, the Savannah, Florida & Western and the Charleston & Savannah railways; to West Point, Va., the Western Railway of Alabama, the Atlanta & West Point Railroad and the Richmond & Danville Railroad; or (another route) the Savannah, Florida & Western Railway, the Charleston & Savannah Railway, the Northeastern Railroad of South Carolina, the Wilmington, Columbia & Augusta Railroad, the Wilmington & Weldon Railroad, the Petersburg Railroad, the Richmond & Danville Railroad; to Norfolk, the Savannah, Florida & Western Railway, the Charleston & Savannah Railway, the Northeastern Railroad of South Carolina, the Wilmington & Weldon Railroad, and the Seaboard & Roanoke Railroad.

In connection with the Georgia Central the roads forming through lines from Troy and Montgomery to these seaports are, as follows: to Brunswick, the East Tennessee, Virginia & Georgia Railway; (to Savannah, the Georgia Central has a line from Troy & Montgomery to Savannah); to Charleston, the Charleston & Savannah Railroad, or (another route) the Georgia Railroad and the South Carolina Railroad; to West Point (Va.) the Richmond & Danville Railroad, or (another route) the roads composing the Atlantic Coast Line and the Richmond & Danville; to Norfolk, the roads composing the Atlantic Coast Line, or (another route) the roads composing the Seaboard Air Line.

The rates in cents per hundred pounds on cotton from Troy and Montgomery respectively, to these ports are:

To	Brunswick	Savannah	Charleston	West Point	Norfolk
From					
Troy	47	47	52		
Montgomery	45	45	45	51	51

When the complaint was filed the cotton rate from Montgomery to Brunswick, Savannah and Charleston was 40 cts. per hundred pounds. It has since, as appears above, been raised to 45 cts. and the rate from Troy to Charleston has been raised to 52 cts.

The most available routes or lines between Troy and Louisville, Cincinnati and St. Louis, respectively, appear to be: (1), from Troy to Montgomery over the Alabama Midland or Georgia Central and from Montgomery over the Louisville and Nashville to Louisville, Cincinnati and St. Louis; (2), from Troy to Montgomery over the Alabama Midland or Georgia Central, from Montgomery to Atlanta over the Western Railway of Alabama and Atlanta & West Point Railroad, from Atlanta to Chattanooga over the Western & Atlantic or East Tennessee, Virginia & Georgia Railroad, and from Chattanooga to Cincinnati over the Cincinnati, New Orleans & Texas Pacific Railway; (3), from Troy to Montgomery over the Alabama Midland or Georgia Central, from Montgomery to Selma over the Western Railway of Alabama, from Selma to Lauderdale (Miss.) over the East Tennessee, Virginia & Georgia road, and from Lauderdale to St. Louis over the Mobile & Ohio road; (4), from Troy *via* Columbus to Chattanooga over the line of the Georgia Central, and from Chattanooga to Cincinnati over the Cincinnati, New Orleans & Texas Pacific road; (5), from Troy *via* Columbus to Chattanooga over the Georgia Central, from Chattanooga to Burgin, Ky., over the Cincinnati, New Orleans & Texas Pacific road and from Burgin to Louisville over the Louisville Southern Railroad; (6), from Troy *via* Columbus to Chattanooga over the line of the Georgia Central, and thence over the Nashville, Chattanooga & St. Louis and the Missouri Pacific railways to St. Louis. The first three of these routes are *via* Montgomery and the last three *via* Columbus.

None of the traffic involved in this case is carried by the Georgia Central either through Troy to Montgomery or through Montgomery to Troy. Its Mobile & Girard line runs in a southwesterly direction from Columbus to and through Troy towards Mobile (intersecting at Troy, as before stated, the Alabama Midland) and its Montgomery & Eufaula line runs in a direction a little north of west from Eufaula to Montgomery. These two lines (the Mobile & Girard and the Montgomery & Eufaula) cross each other at Union Springs, Ala., thirty one miles from Troy and forty from Montgomery and traffic from or to Troy over the lines of the Georgia Central is carried *via* Union Springs. Traffic for Montgomery coming *via* Columbus or Eufaula over these lines does not pass through Troy, and no departure, therefore, from the "long and short haul rule" of the 4th section of the Statute, as against

Troy as the shorter distance point and in favor of Montgomery as the longer distance point, appears to be chargeable to the Georgia Central. Shipments consigned to Troy *via* Columbus or Montgomery, the latter cities being as to such shipments the shorter distance points, can raise no question of a departure from the rule as against Troy.

But as to the Alabama Midland and its connections constituting through lines, the case is different. Interstate traffic is carried over that road to Troy and through Troy on to Montgomery, and in the opposite direction, from Troy, and from Montgomery through Troy, the haul to and from Montgomery being 52 miles greater; and in respect to this traffic the proof shows departures from the rule of the Statute, (1) as to class goods shipped from New York, Baltimore and the east; (2) as to phosphate rock, shipped from Port Royal and Charlestown, South Carolina, and Gainesville and other points of origin of such shipments in Florida; and (3) as to cotton shipped from Troy and from Montgomery to the Atlantic seaports, Brunswick, Savannah, Charleston, West Point and Norfolk. As will be seen from the tables given above, the "sea and rail" rates on class goods from Baltimore to Troy range from 12 cts. per hundred pounds on *Class 6* to 23 cts. on *Class 1* higher than those on such goods shipped through Troy to Montgomery, and from New York to Troy, from 12 cts. to 22 cts., and the "all rail" rates from Baltimore and New York to Troy, from 14 cts. to 30 cts. These class rates are applied to sugar and coffee, which are the heavy goods mostly shipped to Troy from the east, and also to dry goods, notions, and many other commodities. The rate on phosphate rock from Port Royal, Charleston, and Gainesville to Troy is 22 cts. per ton higher than that on such rock shipped through Troy to Montgomery, and on cotton the rate from Troy to the seaports, Brunswick and Savannah, is 2 cts. per hundred pounds and to Charleston 7 cts. per hundred higher than that from Montgomery *via* Troy.

Where substantial dissimilarity of circumstances and conditions is set up by defendant carriers in justification of departures from the "long and short haul" rule of the statute, the burden is upon them to establish such dissimilarity. *Re Louisville & N. R. Co.* 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 31; *Spartanburg Board of Trade v. Richmond & D. R. Co.* 2 Inters. Com. Rep. 193, 2 I. C. C. Rep. 304. Water competition at Montgomery *via* the Alabama river, is adduced as a justification in the answer of the Alabama Midland and by some of the other defendants. In the case of *Re Louisville & N. R. Co.*, *supra*, it was held that "actual" water competition "of controlling force in respect to

traffic important in amount" may constitute the dissimilar circumstances and conditions authorizing a departure from the general rule of the statute. In the case of *Harwell v. Columbus & W. R. Co.*, 1 Inters. Com. Rep. 631, 1 I. C. C. Rep. 236, the complaint alleged unjust discrimination against Opelika and in favor of Montgomery and Columbus. Water competition at Montgomery *via* the Alabama river was (as in the present case) set up by way of justification. This defense was not sustained and the Commission in overruling it said, "the mere fact that a point is situated upon a navigable stream does not of itself justify the lesser charge for the longer haul to such point," and that, in order to justify such lesser charge, the water competition must "control the carriage of the traffic on which the discrimination is made." In that case it is further said, "The Commission is aware that an independent and active line of steamers connects Montgomery with the Atlantic seaboard at Mobile," but that the fact "without more," that the "railroads have water competition and are compelled to meet it," is not held to be "sufficient to justify the lesser charge for the longer distance." Conceding that there is a line of boats running between Montgomery and Mobile (of which fact, however, there is no proof, in this case) that alone would not be sufficient to justify the greater charge to Troy than to Montgomery. At the conclusion of the taking of the testimony, it was agreed between counsel, that "each side should, within two weeks from the date of the taking of the testimony, file an affidavit with the Commission setting forth the volume of business of Troy and Montgomery, respectively, and also the number of inhabitants of each." In the affidavit filed by counsel for the defendants is a statement that "the business on the Alabama river, according to the report of the United States Engineer, for the year, 1891, was 52,349 bales of cotton carried by boat and 44,500 tons of other freight." This statement is outside the agreement, but aside from that fact, it purports to give the entire cotton and other business on the river for the year named without stating the point or points at which it originated, or the direction in which it was moved. How much of it went from Montgomery or points above or below Montgomery down the river towards Mobile, or from Mobile and points above that city up the river to Montgomery does not appear. As showing water competition of controlling force at Montgomery on traffic to that city from New York, Baltimore and other northeastern cities, or from the South Carolina and Florida phosphate beds, or from Montgomery to the Atlantic sea-ports, Brunswick, Charleston and Savannah, the statement is valueless. (This is true, also, as to the traffic from St. Louis and

from Louisville, Cincinnati and other Ohio river points, hereinafter to be considered.) There are regular lines of ocean steamers from those ports to New York, Baltimore and other cities on the northeast coast, but there does not appear to be such line from Mobile, either to those cities or to any foreign port. The only witness questioned by counsel for the defendants as to the effect of water competition at Montgomery on shipments of cotton to the Atlantic ports testified that "the river competition plays no great part." An attempt was made to show that some shipments of phosphate rock had been made from the Florida points, Ocala and Tampa (the latter on the Gulf coast) *via* Mobile and the Alabama river to Montgomery, but the witness testified that he had never known such shipments to be made, that he himself had "tried to get a rate by that line to Montgomery and had been unable to get it," and that he thought it impracticable as "the goods would have to be transferred at Mobile to get to Montgomery and then would have to be hauled to the works." No attempt is made to establish substantial dissimilarity of circumstances and conditions at Montgomery on the ground of rail competition further than by proof of the fact that there are a number of railway lines running to and through that city connecting with different parts of the country. This alone, it is scarcely necessary to say, is not sufficient. *Re Louisville & N. R. Co.* 1 Inters. Com. Rep. 278, 1 I. C. C. Rep. 31.

Our conclusion is that no justification has been shown for the departures, complained of and established by the proof, from the general rule of the 4th section of the Act to Regulate Commerce.

The evidence also sustains the allegation of the complaint, that on shipments for export to the Atlantic ports, Brunswick, Savannah, West Point and Norfolk, from Montgomery and other localities within what is termed in the complaint "the jurisdiction" of the Southern Railway & Steamship Association, Montgomery and such other points are allowed, under the rules of that Association, to ship through to Liverpool *via* any one of those ports at the lowest through rate *via* any of them at the date of shipment—in other words, at the lowest combination of inland and ocean rates from the interior point to the foreign market. This may result in a less through rate than the sum of the regular published tariff rail rate to the port of transshipment and the ocean rate thence. For example, if at the date of shipment the regular rail rate to Savannah be 40 cts. and the ocean rate from that port to Liverpool 58 cts., making a through rate of 98 cts., and the rail rate to Norfolk be 45 cts., and the ocean rate from that port to Liverpool 85 cts., making a through rate of 80

cts., Montgomery is allowed on a shipment *via* Savannah the latter rate of 80 cts., or 18 cents less than the sum of the regular inland rate to that port and the ocean rate on. This 18 cts. is taken from the published inland rail rate to Savannah and not from the ocean rate. This privilege is denied to Troy, and the result is that on two shipments to Savannah for export made the same day, the one from Montgomery (the longer distance point both over the Alabama Midland and the Georgia Central) and the other from Troy, the rate charged the Troy shipper is 45 cts. and that charged the Montgomery shipper is only 82 cts. This discrimination would also exist between a shipment from any interior point consigned to the domestic port and one for export consigned to a foreign market.

The question, whether the making of export rates through the port of New York of which the inland proportion accepted by the carriers was less (often 10 cts. or more per hundred pounds) than the published tariff rates charged on like traffic at the same time from interior points to the same port as its final destination, was unlawful as being an unjust discrimination against the latter, was presented to the Commission in the case of *New York Produce Exch. v. New York Cent. & H. R. R. Co.*, 2 Inters. Com. Rep. 553, 1 I. C. C. Rep. 188. The Commission decided that the difference made by the carriers between the proportion of the through rate from interior points to New York on export traffic consigned to foreign countries and the rate charged contemporaneously on the like kind of traffic from the same interior points consigned to New York, "was not shown to be justified by any circumstances tending to show that it was just and proper, and that it must therefore be deemed an unjust and unlawful discrimination as against the transportation terminating at that port." It was further held that under the amendment of March 2, 1889, to the Act to Regulate Commerce, requiring ten days' previous notice of advances and three days' previous notice of reduction in rates, they cannot be varied from day to day, or oftener, to meet fluctuations in ocean rates and that the only practicable mode yet devised for making through export rates, is to add to the established inland rates from the interior to the seaboard the current ocean rates. On the 28d of March, 1889, the Commission issued a general order in reference to publication under the amendment of March 2, 1889, of advances and reductions in joint rates and fares, in which, among other things, it was stated, that tariffs, whether joint or individual, for merchandise billed or intended for export by sea were subject to the requirement of notice of any change therein, the same as in the case of other tariffs. After the pub-

lication of this order, a hearing was had before the Commission at the request of a large number of interstate carriers south of the Potomac and Ohio rivers, as to the application of this order to export traffic through our Atlantic and Gulf ports from the Chesapeake Bay to those in Texas. At this hearing it was insisted, in substance, that, the vessel service at the Trunk Line ports being ample, no material difficulty was found in the transportation of exports to them at established tariff rates, but that, on account of the scarcity of sea-going vessels at these southern ports and the consequent absence of competition, vessels at the latter were able to a larger extent to exact terms to suit themselves and this resulted in great fluctuations in ocean rates affecting the stability of the inland proportions of the through rates. These and other matters were presented as justifying the exemption in respect to export rates of these carriers from the order as to publication of notice of advances and reductions and from the general rule requiring the inland proportion of a through export rate to be not less than the rate on domestic traffic to the same point. It is said in our Third Annual Report, that "in consequence of these conditions, a method came into use, and has since prevailed over a large number of the southern states, of an export rate made every day to be in force as to the export rates for the succeeding twenty-four hours, based on the vessel facilities in the southern ports and their ocean rates, and on the lowest combination of the inland and ocean rates from the interior point of shipment to the foreign market, the through rate thus made having no reference to the established inland rate for consignment at the seaboard." In view of the matters set forth and proven by the southern carriers and of the fact that the Commission had intimated in reference to the export rate *via* the port of Boston (*Re Export Trade of Boston*, 1 Inters. Com. Rep. 25, 1 I. C. C. Rep. 24) that there might be substantially different circumstances and conditions affecting export traffic in different parts of the country, the Commission, while not expressly sanctioning this method of making export rates through the southern ports, forbore to condemn it, and held the question presented for further investigation and consideration. In the same report the Commission also stated that it expressed no opinion on the subject, but deemed it proper to lay before Congress the substance of the evidence taken at the hearing granted the southern carriers. Third Annual Rep. pp. 64-69.

The main cause of complaint on the part of Troy, however, in connection with this system of making export rates, as disclosed by the evidence, is, that while its benefits are given by the roads composing the Southern

Railway & Steamship Association to Montgomery and other favored localities on their lines, they are denied to Troy, and it is contended that this is an unjust discrimination against Troy. This contention is apart from and independent of the question, whether the system is itself lawful and justified as applied to Montgomery and other points. If it be lawful in itself, it cannot lawfully be so applied as to unduly favor one locality, to the prejudice of another. Both the Alabama Midland and the Georgia Central are members of the Southern Railway & Steamship Association, and Troy as well as Montgomery is located on those roads. The haul from Montgomery over the Georgia Central to the Atlantic ports named is about ten miles longer than from Troy over that road, and the haul from Montgomery to those ports over the Alabama Midland is fifty-two miles longer than from Troy, and is also through Troy. The charge of the lesser rate from Montgomery than from Troy over the Georgia Central would seem to be a discrimination against Troy and over the Alabama Midland, also, a departure from the "long and short haul rule" of the statute. The principal article of export shipped from Troy and Montgomery over these roads to the Atlantic is cotton. The cotton business of Troy is large, amounting in 1892 to 38,500 bales, aggregating in value \$1,500,000, nearly a third of its total business of all kinds. No excuse is offered, and we are unable to conjecture any valid reason, why Troy is excluded from the benefit of the export system of rate making applied to Montgomery. The fluctuations in ocean rates at the southern ports and other matters set up by the southern carriers as rendering necessary or justifying this system, would seem to apply to shipments from Troy as well as from Montgomery.

It appears, as alleged in the complaint, that on shipments of cotton from Troy *via* Montgomery to New Orleans, the shipper is charged the full local rate to Montgomery both by the Alabama Midland and the Georgia Central. The local from Troy to Montgomery is 23 cts. per hundred pounds and the rate from Montgomery on is 45 cts., making a total through rate from Troy to New Orleans of 68 cts. The testimony is that under this rate Troy is debarred from shipping cotton *via* New Orleans for Europe and is left only the outlet *via* Savannah and other Atlantic ports, and that this is a disadvantage to Troy inasmuch as cotton shipped *via* New Orleans is classed "New Orleans cotton," which is valued at from $\frac{1}{8}$ to $\frac{1}{4}$ of a cent per pound higher than other cotton.

The haul from Troy to Montgomery may be made either over the Alabama Midland or *via* Union Springs over the lines of the Georgia Central and from Montgomery to New Or-

leans it is made over the Louisville & Nashville road.

In the case of *Harwell v. Columbus & W. R. Co.*, 1 Inters. Com. Rep. 631, 1 I. C. C. Rep. 236, cited in his brief by counsel for complainant, it was charged that through rates and through bills of lading were unjustly denied to Opelika on shipments of cotton *via* Montgomery to New Orleans, and the Commission held that such through rates and bills, being important facilities in the transportation of cotton and being given on other commodities and to other points similarly situated, should be given Opelika and that the refusal of the same in the absence of a valid excuse for such refusal was an unjust discrimination against Opelika. In the present case, however, it is neither alleged nor proven that through rates and billing are denied Troy on shipments of cotton *via* Montgomery to New Orleans, but that on the haul from Troy to Montgomery over either the Alabama Midland or the Georgia Central, the local rate between those points is charged and collected as a part of the through rate to New Orleans. The charge is in legal effect that the aggregate through rate thus arrived at is unjustly discriminatory against Troy. "While," as was said in the case of the *Railroad Com. of Florida v. Savannah, F. & W. R. Co.*, 8 Inters. Com. Rep. 638, 5 I. C. C. Rep. 13, "the complainant has no interest in the division the defendants may make between themselves of a through rate and that division does not determine what the charge to the public should be, yet 'it is not without significance in determining what are reasonable rates for the whole distance on the lines in question.'" See *Brady v. Pennsylvania R. Co.*, 2 Inters. Com. Rep. 78, 2 I. C. C. Rep. 181. The distance from Troy to Montgomery over the Alabama Midland (the short line) is 52 miles and from Montgomery to New Orleans over the Louisville & Nashville road, 320 miles. The rate of 23 cts. per hundred pounds from Troy to Montgomery is 4.42 mills per mile; the rate of 45 cts. from Montgomery to New Orleans is 1.40 mills per mile; the rate of 47 cts. from Troy to Savannah (359 miles) is 1.30 mills per mile; and the rate of 45 cts. from Montgomery to Savannah (411 miles) is 1.09 mills per mile. There is, also, a through rate on cotton from Columbus, Ga., to New Orleans of 50 cts. per hundred pounds. The distance from Columbus to New Orleans over the Georgia Central *via* Union Springs to Montgomery and thence over the Louisville & Nashville road is 414 miles, and this rate of 50 cts is 1.20 mills per mile. It thus appears that the rate of 23 cts. from Troy to Montgomery is, on a mileage basis, four times as large as that from Montgomery to Savannah and more than three times

as large as the rates from Montgomery and from Columbus to New Orleans, and from Troy to Savannah. The aggregate through rate from Troy to New Orleans of 68 cts. yields 1.80 mills per mile.

Through rates, it is true, are not required to be made on a strictly mileage basis, but mileage is as a general rule an element of importance and "due regard to distance proportions should be observed in connection with the other considerations that are material in fixing transportation charges." *McMorran v. Grand Trunk R. Co. of Canada*, 2 Inters. Com. Rep. 604, 3 I. C. C. Rep. 252. The cost of the services in railway transportation is the expense of the two terminals and the intermediate haul. The terminal expenses remain the same without reference to the length of the haul. A local rate covers the expenses of both terminals, but a division of a through rate allotted to either of the terminal carriers of the through line can only embrace the expense of one terminal, and because of this difference in expense among other reasons, local rates are made as a general rule much higher in proportion to the length of haul than through rates or any division thereof. A local rate, which presumably is adopted as covering both the initial and final expenses of the haul, is *prima facie* excessive as part of a through rate over a through line composed of two or more carriers. The rate of 23 cts. from Troy to Montgomery is admitted to be the local between those points, which is charged on a haul originating at the former and ending at the latter and hence covers the expense to the carrier (either the Alabama Midland or the Georgia Central) at both terminals.

The evidence does not show what the expense at Troy is, but the relatively disproportionate charge for the haul and expense from Troy to Montgomery as shown above cast the burden on the carrier of justifying it, and hence of showing what the expense is. It is a matter lying peculiarly within the knowledge of the carrier. In the case of *McMorran v. Grand Trunk R. Co. of Canada*, *supra*, it is said: "The evidence does not show with any precision what these several expenses [terminal among others] are. . . . The defendants assume in their brief that the burden of showing these expenses was upon the petitioner; but this assumption is altogether erroneous. It would impose on persons conceiving themselves aggrieved by carriers a difficult and onerous rule of evidence. It would be impossible for the petitioners to show such facts otherwise than by the defendants' agents, and it was clearly the province of the defendants to make them appear. No presumption arises that a rate is reasonable from the mere

fact that it has been put in effect; and when it is *prima facie* disproportionate or relatively unequal, the *onus* is on the carrier to justify its charges when challenged on these grounds. The knowledge of the justifying circumstances and conditions relied on is peculiarly in possession of the carrier."

On the hauls from Montgomery to New Orleans, from Montgomery to Savannah, from Troy to Savannah and from Columbus to New Orleans, there are the expenses of both terminals as well as the haul from Troy to New Orleans. It cannot be assumed that on a haul from Troy to New Orleans the initial expenses at Troy are greater than at Montgomery on haul from that point to New Orleans or to Savannah, or at Columbus on haul from that point to New Orleans, or at Troy itself on a haul in the opposite direction to Savannah. No reason has been shown, and we can conceive of none, why a higher proportionate rate should be charged on cotton from Troy to New Orleans than from Montgomery, or from these other points on the several hauls mentioned. The disproportion, as we have seen, is attributable to the charge, as a part of the through rate to New Orleans, of the local from Troy to Montgomery, and the truth appears to be that this exaction of the local rate is an incident and in pursuance of what is termed the "trade center," or "basing," or "distributing point" system, which the Commission has more than once condemned as unjust discrimination and in violation of law, and which we will be called on to refer to more at length in connection with the class rates from Louisville, Cincinnati and St. Louis to Montgomery, Columbus and Troy, hereafter to be considered.

A rate from Troy to New Orleans based on the present mileage rate from Montgomery to that city would amount to 52.21 cts. As a general rule, however, while the aggregate through rate steadily increases as the distance increases, the rate per ton or hundred weight per mile decreases. Under this rule, the distance from Troy being 52 miles greater than from Montgomery, the rate per hundred pounds per mile from Troy, in the absence of exceptional conditions, should be slightly less than that from Montgomery. In view of this rule, and of the rate of 50 cts. from Columbus, a longer distance point by 42 miles than Troy, our conclusion is that the through rate on cotton from Troy *via* Montgomery to New Orleans should not exceed 50 cts. per hundred pounds.

The class rates in cents per hundred pounds (except Class F, which is per bbl.) to Troy, Montgomery and Columbus from Louisville, Cincinnati and St. Louis, are given in the following table:

4 INTER S.

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
From Louisville, Ky.													(per bbl.)
To Troy, Ala.	140	130	113	95	75	62	45	50	37	32	69	59	66
Montgomery, Ala.	98	92	78	63	52	41	28	31	24	20	48	33	40
Columbus, Ga.	107	92	81	68	56	46	28	36	29	25	50	55	50
From Cincinnati, O.													
To Troy, Ala.	150	140	123	103	82	68	49	52	39	34	73	63	70
Montgomery, Ala.	108	102	88	71	59	47	32	33	26	22	52	37	44
Columbus, Ga.	117	102	91	76	63	52	32	38	31	27	54	59	54
From St. Louis, Mo.													
To Troy, Ala.	168	153	133	109	87	72	52	58	44	37	77	69	80
Montgomery, Ala.	126	115	98	77	64	51	35	39	31	25	56	43	54
Columbus, Ga.	135	115	101	82	68	56	35	44	36	30	58	65	64

The local class rates in cents per hundred pounds (except Class F, which is per bbl.) from Montgomery and Columbus, respectively, to Troy, are as follows:

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F	per bbl.
From Montgomery to Troy.	49	46	40	33	27	21	19	21	16	15	27	33	32	
From Columbus to Troy.	58	55	48	39	31	24	22	24	19	17	31	39	38	

It was testified at the hearing by Mr. Bashinsky, a witness for the complainant, that on goods shipped on through bills of lading from Louisville and the west to Troy, the Troy merchant is charged the full local rate from Montgomery to Troy, and the counsel for the Alabama Midland states in his brief, that "the through rate from Troy to any western market is made up by adding the local rate from Troy to Montgomery to the through rate from Montgomery to the west." From a comparison of the above local rates with the difference between the rates from Louisville and the other cities named to Montgomery and Troy, respectively, it will be found that this is true only as to rates on goods of Class 6. The difference between the Class 6 rate to Montgomery and that to Troy from all these points is 21 cts., which is the local rate on that class from Montgomery to Troy. On the other classes the local rate from Montgomery to Troy exceeds the proportion of the through rate between those points as follows:

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
Excess of local rate over through.	7	8	5	13	1	—	2	2	3	3	6	7	6

The distance from Louisville to Montgomery over the Louisville & Nashville road is 490 miles and from Montgomery to Troy over the Alabama Midland, 52 miles. The following table shows the mileage rate on the different classes in mills per hundred pounds yielded by the through rate from Louisville to Montgomery and by the additional charge on through shipments from Louisville to Troy for the haul from Montgomery to Troy:

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
Louisville to Montgomery.	2	1.8	1.6	1.3	1.06	.88	.57	.83	.49	.40	.98	.07	.40
Montgomery to Troy.	8	7.1	6.7	5.9	3.8	4	2.6	3.6	2.5	2.3	4	5	2.5

The testimony is that the Troy merchant gets the most of his heavy goods from the west. The class 6 (on which the through rate from Louisville, St. Louis & Cincinnati to Troy is made by the addition of the local from Montgomery to Troy) embraces sugar, coffee, flour, buckwheat, animal food, cement, axle and car grease, green hides, iron architecture, agricultural implements, nails, spikes, and many other heavy as well as light articles in constant demand, too numerous to be set forth here. Classes 4 and B on which the difference between the local rate and proportion of through rate from Montgomery to Troy as shown above is only 1 and 2 cents, are applied, the former, among numerous other articles, to machinery of all kinds, agricultural implements, earthenware, mouldings, engines, castings, axes, cotton seed oil mills, dry hides, window glass, ale, beer, porter, canned beef and pork, canned fruit and potatoes; and the latter, among many other articles, to salted beef, pork and bacon. It seems probable, that the statement above referred to, made by the witness and counsel, that the through rate from Louisville and the west via Montgomery to Troy is made up of the rate to Montgomery plus the local on to Troy, is substantially true as to the goods constituting the bulk of the traffic from those points to Troy. When the mileage rate from Louisville (which point is taken as an illustration) to Montgomery, is compared with that from Montgomery on to Troy, it seems clear that the rate to Troy on all the classes is made from Montgomery as a "basing point." This comparison, it will appear from the table given above, shows that the proportion of the rate from Montgomery to Troy is from four to seven times as large per mile as that from Louisville to Montgomery.

The following table shows the sum of the rates on class goods from Louisville to Mont-

gomery and Troy, respectively, plus the rates from those points on re-shipment to Brundidge, Ozark, and Dothan:

FROM LOUISVILLE, KY.
(In cents per 100 lbs. except Class F, which is per bbl.)

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
To Brundidge, Ala. Re-shipped from Montgomery, Ala.	146	136	117	98	81	65	52	52	38	38	72	68	(per bbl.)
To Brundidge, Ala. Re-shipped from Troy, Ala.	168	154	136	115	98	76	59	62	46	40	83	84	
To Ozark, Ala. Re-shipped from Montgomery.	156	144	122	108	84	67	54	54	40	35	74	72	
To Ozark, Ala. Re-shipped from Troy, Ala.	176	161	143	122	95	80	59	66	49	43	87	90	
To Dothan, Ala. Re-shipped from Montgomery.	162	147	126	106	88	71	57	57	40	35	78	72	
To Dothan, Ala. Re-shipped from Troy, Ala.	188	174	152	130	104	86	69	71	51	45	93	94	

Brundidge, Ozark and Dothan are towns and stations on the Alabama Midland Railway, all east of Troy and shipments to them over that road from Montgomery pass through Troy. Brundidge is 17 miles from Troy and 69 from Montgomery; Ozark, 40 miles from Troy and 92 from Montgomery; and Dothan, 68 miles from Troy and 120 from Montgomery.

The sum of the rates from Louisville to Columbus and Troy, respectively, plus the rates on re-shipments from those cities to Brantley, in cents per 100 lbs., except Class F, which is per bbl., are as follows:

FROM LOUISVILLE.			
Classes.	To Brantley, Ala. re-shipped from Columbus.	Ala. re-shipped from	To Brantley, Ala. re-shipped from Troy.
1			1.76
2	1.73		1.64
3	1.58		1.43
4	1.32		1.19
5	1.10		95
6	90		78
A	78		60
B	52		66
C	65		50
D	50		44
E	84		80
F (per bbl.)	92		92

Brantley is on the Georgia Central road 26 miles south of Troy and 111 miles from Columbus, and goods shipped from Columbus to Brantley over that road pass through Troy. A like disparity in rates on re-shipments prevails

as to points west of Troy on the Alabama Midland and north of Troy on the Georgia Central, the distances of which from Troy are much less than from either Montgomery or Columbus; and the situation in this respect is the same, when the shipments originate at Cincinnati, and other Ohio river points, and at St. Louis, as when they come from Louisville.

The fact that the sum of the rates from points of origin to points of destination, as shown in the above tables, on re-shipments from Montgomery, Columbus and Troy, are greater in cases of such re-shipments from Troy than from Montgomery and Columbus, is attributed by the complainant to alleged relatively unjust through rates to Troy as compared with those to Montgomery and Columbus. There is no allegation and no proof that the rates to Montgomery and Columbus are unreasonable in themselves. The through rate to Troy is, therefore, the object of attack.

The differences in rates as against Troy, it will be noted, are much smaller on re-shipments from Columbus than on re-shipments from Montgomery, and the local rates from Columbus to Troy are much greater than the difference between the through rates to Columbus and those to Troy. It is not shown that there are through rates from Louisville, St. Louis and Ohio river points *via* Columbus to Troy based on the Columbus rate, and the natural course of the traffic from those points to Troy appears to be *via* Montgomery. As before stated, the through rates to Troy are based on the Montgomery rates and in making them Montgomery is treated as a "trade center" or "basing" point and Troy as a local. This is conceded on the part of the defendants. The vice in the through rate to Troy, if any, arises from this fact and from the consequently greatly disproportionate charge for the haul from Montgomery to Troy, when compared with that from Louisville and the west to Montgomery.

The "trade center" or "basing point" system has been in many cases pronounced unlawful by this Commission. *Re Louisville & N. R. Co.* 1 Inters. Com. Rep. 289, 290, 1 I. C. C. Rep. 84, 85; *Martin v. Chicago, B. & Q. R. Co.* 2 Inters. Com. Rep. 38-40, 2 I. C. C. Rep. 44-47; *Harwell v. Columbus & W. R. Co.* 1 Inters. Com. Rep. 631, 1 I. C. C. Rep. 286. In the Louisville & Nashville case, it is said in this connection, that the Act to Regulate Commerce "aims at equality of right and privilege, not less between towns than between individuals, and will no more sanction preferential rates for the purpose of perpetuating distinctions than of creating them;" and in the Martin case, the statute is declared to be one "enacted in the interest of equality as between large and small interests," under which "there can be no unjust discrimination in giving to

large and small towns relatively equal rates." It is further said in the latter case, that "a fatal difficulty with the theory that a trade center as such is entitled to specially favorable rates is found in the fact, that it is in conflict with the spirit and purpose of the Act to Regulate Commerce—one of the reasons for the passage of which was, that by means of rebates and other contrivances, large towns and heavy dealers secured advantages which gave them a practical monopoly of markets and shut out the small towns and small dealers." In a recent decision by the Supreme Court of the United States in a case brought up from the U. S. Circuit Court, for the District of Colorado (*Union Pac. R. Co. v. Goodridge*, 149 U. S. 680, 37 L. ed. 896) Mr. Justice Brown, in speaking of the purpose of the Colorado act under consideration as being the same as to intrastate commerce as that of the Act to Regulate Commerce as to interstate commerce, says very forcibly, that it was designed "to cut up by the roots the entire system of rebates and discriminations in favor of particular localities, special enterprises, or favored corporations," and pertinently refers to the fact, that carriers being dependent upon the will of the people for their corporate existence, are "bound to deal fairly with the public, to extend them reasonable facilities for the transportation of their persons and property, and to put all their patrons upon an absolute equality." Citing *Seofield v. Lake Shore & M. S. R. Co.* 48 Ohio St. 571; *Sandford v. Catawissa, W. & E. R. Co.* 24 Pa. 878; *Messenger v. Pennsylvania R. Co.* 36 N. J. L. 407; *McDuffee v. Portland & R. R. Co.* 52 N. H. 480. The fact, therefore, insisted upon by counsel for the roads as a matter of defense, that Montgomery is a much larger city with more extensive business interests than Troy, and is and has been treated by the roads in making rates to Troy and other surrounding towns as a "trade center" or "basing point," is no justification for discriminations in those rates in favor of Montgomery.

Water and rail competition at Montgomery are also set up as justifying the disproportion in the rates in question as between Troy and Montgomery. Here, as we have shown in connection with the violations of the long and short haul rule of the statute, these defenses are not sustained by the proof. Water competition *via* the Alabama river, in order to control rates from St. Louis and Louisville, Cincinnati and other Ohio river points, on traffic from those cities stopping at Montgomery, must, it is obvious, grow out of transportation of such traffic *via* Mobile up the river to Montgomery. The carriage of goods by river from or *via* Montgomery to Mobile would be limited in its effect to rates to the latter city. Water transportation may be possible from localities on the Ohio and Mississippi rivers *via* those

rivers to the Gulf at New Orleans, on the Gulf to the Alabama river at Mobile and up that river to Montgomery, and the Mobile & Ohio Railroad carries freight from St. Louis to Mobile, which might be transported thence up the Alabama river to Montgomery. No competition by either of these routes is shown in this case on traffic from St. Louis or Ohio river points to Montgomery, and it does not seem probable that such competition of controlling force is likely to arise. That it does not now exist would appear to be indicated by the lower rates from St. Louis, Cincinnati and Louisville to Mobile than to Montgomery at present prevailing as shown in the following table:

furnished by proof of cost of service or other matters proper to be considered in determining what rates are just and reasonable from the standpoint both of the carrier and shipper. If there is an expense incident to the continuation of the through haul to Troy, which calls for and justifies exceptional rates, the burden, as we have seen, is upon the carrier to show it. The roads, however, do not claim that there is anything in the nature of the service of transportation to Troy which justifies the disproportionate rates charged to that city, but base their defense of those rates on another and distinct ground (which we hold not to be established) namely, dissimilarity of circumstances

Distances.	Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F

	From Cincinnati to Montgomery.....	108	102	88	71	59	47	32	38	28	22	52	37	44

Note.—The above rates are in cents per 100 lbs., except Class F, which is per bbl.

Although over the lines of the Louisville & Nashville Company the distances from all three of the above cities to Mobile is 180 miles greater than to Montgomery, and the haul to Mobile is through Montgomery, the rates to the latter are materially higher than to the former. The higher rates to Montgomery than to Mobile shown in the above table seem inconsistent with the claim that the rates to Montgomery are controlled by water competition *via* Mobile up the Alabama river to Montgomery.

What we have said in reference to the through rate on shipments of cotton from Troy to New Orleans, as to the charge of a local as part of a through rate and as to the burden of proof where rates are shown to be disproportionate and preferential, is applicable in connection with the rates now under investigation.

Our conclusion on this branch of the case, is, that the through class rates from Louisville, St. Louis, Cincinnati and the west to Troy are relatively unjust to that city, when compared with those to Montgomery, and that this injustice arises from the practice of basing the Troy rates on the rates to Montgomery as a "trade center."

The question remains to be determined, what the rates to Troy shall be. In arriving at a conclusion on this point, no light is

and conditions resulting from water and rail competition at Montgomery. In the absence of proof of exceptional conditions, the transportation from Montgomery to Troy, including terminal expenses, will be presumed to be not more costly to the carrier than for like distances in the same or like territory. On examination we find, that the class rates from Louisville, Cincinnati and St. Louis and Ohio river points generally, are the same to Columbus, Eufaula and Opelika. The distances from Louisville and St. Louis to Columbus by the shortest available route (that *via* Birmingham and Opelika over the Columbus & Western road) are nine miles greater and by the routes *via* Montgomery are about 42 miles greater than to Troy. The distance from Cincinnati to Columbus by the shortest route appears to be about 14 miles less than to Troy. The distances to Eufaula are greater than to Troy, and to Opelika, they are somewhat less. The distances from the cities named to Columbus and Eufaula being on the average greater than to Troy and other things being equal, the rate to Troy should, if anything, be slightly less than to those cities. No substantial dissimilarity of circumstances and conditions justifying a higher rate to Troy, has been attempted to be shown. The class rates in cents per hundred pounds (except Class F,

which is per bbl.) to Columbus, Eufaula and Opelika, and to Troy, from Louisville, and the excess of the Troy rates over those to Columbus, Eufaula and Opelika are given in the following table:

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
From Louisville to Columbus, Eufaula & Opelika.	107	92	81	68	56	46	28	36	20	25	50	55	50
From Louisville to Troy	140	130	113	95	75½	62	45	50	37	32	69	59	66
Excess of Troy rates	33	38	32	27	19½	16	17	14	8	7	19	4	16

The excess of the Troy rate is the same under the rates from Cincinnati and St. Louis.

The above rates to Columbus, Eufaula and Opelika, if applied to Troy, yield the following rates in cents per ton per mile on the different clauses:

Classes.	1	2	3	4	5	6	A	B	C	D	E	H	F
Rate per ton per mile.....	3.94	3.39	2.99	2.50	2.06	1.69	1.06	1.32	1.07	.92	1.84	2.06	.92

These mileage rates average on all the classes 1.97 cents, and are somewhat greater than are realized on the application of the same through rates to the hauls to Columbus and Eufaula. The above average of 1.97 cents and the above mileage rates on 8 out of the 13 classes are greater than the average receipts per ton per mile and estimated cost of carrying a ton a mile for the years ending June 30, 1891 and 1892, as reported by the Louisville & Nashville R. Co., the Alabama Midland and Georgia Central, and which are given in the following table:

Name of Road.	1891.		1892.	
	Average receipts.	Estimated cost.	Average receipts.	Estimated cost.
Louisville & Nashville R. Co.	cts. .968	cts. .614	cts. .948	cts. .621
Alabama Midland Ry.	1.745	.990	1.356	1.400
Central R.R. of Georgia.	1.529	1.012	*	*

*Report for four months by the receiver of the Richmond & Danville Railroad does not give these items.

4 INTER S.

Columbus and Eufaula are located in or are contiguous to the territory in which Troy is situated, and the former, at least, is in active competition with Troy for business in the country immediately around Troy. We are of the opinion that the class rates to Troy from Louisville, Cincinnati and St. Louis should be as least as low as those above given to Columbus and Eufaula.

It is claimed on the part of the roads, that the establishment of lower rates to Troy will disarrange and call for a re-adjustment of the rates to the localities around Troy in order to prevent unjust discrimination in favor of Troy and against such localities. It appears from the tariffs on file with the Commission, that the through rates to these points around Troy are made on the basis of the rates to Montgomery plus the local rates from Montgomery on—in other words, that Montgomery is given the undue advantage of a "trade center" as against these points. This being the case, these rates now call for re-adjustment with a view of remedying the unjust discrimination thus appearing. The adjustment of the rates to these points so as to make them conform to the reduced rates which we have ordered for Troy,

will tend to bring them in line with the law and do away with the unjust discrimination in favor of Montgomery already existing under them. It certainly cannot be held to be a valid objection to the correction of unlawful rates to one locality, that it involves a like correction as to other localities. Unjust discrimination as between localities or individuals cannot be essential to the business prosperity of the roads; on the contrary, we believe that in the end, if not immediately, their financial welfare would be promoted by the application in the matter of rate making of the principle of absolute fairness as between all interests, large and small, enjoined by the statute. Rates should in the first instance be fixed upon a fairly remunerative basis and then so applied as to result in no undue advantage or disadvantage to any interest. It will devolve upon the roads to make whatever changes in rates to surrounding towns may be incidental to, and a necessary consequence of, compliance in good faith with our order in reference to the rates to Troy.

In pursuance of the conclusions arrived at in this case, it is ordered, that the roads participating in the traffic involved cease and desist, (1), from charging and collecting on class goods shipped from Louisville, St. Louis and Cincinnati to Troy a higher rate than is now charged and collected on such shipments to Columbus and Eufaula; (2), from charging and collecting

on cotton shipped from Troy *via* Montgomery to New Orleans a higher through rate than 50 cts. per hundred pounds; (8), from charging and collecting on shipments of cotton from Troy for export *via* the Atlantic seaports, Brunswick, Savannah, Charleston, West Point and Norfolk, a higher rate to those ports than is charged and collected on such shipments from Montgomery; (4), from charging and collecting on cotton shipped from Troy to Brunswick, Savannah and Charleston, a higher rate than

is charged and collected on such shipments from Montgomery through Troy to those ports; (5), from charging and collecting on class goods, shipped from New York, Baltimore and the northeast, to Troy, a higher rate than is charged and collected on such shipments to Montgomery; and (6), from charging and collecting on phosphate rock shipped from the South Carolina and Florida fields to Troy a higher rate than is charged and collected on such shipments through Troy to Montgomery.

PHELPS & COMPANY

v.

THE TEXAS & PACIFIC RAILWAY COMPANY.

1. The rates which carriers are required by the sixth section of the statute to publish, file, and adhere to without deviation cover not merely the carriage, but services rendered in receiving and delivering property as well.
2. The lien of carriers upon freight for charges earned is satisfied by the payment of rates for their services which they are lawfully entitled to demand, and a guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made.
3. The Interstate Commerce Act does not recognize indefinite or uncertain transportation charges, the idea of unequal compensation for like service, or discrimination in the treatment of persons similarly situated, is repugnant to every requirement of that law, and a party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand.
4. When actual weights of cotton shipments cannot be ascertained without great inconvenience to the shipper or carrier, and when transportation charges are promptly adjusted by the carrier upon the basis of actual weights furnished by the consignee, a practice of billing the cotton at a proper estimated weight per bale should not be deemed unlawful.
5. The retention of an overcharge has all the effect of extortion and unjust discrimination against the person from whom its payment has been required, and when the refund of an excessive charge has been unnecessarily delayed for a considerable period the officials responsible therefor become fairly chargeable with willful intention to violate the law.

Complaint filed March 2, 1892.—Answer filed April 13, 1892.—Amendment to complaint filed April 22, 1892.—Amended answer filed June 4, 1892.—Hearl at New Orleans, La., March 13, 1893.—Brief for Defendant filed August 18, 1893.—Decided October 16, 1893.

UNJUST discrimination in delivery of cotton. Tariff rates. Carrier's lien. Overcharges. See complaint, *ante*, 44; answer, *ante*, 104.

Mr. Ashton Phelps, for complainants.

Messrs. John S. Blair, T. J. Freeman and Howe & Prentiss, for defendant.

REPORT AND OPINION OF THE COMMISSION.

Knapp, Commissioner:

The principal grievance alleged in the complaint is that unjust discrimination arises from the refusal of defendant to deliver uncompressed cotton consigned to complainants at New Orleans upon the same terms as it delivers such cotton for other consignees in that

city; in other words, that the defendant delivers uncompressed cotton to compress companies, except the Alabama & Factors' Press Company, without requiring the payment of freight charges before delivery, such compress companies having previously, by a guaranty in writing, made themselves responsible for

freight charges in case payment thereof should be refused by the consignees, while the defendant refuses to deliver complainants' cotton to the Alabama & Factors' Press Co., or the cotton of other consignees dealing with that company, except upon the payment of transportation charges before delivery, and also declines to accept or recognize a similar guaranty of freight charges from said Alabama & Factors' Press Co.

The defendant admits the discrimination, but contends that it is justified by the refusal of complainants to pay freight charges demanded, and by the subsequent refusal of the compress company to carry out its guaranty to promptly pay freight charges demanded by defendant in case complainants should fail to do so. The position of the defendant is clearly stated in the following extract from its answer: "Your respondent denies that in requiring payment before delivery of shipments to certain consignees or their agents, who decline to carry out the guarantee above mentioned, they are nullifying any provision of law relating to common carriers, and it further denies that in waiving its right of lien to other consignees or their agents who do observe such guarantees it is guilty of any unjust discrimination."

On the other hand, complainants assert that neither they nor the compress company refused to pay proper and just rates of freight; that the charges over which this controversy arose were excessive and unjust, as is shown by their subsequent correction; and that these guarantees by compress companies are "given under duress, as a refusal to do so would be followed by arbitrary measures, attended by an immense amount of practical inconvenience, as has actually happened in the case of your petitioner and the presses where they store their cotton." "Your petitioner submits that a railway company cannot assume, through an extorted agreement of this kind, to nullify the provisions of the law relating to common carriers."

Another feature of the complaint is that defendant demands unlawful rates on cotton carried by weight by estimating such cotton at 535 pounds per bale when a copy of the original invoice of the cotton or the certificate of a public weigher is not produced. This branch of the case was not made prominent at the hearing, except as tending to show that the rule of estimated weights, in connection with the guaranty of prompt payment of charges above referred to, results in numerous claims of overcharge, and as a basis for the additional allegation that these claims are exceedingly difficult to collect. Indeed, one of the complainants admitted that since the commencement of this proceeding there had been little

cause for complaint against the defendant for basing charges upon excessive weights.

FACTS.

There is little disagreement between the parties as to the material facts in this case and they can be very briefly stated:

1. The complainants are a firm of commission merchants extensively engaged in buying and selling cotton in the city of New Orleans, and their solvency is not questioned in this proceeding.

2. It is a general custom in that city for cotton dealers or "factors" to have uncompressed or "flat" cotton consigned to them delivered direct by the railroad to drays of the cotton presses which they patronize, and the railroads do not require payment of freight charges before such delivery, provided the compress company has previously executed and delivered a guaranty making itself responsible for such charges. This arrangement insures the prompt removal of a bulky class of freight from the yards and depots of the carriers, and the compress company's guaranty saves them from any loss which might arise from the relinquishment of their lien for freight charges resulting from delivery of the cotton before payment of such charges. It also saves much time, trouble and expense to consignees and the cotton presses they employ. This method of facilitating the quick delivery of cotton is advantageous to all parties concerned.

3. The form of guaranty required by the defendant was as follows:

"THE TEXAS & PACIFIC RAILWAY CO.
Office of Frt. Agt. New Orleans.

STATE OF LOUISIANA, }
CITY OF NEW ORLEANS. }

"In consideration that the Texas & Pacific Railway Company shall deliver to the Alabama & Factors' Cotton Press, its Agents or Draymen, from time to time, any cotton without insisting on the freight and charges thereon being first paid by the respective consignees, whereby the said railway company may lose its lien,

"We hereby agree to and do guarantee the payment of such freight and charges on any cotton so delivered to said press, or to any draymen or agent of ours, and bind ourselves to pay the same on demand in case the respective consignees fail to do so. It is well understood that such freight and charges shall be paid under this guaranty in full without any delay, and without waiting for the discussion or settlement of any claims by any person with respect to such cotton for overcharge, damage, bad order, or any other cause—all such claims upon any ground of complaint whatever to be made after the payment of such bills of freight and charges, and according to the rules of the

Texas & Pacific Company governing such cases."

There is nothing in the case which tends to show that the management of the Alabama or the Factors' Press is not pecuniarily responsible, and no such claim was made by the defendant.

4. The authority of the defendant to deliver cotton after the press had given its guaranty is shown by the following exhibits:

"THE TEXAS & PACIFIC RAILWAY CO.
"Office of Freight Agent.

"New Orleans, La., August 15th, 1890.

"To Manager Ala. & Factors' Press:

"Tchpls. St., bet. Henderson & Robin, New Orleans, La.

"Dear Sir:—Will you please indorse hereon the name of the drayman that is authorized to haul 'Flat Cotton' from this Railway to your press, and have drayman indorse hereon the names of his clerks that have authority to sign for same.

"Yours truly,
"F. M. Folger, M. C.
"Freight Agent."

"Mr. A. McLaughlin will dray 'Flat Cotton' to be stored in our press.

"P. P. S. Hayward,
"J. D. Hayward,
"Alabama and Factors'
Managers Press."

"Mr. Jno. T. Barry is authorized to dray and sign for 'Flat Cotton' to be drayed to ——— Press.

"A. McLaughlin,
"Drayman."

"THE TEXAS & PACIFIC RAILWAY CO.
"Office of Frt. Agt., New Orleans, La.
8, 16, 90.

"Messrs. Phelps & Co., 192 Gravier.

"Cotton Factors, New Orleans, La.

"Dear Sir:—Will you please indorse hereon the name of the press you desire this Railway to deliver your 'Flat Cotton' for the season of 1890 and 1891.

"Yours truly,
"F. M. Folger, M. C.
"Freight Agent."

"Deliver 'Flat Cotton' consigned to us to the Factors Press, unless otherwise ordered.

"Phelps & Co."

5. Early in 1891 the defendant carried three lots of flat cotton to New Orleans, which had been shipped to complainants from points on the Red River in Arkansas, to wit: one lot of four bales consigned by H. A. Hawkins, from Hawkins' Landing, Ark., and one lot of one bale and another of sixteen bales shipped by Gaffney & Brigrance from Opah Place, Ark. The shipments were all made in January, 1891,
4 INTER 8.

and carried by the steamer "Belle Crooks" to Fulton, Ark., where they were turned over to the St. Louis, Iron Mountain & Southern for transportation to New Orleans by that road and the Texas & Pacific Railway, the defendant herein. The steamer Belle Crooks issued through bills of lading to the shippers, specifying that the through charge to New Orleans would be \$4.00 per bale from Hawkins' Landing and \$4.50 per bale from Opah Place. The bills of lading were sent by the shippers to Phelps & Co., the complainants. The steamer did not give copies of the bills of lading to the Iron Mountain agent. Those rates made the expense of transportation to New Orleans \$16.00 on the four bales from Hawkins Landing and \$76.50 on the twenty-one bales from Opah Place, a total of \$92.50. By notices dated February 7 and 20, 1891, the defendant notified complainants of the arrival of these lots of cotton, and after delivery to the Factors' Press, according to complainants' standing order, defendant's agent presented expense bills at complainants' office specifying \$18.00, or \$4.50 per bale, for the four bales from Hawkins Landing, and \$85.00, or \$5.00 per bale, for the seventeen bales from Opah Place, a total of \$103.00. The difference between the bills of lading and expense bills was therefore \$10.50, or 50 cents per bale. Complainants refused to pay more than the through bills of lading called for. Defendant's agent then demanded payment from the Factors' Press under the terms of its guaranty. The manager of the press also refused to pay charges in excess of those named in the bills of lading, but offered to deposit the whole amount claimed until the matter should be adjusted. The agent declined this offer and reported the facts to the general office of the defendant at Dallas, Texas, from whence he was instructed to cease delivering cotton to the Factors' Press (and also to the Alabama, under the same management,) for Phelps & Co., the complainants, or any other consignees, unless the freight charges were paid prior to delivery. This order was at once put into effect. The expense bills were not paid as demanded and so the matter stood for about a year, that is, until shortly after this complaint was filed, when the defendant presented bills corrected to the bill of lading charges, and they were promptly paid by complainants. The evidence does not show why it was thought necessary to defer for more than a year the settlement of a dispute over freight bills covering the charges of but three carriers, or rather only two carriers, for the railroads were operating under a joint tariff.

The charges from the point of shipment to New Orleans were made by adding the charge of the vessel to the joint tariff rate of the railroads from Fulton to New Orleans. The

shipment was through, however, and the carriage over the connecting lines was continuous. This joint tariff rate of the roads was \$3.00 per bale, and, in the absence of any joint rate with the vessel, the charges of the latter according to its own bills of lading must have been \$1.00 from Hawkins Landing and \$1.50 from Opah Place. The through bills of lading of the steamer did not, as before stated, accompany the shipment when delivered to the Iron Mountain road, and the Texas & Pacific did not have actual knowledge of their contents until complainants produced them. Upon delivering the cotton to the Iron Mountain road the steamer line demanded and received for its charges the sum of \$1.50 per bale from Hawkins Landing and \$2.00 per bale from Opah Place, and these charges added to the \$3.00 joint tariff rate of the railroads made the sum per bale demanded exceed the bills of lading rates by 50 cents per bale, and this accounts for the overcharge. After correspondence with the railroad companies, the steamer line refunded the overcharge of \$10.50 to the Iron Mountain road, and the Texas & Pacific, upon being advised thereof, made the expense bills agree with the bills of lading. The new expense bills, showing the refund by the steamer line, were presented to complainants on March 19, 1892, and immediately paid. So the overcharge was settled. But the defendant has nevertheless kept its order forbidding delivery to the Alabama and Factors' Presses before payment of freight in full force and effect, with the exception of a few shipments for consignees other than Phelps & Co., the delivery of which occurred through the oversight of a clerk.

6. The defendant insists upon payment of the freight charges specified in its expense bills when presented to the consignee, leaving the amount of any excess collected to be afterwards determined and refunded upon the filing by the consignee of claim for overcharge. Sometimes the cotton is transported at so much per bale. This was the case with these shipments from Opah Place and Hawkins Landing to New Orleans. Cotton Tariff No. 425 of the Texas and Pacific, effective Oct. 12, 1891, names rates per hundred pounds on uncompressed cotton and bears this notation:

Minimum Weights on Cotton.

"In all cases where the certificate of a public weigher, or a certified invoice of the actual gross weight, is not furnished at point of shipment, the minimum weight to be charged on cotton shall be 585 pounds per bale on shipments to the Mississippi river and the Missouri river, and to Houston and Galveston, the cotton to be billed at actual weight subject to the minimum as above, any overcharge that

may arise to be refunded only on presentation of original invoice of the cotton or certificate of the public weigher."

"Cotton for domestic points and foreign ports shall be taken at actual gross invoice weight."

"In all cases where a certificate of a public weigher or a certified invoice of the actual gross weight is furnished at point of shipment, agents will note on face of billing: This Cotton Billed at Actual Gross Invoice Weight."

It is claimed by defendant that until the actual weight is ascertained, either at the point of shipment or point of destination, shippers should pay for a prescribed minimum weight and have any excess returned to them afterwards, and that complainants have no just cause of complaint when the defendant is willing to accept their weights. One of the complainants testifies, however, that claims for overcharge, besides not being promptly adjusted, do not even receive early attention, and two accounts of overcharges presented a year prior to the hearing were put in evidence as not having been paid or, so far as complainants could learn, even considered. In this connection the following uncontradicted testimony of Mr. Phelps is pertinent: "It is very slow work to collect an overcharge. I would like to file with the Commission a statement of overcharges which arose on shipments a year ago, and which we paid with the assurance that in the event of there being an overcharge the money would be refunded without the formality of putting a claim into the company. It is against the Texas & Pacific Company. We have written to Mr. Fenby at Dallas, and he never had the courtesy to reply. Mr. Reese, commercial agent of the T. & P. road at the time, assured us that when the cotton was sold they would refund the overcharge without the formality of making a claim. We have never got the money yet. While the amount of money in this case is small, it might in some cases be very large. We do a large business, and drafts are drawn against those shipments payable at sight, and unless the bill of lading is conclusive we cannot tell where we stand. In these transactions if we do not know what freight we have to pay we cannot form a basis of calculation." Defendants' agent testified that great care is taken to revise way-bills from published tariff's before the expense bills are made out, and that the bills are afterwards revised in the auditor's office. It is fairly deducible from the evidence, and we so find, that, while great care is exercised by defendant to insert only proper charges in expense bills which it presents to consignees of flat cotton, complainants have experienced much difficulty in getting their overcharge claims promptly adjusted

Conclusions.

The main point to be decided is whether the discrimination admitted in this case is unjust.

The defendant, upon the refusal of complainants, and subsequently of the compress company, to pay the freight charges demanded on three lots of cotton, prohibited future delivery of "flat" cotton to the compress company for complainants or other consignees except upon the payment of transportation charges due thereon, notwithstanding the custom of defendant and other carriers to deliver such cotton to compress companies in New Orleans without requiring previous payment of charges. This prior delivery is unconditional and amounts to a surrender of the carrier's lien on the freight for charges earned, but the carrier requires and obtains, in consideration of such surrender of lien, a guaranty or contract from each compress company whereby it agrees to pay the freight charges on demand, in case consignees refuse to make such payment. The guaranty set out in the third finding contains this clause: "It is well understood that such freight and charges shall be paid under this guaranty *in full* without any delay and without waiting for the discussion or settlement of any claims by any person with respect to such cotton for overcharge, damage, bad order, or any other cause—all such claims *upon any ground of complaint whatever* to be made after the payment of such bills of freight and charges, and according to the rules of the Texas & Pacific Company governing such cases." The complainants and the guaranteeing compress company refused to pay the charges demanded on the three lots of cotton above mentioned upon the ground that such charges were excessive. Thereupon the defendant chose to regard the guaranty as canceled, and, although soon after the filing of this complaint the charges were admitted to be excessive and settled according to complainants' claim, the order prohibiting delivery to the compress company before payment of freight charges has never been rescinded.

The object of the guaranty or contract, as expressed therein, is to secure immediate transfer of the cotton from the carrier's depot or yards to the warehouse or press of the compress company, and to indemnify the carrier against such loss as the relinquishment of its lien upon the property for freight charges might entail. Such quick removal of large quantities of bulky freight is an advantage to the carrier as well as to the owner and the compress company, and there is nothing in the evidence which warrants a finding that this transfer of possession constitutes additional service for which the carrier is entitled to additional charge; and it is due to the defendant to say that it does not make any such preten-

sion. It is proper also to point out that if this were the fact any additional charge in this case would still violate the law, for carriers are required to publish, file, and adhere to their rates without deviation, and such rates cover not merely the carriage, but services rendered in receiving and delivering property as well; and there is nothing in defendant's tariffs which, either as carrying or terminal charges, refers to this matter of delivering facilities in New Orleans.

Considered without any reference to its duties as a public carrier, the above quoted terms of the guaranty might entitle the defendant to immediate payment of whatever sums it should see fit to demand as freight charges; but the provisions of the Act to regulate commerce prohibit it from collecting any excessive charge, and we fail to see how, through relinquishment of its lien or under the most strongly worded guaranty, it can justify even a temporary departure from the law.

The lien of carriers upon freight for charges earned is satisfied by the payment of rates for their services which they are lawfully entitled to demand, and a guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made.

The Interstate Commerce Act does not recognize indefinite or uncertain transportation charges; the idea of unequal compensation for like service, or discrimination in the treatment of persons similarly situated, is repugnant to every requirement of that law, and a party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality, because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand.

Therefore, if the charges demanded first of the complainant and subsequently of the guaranteeing compress company were greater than the defendant would have been entitled by law to collect and retain if it had not parted with its lien, an order against the defendant is clearly indicated without consideration of any of the other questions connected with defendant's refusal to continue delivering to the compress company before payment of its charges.

The facts demonstrate that the charges originally demanded by defendant were excessive. There was an over-charge of 50 cents per bale on these three lots of cotton amounting to-

\$10.50, and this excess, when investigation was seriously undertaken by defendant and the other carriers, was readily discovered. The existence of error was, moreover, plainly indicated to defendant's agent when, at the time of the original demand, complainants produced the bills of lading issued by the steamboat company. Those bills of lading indicated through charges per bale less than those named in the expense bills. There was no through joint tariff showing the entire rate for the whole distance; the through charge was based upon a combination of the unpublished steamboat charge with the joint tariff rate of the defendant and the Iron Mountain Railroad Company, and defendant's agent and complainants and the compress company all knew of this combination. Now, while the steamboat charges were not published and therefore unknown to the public, the joint tariff of the railroad was published and a matter of common knowledge; therefore, a simple deduction of the joint tariff rate of \$3.00 per bale from the per bale charges specified in the bills of lading was sufficient to point out the probability of error on the part of the steamboat. It was not a case of transportation over half a dozen or more lines charging independent rates; there was here nothing more than the inflexible joint rate of the roads added to the charge of the steamboat, and the steamboat company had itself issued the bills of lading wherein lower total charges were specified than those named in the expense bills of the defendant. No tracing or examination was necessary therefore to determine the overcharge. The discrepancy between the contract through rate of the steamboat and the sum of the carriers' charges as shown in the expense bills was quite sufficient to establish a presumption that the steamboat had exacted from the Iron Mountain road a rate per bale in excess of that to which it was entitled under its own agreement with the shipper. This, it seems to us, warranted the complainant and the compress company in demanding a correction of the expense bills, and the offer of the compress company to deposit the whole amount claimed, pending verification or correction of the charges, certainly indicates that it sought no improper advantage and manifested no disposition to be captious or unfair.

The defendant contends that there was no common arrangement for continuous carriage or shipment between the boat line and the railroad carriers, and that therefore the steamboat transportation is not a proper subject for our consideration. But this Commission has repeatedly held that the receipt, forwarding, and delivery of traffic by connecting carriers clearly establishes the existence of a common arrangement between the carriers for continuous carriage or shipment. *Mattingly v. Moreover, we do not perceive how the defendant's case would be strengthened if its position as to our jurisdiction of the steamer line should be sustained. Even if the steamboat company was not subject to the law as to this transportation, the fact remains that the rail lines are subject to the statute, and that the defendant did demand of complainants and the compress company higher charges than it was entitled to collect and retain for the joint account of itself and the Iron Mountain, upon a showing that the steamboat had made an overcharge above the amount it declared itself willing to accept in the bills of lading which it issued; and the subsequent action of the steamboat in refunding the overcharge is conclusive upon this point. Moreover, this whole case relates to the action of defendant in New Orleans, and its object is the discontinuance of a discriminating order which defendant would apparently have put in force just as promptly if the overcharge had been made by a connecting carrier concededly subject to the federal statute; for the defendant broadly contends that it can lawfully make a discrimination of this character whenever for any cause a compress company fails to observe the terms of its guaranty. The defendant does not endeavor to justify the discrimination upon any ground which has reference to the character of any carrier concerned with the cotton on which the overcharge was made. Its reason for exacting prior payment of charges before delivery of cotton for consignees to this compress rests wholly upon its contention that the compress company refused to carry out to the letter the terms of its guaranty; but, as we have ruled above, it was not entitled to require this when by doing so it would compel the payment of an excessive freight charge.

It would seem that this controversy might have been satisfactorily settled by the aid of the telegraph in a few hours, but, as is too often the case, each party believing themselves in the right, obstinately refrained from any attempt to adjust or explain. The defendant took refuge in reprisal; the complainants finally brought this complaint, and a few weeks afterwards the demand of the defendant was correctly modified to conform to the bill of lading charge, the expense bills so reduced were paid, and the excessive character of the original charges was thereby admitted. But it took thirteen months to settle a matter that might easily have been adjusted in as many

hours, and the discriminating order of defendant against this compress company and the complainants and others as customers of the compress company was and still is continued. That order having been issued pending a controversy which has been settled, and the complainants and the compress company having been shown guilty of no fault upon which the discriminating order can be justified, it should be rescinded, and we shall direct accordingly.

In what has been said no attack whatever is intended upon the propriety of exacting a sufficient guaranty in return for the surrender of defendant's lien, nor do we impute to the carrier any intention to evade the provisions of the law. This whole matter is merely a misunderstanding which, under the attitude of the parties, authoritative action is required to correct; and for that reason we have carefully confined ourselves to the single consideration whether *upon the exact facts in this case* the defendant was justified in making the discrimination.

As to the other branch of the case we do not think that a plan of billing cotton at a proper estimated weight per bale should be deemed unlawful when actual weights cannot be ascertained without great inconvenience to the shipper or carrier, and when charges are promptly adjusted by the carrier upon the basis of actual weights furnished by the consignee. But complainants vehemently assert that they encounter great difficulty in securing the return of overcharges collected by defendant, and if this is true as a rule, the defendant should immediately alter its practice in this regard. Delays in the settlement of overcharges have become a common source of complaint from all sections of the country, and a large portion of the correspondence of this Commission has reference to the adjustment, in an informal way, of claims of this character. It is our experience that these delays are mainly caused through the failure of railway officials to promptly dispose of such claims by either

ascertaining which carrier is responsible for the excess or demonstrating to the claimant that no overcharge has been made. Many of these officials do not appreciate the full force of the fact that the retention of an overcharge has all the effect of unjust discrimination against the person from whom payment has been required, and when the refund of an excessive charge has been unnecessarily delayed for a considerable period, that the officials responsible therefor become fairly chargeable with willful intention to violate the law.

As to the charge of unjust discrimination which we find sustained the defendant will be ordered to cease and desist, while it continues to deliver flat or uncompressed cotton in the city of New Orleans to any cotton press or any compress company before payment of transportation charges, upon the guaranty of such press or company to pay such charges on demand after such payment shall have been refused by said consignees, from refusing to make such previous delivery of flat or uncompressed cotton for complainants or other consignees to the Alabama Press or the Factors' Press in said city of New Orleans upon a previously executed and sufficient guaranty from the said presses or the owners thereof to pay on demand the transportation charges due on such cotton after payment thereof has been demanded of complainant or said other consignees and such payment has been refused; and said defendant will be further required to abstain from any discrimination whatsoever using said Alabama or Factors' Press and the consignees using other cotton presses in New Orleans for or on account of any refusal of the owners or managers of said Alabama or Factors' Press to pay on demand any sum as freight charges on cotton delivered to said presses or either of them in excess of such charges as may be legally due thereon at the time of such demand.

THE INDEPENDENT REFINERS' ASSOCIATION, OF TITUSVILLE, PENNSYLVANIA,
and THE INDEPENDENT REFINERS' ASSOCIATION OF OIL CITY, PENNSYLVANIA,

v.

THE PENNSYLVANIA RAILROAD COMPANY and THE WESTERN NEW YORK &
PENNSYLVANIA RAILROAD COMPANY.

[No. 163.]

Petition of the Pennsylvania Railroad Company for Rehearing.

Report and opinion of the Commission filed Nov. 14, 1892.—Petition of Pennsylvania R. R. Co. for Rehearing filed Feb. 15, 1893.—Brief and affidavits in support of Petition filed April 13, 1893.—Briefs for complainants in opposition to Petition filed April 24, 1893.—Memorandum filed Oct. 19, 1893.

PETITION for Rehearing, see *ante*, p. 163.

Mr. James A. Logan, for Pennsylvania Railroad Company, petitioner for rehearing.
Mr. Mark J. Heywang, for complainants, in opposition to petition for rehearing.

MEMORANDUM.

BY THE COMMISSION:

On November 14, 1892, the Commission reported its findings of fact and conclusions in this and two other cases, and thereupon issued an order, bearing the same date, by which the defendants, among other things, were directed and required to take action as follows, to wit:

"That said defendants be and they severally are hereby required to wholly cease and desist from charging or collecting any rate or sum for the transportation of the barrel package on shipments of oil in barrels over their respective roads or lines from the oil regions of Western Pennsylvania to New York and New York harbor points, or to Boston and Boston points; or, on reasonable notice, promptly furnish tank cars to complainants and other shippers who may apply therefor for the purpose of loading and shipping oil therein to such New York harbor and Boston points as said shippers may direct; and that, on or before the 9th of January, 1893, said defendants notify the public accordingly by publication in their tariffs of rates and charges, pursuant to the provisions of section 6 of the Act to Regulate Commerce, and also file copies of said tariffs with this Commission as required by the provisions of said section. And defendants are further hereby directed and required to refund to the several parties legally entitled thereto, within 60 days after notice of this decision and demand thereof by such parties, all sums received by them for the transportation over their respective roads or lines of the barrel package on shipments of oil in barrels when the use of tank cars has not been open to shippers impartially and the shipper claiming reparation has been thereby deprived of their use."

It was further stated in the order that "inasmuch as the amounts wrongfully received from complainants and others who may be entitled to such reparation cannot be ascertained from the evidence already taken, these proceedings will be continued for such further action or inquiry in that behalf as may become necessary."

Only one order was issued for all three cases.

On February 15, 1893, the Pennsylvania Railroad Company filed a petition for rehearing, reciting the first above quoted part of the Commission's order and claiming that the same, if intended to apply to it, was based on certain findings and conclusions of law relating to the special circumstances of the petitioner which it believes to be erroneous. The petition then proceeds to challenge the correctness of the following finding, also shown on page 11 of the report and opinion of the Commission:

lowing finding, also shown on page 11 of the report and opinion of the Commission:

"From this state of facts it appears that while about 450 tank cars of the Pennsylvania Railroad Company may be 'open to shippers indiscriminately' it is only upon the conditions of shipment to Communipaw for delivery thereto to the National Storage Company, and that the facilities owned by this storage company for bulk shipment are not available to shippers in general."

The following statements in the report and opinion are also termed findings in the petition for rehearing and claimed to be error:

"The complainants . . . allege that 'if the demand for these cars is no greater than is stated it is because the Pennsylvania Railroad Company will not permit them to go to any other place on the seaboard at New York Harbor than Communipaw, and only there at the docks of the National Storage Company which is allied to the Standard Oil Trust.'" (Report and Opinion, p. 10.)

"This Storage Company has facilities at Communipaw for unloading tank cars into bulk steamers or vessels but these facilities are not open to complainants, and a witness (Confer) testified that in order to get oil shipped in bulk from Communipaw, the independent refiner has to sell it to the Standard Oil Company.'" (Report and Opinion, p. 11.)

Obviously, the first of these statements is only a recital of an allegation of complainants, and by reference to the report and opinion this will be found set forth in connection with allegations made in behalf of the Pennsylvania Railroad Company upon its application to submit additional testimony. As to the second statement, only the first portion can properly be termed finding; that which cites the testimony of a witness is certainly significant, but it is not so declaratory of fact that, standing alone, it should be given the weight of finding. Moreover, the facts set out in the finding first above quoted cover both of these minor statements, and the petition for rehearing, so far as it alleges errors in fact, may therefore be considered as directed only against that finding.

The Pennsylvania Railroad Company, some sixteen months after the cases had been argued, applied for leave to submit additional testimony. For reasons cited on pages 5 and 6 of our report and opinion, and as further shown by admissions of complainants' counsel in answer to such application and by the applicant's reply thereto, which are duly set out on page 10 of

said report and opinion, the application to take further testimony was denied. We think that said application, under the answer of complainants' counsel thereto, and the applicant's reply to such answer, was properly denied. The decision of these long pending cases should not, without stronger showing than was presented on the application, have been longer delayed. The fact is that the petitioner did not take advantage of its opportunities and put in its evidence at the proper time and in the regular way. As to the finding of fact in the petition for rehearing we hold, after careful re-examination of the evidence, that it was not erroneous upon the proof before the Commission.

The petitioner now comes, however, and declares its ability to establish as a matter of fact that, notwithstanding any evidence that was before us, this important finding was untrue, and presents in support of this assertion the affidavits of its general freight agent and the secretary of the National Storage Company. The petitioner is not now merely seeking after the close of testimony but prior to decision, to rebut evidence favoring the complainants' side of the case; it is attacking a finding of an authoritative body based upon that evidence, and which militates strongly against the legality of the petitioner's conduct as a common carrier. As shown by our report in these cases this carrier includes in its own equipment 1180 of the 1842 tank cars owned by railroads throughout the country, and it claims, without formal denial on the part of complainants, though there is some testimony in conflict therewith, (Report and Opinion, p. 11), that it furnishes 450 tank cars, or such part thereof as may be necessary to meet demands therefor, to shippers indiscriminately, when the shipments are made to points on its own or affiliated lines of railroad. Compared with car facilities provided by other carriers its action in this respect, if its claim is well founded, is commendable. The stated desire of the petitioner is to show that its tank cars are and have been impartially furnished to all shippers to its New York Harbor terminus and other points reached by its own and affiliated lines, and that the facilities for delivery at that terminus are open to the use of all shippers without any discrimination whatsoever, and without the imposition of conditions upon the shipper in respect to the sale of oil or other disposition thereof. In other words the petitioner contends that its action is and has been in line with the provisions of our order forbidding discrimination in the matter of facilities to shippers of oil. Our rules of practice provide for rehearing on proper showing, the petition is in form, and the affidavits filed in support thereof make out a prima facie case in favor of the petitioner's claim (*Proctor* 4 INTER 8.

v. *Cincinnati, H. & D. R. Co.* 8 Inters. Com. Rep. 181, 4 I. C. C. Rep. 448); and the petitioner may be able to show by competent proof that the finding attacked in this petition is erroneous. *Riddle v. Pittsburgh & L. E. R. Co.* 1 Inters. Com. Rep. 778, 1 I. C. C. Rep. 490. Note should be taken, however, of the fact that the affidavit of the secretary of the storage company in support of this petition is confined to the facilities of the storage company for "unloading oil by lighters in bulk or tank steamers." There is some proof in this case to the effect that tank oil carried to the seaboard is unloaded from the tank car into storage tanks, and pumped from the storage tank through a pipe into the bulk steamer. Whether the affidavit was intended to embrace the transshipment of oil by this method as well as by lighter does not appear.

We cannot infer from its petition that the carrier has any other object than to disburden itself of the charge of unjust discrimination which the finding certainly sustains, and we think, under all the circumstances, that it should not be denied the opportunity of correcting the record in this respect. Neither, in view of the fact that such a showing by the petitioner would put it in the attitude of observing the above described portion of our order, do we see how such showing can be other than beneficial to the interests of the complaining independent shippers of refined oil.

The reply brief of complainants, after citing the testimony of Ramage and Motheral as strongly supporting the finding, in addition to anything testified by the witness Confer, states as to the compulsory sale of oil to the storage company, that Mr. Confer perhaps referred to a practice of that company, or of that company and the petitioner, "of buying up refined oil from the independent refiners of this region, through an agent kept here for years for that purpose, for shipment in bulk over the Pennsylvania Railroad for delivery to the National Storage Company (Standard Oil Trust). In no other way did oil manufactured by the independent refiners go to that terminal in bulk for export. It was never claimed by complainants or any of them that the National Storage Company imposed an express or published condition that the independent refiner must sell his oil to the Standard Oil Company in order to get it transhipped in bulk to a bulk vessel. The express condition was unnecessary."

The complainants further allege against this petition that "it being the established fact and not controverted by the respondent that the National Storage Company is an ally of the Standard Oil Trust, and that the respondent will not carry oil for export for complainants to any other point at New York Harbor but to

this trust ally, what more need be said? Of course the independent refiners would not ship to such a terminal for export, nor use the alleged idle tank cars of a railroad that will go to no other than such terminal, no matter what the offered facilities of such a terminal are. The inland refiner who entrusts his oil to a storage company at the seaboard with a view to exporting, puts himself completely into the power of such concern. The exactions that may be unfairly imposed in individual cases for 'loss by leakage,' 'dumping and mixing for off color or off test,' 'cost of water-white oil for mixing,' 'tares,' 'tares guarantee,' 'commission on sales,' 'interest on goods until loaded and paid for,' 'incidental expenses,' and many other known matters of charge, may amount to a partial confiscation of the cargo. See reference to charges of this nature in printed exhibits, p. 4, and statement National Oil Company, p. 5."

Again, the complainants say, that it is significant that these carefully prepared papers and affidavits speak only of conditions now existing; that they evidently speak of a situation that has been recently arranged, and that it would be more satisfactory if they showed when the change was made and gave assurance that the equal facilities would continue beyond the proposed investigation.

The petitioner will unquestionably feel bound to cover all of these matters in its proposed showing, and if such new evidence shall result in the actual and satisfactory assurance to complainants and other independent refiners of the use, without any discrimination whatsoever, of a very large quantity of tank cars and the important and convenient terminal facilities for oil delivery and transshipment at Communipaw, it would seem that granting such leave to the petitioner will be doing the complainants a real and effectual service.

This Commission has not the power, even in a case of unjust discrimination in terminal facilities, to order the carrier to make a through route and through rate to another terminal, such, for instance, as Perth Amboy, in this case. The remedy lies in a different direction. We can order the unjust discrimination to cease, and if it is persisted in by a carrier, the law prescribes severe penalties for such perseverance.

We find on examining the claims for reparation which have been filed, in this and the other two cases mentioned, that comparatively few shipments went to Communipaw, that is to say, Communipaw shipments represent only about 7 per cent of the total number to New York harbor and Boston points, so that even if the petitioner shall be able to show that the finding referred to was wholly erroneous, such showing will not greatly affect these claims as a whole. We

4 INTER S.

nevertheless desire to state our dissatisfaction with this method of practice. The proper time to put in evidence, and all the evidence, which parties are able to produce before the Commission is before the case has been submitted. The new testimony should be carefully limited to the finding attacked in the petition and be taken in the form of deposition and filed within a limited time.

We now take up the error in law alleged by the petitioner. It is assumed in the petition for rehearing that the portion of our order which requires the defendants to cease charging for the barrel in barrel shipments, or, as an alternative, furnish shippers with tank cars for shipping oil to such *New York harbor points as the shippers may direct*, is intended, among other things, to compel the petitioner to furnish its tank cars for shipments to New York harbor points not reached by its own lines. This assumption is entirely erroneous. In this order, drawn with considerable care, the defendants in all three cases are, as before stated, included within its provisions. This petitioner, one out of seven defendants, does not carry oil either in barrels or tanks to any other point on New York harbor than Communipaw, nor does it engage with other roads in the through transportation of oil either in barrels or tanks to any other New York harbor point. Some of the other defendants *do* reach and carry to other points on that harbor, but they *do not* carry to Communipaw. There was no more intention to compel the Pennsylvania Railroad and the Lehigh Valley Railroad to make a route to Perth Amboy than there was to compel the other defendants and the Pennsylvania Railroad to make connecting through lines to Communipaw. This we think should be evidenced by the terms of the order itself. We were dealing with existing routes and existing rates. Moreover, the report and opinion, on page 18, distinctly declares (with reference to the abrogation of certain through rates to Boston & Maine Railroad points) that the Commission has no power to order through routes and through rates. The provisions of the order would not be satisfied if the Pennsylvania, or any of the defendants carried oil by the barrel method over a through route composed of its own and another defendant's road, and charged for the weight of the barrel, but refused to allow its tank cars to go over the through route to the point where the barrel shipments were destined. But, as above set forth, the Commission is informed that the petitioning defendant does not carry oil either in barrels or tanks to any other point on New York harbor except Communipaw. It is also proper to add, as matter of suggestion merely, that a serious question of unlawful discrimination might arise in case of refusal to receive and carry barrel or tank oil over a through

route on which other commodities are transported by the connecting carriers.

Under existing 'circumstances, if the Pennsylvania Railroad Company furnishes tank cars to applying shippers to its New York harbor oil terminal without discrimination, and the facilities at that terminal for the delivery of oil to consignees and bulk steamers are also provided and controlled without discrimination or prejudice as against any shipper or consignee,—and this company declares its ability, and, upon leave being granted, its intention to show this,—we think it is discharging its duty in this respect under the requirements of our order.

We therefore decide on this petition for rehearing that the petitioner, the Pennsylvania Railroad Company, have leave to take testimony by deposition with sole reference, as indicated in this memorandum, to the finding on page 11 of our report and opinion, to wit:

"From this state of facts it appears that

while about 450 tank cars of the Pennsylvania Railroad Company may be 'open to shippers indiscriminately,' it is only upon the conditions of shipment to Communipaw for delivery there to the National Storage Company and that the facilities owned by this storage company for bulk shipment are not available to shippers in general."

Provided, however, that such testimony by deposition be taken upon not less than ten days' notice to complainants' counsel and be filed in the office of this Commission on or before the 1st day of December next; and upon the further condition that the petitioner shall, prior to the taking of such testimony, publish in its oil tariffs the notification to the public required by our order of November 14, 1892.

This leave is granted solely for the purpose of affording the petitioner an opportunity to correct the record as affecting the finding above quoted, and for no other purpose.

THE F. SCHUMACHER MILLING COMPANY, AND ITS SUCCESSOR, THE AMERICAN CEREAL CO.,

v.

THE CHICAGO, ROCK ISLAND & PACIFIC RAILWAY COMPANY, *Defendant*,
and

THE CHICAGO, BURLINGTON & QUINCY RAILROAD COMPANY; THE HANNIBAL & ST. JOSEPH RAILROAD COMPANY; THE ST. LOUIS, KEOKUK & NORTHWESTERN RAILROAD COMPANY; THE KANSAS CITY, ST. JOSEPH & COUNCIL BLUFFS RAILROAD COMPANY; THE CHICAGO, MILWAUKEE & ST. PAUL RAILWAY COMPANY; THE ATCHISON, TOPEKA & SANTA FE RAILROAD COMPANY, *Intervenors*.

No. 294.

1. The fact that different rates and classifications are in force in different sections of the country will not of itself warrant an extension of the lower rate and classification to the section where the higher rate and classification are applied. There must be proof of unlawful discrimination or disadvantage, or of unreasonably high rates, to procure an order directing changes in classification.
2. Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. While the difference in cost to the carrier in transporting cereal products and flour is not in itself sufficient to warrant a higher classification upon cereal products, these products range higher in value than flour, and in the matter of volume of traffic afforded there is a very wide difference in favor of flour; and there are other conditions compelling a low rate upon flour which do not apply in the transportation of cereal products. It appears, moreover, that the complaining company controls the production of half the cereal products manufactured in this country and, under the present classification and rates, is an active competitor of other manufacturers of cereal products whose mills are located nearer to the points of destination involved in this case.
3. When an article of traffic does not move on account of burdensome rates, and the carrier is hauling a considerable number of empty cars in the direction such article would naturally move if accorded a lower rate, the carrier may be justified in carrying at a rate sufficient to induce the movement of such traffic, provided no extra or additional charge is in consequence put upon other articles carried; but the fact that freight will furnish return loads for empty cars is not a reason for the reduction of rates on such freight when it does not appear that the rates are unreasonable.
4. A mixed carload rate for cereal products or for cereal products and flour that would have the effect of throwing out of the trade many competitors of complainant who manufacture only certain kinds of cereal products, and of centralizing the business in the hands of one or more dealers, should not be granted when, without it, no wrong is done to any one and the market is open to all competitors. To obtain the abrogation of a rule in a classification denying a mixed carload rate upon specified articles the rule should be shown unreasonable, unfair or unjustly discriminative.
5. The complaining company has shown no reason why roads using the Western Classi-

fiction should adopt the Official Classification as to cereal products. Neither is there sufficient evidence in this case to justify an order directing the defendants to establish the mixed carload rate prayed for in the

complaint. But this will not preclude the filing of another complaint based on other grounds, and raising the question of unreasonable or relatively unreasonable rates on cereal products.

Complaint filed April 1, 1891.—Answers filed from May 7 to September 23, 1891.—Heard at Chicago, Ill., September 23, 1891.—Proposed Findings and Arguments filed from October 23, 1891, to January 26, 1892.—Decided October 20, 1893.

CLASSIFICATION of General Products. Mixed Carloads. See Complaint and Answer, 3 Inters. Com. Rep. 658.

Messrs. J. W. Blythe & C. M. Daves, for Chicago, B. & Q. R. Co., Hannibal & St. J. R. Co., St. Louis, K. & N. W. R. Co. and Kansas City, St. J. & C. B. R. Co.

REPORT AND OPINION OF THE COMMISSION.

McDill, Commissioner:

The demand of the complainant is that the Chicago, Rock Island & Pacific Railway shall change the classification and rate upon which it carries cereal products westward from Chicago by classifying such products with and carrying them for the rate charged for flour, and that the same rate shall be granted to a carload whether it contains a single product, or smaller quantities of several products.

The original and intervening respondents admit that the classification and rate on flour upon the railway lines using what is known as the Western Classification are different from the classification and rate in use on the lines using what is known as the Official Classification, as alleged by complainant, and also admit that they do not grant a carload rate to loads of mixed products.

The reasons given by the complainant in support of, and by the respondents against the claim, will be considered hereafter.

Finding of Facts.

1. Complainant, the F. Schumacher Milling Co., and the American Cereal Co., which as its successor is substituted as complainant, are corporations duly organized under the laws of Ohio for the purpose of dealing in all kinds of cereals and manufacturing the various products of such cereals, and their principal office and place of business is the city of Akron, in the state of Ohio.

2. The defendant, the Chicago, Rock Island & Pacific Railway, and the intervening defend-

ants, the Chicago, Burlington & Quincy; Hannibal & St. Joseph; St. Louis, Keokuk & North Western; Kansas City, St. Joseph & Council Bluffs; Atchison, Topeka & Santa Fé, and the Chicago, Milwaukee & St. Paul railroads, are common carriers engaged in the transportation of passengers and property between points in the states of Illinois, Iowa, Missouri, Kansas, Nebraska and Colorado, and are all subject to the requirements of the Act to Regulate Commerce.

3. Complainant manufactures and deals largely in pearl barley, crushed barley, cracked and rolled wheat, farina, farinose, buckwheat grits, buckwheat flour, hominy, corn meal, oatmeal, rolled oats and flour. Complainant has five mills at Akron; two flour mills, one corn meal mill, one barley mill and one hominy mill. It also has mills at Iowa City, Cedar Rapids, Rockford, Cleveland and Chicago. It annually consumes in all its mills from 14,000,000 to 15,000,000 bushels of grain, and, with the exception of flour, it manufactures about one half of all the cereal products made in the United States.

4. There are rival and competing manufacturing of cereal products at Chicago, Kansas City, Indianapolis, Terre Haute, Elgin, Mazon, Cedar Rapids, Muscatine and other points, and these competitors make the other half of the product of the United States.

5. The original and intervening defendants are members of a certain association known as the Western Classification Committee, and that

association has arranged for the members of the association schedules, classification, and rules for the carriage of articles of interstate commerce west of Chicago. Its classification, schedules, rates and rules were announced Dec. 21, 1890, and the carriers adopted the same January 1, 1891, and they were practically in use prior to that time.

6. Under this classification pearl barley in sacks, cracked and rolled wheat in sacks at owner's risk, farina, buckwheat grits in sacks, hominy in sacks, oatmeal and rolled oats in paper sacks at owner's risk, are placed in the second class.

Pearl barley in boxes, barrels or kegs; cracked and rolled wheat in boxes, barrels and kegs; flour in paper sacks at owner's risk of waste and wet; buckwheat flour in paper sacks at owner's risk of wet and waste; buckwheat grits in boxes, barrels and kegs; hominy in boxes, barrels or kegs; corn meal in paper sacks or boxes, and oatmeal and rolled oats in cotton sacks at owner's risk of wet and waste, are placed in the third class.

Flour in cotton sacks or boxes at owner's risk of wet and waste, in pails with covers well secured or in barrels, buckwheat flour in cotton sacks or boxes at owner's risk of wet and waste, or in barrels, corn meal in cotton sacks or barrels, oatmeal and rolled oats in boxes or kegs at owner's risk of wet and waste, or in barrels or half barrels, are placed in the fourth class.

Pearl barley, cracked and rolled wheat at owner's risk, buckwheat grits and hominy in sacks, boxes, barrels or kegs, in carload lots, are placed in the fifth class. Farina is not mentioned in the carload classification. Farinose not mentioned in the classification is a product similar to farina and crushed barley, not so mentioned, is similar to pearl barley.

Buckwheat flour in carloads and all other cereal products not mentioned take the wheat tariff rate. This rate is lower than that granted to articles in the fifth class, and whatever the wheat tariff rate may be at the time of shipment is the rate for the products last above named.

By a rule of the Western Classification carloads of mixed products do not take the rate of either product, but the shipper in such case pays the ordinary, less than carload, rate for the quantity of each product placed in the car.

7. Carriers by lines of railroad running east from Chicago and Mississippi river points and north of the Ohio and Potomac rivers are governed by the Official or Trunk Line Classification, and flour and cereal products are classified together and take the flour rate per carload. Mixed carloads are allowed a carload rate under the following rule:

" 8 A. When a number of different articles of the same class are shipped at one time by 4 INTER 8.

one shipper to one consignee at one point of delivery in full carloads, they shall be taken at the rate per hundred pounds for *such class in carloads*. If the articles are of more than one class the carload rate and minimum carload weight for the article of the highest class shall be charged on all the articles that make up the carload."

8. In December, 1890, complainant shipped *via* Chicago to Colorado Springs, Colo., over the Chicago, Rock Island & Pacific Railway,—

220 boxes and 43 barrels of Oatmeal, weighing 27,700 pounds, upon which the charge from Chicago was 54 $\frac{1}{2}$ cents per 100 lbs. \$150.18, and 10 boxes farinose, 10 boxes wheat and 5 boxes barley, weighing 3800 pounds, for which the charge from Chicago was \$1.46 $\frac{1}{2}$ per 100 lbs. 48.25,

Making a total charge of \$198.88

And in the same month over the same road *via* Chicago to Denver, Colorado, 250 kegs barley, weighing 24,700 lbs. for which the charge from Chicago was 95 $\frac{1}{2}$ cents per 100 lbs. \$235.14, and 50 boxes farina, 20 boxes farina and 1 box samples, weighing 3800 pounds, for which the charge from Chicago was \$1.72 $\frac{1}{2}$ per 100 lbs. 56.88.

Making a total charge of \$291.97.

And in January, 1891, complainant shipped *via* Chicago to Denver, over the Atchison, Topeka & Santa Fé Railroad,—

105 barrels of flour, weighing 21,500 pounds, upon which the charge from Chicago was 35 $\frac{1}{2}$ cents per 100 lbs. \$ 76.97, and 25 boxes wheat, 12 barrels of hominy, 10 barrels farinose and 1 barrel Mt. Sax, weighing 4000 pounds, for which the charge from Chicago was \$1.01 $\frac{1}{2}$ per 100 lbs. \$ 40.60,

Making a total charge of \$117.57.

And in the same month over the Chicago, Rock Island & Pacific Railway *via* Chicago to Pueblo, Colo.,—

21,550 pounds of oatmeal for which the charge from Chicago was 54 $\frac{1}{2}$ cents per 100 lbs. \$116.80 900 pounds of wheat for which the charge from Chicago was \$1.46 $\frac{1}{2}$ per 100 lbs. 13.16 and 1250 pounds of farina and farinose for which the charge from Chicago was \$1.72 $\frac{1}{2}$ per 100 lbs. 21.53,

Making a total charge of \$151.49

And each of these several charges, so far as made upon cereal products, exceeded the charge upon an equal weight of flour by reason of said products being placed in a different class and charged a different rate from flour.

Conclusions.

There are two questions involved:

First, Should cereal products be carried westward from Chicago at the same rate as flour?

Second, Should the rule of the western roads as to mixed carload lots be abrogated, and the same rate extended to mixed carloads as is given to a carload of a single product?

The claim of the complainant involves a change of classification, with a view of affecting a change in rates, to be ordered by the Commission in what is known as the Western Classification, governing shipments west of Chicago. As to the change in classification proposed by the complainant, it may be remarked that there is no presumption in favor of the official against the Western Classification. The fact of a difference in rate and classification establishes nothing of itself in favor of either rate or classification.

An approximation toward uniformity of classification, so far as it can be reached in justice to all interests, is generally conceded to be desirable.

Classification is recognized as a necessary method of adjusting the burdens of transportation equitably upon the various articles of traffic, in view of differing circumstances and conditions, and *but* for the necessity of such adjustment, considerations based alone on weight and distance of haul would probably determine rates, except as modified by competition. This method, while securing practical uniformity, would probably deprive many articles which are now important factors in commerce of the benefit of transportation to distant points. A system of rate-making upon each article without classification, it is said, "has proven to be so cumbersome and inconvenient that the arrangement of freight into classes is deemed by the roads an essential part of rate-making, and it is so treated by the Act to Regulate Commerce, which requires that the schedule of charges which every carrier must keep open to the public 'shall contain the classification in force.'" *Coxe v. Lehigh Valley R. Co.* 3 Inters. Com. Rep. 460, 4 I. C. C. Rep. 559.

4 INTER S.

While the nearest approximation to uniformity of classification is desirable, all agree that great caution should govern attempts to bring it about. The Commission has said, "to force it at once was undesirable," and "while one dealer might be greatly benefited another might be ruined," and that "the final adjustment of a uniform classification must necessarily be the arrangement of a number of compromises." And it was said in *Pyle v. East Tennessee, V. & G. R. Co.* 1 Inters. Com. Rep. 770, 1 I. C. C. Rep. 473, that occasional inequalities of rate, and slight and occasional differences in the rates charged would not prove that the whole system is wrong and that "when comparison is attempted to be made of classifications and rates, different conditions of transportation cannot be ignored."

An attempt to reform a classification by a selection of isolated cases and single classes, and changing them without a study of the entire scheme, would be dangerous. The entire effect of a proposed change can only be known by comprehending the relation of each particular article or class to the combined scheme.

Therefore a complainant asking a change in classification, as in this case, with reference to a single group of articles, should be required to show a case of unjust discrimination or wrong done to procure a change.

Complainant, as a reason for the change asked for, claims that the value of cereal products does not greatly exceed that of flour. In reference to the place where values should be computed the parties differ. Complainant contends for the value at Akron, the principal point of its manufacture, while respondents claim Chicago as the point, because the proof shows that complainants manufacture their products principally at Akron and ship them in bulk to agents at Chicago, who ship westward in carload lots to customers upon orders sent in by them.

From complainant's testimony the following tables of values of flour and cereal products estimated at Akron, Ohio, the point contended for by complainant, have been prepared, and are here set forth.

Statement of comparative values of flour and other articles milled by complainant, at wholesale, based on the average of the current prices at Akron, Ohio, on the following dates, viz : April 3, 1891, and September 2, 1891.

(Arranged from testimony of complainant.)

The percentages show the increase, or decrease from the cost of flour.

Flour,.....	2½	cts. per lb.							
Pearl Barley,.....	8½	"	"	"	"	"	"	"	"
Crushed ".....	4	"	"	"	"	"	"	"	"
Cracked Wheat,.....	3½	"	"	"	"	"	"	"	"
Rolled ".....	3½	"	"	"	"	"	"	"	"
Farina,.....	8½	"	"	"	"	"	"	"	"
Farinose,.....	4½	"	"	"	"	"	"	"	"
Buckwheat Grits,.....	4½	"	"	"	"	"	"	"	"
" Flour,.....	8	"	"	"	"	"	"	"	"
Oat Meal,.....	8.08½	"	"	"	"	"	"	"	"
Rolled Oats and Avena,.....	8½	"	"	"	"	"	"	"	"
Hominy,.....	2½	"	"	"	"	"	"	"	"
Corn Meal,.....	1.95	"	"	"	"	"	"	"	"

At the price named a carload of flour (30,000 lbs.) would be worth \$825, while the other articles would be worth more or less, respectively as follows:

Pearl Barley.....	Worth \$262.50	More per car.
Crushed ".....	375.00	"
Cracked Wheat.....	112.50	"
Rolled ".....	215.00	"
Farina.....	187.50	"
Farinose.....	562.50	"
Buckwheat Grits.....	450.00	"
" Flour.....	75.00	"
Oat Meal.....	101.25	"
Rolled Oats and Avena.....	195.00	"
Hominy.....	131.25	Less
Corn Meal.....	240.00	"

The complainant admits that the average value of cereal products is about 25% greater than flour. The respondent claims that the difference amounts to 40%.

Farinose, upon complainant's showing, exceeds flour in value 68%, buckwheat grits, 54%, while buckwheat flour falls to 9.1% excess of value, and corn meal shows 29.1% and hominy 15.9% less value than flour.

A table prepared from data found in this office is set forth in this report on page 9 showing the comparative rates prevailing on cereal products from Mississippi river points to Denver, 916 miles, and on similar articles from Chicago to New York, 912 miles, the western rates being made according to the Western and the eastern according to the Official Classification. The times chosen are April 1, 1891, the time when this complaint was filed; April 1, 1892; and the date when comparison was made, March 29, 1893. From this it is seen that at each date corn meal and hominy, the two articles falling in value below flour, have constantly taken the flour rate, or even a lower rate.

Therefore the question presented by complainant is, whether the other cereal products exceeding flour in value, the highest 68.2%, the lowest 9.1%, and giving an average excess in 4 INTER S.

value of 33.4%, should take the same classification, and therefore the same rate, as flour, values alone being considered?

It is a conceded rule of classification that value, on account of enhanced risk and ability to pay a greater proportion of the aggregate return upon investment, may justify a higher classification, and in view of this rule the difference in values here shown is sufficiently great to justify the conclusion that the comparison as to value alone furnishes no sufficient reason for a classification with flour. Complainant also urges as a reason for granting its prayer that the actual cost of the service rendered in transporting cereal products does not greatly differ from the cost of transporting flour.

The nature of the service as well as the evidence in the case leads to the belief that, in this particular, the difference between flour and cereal products is not of itself any justification for a different classification; but this fact must be considered in connection with other conditions to be noted, and from the combined situation we must seek to draw a just conclusion.

When we come to a consideration of the volume of business, there is a marked difference in favor of flour. The entire tonnage of cereal products is only about four per cent of the tonnage of flour, the ratio being as four to one hundred.

The evidence shows that at times the movement of empty cars westward from Chicago is very large, and that this is the case when flour and grain are moving eastward in large quantities; and complainant urges this fact as a reason for the classification of cereal products with flour.

The heavy tonnage of flour and grain eastward bound concentrates at certain periods large numbers of cars at Chicago, and it is not always practicable to obtain return loads for all of them at current rates. This may be one reason why cereals now have a relatively low

rate. We find that none of the products are placed higher than fourth class, some in fifth class, some taking flour rate, and in one instance one product having even a lower rate than flour.

But the question is, whether the entire group of articles known as cereal products involved in the complaint should be carried at the flour rate. The complainant contends that the situation should result in granting to cereal products the rate for carrying flour, when such products move in the same direction as the empty cars. The outcome of this reasoning would be that until the return cars were all filled by such stimulation of movement every article moving westward should take the flour rate.

That a large movement of return empty cars may rightfully under certain circumstances justify a lower rate is undoubtedly true. When articles of traffic do not move on account of a rate which constitutes too great a burden and the carrier is moving empty cars in the direction in which such articles would naturally move, at a lower rate, the carrier may be justified in carrying at a rate sufficient to bring about their movement, even at a rate barely remunerative. But no extra or additional charge in consequence can justly be put on other articles carried.

We therefore conclude, that before complainant could maintain its contention it should show that the rate now charged is unreasonably high, or that the articles are now charged a rate practically prohibitory. The fact shown by tables accompanying this report that in a comparison of eastern with western rates, the excess charge on cereal products in the west over charges on cereal products in the east is not equal to the average excess of western over eastern rates, seems to prove that such products are enjoying exceptional advantages over the average articles of commerce moving in the two regions. Whether or not the general excess of westbound over eastbound rates is relatively too great, is (as we shall hereafter show) now undergoing investigation in another case pending before the Commission, and upon other considerations we conclude that the complainant is not discriminated against by the present rates, without at this time passing upon the question of whether the present rate on cereals is unreasonably high. Its relation to other rates does not seem out of proportion, upon the record made in this case. The fact that such articles do now move in considerable quantities, is proof that the rate is not prohibitory. We, therefore, are unable to say, from the evidence before us, that the rate charged on cereal products now is unreasonably high, and it is not apparent from any evidence offered in this case that the rate is pro-

hibitory in character and there is, as has been said, some movement of the articles.

The changed classification and rate, we think, could only be justified if, after full consideration of the situation and interests of competing manufacturers located at Kansas City, Terre Haute, Elgin and many other points, and its effect upon their business, it was made apparent that it would not injure or subject them to undue disadvantage. The territory served by the roads carrying eastward from Chicago may justify the rates and classification prevailing in the region traversed by their lines, while it may also be true that the circumstances and conditions prevailing in the territory served by the western roads are a justification of different classifications and rates on their lines. It must be manifest, however, that if present rates are unjust and unequal to the complainant, it would be entitled to a change giving it equal and just rates without considering the effect of such change on competitors. In that case its advantage would result from its situation, of which competitors would have no right to complain.

It seems probable that the western classification was originally made because it was supposed to meet the demands and requirements of the region to be served. Presumably in the matter now under inquiry it has done so, for no complaint has come from the manufacturers of cereal products in that territory. If in two regions there are different modes of treatment, that different treatment is to be reached to a large extent by different rates. If this is the reason of the different rate, and this is claimed in the argument, and we think the situation justifies such a claim, there should be no change unless to relieve complainant from an unjust discrimination resulting from the differing classifications and rates, and to this situation we turn our attention.

The complainant, by virtue of a very large plant and numerous mills located at Akron and other points (See 8d Finding of Facts) controls about one half of the trade in cereal products. One witness said "We (the complainant company) acknowledge no competitor west of Chicago." Complainant manufactures about one half of all the cereal products made in the United States. It is probable that because of the magnitude of production by complainant the cost is greatly reduced.

The annual output of complainant's several mills is as follows:

Flour in barrels	275,000
Oatmeal "	125,000
Rye "	35,000
Barley "	50,000
Other cereal products in barrels.....	65,000

Complainant's advantages in competition are obviously great and controlling to a large degree.

The remaining half of the product made in the United States is the output of manufacturing located at Chicago, Kansas City, Mason, Cedar Rapids, Muscatine, Terre Haute, Indianapolis, Elgin and other places, principally in the west.

It may be assumed that these competitors being nearer the western market procure grain at a less cost than complainant. The shipments of flour made by complainant are not made westward in very great quantity. It makes an occasional shipment but its specialty is cereal products. The competitors of complainant are equally with complainant interested in a proper classification of these products. It can scarcely be doubted that the classification has been to them a matter of careful consideration with reference to the business in which they are engaged.

In the case of *Bates v. Pennsylvania R. Co.* 2 Inters. Com. Rep. 719, 8 L. C. C. Rep. 447, it was held unjustifiable to change a classification when such change would materially injure an important industry, and a class of shippers who have at any given point built up an industry in reliance upon a continuation of the classification, unless the existing classification and rate is shown to operate injuriously to the complaining shipper and to give undue advantage to the other shippers.

In the case just cited two of the great lines serving the territory east of Chicago petitioned for a rehearing and upon reconsideration the Commission found "that the cost of service to the carrier, including terminal expenses properly chargeable as freight charges, is greater on the product than on the raw corn." The cost of handling the product being greater than that of handling the corn, and the corn being carried in train load lots, while the product was not so carried, were mentioned as justifying the different rate on corn from that on corn products.

The committee of expert railroad men, who some time since in response to a general desire for uniform classification, reported and recommended a classification for all the railways of the United States, placed flour in barrels and sacks, at owner's risk; grain, flour in boxes, cracked and rolled wheat in barrels, and hominy and oatmeal in barrels, in the ninth class; cracked and rolled wheat, hominy and oatmeal in boxes, pearl barley in packages and farina in barrels, in the seventh class; while corn meal was classified with and accorded the same rate as flour.

This classification, although never adopted, indicates the average judgment of practical railroad men that there is no demand in the nature of things for a classification which shall include flour and each and every one of the articles included in the general class known as cereal products.

4 INTER 8.

It is like kinds of traffic under similar conditions of transportation which should have the same classification; and in this case, on account of material differences in value and volume of business, and differing conditions of transportation, and what seems to us a failure to show that the present rate and classification on the western roads works injustice to complainant, or are in any degree discriminative or preferential, we conclude that no reason has been shown why the western roads should abandon the Western and adopt the Official Classification as to cereal products. It may be that complainant's competitors in business derive some advantage from being nearer the grain supply and the western markets named by complainant, and thus procuring grain at less cost, but if so, this is a natural advantage of situation to which they are entitled. The complainant seems to be an active competitor in the region in question with the other manufacturers of cereal products. The great economies resulting from an extensive plant and the fact that, although much farther removed from the territory in question west of Chicago, it keeps up an active trade, show that complainant also has advantages. Both complainant and its competitors are entitled to immunity from any artificial lessening of their respective advantages by classification or other device.

Much that has already been said is applicable to the prayer of the complainant that cereal products should have the same rate as flour.

To reduce a given rate it should be shown to be unjust, unreasonable, or unequal. Plaintiff's contention is that cereal products moving westward should take the flour rate. The proper determination of the question raised requires a comparison of flour as an article of traffic with cereal products. It is well known that flour is generally treated as an exceptional article of transportation, there being, as it is claimed, special reasons for its taking a very low rate. These reasons are that it is a staple article of almost universal consumption; that the original article, wheat, has both weight and low value; that it is produced in very large amounts in some parts of the country at considerable distance from a portion of the consumers; that its ratio of tonnage to cereal products is as one hundred to four; and that a very large surplus over what is necessary to meet the home demand is produced, which is compelled to seek a foreign market, and in doing so comes into sharp competition with flour manufactured abroad. These facts and the fluctuations of ocean rates, if the product shall be marketed necessitates a very low rate upon flour, which has been put much below the class rates, and thereby it has taken what is technically styled a commodity rate.

The cereal products do not come into such

general use as flour. They are not shipped abroad in such quantities. The testimony shows that complainant ships only an occasional carload to foreign markets.

The following table made from the Report of 1889 prepared by the Bureau of Statistics under the direction of the Treasury Department shows the comparative value of the exports of flour and preparations from grain used for food from 1880 to 1889 inclusive:

Flour 1880	\$35,833,197
1881	45,047,257
1882	36,875,055
1883	54,824,459
1884	51,139,696
1885	52,146,836
1886	38,442,955
1887	51,950,082
1888	54,777,710
1889	45,296,485

Products of grain or cereal products.

In 1880 Corn Meal	\$ 981,861
All other products	2,439,098
In 1881 Corn meal	1,270,200
Other products	1,443,580
In 1882 Corn meal	994,201
Other products	655,142
In 1883 Corn meal	980,798
Other products	967,829
In 1884 Corn meal	818,739
Oat meal	771,471
Other products	846,119
In 1885 Corn meal	816,459
Oat meal	1,036,011
Other products	780,855
In 1886 Corn meal	858,370
Oat meal	755,973
Other products	813,207
In 1887 Corn meal	705,343
Oat meal	456,028
Other products	672,438
In 1888 Corn meal	765,086
Oat meal	130,488
Other products	741,150
In 1889 Corn meal	870,485
Oat meal	273,173
Other products	780,549

These figures show the value of flour exported from 1880 to 1889 inclusive to have been \$465,833,232 As against cereal products including corn meal for same period.... 22,644,098

The flour of the country is manufactured at Minneapolis, Duluth, and other points in the United States, and its movement to foreign markets, as well as a very large movement for home use, is in an easterly direction. The cereal products are very largely used at home, and they move along rail and water routes in almost every direction. The tonnage if therefore diffused and not concentrated, and necessarily does not upon any of the lines produce that volume of traffic which is one of the reasons for giving a low rate to flour.

Again, the record shows, what is otherwise a matter of general knowledge, that the terri-

tory principally served by the trunk lines, in which the Official Classification prevails, is engaged quite largely in rendering transportation service to manufacturing enterprises, while the western roads, governed by the Western Classification, are much more largely engaged in serving agricultural, mining, and lumber regions, and the desire upon the part of the railways to serve the necessities of their respective territories may have led to a material difference in the basis of rates for the eastern and western regions. In the east the attempt has probably been to arrange rates so as to favor manufactured goods, while in the west there may have been an incentive to favor the heavier articles and agricultural products. Whether equal and exact justice has been attained is a question under consideration on a complaint now pending before the Commission. In that investigation the whole subject in all its details can be fully considered, while in this case attention is called to a single group of articles, and no light is thrown upon the intricate relation of the question to the whole body of articles involved in an intelligent determination of the true relation of eastern and western rates. The fact that class rates are much lower on eastern than western lines is well understood. Tables are set forth (see pages 9, 10 and 11) which show at three dates, April 1, 1891, the date of complaint; April 1, 1892; and the date of comparison; the rates on cereals, class rates east and west, and the comparative rates both as to classes and the group of articles under consideration. They show the average excess of rates in western over eastern territory to be 151½%, and the average excess of rates on cereal products over western as compared with eastern roads to be 94½%, and that since April 1, 1892, the average on cereal products westward has been reduced 9½%. Thus it is seen that no greater difference prevails in western rates on cereal products, as compared with eastern rates, but rather less than prevails as to the general body of articles moved. We therefore hold that such difference as to circumstances and conditions has been shown, in a comparison between flour and cereal products, as to lead us to decline making an order reducing the rates on cereal products to the rate upon which flour is carried.

The movement of flour in every direction from place of manufacture to market, mainly on and towards the seaboard and from coast to foreign markets, has been one of many conditions supposed to justify its low rate; and complainant having failed to show such similar conditions and circumstances attending the shipment of cereal products, the Commission does not feel authorized to grant an order extending the flour rate to cereal products.

Corn Meal	45	.0098	45	.0098	44	.0096		
AVERAGE.	61 $\frac{1}{2}$.0184 $\frac{1}{2}$	53 $\frac{1}{2}$.0116 $\frac{1}{2}$	48 $\frac{1}{2}$.0105 $\frac{1}{2}$	25	.0055

The above table shows that the present average rate on cereals from the Mississippi river to Denver, Colo., under Western Classification, is 23 $\frac{1}{2}$ cents or about 94% greater than the present rate from Chicago to New York, under Official Classification, an equal distance. Also, that the present average rate per ton per mile on cereals from the Mississippi river to Den-

ver, Colo., is .00501¢ or about 92% greater than that for the same distance — Chicago to New York. Rates in the East remain the same, while in the West an average reduction of 8 $\frac{1}{2}$ cents or more than 13% is seen from 1891 to 1892

and 5 $\frac{1}{2}$ cents or about 9 $\frac{1}{2}$ % from 1892, to the present time. The rate on flour, Mississippi river to Denver, remains the same, while hominy shows a reduction of 6¢ or 12%, and corn meal 1 cent or 2 $\frac{1}{2}$ %.

Similar Comparison of Class Rates.

RATES COMPARED IN CENTS PER HUNDRED POUNDS.

FROM MISSISSIPPI RIVER TO DENVER, COLO., 916 MILES.				CLASSES.	FROM CHICAGO, ILL., TO NEW YORK, N. Y., 912 MILES.	
Rates Effective July 22, 1892.		Rates in Effect April 1, 1891 and 1892.			Rates in Effect Since April 1, 1891.	
Per 100 lbs.	Rate per Ton per Mile.	Per 100 lbs.	Rate per Ton per Mile.		Per 100 lbs.	Rate per Ton per Mile.
Cents.	Cents.	Cents.	Cents.		Cents.	Cents.
180	3.98	212	4.68	1.	75	1.64
185	2.95	170	3.71	2.	65	1.43
112	2.44	142	3.10	3.	50	1.10
90	1.96	115	2.51	4.	35	.77
70	1.58	95	2.07	5.	30	.66
				6.	25	.55
117½	2.56½	146½	3.20½	Average.	46½	1.02½

The above table shows that the average rate from the Mississippi river to Denver, Colo., under Western Classification, is 70 $\frac{1}{2}$ cents or 151 $\frac{1}{2}$ % greater than the present average rate from Chicago to New York under Official Classification, an equal distance. The average rate per ton per mile for the same territory west is therefore \$1.53 $\frac{1}{10}$ or 150% greater than that for the corresponding territory east as above. Rates in general in the east remain the same, while in the west an average reduction of 29 $\frac{1}{2}$ cents or about 20% appears.

With regard to the question of allowing the same rate on mixed carloads which is given to carloads of a single product, it may be remarked that it is almost inextricably involved in the question of the rate. A rule which might work well when the load was composed of articles bearing the same rate would be very difficult to formulate where the different articles took differing rates. The questions, which rate should govern; whether the highest or lowest; whether the proportion of different articles should influence the car load rate; whether the mixed rate should follow the highest or lowest class rate, would all be involved, and it would probably be found difficult to formulate an equitable rule which should fix the rate upon such a load.

The matter should, moreover, be considered upon the theory of complainant, which contemplates a common rate for flour and each

one of the cereal products. That in such case an abrogation of the rule of the Western Classification as to mixed carloads would result in pecuniary benefit to the complainant cannot be doubted. Respondents however claim that such an order as complainant asks would be unjust.

The rule of the Official Classification which complainant wishes adopted for western service reads as follows:

"8. A. When a number of different articles of the same class are shipped at one time by one shipper to one consignee at one point of delivery in a full carload, they shall be taken at the rate per hundred pounds for such class in carloads. If the articles are of more than one class the carload rate and minimum carload rate for the article of the highest class shall be charged on all the articles that make up the carload."

It is apparent that the adoption of this rule by the western roads would not greatly benefit the complainant unless the rate for transportation of cereal products is made the same as that charged for the transportation of flour, for under the rule quoted above, with a differing rate on the articles making the load, the entire load would take the rate charged for the highest classed article which would be found as part of the load, without reference to its proportion of the full carload.

The Western Classification denying a rate to

mixed carloads of these products is defended by the respondents as necessary in order that the manufacturers of a single cereal product may have fair treatment and be allowed to compete in the market. It is claimed that as the complainant manufactures all the cereal products, while his competitors manufacture as a rule one or more, but not all the articles, to grant a mixed carload rate would enable complainant to crush out all competition on the part of those who make only one or two of the products in controversy.

This is illustrated in the case of oatmeal in this manner. There are mills which manufacture oatmeal alone. A dealer would not usually wish to order a full carload of oatmeal if he could purchase a part load on as favorable terms. He would be required to invest less capital, and would get quicker returns from his investment, if he could buy a smaller quantity than a carload of oatmeal, and if allowed to ship a mixed carload of cereal products at a very low rate, or at the carload rate for a single product, he would purchase from a manufacturer that could give him a carload of the several products in smaller quantities, rather than from one who could only furnish a single article, so that the single product manufacturer could not so successfully engage in the trade. This would likely be the result, and counsel for complainant in argument virtually admits it, but alleges that such a result is one with which the carriers can and ought to have no concern, or at any rate that it is not within their province to remedy such an evil; that the states could not without the consent of Congress levy a tonnage tax to meet such a situation; that the railroads, as the creatures of the state, have no right to do what it could not do, and that the denial of the mixed carload rate is substantially the levy of a tax on tonnage, and as such is an unlawful interference with interstate commerce.

But it can hardly be successfully argued that a prohibition against the states, intending to keep them from interfering with interstate commerce, can apply to a question involving the proper method of regulation of interstate commerce by the Federal Government.

It is undoubtedly true that neither the Commission nor carriers are charged with any parental oversight over localities, or authorized to stimulate them with artificial helps to prosperity. But when a method of regulation would have the effect of throwing many competitors out of the trade, and centralizing it in the hands of one or more dealers, it would not be permissible if another method, without doing wrong to any one, would have the effect of leaving the market open to all competitors; for it is undoubtedly true that both the law and good business principles favor all fair competition. The rule is simply a limitation put up-

on the extension of the carload rate, and should be proven by complainant to be unfair, unjust and discriminative, if its abrogation is sought.

Complainant urges that the "rates, classifications, schedules and rules of defendants are so oppressive, unreasonable and unjust that it is wholly prevented from shipping any products except flour, oatmeal and rolled oats, from Chicago to any points in Iowa, Nebraska, Missouri, Kansas and Colorado, and especially to the cities of Denver, Colorado Springs and Pueblo, in the state of Colorado."

This is denied by the defendants, and they say that giving to this complainant the advantages asked by it would be to give it a rate from Chicago to Denver 97 cents per 100 lbs. better than is given those shipping small lots to Denver, and a proportional advantage would be given on shipments to other western points, resulting in serious injury to the business of the smaller shippers. It is said that complainant, if granted its prayer, could ship from Chicago to Denver 5000 lbs. pearl barley in boxes and barrels, and 15,000 lbs. cracked wheat in boxes and barrels, making a carload, at 55 cts. per 100 lbs., being the carload rate on flour; while a manufacturer of pearl barley alone, shipping from Chicago to Denver 5000 lbs. pearl barley in boxes and barrels, would pay the 3d class rate, \$1.52 per cwt., which is 97 cts. more per cwt. than the rate complainant demands.

There is thus brought into question the relation of rates between mixed carloads of cereal products, and less than carload shipments of a single cereal product. But upon this important matter of regulation, namely, the preservation of proper relations between the differing kinds of shipments above mentioned there has been no evidence offered. The proper relation of rates, if not preserved, introduces into transactions in transportation confusion and discrimination; and whatever may be the facts with regard to the rates now charged complainant on mixed carloads, it has not, in making out its case, offered any evidence nor furnished the Commission with any data upon which a comparison of such rates can be made. Without, therefore, passing upon the question raised in such a manner as to determine it upon its merits, we hold that in this case there has been no sufficient evidence to justify the order as to mixed carloads asked by complainant. This conclusion is reached, however, with the reservation that it does not preclude the Commission from entertaining another complaint against the rates on cereals based on other grounds, and raising the question either as to the reasonableness of such rates in themselves, or as to their relation to other similar rates.

BLANTON DUNCAN

THE ATCHISON, TOPEKA & SANTA FÉ RAILROAD COMPANY, THE ATLANTIC & PACIFIC RAILROAD COMPANY, and THE SOUTHERN CALIFORNIA RAILROAD COMPANY, known as the Santa Fé System.

BLANTON DUNCAN

THE SOUTHERN PACIFIC COMPANY and THE LOUISVILLE & NASHVILLE RAILROAD COMPANY.

[Nos. 270, 271.]

1. The remedy of a party for injury to goods shipped resulting from delay, detention, loss, breakage, rotting or other deterioration or damage, not attributable to a violation of any provision of the Act to Regulate Commerce, is by appropriate action in the courts.
2. Where a contract is made with a shipper by a carrier, member of a through line, for shipment of goods over the line at a less than the published lawful rate charged shippers in general, it is not a violation of the Act to Regulate Commerce for the delivering carrier to exact payment of the full lawful rate before delivery. Where, however, the shipper did not enter into the contract willfully for the purpose of securing a rate which he knew, or by the exercise of reasonable diligence might have known, to be illegal, but was an innocent party to it and made the shipment on the faith of the rate named, the courts seem inclined to hold (and it is a matter for their determination) that justice to the shipper requires that the goods be delivered on payment by him of the amount specified in the contract.
3. There is no necessary connection or relation between the rates on traffic of the same kind or class transported between the same points in *opposite directions* over the same road or line, and the fact that such rate in one direction is materially higher than that in the opposite direction does not, as in case of hauls over the same line in the *same direction*, establish prima facie the unreasonableness of the higher rate. This is especially true where the hauls are of great length.
4. The rates charged on "household goods" will not be declared unlawful on the mere fact that as a condition of granting them the defendants require the shipper to release all claim for damages in case of loss to the amount of \$5.00 per 100 lbs. or \$1000.00 per carload of 20,000 lbs., there being no proof showing that such rates are unreasonable in view of said limitation. In cases of loss, the shipper's remedy is at law, and the question of the reasonableness or validity of a contract limiting the carrier's liability is to be determined in the courts on the facts in each case.
5. Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities based solely upon the purpose or "business motive" of the shipper are unlawful, whether effected directly, or indirectly by methods of classification.
6. Under the Western Classification and tariff there are two west bound carload rates from Mississippi river points to Pacific coast terminals on goods termed "Emigrants' Movable" (including "household goods") one a general class rate and the other designated a "commodity" rate and less than the general rate; the latter rate is published as being open to "intending settlers only," but in practice it is given to shippers indiscriminately, and does not appear to be unreasonable in itself. *Held*, (1) That there is neither propriety in, nor necessity for, retaining in the classification and tariff either the two rates, or the statement in connection with the commodity rate that it is open to "intending settlers only," as their retention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers; (2) That the west-bound rate on "Emigrants' Movable" (including "household goods") from Louisville to Los Angeles should not be in excess of the amount of said commodity rate thereon.
7. While the circumstances and conditions in respect to the work done by the carrier and the revenue earned are dissimilar in the transportation of freights in carloads and less than carloads, and a lower rate on carloads than on less than carloads is, therefore, not in contravention of the statute, yet the difference between the two rates must be *reasonable*.
8. The agreement of the Trans-continental Association on file with the Commission is not on its face a "contract, or agreement or combination," for the "pooling of freights" or "division of earnings" between different and competing railroads, such as is declared unlawful by section 5 of the Act to Regulate Commerce.

Decided November 3, 1893.

QUESTION on rates of freight on carload and less than carload lots of "emigrants' moveables" and limitation or release of liability for damages. See Complaint, 8 Inters. Com. Rep. 256.

Mr. Blanton Duncan for complainant.

Messrs. Britton & Gray for Atchison, Topeka & Santa Fé R. Co. and affiliated companies.

Mr. James C. Martin for Southern Pacific Co.

Mr. Edward Baxter for Louisville & Nashville R. Co.

REPORT AND OPINION OF THE COMMISSION.

Clements, Commissioner :

These two cases were brought by the same complainant, Blanton Duncan, and as they raise similar, and to some extent identical, questions, may be considered together.

The case (No. 270) against the Atchison, Topeka & Santa Fé Railroad Company, the Atlantic & Pacific Railroad Company and the Southern California Railroad Company (which are known as the "Santa Fé System"), relates to a shipment by complainant over the roads of defendants in January, 1889, of a carload of "household effects" from Louisville, Ky., *via* St. Louis, Mo., to Los Angeles, Cal., and the subsequent shipment in September of that year of a "carload of household goods, containing a large portion of the same effects" back from Los Angeles over the same route to Louisville. It is alleged that the charge for the transportation of the carload from Louisville to Los Angeles was \$263.00, and from Los Angeles back, \$350.00, and that this was a "discrimination against complainant and the locality (whether Louisville or Los Angeles is not stated) and a violation of the 8d section of the Act to Regulate Commerce." It is also charged, that on the eastbound shipment the goods were in transit six or eight days longer than is usual for the passage of cars over that route and about eight days longer than the transit of the westbound carload, and were received by complainant at Louisville in a badly damaged condition—the damage being estimated at about \$1000.00.

In the case (No. 271) against the Southern Pacific Company and the Louisville & Nashville Railroad Company, complaint is made in reference to a shipment by complainant on January 12, 1889, of a carload of goods over

the roads of defendants from Louisville *via* New Orleans to Los Angeles. As to this shipment, it is alleged, that "the Louisville & Nashville Railroad Company, through its agent, made a contract with complainant in writing, to transport from Louisville to Los Angeles a carload of 'emigrant moveables,' not to exceed 20,000 lbs. in weight, for the sum of \$263, which was the rate for such carload for emigrants on the printed tariffs of the defendant companies" and "it was further agreed in said written contract, that complainant should ship in the same carload his furniture, mirrors, pictures and household effects generally, and some hams, lard, apples, butter, eggs, cheese, etc., as a part of his said emigrant moveables, without becoming subject to any further demand or claim, because they were of a different and lower classification, than household effects;" that "in pursuance of said contract the Louisville & Nashville Railroad Company received [and shipped the said effects which were received in Los Angeles on Feb. 1st by the Southern Pacific Company and on notice thereof the complainant gave to the Southern Pacific Transfer Company the \$263.00 in payment of the freight;" that thereupon, the furniture was delivered, but the Southern Pacific Company refused to deliver the provisions, etc., claiming that it was a mixed carload and demanding an additional sum of \$128.10 as freight on the provisions, etc., and on complainant's refusal to pay the additional freight held said provisions, etc., until after March 14, 1889; that complainant, about March 8, engaged a firm of lawyers to sue said railroad company for illegal conversion of the goods, and the agent of the company having heard of this requested complainant's lawyers to hold

up proceedings, and thereafter, on March 14, wrote complainant that the company would surrender the goods without further payment of freight; that complainant then accepted the goods, with notice to the company that all damage resulting from their detention would be claimed, and that "from rotting and other causes an immediate sale was necessary, with damage to a large amount, which the company refused to pay." The complainant charges that the demand by the Southern Pacific Company of the additional freight charge was a "discrimination against him in violation of the Act to Regulate Commerce." In an amendment to the complaint in this case, it is further alleged, that the Southern Pacific Company by its tariff in combination with other railroads discriminated in 1889 between west bound rates charged for household goods from Louisville to Los Angeles and rates on such goods from Los Angeles east bound to Louisville, the rate per carload west bound being \$263.00 and for the same classification and commodity over the same line east bound, being \$350.00 per car; and that this is violative of section 3 of the Act to Regulate Commerce.

In the complaints in both cases the following additional allegations and charges are made:

1. That by the tariffs of the defendant carriers the rate on "household goods" per 100 lbs. for less than the carload of 20,000 lbs. is \$3.95, both east and west bound, and the rate per carload of 20,000 lbs. is \$263.00 and that this is unreasonable, in that it compels shippers to pay for a carload of 20,000 lbs. even if the weight of the shipment is less than 10,000 lbs.; that said carriers further exact, as a condition of granting said rates, a release by the shipper of all claim for damages for loss in excess of the amount of \$5.00 per 100 lbs., and that this also is unreasonable and a violation of the Act to Regulate Commerce.

2. That the defendant carriers are "in combination with other common carriers under the name of the Trans-Continental Traffic Association, under the rules of which they committed the violations of the Act" recited by complainant; and that "said combination is violative of section 5 of the Act," forbidding the pooling of freights and division of earnings of competing railroads, in that "it is a combination on the part of the carriers to pool and divide earnings effectually, by upholding the prices of freights among the different and competing railroads."

The defendants in their answers deny all the alleged violations of law on their part and set up various matters of fact, which, so far as deemed relevant and established by the proof, will be stated and discussed in our findings of fact and conclusions.

The complainant submitted a motion in case No. 270, which is stated at the outset to be a
4 INTER S.

motion "*to strike out the answer of the defendants as irrelevant, flippant and frivolous; as containing scandalous and libelous matter, and as in disrespect of this court*" (commission), specifying certain portions of the answer as subject to those objections. The motion concludes with a prayer "that the defendants be ordered to *reform their pleading*." The motion taken as a whole we consider to be in legal effect a motion to have the answer *reformed* by striking therefrom the alleged objectionable matter. Parts of the matter referred to (and which we deem it unnecessary to set forth), while doubtless provoked by the evident warmth exhibited by the complainant in his petition, were not in our opinion justified or proper to be inserted in the answer in this case. The offensive averments made the basis of the motion are, however, surplusage; and the answer without reference to them puts in issue all the material allegations of the complaint; the parties have appeared (the determination of the motion as preliminary not having been insisted upon) have introduced their evidence, argued the case upon its merits and submitted it for our adjudication thereon, and an order at this time requiring the defendants to reform their answer by expunging therefrom the objectionable matter would only result in further delay. The matter referred to will be treated as stricken out and will not be considered in our determination of the questions presented. While under the circumstances we deem it inadvisable to issue a formal order granting the complainant's motion, it is proper to say, that the use of offensive personalities and statements in pleadings, when not essential to a full presentation of the pleader's case, should be carefully avoided and that in this case it meets with our disapproval.

In case No. 270 there is a motion, also, on the part of one of the defendants, the Atchison, Topeka & Santa Fé R. Co., to strike from the file the deposition of the complainant, Blanton Duncan, taken at Louisville, Nov. 22, 1890, on the ground as stated in the motion, that "reasonable notice of the taking thereof was not given respondent, as required by U. S. Rev. Stat. § 863 and Rule XII. of this Commission." The Rule XII. referred to is that contained in the "Rules of Practice" adopted by this Commission, June, 1889, which were in force at the time the deposition in question was taken. It provides that "when a case is at issue on petition and answer, each party may proceed at once to take depositions of witnesses in the manner provided by sections 863 and 864 of the Revised Statutes." Section 863 requires "reasonable notice" to be given in writing "to the opposite party or his attorney of record, as either may be nearest." The notice given by complainant was by registered letter addressed to "Robert Dunlap, Atty. A.

T. & S. F. R. R., Topeka, Kansas," advising him that the complainant and other witnesses would be examined before a notary public in Louisville on Nov. 22, 1890, at 10 A. M. Dunlap was not the attorney of record of the defendant and if he had been, we do not think the notice was "reasonable," as it was received by him at Topeka, a distance of 622 miles from Louisville, only two days prior to the time named for taking the testimony. But, it will be observed, Rule XII. invoked by the defendants, only applies "when a case is at issue on petition and answer." By Rule IV. it is required that "a carrier complained against must answer the complaint made within 20 days from date of notice thereof." The defendants' attorneys, Messrs. Britton & Gray, acknowledged service of a copy of the complaint, Sept. 6, 1890, but filed no answer until Dec. 20, 1890, nearly three months after the expiration of the time prescribed by the rule for filing answers and about a month after the deposition in question had been taken. When the deposition was taken the cause was not at "issue on petition and answer," and the defendants were then and had been in default nearly two months, not having answered within the prescribed time. In cases of such default the following provisions of Rule XI. apply: "The petitioner or complainant must in all cases prove the existence of the facts alleged to constitute a violation of the Act, unless the carrier complained of shall admit the same, or shall fail to answer the complaint. . . . In cases of failure to answer, the Commission will take such proof of the charge as may be deemed reasonable and proper, and may make such order therein as the circumstances of the case may require." At the hearing the complainant offered himself for cross-examination on the matters contained in the deposition and the counsel for defendant availed himself of this offer, reserving the right to insist upon the motion. It will be seen that under the views which we take of the law applicable to the questions presented in this case, the facts testified to in the deposition and not elsewhere proven can not prejudice the defendant in this proceeding. It is, therefore, unnecessary to decide whether under the circumstances above detailed the motion should or should not be granted.

Facts and Conclusions.

Where injury or damage is sustained by a party "in consequence of any violation" by a common carrier of the provisions of the Act to Regulate Commerce, it is made the duty of this Commission to issue "a notice to said common carrier to cease and desist from such violation or to make reparation for the injury so found to be done, or both." The injury to goods of complainant on their reshipment to
